

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## TO THE FOURTH EDITION.

THE Dictionary in its present form is one of the largest statistical works ever published, and as regards its utility, there is strong proof in the fact that since the first edition was published, in 1884, no fewer than 6000 copies have been disposed of, chiefly among the libraries of Europe, United States, and the British Colonies. The volume is now greatly enlarged, and will be found to consist of two distinct parts, the first comprising all known statistical data from the time of the Emperor Diocletian down to the year 1890, the second embracing so far the final decade of the century.

270 p. 0.0. 24.4 20  
All civilised nations now devote so much attention to statistics that the field of research becomes vaster year by year, and the work of condensation easier. But when a task of such magnitude devolves, as in the present case, upon a single individual, it cannot be accomplished with the same efficiency as if it were confided to an international bureau under a competent head. The nations of Europe have already seen the convenience of establishing at Berne an International Department of Telegraphs, and another for the Postal Union. It is not, therefore, chimerical to hope that an International Statistical Bureau may be one of the earliest institutions of the twentieth century, publishing every year (in English, French, and German) a Conspectus of the World, with comparative tables for each decade since 1850. I seize this opportunity to thank the various foreign Governments that send me their blue-books, showing thereby the interest which they take in my labours, and their readiness to promote the development of this branch of science.

It is to be deplored that the British Government is indifferent to a matter of this kind, as if international statistics were unimportant. The growth of banking business in Great Britain led to the establishment of Clearing-houses, the advantage of which is unquestionable. What we require is a Statistical Clearing-house, in combination with the rest of mankind: the expense would be a mere trifle, while the benefits to be derived would be immeasurable.

Meantime the Dictionary of Statistics is a step in the right direction, and the success which has attended it is a good omen.

MICHAEL G. MULHALL.

### Opinions on the Author's Works.

- "This admirable dictionary."—*Emile de Laveleye.*
- "The quintessence of statistics."—*Leroy Beaulieu.*
- "We want an edition in French."—*Yves Guyot.*
- "His statistics are most reliable."—*Baron Malortie.*
- "Mulhall's history of prices is accurate."—*Neumann Spallart.*
- "His figures are remarkably correct."—*Report of the U. S. Secretary of State.*
- "A German edition of the Dictionary would be useful."—*Tech. Blatt. Berlin.*
- "As useful as the Census report."—*Graphic.*
- "No books of reference have higher claims."—*Globe.*
- "Display a vast amount of research."—*Times.*
- "Remarkably well arranged and clear."—*Economist.*
- "Inexhaustible treasury of facts."—*Economiste Français.*
- "This wonderful work stands alone."—*Boston Beacon.*
- "An unrivalled arrangement of statistics."—*Academy.*
- "Books of reference as trustworthy as they are unique."—*Scotsman.*
- "A boon to the student or public writer."—*Irish Times.*
- "The result of laborious and skilled research."—*Contemporary Review.*
- "Compiled in a convenient and intelligible form."—*Spectator.*
- "Written with great care and intelligence."—*N. Y. Nation.*
- "His works are well known to our readers."—*Revue des Deux Mondes.*
- "Clear, accurate, and comprehensive."—*Toronto Globe.*
- "They are a mine of facts."—*Weekly Register.*
- "No library should be without them."—*Colonial Register.*
- "Bring a vast number of facts within small compass."—*Daily News.*
- "The model of a statistical work."—*Mark Lane Gazette.*

## NOTE.

PART I., down to page 606, comprehends all statistics from the earliest times to 1890; Part II. since 1890.

Money, weights, and measures are in all cases English.

Scandinavia includes Sweden, Norway, and Denmark; Austria the whole Austrian monarchy; Acadia all the maritime provinces of Canada, except Quebec.

# DICTIONARY OF STATISTICS.

## A

### AEROLITES

| Date | Locality        | Weight (lbs.) | Remarks                |
|------|-----------------|---------------|------------------------|
| 1748 | Yenisey . . .   | 1,600         | ...                    |
| 1783 | Gran Chaco . .  | 32,000        | Near Tucuman.          |
| 1784 | Bendego, Brazil | 17,000        | ...                    |
| 1793 | Graf Reinet . . | 300           | South Africa.          |
| 1803 | Normandy . . .  | ...           | 2000 red-hot stones.   |
| 1812 | Prague . . . .  | ...           | 200 hot stones.        |
| 1829 | Bohmelitz . . . | 103           | Bohemia.               |
| 1866 | Kuyahinza . . . | 670           | With 1000 smaller.     |
| 1870 | Greenland . . . | 49,000        | Now at Copenhagen.     |
| 1871 | Greenland . . . | 20,000        | Now at St. Petersburg. |

The last two were found in the years expressed, but may have fallen centuries ago. That of Gran Chaco is 95 per cent. iron. The British Museum has an aerolite weighing five tons.

### AGE

The age of various nations in ratios of 1000 was stated by Wappaeus in 1850 thus :—

| Age     | France | Belgium | Holland | Denmark | Norway | Sweden | Italy | Canada |
|---------|--------|---------|---------|---------|--------|--------|-------|--------|
| Under 5 | 93     | 116     | 113     | 125     | 135    | 126    | 119   | 183    |
| 5-10    | 92     | 109     | 111     | 108     | 114    | 107    | 114   | 144    |
| 10-15   | 88     | 98      | 108     | 95      | 100    | 96     | 107   | 122    |
| 15-20   | 88     | 90      | 93      | 95      | 86     | 98     | 101   | 116    |
| 20-30   | 163    | 166     | 174     | 181     | 174    | 177    | 168   | 169    |
| 30-40   | 148    | 135     | 134     | 130     | 136    | 135    | 134   | 106    |
| 40-50   | 125    | 118     | 106     | 109     | 88     | 100    | 105   | 74     |
| 50-60   | 102    | 78      | 82      | 75      | 78     | 83     | 78    | 47     |
| 60-70   | 65     | 55      | 49      | 53      | 57     | 51     | 51    | 24     |
| Over 70 | 36     | 35      | 30      | 29      | 32     | 27     | 23    | 15     |
| Total   | 1,000  | 1,000   | 1,000   | 1,000   | 1,000  | 1,000  | 1,000 | 1,000  |

The classification by the Bureau of Statistics in 1864 was as follows :—

| Age      | England | France | Belgium | Portugal | Spain | Italy | Medium |
|----------|---------|--------|---------|----------|-------|-------|--------|
| Under 10 | 251     | 186    | 206     | 241      | 249   | 244   | 229    |
| 10-20    | 201     | 169    | 191     | 185      | 193   | 192   | 189    |
| 20-30    | 169     | 164    | 165     | 168      | 171   | 170   | 168    |
| 30-40    | 130     | 144    | 140     | 142      | 151   | 143   | 142    |
| 40-50    | 103     | 125    | 116     | 115      | 107   | 107   | 112    |
| 50-60    | 71      | 101    | 94      | 78       | 72    | 79    | 82     |
| 60-70    | 47      | 72     | 55      | 49       | 42    | 44    | 52     |
| Over 70  | 28      | 39     | 33      | 22       | 15    | 21    | 26     |
| Total    | 1,000   | 1,000  | 1,000   | 1,000    | 1,000 | 1,000 | 1,000  |

According to the Bulletin Statistique the ratios in 1876 stood thus :—

| Age      | France | Belgium | Holland | Prussia | Sweden | Italy | Spain | Switzerland | Hungary |
|----------|--------|---------|---------|---------|--------|-------|-------|-------------|---------|
| Under 15 | 272    | 302     | 329     | 353     | 323    | 323   | 348   | 315         | 372     |
| 15-60    | 610    | 610     | 591     | 577     | 597    | 595   | 590   | 595         | 579     |
| Over 60  | 118    | 88      | 80      | 70      | 80     | 82    | 62    | 90          | 49      |
| Total    | 1,000  | 1,000   | 1,000   | 1,000   | 1,000  | 1,000 | 1,000 | 1,000       | 1,000   |

The following table of age ratios in 1000 of population is from Census reports of the various nations :—

| Country           | Date | Under 5 Yrs. | 5-20 | 20-40 | 40-60 | Over 60 |
|-------------------|------|--------------|------|-------|-------|---------|
| England . . .     | 1881 | 136          | 326  | 297   | 169   | 72      |
| Scotland . . .    | 1881 | 137          | 331  | 290   | 165   | 77      |
| Ireland . . . .   | 1881 | 111          | 348  | 263   | 172   | 106     |
| United Kingdom    | 1881 | 131          | 331  | 292   | 169   | 77      |
| France . . . . .  | 1881 | 92           | 261  | 295   | 226   | 126     |
| Prussia . . . . . | 1880 | 139          | 315  | 290   | 180   | 76      |
| Germany . . . .   | 1871 | 127          | 308  | 298   | 190   | 77      |
| Austria . . . . . | 1880 | 132          | 304  | 298   | 195   | 71      |
| Russia . . . . .  | 1875 | 138          | 318  | 318   | 180   | 46      |
| Finland . . . . . | 1870 | 144          | 299  | 296   | 186   | 75      |
| Italy . . . . .   | 1871 | 123          | 293  | 306   | 196   | 82      |
| Spain . . . . .   | 1866 | 142          | 278  | 343   | 179   | 58      |
| Portugal . . . .  | 1864 | 137          | 289  | 310   | 193   | 71      |
| Sweden . . . . .  | 1870 | 118          | 313  | 312   | 183   | 78      |
| Norway . . . . .  | 1870 | 135          | 299  | 310   | 166   | 90      |
| Denmark . . . .   | 1870 | 125          | 297  | 310   | 184   | 84      |
| Belgium . . . . . | 1880 | 124          | 304  | 282   | 195   | 95      |
| Holland . . . . . | 1870 | 113          | 314  | 309   | 187   | 77      |
| Switzerland . . . | 1880 | 117          | 296  | 289   | 209   | 89      |
| Greece . . . . .  | 1870 | 144          | 332  | 320   | 148   | 56      |
| Brazil . . . . .  | 1870 | 108          | 353  | 306   | 146   | 87      |
| United States . . | 1880 | 137          | 342  | 310   | 155   | 56      |
| Average . . . .   | ...  | 128          | 308  | 306   | 182   | 76      |

In the above table it will be observed that the lowest ratios of children are in France, Brazil, and Ireland. This is explained in the case of Ireland by the fact that the marriage rate is the lowest in the world. Moreover, the highest ratios for people over 60 years are in France and Ireland. The countries in which children form the largest ratios are Finland, Greece, and Spain, although the birth-rates in those countries are by no means the highest ; it is explained in the case of Greece and Spain by the short span of life, the proportion of persons passing their sixtieth year, as shown above, being very low.

Another distribution is as follows :—

| Age.               | France | Prussia | Austria Proper | Russia | Italy | Sweden | Belgium | Switzerland | United States | Average |
|--------------------|--------|---------|----------------|--------|-------|--------|---------|-------------|---------------|---------|
| Under 20 . . . . . | 183    | 254     | 240            | 253    | 226   | 234    | 236     | 222         | 262           | 234     |
| 20-30 . . . . .    | 170    | 200     | 196            | 203    | 190   | 197    | 192     | 191         | 217           | 195     |
| 30-40 . . . . .    | 158    | 162     | 159            | 188    | 167   | 152    | 155     | 153         | 183           | 164     |
| 40-50 . . . . .    | 137    | 128     | 139            | 130    | 139   | 130    | 127     | 136         | 127           | 133     |
| 50-60 . . . . .    | 123    | 101     | 109            | 99     | 111   | 119    | 108     | 116         | 93            | 109     |
| Over 60 . . . . .  | 103    | 79      | 86             | 81     | 85    | 90     | 87      | 93          | 62            | 85      |
| Over 60 . . . . .  | 126    | 76      | 71             | 46     | 82    | 78     | 95      | 89          | 56            | 80      |
| Total . . . . .    | 1,000  | 1,000   | 1,000          | 1,000  | 1,000 | 1,000  | 1,000   | 1,000       | 1,000         | 1,000   |

#### AVERAGE AGE OF ALL LIVING IN EACH COUNTRY

Years

|               |              |                  |               |
|---------------|--------------|------------------|---------------|
| England 26.0  | Prussia 27.1 | Sweden 28.3      | Portugal 27.6 |
| Scotland 26.0 | Austria 27.6 | Belgium 28.8     | Norway 28.0   |
| Ireland 27.5  | Russia 25.6  | Switzerland 29.2 | Denmark 28.0  |
| France 32.0   | Italy 28.5   | U. States 25.0   | Greece 25.2   |
| Holland 28.0  | Spain 26.9   | Brazil 27.0      | Average 27.5  |

#### MALES OF WORKING AGE

If we assume the working age to be from 20 to 60 years, and count only male workers, the number of population dependent on the earnings of every 100 male adults would be as follows :—

|                   |                   |                     |
|-------------------|-------------------|---------------------|
| France . . . 387  | Belgium . . . 418 | U. States . . . 440 |
| Spain . . . 388   | Sweden . . . 420  | U. Kingdom 448      |
| Austria . . . 413 | Italy . . . 424   | Scotland . . . 463  |
| Germany . . . 417 | England . . . 438 | Ireland . . . 476   |

The burden on the working population in Ireland is 10 per cent. heavier than in England, 23 per cent. heavier than in France.

#### VARIOUS CITIES

| Age     | London | Paris | St. Petersburg | Prague | Liverpool | Manchester | Birmingham |
|---------|--------|-------|----------------|--------|-----------|------------|------------|
| Under 5 | 130    | 71    | 69             | 83     | 134       | 135        | 139        |

| Total   | 1,000  | 1,000 | 1,000          | 1,000  | 1,000     | 1,000      | 1,000      |

#### UNITED KINGDOM

The ratios for the three kingdoms by Census reports were :—

| Age           | England |       | Scotland |       | Ireland |       |
|---------------|---------|-------|----------|-------|---------|-------|
|               | 1841    | 1881  | 1841     | 1881  | 1841    | 1881  |
| Under 5 . . . | 132     | 136   | 130      | 137   | 126     | 111   |
| 5-10 . . .    | 120     | 121   | 118      | 121   | 132     | 120   |
| 10-15 . . .   | 108     | 108   | 112      | 108   | 124     | 119   |
| 15-20 . . .   | 100     | 98    | 104      | 101   | 108     | 108   |
| 20-25 . . .   | 97      | 90    | 100      | 92    | 96      | 92    |
| 25-35 . . .   | 154     | 146   | 153      | 141   | 145     | 122   |
| 35-45 . . .   | 112     | 112   | 110      | 109   | 106     | 108   |
| 45-55 . . .   | 80      | 84    | 76       | 82    | 75      | 86    |
| 55-65 . . .   | 53      | 59    | 52       | 59    | 54      | 70    |
| Over 65 . . . | 44      | 46    | 45       | 50    | 34      | 64    |
| Total . . .   | 1,000   | 1,000 | 1,000    | 1,000 | 1,000   | 1,000 |

The composition of the population of England and Wales as regards sex and age in 1881 compares with 1841 thus :—

| Age     | Per 1000 Inhabitants |         |       |       |         |       |
|---------|----------------------|---------|-------|-------|---------|-------|
|         | 1841                 |         |       | 1881  |         |       |
|         | Males                | Females | Total | Males | Females | Total |
| Under 5 | 66                   | 66      | 132   | 68    | 68      | 136   |
| 5-15    | 115                  | 113     | 228   | 114   | 115     | 229   |
| 15-25   | 94                   | 103     | 197   | 92    | 96      | 188   |
| 25-35   | 74                   | 80      | 154   | 70    | 76      | 146   |
| 35-45   | 55                   | 57      | 112   | 54    | 58      | 112   |
| 45-55   | 39                   | 41      | 80    | 40    | 44      | 84    |
| Over 55 | 46                   | 51      | 97    | 49    | 56      | 105   |
| Total   | 489                  | 511     | 1,000 | 487   | 513     | 1,000 |

The composition of Scotland in the same year was as follows :—

| Age     | 1841  |         |       | 1881  |         |       |
|---------|-------|---------|-------|-------|---------|-------|
|         | Males | Females | Total | Males | Females | Total |
| Under 5 | 66    | 64      | 130   | 69    | 68      | 137   |
| 5-15    | 117   | 113     | 230   | 116   | 113     | 229   |
| 15-25   | 97    | 107     | 204   | 96    | 97      | 193   |
| 25-35   | 72    | 81      | 153   | 67    | 74      | 141   |
| 35-45   | 51    | 59      | 110   | 50    | 59      | 109   |
| 45-55   | 35    | 41      | 76    | 37    | 45      | 82    |
| Over 55 | 42    | 55      | 97    | 46    | 63      | 109   |
| Total   | 480   | 520     | 1,000 | 481   | 519     | 1,000 |

The population of Ireland was composed as follows :—

| Age     | Per 1000 Inhabitants |         |       |       |         |       |
|---------|----------------------|---------|-------|-------|---------|-------|
|         | 1841                 |         |       | 1881  |         |       |
|         | Males                | Females | Total | Males | Females | Total |
| Under 5 | 64                   | 62      | 126   | 56    | 55      | 111   |
| 5-15    | 130                  | 126     | 256   | 122   | 117     | 239   |
| 15-25   | 99                   | 105     | 204   | 98    | 102     | 200   |
| 25-35   | 69                   | 76      | 145   | 57    | 65      | 122   |
| 35-45   | 51                   | 55      | 106   | 51    | 57      | 108   |
| 45-55   | 36                   | 39      | 75    | 41    | 45      | 86    |
| Over 55 | 43                   | 45      | 88    | 65    | 69      | 134   |
| Total   | 492                  | 508     | 1,000 | 490   | 510     | 1,000 |

The composition of the United Kingdom was as follows :—

| Age     | 1841  |         |       | 1881  |         |       |
|---------|-------|---------|-------|-------|---------|-------|
|         | Males | Females | Total | Males | Females | Total |
| 0-15    | 186   | 182     | 368   | 182   | 181     | 363   |
| 15-45   | 221   | 238     | 459   | 214   | 229     | 443   |
| 45-55   | 38    | 40      | 78    | 40    | 44      | 84    |
| Over 55 | 46    | 49      | 95    | 51    | 59      | 110   |
| Total   | 491   | 509     | 1,000 | 487   | 513     | 1,000 |

## FRANCE

The effects of the Franco-Prussian War (1870-71) are visible in the diminished ratio of population of the age 15 to 60 in the Census returns of 1872.

The following table includes males and females :—

| Age            | 1851  | 1861  | 1866  | 1872  | 1876  | 1881  |
|----------------|-------|-------|-------|-------|-------|-------|
| Under 15 . . . | 282   | 275   | 272   | 279   | 272   | 266   |
| 15-60 . . .    | 618   | 619   | 617   | 606   | 610   | 608   |
| Over 60 . . .  | 100   | 106   | 111   | 115   | 118   | 126   |
| Total . . .    | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

The composition of the population of France as regards sex and age in 1881 compared with 1851 as follows :—

| Age     | Per 1000 Inhabitants |         |       |       |         |       |
|---------|----------------------|---------|-------|-------|---------|-------|
|         | 1851                 |         |       | 1881  |         |       |
|         | Males                | Females | Total | Males | Females | Total |
| Under 5 | 47                   | 46      | 93    | 46    | 46      | 92    |
| 5-15    | 92                   | 88      | 180   | 88    | 86      | 174   |
| 15-25   | 85                   | 86      | 171   | 88    | 90      | 178   |
| 25-35   | 78                   | 78      | 156   | 70    | 68      | 138   |
| 35-45   | 69                   | 68      | 137   | 67    | 65      | 132   |
| 45-55   | 59                   | 58      | 117   | 56    | 58      | 114   |
| Over 55 | 67                   | 79      | 146   | 84    | 88      | 172   |
| Total   | 497                  | 503     | 1,000 | 499   | 501     | 1,000 |

There is a marked decline in men and women of the best age, as shown thus :—

|                               | Ratio per 1000 Inhabitants |      |
|-------------------------------|----------------------------|------|
|                               | 1851                       | 1881 |
| Men between 15 and 55 . . .   | 291                        | 281  |
| Women between 15 and 45 . . . | 232                        | 223  |

## GERMANY (1885)

| Years   | Prussia | Bavaria | Saxony | All Germany |
|---------|---------|---------|--------|-------------|
| 0-5     | 134     | 124     | 135    | 131         |
| 5-10    | 119     | 115     | 117    | 118         |
| 10-15   | 106     | 105     | 105    | 106         |
| 15-20   | 95      | 92      | 96     | 94          |
| 20-30   | 163     | 148     | 171    | 161         |
| 30-40   | 127     | 125     | 133    | 126         |
| 40-50   | 103     | 111     | 100    | 106         |
| 50-60   | 75      | 86      | 73     | 77          |
| 60-70   | 53      | 62      | 49     | 55          |
| Over 70 | 25      | 32      | 21     | 26          |
|         | 1,000   | 1,000   | 1,000  | 1,000       |

In Prussia in 1867 the average age of the inhabitants was as follows :—

|                 | Years |         |
|-----------------|-------|---------|
|                 | Males | Females |
| Unmarried . . . | 14.9  | 14.7    |
| Married . . .   | 44.2  | 40.8    |
| Widowed . . .   | 61.5  | 58.2    |

The composition of the population of Prussia as to sex and age in 1880 compared with 1843 thus :—

| Age     | Per 1000 Inhabitants |         |       |       |         |       |
|---------|----------------------|---------|-------|-------|---------|-------|
|         | 1843                 |         |       | 1880  |         |       |
|         | Males                | Females | Total | Males | Females | Total |
| Under 5 | 76                   | 74      | 150   | 70    | 69      | 139   |
| 5-15    | 99                   | 97      | 196   | 110   | 109     | 219   |
| 15-45   | 242                  | 242     | 484   | 216   | 225     | 441   |
| 45-60   | 54                   | 58      | 112   | 60    | 65      | 125   |
| Over 60 | 28                   | 30      | 58    | 36    | 40      | 76    |
| Total   | 499                  | 501     | 1,000 | 492   | 508     | 1,000 |

## Males (1885)

| Age     | Prussia    | Bavaria   | Saxony    | Wurtemberg | Minor States | Total      |
|---------|------------|-----------|-----------|------------|--------------|------------|
| 0-5     | 1,880,000  | 330,000   | 210,000   | 125,000    | 475,000      | 3,020,000  |
| 5-10    | 1,700,000  | 310,000   | 185,000   | 120,000    | 455,000      | 2,770,000  |
| 10-15   | 1,520,000  | 280,000   | 165,000   | 110,000    | 420,000      | 2,495,000  |
| 15-20   | 1,350,000  | 250,000   | 150,000   | 90,000     | 365,000      | 2,205,000  |
| 20-30   | 2,260,000  | 390,000   | 260,000   | 130,000    | 645,000      | 3,685,000  |
| 30-40   | 1,760,000  | 330,000   | 210,000   | 115,000    | 485,000      | 2,900,000  |
| 40-50   | 1,410,000  | 290,000   | 150,000   | 110,000    | 430,000      | 2,390,000  |
| 50-60   | 1,005,000  | 220,000   | 110,000   | 75,000     | 300,000      | 1,710,000  |
| 60-70   | 700,000    | 160,000   | 70,000    | 55,000     | 205,000      | 1,190,000  |
| 70-80   | 270,000    | 70,000    | 25,000    | 25,000     | 90,000       | 480,000    |
| Over 80 | 40,000     | 10,000    | 5,000     | 5,000      | 30,000       | 90,000     |
| Total   | 13,895,000 | 2,640,000 | 1,540,000 | 960,000    | 3,900,000    | 22,935,000 |

## Females

| Age     | Prussia    | Bavaria   | Saxony    | Wurtemberg | Minor States | Total      |
|---------|------------|-----------|-----------|------------|--------------|------------|
| 0-5     | 1,850,000  | 335,000   | 210,000   | 125,000    | 490,000      | 3,010,000  |
| 5-10    | 1,690,000  | 315,000   | 190,000   | 125,000    | 450,000      | 2,770,000  |
| 10-15   | 1,505,000  | 290,000   | 170,000   | 115,000    | 415,000      | 2,495,000  |
| 15-20   | 1,355,000  | 255,000   | 155,000   | 95,000     | 375,000      | 2,235,000  |
| 20-30   | 2,370,000  | 410,000   | 280,000   | 145,000    | 630,000      | 3,835,000  |
| 30-40   | 1,840,000  | 350,000   | 215,000   | 125,000    | 515,000      | 3,045,000  |
| 40-50   | 1,510,000  | 310,000   | 165,000   | 120,000    | 450,000      | 2,555,000  |
| 50-60   | 1,120,000  | 240,000   | 125,000   | 85,000     | 340,000      | 1,910,000  |
| 60-70   | 805,000    | 180,000   | 85,000    | 60,000     | 245,000      | 1,375,000  |
| 70-80   | 320,000    | 80,000    | 35,000    | 30,000     | 105,000      | 570,000    |
| Over 80 | 55,000     | 15,000    | 10,000    | 5,000      | 35,000       | 120,000    |
| Total   | 14,420,000 | 2,780,000 | 1,640,000 | 1,030,000  | 4,050,000    | 23,920,000 |

## AGE

4

## AGE

## RUSSIA

The ratios of age, with distinction of sex, were in 1875 as follows :—

| Age     | Urban |         | Rural |         |
|---------|-------|---------|-------|---------|
|         | Males | Females | Males | Females |
| Under 5 | 108   | 114     | 146   | 138     |
| 5-10    | 89    | 96      | 120   | 115     |
| 10-20   | 228   | 206     | 208   | 194     |
| 20-40   | 358   | 337     | 305   | 322     |
| 40-60   | 166   | 182     | 176   | 186     |
| Over 60 | 51    | 65      | 45    | 45      |
| Total   | 1,000 | 1,000   | 1,000 | 1,000   |

## AUSTRIA

The population of Austria (without Hungary) was composed as to age and sex in the Census of 1880 thus :—

| Age     | Per 1000 Inhabitants |         |       |
|---------|----------------------|---------|-------|
|         | Males                | Females | Total |
| Under 5 | 65                   | 66      | 131   |
| 5-15    | 103                  | 104     | 207   |
| 15-30   | 125                  | 131     | 256   |
| 30-45   | 94                   | 101     | 195   |
| 45-60   | 63                   | 70      | 133   |
| Over 60 | 39                   | 39      | 78    |
| Total   | 489                  | 511     | 1,000 |

The following table shows the actual number of persons of either sex at the different ages.

| Age     | Males      | Females    | Total      |
|---------|------------|------------|------------|
| 0-5     | 1,450,000  | 1,465,000  | 2,915,000  |
| 5-10    | 1,210,000  | 1,210,000  | 2,420,000  |
| 10-15   | 1,090,000  | 1,105,000  | 2,195,000  |
| 15-20   | 1,020,000  | 1,065,000  | 2,085,000  |
| 20-30   | 1,750,000  | 1,835,000  | 3,585,000  |
| 30-40   | 1,440,000  | 1,530,000  | 2,970,000  |
| 40-50   | 1,180,000  | 1,270,000  | 2,450,000  |
| 50-60   | 865,000    | 975,000    | 1,840,000  |
| 60-70   | 570,000    | 610,000    | 1,180,000  |
| 70-80   | 210,000    | 220,000    | 430,000    |
| Over 80 | 35,000     | 45,000     | 80,000     |
| Total   | 10,820,000 | 11,325,000 | 22,145,000 |

The following table, likewise taken from the Census of 1880, shows the age of married, single, and widowed persons.

| Age     | Married   | Single     | Widowed   | Total      |
|---------|-----------|------------|-----------|------------|
| 0-20    | 50,000    | 9,560,000  | ...       | 9,610,000  |
| 20-25   | 405,000   | 1,535,000  | 5,000     | 1,945,000  |
| 25-30   | 905,000   | 720,000    | 15,000    | 1,640,000  |
| 30-40   | 2,260,000 | 625,000    | 85,000    | 2,970,000  |
| 40-50   | 1,935,000 | 330,000    | 185,000   | 2,450,000  |
| 50-60   | 1,305,000 | 220,000    | 315,000   | 1,840,000  |
| 60-70   | 670,000   | 140,000    | 370,000   | 1,180,000  |
| 70-80   | 165,000   | 50,000     | 215,000   | 430,000    |
| Over 80 | 20,000    | 10,000     | 50,000    | 80,000     |
| Total   | 7,715,000 | 13,190,000 | 1,240,000 | 22,145,000 |

## ITALY

In 1871 the population was composed as follows :—

| Age     | Per 1000 Inhabitants |         |       |
|---------|----------------------|---------|-------|
|         | Males                | Females | Total |
| Under 5 | 62                   | 61      | 123   |
| 5-15    | 101                  | 99      | 200   |
| 15-25   | 90                   | 90      | 180   |
| 25-35   | 76                   | 76      | 152   |
| 35-45   | 64                   | 61      | 125   |
| 45-55   | 50                   | 49      | 99    |
| Over 55 | 59                   | 62      | 121   |
| Total   | 502                  | 498     | 1,000 |

In 1879 the urban population was 8,824,000, in a total of 28,437,000, say, 31 per cent.

## SWITZERLAND

In 1880 the population as to age and sex was composed as follows :—

| Age     | Per 1000 Inhabitants |         |       |
|---------|----------------------|---------|-------|
|         | Males                | Females | Total |
| Under 5 | 58                   | 58      | 116   |
| 5-15    | 101                  | 101     | 202   |
| 15-30   | 122                  | 126     | 248   |
| 30-45   | 96                   | 102     | 198   |
| 45-60   | 71                   | 77      | 148   |
| Over 60 | 42                   | 46      | 88    |
| Total   | 490                  | 510     | 1,000 |

## BELGIUM

The composition of the population according to age and sex was as follows :—

| Year    | 1846  |         |       | 1880  |         |       |
|---------|-------|---------|-------|-------|---------|-------|
|         | Males | Females | Total | Males | Females | Total |
| Under 1 | 22    | 22      | 22    | 27    | 27      | 27    |
| 1-5     | 95    | 93      | 94    | 98    | 96      | 97    |
| 5-10    | 110   | 108     | 100   | 112   | 110     | 111   |
| 10-15   | 100   | 96      | 98    | 101   | 99      | 100   |
| 15-20   | 91    | 89      | 90    | 93    | 91      | 92    |
| 20-30   | 167   | 165     | 166   | 154   | 154     | 154   |
| 30-40   | 137   | 133     | 135   | 127   | 127     | 127   |
| 40-50   | 121   | 115     | 118   | 108   | 106     | 107   |
| 50-60   | 72    | 84      | 78    | 86    | 86      | 86    |
| 60-70   | 51    | 59      | 55    | 57    | 61      | 59    |
| Over 70 | 34    | 36      | 35    | 37    | 43      | 40    |
| Total   | 1,000 | 1,000   | 1,000 | 1,000 | 1,000   | 1,000 |

## SWEDEN

The ratios in this country were as follows :—

| Age      | 1750  | 1785  | 1810  | 1835  | 1860  | 1875  |
|----------|-------|-------|-------|-------|-------|-------|
| Under 15 | 336   | 313   | 318   | 352   | 335   | 323   |
| 15-60    | 564   | 600   | 597   | 569   | 583   | 597   |
| Over 60  | 100   | 87    | 85    | 79    | 82    | 80    |
| Total    | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

## AGE

5

## AGE

## NORWAY

| Age     | Urban | Rural | Rich  | Poor  | All Norway |
|---------|-------|-------|-------|-------|------------|
| Under 5 | 140   | 135   | 137   | 133   | 136        |
| 5-15    | 207   | 228   | 242   | 220   | 225        |
| 15-30   | 278   | 239   | 211   | 256   | 245        |

| Total   | 1,000 | 1,000 | 1,000 | 1,000 | 1,000      |

## GREECE

The population in 1879 was composed as follows :—

| Age     | Per 1000 Inhabitants |         |       |
|---------|----------------------|---------|-------|
|         | Males                | Females | Total |
| Under 5 | 78                   | 70      | 148   |
| 5-15    | 129                  | 111     | 240   |
| 15-20   | 46                   | 51      | 97    |
| 20-40   | 160                  | 149     | 309   |
| 40-60   | 82                   | 69      | 151   |
| Over 60 | 30                   | 25      | 55    |
| Total   | 525                  | 475     | 1,000 |

## UNITED STATES

The ratios in the United States since 1830 have been :—

| Age     | 1830  | 1840  | 1850  | 1860  | 1870  | 1880  |
|---------|-------|-------|-------|-------|-------|-------|
| Under 5 | 180   | 174   | 151   | 154   | 143   | 137   |
| 5-20    | 381   | 373   | 373   | 358   | 354   | 342   |
| 20-40   | 287   | 297   | 306   | 309   | 304   | 310   |
| 40-60   | 112   | 116   | 128   | 134   | 149   | 155   |
| Over 60 | 40    | 40    | 42    | 45    | 50    | 56    |
| Total   | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |

The composition of the sections of the Union as to age and sex in 1880 was as follows :—

| Age     | New England |         |       | Middle States |         |       |
|---------|-------------|---------|-------|---------------|---------|-------|
|         | Males       | Females | Total | Males         | Females | Total |
| 0-15    | 156         | 154     | 310   | 181           | 179     | 360   |
| 15-60   | 288         | 309     | 597   | 281           | 292     | 573   |
| Over 60 | 44          | 49      | 93    | 33            | 34      | 67    |
| Total   | 488         | 512     | 1,000 | 495           | 505     | 1,000 |

| Age     | South |         |       | West  |         |       |
|---------|-------|---------|-------|-------|---------|-------|
|         | Males | Females | Total | Males | Females | Total |
| 0-15    | 233   | 225     | 458   | 201   | 195     | 396   |
| 15-60   | 245   | 252     | 497   | 299   | 255     | 554   |
| Over 60 | 23    | 22      | 45    | 27    | 23      | 50    |
| Total   | 501   | 499     | 1,000 | 527   | 473     | 1,000 |

The highest ratio for able-bodied men is in the West, and for women between 15 and 60 is in New England.

The great number of German, Irish, and Scandinavian settlers in the Western States explains the high ratio there of able-bodied men.

The composition of the population as regards sex and age was as follows :—

| Age     | 1800  |         |       | 1810  |         |       | 1820  |         |       |
|---------|-------|---------|-------|-------|---------|-------|-------|---------|-------|
|         | Males | Females | Total | Males | Females | Total | Males | Females | Total |
| 0-16    | 260   | 242     | 502   | 257   | 242     | 499   | 249   | 240     | 489   |
| 16-45   | 192   | 188     | 380   | 191   | 189     | 380   | 196   | 193     | 389   |
| Over 45 | 60    | 58      | 118   | 63    | 58      | 121   | 63    | 59      | 122   |
| Total   | 512   | 488     | 1,000 | 511   | 489     | 1,000 | 508   | 492     | 1,000 |

After 1820 the classification according to age was altered by the Census officials : since 1830 the ratios show as follows :—

| Age     | 1830  |         |       | 1840  |         |       | 1850  |         |       |
|---------|-------|---------|-------|-------|---------|-------|-------|---------|-------|
|         | Males | Females | Total | Males | Females | Total | Males | Females | Total |
| 0-5     | 92    | 88      | 180   | 90    | 84      | 174   | 76    | 74      | 150   |
| 5-15    | 138   | 132     | 270   | 134   | 129     | 263   | 135   | 131     | 266   |
| 15-50   | 236   | 231     | 467   | 245   | 234     | 479   | 254   | 240     | 494   |
| Over 50 | 42    | 41      | 83    | 42    | 42      | 84    | 46    | 44      | 90    |
| Total   | 508   | 492     | 1,000 | 511   | 489     | 1,000 | 511   | 489     | 1,000 |

| Age     | 1860  |         |       | 1870  |         |       | 1880  |         |       |
|---------|-------|---------|-------|-------|---------|-------|-------|---------|-------|
|         | Males | Females | Total | Males | Females | Total | Males | Females | Total |
| 0-5     | 78    | 76      | 154   | 73    | 70      | 143   | 68    | 66      | 134   |
| 5-15    | 125   | 120     | 245   | 124   | 120     | 244   | 120   | 117     | 237   |
| 15-50   | 261   | 244     | 505   | 252   | 250     | 502   | 259   | 248     | 507   |
| Over 50 | 50    | 46      | 96    | 58    | 53      | 111   | 63    | 59      | 122   |
| Total   | 514   | 486     | 1,000 | 507   | 493     | 1,000 | 510   | 490     | 1,000 |

Men in the prime of life (15-50) held the highest ratio in 1860 ; women of child-bearing age (15-50) in 1870. It appears that the preponderance of males is due to immigration, the total number of settlers arrived in 42 years down to 1860 showing thus :—

|         | No.       | Ratio |
|---------|-----------|-------|
| Males   | 2,951,000 | 594   |
| Females | 2,009,000 | 406   |
| Total   | 4,960,000 | 1,000 |

As regards the coloured population, the sexes are almost even, viz :—

| Year | Number    |           | Ratio |         |
|------|-----------|-----------|-------|---------|
|      | Males     | Females   | Males | Females |
| 1830 | 1,166,000 | 1,162,000 | 501   | 499     |
| 1850 | 1,811,000 | 1,828,000 | 498   | 502     |

The white population, owing to immigration, had a much higher ratio of persons of working age than the coloured, as shown in the tables for 1850, viz :—

| Age     | Per 1000 Whites |         |       | Per 1000 Coloured |         |       |
|---------|-----------------|---------|-------|-------------------|---------|-------|
|         | Males           | Females | Total | Males             | Females | Total |
| 0-15    | 208             | 201     | 409   | 223               | 223     | 446   |
| 15-50   | 258             | 242     | 500   | 234               | 235     | 469   |
| Over 50 | 47              | 44      | 91    | 41                | 44      | 85    |
| Total   | 513             | 487     | 1,000 | 498               | 502     | 1,000 |

AGRICULTURE

This is the most important industry of mankind, for (without counting India, China, &c.) it occupies 80,000,000 peasants, represents a capital of 23,000 millions sterling, and has annual products to the value of almost 4000 millions. Capital and product have more than doubled since 1840, but the number of hands engaged has not risen 50 per cent., viz. :—

| Year       | Millions, £ Sterling |         | Agricultural Peasants |
|------------|----------------------|---------|-----------------------|
|            | Capital              | Product |                       |
| 1840 . . . | 9,036                | 1,824   | 55,080,000            |
| 1860 . . . | 14,923               | 2,483   | 66,000,000            |
| 1887 . . . | 23,006               | 3,948   | 80,050,000            |

The following tables show approximately how agricultural capital was made up at the above dates :—

|                   | Year 1840. Value in Millions, £ Sterling |        |          |       |
|-------------------|------------------------------------------|--------|----------|-------|
|                   | Land                                     | Cattle | Sundries | Total |
| Europe . . .      | 6,471                                    | 875    | 820      | 8,166 |
| United States . . | 400                                      | 96     | 100      | 596   |
| Colonies, &c. . . | 224                                      | 23     | 27       | 274   |
| Total . . .       | 7,095                                    | 994    | 947      | 9,036 |

|                   | Year 1860. Value in Millions, £ Sterling |        |          |        |
|-------------------|------------------------------------------|--------|----------|--------|
|                   | Land                                     | Cattle | Sundries | Total  |
| Europe . . .      | 9,957                                    | 1,260  | 1,227    | 12,444 |
| United States . . | 1,382                                    | 226    | 237      | 1,845  |
| Colonies, &c. . . | 523                                      | 76     | 35       | 634    |
| Total . . .       | 11,862                                   | 1,562  | 1,499    | 14,923 |

|                   | Year 1887. Value in Millions, £ Sterling |        |          |        |
|-------------------|------------------------------------------|--------|----------|--------|
|                   | Land                                     | Cattle | Sundries | Total  |
| Europe . . .      | 13,776                                   | 1,940  | 1,737    | 17,453 |
| United States . . | 2,560                                    | 501    | 635      | 3,696  |
| Colonies, &c. . . | 1,440                                    | 260    | 157      | 1,857  |
| Total . . .       | 17,776                                   | 2,701  | 2,529    | 23,006 |

The agricultural capital of Europe has doubled since 1840; that of the United States has increased sixfold. The average increase has been 197 millions sterling per annum in Europe, and 67 millions in the United States.

The value of agricultural products at the above periods was approximately as follows :—

| Millions, £ Sterling |       |             |                   |       |
|----------------------|-------|-------------|-------------------|-------|
| Year                 | Grain | Other Crops | Pastoral Products | Total |
| 1840                 | 702   | 538         | 584               | 1,824 |
| 1860                 | 1,130 | 575         | 778               | 2,483 |
| 1887                 | 1,091 | 1,445       | 1,412             | 3,948 |

The value of grain crops has diminished since 1860, while that of pastoral products has nearly doubled, the price of grain having declined very notably, while that of meat, as also of dairy products, has risen. The relative importance of the three great branches of agricultural industry at the said dates is shown as follows, judged by money values :—

|                      | 1840  | 1860  | 1887  |
|----------------------|-------|-------|-------|
| Grain . . . . .      | 38.5  | 45.5  | 27.5  |
| Other crops . . . .  | 29.8  | 23.2  | 36.8  |
| Pastoral produce . . | 31.7  | 31.3  | 35.7  |
| Total . . . . .      | 100.0 | 100.0 | 100.0 |

TILLAGE

The area under crops has risen from 492 million acres in 1840 to 807 millions in 1888, an increase of 315 millions, viz. :—

|                     |                    |
|---------------------|--------------------|
| In Europe . . . .   | 131 million acres. |
| „ United States . . | 151 „ „            |
| „ Colonies, &c. . . | 33 „ „             |
| Total . . . . .     | 315 „ „            |

In 48 years the area of tillage and planting has risen 65 per cent., but the grain crops have risen 120 per cent., viz. :—

| Millions of Bushels |        |           |          |       |
|---------------------|--------|-----------|----------|-------|
| Year                | Europe | U. States | Colonies | Total |
| 1840                | 3,212  | 616       | 291      | 4,119 |
| 1860                | 4,046  | 1,240     | 464      | 5,750 |
| 1887                | 5,588  | 2,586     | 948      | 9,122 |

Improved implements and machinery have made tillage more productive and grain cheaper. In 1840 each peasant produced about 73 bushels of grain; in 1860 the average was 87, and in 1887 it had risen to 114; that is, two men now produce more grain than three did in 1840. The following table shows the distribution of grain-growing in 1887 :—

|                   | Millions of Acres |      |        |         |       | Crops, Millions of Bushels |       |        |         |       |
|-------------------|-------------------|------|--------|---------|-------|----------------------------|-------|--------|---------|-------|
|                   | Wheat             | Oats | Barley | Various | Total | Wheat                      | Oats  | Barley | Various | Total |
| Europe . . . . .  | 90                | 72   | 38     | 148     | 348   | 1,336                      | 1,628 | 694    | 1,930   | 5,588 |
| United States . . | 38                | 26   | 3      | 75      | 142   | 442                        | 640   | 58     | 1,446   | 2,586 |
| Colonies, &c. . . | 46                | 3    | 7      | 13      | 69    | 465                        | 97    | 82     | 304     | 948   |
| Total . . . . .   | 174               | 101  | 48     | 236     | 559   | 2,243                      | 2,365 | 834    | 3,680   | 9,122 |

In the United States 9,000,000 hands raise nearly half as much grain as 66 millions in Europe. Thus it appears that for want of implements or proper machinery there is

a waste of labour in Europe equal to 48 millions of peasants. In other words, one farm labourer in the United States is worth more than three in Europe.

# AGRICULTURE.

*Value of all agricultural products, in millions £ sterling.*

*Pounds of grain produced per inhabitant.*

*Acres under grain per 100 inhabitants*

PASTORAL INDUSTRY.

The production of meat at the same periods was approximately as follows :—

| Year | Tons      |               |               |            |
|------|-----------|---------------|---------------|------------|
|      | Europe    | United States | Colonies, &c. | Total      |
| 1840 | 6,800,000 | 2,120,000     | 200,000       | 9,120,000  |
| 1860 | 7,630,000 | 2,970,000     | 400,000       | 11,000,000 |
| 1887 | 8,633,000 | 4,750,000     | 920,000       | 14,303,000 |

The production of meat has risen 57 per cent. since 1840, while that of grain, as we have already seen, has increased 120 per cent. In aliquot parts production of meat showed thus :—

|                       | 1840  | 1860  | 1887  |
|-----------------------|-------|-------|-------|
| Europe . . . . .      | 74.5  | 69.3  | 60.4  |
| United States . . . . | 23.3  | 27.0  | 33.2  |
| Colonies, &c. . . . . | 2.2   | 3.7   | 6.4   |
| Total . . . . .       | 100.0 | 100.0 | 100.0 |

See *Cattle and Food*.

AGRICULTURAL AREA

The area under crops in the various countries was approximately as follows :—

|                       | Millions of Acres |      |      |      |      |
|-----------------------|-------------------|------|------|------|------|
|                       | 1820              | 1840 | 1860 | 1880 | 1888 |
| U. Kingdom . . . .    | 19                | 22   | 22   | 23   | 21   |
| France . . . . .      | 48                | 55   | 57   | 60   | 61   |
| Germany . . . . .     | 37                | 45   | 50   | 58   | 59   |
| Russia . . . . .      | 120               | 135  | 145  | 183  | 190  |
| Austria . . . . .     | 50                | 53   | 58   | 60   | 65   |
| Italy . . . . .       | 20                | 22   | 26   | 35   | 35   |
| Spain . . . . .       | 25                | 30   | 30   | 32   | 32   |
| Portugal . . . . .    | 3                 | 4    | 5    | 5    | 5    |
| Sweden . . . . .      | 2                 | 5    | 8    | 12   | 12   |
| Norway . . . . .      | 1                 | 3    | 4    | 4    | 4    |
| Denmark . . . . .     | 2                 | 5    | 6    | 8    | 8    |
| Holland . . . . .     | 4                 | 4    | 5    | 5    | 5    |
| Belgium . . . . .     | 3                 | 4    | 5    | 5    | 5    |
| Other countries . . . | 30                | 40   | 50   | 50   | 50   |
| Europe . . . . .      | 364               | 427  | 471  | 546  | 558  |
| U. States . . . . .   | 30                | 50   | 90   | 166  | 201  |
| Canada . . . . .      | 2                 | 4    | 8    | 10   | 13   |
| Australia . . . . .   | 1                 | 2    | 3    | 10   | 14   |
| Argentina . . . . .   | ...               | ...  | 1    | 3    | 6    |
| Brazil . . . . .      | ...               | 1    | 1    | 2    | 2    |
| Algeria . . . . .     | 4                 | 5    | 6    | 7    | 8    |
| Egypt . . . . .       | 2                 | 4    | 4    | 5    | 5    |
| Total . . . . .       | 402               | 492  | 583  | 749  | 807  |

The area has doubled since 1820, the increase during the various periods having been as follows :—

| Period  | Millions of Acres | Acres per Annum |
|---------|-------------------|-----------------|
| 1820-40 | 90                | 4,500,000       |
| 1841-60 | 91                | 4,550,000       |
| 1861-80 | 166               | 8,300,000       |
| 1881-88 | 58                | 7,200,000       |

It is especially since 1860 that improvements in agricultural machinery have been attended with a notable extension of cultivated area.

AGRICULTURAL POPULATION

Hands engaged in tillage and pastoral industries were approximately as follows :—

|                       | 1840       | 1860       | 1887       |
|-----------------------|------------|------------|------------|
| Europe . . . . .      | 50,430,000 | 58,160,000 | 66,320,000 |
| United States . . . . | 2,550,000  | 4,340,000  | 9,000,000  |
| Colonies, &c. . . . . | 2,100,000  | 3,500,000  | 4,730,000  |
| Total . . . . .       | 55,080,000 | 66,000,000 | 80,050,000 |

The ratios of capital and products that corresponded to the agricultural population, that is, to each adult peasant, were :—

|                       | Capital |       | Product |      |
|-----------------------|---------|-------|---------|------|
|                       | 1840    | 1887  | 1840    | 1887 |
| Europe . . . . .      | £ 162   | £ 263 | £ 31    | £ 43 |
| United States . . . . | 235     | 410   | 72      | 85   |
| Colonies, &c. . . . . | 134     | 390   | 46      | 61   |
| General average . . . | 164     | 287   | 33      | 50   |

Each hand in the United States produces double the annual value that prevails in Europe.

CROPS

The production of grain (excluding rice) was approximately as follows :—

|                       | Millions of Bushels |         |         |       | Bushels per Inhabitant |         |      |
|-----------------------|---------------------|---------|---------|-------|------------------------|---------|------|

The production of grain per inhabitant in Europe is higher now than fifty years ago.

The production of wheat was approximately as follows:—

|                             | Millions of Bushels |         |         |         |       |

Mr. Spallart's estimate of the crops of the world down to 1884 compares with the official returns and latest estimates for 1887 as follows:—

|         | Millions of Bushels Yearly |       |        |       |       |        |
|---------|----------------------------|-------|--------|-------|-------|--------|
|         | Wheat                      | Rye   | Barley | Oats  | Maize | Sundry |
| 1871-80 | 1,944                      | 1,256 | 774    | 1,870 | 1,528 | 312    |
| 1875-84 | 1,962                      | 1,165 | 788    | 1,936 | 1,829 | 293    |
| 1883-84 | 2,115                      | 1,196 | 803    | 2,189 | 2,035 | 324    |
| 1887    | 2,243                      | 1,418 | 834    | 2,365 | 1,979 | 283    |
|         |                            |       |        |       |       | 9,122  |

Newmann Spallart's statement of the ordinary production of grain (1874-84) is as follows:—

|                          | Millions of Bushels |       |        |       |       |          |       |
|--------------------------|---------------------|-------|--------|-------|-------|----------|-------|

\* The figures for the Argentine Republic, Asia Minor, and Cape Colony are not Mr. Spallart's.

The acreage of grain-crops (not including rice) in 1887-88 was as follows:—

|                                | Acres       |             |            |             |             | Acres per 100 Inhabitants |
|--------------------------------|-------------|-------------|------------|-------------|-------------|---------------------------|

The cultivation of wheat and barley requires as follows:—

| At               | Days of Cultivation |        | Mean Temperature, Fahr. |        |
|------------------|---------------------|--------|-------------------------|--------|
|                  | Wheat               | Barley | Wheat                   | Barley |
| Alsace           | 131                 | 122    | 60                      | 57     |
| Kingston, Canada | 106                 | 92     | 68                      | 66     |
| Cincinnati       | 137                 | ...    | 60                      | ...    |

According to Broch (1885), the average product per acre of different kinds of grain, taken from five years' results in the various countries, was as follows:—

|            | Bushels |     |        |      |       |          |
|------------|---------|-----|--------|------|-------|----------|
|            | Wheat   | Rye | Barley | Oats | Maize | Potatoes |
| U. Kingdom | 35      | 33  | 38     | 33   | ...   | ...      |
| France     | 16      | 16  | 20     | 25   | 16    | 102      |
| Germany    | 19      | 16  | 24     | 27   | ...   | 121      |
| Russia     | 9       | 11  | 9      | 18   | ...   | 111      |
| Austria    | 16      | 14  | 17     | 20   | ...   | 130      |
| Hungary    | 12      | ... | 16     | 18   | 17    | 107      |
| Italy      | 12      | ... | 15     | 20   | 21    | 164      |
| Sweden     | 20      | 20  | 34     | 34   | ...   | 121      |
| Norway     | 25      | 27  | 31     | 39   | ...   | 127      |
| Denmark    | 25      | 25  | 27     | 30   | ...   | 95       |
| Holland    | 23      | 18  | 37     | 42   | ...   | 177      |
| Belgium    | 24      | 22  | 35     | 40   | ...   | 164      |
| U. States  | 12      | 13  | 22     | 26   | 24    | 76       |
| Australia  | 10      | ... | 21     | 28   | 33    | 141      |

He estimates the crops in Europe as follows:—

|        | Millions of Bushels |             |                 |
|--------|---------------------|-------------|-----------------|
|        | Crop                | Deduct Seed | For Consumption |
| Wheat  | 1,236               | 176         | 1,060           |
| Rye    | 1,230               | 175         | 1,055           |
| Barley | 630                 | 90          | 540             |
| Oats   | 1,528               | 218         | 1,310           |
| Maize  | 210                 | 30          | 180             |
| Total  | 4,834               | 689         | 4,145           |

He says that 2227 million bushels are used for human food, and 1918 for cattle, alcohol, &c.; the average consumption of grain per head of population in Europe being 410 lbs., or almost 7 bushels, yearly. His estimates, however, appear altogether too low, being 100 million bushels short in wheat, and the same in oats, while his crop of maize is but little over half the reality. It is to be observed in his favour that the crops are now heavier than when he wrote, in 1885.

The production and consumption of grain in the various countries are approximately as follows:—

|                 | Production, Million Bushels | Consumption, Millions of Bushels |        |        |             |       |
|-----------------|-----------------------------|----------------------------------|--------|--------|-------------|-------|
|                 |                             | Food                             | Sowing | Liquor | Cattle, &c. | Total |

| Canada          | 148                         | 32                               | 25     | 5      | 56          | 118   |
| Australia       | 51                          | 24                               | 10     | 3      | 3           | 40    |
| Argentina       | 50                          | 15                               | 10     | ...    | ...         | 25    |
| India           | 250                         | 183                              | 40     | ...    | ...         | 223   |
| Other countries | 415                         | 271                              | 40     | ...    | 154         | 465   |
| Total           | 9,122                       | 3,847                            | 1,315  | 283    | 3,677       | 9,122 |

The average yield of crops per 100 lbs. of seed is approximately as follows:—

|         | Wheat | Oats  | Barley | Rye   |
|---------|-------|-------|--------|-------|
| France  | 800   | 750   | 800    | 700   |
| Germany | 780   | 700   | 900    | 600   |
| Russia  | 600   | 750   | 700    | 600   |
| Denmark | 900   | 800   | 800    | 800   |
| Sweden  | 600   | 400   | 400    | 500   |
| Holland | 1,400 | 1,400 | 1,400  | 1,400 |
| Belgium | 1,200 | 880   | 1,310  | 1,210 |

The following is a summary of the crops and value since 1874 :—

|                  | Million of Bushels,<br>per Annum |       |       | Value, Millions<br>£ |       |
|------------------|----------------------------------|-------|-------|----------------------|-------|
|                  | 1874-84                          | 1884  | 1887  | 1874-84              | 1887  |
| Wheat . . . . .  | 2,068                            | 2,348 | 2,243 | 543                  | 412   |
| Rye . . . . .    | 1,175                            | 1,226 | 1,418 | 235                  | 227   |
| Barley . . . . . | 800                              | 795   | 834   | 153                  | 108   |
| Oats . . . . .   | 1,936                            | 2,152 | 2,365 | 202                  | 185   |
| Maize . . . . .  | 1,890                            | 2,148 | 1,979 | 204                  | 186   |
| Sundry . . . . . | 290                              | 289   | 283   | 30                   | 25    |
| Total . . . . .  | 8,159                            | 8,958 | 9,122 | 1,367                | 1,143 |

The values of these crops in 1887 were thus made up :—

|                           | Millions, £ Sterling |      |        |       |          |       |
|---------------------------|----------------------|------|--------|-------|----------|-------|
|                           | Wheat                | Oats | Barley | Maize | Rye, &c. | Total |
| Europe . . . . .          | 261                  | 142  | 89     | 36    | 236      | 764   |
| United States . . . . .   | 71                   | 36   | 7      | 124   | 5        | 243   |
| India and Japan . . . . . | 52                   | ...  | ...    | ...   | ...      | 52    |
| Colonies, &c. . . . .     | 28                   | 7    | 12     | 26    | 11       | 84    |
| Total . . . . .           | 412                  | 185  | 108    | 186   | 252      | 1,143 |

(Deducting India and Japan, the value will be 1091 millions, as in the table of nations at p. 11.)

If the average prices of 1874-84 had been maintained, mankind would have had to pay 1577 millions sterling for the crops of 1887, a sum nearly 40 per cent. in excess of the above value. The following table shows the countries (1886-87) that had surplus grain to export, and those that imported to cover deficits :—

| Exporters           | Bushels     | Importers                    | Bushels     |
|---------------------|-------------|------------------------------|-------------|
| Russia . . . . .    | 215,000,000 | United Kingdom . . . . .     | 286,000,000 |
| Austria . . . . .   | 13,000,000  | France . . . . .             | 54,000,000  |
| Roumania . . . . .  | 56,000,000  | Germany . . . . .            | 72,000,000  |
| U. States . . . . . | 168,000,000 | Scandinavia . . . . .        | 18,000,000  |
| Argentina . . . . . | 24,000,000  | Holland & Belgium . . . . .  | 55,000,000  |
| India . . . . .     | 27,000,000  | Switzerland . . . . .        | 15,000,000  |
| Australia . . . . . | 12,000,000  | Spain and Portugal . . . . . | 11,000,000  |
| Canada . . . . .    | 30,000,000  | Italy . . . . .              | 36,000,000  |
| Total . . . . .     | 545,000,000 | Total . . . . .              | 547,000,000 |

Mr. Spallart sums up the value of all grain crops in 1884 thus :—

|                           | Millions, £ Sterling |       |        |       |       |          |        |
|---------------------------|----------------------|-------|--------|-------|-------|----------|--------|
|                           | Wheat                | Rye   | Barley | Oats  | Maize | Sundries | Total  |
| United States . . . . .   | 69.5                 | 3.2   | 6.3    | 34.0  | 134.6 | 1.4      | 249.0  |
| Russia . . . . .          | 35.2                 | 75.0  | 11.5   | 28.9  | 1.3   | 5.7      | 157.6  |
| France . . . . .          | 69.0                 | 13.3  | 9.1    | 31.6  | 5.8   | 7.9      | 136.7  |
| Germany . . . . .         | 23.7                 | 38.2  | 15.4   | 27.5  | ...   | 0.9      | 105.7  |
| Italy . . . . .           | 35.1                 | 1.5   | 1.5    | 1.7   | 16.0  | 11.0     | 66.8   |
| Austria proper . . . . .  | 5.3                  | 7.5   | 4.4    | 6.2   | 1.5   | 0.8      | 25.7   |
| Hungary . . . . .         | 10.9                 | 3.6   | 3.6    | 2.4   | 8.5   | ...      | 29.0   |
| Spain . . . . .           | 53.8                 | 7.5   | 18.2   | 1.8   | 9.0   | 0.9      | 91.2   |
| Denmark . . . . .         | 0.9                  | 2.7   | 3.3    | 3.4   | ...   | 0.1      | 10.4   |
| Holland . . . . .         | 1.4                  | 1.8   | 0.7    | 1.2   | ...   | 0.5      | 5.6    |
| Other countries . . . . . | 135.7                | 11.7  | 33.6   | 29.8  | 11.3  | 4.8      | 226.9* |
| Total . . . . .           | 440.5                | 166.0 | 107.6  | 168.5 | 188.0 | 34.0     | 1104.6 |

\* He only gives the total for "Other countries;" the distribution is mine.

According to Mr. Spallart the average values of grain in 1878-81 throughout the world were as in the following table, and if these prices were applied to the average crops for ten years ending 1884, the results would be as follows :—

|                  | Price, Pence<br>per Bushel | Crop, Million<br>Bushels | Value,<br>Million £ |
|------------------|----------------------------|--------------------------|---------------------|
| Wheat . . . . .  | 63                         | 2,068                    | 543                 |
| Rye . . . . .    | 48                         | 1,175                    | 235                 |
| Barley . . . . . | 46                         | 800                      | 153                 |
| Oats . . . . .   | 25                         | 1,936                    | 202                 |
| Maize . . . . .  | 26                         | 1,890                    | 204                 |
| Sundry . . . . . | 25                         | 290                      | 30                  |
| Total . . . . .  |                            | 8,159                    | 1,367               |

As near as we can ascertain, the crops and aggregate value were :—

| Period  | Million<br>Bushels | Value,<br>Millions £ | Average Price,<br>Pence per Bushel |
|---------|--------------------|----------------------|------------------------------------|
| 1831-40 | 4,043              | 624                  | 37                                 |
| 1851-60 | 5,563              | 1,130                | 48                                 |
| 1874-84 | 8,159              | 1,367                | 40                                 |
| 1887    | 9,122              | 1,143                | 30                                 |

The value of agricultural and pastoral products in 1887 is shown approximately as follows :—

|                         | Millions, £ Sterling |          |       | Per<br>Agricultural<br>Labourer |
|-------------------------|----------------------|----------|-------|---------------------------------|
|                         | Agricultural         | Pastoral | Total |                                 |
| U. Kingdom . . . . .    | 141                  | 110      | 251   | £ 98                            |
| France . . . . .        | 322                  | 138      | 460   | 71                              |
| Germany . . . . .       | 262                  | 162      | 424   | 52                              |

| Uruguay . . .        | 6                  | 53     | 1                  | 10    | 50,000     | 100,000    | 20                  | 100  |
| Various . . .        | 140                | 586    | 70                 | 149   | 140,000    | 2,400,000  | 50                  | 62   |
| Total . . .          | 9,036              | 23,006 | 1,824              | 3,948 | 53,820,000 | 80,050,000 | 33                  | 50   |

EUROPE

Area under crops was approximately as follows :—

| Year | Million Acres | Year | Million Acres |
|------|---------------|------|---------------|
| 1820 | 364           | 1860 | 471           |
| 1840 | 427           | 1888 | 558           |

The production of grain, wine, potatoes, and meat may be set down thus—

| Year | Grain, Million Bushels | Wine, Million Gallons | Potatoes, Million Tons | Meat, Tons |
|------|------------------------|-----------------------|------------------------|------------|
| 1820 | 2,800                  | 2,050                 | 20                     | 5,400,000  |
| 1840 | 3,300                  | 2,150                 | 40                     | 6,800,000  |
| 1860 | 4,200                  | 2,300                 | 50                     | 7,600,000  |
| 1880 | 5,040                  | 2,500                 | 60                     | 8,300,000  |
| 1887 | 5,600                  | 2,600                 | 70                     | 8,630,000  |

The ratio of the above products to population was as follows :—

| Year | Per Inhabitant |               |                |            |
|------|----------------|---------------|----------------|------------|
|      | Grain, Bushels | Wine, Gallons | Potatoes, lbs. | Meat, lbs. |
| 1820 | 14             | 10            | 224            | 60         |
| 1840 | 14             | 9             | 370            | 64         |
| 1860 | 15             | 8             | 400            | 61         |
| 1880 | 15             | 8             | 430            | 56         |
| 1887 | 15             | 8             | 445            | 57         |

The following table shows the rank that European products hold in those of the world, as regards value (1888) :—

|                  | Millions, £ Sterling |               |               |       |
|------------------|----------------------|---------------|---------------|-------|
|                  | Europe               | United States | Colonies, &c. | Total |
| Grain . . . .    | 764                  | 243           | 84            | 1,091 |
| Green crops . .  | 607                  | 165           | 87            | 859   |
| Garden crops . . | 186                  | 57            | 18            | 261   |
| Wine . . . .     | 181                  | 2             | 4             | 187   |
| Dairy . . . .    | 297                  | 79            | 25            | 401   |
| Meat . . . .     | 407                  | 156           | 45            | 608   |
| Sundries . . . . | 403                  | 74            | 64            | 541   |
| Total . . . .    | 2,845                | 776           | 327           | 3,948 |

|                   | Grain | Green Crops | Garden Crops | Wine  | Dairy | Meat  | Sundries | Total |
|-------------------|-------|-------------|--------------|-------|-------|-------|----------|-------|
| Europe . . . .    | 70.0  | 70.5        | 71.2         | 96.8  | 74.0  | 67.0  | 74.5     | 72.1  |
| United States . . | 22.3  | 19.2        | 21.9         | 1.1   | 19.8  | 25.6  | 13.7     | 19.6  |
| Colonies, &c. . . | 7.7   | 10.3        | 6.9          | 2.1   | 6.2   | 7.4   | 11.8     | 8.3   |
| Total . . . .     | 100.0 | 100.0       | 100.0        | 100.0 | 100.0 | 100.0 | 100.0    | 100.0 |

It appears from the foregoing general summary that Europe stands for nearly three-fourths of the value of all the farm products of the world.

The weight and value of European grain crops in 1887-88 were approximately as follows :—

|                        | Weight in Tons |            |            |            |             | Lbs. per Inhabitant |
|------------------------|----------------|------------|------------|------------|-------------|---------------------|
|                        | Wheat          | Oats       | Barley     | Rye, &c.   | Total       |                     |
| United Kingdom . . . . | 2,100,000      | 2,510,000  | 1,600,000  | 350,000    | 6,560,000   | 400                 |
| France . . . .         | 8,200,000      | 4,200,000  | 1,200,000  | 3,300,000  | 16,900,000  | 990                 |
| Germany . . . .        | 2,800,000      | 4,300,000  | 2,200,000  | 5,800,000  | 15,100,000  | 700                 |
| Russia . . . .         | 7,500,000      | 10,400,000 | 3,800,000  | 22,600,000 | 44,300,000  | 1,200               |
| Poland . . . .         | 400,000        | 600,000    | 300,000    | 1,500,000  | 2,800,000   | 800                 |
| Austria . . . .        | 5,100,000      | 2,830,000  | 2,600,000  | 6,570,000  | 17,100,000  | 980                 |

| Europe . . . .         | 37,020,000     | 28,060,000 | 16,100,000 | 49,100,000 | 130,280,000 | 820                 |

The following is a summary of products approximately in 1888 :—

|                         | Tons        | £             | Sundries             | £             |
|-------------------------|-------------|---------------|----------------------|---------------|
|                         |             |               |                      |               |
| Wheat . . . .           | 37,020,000  | 261,000,000   | Vegetables . . . .   | 186,000,000   |
| Oats . . . .            | 28,060,000  | 142,000,000   | Wine . . . .         | 181,000,000   |
| Barley . . . .          | 16,100,000  | 89,000,000    | Timber . . . .       | 108,000,000   |
| Rye, &c. . . .          | 49,100,000  | 272,000,000   | Dairy . . . .        | 297,000,000   |
| All grain . . . .       | 130,280,000 | 764,000,000   | Meat . . . .         | 404,000,000   |
| Green crops . . . .     | ...         | 607,000,000   | Hides, wool, &c. . . | 298,000,000   |
| Principal crops . . . . | ...         | 1,371,000,000 | Sundries . . . .     | 1,474,000,000 |

Making a total of 2845 millions sterling. It is not pretended that the foregoing table of values is mathematically correct. It is the result of the investigations, and in some cases the official valuations, bearing upon each country, as given hereafter in detail. The value of the various grain-crops of Europe, taking the average for 1887-88, is shown approximately in the following table :—

|                             | Value, Millions £ Sterling |      |        |          |       | Shillings per Inhabitant |
|-----------------------------|----------------------------|------|--------|----------|-------|--------------------------|
|                             | Wheat                      | Oats | Barley | Rye, &c. | Total |                          |
| U. Kingdom . . .            | 16                         | 15   | 8      | 2        | 41    | 22                       |
| France . . . . .            | 71                         | 29   | 7      | 22       | 129   | 65                       |
| Germany . . . . .           | 19                         | 25   | 15     | 34       | 93    | 46                       |
| Russia . . . . .            | 37                         | 35   | 15     | 94       | 181   | 45                       |
| Poland . . . . .            | 3                          | 4    | 2      | 10       | 19    | 50                       |
| Austria . . . . .           | 37                         | 14   | 16     | 35       | 102   | 52                       |
| Italy . . . . .             | 20                         | 2    | 1      | 17       | 40    | 27                       |
| Spain . . . . .             | 30                         | 2    | 10     | 13       | 55    | 63                       |
| Portugal . . . . .          | 2                          | ...  | ...    | 5        | 7     | 35                       |
| Sweden and Norway . . . . . | 1                          | 6    | 3      | 6        | 16    | 50                       |
| Denmark . . . . .           | 1                          | 4    | 3      | 5        | 13    | 130                      |
| Holland . . . . .           | 1                          | 2    | 1      | 2        | 6     | 30                       |
| Belgium . . . . .           | 4                          | 3    | 1      | 4        | 12    | 40                       |
| Roumania . . . . .          | 5                          | ...  | 2      | 10       | 17    | 70                       |
| Various . . . . .           | 14                         | 1    | 5      | 13       | 33    | 50                       |
| Total . . . . .             | 261                        | 142  | 89     | 272      | 764   | 47                       |

M. Block drew up, in 1850, a statement of the agricultural products of various countries, thus:—

|                             | Product Yearly, Tons |           | Value, Millions £ |      |         |       |
|-----------------------------|----------------------|-----------|-------------------|------|---------|-------|
|                             | Grain                | Meat      | Grain             | Meat | Various | Total |
| U. Kingdom . . .            | 7,650,000            | 450,000   | 82                | 28   | 154     | 264   |
| France . . . . .            | 12,600,000           | 605,000   | 123               | 22   | 211     | 356   |
| Prussia . . . . .           | 12,200,000           | 310,000   | 27                | 8    | 102     | 137   |
| Bavaria . . . . .           | 950,000              | 105,000   | 8                 | 3    | 8       | 19    |
| Saxony . . . . .            | 400,000              | 25,000    | 3                 | 1    | 5       | 9     |
| Austria . . . . .           | 10,200,000           | 740,000   | 67                | 19   | 88      | 174   |
| Spain . . . . .             | 2,100,000            | 220,000   | 21                | 10   | 57      | 88    |
| Belgium . . . . .           | 1,300,000            | 58,000    | 9                 | 3    | 9       | 21    |
| Holland . . . . .           | 800,000              | 55,000    | 6                 | 2    | 13      | 21    |
| Sweden and Norway . . . . . | 1,100,000            | 130,000   | 4                 | 2    | 7       | 13    |
| Denmark . . . . .           | 2,000,000            | 93,000    | 7                 | 1    | 3       | 11    |
| Total . . . . .             | 51,300,000           | 2,785,000 | 357               | 99   | 647     | 1,113 |

The above table omitted Russia, Poland, Italy, Portugal, Switzerland, Roumania, Greece, and other countries. The values under the item "Various" were, moreover, too low.

The following table shows approximately the value of all agricultural products in Europe at different dates:—

| Year           | Millions, £ Sterling |          |       |
|----------------|----------------------|----------|-------|
|                | Agricultural         | Pastoral | Total |
| 1830 . . . . . | 914                  | 341      | 1,255 |
| 1840 . . . . . | 1,114                | 430      | 1,544 |
| 1850 . . . . . | 1,328                | 542      | 1,870 |
| 1860 . . . . . | 1,444                | 620      | 2,064 |
| 1870 . . . . . | 1,552                | 818      | 2,370 |
| 1888 . . . . . | 1,875                | 970      | 2,845 |

The various classes of live-stock were approximately as follows:—

| Year | Horses     | Cattle      | Sheep       | Pigs       | Value,<br>Mill. £ |
|------|------------|-------------|-------------|------------|-------------------|
| 1830 | 25,020,000 | 67,370,000  | 169,040,000 | 44,460,000 | 730               |
| 1850 | 28,950,000 | 80,120,000  | 183,950,000 | 38,430,000 | 1,018             |
| 1870 | 32,080,000 | 89,820,000  | 209,370,000 | 43,950,000 | 1,496             |
| 1887 | 37,610,000 | 101,855,000 | 197,740,000 | 48,350,000 | 1,940             |

The agricultural capital of Europe was made up as follows:—

| Year           | Millions, £ Sterling |        |          |        |
|----------------|----------------------|--------|----------|--------|
|                | Land                 | Cattle | Sundries | Total  |
| 1840 . . . . . | 6,471                | 875    | 820      | 8,166  |
| 1860 . . . . . | 9,957                | 1,260  | 1,227    | 12,444 |
| 1887 . . . . . | 13,776               | 1,940  | 1,737    | 17,453 |

The increase of agricultural capital was as follows:—

| Period  | Millions, £ | Millions, £ per Annum |
|---------|-------------|-----------------------|
| 1840-60 | 4,278       | 214                   |
| 1860-87 | 5,009       | 185                   |

Notwithstanding the fact that the agricultural capital of Europe has more than doubled since 1840, further increase promises to be very questionable, or at least very slow.

#### UNITED KINGDOM

In the 17th century agriculture was the principal occupation of the people, and made great progress after the expulsion of the Stuarts, but its golden epoch was the reign of George II. (1727-60). We have no reliable statistics till the present century, viz.:—

#### ACRES UNDER CROPS

| Year | England    | Scotland  | Ireland   | United Kingdom | Authority |
|------|------------|-----------|-----------|----------------|-----------|
| 1827 | 11,140,000 | 2,550,000 | 5,450,000 | 19,140,000     | Porter    |
| 1846 | 13,300,000 | 3,390,000 | 5,240,000 | 21,930,000     | M'Culloch |
| 1866 | 13,340,000 | 3,170,000 | 5,250,000 | 21,760,000     | Official  |
| 1876 | 13,920,000 | 3,510,000 | 5,210,000 | 22,640,000     | "         |
| 1888 | 13,350,000 | 3,690,000 | 4,145,000 | 21,185,000     | "         |

In the last sixty years the area under crops has increased by 2,200,000 in England and 1,140,000 in Scotland, but in Ireland it has diminished by 1,300,000 acres.

#### PRINCIPAL CROPS OF ENGLAND, ACREAGE

|                     | 1812, Comber | 1820, Middleton | 1831, M'Culloch | 1846, M'Culloch |
|---------------------|--------------|-----------------|-----------------|-----------------|
| Wheat . . . . .     | 3,160,000    | 3,300,000       | 3,800,000       | 3,800,000       |
| Oats . . . . .      | 2,870,000    | 3,000,000       | 3,000,000       | 2,500,000       |
| Barley, &c. . . . . | 860,000      | 900,000         | 900,000         | 1,500,000       |
| Roots . . . . .     | 1,250,000    | 1,200,000       | 2,650,000       | 2,700,000       |
| Clover . . . . .    | 1,150,000    | 1,200,000       |                 | 1,300,000       |
| Fallow . . . . .    | 2,310,000    | 2,400,000       | 1,650,000       | 1,500,000       |
| Total . . . . .     | 11,600,000   | 12,000,000      | 12,000,000      | 13,300,000      |

In recent years there has been a marked decline in the area under grain, viz.:—

#### ACREAGE, UNITED KINGDOM

|                            | 1871-75    | 1881-85    | 1888       |
|----------------------------|------------|------------|------------|
| Wheat . . . . .            | 3,740,000  | 2,830,000  | 2,670,000  |
| Oats . . . . .             | 4,230,000  | 4,300,000  | 4,180,000  |
| Barley, &c. . . . .        | 3,570,000  | 3,210,000  | 2,940,000  |
| Potatoes . . . . .         | 1,510,000  | 1,380,000  | 1,410,000  |
| Turnips, &c. . . . .       | 3,564,000  | 3,367,000  | 3,356,000  |
| Flax . . . . .             | 136,000    | 115,000    | 116,000    |
| Hops . . . . .             | 64,000     | 68,000     | 58,000     |
| Clover and grass . . . . . | 29,530,000 | 31,710,000 | 32,680,000 |
| Fallow . . . . .           | 640,000    | 760,000    | 470,000    |
| Total . . . . .            | 46,984,000 | 47,740,000 | 47,880,000 |

According to M'Culloch, the tillage of the United Kingdom in 1851 stood thus:—

|                | Grain      |             | Other Crops, Acres | Total Acres | Value of Crops |
|----------------|------------|-------------|--------------------|-------------|----------------|
|                | Acres      | Mill. Bush. |                    |             |                |
| England        | 7,200,000  | 200         | 5,500,000          | 12,700,000  | 80,500,000     |
| Scotland       | 1,480,000  | 46          | 1,110,000          | 2,590,000   | 14,900,000     |
| Ireland        | 2,920,000  | 89          | 1,880,000          | 4,800,000   | 26,400,000     |
| United Kingdom | 11,600,000 | 335         | 8,490,000          | 20,090,000  | 121,800,000    |

The average value of crops to the acre in 1851 was 110 shillings in Ireland, 114 in Scotland, 127 in England. At present the gross product of the United Kingdom averages 110 shillings per acre.

The distribution of crops in the three kingdoms in 1888 was thus:—

ACREAGE

|                   | England    | Scotland  | Ireland    | United Kingdom |
|-------------------|------------|-----------|------------|----------------|
| Wheat . .         | 2,510,000  | 70,000    | 90,000     | 2,670,000      |
| Oats . . .        | 1,885,000  | 1,015,000 | 1,280,000  | 4,180,000      |
| Barley, &c. .     | 2,485,000  | 255,000   | 200,000    | 2,940,000      |
| All grain . .     | 6,880,000  | 1,340,000 | 1,570,000  | 9,790,000      |
| Potatoes . .      | 445,000    | 160,000   | 805,000    | 1,410,000      |
| Turnips . .       | 1,480,000  | 480,000   | 290,000    | 2,250,000      |
| Vetches, &c. .    | 905,000    | 20,000    | 145,000    | 1,070,000      |

| Gardens, &c. .    | 535,000    | 20,000    | 125,000    | 680,000        |
| Clover, &c. .     | 3,105,000  | 1,670,000 | 1,205,000  | 5,980,000      |
| Total crops       | 13,350,000 | 3,690,000 | 4,140,000  | 21,180,000     |
| Pasture . .       | 14,590,000 | 1,190,000 | 10,920,000 | 26,700,000     |
| Total . .         | 27,940,000 | 4,880,000 | 15,060,000 | 47,880,000     |

The yield per acre has much increased since the last century, when Arthur Young showed the wheat average for a number of years to be 23 bushels. The following estimates have been made:—

|                          | Yield per Acre, Bushels |      |        |
|--------------------------|-------------------------|------|--------|
|                          | Wheat                   | Oats | Barley |
| Comber, 1810-15 . . .    | 22                      | 36   | 32     |
| M'Culloch, 1840-46 . . . | 31                      | 37   | 37     |
| Caird, 1857-77 . . .     | 28                      | 46   | 37     |

The production of grain in the United Kingdom compared with population is now less than half what it was in 1830, having steadily declined since then, viz:—

|      | Production, Millions of Bushels |                   |       | Bushels per Inhabitant |
|------|---------------------------------|-------------------|-------|------------------------|
|      | Wheat                           | Oats, Barley, &c. | Total |                        |
| 1830 | 104                             | 304               | 408   | 17                     |
| 1846 | 143                             | 258               | 401   | 15                     |
| 1866 | 98                              | 290               | 388   | 14                     |
| 1876 | 84                              | 270               | 354   | 11                     |
| 1887 | 76                              | 235               | 301   | 8                      |

The consumption has nevertheless risen in quantity 40 per cent., nearly one-half now being imported, viz:—

| Consumption of Grain, Millions of Bushels Yearly |            |          |       |                |
|--------------------------------------------------|------------|----------|-------|----------------|
| Period                                           | Home-Grown | Imported | Total | Ratio Imported |
| 1831-40                                          | 408        | 8        | 416   | 2 per cent.    |
| 1841-50                                          | 400        | 31       | 431   | 7 "            |
| 1851-60                                          | 390        | 78       | 468   | 17 "           |
| 1861-70                                          | 388        | 126      | 514   | 24 "           |
| 1871-80                                          | 340        | 226      | 566   | 40 "           |
| 1881-89                                          | 320        | 272      | 592   | 45 "           |

The production and consumption of wheat show as follows:—

Wheat, Millions of Bushels, Yearly Consumption

|         | Home-Grown | Imported | Total | Lbs. per Inhabitant | Ratio Imported |
|---------|------------|----------|-------|---------------------|----------------|
| 1811-30 | 97         | 4        | 101   | 300                 | 4 per cent.    |
| 1831-50 | 113        | 14       | 127   | 280                 | 11 "           |
| 1851-70 | 109        | 58       | 167   | 345                 | 35 "           |
| 1871-80 | 90         | 116      | 206   | 370                 | 57 "           |
| 1881-89 | 80         | 144      | 224   | 384                 | 65 "           |

Consumption includes not only food, but also seed, say 8,000,000 bushels, or 12 lbs. per inhabitant.

The average yield of the principal crops in 1884-87 was as follows:—

|                    | Average Crops, 1884-87 |            |                |
|--------------------|------------------------|------------|----------------|
|                    | Great Britain          | Ireland    | United Kingdom |
| Wheat, bushels . . | 73,200,000             | 1,900,000  | 75,100,000     |
| Barley, " . .      | 72,500,000             | 5,800,000  | 78,300,000     |

| Turnips, " . . .       | 240                     | 224     | 236            |
| Hay, " . . .           | 26                      | 34      | 29             |

Lawes and Gilbert's experiments of the yield of ground manured and unmanured showed as follows:—

BUSHEL PER ACRE

| Period  | Unmanured | Dung | Bone-Ash, &c. |
|---------|-----------|------|---------------|
| 1852-69 | 14.8      | 35.7 | 36.7          |
| 1870-79 | 10.2      | 29.5 | 31.7          |

The seed used for wheat-growing is usually 2½ bushels per acre, and the yield about eleven-fold for the United Kingdom.

According to Mr. Hermann Voss, the United Kingdom consumes annually 290,000 tons of mineral phosphates (93 per cent. imported) and 110,000 of bones (45 per cent. imported), in all, 400,000 tons, from which are pro-

duced 800,000 tons of artificial manure, as compared with 200,000 tons in 1860.

The consumption of dung is 79 million tons (see *Manure*) per annum, that is, about  $1\frac{1}{2}$  tons per acre.

The crops of 1889 were as follows:—

|                | England    | Scotland   | Ireland    | United Kingdom | Acreage   | Per Acre |
|----------------|------------|------------|------------|----------------|-----------|----------|
| Wheat, bushels | 71,000,000 | 2,200,000  | 2,700,000  | 75,900,000     | 2,540,000 | 30       |
| Oats, "        | 76,200,000 | 37,200,000 | 50,600,000 | 164,000,000    | 4,130,000 | 40       |
| Barley, "      | 59,600,000 | 7,800,000  | 7,300,000  | 74,700,000     | 2,310,000 | 32       |
| Beans, &c. "   | 14,500,000 | 500,000    | 200,000    | 15,200,000     | 540,000   | 28       |
| Potatoes, tons | 2,570,000  | 1,010,000  | 2,850,000  | 6,430,000      | 1,370,000 | 4.7      |
| Turnips, "     | 20,300,000 | 7,800,000  | 3,900,000  | 32,000,000     | 2,220,000 | 14.4     |
| Mangolds, "    | 6,100,000  | ...        | 600,000    | 6,700,000      | 370,000   | 18.0     |
| Hay, "         | 10,400,000 | 1,000,000  | 4,900,000  | 16,300,000     | 9,660,000 | 1.7      |

Ensilage or the use of "silos" is increasing, the returns for 1889 showing 2820 in the United Kingdom.

Statistics of live-stock are as follows:—

| Year | Horses    | Cattle     | Sheep      | Pigs      | Authority |
|------|-----------|------------|------------|-----------|-----------|
| 1688 | ...       | ...        | 12,000,000 | ...       | King      |
| 1774 | ...       | 2,850,000  | 12,000,000 | ...       | Campbell  |
| 1812 | 1,500,000 | 5,500,000  | 25,000,000 | 3,000,000 | Colquhoun |
| 1831 | 1,500,000 | 5,220,000  | ...        | 4,000,000 | M'Culloch |
| 1855 | 2,050,000 | 7,955,000  | 27,972,000 | 3,686,000 | "         |
| 1867 | ...       | 8,730,000  | 33,820,000 | 4,220,000 | Official  |
| 1877 | 1,890,000 | 9,730,000  | 32,220,000 | 3,730,000 | "         |
| 1888 | 1,940,000 | 10,270,000 | 28,940,000 | 3,820,000 | "         |

The figures before 1812 are for England and Wales, the rest for the United Kingdom. Horses used in towns are not included above.

In 1855, according to M'Culloch, the live-stock stood thus:—

|        | England    | Scotland  | Ireland   | United Kingdom |
|--------|------------|-----------|-----------|----------------|
| Horses | 1,309,000  | 185,000   | 556,000   | 2,050,000      |
| Cattle | 3,420,000  | 975,000   | 3,560,000 | 7,955,000      |
| Sheep  | 18,690,000 | 5,680,000 | 3,602,000 | 27,972,000     |
| Pigs   | 2,360,000  | 146,000   | 1,180,000 | 3,686,000      |

The returns of the three kingdoms for 1888 are as follows:—

|        | England    | Scotland  | Ireland   | United Kingdom |
|--------|------------|-----------|-----------|----------------|
| Horses | 1,240,000  | 190,000   | 510,000   | 1,940,000      |
| Cattle | 5,060,000  | 1,110,000 | 4,100,000 | 10,270,000     |
| Sheep  | 18,580,000 | 6,730,000 | 3,630,000 | 28,940,000     |
| Pigs   | 2,265,000  | 155,000   | 1,400,000 | 3,820,000      |

The proportion of cattle in England to size of farms in 1885 was:—

NUMBER TO 100 ACRES

| Acres    | Horses | Cows | Sheep | Pigs | Total |
|----------|--------|------|-------|------|-------|
| Under 5  | 7      | 30   | 30    | 50   | 117   |
| 5-50     | 5      | 29   | 38    | 17   | 89    |
| 50-100   | 5      | 23   | 51    | 9    | 88    |
| 100-500  | 4      | 17   | 74    | 6    | 101   |
| Over 500 | 3      | 10   | 105   | 4    | 122   |

The production of meat is computed on an annual slaughter of 20 per cent. of all horned cattle, 40 per cent. of sheep, and 100 per cent. of pigs, the average carcass being taken at 600 lbs. beef, 70 lbs. mutton, and 100

lbs.\* pig. The following table shows the production and consumption:—

| Period  | Tons of Meat Consumed Yearly |          |           | Lbs. Meat per Inhabitant |
|---------|------------------------------|----------|-----------|--------------------------|
|         | Home-Grown                   | Imported | Total     |                          |
| 1831-40 | 940,000                      | ...      | 940,000   | 80                       |
| 1841-50 | 980,000                      | ...      | 980,000   | 80                       |
| 1851-60 | 1,000,000                    | 44,000   | 1,044,000 | 81                       |
| 1861-70 | 1,020,000                    | 131,000  | 1,151,000 | 87                       |
| 1871-80 | 1,050,000                    | 288,000  | 1,338,000 | 87                       |
| 1881-87 | 1,030,000                    | 540,000  | 1,570,000 | 98                       |

Machinery has introduced great changes in the mode of cultivation since the Waterloo epoch. The Census of 1821 showed 33 per cent. of the classified population of England was engaged in agriculture, that of 1881 only 12 per cent. The following table shows the number engaged in agriculture at various dates, and the approximate gross value of all farming products:—

AGRICULTURAL HANDS AND PRODUCT, UNITED KINGDOM

| Year | Numbers Engaged | Product, Millions £ | Product per Hand |
|------|-----------------|---------------------|------------------|
| 1821 | 2,930,000       | 190                 | 65               |
| 1831 | 3,050,000       | 195                 | 65               |
| 1841 | 3,401,000       | 200                 | 59               |
| 1851 | 3,519,000       | 220                 | 63               |
| 1861 | 3,149,000       | 240                 | 76               |
| 1871 | 2,808,000       | 250                 | 89               |
| 1881 | 2,561,000       | 251                 | 98               |

The numbers engaged before 1841 are estimates as concerns Ireland and Scotland, the rest are from Booth's reports.

The earliest estimate of the value of agricultural products in England was by Gregory King, in 1698, as follows:—

|                 | Bushels    | Value, £  | Pence per Bushel |
|-----------------|------------|-----------|------------------|
| Wheat           | 14,000,000 | 2,450,000 | 42               |
| Barley          | 27,000,000 | 2,700,000 | 24               |
| Rye             | 10,000,000 | 1,250,000 | 30               |
| Oats            | 16,000,000 | 1,200,000 | 18               |
| Pease and beans | 11,000,000 | 1,375,000 | 30               |
| Vetches         | 1,000,000  | 100,000   | 24               |
| Total           | 79,000,000 | 9,075,000 | 27               |

\* Major Craigie computes that 1000 cattle give 67 tons of beef, and 1000 sheep  $12\frac{1}{2}$  tons mutton yearly; my estimate is 54 tons of beef, and  $12\frac{1}{2}$  tons of mutton.

He computed that 16 per cent. was required for seed, leaving the balance for consumption 66 million bushels, equal to 10 bushels per inhabitant. The following estimates have since been recorded of the total value of agricultural and pastoral products yearly:—

| England and Wales |           |          | United Kingdom |                |          |
|-------------------|-----------|----------|----------------|----------------|----------|
| Date              | Author    | Mills. £ | Date           | Author         | Mills. £ |
| 1812              | Stevenson | 131      | 1812           | Colquhoun, &c. | 260      |
| 1820              | Middleton | 127      | 1834           | Spackmann      | 250      |
| 1846              | M'Culloch | 142      | 1846           | M'Culloch      | 218      |
| 1889              | Mulhall   | 158      | 1889           | Mulhall        | 251      |

Colquhoun's estimate in 1812 was 194 millions sterling for tillage, omitting pastoral products, which were after-

wards valued at 66 millions, thus making a total of 260 millions. This was only 34 millions over Arthur Young's estimate in 1790, which did not include Ireland. We may, therefore, conclude that the value of farm products has been almost stationary for 100 years, except the effects of a passing season of war or scarcity. Colquhoun's table showed thus in 1812:—

|                                | Quantity  | Value, £    |
|--------------------------------|-----------|-------------|
| Wheat, tons . . . . .          | 1,800,000 | 32,300,000  |
| Other grain, tons . . . . .    | 5,200,000 | 41,300,000  |
| Potatoes . . . . .             | ...       | 14,200,000  |
| Turnips . . . . .              | ...       | 14,200,000  |
| Fruit and vegetables . . . . . | ...       | 7,800,000   |
| Hay, grass, &c. . . . .        | ...       | 89,200,000  |
| Total . . . . .                | ...       | 194,000,000 |

VALUE OF CROPS, &C., IN 1889

|                           | England     | Scotland   | Ireland    | United Kingdom | Price per Ton |
|---------------------------|-------------|------------|------------|----------------|---------------|
|                           | £           | £          | £          | £              | £             |
| Wheat . . . . .           | 13,100,000  | 400,000    | 500,000    | 14,000,000     | 6.5           |
| Oats . . . . .            | 7,200,000   | 3,600,000  | 4,800,000  | 15,600,000     | 5.7           |

| Beans, &c. . . . .        | 1,800,000   | 100,000    | ...        | 1,900,000      | 5.0           |
| Potatoes . . . . .        | 7,000,000   | 2,700,000  | 8,000,000  | 17,700,000     | 2.7           |
| Hay . . . . .             | 17,700,000  | 1,700,000  | 8,000,000  | 27,400,000     | 1.7           |
| Turnips, &c. . . . .      | 21,100,000  | 6,200,000  | 3,600,000  | 30,900,000     | 0.8           |
| Hops . . . . .            | 2,200,000   | ...        | ...        | 2,200,000      | 75.0          |
| Flax . . . . .            | ...         | ...        | 850,000    | 850,000        | 45.0          |
| Sundries . . . . .        | 2,100,000   | 100,000    | 650,000    | 2,750,000      | ...           |
| Total . . . . .           | 87,100,000  | 17,000,000 | 28,700,000 | 132,800,000    | ...           |
| Animal products . . . . . | 64,400,000  | 16,000,000 | 29,600,000 | 110,000,000    | ...           |
| Sundries . . . . .        | 6,700,000   | 900,000    | 800,000    | 8,400,000      | ...           |
| Total . . . . .           | 158,200,000 | 33,900,000 | 59,100,000 | 251,200,000    | ...           |

M'Culloch also made tables for each of the three kingdoms in 1846, which compare with the results in 1889 as follows:—

ALL FARM PRODUCTS, MILLIONS £

|                      | 1846          |           |       | 1889          |           |       |
|----------------------|---------------|-----------|-------|---------------|-----------|-------|
|                      | Agricul-tural | Pas-toral | Total | Agricul-tural | Pas-toral | Total |
| England . . . . .    | 80            | 62        | 142   | 94            | 64        | 158   |
| Scotland . . . . .   | 19            | 9         | 28    | 18            | 16        | 34    |
| Ireland . . . . .    | 28            | 20        | 48    | 29            | 30        | 59    |
| U. Kingdom . . . . . | 127           | 91        | 218   | 141           | 110       | 251   |

The following table shows the profits of farming, out of which the tenant-farmer has to pay his rent and maintain his family:—

|                                        | Cost per Acre | Number of Acres | Amount      |
|----------------------------------------|---------------|-----------------|-------------|
|                                        | £ s. d.       |                 | £           |
| Labour . . . . .                       | 2 5 0         | 48,000,000      | 108,000,000 |
| Team . . . . .                         | 1 0 0         | "               | 48,000,000  |
| Taxes and Tithes . . . . .             | 0 8 4         | "               | 20,000,000  |
| Seed . . . . .                         | 0 10 0        | 21,200,000      | 10,600,000  |
| Manure . . . . .                       | 0 12 0        | "               | 12,700,000  |
| Balance for rent, &c. . . . .          | 1 1 3         | 48,000,000      | 51,900,000  |
| Total value of farm products . . . . . |               |                 | 251,200,000 |

Allowing the tenant one-half of the profits to support

his family, the landlord's share would be 10½ shillings per acre.

Comparing M'Culloch's tables with the value of products in 1889, we find as follows:—

VALUE OF ALL FARM PRODUCTS

|                                | 1831        | 1846        | 1889           |
|--------------------------------|-------------|-------------|----------------|
|                                | England     | England     | United Kingdom |
|                                | £           | £           | £              |
| Grain . . . . .                | 53,300,000  | 51,500,000  | 41,700,000     |
| Green crops . . . . .          | 15,300,000  | 28,500,000  | 53,600,000     |
| Hay and straw . . . . .        | ...         | 13,000,000  | 34,700,000     |
| Meat . . . . .                 | ...         | 26,200,000  | 55,200,000     |
| Dairy . . . . .                | ...         | 12,000,000  | 31,200,000     |
| Poultry and eggs . . . . .     | ...         | 1,400,000   | 9,100,000      |
| Foals . . . . .                | 59,430,000  | 3,000,000   | 5,800,000      |
| Hides, wool, &c. . . . .       | ...         | 4,300,000   | 9,200,000      |
| Timber . . . . .               | ...         | 1,800,000   | 1,400,000      |
| Vegetables, fruit, &c. . . . . | ...         | ...         | 9,300,000      |
| Total . . . . .                | 128,030,000 | 141,700,000 | 251,200,000    |

IRELAND

According to Sir W. Petty, the war of Cromwell reduced Ireland to a wilderness, three-fourths of the cattle being destroyed: the value of live-stock fell from four millions sterling in 1641 to £500,000 in 1652, and such was the scarcity of grain, that a barrel of wheat rose in that interval from 12 to 50 shillings. The areas cultivated and uncultivated at various dates show thus:—

| ACREAGE |            |              |            | Authority |
|---------|------------|--------------|------------|-----------|
| Year    | Cultivated | Uncultivated | Total      |           |
| 1726    | 11,043,000 | 9,777,000    | 20,820,000 | Browne    |
| 1805    | 13,440,000 | 7,380,000    | "          | Newenham  |
| 1812    | 13,454,000 | 7,366,000    | "          | "         |
| 1837    | 14,604,000 | 4,216,000    | "          | Official  |
| 1874    | 15,720,000 | 3,100,000    | "          | "         |
| 1888    | 15,060,000 | 3,760,000    | "          | "         |

Secretary Larcom's statement of the crops in 1847 (excluding hay) compares with the returns for 1887 thus :—

|                 | Crop       |            | Value       |            |
|-----------------|------------|------------|-------------|------------|
|                 | 1847       | 1887       | 1847        | 1887       |
| Wheat, bushels  | 24,000,000 | 1,900,000  | £ 6,700,000 | £ 320,000  |
| Oats, " "       | 92,000,000 | 43,500,000 | 11,500,000  | 3,630,000  |
| Barley, &c. " " | 13,000,000 | 4,800,000  | 2,300,000   | 600,000    |
| Potatoes, tons  | 2,000,000  | 3,570,000  | 8,200,000   | 10,800,000 |
| Turnips, " "    | 5,800,000  | 3,170,000  | 3,500,000   | 1,200,000  |
| Total . .       | ...        | ...        | 32,200,000  | 16,550,000 |

The acreage of crops, according to Larcom and other official returns, was :—

ACREAGE

|                 | 1847      | 1852      | 1859      | 1867      | 1876      | 1888      |
|-----------------|-----------|-----------|-----------|-----------|-----------|-----------|
| Wheat . . . .   | 744,000   | 354,000   | 466,000   | 281,000   | 120,000   | 90,000    |
| Oats . . . .    | 2,201,000 | 2,283,000 | 1,981,000 | 1,680,000 | 1,487,000 | 1,280,000 |
| Barley, &c. . . | 333,000   | 340,000   | 205,000   | 163,000   | 242,000   | 200,000   |
| Potatoes . . .  | 284,000   | 877,000   | 1,203,000 | 1,026,000 | 881,000   | 805,000   |
| Turnips . . . . | 384,000   | 357,000   | 322,000   | 326,000   | 345,000   | 290,000   |
| Flax . . . .    | 58,000    | 137,000   | ...       | 218,000   | 133,000   | 114,000   |
| Sundries . . .  | 95,000    | 122,000   | 114,000   | 130,000   | 138,000   | 156,900   |
| Clover, &c. . . | 1,140,000 | 1,270,000 | ...       | 1,660,000 | 1,860,000 | 1,205,000 |
| Total . . . .   | 5,239,000 | 5,740,000 | ...       | 5,484,000 | 5,206,000 | 4,140,000 |

The Registrar-General for Ireland published recently his estimate of the agricultural products in cycles of five years thus :—

|                 | Average Annual Value |              |              |
|-----------------|----------------------|--------------|--------------|
|                 | 1851-55              | 1866-70      | 1884-88      |
| Crops . . . .   | £ 43,660,000         | £ 27,935,000 | £ 16,470,000 |
| Cattle, &c. . . | 28,330,000           | 44,280,000   | 37,550,000   |
| Total . . . .   | 71,990,000           | 72,215,000   | 54,020,000   |

Since 1870 the annual product of farming has declined 18 millions sterling. The landlords have voluntarily or judiciously had their rents reduced about 30 per cent.—say, 3 millions sterling on a rental of 10 millions; the tenants have suffered the rest of the loss, 15 millions sterling.

This loss of 18 millions sterling per annum, recorded by the Registrar-General, is, as he shows, 25 per cent. of the total farm product of Ireland.

In 1843-45 Sir Richard Griffith valued the crops, exclusive of grass and hay, at £43,000,000. In 1861 Hancock valued all crops at £34,900,000; and Fisher at £36,800,000. It would appear that in the preceding table hay is counted not with crops, but in the item of cattle products.

The decline of agriculture in Ireland has been mainly due to the cause stated by John Stuart Mill :—

"Alone among mankind the Irish peasant cannot be better or worse off by any act of his. If industrious or prudent, nobody but the landlord gains, if lazy or intemperate, it is at the landlord's expense."

Nevertheless, the value of live-stock has almost trebled since 1841.

VALUE OF LIVE-STOCK

|              | £          |
|--------------|------------|
| 1841 . . . . | 21,100,000 |
| 1855 . . . . | 33,100,000 |
| 1888 . . . . | 55,200,000 |

The numbers of live-stock in 1855 compare with those of 1888 thus :—

|                | Number    |           | Value       |              |
|----------------|-----------|-----------|-------------|--------------|
|                | 1855      | 1888      | 1855        | 1888         |
| Horses . . . . | 556,000   | 507,000   | £ 4,500,000 | £ 15,200,000 |
| Cattle . . . . | 3,560,000 | 4,100,000 | 23,200,000  | 32,800,000   |
| Sheep . . . .  | 3,602,000 | 3,627,000 | 3,900,000   | 4,900,000    |
| Pigs . . . .   | 1,180,000 | 1,398,000 | 1,500,000   | 2,300,000    |
| Total . . . .  | ...       | ...       | 33,100,000  | 55,200,000   |

The increase has been rather in value than in number, viz. :—

|                | In Value      | In Number    |
|----------------|---------------|--------------|
| Horses . . . . | 227 per cent. | 0 ...        |
| Cattle . . . . | 41 "          | 15 per cent. |
| Sheep . . . .  | 26 "          | 0 ...        |
| Pigs . . . .   | 54 "          | 20 per cent. |

During the eighteenth century 60 per cent. of the Irish exports were meat, the price of which rose from twenty shillings per cwt. in 1776 to fifty shillings in 1800. After the Waterloo epoch almost down to the famine of 1846, England drew twenty million bushels of wheat yearly from Ireland.

Of late years the exportation of live-stock to Great Britain has declined, viz. :—

EXPORTS TO ENGLAND AND SCOTLAND.

|                | 1877    | 1887    |
|----------------|---------|---------|
| Cattle . . . . | 649,000 | 669,000 |
| Sheep . . . .  | 630,000 | 548,000 |
| Pigs . . . .   | 585,000 | 480,000 |

Emigration has drained the country so largely of men in the vigour of life that pauperism increased 46 per cent. between 1877 and 1887 (see *Paupers*). For rental, value, and tenure, see *Land*.

SCOTLAND

M'Culloch's tables for 1814 and 1846, with subsequent official returns, are as follows :—

## ACREAGE

|                     | 1814      | 1846      | 1857    | 1867      | 1878      | 1888      |
|---------------------|-----------|-----------|---------|-----------|-----------|-----------|
| Wheat . . . . .     | 140,000   | 350,000   | 243,000 | 110,000   | 75,000    | 70,000    |
| Oats . . . . .      | 1,260,000 | 1,300,000 | 930,000 | 1,000,000 | 1,030,000 | 1,015,000 |
| Barley, &c. . . . . | 398,000   | 500,000   | 182,000 | 215,000   | 290,000   | 255,000   |
| Turnips . . . . .   | 410,000   | 450,000   | 470,000 | 480,000   | 500,000   | 480,000   |
| Potatoes . . . . .  | 80,000    | 200,000   | 145,000 | 150,000   | 165,000   | 160,000   |
| Sundries . . . . .  | 48,000    | 40,000    | ...     | ...       | 25,000    | 40,000    |
| Clover, &c. . . . . | 220,000   | 550,000   | ...     | ...       | ...       | 1,670,000 |
| Total . . . . .     | 2,556,000 | 3,390,000 | ...     | ...       | ...       | 3,690,000 |

M'Culloch estimated the farming products of 1846 as follows:—

|                             |            |
|-----------------------------|------------|
|                             | £          |
| Grain . . . . .             | 8,100,000  |
| Green crops . . . . .       | 10,600,000 |
| Pastoral products . . . . . | 9,000,000  |
| Total . . . . .             | 27,700,000 |

He estimated the grain produced at 48 million bushels, against Larcom's estimate same year for Ireland, 129 millions.

The numbers of live-stock were:—

|                  | 1857      | 1867      | 1878      | 1888      |
|------------------|-----------|-----------|-----------|-----------|
| Horses . . . . . | ...       | ...       | 191,000   | 190,000   |
| Cattle . . . . . | 970,000   | 960,000   | 1,095,000 | 1,110,000 |
| Sheep . . . . .  | 5,750,000 | 6,070,000 | 7,036,000 | 6,730,000 |
| Pigs . . . . .   | 137,000   | 204,000   | 140,000   | 155,000   |

For tenure and rental, see *Lands*.

## ISLANDS

*Isle of Man*.—Area 145,000 acres, of which 98,000 cultivated, 24,000 under grain, 12,000 green crops, and he rest clover, &c.

*Jersey*.—Area 29,000 acres, of which 20,000 cultivated, half green crops, half clover.

*Guernsey, &c.*—Area 20,000 acres, of which 12,000 cultivated; same mode as Jersey.

The products of these islands are included with those of England.

UNITED KINGDOM  
AGRICULTURAL CAPITAL

| Year  | Millions. £ Sterling |        |          |       | £ per Inhabitant |
|-------|----------------------|--------|----------|-------|------------------|
|       | Land                 | Cattle | Sundries | Total |                  |
| 1750  | 498                  | 25     | 58       | 581   | 55               |
| 1780  | 702                  | 35     | 81       | 812   | 65               |
| 1814  | 1,470                | 74     | 172      | 1,716 | 95               |
| 1843  | 1,677                | 94     | 197      | 1,968 | 72               |
| 1850  | 1,705                | 104    | 201      | 2,010 | 72               |
| 1860  | 1,748                | 140    | 210      | 2,098 | 72               |
| 1868  | 1,925                | 170    | 233      | 2,328 | 75               |
| 1880  | 2,086                | 209    | 255      | 2,550 | 72               |
| 1887* | 1,873                | 185    | 229      | 2,287 | 61               |

In the above table land is capitalised at 30 years' rental. As for cattle, it was valued by King in 1688 at 25 millions; the figures for 1814 and subsequent years are according to the numbers of live-stock at the several dates specified in table. Sundries are estimated at 10

\* The actual value of land is supposed to be 1560 millions, the official valuation being 20 per cent. too high. In a paper read at the Surveyors' Institution in January 1890, Mr. H. H. Smith showed a decline of 523 millions sterling since 1880.

per cent. of the total, in preference to 14 per cent., adopted by Chaptal and other French economists.

There was a steady increase down to 1880, from which date agricultural capital has been declining, viz. :—

| Period    | Millions, £   | £ per Annum |
|-----------|---------------|-------------|
| 1750-1780 | Increase, 231 | 7,450,000   |
| 1781-1814 | " 904         | 26,600,000  |
| 1815-1843 | " 252         | 8,700,000   |
| 1844-1860 | " 130         | 8,100,000   |
| 1861-1880 | " 452         | 22,600,000  |
| 1881-1889 | Decline, 263  | 29,200,000  |

Notwithstanding the recent decline, agricultural capital still forms one-fourth of the wealth of the nation (see *Wealth*), and is almost three times as great as it was 100 years ago.

The distribution of this capital among the three kingdoms in 1887 was:—

## AGRICULTURAL CAPITAL, MILLIONS £

|                    | Land  | Cattle | Sundries | Total | £ per Inhabitant |
|--------------------|-------|--------|----------|-------|------------------|
| England . . . . .  | 1,362 | 104    | 163      | 1,629 | 57               |
| Scotland . . . . . | 213   | 26     | 27       | 266   | 61               |
| Ireland . . . . .  | 298   | 55     | 39       | 392   | 80               |
| United Kingdom     | 1,873 | 185    | 229      | 2,287 | 61               |

The relation between capital and product in 1887 was as follows:—

## MILLION £

|                    | Capital | Gross Product | Ratio to Capital |
|--------------------|---------|---------------|------------------|
| England . . . . .  | 1,629   | 158           | 9.7 per cent.    |
| Scotland . . . . . | 266     | 34            | 12.8 "           |
| Ireland . . . . .  | 392     | 59            | 15.0 "           |
| United Kingdom     | 2,287   | 251           | 11.1 "           |

Further details will be found under the items *Cattle* and *Land*.

The value of tillage and pastoral products compares in the three kingdoms with the number of hands employed as follows:—

|                    | Hands     | Product, Million £ | £ per Head |
|--------------------|-----------|--------------------|------------|
| England . . . . .  | 1,341,000 | 158                | 118        |
| Scotland . . . . . | 234,000   | 34                 | 145        |
| Ireland . . . . .  | 986,000   | 59                 | 60         |
| United Kingdom     | 2,561,000 | 251                | 97         |

FRANCE

This is the best cultivated country in Europe. The earliest statistics do not give us the total area under grain, being confined to wheat-growing in the last century, but the estimates of Chaptal, Rubichon, and Moreau, with the official reports of later times, afford some guide for the last ninety years, and may be summed up thus :—

| Year    | Acres under Grain | Crop, Millions of Bushels |                |       |
|---------|-------------------|---------------------------|----------------|-------|
|         |                   | Wheat                     | Oats, Rye, &c. | Total |
| 1801-20 | 30,000,000        | 140                       | 250            | 390   |
| 1825-35 | 32,000,000        | 170                       | 310            | 480   |
| 1840-50 | 34,300,000        | 220                       | 360            | 580   |
| 1860-76 | 36,000,000        | 265                       | 450            | 715   |
| 1883-86 | 37,100,000        | 301                       | 439            | 740   |

Official returns of wheat-growing, coupled with Moreau's tables since 1700, give the following :—

| Year    | Acres      | Million Bushels | Bushels per Acre | Value of Crop, £ |
|---------|------------|-----------------|------------------|------------------|
| 1700    | 12,400,000 | 83              | 6.7              | 12,000,000       |
| 1760    | 11,200,000 | 90              | 8.0              | 29,600,000       |
| 1764    | 12,400,000 | 97              | 7.8              | 28,100,000       |
| 1764    | 14,800,000 | 110             | 7.2              | 28,800,000       |
| 1791    | 11,500,000 | 130             | 11.2             | 37,800,000       |
| 1818    | 12,800,000 | 142             | 11.2             | 49,100,000       |
| 1839    | 13,900,000 | 195             | 14.0             | 60,800,000       |
| 1841    | 13,900,000 | 198             | 14.1             | 53,200,000       |
| 1851    | 15,000,000 | 238             | 15.9             | 49,800,000       |
| 1861    | 16,900,000 | 207             | 12.2             | 73,600,000       |
| 1871-80 | 17,100,000 | 270             | 15.7             | 90,800,000       |
| 1881-86 | 17,400,000 | 303             | 17.3             | 81,800,000       |
| 1889    | 17,600,000 | 309             | 17.5             | 74,200,000       |

Moreau states that 33 per cent. of the population were fed on wheat in the last century, and 60 per cent. in 1839.

The average yield of grain was officially stated thus (Spallart) :—

BUSHEL, PER ACRE

| Year           | Wheat | Oats | Barley | Rye  |
|----------------|-------|------|--------|------|
| 1815 . . . . . | 9.4   | 16.0 | 13.2   | 8.4  |
| 1835 . . . . . | 14.7  | 19.1 | 15.4   | 13.7 |
| 1855 . . . . . | 12.5  | 26.2 | 20.7   | 11.0 |
| 1875 . . . . . | 16.0  | 24.0 | 19.1   | 15.6 |
| 1880 . . . . . | 16.0  | 26.4 | 20.7   | 15.1 |
| 1884 . . . . . | 17.8  | 26.2 | 20.2   | 16.7 |

Notwithstanding the increase of grain-growing, France has paid large sums for imported grain. From 1801 to 1849, her net imports of wheat alone cost her 26 millions sterling, and the imports of grain from 1860 to 1886 (over exports) cost 211 millions sterling. The trade returns show :—

| Year    | Net Imports of Grain |                  | Annual Average      |            |
|---------|----------------------|------------------|---------------------|------------|
|         | Millions of Bushels  | Value, Million £ | Millions of Bushels | Value, £   |
| 1861-70 | 92                   | 32               | 9                   | 3,200,000  |
| 1871-80 | 384                  | 101              | 38                  | 10,100,000 |
| 1881-86 | 346                  | 78               | 58                  | 13,000,000 |
| Total   | 822                  | 211              | 32                  | 8,100,000  |

The importation of grain would have been still greater but for the rapid increase of potatoes, which have multiplied fivefold since 1820.

CROP OF POTATOES, TONS PER ANNUM

|                   |           |                   |            |
|-------------------|-----------|-------------------|------------|
| 1815-20 . . . . . | 1,950,000 | 1861-80 . . . . . | 6,500,000  |
| 1831-40 . . . . . | 4,900,000 | 1883-86 . . . . . | 10,400,000 |

The official returns of wine-growing since 1810 may be condensed as follows :—

VINEYARDS.

| Period  | Acres     | Millions of Gallons | Value of Wine, £ | Gallons per Acre |
|---------|-----------|---------------------|------------------|------------------|
| 1810-12 | 4,064,000 | 455                 | 26,600,000       | 112              |
| 1830-32 | 5,015,000 | 502                 | 35,600,000       | 100              |
| 1840-42 | 5,230,000 | 790                 | 52,700,000       | 151              |
| 1850-52 | 5,450,000 | 920                 | 80,500,000       | 166              |
| 1860-62 | 5,510,000 | 703                 | 68,900,000       | 126              |
| 1870-72 | 6,560,000 | 1,010               | 84,200,000       | 155              |
| 1880-82 | 5,150,000 | 720                 | 59,200,000       | 139              |
| 1883-86 | 5,110,000 | 790                 | 56,200,000       | 155              |
| 1889    | 4,550,000 | 525                 | 44,000,000       | 112              |

Down to 1880 there was always a surplus of wine for exportation, but since that year the imports exceed the exports: the net importation in 1886 was 190 million gallons. The phylloxera completely destroyed 2,900,000 acres of vines, one-half of which have been newly planted with American and other vines, besides injuring 1,600,000 acres, which still yield crops. Only 2,100,000 acres of the vineyards of 1872 have escaped the pest.

Beet-root is another valuable crop, having been introduced by Bonaparte: the area and production have been approximately as follows :—

| Year           | Beet-Growing |            |
|----------------|--------------|------------|
|                | Acres        | Crop, Tons |
| 1840 . . . . . | 200,000      | 800,000    |
| 1860 . . . . . | 490,000      | 3,000,000  |
| 1879 . . . . . | 1,100,000    | 10,600,000 |
| 1886 . . . . . | 1,310,000    | 14,800,000 |

In 1842 it was proposed in the Legislature to pull up the plantations and pay the owners £1,500,000 indemnity, but the bill was thrown out. The production of beet-sugar (see *Sugar*) at present exceeds 400,000 tons yearly against 35,000 in 1840.

Oil, flax, tobacco, chestnuts, &c., are crops of less note (see each under its own title).

M. Lavergne in 1859 compared the agricultural condition with that of 1789 as follows :—

ACRES

|                                 | 1789        | 1859        |
|---------------------------------|-------------|-------------|
| Arable . . . . .                | 61,720,000  | 64,190,000  |
| Meadow . . . . .                | 7,410,000   | 9,880,000   |
| Gardens and vineyards . . . . . | 7,400,000   | 9,870,000   |
| Woods and waste . . . . .       | 46,810,000  | 39,400,000  |
| Total . . . . .                 | 123,340,000 | 123,340,000 |

Since 1848 no less than nine million acres of waste land have been reclaimed, the principal areas being approximately shown thus :—

ACRES

|                         | 1848       | 1884       | Increase  |
|-------------------------|------------|------------|-----------|
| Grain . . . . .         | 34,500,000 | 37,500,000 | 3,000,000 |
| Various crops . . . . . | 23,000,000 | 24,500,000 | 1,500,000 |
| Forest . . . . .        | 16,200,000 | 20,700,000 | 4,500,000 |
| Total . . . . .         | 73,700,000 | 82,700,000 | 9,000,000 |

Machinery was not much in use till after the reign of Louis Philippe; it was common in 1840 to see horses treading out grain, but in 1862 an official report showed 101,000 threshing-machines, of which 2850 were worked by steam. Improved methods led to a better yield per acre, viz. :—

|                  | Yield, Bushels per Acre |         |
|------------------|-------------------------|---------|
|                  | 1821-30                 | 1866-75 |
| Wheat . . . . .  | 13                      | 16      |
| Oats . . . . .   | 17                      | 27      |
| Barley . . . . . | 14                      | 22      |

The yield of wheat in the first period was 550 to 100 lbs. seed, and in the second period 750.

The principal crops for 1888 compare with those of 1880 thus :—

|                         | Acreage    |            | Product             |             |
|-------------------------|------------|------------|---------------------|-------------|
|                         | 1880       | 1888       | 1880                | 1888        |
| Wheat . . . . .         | 16,990,000 | 17,180,000 | 274,000,000 bushels | 273,000,000 |
| Oats . . . . .          | 8,580,000  | 9,230,000  | 230,000,000 "       | 225,000,000 |
| Rye . . . . .           | 4,560,000  | 4,040,000  | 70,000,000 "        | 62,000,000  |
| Barley . . . . .        | 2,600,000  | 2,240,000  | 54,000,000 "        | 44,000,000  |
| Maize . . . . .         | 1,660,000  | 1,420,000  | 28,000,000 "        | 30,000,000  |
| Mixed . . . . .         | 2,620,000  | 2,330,000  | 46,000,000 "        | 40,000,000  |
| All grain . . . . .     | 37,010,000 | 36,440,000 | 702,000,000 bushels | 674,000,000 |
| Potatoes . . . . .      | 3,220,000  | 3,570,000  | 9,500,000 tons      | 10,400,000  |
| Beet-root . . . . .     | 1,110,000  | 1,310,000  | 14,800,000 "        | 12,200,000  |
| Vines . . . . .         | 5,450,000  | 4,550,000  | 653,000,000 gallons | 525,000,000 |
| Colza . . . . .         | 340,000    | 180,000    | 4,660,000 bushels   | 2,710,000   |
| Flax and hemp . . . . . | 380,000    | 250,000    | 2,400,000 " seed    | 1,660,000   |
| Olives . . . . .        | 280,000    | 270,000    | ... bushels         | 6,620,000   |
| Clover . . . . .        | 2,580,000  | 2,250,000  | ... tons            | 3,790,000   |
| Total . . . . .         | 50,370,000 | 48,820,000 | ...                 | ...         |

The above is exclusive of 3,620,000 acres under other artificial grasses than clover, producing 6,100,000 tons grass yearly.

The statistics of live-stock at various dates have been as follows :—

| Year           | Horses    | Cattle     | Sheep      | Pigs      | Goats     | Authority |
|----------------|-----------|------------|------------|-----------|-----------|-----------|
| 1812 . . . . . | 1,835,000 | 6,080,000  | 30,310,000 | ...       | ...       | Smith     |
| 1830 . . . . . | 2,500,000 | 7,130,000  | 29,130,000 | 4,500,000 | 1,210,000 | M'Gregor  |
| 1840 . . . . . | 1,870,000 | 9,930,000  | 32,150,000 | 4,500,000 | 900,000   | Schnabel  |
| 1852 . . . . . | 3,280,000 | 12,150,000 | 33,300,000 | 5,250,000 | 1,340,000 | Official  |
| 1862 . . . . . | 3,340,000 | 12,810,000 | 29,500,000 | 6,040,000 | 1,730,000 | "         |
| 1873 . . . . . | 3,140,000 | 11,720,000 | 25,000,000 | 5,760,000 | 1,790,000 | "         |
| 1883 . . . . . | 3,220,000 | 11,790,000 | 21,600,000 | 5,850,000 | 1,460,000 | "         |
| 1888 . . . . . | 3,250,000 | 13,380,000 | 22,600,000 | 5,850,000 | 1,550,000 | "         |

The official valuation of live-stock in 1882 was :—

|                  | No.        | Value, £    | £ per Head |
|------------------|------------|-------------|------------|
| Horses . . . . . | 2,840,000  | 54,400,000  | 19.4       |
| Mules . . . . .  | 250,000    | 4,300,000   | 17.2       |
| Asses . . . . .  | 400,000    | 1,900,000   | 4.8        |
| Cattle . . . . . | 11,800,000 | 123,500,000 | 10.5       |
| Sheep . . . . .  | 23,000,000 | 22,900,000  | 1.0        |
| Goats . . . . .  | 1,500,000  | 1,200,000   | 0.8        |
| Pigs . . . . .   | 5,800,000  | 22,900,000  | 3.9        |
| Total . . . . .  | ...        | 231,100,000 | ...        |

The production of meat at various times, according to French writers, was :—

| Years          | Tons, Meat | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1840 . . . . . | 671,000    | 43                  |
| 1860 . . . . . | 942,000    | 57                  |
| 1880 . . . . . | 1,155,000  | 67                  |
| 1888 . . . . . | 1,200,000  | 67                  |

The above does not include horse-flesh, of which some 2000 tons are used at Paris alone.

In 1882 the annual slaughter was estimated thus :—

|                                  | Number    | Tons, Meat | Lbs. per Carcase |
|----------------------------------|-----------|------------|------------------|
| 25 per cent. of cattle . . . . . | 3,300,000 | 640,000    | 430              |
| 33 per cent. of sheep . . . . .  | 7,700,000 | 210,000    | 60               |
| 70 per cent. of pigs . . . . .   | 4,000,000 | 305,000    | 170              |

According to M. Laverigne, the production of meat was 39 lbs. per inhabitant in 1790, and 61 lbs. in 1859. (See *Food*.) The value of agricultural and pastoral products has been estimated at various dates as follows :—

| Year           | Value of Products, Millions £ |          |       | Authorities    |
|----------------|-------------------------------|----------|-------|----------------|
|                | Agricultural                  | Pastoral | Total |                |
| 1815 . . . . . | 134                           | 88       | 222   | Chaptal        |
| 1835 . . . . . | 170                           | 99       | 269   | Schoen, Moreau |
| 1843 . . . . . | 212                           | 101      | 313   | Royer, Dupin   |
| 1862 . . . . . | 307                           | ...      | ...   | Official       |
| 1882 . . . . . | 322                           | 182      | 504*  | "              |
| 1886 . . . . . | 322                           | 138      | 460   | Mulhall        |

The number of persons engaged in agriculture was approximately as follows :—

| Year           | Principals | Retainers, &c. | Total      |
|----------------|------------|----------------|------------|
| 1851 . . . . . | 7,310,000  | 14,620,000     | 21,930,000 |
| 1861 . . . . . | 6,630,000  | 13,250,000     | 19,880,000 |
| 1872 . . . . . | 6,170,000  | 12,340,000     | 18,510,000 |
| 1881 . . . . . | 6,455,000  | 11,794,000     | 18,249,000 |

The number has declined 17 per cent. since 1851, while the value of products has increased, the ratio being about £49 per head in the former year, and £71 in 1886.

\* The official table sums up a total of 538 millions sterling, but this includes £34,000,000 for 84 million tons of animal manure, which I am compelled to deduct, as other nations take no account of manure among agricultural products.

The official statement of crops for 1886 was as follows :—

|                                 | Tons          | Value, £    | Per Ton, £    |
|---------------------------------|---------------|-------------|---------------|
| Wheat . . . .                   | 8,230,000     | 71,000,000  | 8.6           |
| Oats . . . .                    | 4,220,000     | 29,200,000  | 7.0           |
| Rye . . . .                     | 1,620,000     | 10,300,000  | 6.4           |
| Barley . . . .                  | 1,150,000     | 7,200,000   | 6.3           |
| Maize, &c. . .                  | 1,720,000     | 11,600,000  | 6.7           |
| All grain . . .                 | 16,940,000    | 129,300,000 | 7.6           |
| Potatoes . . .                  | 11,290,000    | 22,500,000  | 2.0           |
| Beetroot . . .                  | 15,040,000    | 12,100,000  | 0.8           |
| Hay . . . .                     | 25,600,000    | 57,600,000  | 2.2           |
| Apples . . . .                  | 1,100,000     | 3,200,000   | 3.0           |
| Chestnuts . . .                 | 760,000       | 1,800,000   | 2.4           |
| Mulberry leaves .               | 210,000       | 400,000     | 2.0           |
| Olives . . . .                  | 170,000       | 1,200,000   | 7.0           |
| Coza, &c. . . .                 | 94,000        | 1,100,000   | 12.0          |
| Hemp . . . .                    | 43,000        | 1,500,000   | 35.0          |
| Flax . . . .                    | 30,000        | 1,200,000   | 40.0          |
| Tobacco . . . .                 | 22,000        | 800,000     | 36.0          |
| Wine, gallons .                 | 670,000,000   | 49,000,000  | Per gal. 18d. |
| All crops . . .                 |               | 281,700,000 |               |
| Milk, gallons . .               | 1,620,000,000 | 46,800,000  | Per gal. 7d.  |
| Poultry and eggs . . .          |               | 12,000,000  |               |
| Vegetables and fruit . . .      |               | 30,000,000  |               |
| Timber, 1000 million cubic feet |               | 10,000,000  |               |
| Foals . . . .                   |               | 8,000,000   |               |
| Meat, 1,200,000 tons . . .      |               | 60,000,000  |               |
| Hides, wool, tallow, wax, &c. . |               | 11,500,000  |               |
| Total . . . .                   |               | 460,000,000 |               |

The value of crops for 1888 was returned at 254 millions sterling, being 28 millions less than in 1886, of which 15 millions stood for loss in the vintage.

AGRICULTURAL CAPITAL

| MILLIONS, £ STERLING |       |        |          |       |           |
|----------------------|-------|--------|----------|-------|-----------|
| Year                 | Land  | Cattle | Sundries | Total | Product   |
| 1815                 | 1,293 | 53     | 149      | 1,495 | 222       |
| 1835                 | 1,473 | 96     | 174      | 1,743 | 269       |
| 1852                 | 2,106 | 166    | 252      | 2,524 | 356       |
| 1881                 | 2,986 | 231    | 357      | 3,574 | 504       |
| 1886                 | 2,688 | 218    | 323      | 3,229 | 460       |
|                      |       |        |          |       | Per cent. |
|                      |       |        |          |       | 15.0      |
|                      |       |        |          |       | 15.5      |
|                      |       |        |          |       | 14.1      |
|                      |       |        |          |       | 14.4      |

The value of land is stated above, as given by Chaptal and Dutens for 1815 and 1835, by Government reports for 1852 and 1881, the figures for 1886 being an estimated reduction of 10 per cent. from 1881, the prevalent opinion in France being that the fall is 15 per cent. As regards cattle, Chaptal gives the value for 1815, and the subsequent estimates are according to the number of cattle at the respective dates. Sundries are estimated at 10 per

cent., although Chaptal and Dutens made them 14 per cent. of the total.

The increase of agricultural wealth was rapid down to 1881, viz. :—

| Period        | Millions, £  | Per Annum, £ |
|---------------|--------------|--------------|
| 1815-35 . . . | 248 increase | 12,400,000   |
| 1836-52 . . . | 781 „        | 46,000,000   |
| 1853-81 . . . | 1,050 „      | 36,200,000   |
| 1882-86 . . . | 345 decrease | 69,000,000   |

The capital represented by agriculture is at present double what it was in the year 1815, and nearly 40 per cent. of the wealth of the nation.

See *Wealth*. For land-tenure, see *Land*.

GERMANY

Official returns give the area under tillage since 1837, thus :—

| Year | Acres under Tillage | Grain, Million Bushels | Authority |
|------|---------------------|------------------------|-----------|
| 1816 | 23,100,000          | 296                    | Fisher    |
| 1837 | 30,010,000          | ...                    | Official  |
| 1858 | 35,330,000          | ...                    | „         |
| 1879 | 43,310,000          | 580                    | „         |
| 1887 | 44,050,000          | 640                    | „         |

The above area under tillage includes all crops except hay, which at present covers nearly 15 million acres. Since 1816 the area of tillage has almost doubled, and the production of grain more than doubled.

The area of tillage was distributed in this manner :—

ACRES OF TILLAGE

|                | 1816       | 1837       | 1858       | 1887       |
|----------------|------------|------------|------------|------------|
| Prussia . . .  | 10,430,000 | 14,160,000 | 17,740,000 | 27,600,000 |
| Hanover . . .  | 1,310,000  | 1,690,000  | 1,840,000  |            |
| Bavaria . . .  | 3,560,000  | 4,320,000  | 4,620,000  |            |
| Wurtemberg . . | 1,390,000  | 1,610,000  | 1,690,000  |            |
| Saxony . . .   | 1,200,000  | 1,650,000  | 2,120,000  | 1,900,000  |
| Duchies, &c. . | 5,210,000  | 6,580,000  | 7,320,000  | 7,250,000  |
| Total . . .    | 23,100,000 | 30,010,000 | 35,330,000 | 44,050,000 |

According to a statement published in 1834, the kingdom of Prussia showed as follows :—

|                       | Acres      | An. Profit £ |
|-----------------------|------------|--------------|
| Arable and meadow . . | 28,510,000 | 8,400,000    |
| Pasture . . . .       | 13,620,000 | 3,300,000    |
| Woods . . . .         | 17,300,000 | 1,100,000    |
| Various . . . .       | 12,600,000 | 800,000      |
| Total . . . .         | 72,030,000 | 13,600,000   |

The following table shows the tilled and untilled area of the several States, 1887 :—

AREA

|                   | Prussia    | Bavaria    | Saxony    | Wurtemberg | Small States | Total       |
|-------------------|------------|------------|-----------|------------|--------------|-------------|
| Arable . . . .    | 27,600,000 | 5,500,000  | 1,900,000 | 1,800,000  | 7,250,000    | 44,050,000  |
| Meadow . . . .    | 8,150,000  | 3,200,000  | 420,000   | 720,000    | 2,160,000    | 14,650,000  |
| Forest . . . .    | 18,100,000 | 5,900,000  | 600,000   | 1,200,000  | 4,300,000    | 30,100,000  |
| Pasture, &c . . . | 26,450,000 | 2,800,000  | 580,000   | 480,000    | 7,290,000    | 37,600,000  |
| Total . . . .     | 80,300,000 | 17,400,000 | 3,500,000 | 4,200,000  | 21,000,000   | 126,400,000 |

The area under principal crops in 1887 was as follows :—

ACRES

|                     | Prussia    | Bavaria   | Saxony    | Wurtemberg | Baden     | Small States | Total      |
|---------------------|------------|-----------|-----------|------------|-----------|--------------|------------|
| Wheat . . . . .     | 2,700,000  | 800,000   | 120,000   | 75,000     | 100,000   | 955,000      | 4,750,000  |
| Rye . . . . .       | 10,950,000 | 1,550,000 | 520,000   | 550,000    | 300,000   | 1,470,000    | 15,340,000 |
| Barley . . . . .    | 2,300,000  | 850,000   | 100,000   | 220,000    | 150,000   | 680,000      | 4,300,000  |
| Oats . . . . .      | 6,200,000  | 1,100,000 | 450,000   | 350,000    | 150,000   | 550,000      | 8,800,000  |
| All grain . . . . . | 22,150,000 | 4,300,000 | 1,190,000 | 1,195,000  | 700,000   | 3,655,000    | 33,190,000 |
| Meadow . . . . .    | 8,150,000  | 3,200,000 | 420,000   | 720,000    | 500,000   | 1,660,000    | 14,650,000 |
| Potatoes . . . . .  | 4,980,000  | 740,000   | 300,000   | 200,000    | 210,000   | 820,000      | 7,250,000  |
| Total . . . . .     | 35,280,000 | 8,240,000 | 1,910,000 | 2,115,000  | 1,410,000 | 6,135,000    | 55,090,000 |

The crops were as follows :—

TONS IN 1887

|                     | Prussia    | Bavaria   | Saxony    | Wurtemberg | Baden   | Small States | Total      |
|---------------------|------------|-----------|-----------|------------|---------|--------------|------------|
| Wheat . . . . .     | 1,470,000  | 420,000   | 85,000    | 40,000     | 50,000  | 605,000      | 2,670,000  |
| Rye, &c. . . . .    | 4,220,000  | 790,000   | 285,000   | 235,000    | 140,000 | 860,000      | 6,530,000  |
| Barley . . . . .    | 1,145,000  | 485,000   | 60,000    | 130,000    | 90,000  | 430,000      | 2,340,000  |
| Oats . . . . .      | 2,890,000  | 590,000   | 295,000   | 180,000    | 80,000  | 825,000      | 4,860,000  |
| All grain . . . . . | 9,725,000  | 2,285,000 | 725,000   | 585,000    | 360,000 | 2,720,000    | 16,400,000 |
| Hay . . . . .       | 6,650,000  | 6,130,000 | 520,000   | 1,260,000  | 920,000 | 2,420,000    | 17,900,000 |
| Potatoes . . . . .  | 16,250,000 | 2,730,000 | 1,230,000 | 680,000    | 730,000 | 3,520,000    | 25,140,000 |

The crops of recent years compared thus :—

|                         | 1880       | 1881-85    | 1886       | 1887       | 1888       | 1889       |
|-------------------------|------------|------------|------------|------------|------------|------------|
|                         | Tons       | Tons       | Tons       | Tons       | Tons       | Tons       |
| Wheat . . . . .         | 2,345,000  | 2,410,000  | 2,600,000  | 2,670,000  | 2,830,000  | 2,530,000  |
| Rye . . . . .           | 5,440,000  | 6,200,000  | 5,940,000  | 6,530,000  | 6,480,000  | 5,630,000  |
| Barley . . . . .        | 2,145,000  | 2,180,000  | 2,260,000  | 2,340,000  | 2,205,000  | 2,260,000  |
| Oats . . . . .          | 4,230,000  | 4,120,000  | 4,340,000  | 4,860,000  | 4,300,000  | 4,650,000  |
| All grain . . . . .     | 14,160,000 | 14,910,000 | 15,140,000 | 16,400,000 | 15,815,000 | 15,070,000 |
| Hay . . . . .           | 19,560,000 | 17,100,000 | 15,880,000 | 17,900,000 | 16,360,000 | 17,895,000 |
| Potatoes . . . . .      | 19,470,000 | 25,020,000 | 27,950,000 | 25,140,000 | 25,270,000 | 21,910,000 |
| Beetroot . . . . .      | 11,300,000 | ...        | 13,970,000 | 15,500,000 | 12,650,000 | ...        |
| Turnips, &c. . . . .    | 3,300,000  | ...        | 3,850,000  | 2,640,000  | ...        | ...        |
| Tobacco . . . . .       | 52,000     | ...        | 38,000     | 39,000     | 41,000     | 26,000     |
| Hops . . . . .          | ...        | ...        | 33,000     | 30,000     | 24,000     | 22,000     |
| Wine, gallons . . . . . | ...        | ...        | 82,000,000 | 33,000,000 | 53,000,000 | 64,000,000 |

If we take the average for 1888-89 and compare same with that of the years 1881-85, we find an increase of 10 per cent. in wheat and oats, a falling-off in rye, and altogether an increase of 3 per cent. in the weight of grain produced. There is a decline of 6 per cent. in potatoes, while hay and beetroot remain stationary. Wine shows violent fluctuations, the yield in 1889 being almost double that of 1887. There is a remarkable decline in tobacco, the crop of 1889 being only half that of 1880, and also in hops, which have fallen off by one-third.

A table published in 1886 showed the production of grain in the previous year compared with population as follows :—

|                        | Bushels, Grain | Population | Bushels per Head |
|------------------------|----------------|------------|------------------|
| Prussia . . . . .      | 347,000,000    | 28,300,000 | 12.3             |
| Bavaria . . . . .      | 85,000,000     | 5,420,000  | 15.6             |
| Saxony . . . . .       | 27,000,000     | 3,180,000  | 8.5              |
| Wurtemberg . . . . .   | 16,000,000     | 1,950,000  | 8.0              |
| Baden . . . . .        | 11,000,000     | 1,600,000  | 7.0              |
| Mecklenburg . . . . .  | 22,000,000     | 680,000    | 32.5             |
| Alsace . . . . .       | 18,000,000     | 1,560,000  | 11.5             |
| Hesse . . . . .        | 11,000,000     | 960,000    | 11.4             |
| Brunswick . . . . .    | 8,000,000      | 370,000    | 21.5             |
| Small States . . . . . | 35,000,000     | 2,790,000  | 12.5             |
| Total . . . . .        | 580,000,000    | 46,850,000 | 12.3             |

The average yield per acre, according to observations in the several States spreading over a term of eight years ending 1885, was as follows :—

|                         | Bushels per Acre |         |        |            |       |             |
|-------------------------|------------------|---------|--------|------------|-------|-------------|
|                         | Prussia          | Bavaria | Saxony | Wurtemberg | Baden | All Germany |
| Wheat . . . . .         | 18               | 20      | 23     | 18         | 17    | 19          |
| Rye . . . . .           | 14               | 18      | 20     | 18         | 15    | 15          |
| Barley . . . . .        | 21               | 23      | 25     | 25         | 23    | 22          |
| Oats . . . . .          | 24               | 28      | 35     | 20         | 27    | 27          |
| Potatoes, cwts. . . . . | 58               | 76      | 80     | 68         | 70    | 64          |
| Hay, cwts. . . . .      | 18               | 39      | 25     | 34         | 44    | 26          |

The following table of live stock is made up of the statements of Malchus, Schnabel, and Brachelli in 1828 and 1850, and official returns since the latter date :—

|                  | 1822       | 1850       | 1867       | 1873       | 1883       |
|------------------|------------|------------|------------|------------|------------|
| Horses . . . . . | 2,500,000  | 2,500,000  | 3,190,000  | 3,350,000  | 3,520,000  |
| Cows . . . . .   | 9,770,000  | 11,270,000 | 14,900,000 | 15,780,000 | 15,790,000 |
| Sheep . . . . .  | 17,300,000 | 21,330,000 | 28,020,000 | 25,000,000 | 19,200,000 |
| Pigs . . . . .   | 4,500,000  | 3,920,000  | 6,460,000  | 7,120,000  | 9,210,000  |
| Goats . . . . .  | 700,000    | 1,300,000  | 1,820,000  | 2,320,000  | 2,640,000  |

German writers compute the amount of seed to the acre, and the average product as follows :—

|                  | Seed, lbs. | Product, lbs. | Equiv. in Bushels |
|------------------|------------|---------------|-------------------|
| Wheat . . . . .  | 157        | 1,260         | 20.4              |
| Rye . . . . .    | 150        | 900           | 15.2              |
| Oats . . . . .   | 140        | 980           | 25.7              |
| Barley . . . . . | 133        | 1,200         | 23.0              |

The quantity of grain retained for seed is usually 82 million bushels, or one-seventh of the whole crop. It is found that 100 lbs. wheat gave 82 lbs. flour, and 100 lbs. barley 78 lbs. malt.

The following table shows the live stock of Prussia at various dates :—

|                  | 1816      | 1837       | 1873       | 1883       |
|------------------|-----------|------------|------------|------------|
| Horses . . . . . | 1,240,000 | 1,470,000  | 2,280,000  | 2,420,000  |
| Cattle . . . . . | 4,010,000 | 4,850,000  | 8,610,000  | 8,740,000  |
| Sheep . . . . .  | 8,260,000 | 15,010,000 | 19,630,000 | 14,750,000 |
| Pigs . . . . .   | 1,490,000 | 1,940,000  | 4,280,000  | 5,820,000  |

The returns for 1873 and 1883, include Hanover and other territories annexed to Prussia in 1867.

The distribution of live stock in 1883 was as follows :—

|                  | Prussia    | Bavaria   | Saxony  | Wurtemberg | Small States | All Germany |
|------------------|------------|-----------|---------|------------|--------------|-------------|
| Horses . . . . . | 2,420,000  | 355,000   | 125,000 | 95,000     | 525,000      | 3,520,000   |
| Cows . . . . .   | 8,740,000  | 3,040,000 | 650,000 | 905,000    | 2,455,000    | 15,790,000  |
| Sheep . . . . .  | 14,750,000 | 1,180,000 | 150,000 | 550,000    | 2,500,000    | 19,190,000  |
| Pigs . . . . .   | 5,820,000  | 1,040,000 | 350,000 | 290,000    | 1,710,000    | 9,210,000   |
| Goats . . . . .  | 1,680,000  | 220,000   | 120,000 | 50,000     | 570,000      | 2,640,000   |

*Per 100 Inhabitants*

|                  | 6.9  | 4.7  | 8.5  | 5.0  | 6.6  | 6.5  |
|------------------|------|------|------|------|------|------|
| Horses . . . . . | 25.1 | 40.0 | 43.4 | 46.4 | 30.7 | 29.2 |
| Cows . . . . .   | 42.3 | 15.5 | 9.9  | 28.2 | 32.0 | 35.5 |
| Sheep . . . . .  | 16.7 | 13.7 | 23.7 | 15.0 | 21.4 | 17.0 |
| Pigs . . . . .   | 4.8  | 2.9  | 7.8  | 2.8  | 7.1  | 4.9  |
| Goats . . . . .  |      |      |      |      |      |      |

Prussia is above the average in horses and sheep, Bavaria in cows, Saxony in horses, cows, and pigs, Wurtemberg in cows only. The ratios of sheep in Bavaria and Saxony are very low.

The value of all kinds of live-stock in 1883 was officially given as follows :—

|                  | Number     | Value, £    | £ per Head |
|------------------|------------|-------------|------------|
| Horses . . . . . | 3,520,000  | 84,000,000  | 23.7       |
| Cattle . . . . . | 15,787,000 | 153,700,000 | 9.7        |
| Sheep . . . . .  | 19,190,000 | 15,300,000  | 0.8        |
| Pigs . . . . .   | 9,206,000  | 23,800,000  | 2.6        |
| Goats . . . . .  | 2,645,000  | 2,000,000   | 0.7        |
| Total . . . . .  | ...        | 278,800,000 | ...        |

Prices of live stock have since declined about 6 per cent.; the value in 1887 would be approximately £262,000,000 sterling.

The production of meat, calculating 500 lbs. per carcase of beef, 56 lbs. per sheep, 100 lbs. per pig, and 28 lbs. per goat, was as follows :—

| Year           | Meat, Tons | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1828 . . . . . | 760,000    | 60                  |
| 1850 . . . . . | 890,000    | 60                  |
| 1867 . . . . . | 1,150,000  | 67                  |
| 1885 . . . . . | 1,375,000  | 64                  |

The value of products in 1886 was approximately as follows :—

|                           | Tons       | £           | Sundries             | £           |
|---------------------------|------------|-------------|----------------------|-------------|
| Wheat . . . . .           | 2,600,000  | 18,700,000  | Wine . . . . .       | 5,000,000   |
| Rye . . . . .             | 5,940,000  | 33,900,000  | Vegetables . . . . . | 30,000,000  |
| Barley . . . . .          | 2,260,000  | 14,700,000  | &c. . . . .          |             |
| Oats . . . . .            | 4,340,000  | 25,200,000  | Timber . . . . .     | 13,000,000  |
|                           |            |             | Dairy . . . . .      | 55,300,000  |
| All grain . . . . .       | 15,140,000 | 92,500,000  | Meat . . . . .       | 68,700,000  |
| Straw . . . . .           | 15,100,000 | 15,100,000  | Poultry . . . . .    | 14,100,000  |
| Hay . . . . .             | 15,900,000 | 31,800,000  | Tobacco . . . . .    | 4,000,000   |
| Potatoes . . . . .        | 28,000,000 | 56,000,000  | flax . . . . .       |             |
| Beet, &c. . . . .         | 17,800,000 | 14,400,000  | Foals . . . . .      | 9,000,000   |
|                           |            |             | Hides . . . . .      | 15,100,000  |
| Principal crops . . . . . | ...        | 209,800,000 | wool, &c. . . . .    |             |
|                           |            |             | Sundries . . . . .   | 214,200,000 |

|                                 | £           |
|---------------------------------|-------------|
| Agricultural products . . . . . | 262,000,000 |
| Animal products . . . . .       | 162,000,000 |
| Total . . . . .                 | 424,000,000 |

The value of products at different dates was approximately thus :—

| Year | Millions, £ Sterling |          |       | Authority        |
|------|----------------------|----------|-------|------------------|
|      | Agricultural         | Pastoral | Total |                  |
| 1840 | 105                  | ...      | ...   | Journ. des Econ. |
| 1856 | 151                  | 80       | 231   | Block, Viebahn   |
| 1886 | 262                  | 162      | 424   | ...              |

The products in 1886 were distributed as follows :—

|                  | Agriculture | Animal      | Total       | £ per Inhab. |
|------------------|-------------|-------------|-------------|--------------|
|                  | £           | £           | £           |              |
| Prussia . . .    | 149,000,000 | 99,800,000  | 248,800,000 | 9.0          |
| Bavaria . . .    | 43,700,000  | 24,100,000  | 67,800,000  | 12.9         |
| Saxony . . .     | 12,300,000  | 5,900,000   | 18,200,000  | 6.0          |
| Wurtemberg . .   | 10,500,000  | 7,700,000   | 18,200,000  | 9.4          |
| Small States . . | 46,400,000  | 24,600,000  | 71,000,000  | 9.2          |
| Total . . .      | 261,900,000 | 162,100,000 | 424,000,000 | 9.4          |

The number of hands employed was approximately thus :—

| Year       | Hands     | Product, £  | £ per Head |
|------------|-----------|-------------|------------|
| 1840 . . . | 6,400,000 | 170,000,000 | 27         |
| 1856 . . . | 7,400,000 | 231,000,000 | 31         |
| 1886 . . . | 8,120,000 | 424,000,000 | 52         |

The introduction of machinery has increased production in a striking manner, one man now producing more than two did in 1840.

#### LAND VALUE

In 1837 the valuation of land in Prussia was 305 millions sterling. In 1856 Viebahn valued German lands at 1304 millions, a rise of 170 per cent. in twenty years. Wurtemberg averaged per acre 50 per cent. more value than the rest of Germany. Guided by Wurtemberg values in 1880 (that is, 50 per cent. over the rest), the value of Germany may be put down thus :—

|                 | Acres       | Price per Acre | Amount, Millions £ |
|-----------------|-------------|----------------|--------------------|
|                 |             | £              |                    |
| Arable . . .    | 44,000,000  | 19             | 836                |
| Meadow . . .    | 14,600,000  | 28             | 409                |
| Garden, &c. . . | 2,300,000   | 40             | 92                 |
| Pasture . . .   | 35,400,000  | 5              | 177                |
| Forest . . .    | 30,100,000  | 10             | 301                |
| Total . . .     | 126,400,000 | ...            | 1,815              |

The values of the principal States show thus :—

|               | Millions, £ Sterling |         |            |        |              | Total |
|---------------|----------------------|---------|------------|--------|--------------|-------|
|               | Prussia              | Bavaria | Wurtemberg | Saxony | Duchies, &c. |       |
| Arable . . .  | 513                  | 103     | 49         | 35     | 136          | 836   |
| Meadow . . .  | 227                  | 89      | 25         | 12     | 56           | 409   |
| Gardens . . . | 24                   | 12      | 8          | 4      | 44           | 92    |
| Pasture . . . | 127                  | 13      | 3          | 3      | 30           | 176   |
| Forest . . .  | 176                  | 58      | 20         | 6      | 42           | 302   |
| Total . . .   | 1,067                | 275     | 105        | 60     | 308          | 1,815 |

#### AGRICULTURAL CAPITAL

The amount of capital and product may be put down approximately as follows :—

| Year | Capital, Millions £ |        |          |       | Product, Millions £ | Ratio to Capital, per Cent. |
|------|---------------------|--------|----------|-------|---------------------|-----------------------------|
|      | Land                | Cattle | Sundries | Total |                     |                             |
| 1837 | 480                 | 88     | 63       | 631   | 170                 | 27.0                        |
| 1856 | 1,304               | 138    | 160      | 1,602 | 231                 | 14.4                        |
| 1886 | 1,815               | 262    | 230      | 2,307 | 424                 | 18.4                        |

In 1886 the agricultural capital stood approximately thus :—

|                | Millions, £ Sterling |         |        |            |         |       |
|----------------|----------------------|---------|--------|------------|---------|-------|
|                | Prussia              | Bavaria | Saxony | Wurtemberg | Duchies | Total |
| Land . . .     | 1,067                | 275     | 60     | 105        | 308     | 1,815 |
| Cattle . . .   | 162                  | 40      | 9      | 12         | 39      | 262   |
| Sundries . . . | 135                  | 35      | 8      | 13         | 39      | 230   |
| Total . . .    | 1,364                | 350     | 77     | 130        | 386     | 2,307 |

Capital and product in the above States compare thus :—

|                | Millions, £ Sterling |         |               |
|----------------|----------------------|---------|---------------|
|                | Capital              | Product | Ratio to Cap. |
| Prussia . . .  | 1,364                | 249     | 18.0          |
| Bavaria . . .  | 350                  | 68      | 19.0          |
| Saxony . . .   | 77                   | 18      | 23.2          |
| Wurtemberg . . | 130                  | 18      | 13.8          |
| Duchies . . .  | 386                  | 71      | 18.0          |
| Total . . .    | 2,307                | 424     | 18.4          |

The increase of agricultural capital in Germany was as follows :—

| Interval | £           | Average per Annum |
|----------|-------------|-------------------|
| 1837-56  | 971,000,000 | 51,000,000        |
| 1856-86  | 705,000,000 | 23,500,000        |

The most rapid increase occurred between 1848 and 1858, consequent on the breaking up of large estates among the peasantry. See *Lands*.

#### RUSSIA

The area under grain previously to 1870 is not known, but may be estimated from the table of production, as below, published officially.

| Period  | Grain, Millions of Bushels Yearly |          |                  | Approximate Area, Millions of Acres |
|---------|-----------------------------------|----------|------------------|-------------------------------------|
|         | Crop                              | Exported | Home Consumption |                                     |
| 1800-13 | 890                               | 10       | 880              | 100                                 |
| 1834-40 | 1,040                             | 27       | 1,013            | 110                                 |
| 1841-47 | 1,210                             | 32       | 1,178            | 120                                 |
| 1857-63 | 1,270                             | 34       | 1,236            | 130                                 |
| 1871-80 | 1,730                             | 146      | 1,584            | 167                                 |

The emancipation of serfs in 1861 was followed by a great increase of grain production.

These statistics refer to Russia proper, exclusive of Poland, Finland, Caucasus, or Siberia. The distribution of area is shown as follows :—

|                            | Area, Acres   |               | Product in 1887 |
|----------------------------|---------------|---------------|-----------------|
|                            | 1872          | 1881          |                 |
|                            |               |               | Tons            |
| Grain . . . .              | 154,800,000   | 159,800,000   | 44,250,000      |
| Potatoes . . .             | 3,170,000     | 3,710,000     | 7,500,000       |
| Flax and hemp .            | 3,060,000     | 5,170,000     | 540,000         |
| Meadow and pasture . . . } | 144,000       | 176,000,000   | ...             |
| Forest . . . .             | 500,000       | 485,000,000   | 120,000,000     |
| Waste . . . .              | 439,000       | 414,000,000   | ...             |
| Total . . . .              | 1,244,000,000 | 1,244,000,000 | ...             |

The grain-crops of 1887 compare with those of 1872 as follows :—

|                | Millions of Bushels |       | Area under Grain |             |
|----------------|---------------------|-------|------------------|-------------|
|                | 1872                | 1887  | 1872             | 1881        |
| Wheat . . . .  | 158                 | 269   | 28,700,000       | 28,900,000  |
| Rye . . . .    | 547                 | 721   | 66,400,000       | 64,600,000  |
| Oats . . . .   | 544                 | 599   | 32,800,000       | 34,900,000  |
| Barley . . . . | 125                 | 162   | 15,500,000       | 12,500,000  |
| Maize, &c. . . | 86                  | 152   | 11,400,000       | 18,900,000  |
| Total . . . .  | 1,460               | 1,903 | 154,800,000      | 159,800,000 |

Kaufmann gives the average crops of Russia and Poland in the years 1870-78, and the average value in the years 1878-81, as follows :—

|                 | Millions of Bushels |        |       | Value, £    |
|-----------------|---------------------|--------|-------|-------------|
|                 | Russia              | Poland | Total |             |
| Wheat . . . .   | 176                 | 15     | 191   | 44,800,000  |
| Rye . . . .     | 556                 | 47     | 603   | 98,800,000  |
| Oats . . . .    | 446                 | 36     | 482   | 50,500,000  |
| Barley, &c. . . | 260                 | 25     | 285   | 38,900,000  |
| Total . . . .   | 1,438               | 123    | 1,561 | 233,000,000 |

He shows, moreover, that the crops during the ensuing years 1883-84-85 gave an average (for Russia and Poland) as follows :—

|                 | Million Bushels | Tons       |
|-----------------|-----------------|------------|
| Wheat . . . .   | 231             | 6,350,000  |
| Rye . . . .     | 675             | 17,700,000 |
| Oats . . . .    | 523             | 8,700,000  |
| Barley, &c. . . | 285             | 6,450,000  |
| Total . . . .   | 1,694           | 39,200,000 |

So great, however, was the fall in prices that the grain crops of 1884 were valued at only £156,400,000.

A monjik's farm averages 35 acres, which requires three men to cultivate ; the product is estimated thus :—

|                 | Acres | Bushels |      |      |          |
|-----------------|-------|---------|------|------|----------|
|                 |       | Crop    | Food | Seed | For Sale |
| Rye . . . .     | 10    | 100     | 70   | 17   | 13       |
| Wheat . . . .   | 4     | 30      | 5    | 5    | 20       |
| Oats, &c. . . . | 10    | 120     | 30   | 15   | 75       |
| All grain . . . | 24    | 250     | 105  | 37   | 108      |

The earliest official returns of live-stock are those of 1850, but we have also Schnabel's and Malchus's estimates for 1828 :—

|              | 1828       | 1850       | 1870       | 1880       |
|--------------|------------|------------|------------|------------|
| Horses . . . | 12,000,000 | 13,500,000 | 15,600,000 | 20,020,000 |
| Cattle . . . | 19,000,000 | 20,960,000 | 21,400,000 | 23,840,000 |
| Sheep . . .  | 36,000,000 | 37,530,000 | 45,300,000 | 47,510,000 |
| Pigs . . .   | 15,800,000 | 8,890,000  | 9,100,000  | 9,200,000  |
| Goats . . .  | ...        | 1,600,000  | 1,200,000  | 1,370,000  |

The production of meat, at 500 lbs. per beef carcase, 50 lbs. per sheep, and 100 lbs. per pig, was as follows :—

| Year         | Tons, Meat | Lbs. per Inhabitant |
|--------------|------------|---------------------|
| 1828 . . . . | 1,430,000  | 66                  |
| 1850 . . . . | 1,670,000  | 67                  |
| 1870 . . . . | 1,760,000  | 60                  |
| 1889 . . . . | 1,885,000  | 51                  |

The value of live-stock was approximately as follows :—

|                | No.        | Price, £            | Value, £ |
|----------------|------------|---------------------|----------|
| Horses . . . . | 20,020,000 | See Part II. p. 619 |          |
| Cattle . . . . | 23,840,000 |                     |          |
| Sheep . . . .  | 47,510,000 |                     |          |
| Pigs . . . .   | 9,200,000  |                     |          |
| Goats . . . .  | 1,370,000  |                     |          |
| Total . . . .  | ...        | ...                 | ...      |

The value of products in 1887 was as follows :—

|                     | Tons       | £           | Sundries           | £           |
|---------------------|------------|-------------|--------------------|-------------|
| Wheat . . .         | 7,500,000  | 37,100,000  | Wine . . .         | 3,800,000   |
| Rye . . .           | 18,900,000 | 79,200,000  | Beetroot . .       | 4,000,000   |
| Barley . . .        | 3,750,000  | 14,800,000  | Vegetables .       | 32,000,000  |
| Oats . . .          | 10,350,000 | 35,000,000  | Poultry . . .      | 12,000,000  |
| Buckwheat &c. . }   | 3,750,000  | 15,000,000  | Tobacco . . .      | 3,200,000   |
|                     |            |             | Dairy . . .        | 47,700,000  |
|                     |            |             | Timber . . .       | 40,000,000  |
| All grain . .       | 44,250,000 | 181,100,000 | Meat . . .         | 63,000,000  |
| Straw . . .         | 44,000,000 | 22,000,000  | Foals . . .        | 38,000,000  |
| Hay . . .           | 60,000,000 | 60,000,000  | Hides, wool, &c. } | 28,000,000  |
| Potatoes . .        | 7,500,000  | 11,200,000  |                    |             |
| Flax, &c. .         | 540,000    | 16,200,000  |                    |             |
| Principal crops . } | ...        | 290,500,000 | Sundries . .       | 272,500,000 |

|                               | £           |
|-------------------------------|-------------|
| Agricultural products . . . . | 373,200,000 |
| Animal products . . . .       | 189,800,000 |
| Total . . . .                 | 563,000,000 |

The values at the following dates were approximately :—

| Year         | Millions, £ Sterling |        |       |
|--------------|----------------------|--------|-------|
|              | Agricultural         | Animal | Total |
| 1834 . . . . | 188                  | 60     | 248   |
| 1850 . . . . | 213                  | 82     | 295   |
| 1872 . . . . | 287                  | 135    | 422   |
| 1887 . . . . | 373                  | 190    | 563   |

The agricultural population in 1884 was approximately 56,815,000, but the number of adults engaged in tillage and pasture was not over 22,700,000, which gives an average product yearly of £25 per head.

#### LAND VALUE

Before the Crimean war the ordinary price of land was about £1 per acre, but when the emancipation of the serfs

was decreed in 1861, the Government paid an indemnity to the nobles averaging 29 shillings per acre. According to the British Ambassador, Sir A. Buchanan, the value in 1869 was doubled by the emancipation, and this is confirmed by Strebinsky, whose estimate in 1879 was £3 per acre. This applies only to cultivated land, the value of waste and forest being about one-tenth. The following table shows the values :—

| Year | Area, Millions of Acres |                |       | Value, Millions £ Sterling |        |       |
|------|-------------------------|----------------|-------|----------------------------|--------|-------|
|      | Culti-<br>vated         | Forest,<br>&c. | Total | Culti-<br>vated            | Forest | Total |
| 1834 | 183                     | 1,061          | 1,244 | 183                        | 106    | 289   |
| 1850 | 200                     | 1,044          | 1,244 | 200                        | 104    | 304   |
| 1870 | 305                     | 939            | 1,244 | 610                        | 188    | 798   |

#### AGRICULTURAL CAPITAL

| Year           | Millions £ Sterling |        |          |       |
|----------------|---------------------|--------|----------|-------|
|                | Land                | Cattle | Sundries | Total |
| 1834 . . . . . | 289                 | 176    | 52       | 517   |
| 1850 . . . . . | 304                 | 223    | 59       | 586   |
| 1870 . . . . . | 798                 | 409    | 134      | 1,341 |

The increase of agricultural capital was as follows :—

| Period            | Millions £ Sterling | Per Annum, £ |
|-------------------|---------------------|--------------|
| 1834-50 . . . . . | 69                  | 4,060,000    |
| 1851-70 . . . . . | 755                 | 37,750,000   |

The emancipation of the serfs added about 1200 millions sterling to the rural wealth in 26 years, from 1860 to 1886. See *Lands*.

#### POLAND

Poland has an area of 32 million acres, of which nearly one-half is cultivated. In 1864 feudalism was abolished, the nobles receiving £24,000,000 for 21 million acres, distributed in ten-acre lots among 2,064,000 male serfs of all ages, three-fourths of the amount being advanced by Government and the rest made good by the serfs. The number of serfs is one-tenth of those who were emancipated in Russia; the area of the land given them (21 million acres) is one-ninth of the land so expropriated in Russia.

According to Kaufmann the average crops of Poland in the years 1870-78 were as follows :—

|                     | Million Bushels | Value, £   |
|---------------------|-----------------|------------|
| Wheat . . . . .     | 15              | 3,600,000  |
| Rye . . . . .       | 47              | 8,100,000  |
| Oats . . . . .      | 36              | 3,600,000  |
| Barley, &c. . . . . | 25              | 4,000,000  |
| Total . . . . .     | 123             | 19,300,000 |

According to Fisher (Food-Supply, 1860) the products of Poland increased as follows :—

|                    | Tons Produced |           |
|--------------------|---------------|-----------|
|                    | 1822          | 1857      |
| Grain . . . . .    | 800,000       | 2,300,000 |
| Potatoes . . . . . | 280,000       | 1,750,000 |
| Meat . . . . .     | 85,000        | 157,000   |

The total value of farm products may be set down approximately thus :—

|                          |              |
|--------------------------|--------------|
| Grain crops . . . . .    | £ 19,300,000 |
| Other products . . . . . | 14,700,000   |
| Cattle farming . . . . . | 21,000,000   |
| Total . . . . .          | 55,000,000   |

The value of farms varies from £2 to £8 per acre, and the total agricultural capital is more or less £200 millions sterling, of which three-fourths are represented by land.

The number of agricultural male peasants was 1,240,000 in 1867, and is now about 1,600,000; the ratio of agricultural products is about £34 per head.

#### FINLAND

This territory is distinct from Russia, and has an area of 92 million acres, viz. :—

| Estate Class       | Acres      |
|--------------------|------------|
| Nobles . . . . .   | 5,800,000  |
| Peasants . . . . . | 50,200,000 |
| Crown . . . . .    | 30,600,000 |
| Waste, &c. . . . . | 5,600,000  |
| Total . . . . .    | 92,200,000 |

Nobles' estates average 3000 acres, peasants 250 acres. Cultivated lands cover 7 million acres, of which 6 millions are meadow, forest comprising 50 million acres, and the remaining 35 millions being waste land or lakes. Grain crop averages 12 million bushels; not enough for home consumption.

Neumann Spallart gives the following agricultural statistics for the average of 1875-81 :—

|                   | Acres     | Crop, Bushels | Value, £  |
|-------------------|-----------|---------------|-----------|
| Wheat . . . . .   | 7,000     | 100,000       | 20,000    |
| Rye . . . . .     | 700,000   | 10,000,000    | 1,700,000 |
| Barley . . . . .  | 300,000   | 5,000,000     | 900,000   |
| Oats . . . . .    | 300,000   | 7,000,000     | 900,000   |
| Various . . . . . | 15,000    | 500,000       | 40,000    |
| Total . . . . .   | 1,322,000 | 22,600,000    | 3,560,000 |

Cattle comprised 1,030,000 horned cattle, 1,030,000 sheep, and 150,000 pigs, which would produce yearly 70,000 tons of meat, worth £3,500,000. The total products would be approximately worth 15 millions sterling, and the capital about 70 millions. Agricultural population about 400,000 male adults.

#### AUSTRIA-HUNGARY

Not more than 43 per cent. of the Empire is cultivated, 31 per cent. being forest, and 26 per cent. pasture plains or waste lands. The area under crops, other than meadow, has increased only 120,000 acres per annum in the last fifty years.

| Year | Acres under Crops | Grain Crop, Mill. Bush. | Wine, Mill. Gall. | Authority |
|------|-------------------|-------------------------|-------------------|-----------|
| 1828 | ...               | 367                     | 590               | Malchus   |
| 1836 | 38,400,000        | 364                     | 470               | Becker    |
| 1846 | ...               | 480                     | ...               | Fisher    |
| 1850 | ...               | 550                     | 500               | Brachelli |
| 1862 | ...               | 560                     | 500               | Official  |
| 1876 | 37,500,000        | 480                     | 160               | "         |
| 1880 | 39,600,000        | 601                     | 92                | "         |
| 1885 | 44,500,000        | 676                     | 207               | "         |

Becker's and other tables for 1836 (excluding the Italian provinces) compare with those of 1887 as follows, the latter not including Bosnia or Herzegovina :—

|                             | Crop, Million Bushels, 1836. |         |       | Million Bushels, 1887 |         |       |
|-----------------------------|------------------------------|---------|-------|-----------------------|---------|-------|
|                             | Austria                      | Hungary | Total | Austria               | Hungary | Total |
| Wheat . . . .               | 17                           | 48      | 65    | 51                    | 141     | 192   |
| Oats . . . . .              | 68                           | 48      | 116   | 102                   | 60      | 162   |
| Rye . . . . .               | 52                           | 48      | 100   | 88                    | 50      | 138   |
| Barley, &c. . .             | 35                           | 48      | 83    | 90                    | 136     | 226   |
| All grain . . .             | 172                          | 192     | 364   | 331                   | 387     | 718   |
| Wine, million gallons . . } | 75                           | 392     | 467   | 103                   | 109     | 212   |

Grain has increased 90 per cent. since 1836, although the area under crops has barely risen 20 per cent. ; this is due to improved methods and machinery since the expropriation of the lands in 1848, when they were distributed among the peasantry (see *Serfs*).

Wine has declined more than one-half.

The production of potatoes has increased as follows :—

| Year           | Tons       | Authority |
|----------------|------------|-----------|
| 1846 . . . . . | 2,300,000  | Fisher    |
| 1859 . . . . . | 5,100,000  | "         |
| 1885 . . . . . | 11,000,000 | Official  |

The acreage of the two kingdoms in 1887 was thus :—

|                   | Austria    | Hungary    | Total       |
|-------------------|------------|------------|-------------|
| Wheat . . . . .   | 2,875,000  | 6,860,000  | 9,735,000   |
| Barley . . . . .  | 2,795,000  | 2,480,000  | 5,275,000   |
| Oats . . . . .    | 4,630,000  | 2,580,000  | 7,210,000   |
| Rye . . . . .     | 4,985,000  | 2,770,000  | 7,755,000   |
| Maize . . . . .   | 890,000    | 4,520,000  | 5,410,000   |
| Buckwheat, &c. .  | 1,490,000  | 605,000    | 2,095,000   |
| All grain . . . . | 17,665,000 | 19,815,000 | 37,480,000  |
| Potatoes . . . .  | 2,760,000  | 1,020,000  | 3,780,000   |
| Beetroot . . . .  | 760,000    | 340,000    | 1,100,000   |
| Vineyards . . . . | 580,000    | 870,000    | 1,450,000   |
| Hops . . . . .    | 35,000     | ...        | 35,000      |
| Tobacco . . . . . | 5,000      | 135,000    | 140,000     |
| Clover . . . . .  | 2,010,000  | ...        | 2,010,000   |
| Gardens . . . . . | 920,000    | 130,000    | 1,050,000   |
| Meadow . . . . .  | 7,700,000  | 6,360,000  | 14,060,000  |
| Pasture . . . . . | 13,015,000 | 32,015,000 | 45,030,000  |
| Forest . . . . .  | 24,150,000 | 22,515,000 | 46,665,000  |
| Total . . . . .   | 69,600,000 | 83,200,000 | 152,800,000 |

The value of grain crops is stated by Spallart thus :—

MILLIONS £ PER ANNUM

| Years             | Austria | Hungary | Total |
|-------------------|---------|---------|-------|
| 1850 . . . . .    | ...     | ...     | 60    |
| 1870 . . . . .    | ...     | ...     | 83    |
| 1877-80 . . . . . | 40      | 50      | 90    |
| 1881-84 . . . . . | 41      | 57      | 98    |

The ordinary yield of grain is only fivefold ; 130 million bushels are required for seed.

Becker's and Schnabel's tables of live-stock and subsequent official returns show :—

|                  | 1836       | 1850       | 1870       | 1880       |
|------------------|------------|------------|------------|------------|
| Horses . . . .   | 2,060,000  | 3,240,000  | 3,540,000  | 3,560,000  |
| Cattle . . . . . | 10,010,000 | 10,460,000 | 12,630,000 | 13,850,000 |
| Sheep . . . . .  | 15,990,000 | 17,080,010 | 20,100,000 | 13,680,000 |
| Pigs . . . . .   | 5,500,000  | 7,410,000  | 6,990,000  | 6,880,000  |
| Goats . . . . .  | 850,000    | ...        | 1,550,000  | 1,280,000  |

The numbers respectively for Austria and Hungary in 1880 were :—

|                  | Austria   | Hungary   | Total      | Percentage |         |       |
|------------------|-----------|-----------|------------|------------|---------|-------|
|                  |           |           |            | Austria    | Hungary | Total |
| Horses . . . .   | 1,480,000 | 2,080,000 | 3,560,000  | 42         | 58      | 100   |
| Cattle . . . . . | 8,580,000 | 5,310,000 | 13,890,000 | 61         | 39      | 100   |
| Sheep . . . . .  | 3,840,000 | 9,840,000 | 13,680,000 | 28         | 72      | 100   |
| Pigs . . . . .   | 2,720,000 | 4,160,000 | 6,880,000  | 39         | 61      | 100   |
| Goats . . . . .  | 1,010,000 | 330,000   | 1,340,000  | 75         | 25      | 100   |

The production of meat, taking the carcase of beef at 500 lbs., sheep 56 lbs., and pig 100 lbs., was as follows :—

| Year           | Meat, Tons | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1836 . . . . . | 840,000    | 67                  |
| 1850 . . . . . | 880,000    | 66                  |
| 1870 . . . . . | 970,000    | 62                  |
| 1880 . . . . . | 980,000    | 57                  |

Assuming the values of the various kinds of stock to be 20 per cent. per head less than in Germany, we find :—

|                  | No.        | Price, £ | Value, £    |
|------------------|------------|----------|-------------|
| Horses . . . .   | 3,560,000  | 19       | 67,600,000  |
| Cattle . . . . . | 13,890,000 | 8        | 111,200,000 |
| Sheep . . . . .  | 13,680,000 | 0.6      | 8,300,000   |
| Pigs . . . . .   | 6,880,000  | 2        | 13,800,000  |
| Goats . . . . .  | 1,340,000  | 0.6      | 800,000     |
| Total . . . . .  | ...        | ...      | 201,700,000 |

The value of products in 1887 was approximately thus :—

|                   | Tons       | £           | Sundries         | £           |
|-------------------|------------|-------------|------------------|-------------|
| Wheat . . . .     | 5,300,000  | 37,100,000  | Wine . . . .     | 17,300,000  |
| Oats . . . . .    | 2,800,000  | 14,000,000  | Vegetables . .   | 22,000,000  |
| Rye . . . . .     | 3,600,000  | 19,800,000  | Timber . . . .   | 18,000,000  |
| Barley . . . .    | 2,600,000  | 15,600,000  | Tobacco . . . .  | 1,800,000   |
| Maize . . . . .   | 2,200,000  | 12,100,000  | Flax, &c. . . .  | 2,200,000   |
| Buckwheat &c. . } | 600,000    | 3,600,000   | Dairy . . . . .  | 34,500,000  |
|                   |            |             | Poultry . . . .  | 7,800,000   |
|                   |            |             | Meat . . . . .   | 44,100,000  |
| All grain . . .   | 17,100,000 | 102,200,000 | Foals . . . . .  | 10,000,000  |
| Straw . . . . .   | 17,000,000 | 12,800,000  | Hides, . . . . . | 10,100,000  |
| Hay . . . . .     | 14,000,000 | 21,000,000  | wool, &c. }      | 10,100,000  |
| Potatoes . . .    | 11,000,000 | 22,000,000  |                  |             |
| Beetroot . . .    | 6,500,000  | 5,000,000   | Sundries . . . . | 167,800,000 |
| Principal crops } | ...        | 163,000,000 |                  |             |

|                                 | £           |
|---------------------------------|-------------|
| Agricultural products . . . . . | 224,700,000 |
| Animal products . . . . .       | 106,100,000 |
| Total . . . . .                 | 330,800,000 |

Becker's estimate of products in 1840 compares with later years as follows :—

| Year           | Millions, £ Sterling |          |       |
|----------------|----------------------|----------|-------|
|                | Agricultural         | Pastoral | Total |
| 1840 . . . . . | 160                  | 45       | 205   |
| 1863 . . . . . | 194                  | 87       | 281   |
| 1887 . . . . . | 225                  | 106      | 331   |

The shares corresponding to the two kingdoms in 1887 were as follows :—

|                        | Millions, £ Sterling |         |       |
|------------------------|----------------------|---------|-------|
|                        | Austria              | Hungary | Total |
| Agricultural . . . . . | 120                  | 105     | 225   |
| Pastoral . . . . .     | 55                   | 51      | 106   |
| Total . . . . .        | 175                  | 156     | 331   |

The number of hands engaged in agriculture in 1870 and 1880 showed thus :—

| Year | Austria   | Hungary   | Total      |
|------|-----------|-----------|------------|
| 1870 | 5,520,000 | 5,010,000 | 10,530,000 |
| 1880 | 6,160,000 | 4,520,000 | 10,680,000 |

The result in 1887 shows an average product of £29 per head in Austria and £35 in Hungary, or £31 for the whole.

#### LAND VALUE

The emancipation of Austrian serfs in 1849 had such effect that Austrian economists say the value of land doubled between 1846 and 1866. In the latter year, according to the Embassy report, it was £15 per acre for cultivated, and £3 for forest or waste land. In 1884 another valuation was made, respecting which Professor Sternegg made investigations, and found the real value was 66 per cent. higher, viz. :—

|                                |              |
|--------------------------------|--------------|
| Nominal annual value . . . . . | £ 16,500,000 |
| Real rental . . . . .          | 27,500,000   |

Capitalising the rental at twenty-five-fold, we find the value of lands in Austria proper (excluding Crown-lands and forests) was 688 millions sterling.

The values of land would, therefore, appear to have been as follows :—

| Year | MILLIONS, £ STERLING |                    |       |
|------|----------------------|--------------------|-------|
|      | Cultivated           | Forest and Pasture | Total |
| 1840 | 396                  | 147                | 543   |
| 1866 | 885                  | 276                | 1,161 |
| 1885 | 1,073                | 284                | 1,357 |

The proportions in 1885 were as follows :—

|                      | Austria | Hungary | Total, Million £ |
|----------------------|---------|---------|------------------|
| Cultivated . . . . . | 594     | 479     | 1,073            |
| Forest, &c. . . . .  | 112     | 172     | 284              |
| Total . . . . .      | 706     | 651     | 1,357            |

#### AGRICULTURAL CAPITAL

| Year           | Millions, £ Sterling |        |          |       |
|----------------|----------------------|--------|----------|-------|
|                | Land                 | Cattle | Sundries | Total |
| 1840 . . . . . | 543                  | 89     | 70       | 702   |
| 1866 . . . . . | 1,161                | 150    | 146      | 1,457 |
| 1885 . . . . . | 1,357                | 202    | 173      | 1,732 |

The distribution of capital in the two kingdoms in 1887 was approximately thus :—

#### Millions, £ Sterling

|                    | Austria | Hungary | Total |
|--------------------|---------|---------|-------|
| Land . . . . .     | 706     | 651     | 1,357 |
| Cattle . . . . .   | 106     | 96      | 202   |
| Sundries . . . . . | 90      | 83      | 173   |
| Total . . . . .    | 902     | 830     | 1,732 |

The ratio between capital and product was as follows :—

|                   | Millions, £ Sterling |         | Ratio to Capital |
|-------------------|----------------------|---------|------------------|
|                   | Capital              | Product |                  |
| Austria . . . . . | 902                  | 175     | 19.3             |
| Hungary . . . . . | 830                  | 156     | 18.8             |
| Total . . . . .   | 1,732                | 331     | 19.1             |

The ratios of the whole monarchy between capital and product at various dates are shown approximately as follows :—

| Year           | Millions, £ Sterling |         | Ratio to Capital |
|----------------|----------------------|---------|------------------|
|                | Capital              | Product |                  |
| 1840 . . . . . | 702                  | 205     | 29.2             |
| 1866 . . . . . | 1,457                | 281     | 19.3             |
| 1887 . . . . . | 1,732                | 331     | 19.1             |

The increase of capital has been as follows :—

| Period   | Millions, £ Sterling | £ per Annum |
|----------|----------------------|-------------|
| 1840-66  | 755                  | 27,700,000  |
| 1867-85  | 284                  | 14,900,000  |
| 46 years | 1,039                | 22,600,000  |

#### BOSNIA

The provinces of Bosnia and Herzegovina, recently annexed to Austria, produce 8 million bushels of grain, viz. :—

| Grain Crop, Bushels       |           | Live Stock       |           |
|---------------------------|-----------|------------------|-----------|
| Wheat . . . . .           | 1,500,000 | Horses . . . . . | 210,000   |
| Maize . . . . .           | 3,300,000 | Cows . . . . .   | 505,000   |
| Oats, barley, &c. . . . . | 3,000,000 | Sheep . . . . .  | 1,315,000 |
| Total . . . . .           | 7,800,000 |                  |           |

#### MONTENEGRO

This little principality has an area of 2,100,000 acres, or 9 to each inhabitant. Some maize, oats, and potatoes are grown. The live-stock comprises 3000 horses, 60,000 cows, and 350,000 sheep and goats.

#### ITALY

The area of the kingdom has been distributed as follows :—

|                             | Acres      |            |            |
|-----------------------------|------------|------------|------------|
|                             | 1868       | 1874       | 1880       |
| Wheat . . . . .             | 9,500,000  | 11,700,000 | 11,700,000 |
| Maize, &c. . . . .          | 6,200,000  | 8,200,000  | 8,600,000  |
| Meadow . . . . .            | 2,900,000  | 6,000,000  | 6,000,000  |
| Olives . . . . .            | 1,400,000  | 2,200,000  | 2,200,000  |
| Chestnuts . . . . .         | 1,500,000  | 1,200,000  | 1,200,990  |
| Vineyards . . . . .         | 4,000,000  | 4,500,000  | 4,800,000  |
| Forest . . . . .            | 10,200,000 | 9,000,000  | 10,300,000 |
| Pasture and waste . . . . . | 35,100,000 | 28,000,000 | 26,000,000 |
| Total . . . . .             | 70,800,000 | 70,800,000 | 70,800,000 |

The above are official returns, except as regards vineyards in 1868, and meadow 1874 and 1880, the latter being estimated on basis of the hay-crop officially stated

(at one ton per acre). It appears from the foregoing that 9 million acres have been brought into cultivation in twelve years.

We have statistics in 1840 for Naples, Sicily, Austrian Italy, and Papal States, viz. :-

|                        | Acreage (1840)    |                  |                   |                   |                   |
|------------------------|-------------------|------------------|-------------------|-------------------|-------------------|
|                        | Naples            | Sicily           | Austrian Prov.    | Papal States      | Total             |
| Arable . . . . .       | 7,700,000         | 3,100,000        | 2,200,000         | 1,200,000         | 14,200,000        |
| Vineyards . . . . .    | 500,000           | 1,000,000        | 2,500,000         | 100,000           | 4,100,000         |
| Forest . . . . .       | 1,900,000         | 1,100,000        | 1,600,000         | 900,000           | 5,500,000         |
| Pasture, &c. . . . .   | 8,600,000         | 1,000,000        | 6,400,000         | 8,700,000         | 24,700,000        |
| <b>Total . . . . .</b> | <b>18,700,000</b> | <b>6,200,000</b> | <b>12,700,000</b> | <b>10,900,000</b> | <b>48,500,000</b> |

The kingdom of Sardinia, which is not included above, was found in 1870 to produce 16 per cent. of the grain, and 18 per cent. of the wine of Italy. Taking this into account, the total figures for Italy in 1840 as compared with 1888 would stand thus :-

|                     | Acreage    |            |
|---------------------|------------|------------|
|                     | 1840       | 1888       |
| Arable . . . . .    | 16,900,000 | 21,440,000 |
| Vineyards . . . . . | 5,000,000  | 7,700,000  |

There have been various estimates of the production of grain and wine since 1828, from which it would appear that both have doubled in sixty years. A notable improvement of agriculture followed the expulsion of the Austrians in 1859, the returns for Lombardy showing as follows :-

|                      | Lombardy, Annual Crops |            | Increase<br>Per Cent. |
|----------------------|------------------------|------------|-----------------------|
|                      | 1848-58                | 1870-74    |                       |
| Wheat, bushels . . . | 4,100,000              | 7,300,000  | 80                    |
| Maize, " . . . . .   | 6,300,000              | 12,300,000 | 95                    |
| Rice, " . . . . .    | 1,000,000              | 4,400,000  | 340                   |
| Potatoes, cwts. . .  | 220,000                | 1,120,000  | 410                   |
| Oil, gallons . . . . | 66,000                 | 138,000    | 110                   |
| Wine, " . . . . .    | 31,000,000             | 42,000,000 | 35                    |

The production of grain and wine was approximately for all Italy as follows :-

| Year           | Grain, Million<br>Bushels | Wine, Million<br>Gallons |
|----------------|---------------------------|--------------------------|
| 1828 . . . . . | 116                       | ...                      |
| 1840 . . . . . | 130                       | 360                      |
| 1870 . . . . . | 203                       | 480                      |
| 1888 . . . . . | 223                       | 715                      |

The detailed official report for 1888 shows as follows :-

|                        | Acres      | Tons        | Value,<br>£        | Cwts.<br>per Acre | Value per<br>Ton, £ |
|------------------------|------------|-------------|--------------------|-------------------|---------------------|
| Wheat . . . . .        | 11,010,000 | 2,530,000   | 32,100,000         | 4.6               | 12.7                |
| Maize . . . . .        | 4,720,000  | 1,610,000   | 15,300,000         | 6.9               | 9.5                 |
| Oats . . . . .         | 1,100,000  | 340,000     | 1,900,000          | 6.2               | 5.5                 |
| Barley . . . . .       | 860,000    | 165,000     | 1,900,000          | 4.0               | 11.0                |
| Rye and pulse . . .    | 2,200,000  | 370,000     | 4,800,000          | 3.3               | 13.0                |
| Rice . . . . .         | 500,000    | 290,000     | 5,400,000          | 11.6              | 18.6                |
| Chestnuts . . . . .    | 1,050,000  | 320,000     | 3,300,000          | 6.0               | 10.2                |
| Potatoes . . . . .     | 370,000    | 620,000     | 1,600,000          | 33.5              | 2.6                 |
| Hemp . . . . .         | 300,000    | 65,000      | 2,900,000          | 4.3               | 45.0                |
| Flax . . . . .         | 170,000    | 13,000      | 800,000            | 1.5               | 62.0                |
| Wine . . . . .         | 7,700,000  | 715,000,000 | 42,600,000         | 938               | ...                 |
| Oil . . . . .          | 2,250,000  | 50,000,000  | 13,400,000         | 238               | ...                 |
| Tobacco . . . . .      | 9,000      | 2,000       | 160,000            | 4.4               | 80.0                |
| Silk cocoons . . . .   | ...        | 44,000      | 6,200,000          | ...               | 141.0               |
| Oranges . . . . .      | ...        | 225,000     | 3,000,000          | ...               | 13.3                |
| <b>Total . . . . .</b> | <b>...</b> | <b>...</b>  | <b>135,360,000</b> | <b>...</b>        | <b>...</b>          |

The above values are, however, in many cases too high, and such important items as hay, straw, &c., are omitted. The following table is more in harmony with European prices :-

|                       | Tons        | £          | Sundries         | £          |
|-----------------------|-------------|------------|------------------|------------|
| Wheat . . . . .       | 2,530,000   | 21,500,000 | Oranges . . .    | 3,000,000  |
| Maize . . . . .       | 1,610,000   | 10,700,000 | Vegetables . .   | 22,500,000 |
| Oats . . . . .        | 340,000     | 1,900,000  | Hemp and flax .  | 2,800,000  |
| Barley . . . . .      | 165,000     | 1,150,000  | Chestnuts . . .  | 800,000    |
| Rye, &c. . . . .      | 370,000     | 2,600,000  | Tobacco . . .    | 70,000     |
| Rice . . . . .        | 290,000     | 2,200,000  | Cocoons . . .    | 6,200,000  |
| All grain . . . . .   | 5,305,000   | 40,050,000 | Timber . . . .   | 4,000,000  |
| Potatoes . . . . .    | 620,000     | 1,250,000  | Dairy . . . . .  | 14,400,000 |
| Straw . . . . .       | 5,000,000   | 4,000,000  | Poultry . . . .  | 6,000,000  |
| Hay . . . . .         | 12,000,000  | 18,000,000 | Meat . . . . .   | 18,000,000 |
| Wine . . . . .        | ...         | 42,600,000 | Foals . . . . .  | 3,000,000  |
| Oil . . . . .         | ...         | 13,400,000 | Hides, wool, &c. | 4,130,000  |
| Principal crops } ... | 119,300,000 |            | Sundries . . .   | 84,900,000 |

|                                 |               |
|---------------------------------|---------------|
| Agricultural products . . . . . | £ 153,000,000 |
| Animal products . . . . .       | 51,200,000    |

Total . . . . . 204,200,000

The distribution of crops in 1870 was said to be as follows :-

|                         | Grain      | Wine       | Chestnuts  | Hay        |
|-------------------------|------------|------------|------------|------------|
| Venetia . . . . .       | 6          | 5          | ...        | 32         |
| Lombardy . . . . .      | 9          | 5          | 2          | 18         |
| Piedmont . . . . .      | 16         | 18         | 30         | 20         |
| Tuscany, Romagna, &c. . | 21         | 22         | 34         | 30         |
| Naples . . . . .        | 32         | 28         | 34         | ...        |
| Sicily . . . . .        | 16         | 22         | ...        | ...        |
| <b>Total . . . . .</b>  | <b>100</b> | <b>100</b> | <b>100</b> | <b>100</b> |

The official returns of live-stock are of recent date, besides which we have the estimates of Schnabel and Malchus for 1828, and of Spallart for 1852 :-

|                  | 1828      | 1852      | 1874      | 1882      |
|------------------|-----------|-----------|-----------|-----------|
| Horses . . . . . | 800,000   | 800,000   | 1,070,000 | 1,120,000 |
| Cattle . . . . . | 3,500,000 | 3,660,000 | 3,490,000 | 4,780,000 |
| Sheep . . . . .  | 6,500,000 | 7,000,000 | 6,980,000 | 8,595,000 |
| Pigs . . . . .   | 2,500,000 | 2,000,000 | 1,550,000 | 1,160,000 |
| Goats . . . . .  | 800,000   | ...       | 1,690,000 | 2,020,000 |

The production of meat at 500 lbs. per carcass of beef, 56 lbs. per sheep, and 100 lbs. per pig, was as follows :-

| Year           | Meat, Tons | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1828 . . . . . | 335,000    | 44                  |
| 1874 . . . . . | 300,000    | 24                  |
| 1882 . . . . . | 260,000    | 28                  |

The value of all kinds of live-stock may be set down approximately thus :—

|                  | Number    | Value, £   | £ per Head |
|------------------|-----------|------------|------------|
| Horses . . . . . | 1,120,000 | 23,500,000 | 21.0       |
| Cattle . . . . . | 4,780,000 | 47,800,000 | 10.0       |
| Sheep . . . . .  | 8,600,000 | 6,900,000  | 0.8        |
| Pigs . . . . .   | 1,160,000 | 2,900,000  | 2.5        |
| Goats . . . . .  | 2,020,000 | 1,400,000  | 0.7        |
| Total . . . . .  | ...       | 82,500,000 | ...        |

The value of products at different dates was approximately as follows :—

| Year           | Millions, £ Sterling |          |       | Hands     | Product per Hand, £ |
|----------------|----------------------|----------|-------|-----------|---------------------|
|                | Agricultural         | Pastoral | Total |           |                     |
| 1840 . . . . . | 92                   | 22       | 114   | 3,600,000 | 32                  |
| 1874 . . . . . | 146                  | 34       | 180   | 5,100,000 | 35                  |
| 1888 . . . . . | 153                  | 51       | 204   | 5,400,000 | 38                  |

The relation between capital and product was approximately as follows :—

| Year           | Millions, £ Sterling |         | Ratio to Capital |
|----------------|----------------------|---------|------------------|
|                | Capital              | Product |                  |
| 1840 . . . . . | 452                  | 114     | 25.3             |
| 1874 . . . . . | 801                  | 180     | 22.5             |
| 1888 . . . . . | 1,405                | 204     | 14.6             |

# LAND VALUE

According to Dr. Bodio's estimate, the value of land is 34 times the assessed rental; taking the same ratio for 1863 and 1871, and accepting the Foreign Office reports of 1844, which gave £11 per acre cultivated and £5 for pasture and woodland, the result is as follows :—

| Year           | Assessed Rental, £ | Land Value, Million Sterling |
|----------------|--------------------|------------------------------|
| 1840 . . . . . | ...                | 377                          |
| 1863 . . . . . | 16,000,000         | 544                          |
| 1871 . . . . . | 19,000,000         | 661                          |
| 1885 . . . . . | 34,700,000         | 1,182                        |

The accuracy of Dr. Bodio's estimate for 1885 is borne out by the fact that the prices obtained for Church-lands sold by Government in 1870-77 in all parts of Italy gave a medium of £16 per acre, ranging from £8 in Romagna to £36 in Piedmont.

This average of £16 for 70 million acres would show a total value of 1120 millions. See *Lands*.

# AGRICULTURAL CAPITAL

| Year           | Millions, £ Sterling |        |          |       |
|----------------|----------------------|--------|----------|-------|
|                | Land                 | Cattle | Sundries | Total |
| 1840 . . . . . | 377                  | 30     | 45       | 452   |
| 1863 . . . . . | 544                  | 45     | 66       | 655   |
| 1871 . . . . . | 661                  | 60     | 80       | 801   |
| 1885 . . . . . | 1,182                | 83     | 140      | 1,405 |

The increase of capital was as follows :—

| Period             | Millions, £ Sterling | £ per Annum |
|--------------------|----------------------|-------------|
| 1840-63 . . . . .  | 203                  | 8,500,000   |
| 1864-71 . . . . .  | 146                  | 18,300,000  |
| 1872-85 . . . . .  | 604                  | 43,100,000  |
| 46 years . . . . . | 953                  | 20,700,000  |

It may be observed that the assessed rentals of 1863 and 1871 were probably below the reality, in which case the increase of landed values and agricultural capital would be less than appears above.

# SPAIN

About 37 per cent. of Spain is cultivated, 26 per cent. being pasture or forest, and 37 per cent. barren mountains. In former times the cultivated area was said to be much greater.

| Year           | Millions of Acres |              |       | Authority |
|----------------|-------------------|--------------|-------|-----------|
|                | Cultivated        | Uncultivated | Total |           |
| 1860 . . . . . | 43                | 78           | 121   | Ozorio    |
| 1803 . . . . . | 60                | 61           | 121   | Registro  |
| 1828 . . . . . | 23                | 98           | 121   | Malchus   |
| 1876 . . . . . | 32                | 89           | 121   | Spallart  |

The production of grain and wine has been as follows :—

| Year           | Grain, Million Bushels | Wine, Million Gallons | Authority         |
|----------------|------------------------|-----------------------|-------------------|
| 1803 . . . . . | 98                     | ...                   | Registro          |
| 1828 . . . . . | 136                    | 170                   | Malchus           |
| 1876 . . . . . | 326                    | 550                   | N. Spallart *     |
| 1888 . . . . . | 300                    | 550                   | Moniteur Agricole |

The distribution of area in 1876 and 1888 was variously stated, as follows :—

|                      | Acres       |             |
|----------------------|-------------|-------------|
|                      | 1876        | 1888        |
| Tillage . . . . .    | 28,000,000  | 40,800,000  |
| Vineyards . . . . .  | 3,000,000   | 4,400,000   |
| Olives . . . . .     | 1,000,000   | 1,900,000   |
| Pasture, &c. . . . . | 28,000,000  | 24,000,000  |
| Forest . . . . .     | 7,000,000   | 7,000,000   |
| Waste . . . . .      | 55,000,000  | 42,900,000  |
| Total . . . . .      | 121,000,000 | 121,000,000 |

The following statistics of live-stock are official, except Brachelli's for 1841 :—

|                  | 1826       | 1841       | 1860       | 1880       |
|------------------|------------|------------|------------|------------|
| Horses . . . . . | 900,000    | 1,000,000  | 1,080,000  | 1,830,000  |
| Cattle . . . . . | 2,950,000  | 3,000,000  | 1,870,000  | 3,090,000  |
| Sheep . . . . .  | 13,000,000 | 14,000,000 | 17,600,000 | 22,800,000 |
| Pigs . . . . .   | 2,730,000  | 1,000,000  | 1,610,000  | 4,465,000  |
| Goats . . . . .  | 5,300,000  | 2,600,000  | 3,150,000  | 4,530,000  |

In the foregoing table horses include also mules and asses, one mule or four asses being equivalent to a horse; thus in 1880 the actual numbers were—horses, 670,000; mules, 940,000; and asses, 890,000.

The production of meat at an average of 450 lbs. per beef carcass, 50 lbs. per sheep, 25 lbs. per goat, and 90 lbs. per pig, was as follows :—

| Year           | Meat, Tons | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1826 . . . . . | 405,000    | 77                  |
| 1841 . . . . . | 300,000    | 55                  |
| 1860 . . . . . | 310,000    | 45                  |
| 1880 . . . . . | 525,000    | 71                  |

\* N. Spallart's estimate was as follows :—Wheat, 168; barley, 77; maize, 36; rye, 33; oats, 12 million bushels.

The fluctuations of live-stock were doubtless the result of civil wars.

The value of the stock was approximately as follows :—

|                | No.        | Value, £   | £ per Head |
|----------------|------------|------------|------------|
| Horses . . . . | 1,830,000  | 36,600,000 | 20.0       |
| Cattle . . . . | 3,090,000  | 30,900,000 | 10.0       |
| Sheep . . . .  | 22,800,000 | 18,200,000 | 0.8        |
| Pigs . . . .   | 4,465,000  | 6,700,000  | 1.5        |
| Goats . . . .  | 4,530,000  | 2,300,000  | 0.5        |
| Total . . . .  | ...        | 94,700,000 | ...        |

The value of products in 1836 was approximately thus :—

|                         | Tons      | £          | Sundries               | £           |
|-------------------------|-----------|------------|------------------------|-------------|
| Wheat . . . .           | 3,800,000 | 30,400,000 | Wine . . . .           | 44,000,000  |
| Barley . . . .          | 1,700,000 | 10,200,000 | Vegetables, &c. . . .  | 9,000,000   |
| Maize . . . .           | 1,050,000 | 6,900,000  | Cork oil . . . .       | 3,000,000   |
| Oats . . . .            | 350,000   | 2,400,000  | Dairy . . . .          | 9,300,000   |
| Rye, &c. . . .          | 800,000   | 5,200,000  | Poultry . . . .        | 4,500,000   |
| All grain . . . .       | 7,700,000 | 55,100,000 | Meat . . . .           | 26,200,000  |
| Straw . . . .           | 8,000,000 | 6,000,000  | Foals . . . .          | 3,000,000   |
| Hay . . . .             | 6,000,000 | 9,000,000  | Hides, wool, &c. . . . | 4,200,000   |
| Principal crops . . . . | ...       | 70,100,000 | Sundries . . . .       | 103,200,000 |

Agricultural products . . . . . £ 126,100,000  
Animal products . . . . . 47,200,000

Total . . . . . 173,300,000

The value of products at various dates was as follows :—

| Year | Millions, £ Sterling |          |       | Authority |
|------|----------------------|----------|-------|-----------|
|      | Agricultural         | Pastoral | Total |           |
| 1808 | 54                   | 19       | 73    | Official  |
| 1826 | 56                   | 21       | 77    | Miñano    |
| 1832 | 86                   | 16       | 102   | Argüelles |
| 1886 | 126                  | 47       | 173   | ...       |

The Census of 1871 showed 2,723,000 persons engaged in agriculture; the product therefore averages £64 per head.

#### LAND VALUE

According to the report of the Junta de Medios, the total farming capital in 1832 was 724 millions sterling, between land, cattle, and sundries. The Embassy report of 1869 classified the land under three heads, with the respective rental values. If we capitalise the rental at thirty years, we find the values thus :—

The statistics of Portuguese live-stock were as follows :—

|                | 1828      | 1850      | 1868      | 1883      | Value in 1883 |
|----------------|-----------|-----------|-----------|-----------|---------------|
| Horses . . . . | ...       | 120,000   | 130,000   | 140,000   | £ 2,800,000   |
| Cattle . . . . | 650,000   | 750,000   | 520,000   | 625,000   | 6,200,000     |
| Sheep . . . .  | 1,200,000 | 1,980,000 | 2,420,000 | 2,980,000 | 2,400,000     |
| Pigs . . . .   | 700,000   | 750,000   | 860,000   | 970,000   | 1,500,000     |
| Goats . . . .  | 600,000   | 1,500,000 | ...       | 940,000   | 400,000       |
|                | ...       | ...       | ...       | ...       | ...           |
|                | ...       | ...       | ...       | ...       | 13,300,000    |

|                     | Acres       | Rent, Shillings per Acre | Value, Million £ |
|---------------------|-------------|--------------------------|------------------|
| Irrigated . . . .   | 2,000,000   | 80                       | 240              |
| Ordinary arable . . | 30,000,000  | 12                       | 540              |
| Pasture, &c. . . .  | 34,000,000  | 4                        | 204              |
| Waste . . . .       | 55,000,000  | ...                      | ...              |
| Total . . . .       | 121,000,000 | ...                      | 984              |

#### AGRICULTURAL CAPITAL MILLIONS, £ STERLING

|              | Land | Cattle | Sundries | Total |
|--------------|------|--------|----------|-------|
| 1832 . . . . | 614  | 38     | 72       | 724   |
| 1888 . . . . | 984  | 95     | 120      | 1,199 |

Spanish statistics are doubtful, being often official exaggerations.

#### PORTUGAL

The estimates of Malchus, Brachelli, Tisserand, and the Statistique Agricole give the following :—

| Year         | Grain, Million Bushels | Wine, Million Gallons |
|--------------|------------------------|-----------------------|
| 1827 . . . . | 21                     | 75                    |
| 1850 . . . . | 30                     | ...                   |
| 1868 . . . . | 31                     | 132                   |
| 1886 . . . . | 40                     | 125                   |

The cultivated area is less than 5 million acres, that of waste land 17,600,000, the former being barely 21 per cent. of the kingdom.

The crops in 1868 (latest complete returns) were as follows :—

|                   | Acres     | Bushels     | Value of Crops, £ |
|-------------------|-----------|-------------|-------------------|
| Wheat . . . .     | 620,000   | 5,500,000   | 1,600,000         |
| Maize . . . .     | 750,000   | 15,400,000  | 2,800,000         |
| Barley . . . .    | 170,000   | 2,000,000   | 260,000           |
| Rye . . . .       | 980,000   | 7,000,000   | 770,000           |
| Oats . . . .      | 30,000    | 500,000     | 70,000            |
| Rice . . . .      | 10,000    | 400,000     | 80,000            |
| All grain . . . . | 2,560,000 | 30,800,000  | 5,580,000         |
| Vines . . . .     | 480,000   | 132,000,000 | 8,000,000         |
| Gardens . . . .   | 200,000   | ...         | 1,800,000         |
| Olives . . . .    | 100,000   | ...         | 500,000           |
| Meadow . . . .    | 500,000   | ...         | 2,120,000         |
| Fallow . . . .    | 750,000   | ...         | ...               |
| Forest . . . .    | 250,000   | ...         | ...               |
| Total . . . .     | 4,840,000 | ...         | 18,000,000        |

Neumann Spallart gives the following for 1877 :—

|                   | Acres     | Bushels    |
|-------------------|-----------|------------|
| Wheat . . . .     | 650,000   | 8,200,000  |
| Rye . . . .       | 650,000   | 6,100,000  |
| Maize . . . .     | 1,300,000 | 20,000,000 |
| Barley, &c. . . . | 200,000   | 2,700,000  |
| Total . . . .     | 2,800,000 | 37,000,000 |

The production of meat at the same weight of carcase as in Spain was :—

| Year           | Meat, Tons | Lbs. per Inhab. |
|----------------|------------|-----------------|
| 1828 . . . . . | 70,000     | 46              |
| 1868 . . . . . | 77,000     | 41              |
| 1883 . . . . . | 95,000     | 49              |

The value of products in 1886 was approximately thus :—

|                     | Tons      | £          | Sundries            | £          |
|---------------------|-----------|------------|---------------------|------------|
| Wheat . . .         | 270,000   | 2,200,000  | Cork . . .          | 600,000    |
| Maize . . .         | 400,000   | 2,400,000  | Vegetables, &c. . . | 2,200,000  |
| Rye, &c. . .        | 380,000   | 2,400,000  | Poultry . . .       | 1,100,000  |
| All grain . .       | 1,050,000 | 7,000,000  | Dairy . . .         | 1,900,000  |
| Hay and straw . .   | 2,000,000 | 3,000,000  | Meat . . .          | 4,700,000  |
| Wine . . .          | ...       | 10,000,000 | Hides, &c. . .      | 700,000    |
| Principal crops . . | ...       | 20,000,000 | Sundries . . .      | 11,200,000 |

|                                 |              |
|---------------------------------|--------------|
| Agricultural products . . . . . | £ 23,000,000 |
| Animal products . . . . .       | 8,200,000    |
| Total . . . . .                 | 31,200,000   |

According to the Census of 1861, the number of persons engaged was 870,000, of whom 310,000 in pasture. Ratio of product £35 per head.

The landed value is approximately as follows :—

|                  | Area       | Value, Million £ | Per Acre, £ |
|------------------|------------|------------------|-------------|
| Cultivated . . . | 5,000,000  | 90               | 18          |
| Pasture . . . .  | 7,000,000  | 42               | 6           |
| Waste . . . . .  | 10,450,000 | ...              | ...         |
| Total . . . . .  | 22,450,000 | 132              | ...         |

Agricultural capital is only about £36 per head of the total population, being made up thus :—

|                    | Millions £ |
|--------------------|------------|
| Land . . . . .     | 132        |
| Cattle . . . . .   | 13         |
| Sundries . . . . . | 16         |
| Total . . . . .    | 161        |

The value of products is 19 per cent. on the capital.

#### SWEDEN

Agriculture was in its infancy till 1818, when the nobles (whose estates were heavily encumbered) began to sell their lands to the peasants; by the year 1840 they had sold 16 million acres. As a consequence, we find that the cultivated area increased by 140,000 acres per annum between 1812 and 1837, and by 165,000 per

annum between the latter year and 1884, as official returns show :—

| Year         | Acres Cultivated | Million Bushels |          |
|--------------|------------------|-----------------|----------|
|              |                  | Grain           | Potatoes |
| 1812 . . . . | 1,360,000        | 1               | ...      |
| 1837 . . . . | 4,830,000        | 28              | 16       |
| 1859 . . . . | ...              | 39              | 21       |
| 1876 . . . . | 11,590,000       | 80              | 39       |
| 1887 . . . . | 12,200,000       | 106             | 59       |

Only 12 per cent. of the kingdom is cultivated, the area in 1886 showing :—

|                      | Acres       |
|----------------------|-------------|
| Cultivated . . . . . | 12,200,000  |
| Forest . . . . .     | 44,900,000  |
| Waste . . . . .      | 43,200,000  |
| Total . . . . .      | 100,300,000 |

The principal crops of recent years compare with those of 1837 thus :—

|                    | 1837       | 1880        | 1886        |
|--------------------|------------|-------------|-------------|
| Wheat, bushels . . | 500,000    | 3,100,000   | 3,700,000   |
| Rye, " . . . .     | 4,500,000  | 18,300,000  | 19,600,000  |
| Barley, " . . .    | 3,600,000  | 14,300,000  | 15,600,000  |
| Oats, &c. . . .    | 5,200,000  | 54,700,000  | 63,600,000  |
| Potatoes, " . .    | 8,200,000  | 55,400,000  | 49,100,000  |
| Total . . . . .    | 22,000,000 | 145,800,000 | 151,600,000 |

The production of meat, at 500 lbs. per beef carcase, 56 lbs. per sheep, and 100 lbs. per pig, was as follows :—

| Year           | Meat, Tons | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1837 . . . . . | 106,000    | 78                  |
| 1870 . . . . . | 120,000    | 63                  |
| 1886 . . . . . | 140,000    | 62                  |

The yield of grain is poor. Oats and barley, fourfold; rye, fivefold; and wheat, in good years, sixfold; potatoes give sevenfold.

The value of products in 1886 was as follows :—

|                     | Tons      | £          | Sundries           | £          |
|---------------------|-----------|------------|--------------------|------------|
| Wheat . . .         | 100,000   | 800,000    | Vegetables . .     | 2,300,000  |
| Oats . . . .        | 950,000   | 5,700,000  | Timber . . .       | 8,000,000  |
| Barley . . .        | 350,000   | 2,200,000  | Poultry . . .      | 1,200,000  |
| Rye, &c. . .        | 750,000   | 5,000,000  | Dairy . . . .      | 7,000,000  |
| All grain . .       | 2,150,000 | 13,700,000 | Meat . . . .       | 7,000,000  |
| Straw . . .         | 2,000,000 | 1,500,000  | Foals . . . .      | 1,200,000  |
| Hay . . . .         | 2,000,000 | 3,000,000  | Tallow . . .       | 600,000    |
| Potatoes . .        | 1,200,000 | 2,400,000  | Hides, wool, &c. } | 1,200,000  |
| Principal crops . . | ...       | 20,600,000 | Sundries . . .     | 28,500,000 |

The following are the returns of live-stock :—

|                | 1836      | 1860      | 1870      | 1880      | 1886      | Approximate Value in 1886, £ |
|----------------|-----------|-----------|-----------|-----------|-----------|------------------------------|
| Horses . . . . | 385,000   | 400,000   | 430,000   | 460,000   | 485,000   | 9,700,000                    |
| Cattle . . . . | 1,660,000 | 1,920,000 | 1,970,000 | 2,230,000 | 2,380,000 | 23,800,000                   |
| Sheep . . . .  | 1,410,000 | 1,640,000 | 1,600,000 | 1,460,000 | 1,440,000 | 1,200,000                    |
| Pigs . . . . . | 500,000   | 460,000   | 350,000   | 420,000   | 550,000   | 1,100,000                    |
| Goats . . . .  | 100,000   | 130,000   | 120,000   | 110,000   | 90,000    | 50,000                       |
|                |           |           |           |           |           | 35,850,000                   |

Besides the foregoing, there are 220,000 reindeer.

|                             |            |
|-----------------------------|------------|
|                             | £          |
| Agricultural products . . . | 31,100,000 |
| Pastoral products . . .     | 18,000,000 |
| Total . . .                 | 49,100,000 |

The number of hands engaged in agriculture is 853,000, which gives an average product of £57 per head.

# LANDED VALUE

Two official valuations exist—that of 1836, amounting to 33 millions sterling, and that of 1880, which reached millions sterling. We can also determine the value in 1818–20, the average price then obtained by the nobles being 18d. per acre—say £8,000,000 for the whole kingdom.

| Year       | Agricultural Capital, Millions £ |        |          |       |
|------------|----------------------------------|--------|----------|-------|
|            | Land                             | Cattle | Sundries | Total |
| 1818 . . . | 8                                | 10     | 2        | 20    |
| 1837 . . . | 33                               | 13     | 5        | 51    |

See Part II., page 622.

# NORWAY

Agriculture has not made so much progress as in Sweden. We have no statistics earlier than 1835, since

The following are the official returns of live-stock :—

|                    | 1835      | 1845      | 1855      | 1865      | 1875      | Approximate Value in 1875, £ |
|--------------------|-----------|-----------|-----------|-----------|-----------|------------------------------|
| Horses . . . . .   | 110,000   | 130,000   | 150,000   | 150,000   | 150,000   | 3,000,000                    |
| Cattle . . . . .   | 640,000   | 840,000   | 950,000   | 950,000   | 1,020,000 | 10,200,000                   |
| Sheep . . . . .    | 1,030,000 | 1,450,000 | 1,600,000 | 1,700,000 | 1,690,000 | 1,400,000                    |
| Pigs . . . . .     | 80,000    | 90,000    | 110,000   | 100,000   | 100,000   | 200,000                      |
| Goats . . . . .    | 180,000   | 290,000   | 360,000   | 290,000   | 320,000   | 200,000                      |
| Reindeer . . . . . | 80,000    | 90,000    | 120,000   | 100,000   | 100,000   | 150,000                      |
| Total              | ...       | ...       | ...       | ...       | ...       | 15,150,000                   |

The production of meat at the same weight of carcase as in Sweden was :—

| Year       | Meat, Tons | Lbs. per Inhabitant |
|------------|------------|---------------------|
| 1835 . . . | 44,000     | 80                  |
| 1855 . . . | 64,000     | 95                  |
| 1875 . . . | 67,000     | 78                  |

The value of products in 1886 was approximately thus :—

|                 | Tons    | £         | Sundries       | £          |
|-----------------|---------|-----------|----------------|------------|
| Wheat . . .     | 7,000   | 60,000    | Vegetables . . | 1,000,000  |
| Barley . . .    | 100,000 | 640,000   | Timber . . .   | 4,000,000  |
| Oats . . .      | 150,000 | 900,000   | Dairy . . .    | 3,000,000  |
| Rye, &c. . .    | 73,000  | 500,000   | Poultry . . .  | 500,000    |
|                 |         |           | Meat . . .     | 3,300,000  |
| All grain . .   | 330,000 | 2,100,000 | Foals . . .    | 400,000    |
| Potatoes . .    | 490,000 | 1,000,000 | Hides, &c. . . | 800,000    |
| Hay and straw   | 700,000 | 900,000   | Sundries . .   | 13,000,000 |
| Principal crops | ...     | 4,000,000 |                |            |

which date the area under grain and potatoes and the yield have been as follows :—

| Year           | Acres   | Million Bushels |
|----------------|---------|-----------------|
| 1835 . . . . . | 360,000 | 13              |
| 1855 . . . . . | ...     | 31              |
| 1865 . . . . . | 530,000 | 32              |
| 1875 . . . . . | 560,000 | 36              |

Not more than 5 per cent. of the country is cultivated, viz. (1880) :—

|                      | Acres      |
|----------------------|------------|
| Cultivated . . . . . | 4,060,000  |
| Forest . . . . .     | 15,800,000 |
| Waste . . . . .      | 58,840,000 |
| Total                | 78,700,000 |

The yield per acre has notably improved since 1835, viz. :—

|                 | Bushels per Acre |      |
|-----------------|------------------|------|
|                 | 1835             | 1875 |
| Wheat . . . . . | 13               | 20   |
| Oats . . . . .  | 26               | 40   |

Nevertheless the climate is so little suited to cereals that we notice hardly any increase in the quantity produced, except in potatoes, viz. :—

|              | 1855       | 1865       | 1875       | Acreeage in 1875 |
|--------------|------------|------------|------------|------------------|
|              | Bushels    | Bushels    | Bushels    |                  |
| Wheat . . .  | 200,000    | 270,000    | 280,000    | 11,000           |
| Barley . . . | 3,500,000  | 3,400,000  | 4,300,000  | 138,000          |
| Oats . . .   | 8,100,000  | 7,900,000  | 8,900,000  | 224,000          |
| Rye, &c. .   | 3,000,000  | 2,630,000  | 3,120,000  | 99,000           |
| Potatoes . . | 16,500,000 | 18,000,000 | 19,600,000 | 86,000           |
| Total        | 31,300,000 | 32,200,000 | 36,200,000 | 558,000          |

|                             |            |
|-----------------------------|------------|
|                             | £          |
| Agricultural products . . . | 9,000,000  |
| Animal products . . .       | 8,000,000  |
| Total . . . . .             | 17,000,000 |

The number of hands employed is about 380,000.

See Part II., page 622.

DENMARK

Malchus estimated the grain product in 1828 at 40 million bushels; Brachelli, in 1850, at 65 millions.

The agricultural area of Denmark and the duchies of Schleswig-Holstein in 1834 was stated thus:—

|                    | Acres      |
|--------------------|------------|
| Arable . . . . .   | 8,630,000  |
| Meadow . . . . .   | 605,000    |
| Forest . . . . .   | 538,000    |
| Waste, &c. . . . . | 637,000    |
| Total . . . . .    | 10,410,000 |

|              | Acreage   |           |           | Million Bushels |      |
|--------------|-----------|-----------|-----------|-----------------|------|
|              | 1866      | 1876      | 1881      | 1876            | 1886 |
| Wheat . . .  | 120,000   | 150,000   | 140,000   | 5               | 5    |
| Barley . . . | 680,000   | 760,000   | 780,000   | 23              | 23   |
| Oats . . .   | 830,000   | 940,000   | 990,000   | 31              | 33   |
| Rye, &c. . . | 750,000   | 950,000   | 1,010,000 | 24              | 25   |
| Potatoes . . | 85,000    | 100,000   | 110,000   | 10              | 14   |
| Turnips, &c. | 42,000    | 40,000    | 85,000    | 15              | 29   |
| Garden . . . | ...       | 50,000    | 60,000    | ...             | ...  |
| Fallow . . . | 440,000   | 610,000   | 640,000   | ...             | ...  |
| Grass . . .  | 2,670,000 | 3,070,000 | 3,560,000 | ...             | ...  |
| Forest . . . | 400,000   | 400,000   | 400,000   | ...             | ...  |
| Waste . . .  | 2,553,000 | 1,500,000 | 795,000   | ...             | ...  |
| Total . . .  | 8,570,000 | 8,570,000 | 8,570,000 | ...             | ...  |

From 1866 to 1876 the reclamation of waste lands averaged 100,000 acres yearly, and from 1876 to 1881 no less than 140,000 yearly. Most of it went into meadow and pasture. Wheat averages 28 bushels an acre, and yields ninefold; other grain, eightfold; clover, two tons per acre. Statistics of live-stock (those for 1830 including Schleswig-Holstein) show as follows:—

|              | 1830      | 1866      | 1876      | 1881      | Approximate Value in 1881, £ |
|--------------|-----------|-----------|-----------|-----------|------------------------------|
| Horses . . . | 550,000   | 350,000   | 350,000   | 350,000   | 11,000,000                   |
| Cattle . . . | 1,610,000 | 1,190,000 | 1,350,000 | 1,470,000 | 16,100,000                   |
| Sheep . . .  | 1,900,000 | 1,880,000 | 1,720,000 | 1,550,000 | 1,500,000                    |
| Pigs . . .   | 450,000   | 380,000   | 500,000   | 530,000   | 1,200,000                    |
|              |           |           |           |           | 29,800,000                   |

The conquest of Schleswig-Holstein by Germany in 1864 caused a great diminution in the live-stock of Denmark. The production of meat, at 560 lbs. per beef carcase, 56 lbs. per sheep, and 112 lbs. per pig, was:—

| Year           | Meat, Tons | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1850 . . . . . | 76,000     | 130                 |
| 1866 . . . . . | 92,000     | 120                 |
| 1881 . . . . . | 108,000    | 120                 |

Official returns regarding Denmark proper show as follows:—

|                 | Tons      | £          | Sundries      | £          |
|-----------------|-----------|------------|---------------|------------|
| Wheat . . .     | 140,000   | 1,200,000  | Roots . . .   | 1,100,000  |
| Barley . . .    | 520,000   | 3,500,000  | Vegetables .  | 1,000,000  |
| Oats . . .      | 560,000   | 3,900,000  | Timber . . .  | 200,000    |
| Rye, &c. . .    | 600,000   | 4,000,000  | Poultry . . . | 500,000    |
|                 |           |            | Dairy . . .   | 6,400,000  |
| All grain . .   | 1,820,000 | 12,600,000 | Meat . . .    | 5,400,000  |
| Straw . . .     | 2,000,000 | 1,800,000  | Foals . . .   | 1,100,000  |
| Hay . . .       | 900,000   | 1,800,000  | Hides, &c. .  | 1,500,000  |
| Potatoes . .    | 700,000   | 1,400,000  |               |            |
| Principal crops | ...       | 17,600,000 | Sundries . .  | 17,200,000 |

|                                 |              |
|---------------------------------|--------------|
| Agricultural products . . . . . | £ 19,800,000 |
| Animal products . . . . .       | 15,000,000   |
|                                 | 34,800,000   |

The values, approximately, of products in 1850 compare with those of 1886 thus:—

| Year           | Millions, £ Sterling |          |       |
|----------------|----------------------|----------|-------|
|                | Agricultural         | Pastoral | Total |
| 1850 . . . . . | 13                   | 9        | 22    |
| 1886 . . . . . | 20                   | 15       | 35    |

Agricultural hands 420,000, showing an average of £84 per head.

LANDED VALUE

The valuation of 1830 for landed estates amounted to £25,600,000. The Embassy report of 1869 gives average prices which would sum up thus:—

|                | Acre      | Per Acre, £ | Value, Million £ |
|----------------|-----------|-------------|------------------|
| Arable . . . . | 2,950,000 | 35          | 103              |
| Grass . . . .  | 3,070,000 | 23          | 70               |
| Waste . . . .  | 2,550,000 | ...         | ...              |
| Total . . . .  | 8,570,000 | ...         | 173              |

At the same valuation per acre as in 1869 the landed value would now stand as follows:—

|                | Acres     | Value, £    | Per Acre, £ |
|----------------|-----------|-------------|-------------|
| Arable . . . . | 3,815,000 | 133,500,000 | 35          |
| Grass . . . .  | 3,560,000 | 81,900,000  | 23          |
| Forest . . . . | 400,000   | 2,000,000   | 5           |
| Waste . . . .  | 795,000   | ...         | ...         |
| Total . . . .  | 8,570,000 | 217,400,000 | ...         |

The Government valuation for 1884 gives real estate 257 millions sterling, but this includes urban house property as well as lands.

| Year           | Agricultural Capital, Millions £ |        |          |       |
|----------------|----------------------------------|--------|----------|-------|
|                | Land                             | Cattle | Sundries | Total |
| 1840 . . . . . | 26                               | 16     | 4        | 46    |
| 1869 . . . . . | 173                              | 19     | 21       | 213   |
| 1889 . . . . . | 217                              | 30     | 27       | 274   |

The product in 1889 was 13 per cent. on capital.

The increase of capital was as follows:—

| Interval          | Millions, £ | Per Annum, £ |
|-------------------|-------------|--------------|
| 1830-69 . . . . . | 167         | ...          |
| 1870-89 . . . . . | 61          | ...          |
|                   |             | 3,050,000    |

For Tenure, &c., see *Land*.

HOLLAND

Tillage forms a secondary industry in Dutch agriculture. The production of grain, according to Brachelli and others, was as follows:—

| Year           | Bushels    |
|----------------|------------|
| 1828 . . . . . | 16,000,000 |
| 1861 . . . . . | 34,000,000 |
| 1885 . . . . . | 40,000,000 |

The reports of 1879 and 1885 compare as follows :—

|                    | Acres     |           |                        | Average for 1871-80 |            |
|--------------------|-----------|-----------|------------------------|---------------------|------------|
|                    | 1879      | 1885      |                        | Acres               | Bushels    |
| Grain . . . . .    | 1,570,000 | 1,460,000 | Wheat . . . . .        | 210,000             | 5,200,000  |
| Potatoes . . . . . | 350,000   | 350,000   | Rye . . . . .          | 500,000             | 9,500,000  |
| Beetroot . . . . . | 40,000    | 60,000    | Oats . . . . .         | 270,000             | 10,500,000 |
| Sundries . . . . . | 130,000   | 280,000   | Barley . . . . .       | 120,000             | 5,000,000  |
| Grass . . . . .    | 2,940,000 | 2,950,000 | Buckwheat, &c. . . . . | 280,000             | 5,800,000  |
| Forest . . . . .   | 530,000   | 560,000   | Total . . . . .        | 1,380,000           | 36,000,000 |
| Waste . . . . .    | 2,240,000 | 2,140,000 |                        |                     |            |
| Total . . . . .    | 7,800,000 | 7,800,000 |                        |                     |            |

The statistics of live-stock showed as follows :—

|                  | 1840      | 1860      | 1870      | 1884      |
|------------------|-----------|-----------|-----------|-----------|
| Horses . . . . . | 210,000   | 240,000   | 250,000   | 270,000   |
| Cattle . . . . . | 1,050,000 | 1,250,000 | 1,410,000 | 1,480,000 |
| Sheep . . . . .  | 720,000   | 870,000   | 900,000   | 750,000   |
| Pigs . . . . .   | ...       | 270,000   | 330,000   | 430,000   |
| Goats . . . . .  | ...       | 110,000   | 140,000   | 160,000   |

The production of meat, at 700 lbs. per beef carcase, 70 lbs. per sheep, and 120 lbs. per pig, was as follows :—

| Year           | Meat, Tons | Lbs. per Inhabitant |
|----------------|------------|---------------------|
| 1860 . . . . . | 104,000    | 62                  |
| 1870 . . . . . | 118,000    | 67                  |
| 1884 . . . . . | 125,000    | 69                  |

The value of products in Holland in 1886 was approximately as follows :—

|                           | Tons      | £          | Sundries             | £          |
|---------------------------|-----------|------------|----------------------|------------|
| Wheat . . . . .           | 140,000   | 1,200,000  | Beetroot . . . . .   | 300,000    |
| Rye . . . . .             | 270,000   | 1,900,000  | Vegetables . . . . . | 3,000,000  |
| Oats . . . . .            | 250,000   | 1,700,000  | Poultry . . . . .    | 1,200,000  |
| Barley . . . . .          | 100,000   | 700,000    | Flax . . . . .       | 300,000    |
| Buckwheat, &c. . . . .    | 140,000   | 900,000    | Meat . . . . .       | 6,200,000  |
| All grain . . . . .       | 900,000   | 6,400,000  | Tallow . . . . .     | 400,000    |
| Potatoes . . . . .        | 1,600,000 | 3,200,000  | Dairy . . . . .      | 9,500,000  |
| Straw . . . . .           | 900,000   | 900,000    | Foals . . . . .      | 900,000    |
| Hay . . . . .             | 3,000,000 | 6,000,000  | Hides, &c. . . . .   | 1,000,000  |
| Principal crops . . . . . | ...       | 16,500,000 | Sundries . . . . .   | 22,800,000 |

|                                 |            |
|---------------------------------|------------|
| Agricultural products . . . . . | 20,100,000 |
| Animal products . . . . .       | 19,200,000 |
| Products of Holland . . . . .   | 39,300,000 |

The value of products in 1850 compares with the above thus :—

| Year           | Millions, £ Sterling |          |       |
|----------------|----------------------|----------|-------|
|                | Agricultural         | Pastoral | Total |
| 1850 . . . . . | 12                   | 10       | 22    |
| 1886 . . . . . | 20                   | 19       | 39    |

Agricultural hands, 840,000, showing £46 per head.

LAND VALUE

In 1836 the value of the kingdom (excluding waste land) was estimated thus :—

|                    | Acres     | Per Acre, £ | Value, Million £ |
|--------------------|-----------|-------------|------------------|
| Good . . . . .     | 2,000,000 | 54          | 108              |
| Inferior . . . . . | 3,300,000 | 30          | 99               |
| Total . . . . .    | 5,300,000 | ...         | 207              |

The Bulletin Statistique for 1886 states the value at 314 millions sterling, an increase of 107 millions in 50 years :—

| Year           | Agricultural Capital, Million £ |        |          |       |
|----------------|---------------------------------|--------|----------|-------|
|                | Land                            | Cattle | Sundries | Total |
| 1836 . . . . . | 207                             | 14     | 24       | 245   |
| 1886 . . . . . | 314                             | 28     | 38       | 380   |

The increase averaged £2,700,000 per annum. The product in 1885 was only 10 per cent. on capital.

BELGIUM

The production of grain and potatoes has been, according to Malchus and the official returns, as follows :—

| Year           | Acres     | Grain, Million Bushels | Potatoes, Tons |
|----------------|-----------|------------------------|----------------|
| 1828 . . . . . | ...       | 33                     | ...            |
| 1846 . . . . . | ...       | 52                     | 1,800,000      |
| 1856 . . . . . | 2,340,000 | 69                     | 1,800,000      |
| 1866 . . . . . | 2,900,000 | 70                     | 1,700,000      |
| 1880 . . . . . | 2,880,000 | 75                     | 2,800,000      |
| 1886 . . . . . | ...       | 74                     | 3,000,000      |

The distribution of area in Belgium is shown officially as follows :—

|                    | Acreage   |           |           |                        | Average Product for Years 1871-80 | Official Valuation |
|--------------------|-----------|-----------|-----------|------------------------|-----------------------------------|--------------------|
|                    | 1856      | 1866      | 1880      |                        |                                   |                    |
| Grain . . . . .    | 2,480,000 | 2,480,000 | 2,390,000 | Wheat . . . . .        | Tons 430,000                      | £ 5,400,000        |
| Potatoes . . . . . | 370,000   | 420,000   | 490,000   | Rye . . . . .          | 420,000                           | 3,600,000          |
| Beetroot . . . . . | 30,000    | 90,000    | 150,000   | Oats . . . . .         | 390,000                           | 3,300,000          |
| Flax . . . . .     | 80,000    | 140,000   | 100,000   | Barley . . . . .       | 80,000                            | 700,000            |
| Grass . . . . .    | 1,170,000 | 1,340,000 | 1,420,000 | Buckwheat, &c. . . . . | 130,000                           | 1,200,000          |
| Sundries . . . . . | 400,000   | 640,000   | 420,000   | All grain . . . . .    | 1,450,000                         | 14,200,000         |
| Forest . . . . .   | 1,070,000 | 1,210,000 | 1,210,000 | Potatoes . . . . .     | 2,490,000                         | 9,200,000          |
| Waste . . . . .    | 2,760,000 | 1,100,000 | 1,100,000 | Beetroot . . . . .     | 2,050,000                         | 1,600,000          |
| Total . . . . .    | 7,280,000 | 7,280,000 | 7,280,000 | Hay . . . . .          | 5,220,000                         | 10,200,000         |

The average of ten years to 1880 gave the weight of seed and the crop to the acre as follows:—

|                  | Seed, lbs.<br>per Acre | Crop, lbs.<br>per Acre | Yield to 1<br>lb. Seed |
|------------------|------------------------|------------------------|------------------------|
| Wheat . . . . .  | 113                    | 1,360                  | 12.0                   |
| Rye . . . . .    | 107                    | 1,300                  | 12.1                   |
| Oats . . . . .   | 173                    | 1,590                  | 8.8                    |
| Barley . . . . . | 123                    | 1,610                  | 13.1                   |

The acreage of the principal kinds of grain at various dates was as follows:—

|                  | 1846      | 1856      | 1866      | 1880      |
|------------------|-----------|-----------|-----------|-----------|
| Wheat . . . . .  | 580,000   | 660,000   | 700,000   | 690,000   |
| Rye . . . . .    | 700,000   | 720,000   | 710,000   | 690,000   |
| Oats . . . . .   | 500,000   | 550,000   | 570,000   | 620,000   |
| Barley . . . . . | 100,000   | 110,000   | 110,000   | 100,000   |
| Total . . . . .  | 1,880,000 | 2,040,000 | 2,090,000 | 2,100,000 |

Returns of live-stock are as follows:—

|                  | 1840    | 1866      | 1880      | Approximate<br>Value in 1880 |
|------------------|---------|-----------|-----------|------------------------------|
| Horses . . . . . | 246,000 | 280,000   | 270,000   | 5,400,000                    |
| Cattle . . . . . | 910,000 | 1,240,000 | 1,380,000 | 16,600,000                   |
| Sheep . . . . .  | 750,000 | 600,000   | 370,000   | 300,000                      |
| Pigs . . . . .   | 420,000 | 630,000   | 650,000   | 1,300,000                    |
| Goats . . . . .  | 80,000  | 200,000   | 250,000   | 100,000                      |

The production of meat, at 600 lbs. per beef carcase, 70 lbs. per sheep, and 112 lbs. per pig, was:—

| Year           | Meat, Tons | Lbs. per<br>Inhabitant |
|----------------|------------|------------------------|
| 1840 . . . . . | 77,000     | 43                     |
| 1866 . . . . . | 106,000    | 54                     |
| 1880 . . . . . | 110,000    | 43                     |

The official valuation of products gave the following average for ten years ending 1880:—

|                           | £          |
|---------------------------|------------|
| Grain . . . . .           | 21,700,000 |
| Green crops . . . . .     | 6,400,000  |
| Hay . . . . .             | 10,200,000 |
| Sundries . . . . .        | 18,200,000 |
| All crops . . . . .       | 56,500,000 |
| Cattle products . . . . . | 9,500,000  |
| Total . . . . .           | 66,000,000 |

According to the preceding scale the value at various dates was as follows:—

|                      | Acres     |           |           |           | Value, Millions, £ |      |      |      |
|----------------------|-----------|-----------|-----------|-----------|--------------------|------|------|------|
|                      | 1846      | 1856      | 1866      | 1880      | 1846               | 1856 | 1866 | 1880 |
| Cultivated . . . . . | 3,930,000 | 4,520,000 | 5,110,000 | 4,970,000 | 165                | 243  | 337  | 336  |

| Year           | Agricultural Capital, Millions, £ |        |          |       |
|----------------|-----------------------------------|--------|----------|-------|
|                | Land                              | Cattle | Sundries | Total |
| 1846 . . . . . | 196                               | 16     | 23       | 235   |
| 1856 . . . . . | 280                               | 18     | 33       | 331   |
| 1866 . . . . . | 374                               | 20     | 44       | 438   |
| 1880 . . . . . | 377                               | 24     | 44       | 445   |

The actual values at present are much lower. The value of all products in 1886 was approximately as follows:—

|                              | Tons      | £          | Sundries                     | £          |
|------------------------------|-----------|------------|------------------------------|------------|
| Wheat . . . . .              | 450,000   | 4,050,000  | Vegetables . . . . .         | 4,500,000  |
| Spelt . . . . .              | 150,000   | 1,200,000  | Timber . . . . .             | 800,000    |
| Barley . . . . .             | 80,000    | 500,000    | Beetroot . . . . .           | 1,600,000  |
| Oats . . . . .               | 490,000   | 3,400,000  | Flax . . . . .               | 2,700,000  |
| Rye, &c. . . . .             | 450,000   | 3,050,000  | Turnips . . . . .            | 1,800,000  |
| All grain . . . . .          | 1,620,000 | 12,200,000 | Poultry . . . . .            | 1,600,000  |
| Straw . . . . .              | 1,600,000 | 1,600,000  | Dairy . . . . .              | 5,000,000  |
| Hay . . . . .                | 5,000,000 | 10,000,000 | Meat . . . . .               | 5,500,000  |
| Potatoes . . . . .           | 3,000,000 | 6,000,000  | Hides and<br>foals . . . . . | 2,000,000  |
| Principal<br>crops . . . . . | ...       | 29,800,000 | Sundries . . . . .           | 25,500,000 |

|                                 | £          |
|---------------------------------|------------|
| Agricultural products . . . . . | 41,200,000 |
| Animal products . . . . .       | 14,100,000 |
| Total . . . . .                 | 55,300,000 |

The number of adults engaged in 1880 was 980,000. This gives an average of £56 per head.

#### LANDED VALUE

An official report, dated 1886, gives the rental and the selling price of land (under cultivation) at various dates as follows:—

| Year           | Rent,<br>Shillings per Acre | Price,<br>£ per Acre |
|----------------|-----------------------------|----------------------|
| 1846 . . . . . | 22.2                        | 42                   |
| 1856 . . . . . | 26.4                        | 54                   |
| 1866 . . . . . | 32.5                        | 66                   |
| 1880 . . . . . | 36.6                        | 67                   |

The value of lands in 1880 was officially set down as follows:—

|                  | Acres     | £           | £ per Acre |
|------------------|-----------|-------------|------------|
| Arable . . . . . | 3,960,000 | 271,800,000 | 67         |
| Meadow . . . . . | 970,000   | 64,500,000  | 67         |
| Forest . . . . . | 1,210,000 | 39,200,000  | 33         |
| Waste . . . . .  | 1,140,000 | 1,800,000   | 1.5        |
| Total . . . . .  | 7,280,000 | 377,300,000 | ...        |

The increase of capital was as follows:—

| Interval           | Millions, £ | £ per Annum |
|--------------------|-------------|-------------|
| 1846-56 . . . . .  | 96          | 9,600,000   |
| 1856-66 . . . . .  | 107         | 10,700,000  |
| 1866-80 . . . . .  | 7           | 500,000     |
| 34 years . . . . . | 210         | 6,200,000   |

Mr. Block estimated the value of all products in 1850 at 21 millions sterling, being about 7 per cent. on capital. In 1886 it was, as already shown, 55 millions, say 12½ per cent. on capital.

SWITZERLAND

Official returns are as follows :—

|                     | Acres     |
|---------------------|-----------|
| Tillage . . . . .   | 1,450,000 |
| Meadow . . . . .    | 1,600,000 |
| Vineyards . . . . . | 70,000    |
| Pasture . . . . .   | 1,960,000 |
| Forest . . . . .    | 1,760,000 |
| Waste . . . . .     | 2,550,000 |

Total area . . . . . 9,390,000

Live-stock, according to Schnabel and later authorities, showed thus :—

|                  | 1830    | 1842    | 1852    | 1861    | 1886      |
|------------------|---------|---------|---------|---------|-----------|
| Horses . . . . . | ...     | ...     | ...     | 94,000  | 98,000    |
| Cattle . . . . . | 800,000 | 815,000 | 950,000 | 940,000 | 1,210,000 |
| Sheep . . . . .  | 500,000 | 465,000 | 550,000 | 430,000 | 340,000   |
| Pigs . . . . .   | 250,000 | 310,000 | 280,000 | 330,000 | 395,000   |
| Goats . . . . .  | ...     | 345,000 | ...     | 370,000 | 420,000   |

The production of meat is about 82,000 tons yearly. The value of all products in 1886 was approximately thus :—

|                           | Tons      | £         | Sundries                | £          |
|---------------------------|-----------|-----------|-------------------------|------------|
| Wheat . . . . .           | 55,000    | 500,000   | Vegetables, &c. . . . . | 1,500,000  |
| Barley . . . . .          | 45,000    | 300,000   |                         |            |
| Oats . . . . .            | 80,000    | 500,000   | Poultry . . . . .       | 900,000    |
| Rye . . . . .             | 210,000   | 1,300,000 | Dairy . . . . .         | 4,800,000  |
|                           |           |           | Timber . . . . .        | 1,200,000  |
| All grain . . . . .       | 390,000   | 2,600,000 | Meat . . . . .          | 4,100,000  |
| Hay and straw . . . . .   | 1,700,000 | 2,000,000 | Foals . . . . .         | 300,000    |
| Wine . . . . .            | ...       | 1,400,000 | Hides, &c. . . . .      | 500,000    |
| Principal crops . . . . . | ...       | 6,000,000 | Sundries . . . . .      | 13,300,000 |

|                                 |            |
|---------------------------------|------------|
| Agricultural products . . . . . | 9,000,000  |
| Animal products . . . . .       | 10,300,000 |
| Total . . . . .                 | 19,300,000 |

Agricultural capital is approximately as follows :—

|                            |            |
|----------------------------|------------|
| Land, cultivated . . . . . | 93,000,000 |
| Forest, &c. . . . .        | 27,000,000 |
| Cattle . . . . .           | 10,000,000 |
| Sundries . . . . .         | 14,000,000 |

Total . . . . . 144,000,000

The annual product is about 13½ per cent. on capital.

GREECE

The official report for 1885 gives the following :—

|                           | Acres     | Sundries           | Acres      |
|---------------------------|-----------|--------------------|------------|
| Grain . . . . .           | 2,000,000 | Fallow . . . . .   | 1,000,000  |
| Olives . . . . .          | 325,000   | Gardens . . . . .  | 40,000     |
| Currants . . . . .        | 125,000   | Meadows . . . . .  | 1,000,000  |
| Grapes . . . . .          | 250,000   | Pasture . . . . .  | 5,000,000  |
| Tobacco . . . . .         | 250,000   | Forest . . . . .   | 1,500,000  |
| Cotton . . . . .          | 250,000   | Waste . . . . .    | 4,510,000  |
| Principal crops . . . . . | 2,950,000 | Sundries . . . . . | 13,050,000 |

Live-stock comprised 160,000 horses, 164,000 cattle, 3,460,000 sheep, 45,000 pigs, and 2,510,000 goats, re-

presenting an aggregate value of 24 millions sterling. The value of products in 1885 was approximately as follows :—

|                           | Tons      | £         | Sundries                    | £          |
|---------------------------|-----------|-----------|-----------------------------|------------|
| Wheat . . . . .           | 190,000   | 1,600,000 | Wine . . . . .              | 2,500,000  |
| Barley . . . . .          | 70,000    | 500,000   | Timber . . . . .            | 800,000    |
| Rye . . . . .             | 20,000    | 130,000   | Olives . . . . .            | 900,000    |
| Maize . . . . .           | 100,000   | 670,000   | Vegetables . . . . .        | 1,100,000  |
| All grain . . . . .       | 380,000   | 2,900,000 | Dairy and poultry . . . . . | 1,400,000  |
| Hay and straw . . . . .   | 1,200,000 | 2,000,000 | Meat . . . . .              | 2,500,000  |
| Currants . . . . .        | 120,000   | 3,100,000 | Foals, hides &c. . . . .    | 1,700,000  |
| Principal crops . . . . . | ...       | 8,000,000 | Sundries . . . . .          | 10,900,000 |

|                                 |            |
|---------------------------------|------------|
| Agricultural products . . . . . | 13,700,000 |
| Animal products . . . . .       | 5,200,000  |
| Total . . . . .                 | 18,900,000 |

In 1836 the Government sold the productive land at £3 an acre—say, in all, 15 millions sterling.

In 1869 the Embassy report makes the arable land worth about £22 an acre, the rest £5, viz. :—

|                   | Acres     | Per Acre, £ | Value, Millions £ |
|-------------------|-----------|-------------|-------------------|
| Arable . . . . .  | 1,800,000 | 22          | 40                |
| Pasture . . . . . | 3,200,000 | 5           | 16                |
| Total . . . . .   | 5,000,000 | 11          | 56                |

The acquisition of Thessaly, in 1881, added 5000 square miles to the area of Greece, and the present landed value, at the prices of the Embassy report of 1869, would be as follows :—

|                      | Acres      | Value, £    |
|----------------------|------------|-------------|
| Cultivated . . . . . | 5,000,000  | 110,000,000 |
| Pasture . . . . .    | 5,000,000  | 25,000,000  |
| Forest . . . . .     | 1,500,000  | 3,000,000   |
| Waste . . . . .      | 4,500,000  | ...         |
| Total . . . . .      | 16,000,000 | 138,000,000 |

See Part II., page 624.

ROUMANIA

The latest returns give the acreage as follows :—

|                      | Acres     |                        | Acres      |
|----------------------|-----------|------------------------|------------|
| Grain . . . . .      | 7,500,000 | Pasture . . . . .      | 6,500,000  |
| Meadow . . . . .     | 1,400,000 | Forest . . . . .       | 5,200,000  |
| Vines . . . . .      | 300,000   | Waste . . . . .        | 10,000,000 |
| Cultivated . . . . . | 9,200,000 | Uncultivated . . . . . | 21,700,000 |

Spallart says that the production of grain in 1876 was 20 per cent. greater than ten years before. The weight

of crops is variously estimated from 100 to 110 million bushels. The latest returns of live-stock show 600,000 horses, 2,380,000 cattle, 4,650,000 sheep, 2,310,000 pigs, and 190,000 goats, representing an aggregate value of about 37 millions sterling. The production of meat is approximately as follows:—

|                  | Tons    | Value, £  |
|------------------|---------|-----------|
| Beef . . . . .   | 106,000 | 4,500,000 |
| Mutton . . . . . | 41,000  | 1,800,000 |
| Pork . . . . .   | 100,000 | 4,500,000 |

Total . . . . . 247,000 10,800,000

The value of all products may be put down approximately thus:—

|                             | Tons       | £          | Sundries                 | £          |
|-----------------------------|------------|------------|--------------------------|------------|
| Wheat . . . . .             | 700,000    | 5,000,000  | Vegetables               | 2,500,000  |
| Barley . . . . .            | 330,000    | 2,000,000  | Meat . . . . .           | 10,800,000 |
| Maize . . . . .             | 1,600,000  | 9,000,000  | Dairy . . . . .          | 4,800,000  |
| Rye, &c. . . . .            | 220,000    | 1,300,000  | Poultry . . . . .        | 1,100,000  |
|                             |            |            | Timber . . . . .         | 900,000    |
| All grain . . . . .         | 2,850,000  | 17,300,000 | Foals . . . . .          | 1,200,000  |
| Straw . . . . .             | 3,000,000  | 1,500,000  | Tallow . . . . .         | 700,000    |
| Hay . . . . .               | 1,400,000  | 2,100,000  | Hides, wool, &c. . . . . | 1,200,000  |
| Wine, gallons . . . . .     | 40,000,000 | 3,100,000  |                          |            |
| Principal crops } . . . . . |            | 24,000,000 | Sundries . . . . .       | 23,200,000 |

|                                 | £          |
|---------------------------------|------------|
| Agricultural products . . . . . | 27,400,000 |
| Animal products . . . . .       | 19,800,000 |

Total . . . . . 47,200,000

The value of the land appears to be approximately as follows:—

|                              | Acres      | Value, £    |
|------------------------------|------------|-------------|
| Cultivated . . . . .         | 9,200,000  | 184,000,000 |
| Forest and pasture . . . . . | 11,700,000 | 70,000,000  |
| Waste . . . . .              | 10,000,000 | ...         |
| Total . . . . .              | 30,900,000 | 254,000,000 |

See Part II., page 624.

### SERVIA

The total area of this little kingdom is thus distributed:—

|                      | Acres     | Acres                            |
|----------------------|-----------|----------------------------------|
| Grain . . . . .      | 1,160,000 | Forest . . . . . 2,200,000       |
| Vines . . . . .      | 440,000   | Pasture . . . . . 6,170,000      |
| Meadow . . . . .     | 600,000   | Waste . . . . . 1,430,000        |
| Cultivated . . . . . | 2,200,000 | Uncultivated . . . . . 9,800,000 |

An official report for 1887, not trustworthy, gives as follows:—

|                          | Acres      |
|--------------------------|------------|
| Grain and wine . . . . . | 7,030,000  |
| Forest . . . . .         | 2,200,000  |
| Waste, &c. . . . .       | 2,770,000  |
| Total . . . . .          | 12,000,000 |

The apparent error in this report is including pasture-land as grain-bearing. The crops have been sometimes said to reach 20 million bushels, but Spallart says 14 millions, and the average weight seems to be 16 millions bushels. The value of product is approximately thus:—

|                             | Tons       | £         | Sundries                 | £         |
|-----------------------------|------------|-----------|--------------------------|-----------|
| Wheat . . . . .             | 100,000    | 700,000   | Vegetables               | 1,000,000 |
| Barley . . . . .            | 70,000     | 400,000   | Timber . . . . .         | 400,000   |
| Maize . . . . .             | 130,000    | 700,000   | Poultry . . . . .        | 400,000   |
| Oats, rye, &c. . . . .      | 100,000    | 600,000   | Dairy . . . . .          | 2,000,000 |
|                             |            |           | Meat . . . . .           | 4,000,000 |
| All grain . . . . .         | 400,000    | 2,400,000 | Foals . . . . .          | 400,000   |
| Straw . . . . .             | 400,000    | 200,000   | Tallow . . . . .         | 300,000   |
| Hay . . . . .               | 600,000    | 1,000,000 | Hides, wool, &c. . . . . | 500,000   |
| Wine, galls. . . . .        | 16,000,000 | 1,200,000 |                          |           |
| Principal crops } . . . . . | ...        | 4,800,000 | Sundries . . . . .       | 9,000,000 |

|                                 | £          |
|---------------------------------|------------|
| Agricultural products . . . . . | 6,200,000  |
| Animal products . . . . .       | 7,600,000  |
| Total . . . . .                 | 13,800,000 |

Statistics of live-stock in 1882 were:—Horses, 160,000; cattle, 960,000; sheep, 3,600,000; pigs, 1,700,000; and goats, 100,000—representing a total value of nearly 16 millions sterling. The production of meat was about 90,000 tons. The value of land was approximately thus:—

|                      | Acres      | £          |
|----------------------|------------|------------|
| Cultivated . . . . . | 2,200,000  | 44,000,000 |
| Pasture . . . . .    | 6,200,000  | 37,000,000 |
| Forest . . . . .     | 2,200,000  | 13,000,000 |
| Waste . . . . .      | 1,400,000  | ...        |
| Total . . . . .      | 12,000,000 | 94,000,000 |

Agricultural capital is approximately as follows:—

|                    | Millions, £ |
|--------------------|-------------|
| Land . . . . .     | 94          |
| Cattle . . . . .   | 16          |
| Sundries . . . . . | 12          |
| Total . . . . .    | 122         |

The product is about 11½ per cent. on capital, and £28 per head of adults engaged.

### BULGARIA

The area, including Eastern Roumelia, is somewhat larger than that of Ireland, viz:—

|                            | Acres      |
|----------------------------|------------|
| Bulgaria proper . . . . .  | 16,000,000 |
| Eastern Roumelia . . . . . | 8,300,000  |
| Total . . . . .            | 24,300,000 |

The extent under grain in Eastern Roumelia is 1,660,000 acres, and in Bulgaria proper close on 4,000,000 acres. The crops of Bulgaria proper average 44 million bushels, of which 23 millions are wheat. The total grain crop of the Principality must be over 60 million bushels, or approximately 1,500,000 tons, representing a value of 10 millions sterling.

### TURKEY

Agriculture is very backward, owing to the despotism of the Pashas and the exactions of money-lenders. Every province, meantime, has its own features and modes of

agriculture. If we include the territories taken from Turkey by the Treaty of Berlin in 1878, we find as follows:—

|                     | Acres      | Population | Acres per Inhabitant |
|---------------------|------------|------------|----------------------|
| Bosnia-Herzegovina  | 15,000,000 | 1,500,000  | 10                   |
| Bulgaria . . . . .  | 24,300,000 | 3,150,000  | 8                    |
| Turkey proper . . . | 41,000,000 | 4,350,000  | 9½                   |
| Turkey in Europe    | 80,300,000 | 9,000,000  | 9                    |

Mr. Spallart compares the average grain crops of 1881-85 with those of 1868 thus:—

|                  | 1881-85, Millions of Bushels |          |             |       | 1868 |
|------------------|------------------------------|----------|-------------|-------|------|
|                  | Bosnia                       | Bulgaria | Eur. Turkey | Total |      |
| Wheat . . . . .  | 2                            | 23       | 22          | 47    | 39   |
| Maize . . . . .  | 3                            | 7        | 8           | 18    | 30   |
| Barley . . . . . | 2                            | 11       | 12          | 25    | 25   |
| Rye, &c. . . . . | 1                            | 3        | 15          | 19    | 13   |
| Total . . . . .  | 8                            | 44       | 57          | 109   | 107  |

Bosnia and Bulgaria have been already described. One of the most productive provinces in Turkey was Bessarabia, which was transferred to Russia by the Berlin Treaty of 1878: it is rich in corn and wine. The vineyards often yield per acre 300 gallons of wine, worth £18; and the grain farms 60 bushels of maize per acre. The serfs were emancipated in 1870, the Boyars or nobles being compelled to either give the tenant half his farm gratis or sell the whole for 26s. per acre. Four hundred Boyars preferred the former, and let the remainder of their lands at 5s. an acre. In 1874 there were 350,000 small landowners whose farms averaged 30 acres each, maize being the chief product.

Turkey proper is held partly by Pashas, who let the lands in small farms of 20 acres to Murabàs, on the "metayer" system, the tenant giving half the crops in lieu of rent; partly by peasant proprietors in 50-acre farm-lots, viz.:—

|                      | Number of Farms | Acres      |
|----------------------|-----------------|------------|
| Murabàs . . . . .    | 650,000         | 13,000,000 |
| Peasant landowners . | 600,000         | 29,700,000 |
| Total . . . . .      | 1,250,000       | 42,700,000 |

The price of arable land ranges from £20 to £60 per acre, and it may be rented from 20s. to 40s. per annum. Waste land sells at £3 per acre. Live-stock is supposed to comprise 600,000 horses, 1,000,000 cattle, and 10,000,000 sheep, besides numbers of goats, pigs, and poultry.

Epirus is backward, the labours of the field devolving mostly on women, and large tracts of good land lying waste for want of hands to cultivate it. The country about Adrianople, on the other hand, is progressive, the use of steam-threshers being general. Oxen and buffaloes are employed for ploughing; wheat and maize are the chief crops. The area under crops is not known; probably about 8 or 10 million acres. The grain crops may be put down roughly at 80 million bushels.

#### ASIA MINOR

This portion of the Turkish Empire is sometimes called Anatolia, with an area of 220,000 square miles or 141 million acres, and a population of about 5,000,000 souls

About one-third of the area is actually farmed, either as Murabàs on the "metayer" system, or by the tenant proprietors, viz.:—

|                     | Number of Farms | Acres      | Average Farm, Acres |
|---------------------|-----------------|------------|---------------------|
| Murabàs . . . . .   | 1,395,000       | 28,000,000 | 20                  |
| Proprietors . . . . | 1,284,000       | 22,000,000 | 18                  |
| Total . . . . .     | 2,679,000       | 50,000,000 | 19                  |

Such is the want of roads, that the freight of a ton of grain 100 miles would be £9, or about the value of the grain. Tithes are oppressive, as well as transit custom-dues on products going from one province to another. Most of the lands, moreover, belong to the State or to the Vacouf institutions; and although the soil is fertile, no progress is made.

Smyrna or Ardin is the best part of Asiatic Turkey, with an area of 35,500 square miles or 22 million acres, and a population of 1,000,000, nine-tenths Moslems. Most of the territory consists of Chiftliks or large estates, worked by the peasants on the Murabàs system. Some small proprietors have bought their farms at 40s. per acre, the lowness of price being the result of heavy taxation, viz.:—1st, one-tenth of all crops and fruit to the State; 2nd, four per mil, equal to one penny yearly for each £ of selling value of land and houses, or about 4 per cent. on the rental value; 3rd, a charge of 5 per cent. on every transfer; 4th, a cattle-tax of 32d. per sheep, and 21d. per pig or goat yearly. Land is allowed to lie fallow every third year. The ordinary yield of crops is wheat or barley twelve-fold, beans twenty-fold, maize thirty-fold. Vallonia is an important crop, Smyrna exporting 100,000 tons yearly.

#### EGYPT

The area under tillage has almost trebled in fifty years, the official report published in 1888 containing the following table:—

| Year | Acres under Crops | Year | Acres under Crops |
|------|-------------------|------|-------------------|
| 1833 | 1,930,000         | 1875 | 4,890,000         |
| 1840 | 4,020,000         | 1880 | 4,960,000         |
| 1863 | 4,570,000         | 1888 | 5,080,000         |

A statement of the crops in 1834 was as follows:—18 million bushels grain, 22 million lbs. raw cotton, 5000 tons tobacco, 3000 tons flax, and 1600 tons sugar, representing a total value of £4,000,000 sterling.

When Mehemet Ali was dying, in 1848, he could boast that in his reign Egypt had more than doubled the area under crops. Progress was also made under his grandson, Abbas, and still more under Ismail Pacha, from 1863 to 1879, in which period were made 8400 miles of canals, irrigating 1,370,000 acres, the cultivation of cotton being specially stimulated by high prices consequent on the American war.

The cotton crop is shown for the last sixty-seven years as follows:—

| Period            | Million lbs. Yearly | Value     | Price per Lb. |
|-------------------|---------------------|-----------|---------------|
| 1821-30 . . . . . | 14                  | £392,000  | 6.7           |
| 1831-40 . . . . . | 18                  | 677,000   | 9.0           |
| 1841-50 . . . . . | 24                  | 504,000   | 5.0           |
| 1851-60 . . . . . | 51                  | 1,120,000 | 5.3           |
| 1861-70 . . . . . | 127                 | 6,860,000 | 13.0          |
| 1871-80 . . . . . | 237                 | 7,580,000 | 7.7           |
| 1881-87 . . . . . | 288                 | 7,490,000 | 6.2           |

The distribution of tillage in 1888 was as follows :—

|                     | Acres     | Crop, Tons |
|---------------------|-----------|------------|
| Wheat . . . . .     | 1,290,000 | 500,000    |
| Maize . . . . .     | 710,000   | 300,000    |
| Barley . . . . .    | 540,000   | 160,000    |
| Peas, &c. . . . .   | 1,955,000 | 900,000    |
| All grain . . . . . | 4,495,000 | 1,860,000  |
| Cotton . . . . .    | 900,000   | 130,000    |
| Clover . . . . .    | 980,000   | 2,000,000  |
| Total . . . . .     | 6,375,000 | ...        |

Some of the land bears double crops, which accounts for the discrepancy between this and the previous table. There are 3,450,000 date-palms, producing annually 300,000 tons of fruit. There is room for further development, since there are still idle 2,200,000 acres suitable for tillage. More than three-fourths of the lands are State property, the Khedive holding 3,800,000 acres, which he lets to the Fellahs at a yearly rent of 8s. per acre in Upper Egypt and 30s. in the Nile Valley.

A statement of tenure in 1879 was as follows :—

| Farmed by         | Title   | Acres     | Tax, £    | Shillings per Acre |
|-------------------|---------|-----------|-----------|--------------------|
| Gentry . . . . .  | Ouchour | 1,329,000 | 470,000   | 7                  |
| Fellahs . . . . . | Karadji | 3,514,000 | 3,850,000 | 22                 |
| Do. . . . .       | Abadich | 620,000   | 500,000   | 16                 |
| Total . . . . .   | ...     | 5,463,000 | 4,828,000 | 18                 |

An official return of the value of crops in 1884 was :—

|                           | £          | Sundries                   | £         |
|---------------------------|------------|----------------------------|-----------|
| Grain . . . . .           | 13,300,000 | Clover . . . . .           | 2,500,000 |
| Cotton . . . . .          | 7,900,000  | Dates and sugar . . . . .  | 1,700,000 |
| Cotton-seed . . . . .     | 1,400,000  | Lentils, flax, &c. . . . . | 3,200,000 |
| Principal crops . . . . . | 22,600,000 | Sundries . . . . .         | 7,400,000 |

Making a total of 30 millions sterling. The crop, however, depends so much on the Nile, that a difference

The returns for 1886 were as follows :—

|                     | Acreage   |           |           | Crop, Tons |           |           |
|---------------------|-----------|-----------|-----------|------------|-----------|-----------|
|                     | European  | Arab      | Total     | European   | Arab      | Total     |
| Wheat . . . . .     | 620,000   | 2,500,000 | 3,120,000 | 127,000    | 505,000   | 632,000   |
| Barley . . . . .    | 300,000   | 3,300,000 | 3,600,000 | 100,000    | 850,000   | 950,000   |
| Oats . . . . .      | 100,000   | ...       | 100,000   | 50,000     | ...       | 50,000    |
| Maize, &c. . . . .  | 40,000    | 100,000   | 140,000   | 13,000     | 15,000    | 28,000    |
| All grain . . . . . | 1,060,000 | 5,900,000 | 6,960,000 | 290,000    | 1,370,000 | 1,660,000 |

The European settlers had also 190,000 acres under vines, which produced 36 million gallons of wine in 1886, the yield in 1890 being expected to reach 60 million gallons. The tenure of land in 1886 was as follows :—

| Province              | Acres held by |         |         |          |           |
|-----------------------|---------------|---------|---------|----------|-----------|
|                       | Arabs         | Jews    | French  | Settlers | Total     |
| Algiers . . . . .     | 2,900,000     | 40,000  | 230,000 | 170,000  | 3,340,000 |
| Oran . . . . .        | 1,540,000     | 40,000  | 160,000 | 230,000  | 1,970,000 |
| Constantine . . . . . | 3,570,000     | 30,000  | 150,000 | 100,000  | 3,850,000 |
| Total . . . . .       | 8,010,000     | 110,000 | 540,000 | 500,000  | 9,160,000 |

of one foot in flood-level is worth £2,000,000, the average Nile rising 24 feet. In ordinary years the cost of irrigation is 4s. an acre per annum. The agricultural condition of the country is shown thus :—

|                             | Lower Egypt | Upper Egypt | Total     |
|-----------------------------|-------------|-------------|-----------|
| Villages . . . . .          | 2,359       | 1,420       | 3,779     |
| Inhabitants . . . . .       | 3,180,000   | 2,630,000   | 5,810,000 |
| Acres cultivated . . . . .  | 2,880,000   | 2,330,000   | 5,210,000 |
| Horses and cattle . . . . . | 466,000     | 284,000     | 750,000   |
| Sheep and goats . . . . .   | 380,000     | 555,000     | 935,000   |
| Date-palms . . . . .        | 1,100,000   | 2,350,000   | 3,450,000 |

In Lower Egypt the soil gives four crops in three years; in Upper Egypt seven crops in six years.

#### CYPRUS

Area 2,300,000 acres, being 13 acres per inhabitant. The island is held partly by nobles, who have eighty Tchiffiks or large estates, the rest being cut up in 70-acre farms belonging to peasant proprietors. The chief products are :—

|                                    | Value, £ |
|------------------------------------|----------|
| Grain, 3 million bushels . . . . . | 500,000  |
| Wine, 450,000 gallons . . . . .    | 40,000   |
| Oil, 50,000 gallons . . . . .      | 18,000   |
| Sundries . . . . .                 | 82,000   |
| Total . . . . .                    | 640,000  |

The farmers have 750,000 sheep, besides cows and horses. There are 600,000 carob or algarroba trees, covering an area of 20,000 acres, yielding 25,000 tons of locust-beans worth £75,000, most of which goes to Scotland to be made into whisky.

#### ALGERIA

The cultivated portion is about 16 per cent. of the total, viz :—

|                            | Acres      |
|----------------------------|------------|
| Under crops . . . . .      | 7,720,000  |
| Pasture . . . . .          | 4,800,000  |
| Forest and waste . . . . . | 63,920,000 |
| Total . . . . .            | 76,440,000 |

The returns of live-stock were :—

|                  | Owned by  |           |           |
|------------------|-----------|-----------|-----------|
|                  | Europeans | Arabs     | Total     |
| Horses . . . . . | 51,000    | 260,000   | 311,000   |
| Asses . . . . .  | 13,000    | 270,000   | 283,000   |
| Camels . . . . . | 300       | 275,500   | 275,800   |
| Cattle . . . . . | 137,000   | 1,060,000 | 1,197,000 |
| Sheep . . . . .  | 321,000   | 9,036,000 | 9,357,000 |
| Goats . . . . .  | 74,000    | 4,592,000 | 4,666,000 |
| Pigs . . . . .   | 85,000    | ...       | 85,000    |

The value of all live-stock was about 28 millions sterling; the production of meat about 160,000 tons yearly. The grain crop has increased 50 per cent in the last twenty years. The value of products in 1886 was approximately thus :—

|                   | Tons      | £          | Sundries         | £          |
|-------------------|-----------|------------|------------------|------------|
| Wheat . . .       | 630,000   | 5,000,000  | Meat . . .       | 6,400,000  |
| Barley, &c. .     | 1,030,000 | 6,200,000  | Dairy and        | 2,600,000  |
| Wine . . .        | ...       | 2,200,000  | poultry          |            |
| Principal crops } | ...       | 13,400,000 | Wool, hides, &c. | 3,300,000  |
|                   |           |            | Sundries         | 12,300,000 |

# UNITED STATES

Tillage was a chief occupation of the first settlers. In 1602 Captain Gosnold grew peas and beans in Massachusetts, and in 1611 wheat was grown in Virginia. The Dutch of Manhattan (New York) sent home some wheat to Holland in 1626. Potatoes, previously unknown in North America, were introduced from England in 1629 and successfully grown in Massachusetts. Stebbins relates that in 1637 there were 100 ploughs at work in Virginia, and 37 in Massachusetts. In 1640 Mr. Endicott of Salem sold 500 fruit-trees for 250 acres of land, and in the preceding year Manhattan apples were sent to Holland. South Carolina exported 700 bushels of potatoes in 1749. New York 70,000 barrels of flour in 1750. The production of grain in the eighteenth century can only be roughly estimated on the basis of population; exact returns begin with the year 1840.

| Year | Grain Product, Million of Bushels |                  |          | Value of Crop, Million £ |
|------|-----------------------------------|------------------|----------|--------------------------|
|      | Production                        | Home Consumption | Exported |                          |
| 1700 | 5                                 | 5                | ...      | 1                        |
| 1750 | 20                                | 20               | ...      | 3                        |
| 1775 | 60                                | 60               | ...      | 8                        |
| 1790 | 120                               | 120              | ...      | 14                       |
| 1800 | 160                               | 160              | ...      | 18                       |
| 1820 | 343                               | 336              | 7        | 34                       |
| 1830 | 463                               | 455              | 8        | 46                       |
| 1840 | 616                               | 601              | 15       | 62                       |
| 1850 | 867                               | 855              | 12       | 97                       |
| 1860 | 1,240                             | 1,220            | 20       | 173                      |
| 1870 | 1,629                             | 1,569            | 60       | 198                      |
| 1880 | 2,718                             | 2,425            | 293      | 276                      |
| 1889 | 3,454                             | ...              | ...      | 243                      |

The production is at present 52 bushels per inhabitant, against 30 in the year 1800. It forms 33 per cent. of the whole grain-crop of the world, and the ratio per inhabitant is only approached by Denmark, which has 42 bushels per inhabitant.

The progress of grain-growing in twenty years is shown in the Agricultural Report for 1889 as follows :—

|                 | Acreage    |            |             |             | Increase of 20 Years | Per Cent. |
|-----------------|------------|------------|-------------|-------------|----------------------|-----------|
|                 | 1869       | 1870-79    | 1880-88     | 1889        |                      |           |
| Wheat . . .     | 19,180,000 | 25,190,000 | 37,280,000  | 38,120,000  | 18,940,000           | 99        |
| Maize . . .     | 37,100,000 | 43,740,000 | 70,540,000  | 78,320,000  | 41,220,000           | 111       |
| Oats . . .      | 9,460,000  | 11,080,000 | 22,000,000  | 27,460,000  | 18,000,000           | 190       |
| Barley . . .    | 1,030,000  | 1,530,000  | 2,480,000   | 3,000,000   | 1,970,000            | 191       |
| Rye . . .       | 1,660,000  | 1,310,000  | 2,120,000   | 2,360,000   | 700,000              | 42        |
| Buckwheat . . . | 1,030,000  | 550,000    | 880,000     | 910,000     | ...                  | ...       |
| All grain . . . | 69,460,000 | 83,400,000 | 135,300,000 | 150,170,000 | 80,710,000           | 116       |

The various crops since 1840 show as follows :—

| Year | Millions of Bushels |      |       |        |          |       | Bushels per Inhabitant |
|------|---------------------|------|-------|--------|----------|-------|------------------------|
|      | Maize               | Oats | Wheat | Barley | Rye, &c. | Total |                        |
| 1840 | 378                 | 123  | 85    | 4      | 26       | 616   | 36                     |
| 1850 | 592                 | 147  | 101   | 5      | 23       | 868   | 38                     |
| 1860 | 840                 | 173  | 173   | 16     | 38       | 1,240 | 40                     |
| 1870 | 1,094               | 248  | 236   | 26     | 25       | 1,629 | 42                     |
| 1880 | 1,717               | 418  | 499   | 45     | 39       | 2,718 | 54                     |
| 1889 | 2,110               | 750  | 490   | 64     | 40       | 3,454 | 53                     |

The production of grain in various parts of the Union was as follows :—

| Year | Millions of Bushels |               |          |         |       |
|------|---------------------|---------------|----------|---------|-------|
|      | New England         | Middle States | Southern | Western | Total |
| 1840 | 22                  | 135           | 280      | 179     | 616   |
| 1850 | 20                  | 170           | 360      | 318     | 868   |
| 1860 | 21                  | 204           | 412      | 603     | 1,240 |
| 1870 | 16                  | 216           | 301      | 1,096   | 1,629 |
| 1880 | 18                  | 233           | 442      | 2,025   | 2,718 |
| 1887 | 20                  | 244           | 605      | 1,797   | 2,666 |

The ratio of bushels produced per inhabitant was as follows :—

| Year | New England | Middle States | Southern | Western | Union |
|------|-------------|---------------|----------|---------|-------|
| 1840 | 10          | 27            | 44       | 54      | 36    |
| 1850 | 7           | 25            | 43       | 57      | 38    |
| 1860 | 7           | 25            | 40       | 62      | 40    |
| 1870 | 5           | 22            | 27       | 61      | 42    |
| 1880 | 4           | 20            | 20       | 106     | 54    |
| 1887 | 5           | 18            | 36       | 78      | 44    |

The aggregate of crops of 1887 was 10 per cent. below the average of 1884-88.

The distribution of the various crops in 1887 compares with that of 1850 as follows :—

| States       | 1850  |       |           |       | 1887  |       |           |       |

Sugar is grown almost exclusively in Louisiana, rice in South Carolina and Georgia.

The following table shows the area under farms :—

| Year          | Millions of Acres |            |       |
|---------------|-------------------|------------|-------|
|               | Improved          | Unimproved | Total |
| 1810. . . . . | 64                | 100        | 164   |
| 1850. . . . . | 113               | 180        | 293   |
| 1870. . . . . | 190               | 220        | 410   |
| 1880. . . . . | 285               | 249        | 534   |
| 1888. . . . . | 345               | 302        | 647   |

The above figures are official except as regards 1888 : this last is an estimate, adding 21 per cent. to the figures for 1880, as the agricultural report shows similar rise in the area under crops, namely, from 165 million acres in 1880 to 200 millions in 1886 (see *Lanús*).

The distribution of the wheat, maize, hay, and potato crops in 1883-89 was as follows :—

|                      | Acres      |            |            |           |
|----------------------|------------|------------|------------|-----------|
|                      | Wheat      | Maize      | Hay        | Potatoes  |
| Illinois . . . . .   | 2,380,000  | 8,020,000  | 3,300,000  | 140,000   |

| Tennessee . . . . .  | 1,210,000  | 3,670,000  | ...        | 40,000    |
| California . . . . . | 3,290,000  | 160,000    | 1,180,000  | 60,000    |
| Kentucky . . . . .   | 980,000    | 2,840,000  | ...        | 50,000    |
| New York . . . . .   | 650,000    | 700,000    | 4,930,000  | 370,000   |
| Texas . . . . .      | 600,000    | 4,570,000  | 150,000    | ...       |
| Various . . . . .    | 14,665,000 | 25,775,000 | 12,470,000 | 755,000   |
| Total . . . . .      | 38,120,000 | 78,320,000 | 38,590,000 | 2,530,000 |

The increase of farming area between 1850 and 1880 was as follows :—

| States              | Millions of Acres |      | Rate of Increase, per Cent. |
|---------------------|-------------------|------|-----------------------------|
|                     | 1850              | 1880 |                             |
| New England . . . . | 18                | 22   | 22                          |
| Middle . . . . .    | 43                | 53   | 23                          |
| Southern . . . . .  | 165               | 227  | 38                          |
| Western . . . . .   | 67                | 232  | 248                         |
| Union . . . . .     | 293               | 534  | 82                          |

The area of improved lands increased in the same interval thus :—

| States              | Millions of Acres |      | Rate of Increase, per Cent. |
|---------------------|-------------------|------|-----------------------------|
|                     | 1850              | 1880 |                             |
| New England . . . . | 11                | 13   | 28                          |
| Middle . . . . .    | 26                | 37   | 42                          |
| Southern . . . . .  | 49                | 82   | 67                          |
| Western . . . . .   | 27                | 153  | 467                         |
| Union . . . . .     | 113               | 285  | 152                         |

The acreage, product, and value of the principal crops in 1889 were as follows :—

|                     | Acres       | Tons       | Value, £    | Value per Ton, £ | Product per Acre, £ |
|---------------------|-------------|------------|-------------|------------------|---------------------|
| Wheat . . . . .     | 38,120,000  | 13,200,000 | 71,300,000  | 5.40             | 1.87                |
| Maize . . . . .     | 78,320,000  | 52,700,000 | 123,700,000 | 2.35             | 1.58                |
| Oats . . . . .      | 27,460,000  | 10,700,000 | 36,100,000  | 3.37             | 1.31                |
| Barley . . . . .    | 3,000,000   | 1,400,000  | 6,600,000   | 4.72             | 2.20                |
| Rye . . . . .       | 2,360,000   | 700,000    | 3,500,000   | 5.00             | 1.50                |
| Buckwheat . . . . . | 910,000     | 250,000    | 1,600,000   | 6.40             | 1.76                |
| All grain . . . . . | 150,170,000 | 78,950,000 | 242,800,000 | 3.07             | 1.62                |
| Potatoes . . . . .  | 2,530,000   | 5,060,000  | 17,000,000  | 3.35             | 6.70                |
| Hay . . . . .       | 38,590,000  | 46,600,000 | 85,000,000  | 1.82             | 2.22                |
| Cotton . . . . .    | 19,060,000  | 1,540,000  | 60,800,000  | 39.50            | 3.20                |
| Tobacco . . . . .   | 750,000     | 250,000    | 9,100,000   | 36.40            | 12.10               |
| Total . . . . .     | 211,100,000 | ...        | 414,700,000 | ...              | 1.97                |

The acreage of the principal crops at various dates was approximately as follows :—

|                     | Acres      |            |             |             |             |
|---------------------|------------|------------|-------------|-------------|-------------|
|                     | 1850       | 1860       | 1870        | 1880        | 1889        |
| Wheat . . . . .     | 8,000,000  | 14,500,000 | 18,990,000  | 37,990,000  | 38,120,000  |
| Maize . . . . .     | 21,000,000 | 30,500,000 | 38,640,000  | 62,320,000  | 78,320,000  |
| Oats . . . . .      | 5,200,000  | 6,200,000  | 8,790,000   | 16,190,000  | 27,460,000  |
| Barley . . . . .    | 200,000    | 600,000    | 1,110,000   | 1,840,000   | 3,000,000   |
| Rye, &c. . . . .    | 1,800,000  | 2,500,000  | 1,720,000   | 2,590,000   | 3,280,000   |
| All grain . . . . . | 36,200,000 | 54,300,000 | 69,250,000  | 120,930,000 | 150,190,000 |
| Potatoes . . . . .  | 1,200,000  | 1,300,000  | 1,700,000   | 1,840,000   | 2,530,000   |
| Cotton . . . . .    | 6,000,000  | 12,000,000 | 10,200,000  | 15,950,000  | 19,060,000  |
| Tobacco . . . . .   | 360,000    | 430,000    | 550,000     | 610,000     | 750,000     |
| Sugar . . . . .     | 250,000    | 270,000    | 170,000     | 230,000     | 230,000     |
| Rice . . . . .      | 330,000    | 290,000    | 110,000     | 170,000     | 170,000     |
| Meadow . . . . .    | 10,000,000 | 13,000,000 | 20,000,000  | 25,860,000  | 38,590,000  |
| Total . . . . .     | 54,340,000 | 81,590,000 | 101,980,000 | 165,590,000 | 211,520,000 |

There are no returns as to rice and sugar in 1889, but they are doubtless the same as in 1880. The maize crop covers an area as large as Great Britain and Ireland, and the total acreage under grain exceeds the dimensions of the German Empire. The cotton covers as much land as the kingdoms of Holland and Belgium in the aggregate.

The area under hay is as large as England. The dimensions of the United States may be briefly expressed thus :—

|                         | Millions of Acres | Ratio |
|-------------------------|-------------------|-------|
| Under crops . . . .     | 212               | 9.2   |
| Under pasture . . . .   | 447               | 19.5  |
| Under forest . . . .    | 176               | 7.6   |
| Unsettled lands . . . . | 1,456             | 63.7  |
| Total . . . .           | 2,291             | 100.0 |

The following statistics are official :—

|                | 1810    | 1840       | 1850       | 1860       | 1870       | 1880       | 1890       |
|----------------|---------|------------|------------|------------|------------|------------|------------|
| Horses . . . . | 300,000 | 4,300,000  | 4,900,000  | 6,200,000  | 7,100,000  | 10,400,000 | 14,200,000 |
| Mules . . . .  | ...     | ...        | ...        | 1,200,000  | 1,100,000  | 1,800,000  | 2,300,000  |
| Cattle . . . . | 600,000 | 14,900,000 | 17,800,000 | 25,600,000 | 23,800,000 | 35,900,000 | 52,800,000 |
| Sheep . . . .  | 600,000 | 19,300,000 | 21,700,000 | 22,500,000 | 28,500,000 | 35,200,000 | 44,300,000 |
| Pigs . . . .   | ...     | 26,300,000 | 30,350,000 | 33,500,000 | 25,100,000 | 47,700,000 | 51,600,000 |

Meat supply may be taken at 500 lbs. per beef carcase, 50 lbs. per sheep, and 110 lbs. per pig. Tallow is as 14 to 100 lbs. of beef or mutton, and lard 20 to 100 lbs. of pig's meat.

The values of cattle in 1870 and 1890 were as follows :—

|                    | 1870       |             |             | 1890       |             |             |
|--------------------|------------|-------------|-------------|------------|-------------|-------------|
|                    | Number     | Value, £    | Per Head, £ | Number     | Value, £    | Per Head, £ |
| Horses . . . .     | 8,250,000  | 121,000,000 | 14.9        | 14,210,000 | 201,900,000 | 14.2        |
| Mules . . . .      | 1,180,000  | 23,400,000  | 20.0        | 2,330,000  | 38,100,000  | 16.3        |
| Milch-cows . . . . | 10,100,000 | 71,000,000  | 7.0         | 15,950,000 | 73,400,000  | 4.6         |
| Oxen . . . .       | 15,400,000 | 62,000,000  | 4.0         | 36,850,000 | 116,600,000 | 3.2         |
| Sheep . . . .      | 40,850,000 | 16,800,000  | 0.4         | 44,340,000 | 20,900,000  | 0.5         |
| Swine . . . .      | 26,750,000 | 34,000,000  | 1.3         | 51,600,000 | 50,700,000  | 1.0         |
| Total . . . .      | ...        | 328,200,000 | ...         | ...        | 501,600,000 | ...         |

The distribution of live-stock in the great divisions of the Union in 1890 was as follows :—

| States              | Number     |           |            |            |            | Value, £ Sterling |
|---------------------|------------|-----------|------------|------------|------------|-------------------|
|                     | Horses     | Mules     | Cattle     | Sheep      | Pigs       |                   |
| New England . . . . | 360,000    | ...       | 1,502,000  | 1,220,000  | 350,000    | 16,600,000        |
| Middle . . . .      | 1,680,000  | 60,000    | 5,170,000  | 3,280,000  | 2,960,000  | 68,000,000        |
| South . . . .       | 1,730,000  | 1,200,000 | 6,980,000  | 3,440,000  | 13,130,000 | 77,400,000        |
| West . . . .        | 10,440,000 | 1,070,000 | 39,148,000 | 36,400,000 | 35,160,000 | 339,100,000       |
| Total . . . .       | 14,210,000 | 2,330,000 | 52,800,000 | 44,340,000 | 51,600,000 | 501,100,000       |

The average value in dollars was as follows :—

| States              | Horses | Mules | Cows | Oxen | Sheep | Pigs |
|---------------------|--------|-------|------|------|-------|------|
| New England . . . . | 94     | ...   | 28   | 24   | 3.0   | 9.0  |
| Middle . . . .      | 91     | 102   | 28   | 25   | 3.4   | 6.5  |
| South . . . .       | 71     | 85    | 18   | 12   | 2.0   | 3.5  |
| West . . . .        | 64     | 71    | 20   | 15   | 2.3   | 5.0  |
| The Union . . . .   | 68     | 78    | 22   | 16   | 2.3   | 4.8  |

These values, as shown above, are much lower than prevailed in 1870, which in the foregoing table are computed in gold, after allowing 13 per cent. discount on greenbacks. If prices had not fallen, the live-stock of 1890 would represent a total value of 591 millions £ sterling.

Cattle were first introduced into Virginia in 1609, and into New England in 1624. They increased so rapidly that in 1639 the number in the colonies was estimated at 30,000. Dairy-farming prospered in the eighteenth century, one farmer of Rhode Island in 1750 counting 100 milch-cows, and another in the same year selling six tons of cheese.

Nevertheless cattle-farming at first contended with difficulties. It is recorded that the first hogs, goats, and sheep introduced were killed and eaten by the colonists for want of food. A second supply was brought from the West Indies, and it was made in Virginia punishable with death to kill any of these animals. The records of New York show that in 1627 the price of a cow was £30, of a yoke of oxen £40; those of Philadelphia, that the city market consumed twenty head of horned cattle weekly, besides sheep and hogs. Sheep were found to thrive in Virginia, but no use was made of the wool; the sheep were shorn to keep them cool.

Although the prices in the Western States are lower than in other parts of the Union, the wealth which they possess in cattle is two-thirds of the total, amounting to 339 millions sterling. This sum far exceeds the value of live-stock in any European country except Russia, and is five times as great as that of the cattle of all kinds in Australasia. The increase numerically of stock in the Western States has been as follows :—

|                | 1860       | 1880       | 1890       |
|----------------|------------|------------|------------|
| Horses . . . . | 3,220,000  | 7,030,000  | 10,440,000 |
| Cattle . . . . | 12,900,000 | 22,700,000 | 39,148,000 |
| Sheep . . . .  | 11,150,000 | 25,200,000 | 36,400,000 |
| Pigs . . . .   | 15,200,000 | 32,050,000 | 35,160,000 |

The States richest in live-stock were as follows :—

|                        | NUMBER           |            |            |            |            |                   |
|------------------------|------------------|------------|------------|------------|------------|-------------------|
|                        | Horses and Mules | Milch-Cows | Oxen       | Sheep      | Pigs       | Value, £ Sterling |
| Iowa . . . . .         | 1,140,000        | 1,330,000  | 2,580,000  | 480,000    | 5,810,000  | 39,900,000        |
| Illinois . . . . .     | 1,230,000        | 1,070,000  | 1,710,000  | 690,000    | 5,430,000  | 37,400,000        |
| Texas . . . . .        | 1,560,000        | 840,000    | 7,170,000  | 4,750,000  | 2,320,000  | 30,400,000        |

PRODUCT OF MEAT AND TALLOW

| Year | Tons      |             | Value, Million £ Sterling |        |       | Exported Meat, Tons |
|------|-----------|-------------|---------------------------|--------|-------|---------------------|
|      | Meat      | Tallow, &c. | Meat                      | Tallow | Total |                     |
| 1840 | 2,120,000 | 370,000     | 23                        | 6      | 29    | 30,000              |
| 1850 | 2,460,000 | 440,000     | 26                        | 8      | 34    | 75,000              |
| 1860 | 2,970,000 | 530,000     | 52                        | 16     | 68    | 40,000              |
| 1870 | 2,540,000 | 460,000     | 68                        | 14     | 82    | 46,000              |
| 1880 | 4,240,000 | 760,000     | 99                        | 15     | 114   | 550,000             |
| 1886 | 4,750,000 | 880,000     | 140                       | 16     | 156   | 380,000             |

The value of all agricultural products since 1840 is shown as follows :—

|                                | Million £ Sterling |      |      |      |      |      |
|--------------------------------|--------------------|------|------|------|------|------|
|                                | 1840               | 1850 | 1860 | 1870 | 1880 | 1886 |
| Grain . . . . .                | 62                 | 97   | 173  | 194  | 276  | 243  |
| Cotton . . . . .               | 15                 | 18   | 40   | 41   | 59   | 53   |
| Hay . . . . .                  | 20                 | 29   | 33   | 40   | 62   | 74   |
| Potatoes . . . . .             | 8                  | 9    | 10   | 12   | 14   | 16   |
| Tobacco . . . . .              | 4                  | 5    | 4    | 9    | 8    | 8    |
| Vegetables and fruit . . . . . | 16                 | 22   | 29   | 36   | 47   | 57   |
| Meat and tallow . . . . .      | 29                 | 34   | 68   | 82   | 114  | 156  |
| Dairy products . . . . .       | 14                 | 17   | 34   | 41   | 57   | 78   |
| Eggs and poultry . . . . .     | 7                  | 8    | 17   | 20   | 29   | 39   |
| Wool . . . . .                 | 2                  | 3    | 5    | 8    | 12   | 16   |
| Hides, &c. . . . .             | 7                  | 8    | 16   | 19   | 25   | 36   |
| Total . . . . .                | 184                | 250  | 429  | 502  | 703  | 776  |
| Official value . . . . .       | 129                | 208  | 398  | 435  | 461  | 776  |

The difference between my statement of values and the official tables (excepting 1886) can only be explained by supposing that meat, dairy products, poultry, vegetables, &c., were omitted by Census Commissioners. On the other hand, the Commissioner for Agriculture in 1886 has omitted nothing, and I adopt his figures in every item. There is no allowance for forestry, because the Americans do not regard it as an agricultural pursuit.

According to the Census of 1880 it appears that 76 per cent. of all farming hands were males between 16 and 60

years of age. If we suppose the same ratio for previous dates, we find the product per male adult has been as follows :—

| Year | Agricultural Hands | Male Adults | Product, Million £ | Product per Male Adult, £ |
|------|--------------------|-------------|--------------------|---------------------------|
| 1840 | 2,550,000          | 1,935,000   | 184                | 95                        |
| 1850 | 3,311,000          | 2,515,000   | 250                | 99                        |
| 1860 | 4,342,000          | 3,305,000   | 429                | 130                       |
| 1870 | 5,923,000          | 4,500,000   | 502                | 111                       |
| 1880 | 7,671,000          | 5,890,000   | 703                | 119                       |
| 1886 | 9,000,000          | 6,840,000   | 776                | 113                       |

The number of agricultural hands in the above table is based on the Census returns for each date and the Commissioner's estimate in his agricultural report for 1886; but as the Census returns for 1840-60 do not include slaves, I have added for those years 50 per cent. of the adult slaves. It will be seen that the highest product per head was in 1860, although improved machinery has rendered farm labour much more productive in later years. The explanation is that wheat, for example, has fallen 60 cents a bushel, and maize in the same ratio. If prices had remained the same, the average product per head in 1886 would have been £180.

It is not possible to ascertain how the 9,000,000 hands in 1886 were distributed, but if it were in the same ratio as in 1880, the agricultural power of the great divisions of the country would be thus :—

| States                | Agricultural Hands | Male Adults | Product, Millions £ | Product per Male Adult, £ |
|-----------------------|--------------------|-------------|---------------------|---------------------------|
| New England . . . . . | 351,000            | 267,000     | 35                  | 130                       |
| Middle . . . . .      | 981,000            | 745,000     | 123                 | 164                       |
| Southern . . . . .    | 4,220,000          | 3,200,000   | 206                 | 64                        |
| Western . . . . .     | 3,448,000          | 2,628,000   | 412                 | 160                       |
| Union . . . . .       | 9,000,000          | 6,840,000   | 776                 | 113                       |

In Massachusetts, according to the Agricultural Report for 1888, the gross product of land per cultivated acre was, in English money, as follows :—

|                    |    |                   |     |                        |     |
|--------------------|----|-------------------|-----|------------------------|-----|
| Grain . . . . .    | £5 | Onions . . . . .  | £29 | Tobacco . . . . .      | £37 |
| Potatoes . . . . . | 11 | Cabbage . . . . . | 36  | Strawberries . . . . . | 42  |

The value of products consumed at home and exported were :—

| Year | Millions, £ Sterling |          |       | Value Home Consumption £ per Inhab. |
|------|----------------------|----------|-------|-------------------------------------|
|      | Home Consumption     | Exported | Total |                                     |
| 1840 | 167                  | 17       | 184   | 10                                  |
| 1850 | 224                  | 26       | 250   | 10                                  |
| 1860 | 367                  | 62       | 429   | 12                                  |
| 1870 | 420                  | 82       | 502   | 11                                  |
| 1880 | 561                  | 142      | 703   | 11                                  |
| 1886 | 675                  | 101      | 776   | 13                                  |

The principal States in order of production in 1886 were :—

| States       | Value of Product, Million £ Sterling |          |       |               | Ratio |       |
|--------------|--------------------------------------|----------|-------|---------------|-------|-------|
|              | In 1886                              |          |       | Nominal, 1880 | 1880  | 1886  |
|              | Agricultural                         | Pastoral | Total |               |       |       |
| New York     | 28                                   | 31       | 59    | 37            | 8.0   | 7.6   |
| Illinois     | 36                                   | 22       | 58    | 42            | 9.1   | 7.5   |
| Iowa         | 30                                   | 22       | 52    | 28            | 6.1   | 6.8   |
| Ohio         | 27                                   | 23       | 50    | 33            | 7.2   | 6.4   |
| Pennsylvania | 24                                   | 23       | 47    | 27            | 5.9   | 6.0   |
| Indiana      | 24                                   | 17       | 41    | 24            | 5.3   | 5.2   |
| Texas        | 27                                   | 12       | 39    | 13            | 2.8   | 5.0   |
| Missouri     | 19                                   | 14       | 33    | 20            | 4.4   | 4.2   |
| Kansas       | 15                                   | 13       | 28    | 11            | 2.4   | 3.6   |
| Michigan     | 14                                   | 13       | 27    | 19            | 4.2   | 3.5   |
| Wisconsin    | 14                                   | 11       | 25    | 15            | 3.2   | 3.2   |
| Kentucky     | 15                                   | 7        | 22    | 13            | 2.8   | 2.7   |
| California   | 13                                   | 7        | 20    | 13            | 2.8   | 2.6   |
| Tennessee    | 14                                   | 6        | 20    | 13            | 2.8   | 2.6   |
| Other States | 167                                  | 88       | 255   | 153           | 33.0  | 32.9  |
| Total        | 467                                  | 309      | 776   | 461           | 100.0 | 100.0 |

In the above table for 1886 the agricultural values for each State are as set down in the Agricultural Report with 15 per cent. added for unclassified articles, the total, 467 millions sterling, being as given in the report. The pastoral products for each State are based on a medium of the value of dairy products (1880) and the value of cattle (1886).

The values, according to the great divisions of the country, were :—

| States      | Million £ Sterling (1886) |          |       |               | Ratio |       |
|-------------|---------------------------|----------|-------|---------------|-------|-------|
|             | Agricultural              | Pastoral | Total | Nominal, 1880 | 1880  | 1886  |
|             | Agricultural              | Pastoral | Total | Nominal, 1880 |       |       |
| New England | 18                        | 17       | 35    | 23            | 5.0   | 4.5   |
| Middle      | 62                        | 61       | 123   | 77            | 16.5  | 15.7  |
| Southern    | 150                       | 56       | 206   | 131           | 28.5  | 26.5  |
| Western     | 237                       | 175      | 412   | 230           | 50.0  | 53.3  |
| Union       | 467                       | 309      | 776   | 461           | 100.0 | 100.0 |

The product compares with the area of improved lands (1880) thus :—

|             | Acres Improved | Product, £  | Shillings per Acre |
|-------------|----------------|-------------|--------------------|
| New England | 13,000,000     | 35,000,000  | 54                 |
| Middle      | 37,000,000     | 123,000,000 | 66                 |
| Southern    | 82,000,000     | 206,000,000 | 50                 |
| Western     | 153,000,000    | 412,000,000 | 54                 |
| Union       | 285,000,000    | 776,000,000 | 54                 |

| Year | Agricultural Capital, Million £ Sterling |        |          |       | £ per Inhabitant |
|------|------------------------------------------|--------|----------|-------|------------------|
|      | Land                                     | Cattle | Sundries | Total |                  |
| 1790 | 96                                       | 4      | 24       | 124   | 31               |
| 1810 | 200                                      | 10     | 40       | 250   | 47               |
| 1840 | 400                                      | 96     | 100      | 596   | 35               |
| 1850 | 662                                      | 114    | 161      | 937   | 41               |
| 1860 | 1,382                                    | 226    | 237      | 1,845 | 58               |
| 1870 | 1,673                                    | 274    | 294      | 2,241 | 58               |
| 1880 | 2,116                                    | 340    | 518      | 2,974 | 60               |
| 1887 | 2,560                                    | 501    | 635      | 3,696 | 60               |

The above figures are official except as regards 1810 and 1840, also excepting the value of land in 1887, which is put down at 21 per cent. over 1880, because the area of crops is shown by the Commissioner to have risen 21 per cent. between 1880 and 1886.

The value of farms and cattle (without sundries), according to Census reports, was :—

| Year | Million, £ Sterling |        |          |         |       | £ per Inhabitant |        |          |         |       |
|------|---------------------|--------|----------|---------|-------|------------------|--------|----------|---------|-------|
|      | New England         | Middle | Southern | Western | Union | New England      | Middle | Southern | Western | Union |
| 1850 | 88                  | 276    | 245      | 167     | 776   | 32               | 42     | 30       | 30      | 35    |
| 1860 | 113                 | 423    | 538      | 534     | 1,608 | 36               | 51     | 52       | 55      | 52    |
| 1870 | 124                 | 570    | 318      | 935     | 1,947 | 35               | 58     | 28       | 68      | 59    |
| 1880 | 136                 | 560    | 426      | 1,334   | 2,456 | 34               | 44     | 28       | 70      | 49    |

The increase of agricultural capital was as follows :—

| Period   | Increase, Million £ | £ per Annum | Mean Number of Agricultural Males Adults | Increase per Head, £ | Annual Increase per Head, £ |
|----------|---------------------|-------------|------------------------------------------|----------------------|-----------------------------|
| 1841-60  | 1,249               | 62,500,000  | 2,530,000                                | 500                  | 25                          |
| 1861-70  | 396                 | 39,600,000  | 3,880,000                                | 102                  | 10                          |
| 1871-87  | 1,455               | 85,600,000  | 5,710,000                                | 255                  | 15                          |
| 47 years | 3,100               | 65,700,000  | 4,040,000                                | 775                  | 16                          |

It appears from the foregoing statement that the individual gains of those engaged in agriculture were greatest in the period from 1841 to 1860, averaging £25 a year; the war which ensued in 1861 had a depressing effect, the average accumulation falling to £10 a year in the decade ending 1870, but since the latter year there has been a great recovery, the average reaching £15 per head per annum. This was not the annual average of earnings, but of savings, a result unexampled elsewhere.

#### CANADA

The area in acres is as follows :—

| Province             | Population | Acres         | Acres per Inhabitant |
|----------------------|------------|---------------|----------------------|
| Quebec               | 1,360,000  | 121,200,000   | 90                   |
| Ontario              | 1,920,000  | 117,200,000   | 60                   |
| Nova Scotia          | 440,000    | 13,400,000    | 30                   |
| New Brunswick        | 320,000    | 17,300,000    | 54                   |
| Prince Edward Island | 110,000    | 1,300,000     | 12                   |
| Manitoba             | 65,000     | 38,400,000    | 580                  |
| British Columbia     | 50,000     | 217,600,000   | 4,350                |
| North-West Territory | 55,000     | 1,696,000,000 | 30,600               |
| Total                | 4,320,000  | 2,222,400,000 | 510                  |

The above was the population in 1881, but it is now estimated at 5,200,000, showing an average of 430 acres per inhabitant.

Tillage statistics for 1887 were as follows :—

ACREAGE

|                          | Wheat     | Barley  | Oats      | Maize   | Potatoes | Total     |
|--------------------------|-----------|---------|-----------|---------|----------|-----------|
| Ontario . . . . .        | 1,380,000 | 770,000 | 1,680,000 | 160,000 | 140,000  | 4,130,000 |
| Quebec and Coast . . . . | 380,000   | 90,000  | 800,000   | 20,000  | 280,000  | 1,570,000 |
| Manitoba, &c. . . . .    | 870,000   | 100,000 | 260,000   | ...     | 10,000   | 1,240,000 |
| Total . . . . .          | 2,630,000 | 960,000 | 2,740,000 | 180,000 | 430,000  | 6,940,000 |

CROP, TONS

|                          | Wheat   | Barley  | Oats      | Maize   | Potatoes  | Total     |
|--------------------------|---------|---------|-----------|---------|-----------|-----------|
| Ontario . . . . .        | 550,000 | 400,000 | 800,000   | 220,000 | 260,000   | 2,230,000 |
| Quebec and Coast . . . . | 110,000 | 50,000  | 400,000   | 25,000  | 300,000   | 1,485,000 |
| Manitoba, &c. . . . .    | 330,000 | 50,000  | 120,000   | ...     | 60,000    | 560,000   |
| Total . . . . .          | 990,000 | 500,000 | 1,320,000 | 245,000 | 1,220,000 | 4,275,000 |

The above figures for Quebec and Coast Provinces are estimates based on the crops of 1881.  
The statistics of live-stock at various dates were—

|                        | 1834      | 1861       | 1871       | 1881      | 1888       |
|------------------------|-----------|------------|------------|-----------|------------|
| Horses . . . . .       | 192,000   | 710,000    | 860,000    | 1,070,000 | 1,100,000  |
| Cattle . . . . .       | 885,000   | 2,320,000  | 2,690,000  | 3,510,000 | 3,790,000  |
| Sheep . . . . .        | 1,320,000 | 2,550,000  | 3,300,000  | 3,050,000 | 2,602,000  |
| Pigs . . . . .         | ...       | 1,250,000  | 1,410,000  | 1,210,000 | 1,205,000  |
| Total value, £ . . . . | ...       | 24,000,000 | 33,000,000 | ...       | 44,300,000 |

The grain-crops of the Dominion, measured in bushels, were as follows :—

|                  | 1871       | 1881        | 1884        |
|------------------|------------|-------------|-------------|
| Wheat . . . . .  | 17,000,000 | 30,000,000  | 42,000,000  |
| Oats . . . . .   | 46,000,000 | 64,000,000  | 88,000,000  |
| Barley . . . . . | 12,000,000 | 15,000,000  | 22,000,000  |
| Maize . . . . .  | 4,000,000  | 9,000,000   | 14,000,000  |
| Rye, &c. . . . . | 5,000,000  | 6,000,000   | 6,000,000   |
| Total . . . . .  | 84,000,000 | 124,000,000 | 172,000,000 |

In 1852 the total grain crop was 45 million bushels, and potatoes 6 million bushels.

The value of products in 1887 was approximately :—

|                         | Tons      | £          | Sundries     | £          |
|-------------------------|-----------|------------|--------------|------------|
| Wheat . . . . .         | 990,000   | 6,400,000  | Timber . .   | 8,200,000  |
| Oats . . . . .          | 1,320,000 | 5,300,000  | Vegetables . | 2,500,000  |
| Barley . . . . .        | 500,000   | 2,500,000  | Poultry . .  | 2,000,000  |
| Maize . . . . .         | 245,000   | 1,000,000  | Dairy . . .  | 7,500,000  |
|                         |           |            | Meat . . .   | 7,800,000  |
| All grain . . . . .     | 3,055,000 | 15,200,000 | Foals . . .  | 1,100,000  |
| Straw . . . . .         | 3,000,000 | 1,500,000  | Tallow . .   | 1,200,000  |
| Hay . . . . .           | 4,000,000 | 6,000,000  | Hides, . . } | 1,300,000  |
| Potatoes . . . . .      | 1,200,000 | 1,800,000  | wool, &c. }  |            |
| Principal crops . . . . | ...       | 24,500,000 | Sundries . . | 31,600,000 |

|                               |            |
|-------------------------------|------------|
| Agricultural products . . . . | 35,200,000 |
| Animal products . . . . .     | 20,900,000 |
| Total . . . . .               | 56,100,000 |

Ontario has 48 per cent. of the cattle, 48 per cent. of the area (of Canada proper), and produces 65 per cent. of the grain. It may be said to represent 60 per cent. of the agricultural value of the Dominion. Its farms in 1887 covered 11,100,000 acres of cleared land, of which 7,430,000 were under crops. The official valuation for

1887 is as follows, and enables us to give an estimate for the rest of the Dominion :—

|                      | Ontario       | Quebec and Other Provinces | All Canada    |
|----------------------|---------------|----------------------------|---------------|
| Land . . . . .       | £ 130,870,000 | £ 87,230,000               | £ 218,100,000 |
| Buildings . . . . .  | 38,510,000    | 25,690,000                 | 64,200,000    |
| Cattle . . . . .     | 21,700,000    | 22,600,000                 | 44,300,000    |
| Implements . . . . . | 9,320,000     | 6,180,000                  | 15,500,000    |
| Total . . . . .      | 200,400,000   | 141,700,000                | 342,100,000   |

The official valuation of all land occupied as farms in Canada in 1861 amounted to 102 millions sterling. The agricultural capital was approximately as follows :—

|                    | Millions, £ Sterling |      |
|--------------------|----------------------|------|
|                    | 1861                 | 1887 |
| Farms . . . . .    | 102                  | 282  |
| Cattle . . . . .   | 24                   | 44   |
| Sundries . . . . . | 14                   | 36   |
| Total . . . . .    | 140                  | 362  |

This shows an increase of 222 millions sterling in 26 years, equal to £8,500,000 per annum, or one-tenth of the annual average in the United States from 1871 to 1887, the ratio of population being likewise about one-tenth. The relation between agricultural capital and product in Canada in 1861 and 1887 was as follows :—

| Year           | Millions, £ |         | Ratio to Capital |
|----------------|-------------|---------|------------------|
|                | Capital     | Product |                  |
| 1861 . . . . . | 140         | 21      | 15.0             |
| 1887 . . . . . | 362         | 56      | 15.4             |

In the products of Canada the preceding table includes timber, a considerable item, but the United States does not include it as an agricultural product.

NEWFOUNDLAND

There are 47,000 acres under potatoes, turnips, &c. The live-stock consists of 5000 horses, 20,000 cows, 40,000 sheep, and 20,000 pigs.

MEXICO

The Republic has the following area :—

|                               | Acres       |
|-------------------------------|-------------|
| Arable . . . . .              | 34,500,000  |
| Pasture . . . . .             | 298,000,000 |
| Mountain and forest . . . . . | 129,500,000 |
| Total . . . . .               | 462,000,000 |

The crops in 1888 were as follows :—

|                  | Tons      | Value, £   | Sundries             | £         |
|------------------|-----------|------------|----------------------|-----------|
| Maize . . . . .  | 3,200,000 | 16,000,000 | Cotton . . . . .     | 1,600,000 |
| Barley . . . . . | 150,000   | 900,000    | Sugar . . . . .      | 1,300,000 |
| Wheat . . . . .  | 280,000   | 1,800,000  | Coffee . . . . .     | 500,000   |
| Beans . . . . .  | 200,000   | 1,000,000  | Tobacco, &c. . . . . | 900,000   |
| Grain . . . . .  | 3,830,000 | 19,700,000 | Sundries . . . . .   | 4,300,000 |

The live-stock is supposed to number 2,000,000 horses, 2,000,000 sheep, 5,000,000 goats, and 3,000,000 cattle. There are 20,570 cattle farms, valued at 103 millions £ sterling.

CENTRAL AMERICA

The five little Republics have the following area :—

|                      | Acres       | Population | Acres per Inhabitant |
|----------------------|-------------|------------|----------------------|
| Costa Rica . . . . . | 12,800,000  | 200,000    | 64                   |
| Guatemala . . . . .  | 30,300,000  | 1,400,000  | 21                   |
| Honduras . . . . .   | 30,100,000  | 430,000    | 70                   |
| Nicaragua . . . . .  | 31,700,000  | 400,000    | 80                   |
| Salvador . . . . .   | 4,800,000   | 650,000    | 7                    |
| Total . . . . .      | 109,700,000 | 3,080,000  | 36                   |

Guatemala is the most important of these Republics. The products and live-stock are approximately as follows :—

|                  | Crops, Tons |                |                 | Stock, Number |                |
|------------------|-------------|----------------|-----------------|---------------|----------------|
|                  | Guatemala   | Five Republics |                 | Guatemala     | Five Republics |
| Coffee . . . . . | 30,000      | 50,000         | Horses          | 150,000       | 250,000        |
| Sugar . . . . .  | 25,000      | 30,000         | Cows . . . . .  | 490,000       | 1,200,000      |
| Maize . . . . .  | 90,000      | 150,000        | Sheep . . . . . | 460,000       | 700,000        |
| Wheat . . . . .  | 20,000      | 30,000         | Pigs . . . . .  | 190,000       | 300,000        |

The value of live-stock in Guatemala is £3,600,000, and in all five Republics about £7,000,000. Costa Rica crops are valued at £2,400,000. Those of the five Republics may reach £12,000,000. The value of coffee exported is £2,400,000, say 40,000 tons.

VENEZUELA

The area of the Republic is as follows :—

|                        | Acres        |            |             |
|------------------------|--------------|------------|-------------|
|                        | Public Lands | Private    | Total       |
| Agricultural . . . . . | 56,500,000   | 30,900,000 | 87,400,000  |
| Pastoral . . . . .     | 37,900,000   | 63,400,000 | 101,300,000 |
| Forest . . . . .       | 196,400,000  | 3,100,000  | 199,500,000 |
| Total . . . . .        | 290,800,000  | 97,400,000 | 388,200,000 |

The only crop worth notice is coffee, say 60,000 tons, of which two-thirds are exported, to the value of £2,400,000. The live-stock in 1888 was as follows :—

|                           |           |                  |           |
|---------------------------|-----------|------------------|-----------|
| Cattle . . . . .          | 8,480,000 | Pigs . . . . .   | 1,930,000 |
| Sheep and goats . . . . . | 5,730,000 | Horses . . . . . | 750,000   |

The last item includes 1,160,000 mules and asses, counting two mules or four asses as one horse.

COLUMBIA

Formerly known as New Granada, has an area of 320 million acres, or 82 acres per inhabitant. Some coffee is grown.

The live-stock in 1883 was as follows :—

|                  |         |                           |         |
|------------------|---------|---------------------------|---------|
| Cattle . . . . . | 950,000 | Horses . . . . .          | 140,000 |
| Sheep . . . . .  | 40,000  | Mules and asses . . . . . | 110,000 |
| Goats . . . . .  | 610,000 | Pigs . . . . .            | 340,000 |

The only agricultural product exported is coffee, say 3000 tons, valued at £180,000.

ECUADOR

The Republic has an area of 77 million acres, but the extent under cultivation is trifling. Agricultural exports are as follows :—

|                  | Tons   | Value, £ |
|------------------|--------|----------|
| Cocoa . . . . .  | 10,000 | 700,000  |
| Coffee . . . . . | 10,000 | 600,000  |

Besides a small quantity of indiarubber and chinchona. No statistics of cattle.

PERU

The Republic has an area of 295 million acres, or 112 per inhabitant. There are no agricultural statistics. The only agricultural exports are :—

|                  | Tons   | Value, £ |
|------------------|--------|----------|
| Sugar . . . . .  | 20,000 | 360,000  |
| Wool . . . . .   | 3,000  | 220,000  |
| Cotton . . . . . | 4,000  | 200,000  |

This shows how backward is the condition of the country.

BOLIVIA

Area 540 million acres, of which perhaps one million acres are under cultivation. Among agricultural products are chinchona and coca; the latter is a famous drug for enabling travellers to suffer hunger and hardships in so desolate a region. The crop of coca is valued at £360,000. There are 5,000,000 chinchona trees, and the crop of bark averages 90 tons.

CHILE

In 1882 there were 7,010,000 acres under crops, of which 1,100,000 were irrigated. The area of the Republic is 170 million acres, the acreage under crops being only 4 per cent. of the total.

The production of grain has been almost stationary for 30 years, averaging 450,000 tons of wheat and 150,000 of other grain, mostly barley and maize. About two-thirds of the wheat is required for home consumption, and a balance of 150,000 tons is exported. The official statistics of stock are : horses, 450,000 ; cattle, 1,530,000 ; sheep, 2,500,000, representing a value of £7,800,000 sterling.

Some superior wines are grown, the vineyards counting 86 million vines in 1882, and producing 14 million gallons of wine. The official report gives the following :—

|                                 | £         |
|---------------------------------|-----------|
| Agricultural products . . . . . | 6,200,000 |
| Animal products . . . . .       | 3,600,000 |
| Total . . . . .                 | 9,800,000 |

This is, however, much below the reality, which may be estimated thus :—

|                     | Tons       | £         | Sundries            | £         |
|---------------------|------------|-----------|---------------------|-----------|
| Wheat . .           | 450,000    | 3,200,000 | Vegetables .        | 1,500,000 |
| Barley, &c.         | 150,000    | 900,000   | Dairy and poultry } | 2,800,000 |
| Hay and straw }     | 1,000,000  | 2,000,000 | Meat . .            | 2,600,000 |
| Wine, galls.        | 14,000,000 | 1,400,000 | Hides, wool &c. }   | 900,000   |
| Principal crops . } | ...        | 7,500,000 | Sundries .          | 7,800,000 |

£

Agricultural products . . . . . 9,000,000  
 Animal products . . . . . 6,300,000

Total . . . . . 15,300,000

The value of lands under farming was stated in 1882 to be £50,200,000. The total agricultural capital is therefore thus :—

£

Land . . . . . 50,200,000  
 Cattle . . . . . 7,800,000  
 Sundries . . . . . 6,400,000

Total . . . . . 64,400,000

The product is equal to 24 per cent. on capital. The number of men engaged in agriculture was 114,000 in 1865, and 173,000 in 1875. This gives the average of £89 per head.

#### ARGENTINA

The area under crops, from official returns, was as follows :—

| Year           | Acres     | Acres per Inhabitant |
|----------------|-----------|----------------------|
| 1854 . . . . . | 375,000   | 0.4                  |
| 1864 . . . . . | 506,000   | 0.4                  |
| 1874 . . . . . | 825,000   | 0.4                  |
| 1884 . . . . . | 4,260,000 | 1.4                  |
| 1889 . . . . . | 7,430,000 | 2.2                  |

The area under tillage was as follows :—

|                    | Acres   |           |           |
|--------------------|---------|-----------|-----------|
|                    | 1874    | 1884      | 1889      |
| Wheat . . . . .    | 271,000 | 1,717,000 | 2,820,000 |
| Sundries . . . . . | 554,000 | 2,543,000 | 4,610,000 |
| Total . . . . .    | 825,000 | 4,260,000 | 7,430,000 |

The official statements published in May and December 1889 gave the following :—

|                   | Acres     |           |           |                  |           |
|-------------------|-----------|-----------|-----------|------------------|-----------|
|                   | Wheat     | Maize     | Lucerne   | Flax, Sugar, &c. | Total     |
| Buenos Ayres .    | 1,120,000 | 1,750,000 | 250,000   | 300,000          | 3,420,000 |
| Santa Fé . . .    | 1,005,000 | 150,000   | 75,000    | 240,000          | 1,470,000 |
| Entre Rios . .    | 370,000   | 210,000   | 18,000    | 10,000           | 608,000   |
| Cordoba . . . .   | 140,000   | 200,000   | 195,000   | 55,000           | 590,000   |
| Santiago . . . .  | 75,000    | 150,000   | 40,000    | 35,000           | 300,000   |
| Mendoza . . . .   | 17,000    | 8,000     | 175,000   | 24,000           | 224,000   |
| San Juan . . . .  | 30,000    | 8,000     | 140,000   | 22,000           | 200,000   |
| Corrientes . . .  | ...       | 65,000    | 4,000     | 46,000           | 115,000   |
| Catamarca . . .   | 3,000     | 8,000     | 25,000    | 79,000           | 115,000   |
| Other provinces } | 60,000    | 165,000   | 80,000    | 80,000           | 385,000   |
| Total . . . . .   | 2,820,000 | 2,714,000 | 1,002,000 | 891,000          | 7,427,000 |

Tillage has increased rapidly with the influx of Italian and other immigrants. The surplus grain for exportation was as follows :—

| Year              | Tons    |
|-------------------|---------|
| 1878-80 . . . . . | 40,000  |
| 1881-84 . . . . . | 120,000 |
| 1889 . . . . .    | 400,000 |

The last is only an estimate by local writers.

#### CROP.

|                   | Tons.   |         |           |        | Value of all Crops, £ |
|-------------------|---------|---------|-----------|--------|-----------------------|
|                   | Wheat   | Maize   | Lucerne   | Sugar  |                       |
| Buenos Ayres .    | 280,000 | 520,000 | 500,000   | ...    | 6,800,000             |
| Santa Fé . . . .  | 250,000 | 45,000  | 150,000   | 8,000  | 2,800,000             |
| Entre Rios . . .  | 90,000  | 60,000  | 40,000    | ...    | 1,200,000             |
| Cordoba . . . . . | 35,000  | 60,000  | 400,000   | ...    | 1,200,000             |
| Other provinces   | 50,000  | 125,000 | 910,000   | 44,000 | 5,800,000             |
| Total . . . . .   | 705,000 | 810,000 | 2,000,000 | 52,000 | 17,800,000            |

The summary of estimated crops in 1889 was as follows :—

|                    | Quantity  | Value, £   | Acreage   |
|--------------------|-----------|------------|-----------|
| Wheat, tons . . .  | 705,000   | 4,200,000  | 2,800,000 |
| Maize " . . . . .  | 810,000   | 3,200,000  | 2,700,000 |
| Barley " . . . . . | 120,000   | 600,000    | 300,000   |
| Oats " . . . . .   | 40,000    | 200,000    | 100,000   |
| Lucerne " . . . .  | 2,000,000 | 3,500,000  | 1,000,000 |
| Linseed " . . . .  | 40,000    | 300,000    | 200,000   |
| Tobacco " . . . .  | 10,000    | 300,000    | 20,000    |
| Sugar " . . . . .  | 80,000    | 1,200,000  | 90,000    |
| Wine, galls. . . . | 6,500,000 | 700,000    | 70,000    |
| Sundries . . . . . | ...       | 3,600,000  | 147,000   |
| Total . . . . .    | ...       | 17,800,000 | 7,427,000 |

The live-stock shows the following official returns :—

|                  | 1864       | 1884       | 1888       |
|------------------|------------|------------|------------|
| Horses . . . . . | 3,875,000  | 4,186,000  | 4,400,000  |
| Cattle . . . . . | 10,215,000 | 14,171,000 | 22,870,000 |
| Sheep . . . . .  | 23,111,000 | 70,910,000 | 70,450,000 |

The pastoral returns for 1888 showed thus :—

|                    | Cows       | Horses    | Sheep      | Value, £   |
|--------------------|------------|-----------|------------|------------|
| Buenos Ayres .     | 9,600,000  | 1,860,000 | 55,400,000 | 25,700,000 |
| Entre Rios . . .   | 4,100,000  | 720,000   | 4,900,000  | 7,200,000  |
| Santa Fé . . . . . | 2,300,000  | 530,000   | 2,900,000  | 4,300,000  |
| Cordoba . . . . .  | 2,100,000  | 410,000   | 2,400,000  | 3,700,000  |
| Corrientes . . . . | 1,800,000  | 260,000   | 610,000    | 2,900,000  |
| Santiago . . . . . | 590,000    | 110,000   | 780,000    | 1,060,000  |
| San Luis . . . . . | 480,000    | 110,000   | 240,000    | 810,000    |
| Pampas . . . . .   | 470,000    | 110,000   | 1,670,000  | 1,080,000  |
| Catamarca . . . .  | 240,000    | 50,000    | 150,000    | 410,000    |
| Tucuman . . . . .  | 200,000    | 40,000    | 40,000     | 320,000    |
| Mendoza . . . . .  | 180,000    | 45,000    | 120,000    | 320,000    |
| Salta . . . . .    | 160,000    | 30,000    | 160,000    | 290,000    |
| Jujuy . . . . .    | 90,000     | 20,000    | 600,000    | 270,000    |
| Rioja . . . . .    | 160,000    | 25,000    | 60,000     | 180,000    |
| Rio Negro . . . .  | 80,000     | 20,000    | 300,000    | 180,000    |
| San Juan . . . . . | 50,000     | 25,000    | 60,000     | 110,000    |
| Misiones, &c. . .  | 270,000    | 35,000    | 60,000     | 120,000    |
| Total . . . . .    | 22,870,000 | 4,400,000 | 70,450,000 | 48,950,000 |

The sheep-farming industry since 1830 shows as follows :—

| Year     | Sheep, Millions | Wool Export, Million Lbs. | Price of Sheep |
|----------|-----------------|---------------------------|----------------|
| 1830 . . | 3               | 6                         | 15 pence       |
| 1840 . . | 5               | 13                        | 25 "           |
| 1850 . . | 7               | 21                        | 35 "           |
| 1860 . . | 14              | 45                        | 55 "           |
| 1870 . . | 41              | 137                       | 60 "           |
| 1880 . . | 61              | 215                       | 70 "           |
| 1889 . . | 70              | 300                       | 60 "           |

River Plate wool loses 65 per cent. in the washing, the above being wool in the grease ; whereas Australian loses only 44, and Cape wool 30 per cent. In 1882 the live-stock held by Irish settlers was valued at £7,200,000, and that of Scotch at £2,000,000; the land and stock of Irish and Scotch combined was worth 33 millions sterling.

The value of all farm products was approximately :—

|               | Agricultural | Pastoral   | Total      | Per Inhabitant |
|---------------|--------------|------------|------------|----------------|
| Buenos Ayres  | 6,800,000    | 12,400,000 | 19,200,000 | 17.4           |
| Santa Fé .    | 2,800,000    | 2,100,000  | 4,900,000  | 22.3           |
| Entre Rios .  | 1,200,000    | 3,500,000  | 4,700,000  | 26.0           |
| Cordoba .     | 1,200,000    | 1,800,000  | 3,000,000  | 15.1           |
| Corrientes .  | 200,000      | 1,400,000  | 1,600,000  | 8.5            |
| Mendoza .     | 900,000      | 150,000    | 1,050,000  | 14.0           |
| Tucuman .     | 1,500,000    | 150,000    | 1,650,000  | 9.7            |
| San Juan .    | 600,000      | 100,000    | 700,000    | 8.8            |
| Salta . .     | 600,000      | 150,000    | 750,000    | 5.0            |
| Catamarca .   | 200,000      | 200,000    | 400,000    | 4.4            |
| San Luis .    | 200,000      | 400,000    | 600,000    | 8.0            |
| Santiago .    | 200,000      | 500,000    | 700,000    | 4.7            |
| Rioja . .     | 400,000      | 100,000    | 500,000    | 6.1            |
| Jujuy . .     | 400,000      | 100,000    | 500,000    | 8.0            |
| Territories . | 600,000      | 1,150,000  | 1,750,000  | 11.0           |
| Total .       | 17,800,000   | 24,200,000 | 42,000,000 | 14.0           |

The agricultural wealth of the Republic is distributed approximately as follows (1888) :—

|                       | Land        | Cattle     | Sundries   | Total       | Per Inhabitant |
|-----------------------|-------------|------------|------------|-------------|----------------|
| Buenos Ayres . . . .  | 60,200,000  | 25,700,000 | 9,500,000  | 95,400,000  | 87             |
| Santa Fé . . . . .    | 9,000,000   | 4,300,000  | 1,500,000  | 14,800,000  | 67             |
| Entre Rios . . . . .  | 7,800,000   | 7,200,000  | 1,700,000  | 16,700,000  | 92             |
| Cordoba . . . . .     | 5,200,000   | 3,700,000  | 1,000,000  | 9,900,000   | 32             |
| Corrientes . . . . .  | 5,200,000   | 2,900,000  | 900,000    | 9,000,000   | 47             |
| Mendoza . . . . .     | 3,800,000   | 300,000    | 400,000    | 4,500,000   | 60             |
| Tucuman . . . . .     | 2,800,000   | 300,000    | 300,000    | 3,400,000   | 20             |
| San Juan . . . . .    | 2,600,000   | 100,000    | 300,000    | 3,000,000   | 35             |
| Salta . . . . .       | 2,200,000   | 300,000    | 300,000    | 2,800,000   | 18             |
| Catamarca . . . . .   | 2,000,000   | 400,000    | 300,000    | 2,700,000   | 30             |
| San Luis . . . . .    | 1,800,000   | 800,000    | 300,000    | 2,900,000   | 39             |
| Santiago . . . . .    | 1,200,000   | 1,100,000  | 200,000    | 2,500,000   | 17             |
| Rioja . . . . .       | 1,000,000   | 200,000    | 100,000    | 1,300,000   | 16             |
| Jujuy . . . . .       | 600,000     | 300,000    | 100,000    | 1,000,000   | 15             |
| Territories . . . . . | 5,200,000   | 1,400,000  | 700,000    | 7,300,000   | 45             |
| Total . . . . .       | 110,600,000 | 49,000,000 | 17,600,000 | 177,200,000 | 60             |

#### SUMMARY OF PRODUCTS

|                                |              |
|--------------------------------|--------------|
| Crops already enumerated . .   | £ 17,800,000 |
| Wool, 300 million lbs. . . . . | 7,500,000    |
| Meat, 300,000 tons . . . . .   | 6,000,000    |
| Dairy and poultry . . . . .    | 4,000,000    |
| Hides, tallow, &c. . . . .     | 6,700,000    |
| Total . . . . .                | 42,000,000   |

Agricultural wealth has quadrupled since 1857, viz. :—

|                    | Millions £ Sterling |      |
|--------------------|---------------------|------|
|                    | 1857                | 1888 |
| Land . . . . .     | 22                  | 111  |
| Cattle . . . . .   | 18                  | 49   |
| Sundries . . . . . | 4                   | 17   |
| Total . . . . .    | 44                  | 177  |

The product in 1889 was equal to 24 per cent. on capital. In the preceding valuation the unoccupied lands of Gran Chaco, Patagonia, &c., are not included.

#### URUGUAY

This country (sometimes called Banda Oriental) is chiefly pastoral, but tillage has increased notably in the last thirty years.

| Year | Acres under Crop | Grain, Bushels |           |           |
|------|------------------|----------------|-----------|-----------|
|      |                  | Wheat          | Maize     | Total     |
| 1855 | 150,000          | 700,000        | 400,000   | 1,100,000 |
| 1870 | 400,000          | 2,100,000      | 700,000   | 2,800,000 |
| 1883 | 750,000          | 3,500,000      | 1,200,000 | 4,700,000 |
| 1888 | 1,500,000        | 5,000,000      | 2,000,000 | 7,000,000 |

The above figures are official except for 1888, which is a rough estimate. The area is 45 million acres, and more than half the Republic is owned by Europeans. The Contribucion Directa returns give only the *value* of properties held by each nationality, but if we arrange the area on the same basis, we find that the tenure of land is as follows :—

| Nationality          | Landowners | Acres      | Ratio |
|----------------------|------------|------------|-------|
| Natives . . . . .    | 31,000     | 18,700,000 | 41.6  |
| Spaniards . . . . .  | 4,400      | 6,300,000  | 14.0  |
| Italians . . . . .   | 3,900      | 5,700,000  | 12.6  |
| Brazilians . . . . . | 2,200      | 7,400,000  | 16.5  |
| French . . . . .     | 1,600      | 2,900,000  | 6.4   |
| British . . . . .    | 300        | 1,600,000  | 3.5   |
| Various . . . . .    | 4,200      | 2,400,000  | 5.4   |
| Total . . . . .      | 47,600     | 45,000,000 | 100.0 |

The number of landowners is unknown, but supposed to be one-tenth of the population, as in the above table.

# AGRICULTURE

51

# AGRICULTURE

The returns of live-stock were as follows :—

|                    | 1860      | 1887       |
|--------------------|-----------|------------|
| Cattle . . . . .   | 5,220,000 | 6,120,000  |
| Horses . . . . .   | 740,000   | 410,000    |
| Sheep . . . . .    | 2,590,000 | 15,900,000 |
| Value, £ . . . . . | 6,100,000 | 16,800,000 |

Agricultural and pastoral products in 1887 may be summed up thus :—

|                         | Agricultural |           |                    | Pastoral  |
|-------------------------|--------------|-----------|--------------------|-----------|
|                         | Tons         | £         |                    |           |
| Wheat . . . . .         | 140,000      | 900,000   | Wool . . . . .     | 1,800,000 |
| Maize . . . . .         | 50,000       | 200,000   | Meat . . . . .     | 2,700,000 |
| Hay and straw . . . . . | 300,000      | 600,000   | Dairy, &c. . . . . | 700,000   |
| Vegetables, &c. . . . . | ...          | 500,000   | Hides, &c. . . . . | 2,800,000 |
| Total . . . . .         | ...          | 2,200,000 | Total . . . . .    | 8,000,000 |

Agricultural capital is estimated at 53 millions sterling, of which land stands for 34, and cattle for 14 millions. The product is almost 20 per cent. on capital.

## PARAGUAY

Tillage has constituted almost the sole industry from the time of the Jesuit Missions, founded in 1557. The area under plough at the date of the expulsion of the Jesuits in 1767 was about 200,000 acres. A census was taken by President Lopez in 1863, and another in 1881, the country having been in the interim desolated (and all males over ten years killed) by the Brazilian army in the war of 1865-70. The areas under crops were :—

|                           | Acres   |         |
|---------------------------|---------|---------|
|                           | 1863    | 1881    |
| Maize . . . . .           | 349,000 | 206,000 |
| Mandioca . . . . .        | 110,000 | 120,000 |
| Tobacco . . . . .         | 23,000  | 10,000  |
| Sugar . . . . .           | 25,000  | 20,000  |
| Cotton, rice, &c. . . . . | 43,000  | 46,000  |
| Total . . . . .           | 550,000 | 402,000 |

All field-work is done by women, who cultivate 7 acres each. The men collect yerba-maté or Jesuit's tea, mind cattle, and convey the products to market. The soil is so rich that maize yields one hundred-fold, rice two hundred-fold. The ordinary crops are 4 million bushels of maize, 360,000 tons of mandioca, 10,000 tons sugar, 6000 tons tobacco, 300 million oranges, and 24 million lbs. of yerba-maté. The value of products may be summed up thus :—

|                              |             |
|------------------------------|-------------|
| Maize and mandioca . . . . . | £ 1,600,000 |
| Tobacco and sugar . . . . .  | 300,000     |
| Oranges, timber, &c. . . . . | 200,000     |
| Yerba-maté . . . . .         | 400,000     |
| Meat and sundries . . . . .  | 500,000     |
| Total . . . . .              | 3,000,000   |

The statistics of live-stock show 730,000 cattle, 62,000 horses, 32,000 sheep.

The exports consist of 6000 tons yerba-maté, 7000 tons tobacco, 50 million oranges, and 2,000,000 feet of lumber, the whole worth £200,000 sterling. The price of land is from 1s. to 5s. an acre. In 1870 the Government made a general survey of the Republic, the result of which was as follows :—

|                               | Acres      |
|-------------------------------|------------|
| State lands, arable . . . . . | 27,300,000 |
| Mountain and forest . . . . . | 17,500,000 |
| Yerba-maté groves . . . . .   | 3,200,000  |

|                            |            |
|----------------------------|------------|
| All public lands . . . . . | 48,000,000 |
| Private estates . . . . .  | 9,600,000  |

Total area . . . . . 57,600,000

The above is Paraguay proper, not including the Chaco territory on the western side of the Paraguay river.

## BRAZIL

The total area is 2104 million acres, or almost the same as that of the United States. It is made up thus :—

|                        | Millions of Acres |
|------------------------|-------------------|
| Under crops . . . . .  | 20                |
| Forest . . . . .       | 134               |
| Uncultivated . . . . . | 1,950             |
| Total . . . . .        | 2,104             |

The principal products are as follows :—

|                       | Acres      | Crop, Tons | Value of Crop | Value Exported |
|-----------------------|------------|------------|---------------|----------------|
| Coffee . . . . .      | 1,600,000  | 340,000    | 20,000,000    | 14,000,000     |
| Sugar . . . . .       | 300,000    | 330,000    | 5,000,000     | 2,600,000      |
| Cotton . . . . .      | 70,000     | 24,000     | 1,200,000     | 600,000        |
| Tobacco . . . . .     | 60,000     | 30,000     | 1,500,000     | 1,000,000      |
| Yerba-maté . . . . .  | 10,000,000 | 40,000     | 1,100,000     | 600,000        |
| Indiarubber . . . . . | ...        | 6,000      | 1,200,000     | 1,200,000      |
| Total . . . . .       | 12,030,000 | ...        | 30,000,000    | 22,000,000     |

There are no returns of live-stock. The climate is too hot for sheep, and the number of cows and horses is probably about two millions, judging by the export of hides. Official returns give 16 million cows, a gross exaggeration. In 1882 the coffee-fields had 550 million plants, yielding about 1 lb. each, the number of hands being over 300,000 : the crop has since risen to 340,000 tons ; sugar plantations employ 90,000 negroes, cotton 50,000. The above table takes no account of maize or mandioca, large quantities of which are produced to feed the negroes.

Wheat and rice are also grown on a smaller scale. About one million persons altogether are engaged in agriculture, including 90,000 Germans, mostly in Rio Grande do Sul, and an equal number of Italians in San Paulo, Santa Catherina, and other southern provinces. The gross value of all agricultural products is said to average 40 millions sterling per annum.

An able-bodied man can cultivate the following ; that is, any one of these items :—

|                    | Acres | Crop | Value, £ |
|--------------------|-------|------|----------|
| Coffee . . . . .   | 5     | 25   | 50       |
| Sugar . . . . .    | 5     | 100  | 70       |
| Cotton . . . . .   | 7     | 100  | 70       |
| Mandioca . . . . . | 4     | 160  | 80       |

An acre of coffee has 400 trees ; of cotton, 2000 plants. Coffee was first introduced in 1754.

## AUSTRALIA

The several colonies show as follows :—

|                             | Population | Acres         | Acres per Inhabitant |
|-----------------------------|------------|---------------|----------------------|
| New South Wales . . . . .   | 1,086,000  | 198,400,000   | 182                  |
| Victoria . . . . .          | 1,090,000  | 56,300,000    | 52                   |
| Queensland . . . . .        | 390,000    | 427,500,000   | 1,095                |
| South Australia . . . . .   | 310,000    | 578,000,000   | 1,870                |
| New Zealand . . . . .       | 610,000    | 66,600,000    | 109                  |
| Tasmania . . . . .          | 150,000    | 16,600,000    | 111                  |
| Western Australia . . . . . | 40,000     | 624,000,000   | 15,600               |
| Total . . . . .             | 3,676,000  | 1,967,400,000 | 532                  |

Mr. Coghlan's work on Australia shows the progress of tillage from 1861 to 1888 as follows:—

|                         | Acres Cultivated |           |           |            | Acres per 100 Inhabitants |      |       |       |
|-------------------------|------------------|-----------|-----------|------------|---------------------------|------|-------|-------|
|                         | 1861             | 1871      | 1881      | 1888       | 1861                      | 1871 | 1881  | 1888  |
| New South Wales . . . . | 295,000          | 420,000   | 645,000   | 1,000,000  | 86                        | 84   | 85    | 92    |
| Victoria . . . . .      | 420,000          | 930,000   | 1,680,000 | 2,230,000  | 75                        | 130  | 190   | 202   |
| Queensland . . . . .    | 5,000            | 60,000    | 120,000   | 190,000    | 18                        | 52   | 52    | 50    |
| South Australia . . . . | 400,000          | 840,000   | 2,170,000 | 2,340,000  | 320                       | 455  | 805   | 750   |
| New Zealand . . . . .   | 225,000          | 1,110,000 | 4,940,000 | 7,525,000  | 280                       | 440  | 1,020 | 1,250 |
| Tasmania . . . . .      | 245,000          | 310,000   | 350,000   | 460,000    | 280                       | 310  | 305   | 310   |
| Western Australia . . . | 24,000           | 50,000    | 55,000    | 65,000     | 150                       | 200  | 180   | 155   |
| Total . . . . .         | 1,614,000        | 3,720,000 | 9,960,000 | 13,810,000 | 130                       | 186  | 360   | 375   |

|                         | Acres Cultivated |         |          |           |           |           |           |            |
|-------------------------|------------------|---------|----------|-----------|-----------|-----------|-----------|------------|
|                         | 1861             |         |          |           | 1888      |           |           |            |
|                         | Grain            | Hay     | Sundries | Total     | Grain     | Hay       | Sundries  | Total      |

The following table shows in detail the cultivation in 1888:—

|                    | Acres       |           |            |              |            |          |              |
|--------------------|-------------|-----------|------------|--------------|------------|----------|--------------|
|                    | N. S. Wales | Victoria  | Queensland | S. Australia | N. Zealand | Tasmania | W. Australia |
| Wheat . . . . .    | 305,000     | 1,220,000 | 10,000     | 1,605,000    | 360,000    | 40,000   | 30,000       |
| Maize . . . . .    | 165,000     | 5,000     | 85,000     | ...          | 5,000      | ...      | ...          |
| Oats . . . . .     | 7,000       | 200,000   | ...        | 5,000        | 370,000    | 35,000   | 2,000        |
| Barley . . . . .   | 3,000       | 80,000    | ...        | 15,000       | 45,000     | 5,000    | 5,000        |
| Hay . . . . .      | 210,000     | 410,000   | 20,000     | 310,000      | 50,000     | 50,000   | 24,000       |
| Grasses . . . . .  | 200,000     | 185,000   | 5,000      | 25,000       | 6,230,000  | 180,000  | ...          |
| Sundries . . . . . | 110,000     | 130,000   | 70,000     | 380,000      | 465,000    | 150,000  | 4,000        |
| Total . . . . .    | 1,000,000   | 2,230,000 | 190,000    | 2,340,000    | 7,525,000  | 460,000  | 65,000       |

The area and crops of grain were as follows:—

|                  | Acres   |           |           |           | Tons    |         |           |           |
|------------------|---------|-----------|-----------|-----------|---------|---------|-----------|-----------|
|                  | 1861    | 1871      | 1881      | 1888      | 1861    | 1871    | 1881      | 1888      |
| Wheat . . . . .  | 730,000 | 1,380,000 | 3,360,000 | 3,570,000 | 300,000 | 400,000 | 810,000   | 710,000   |
| Maize . . . . .  | 60,000  | 140,000   | 170,000   | 260,000   | 50,000  | 130,000 | 170,000   | 200,000   |
| Oats . . . . .   | 145,000 | 360,000   | 440,000   | 620,000   | 60,000  | 130,000 | 200,000   | 250,000   |
| Barley . . . . . | 30,000  | 60,000    | 105,000   | 160,000   | 15,000  | 30,000  | 50,000    | 80,000    |
| Total . . . . .  | 965,000 | 1,940,000 | 4,075,000 | 4,610,000 | 425,000 | 690,000 | 1,230,000 | 1,240,000 |

The yield of barley from 1861 to 1881 was not ascertained, but the crop averages half a ton per acre, the estimate given above. The following table shows the approximate area and crop of grain from 1830 compared with population, viz. :—

| Year           | Acres, Grain | Crop, Tons | Cwts. per Inhabitant |
|----------------|--------------|------------|----------------------|
| 1830 . . . . . | 50,000       | 20,000     | 4.0                  |
| 1840 . . . . . | 180,000      | 70,000     | 5.6                  |
| 1850 . . . . . | 300,000      | 120,000    | 6.7                  |
| 1861 . . . . . | 965,000      | 425,000    | 6.6                  |
| 1871 . . . . . | 1,940,000    | 690,000    | 7.0                  |
| 1881 . . . . . | 4,075,000    | 1,230,000  | 0.0                  |
| 1888 . . . . . | 4,610,000    | 1,240,000  | 6.6                  |

The acreage of other crops since 1861 is shown thus:—

|                    | Acres   |           |           |           |
|--------------------|---------|-----------|-----------|-----------|
|                    | 1861    | 1871      | 1881      | 1888      |
| Vineyards . . . .  | 6,500   | 16,300    | 14,600    | 26,800    |
| Sugar . . . . .    | ...     | 14,000    | 40,000    | 62,600    |
| Tobacco . . . . .  | 400     | 900       | 3,200     | 6,600     |
| Potatoes . . . . . | 57,000  | 81,000    | 99,000    | 112,000   |
| Hay . . . . .      | 220,000 | 315,000   | 835,000   | 1,074,000 |
| Grasses . . . . .  | 170,000 | 870,000   | 4,360,000 | 6,820,000 |
| Sundries . . . . . | 195,100 | 492,800   | 533,200   | 1,098,000 |
| Total . . . . .    | 649,000 | 1,790,000 | 5,885,000 | 9,200,000 |

The production in 1888 as regards the several Colonies was as follows :—

|                     | Tons            |          |            |                 |             |          |                   | Total     |
|---------------------|-----------------|----------|------------|-----------------|-------------|----------|-------------------|-----------|
|                     | New South Wales | Victoria | Queensland | South Australia | New Zealand | Tasmania | Western Australia |           |
| Wheat . . . . .     | 40,000          | 230,000  | ...        | 170,000         | 240,000     | 20,000   | 10,000            | 710,000   |
| Maize . . . . .     | 140,000         | ...      | 60,000     | ...             | ...         | ...      | ...               | 200,000   |
| Oats . . . . .      | ...             | 50,000   | ...        | ...             | 185,000     | 15,000   | ...               | 250,000   |
| Barley . . . . .    | ...             | 40,000   | ...        | 5,000           | 31,000      | 2,000    | 2,000             | 80,000    |
| All grain . . . . . | 180,000         | 320,000  | 60,000     | 175,000         | 456,000     | 37,000   | 12,000            | 1,240,000 |
| Potatoes . . . . .  | 41,000          | 155,000  | 21,000     | 20,000          | 135,000     | 53,500   | 1,500             | 427,000   |
| Hay . . . . .       | 140,000         | 275,000  | 15,000     | 205,009         | 34,000      | 36,000   | 15,000            | 720,000   |
| Sugar . . . . .     | 5,000           | ...      | 35,000     | ...             | ...         | ...      | ...               | 40,000    |
| Tobacco . . . . .   | 2,800           | 700      | 70         | ...             | ...         | ...      | ...               | 3,570     |

The weight of miscellaneous crops to the acre in 1888 was as follows :—

|                        | Crop       | Per Acre |
|------------------------|------------|----------|
| Wine, galls. . . . .   | 2,800,000  | 104      |
| Sugar, cwts. . . . .   | 800,000    | 13       |
| Tobacco, cwts. . . . . | 70,000     | 11       |
| Potatoes „ . . . . .   | 8,600,000  | 77       |
| Hay „ . . . . .        | 15,000,000 | 14       |

The value of live-stock at various dates was approximately :—

| Year           | £         | Year           | £          |
|----------------|-----------|----------------|------------|
| 1821 . . . . . | 1,500,000 | 1861 . . . . . | 21,000,000 |
| 1842 . . . . . | 7,600,000 | 1888 . . . . . | 67,000,000 |

The pastoral wealth of Australia is of paramount importance, and has doubled since 1871. The following table is official :—

| Year | Horses    | Cows      | Sheep      | Pigs      | Export of Wool, lbs. |
|------|-----------|-----------|------------|-----------|----------------------|
| 1800 | 200       | 1,040     | 6,100      | ...       | ...                  |
| 1810 | 1,130     | 12,440    | 25,900     | 9,540     | ...                  |
| 1821 | 4,560     | 102,900   | 209,100    | 33,900    | ...                  |
| 1842 | 70,600    | 1,015,000 | 6,310,000  | 66,000    | 14,000,000           |
| 1861 | 449,200   | 4,040,000 | 23,700,000 | 280,000   | 70,000,000           |
| 1871 | 782,000   | 4,710,000 | 49,800,000 | 740,000   | 190,000,000          |
| 1881 | 1,249,000 | 8,710,000 | 78,600,000 | 905,000   | 325,000,000          |
| 1888 | 1,504,000 | 9,280,000 | 96,600,000 | 1,140,000 | 553,000,000*         |

In 1888 the distribution of stock was as follows :—

|                             | Horses    | Cattle    | Sheep      | Pigs      | Approximate Value, £ |
|-----------------------------|-----------|-----------|------------|-----------|----------------------|
| New South Wales . . . . .   | 410,000   | 1,620,000 | 46,500,000 | 250,000   | 24,900,000           |
| Victoria . . . . .          | 320,000   | 1,370,000 | 10,820,000 | 245,000   | 12,000,000           |
| Queensland . . . . .        | 380,000   | 4,655,000 | 13,445,000 | 70,000    | 11,700,000           |
| South Australia . . . . .   | 170,000   | 430,000   | 7,150,000  | 170,000   | 4,800,000            |
| New Zealand . . . . .       | 204,000   | 960,000   | 15,120,000 | 340,000   | 11,200,000           |
| Tasmania . . . . .          | 30,000    | 140,000   | 1,430,000  | 40,000    | 1,200,000            |
| Western Australia . . . . . | 40,000    | 95,000    | 2,115,000  | 25,000    | 1,200,000            |
| Total . . . . .             | 1,504,000 | 9,280,000 | 96,580,000 | 1,140,000 | 67,000,000           |

Mr. Coghlan's official estimates of the value of agricultural and pastoral products is as follows for 1888 :—

|                           | Agricultural | Pastoral   | Total      | Per Inhabitant |
|---------------------------|--------------|------------|------------|----------------|
| N. S. Wales . . . . .     | 4,150,000    | 13,060,000 | 17,210,000 | 15.8           |
| Victoria . . . . .        | 7,330,000    | 6,280,000  | 13,610,000 | 12.5           |
| Queensland . . . . .      | 1,845,000    | 6,445,000  | 8,290,000  | 21.2           |
| South Australia . . . . . | 5,200,000    | 2,500,000  | 7,700,000  | 24.8           |
| New Zealand . . . . .     | 6,775,000    | 5,785,000  | 12,560,000 | 20.6           |
| Tasmania . . . . .        | 1,270,000    | 660,000    | 1,930,000  | 13.0           |
| W. Australia . . . . .    | 260,000      | 660,000    | 920,000    | 23.0           |
| Total . . . . .           | 26,830,000   | 35,390,000 | 62,220,000 | 17.1           |

The values of all rural products at various dates were approximately as follows :—

| Year           | Wool       | Sundries   | Total      |
|----------------|------------|------------|------------|
| 1840 . . . . . | 1,400,000  | 2,200,000  | 3,600,000  |
| 1850 . . . . . | 4,500,000  | 3,800,000  | 8,300,000  |
| 1860 . . . . . | 6,600,000  | 13,000,000 | 19,600,000 |
| 1870 . . . . . | 10,200,000 | 19,000,000 | 29,200,000 |
| 1880 . . . . . | 22,000,000 | 34,000,000 | 56,000,000 |
| 1888 . . . . . | 17,200,000 | 45,000,000 | 62,200,000 |

The values of agricultural products are not classified, but seem to have been approximately as in the subjoined table :—

|                                  | Agricultural | Pastoral                         |
|----------------------------------|--------------|----------------------------------|
| Grain . . . . .                  | 8,700,000    | Wool . . . . . 17,100,000        |
| Hay and straw . . . . .          | 2,400,000    | Mutton . . . . . 4,000,000       |
| Potatoes . . . . .               | 1,100,000    | Beef . . . . . 4,000,000         |
| Fruit and vegetables } . . . . . | 2,600,000    | Pork . . . . . 1,200,000         |
| Sugar . . . . .                  | 500,000      | Poultry . . . . . 1,000,000      |
| Wine . . . . .                   | 300,000      | Dairy . . . . . 4,090,000        |
| Tobacco . . . . .                | 100,000      | Foals . . . . . 2,000,000        |
| Clover, &c. . . . .              | 11,130,000   | Hides, tal- low, &c. } 2,000,000 |
| Total . . . . .                  | 26,830,000   | Total . . . . . 35,390,000       |

The total agricultural capital is estimated by Mr. Coghlan at 373 millions sterling. If we suppose it to be distributed in the same ratio as the value of products, the result would be as follows :—

\* This is the equivalent of unwashed wool, but the actual weight exported was less, a portion being washed.

|                             | Agricultural Capital |            |            |             | Ratio |
|-----------------------------|----------------------|------------|------------|-------------|-------|
|                             | Land                 | Cattle     | Sundries   | Total       |       |
| New South Wales . . . . .   | 68,000,000           | 24,900,000 | 10,300,000 | 103,200,000 | 27.5  |
| Victoria . . . . .          | 61,500,000           | 12,000,000 | 8,200,000  | 81,700,000  | 22.0  |
| Queensland . . . . .        | 33,100,000           | 11,700,000 | 5,000,000  | 49,800,000  | 13.4  |
| South Australia . . . . .   | 36,800,000           | 4,800,000  | 4,600,000  | 46,200,000  | 12.4  |
| New Zealand . . . . .       | 56,700,000           | 11,200,000 | 7,500,000  | 75,400,000  | 20.2  |
| Tasmania . . . . .          | 9,200,000            | 1,200,000  | 1,200,000  | 11,600,000  | 3.0   |
| Western Australia . . . . . | 3,800,000            | 1,200,000  | 500,000    | 5,500,000   | 1.5   |
| Total . . . . .             | 269,100,000          | 67,000,000 | 37,300,000 | 373,400,000 | 100.0 |

It would appear, however, that the agricultural capital is much greater than Mr. Coghlan's estimate. In another chapter of his book he shows the wealth of Australia (not including railways or public works) amounted in 1889 to 1136 millions sterling, of which 410 millions belonged to New South Wales, which included 181 millions for land.

In fact, the value of land seems to be 533 millions sterling, and the total agricultural capital as follows:—

|                        | Capital, Millions Sterling |             |       | Product, Millions, £ | Ratio to Capital |
|------------------------|----------------------------|-------------|-------|----------------------|------------------|
|                        | Land                       | Cattle, &c. | Total |                      |                  |
| N. S. Wales . . . . .  | 181                        | 35          | 216   | 17.2                 | 8.0              |
| Victoria . . . . .     | 107                        | 20          | 127   | 13.6                 | 9.3              |
| Queensland . . . . .   | 58                         | 17          | 75    | 8.3                  | 9.0              |
| S. Australia . . . . . | 64                         | 9           | 73    | 7.7                  | 10.6             |
| New Zealand . . . . .  | 100                        | 19          | 119   | 12.6                 | 10.6             |
| Tasmania . . . . .     | 16                         | 2           | 18    | 1.9                  | 10.5             |
| W. Australia . . . . . | 7                          | 2           | 9     | 0.9                  | 10.0             |
| Total . . . . .        | 533                        | 104         | 637   | 62.2                 | 9.8              |

#### CAPE COLONY

Tillage is a secondary industry, the latest returns for 1875 comparing with those for 1865 as follows:—

|                              | 1865      | 1875      |
|------------------------------|-----------|-----------|
| Acres under grain . . . . .  | 387,000   | 465,000   |
| Crop, bushels . . . . .      | 2,440,000 | 4,180,000 |
| Vineyards, acres . . . . .   | 16,000    | 18,000    |
| Yield, galls, wine . . . . . | 3,240,000 | 4,488,000 |

Farms cover an area of 89 million acres, or 67 per cent. of the total, viz.:—

|                         | Acres       |
|-------------------------|-------------|
| Tillage . . . . .       | 800,000     |
| Pasture . . . . .       | 78,000,000  |
| Timber . . . . .        | 10,800,000  |
| Area of farms . . . . . | 89,600,000  |
| Public lands . . . . .  | 45,400,000  |
| Total . . . . .         | 135,000,000 |

The value of all products in 1887 was approximately:—

|                       | Tons    | £         | Sundries               | £         |
|-----------------------|---------|-----------|------------------------|-----------|
| Wheat . . . . .       | 100,000 | 700,000   | Wine . . . . .         | 300,000   |
| Barley . . . . .      | 15,000  | 100,000   | Fruit, &c. . . . .     | 500,000   |
| Oats . . . . .        | 25,000  | 150,000   | Dairy and } . . . . .  | 1,000,000 |
| Maize, &c. . . . .    | 100,000 | 550,000   | poultry } . . . . .    |           |
| All grain . . . . .   | 240,000 | 1,500,000 | Meat . . . . .         | 2,000,000 |
| Straw . . . . .       | 200,000 | 100,000   | Wool . . . . .         | 1,700,000 |
| Grain crops . . . . . | ...     | 1,600,000 | Feathers, } . . . . .  | 1,100,000 |
|                       |         |           | hides, &c. } . . . . . |           |
|                       |         |           | Sundries . . . . .     | 6,600,000 |

Returns of live-stock were as follows:—

| Year | Horses  | Cattle    | Sheep      | Pigs    | Goats     | Ostriches |
|------|---------|-----------|------------|---------|-----------|-----------|
| 1840 | 57,000  | 307,000   | 2,340,000  | ...     | 394,000   | ...       |
| 1865 | 227,000 | 690,000   | 9,840,000  | 79,000  | ...       | ...       |
| 1875 | 241,000 | 1,330,000 | 11,280,000 | 130,000 | 2,790,000 | 22,200    |
| 1889 | 295,000 | 1,505,000 | 14,410,000 | 140,000 | 5,140,000 | 149,500   |

|                                 |             |
|---------------------------------|-------------|
| Agricultural products . . . . . | £ 2,400,000 |
| Animal products . . . . .       | 5,800,000   |

Total . . . . . 8,200,000

The value of the farms may be roughly estimated at 42 millions sterling; product, 19 per cent. on capital.

#### NATAL

This colony comprises 12,780,000 acres, viz.:—

| Held by                     | Acres     |
|-----------------------------|-----------|
| European settlers . . . . . | 8,000,000 |
| Kaffirs . . . . .           | 2,000,000 |
| British Crown . . . . .     | 2,780,000 |

Total . . . . . 12,780,000

The area under tillage (chiefly sugar) is as follows:—

| Farms of            | Acres   |
|---------------------|---------|
| Europeans . . . . . | 66,000  |
| Kaffirs . . . . .   | 175,000 |

Total . . . . . 241,000

The returns of live-stock show thus:—

|                  | Owned by  |         |         |
|------------------|-----------|---------|---------|
|                  | Europeans | Kaffirs | Total   |
| Horses . . . . . | 23,000    | 31,000  | 54,000  |
| Cows . . . . .   | 165,000   | 447,000 | 612,000 |
| Sheep . . . . .  | 448,000   | 36,000  | 484,000 |
| Goats . . . . .  | 56,000    | 251,000 | 307,000 |

#### ORANGE FREE STATE

Area, 26,600,000 acres—say, 450 per inhabitant. There are 6000 cattle-farms, occupying 23,600,000 acres—say, 4000 each. They have 130,000 horses, 460,000 cattle, 5,050,000 sheep, 670,000 goats, and 2200 ostriches. Tillage, 115,000 acres.

#### MAURITIUS

A small island, only 450,000 acres, sugar being the principal crop. The industry rose rapidly till 1877, and is now declining, viz.:—

| Year           | Acres under Sugar | Tons Exported |
|----------------|-------------------|---------------|
| 1814 . . . . . | 2,000             | 500           |
| 1836 . . . . . | 57,000            | 30,000        |
| 1877 . . . . . | 160,000           | 136,000       |
| 1887 . . . . . | ...               | 95,000        |

Timber is also produced, especially ebony.

## CEYLON

Official returns are as follows :—

|                     | Acreage   |              | Stock   |
|---------------------|-----------|--------------|---------|
| Rice . . . . .      | 740,000   | Horses . . . | 4,000   |
| Cocoa-nuts . . .    | 630,000   | Cattle . . . | 950,000 |
| Tea . . . . .       | 200,000   | Sheep . . .  | 46,000  |
| Coffee . . . . .    | 100,000   | Goats . . .  | 88,000  |
| Sundries . . . . .  | 444,000   |              |         |
| Area cultivated . . | 2,114,000 |              |         |

The cultivated area is about 13 per cent. of the total, which is 16,230,000 acres. Among the crops of minor extent are chinchona 3400, tobacco 16,000, cinnamon 36,000 acres. The coffee plantations have been ravaged by an insect called Hemileia. New products have therefore been called into requisition.

The exports of 1887 compare with those of 1873 thus :—

|                     | 1873    | 1887    | Value in 1887 |
|---------------------|---------|---------|---------------|
|                     | Tons    | Tons    | £             |
| Coffee . . . . .    | 49,500  | 9,000   | 900,000       |
| Chinchona . . . . . | ...     | 6,400   | 190,000       |
| Tea . . . . .       | ...     | 5,500   | 660,000       |
| Cinnamon . . . . .  | 10,500  | 18,400  | 80,000        |
| Oil, cwts . . . . . | 110,000 | 310,000 | 320,000       |

Many of the farms are owned by English settlers, who number 4000 in the island.

## INDIA

The area in acres and the population in 1881 were :—

|                       | Acres         | Population  | Acres per Inhabitant |
|-----------------------|---------------|-------------|----------------------|
| Bengal . . . . .      | 100,200,000   | 66,700,000  | 1.5                  |
| Bombay . . . . .      | 70,400,000    | 16,500,000  | 4.9                  |
| Madras . . . . .      | 90,850,000    | 31,300,000  | 2.9                  |
| Assam . . . . .       | 28,650,000    | 4,900,000   | 6.4                  |
| Punjab . . . . .      | 95,600,000    | 18,900,000  | 3.6                  |
| Oudh . . . . .        | 15,300,000    | 11,800,000  | 1.3                  |
| N. W. Provinces . .   | 57,100,000    | 32,300,000  | 1.6                  |
| Central Provinces . . | 74,200,000    | 9,800,000   | 5.5                  |
| Berar, &c. . . . .    | 12,400,000    | 3,300,000   | 4.4                  |
| Upper Burmah . . .    | 128,000,000   | 5,000,000   | 25.6                 |
| Lower Burmah . . .    | 57,500,000    | 3,700,000   | 18.0                 |
| British India . . .   | 730,200,000   | 204,200,000 | 3.4                  |
| Hydrabad . . . . .    | 52,500,000    | 9,800,000   | 5.4                  |
| Rajpoot . . . . .     | 83,200,000    | 10,300,000  | 8.1                  |
| Baroda . . . . .      | 5,500,000     | 2,200,000   | 2.5                  |
| Mysore . . . . .      | 15,900,000    | 4,200,000   | 3.8                  |
| Various . . . . .     | 168,900,000   | 28,700,000  | 6.0                  |
| Feudatories . . . .   | 326,000,000   | 55,200,000  | 5.9                  |
| All India . . . . .   | 1,056,200,000 | 259,400,000 | 3.9                  |

There are no late statistics available for Bengal. The cultivated area of the other provinces was as follows in 1888 :—

|                        | Acres      |            |             |           |            |             |
|------------------------|------------|------------|-------------|-----------|------------|-------------|
|                        | Rice       | Wheat      | Other Grain | Cotton    | Sundries   | Total       |
| Bombay . . . . .       | 2,170,000  | 2,410,000  | 17,130,000  | 2,870,000 | 1,990,000  | 26,570,000  |
| Madras . . . . .       | 6,290,000  | 20,000     | 13,970,000  | 1,460,000 | 2,140,000  | 23,880,000  |
| Assam . . . . .        | 1,240,000  | ...        | 50,000      | ...       | 380,000    | 1,670,000   |
| Punjab . . . . .       | 730,000    | 6,640,000  | 12,160,000  | 640,000   | 1,340,000  | 21,510,000  |
| Oudh . . . . .         | 2,220,000  | 1,550,000  | 6,140,000   | 80,000    | 520,000    | 10,510,000  |
| North-West Provinces . | 3,930,000  | 3,460,000  | 17,550,000  | 1,450,000 | 2,010,000  | 28,400,000  |
| Central Provinces . .  | 3,710,000  | 4,740,000  | 4,060,000   | 590,000   | 1,490,000  | 14,590,000  |
| Berar, &c. . . . .     | 100,000    | 1,070,000  | 2,920,000   | 1,940,000 | 640,000    | 6,670,000   |
| Lower Burmah . . . .   | 3,850,000  | ...        | 10,000      | 10,000    | 50,000     | 3,920,000   |
| Total . . . . .        | 24,240,000 | 19,890,000 | 73,990,000  | 9,040,000 | 10,560,000 | 137,720,000 |

The wheat area of Bengal is supposed to be about 7,000,000 acres, bringing up the total to nearly 27 millions. The crops which are included above as "Sundries" are :—

|                        | Acres     |           |         |         |         |         |
|------------------------|-----------|-----------|---------|---------|---------|---------|
|                        | Oil-Seed  | Sugar     | Coffee  | Tea     | Indigo  | Tobacco |
| Bombay . . . . .       | 1,810,000 | 80,000    | ...     | ...     | 5,000   | 90,000  |
| Madras . . . . .       | 1,510,000 | 50,000    | 60,000  | 5,000   | 500,000 | 85,000  |
| Assam . . . . .        | 150,000   | 20,000    | ...     | 210,000 | ...     | ...     |
| Punjab . . . . .       | 820,000   | 370,000   | ...     | 10,000  | 75,000  | 65,000  |
| Oudh . . . . .         | 260,000   | 230,000   | ...     | ...     | 20,000  | 10,000  |
| North-West Provinces . | 700,000   | 960,000   | ...     | 10,000  | 300,000 | 40,000  |
| Central Provinces . .  | 1,420,000 | 50,000    | ...     | ...     | ...     | 20,000  |
| Berar, &c. . . . .     | 610,000   | ...       | 290,000 | ...     | ...     | 20,000  |
| Lower Burmah . . . .   | 20,000    | 10,000    | ...     | ...     | ...     | 20,000  |
| Total . . . . .        | 7,300,000 | 1,770,000 | 350,000 | 235,000 | 900,000 | 350,000 |

If we suppose the working agricultural population to be 20 per cent. of the total, the average product of each man's labour in British India will be found as follows :—25 bushels grain, 24 bushels rice, 2½ lbs. cotton, 2½ lbs. tea, 34 lbs. jute, 2½ lbs. coffee, 5 oz. opium, 6 lbs. sugar, 50 lbs. oil-seed, which, with indigo, tobacco, and other products, bring up the average value to £8 sterling per head. Adding animal products, the total will be £10 per head.

The following statement for 1888 gives a comprehensive view :—

|                                | Acres       |                           |               |            |             |
|--------------------------------|-------------|---------------------------|---------------|------------|-------------|
|                                | Under Crops | Available for Cultivation | Not Available | Forest     | Total       |
| Bombay . . . . .               | 26,350,000  | 14,770,000                | 8,450,000     | 5,880,000  | 55,450,000  |
| Madras . . . . .               | 23,330,000  | 13,320,000                | 12,480,000    | 9,370,000  | 58,500,000  |
| Assam . . . . .                | 1,700,000   | 660,000                   | 9,340,000     | 1,900,000  | 13,600,000  |
| Punjab . . . . .               | 20,590,000  | 27,560,000                | 12,110,000    | 4,620,000  | 64,880,000  |
| Oudh . . . . .                 | 8,830,000   | 3,850,000                 | 2,250,000     | 570,000    | 15,500,000  |
| North-West Provinces . . . . . | 25,240,000  | 10,290,000                | 6,700,000     | 5,220,000  | 47,450,000  |
| Central Provinces . . . . .    | 14,140,000  | 8,910,000                 | 7,380,000     | 12,810,000 | 43,240,000  |
| Berar, &c. . . . .             | 6,780,000   | 2,110,000                 | 3,280,000     | 930,000    | 13,100,000  |
| Lower Burmah . . . . .         | 4,270,000   | 23,750,000                | 24,530,000    | 3,260,000  | 55,810,000  |
| Total . . . . .                | 131,230,000 | 105,220,000               | 86,520,000    | 44,560,000 | 367,530,000 |

The aggregate area of the above States is 502 million acres, from which it appears that 135 million acres have not yet been classified as suitable or not for cultivation. The above table is, moreover, irrespective of Bengal and Upper Burmah, the total area of British India, as already shown, being 730 million acres. The following table shows the area of lands irrigated, of lands cultivated without irrigation, of lands uncultivated, and the extent of each Province :—

|                                | Acres      |               |                  |              |             |
|--------------------------------|------------|---------------|------------------|--------------|-------------|
|                                | Irrigated  | Not Irrigated | Crops and Fallow | Uncultivated | Total       |
| Bombay . . . . .               | 2,420,000  | 31,980,000    | 34,400,000       | 36,000,000   | 70,400,000  |
| Madras . . . . .               | 6,230,000  | 22,070,000    | 28,300,000       | 62,550,000   | 90,850,000  |
| Assam . . . . .                | ...        | 2,350,000     | 2,350,000        | 26,300,000   | 28,650,000  |
| Punjab . . . . .               | 6,090,000  | 18,610,000    | 24,700,000       | 70,900,000   | 95,600,000  |
| Oudh . . . . .                 | 2,470,000  | 6,830,000     | 9,300,000        | 6,000,000    | 15,300,000  |
| North-West Provinces . . . . . | 6,210,000  | 21,290,000    | 27,500,000       | 29,600,000   | 57,100,000  |
| Central Provinces . . . . .    | 500,000    | 15,000,000    | 15,500,000       | 58,700,000   | 74,200,000  |
| Berar, &c. . . . .             | 1,000,000  | 7,050,000     | 8,050,000        | 4,350,000    | 12,400,000  |
| Lower Burmah . . . . .         | ...        | 4,700,000     | 4,700,000        | 52,800,000   | 57,500,000  |
| Total . . . . .                | 24,920,000 | 129,880,000   | 154,800,000      | 347,200,000  | 502,000,000 |

Including Bengal, but not Upper Burmah, the products of British India may be estimated as follows (1888) :—

|                           | Product, Tons | Value, £    | Export, Tons | Value, £   |
|---------------------------|---------------|-------------|--------------|------------|
| Wheat . . . . .           | 6,800,000     | 54,400,000  | 700,000      | 5,600,000  |
| Rice . . . . .            | 24,200,000    | 145,000,000 | 1,400,000    | 9,300,000  |
| Cotton . . . . .          | 410,000       | 21,000,000  | 270,000      | 14,400,000 |
| Tea . . . . .             | 45,000        | 5,800,000   | 40,000       | 5,300,000  |
| Jute . . . . .            | 630,000       | 8,000,000   | 480,000      | 6,100,000  |
| Coffee . . . . .          | 40,000        | 4,000,000   | 15,000       | 1,500,000  |
| Opium . . . . .           | 6,000         | 12,000,000  | 5,000        | 10,000,000 |
| Sugar . . . . .           | 100,000       | 1,100,000   | 60,000       | 600,000    |
| Oil-seeds . . . . .       | 900,000       | 10,500,000  | 800,000      | 9,400,000  |
| Various grain } . . . . . | 18,500,000    | 92,500,000  | ...          | ...        |
| Total . . . . .           | ...           | 354,300,000 | ...          | 62,200,000 |

The above values, being computed by the Custom-House in rupees at 24d., are nominal; from each item should be deducted 25 per cent. to get a fair value.

The exports of wheat and rice showed thus :—

| Wheat, Annual Average |         |                   | Rice, Annual Average |           |                   |
|-----------------------|---------|-------------------|----------------------|-----------|-------------------|
| Period                | Tons    | Official Value, £ | Period               | Tons      | Official Value, £ |
| 1873-76               | 72,000  | 600,000           | 1851-60              | 420,000   | 1,800,000         |
| 1877-81               | 190,000 | 1,600,000         | 1861-64              | 990,000   | 3,500,000         |
| 1882-85               | 900,000 | 7,550,000         | 1873-80              | 1,010,000 | 6,400,000         |
| 1886-88               | 950,000 | 7,400,000         | 1881-88              | 1,380,000 | 8,600,000         |

There are statistics for live-stock for the following provinces, but not for Bengal, Assam, or Central Provinces :—

|                          | Cows       | Buffaloes  | Horses  | Mules, &c. | Sheep and Goats |
|--------------------------|------------|------------|---------|------------|-----------------|
| Bombay . . . . .         | 6,480,000  | 1,770,000  | 140,000 | ...        | 3,220,000       |
| Madras . . . . .         | 9,080,000  | 2,450,000  | 40,000  | 105,000    | 9,580,000       |
| Punjab . . . . .         | 9,120,000  | 2,550,000  | 210,000 | 460,000    | 6,160,000       |
| Oudh . . . . .           | 5,520,000  | 1,070,000  | 125,000 | 60,000     | 1,700,000       |
| N. W. Prov . . . . .     | 13,120,000 | 3,120,000  | 325,000 | 270,000    | 4,540,000       |
| Berar, &c. . . . .       | 1,850,000  | 360,000    | 40,000  | 25,000     | 650,000         |
| Lower Burmah } . . . . . | 920,000    | 660,000    | 10,000  | ...        | 20,000          |
| Total . . . . .          | 46,090,000 | 11,980,000 | 890,000 | 920,000    | 25,870,000      |

Including the provinces for which we have no returns, it may be estimated that the total live-stock of India is as follows :—

|                     |            |                    |            |
|---------------------|------------|--------------------|------------|
| Cows . . . . .      | 57,600,000 | Mules, &c. . . . . | 1,150,000  |
| Buffaloes . . . . . | 15,000,000 | Sheep . . . . .    | 13,500,000 |
| Horses . . . . .    | 1,100,000  | Goats . . . . .    | 19,000,000 |

The value of all products may be roughly estimated as follows :—

|                                 |               |
|---------------------------------|---------------|
| Agricultural products . . . . . | £ 320,000,000 |
| Animal products . . . . .       | 80,000,000    |
| Total . . . . .                 | 400,000,000   |

## JAVA

This island is mostly in the hands of a company founded by the King of Holland in 1824; paid-up capital, £3,200,000. There are 18 million inhabitants, who are 'exploited' by the Dutch, yielding a net tribute of 3 millions sterling per annum. Governor Vanden Bosch planted 50 million coffee-trees in 1834, and the industry has thriven.

The goods annually sold by the Java Company at Amsterdam are:—

|                                | Value, £  |
|--------------------------------|-----------|
| Coffee, 100,000 tons . . . . . | 3,300,000 |
| Sugar, 220,000 „ . . . . .     | 4,000,000 |
| Spices, &c. . . . .            | 700,000   |

Total . . . . . 8,000,000

No statistics are published of the area under crops. Tillage is compulsory in the various villages, the Dutch fixing the price that they pay for each product.

The area under tillage in 1887 compared with 1881 as follows:—

|                    | Acres     |           |
|--------------------|-----------|-----------|
|                    | 1881      | 1887      |
| Rice . . . . .     | 4,100,000 | 5,100,000 |
| Maize . . . . .    | 800,000   | 1,600,000 |
| Sugar . . . . .    | 52,000    | 105,000   |
| Tobacco . . . . .  | 190,000   | 185,000   |
| Cotton . . . . .   | 25,000    | 42,000    |
| Beans . . . . .    | 280,000   | 390,000   |
| Sandries . . . . . | 953,000   | 1,078,000 |
| Total . . . . .    | 6,400,000 | 8,500,000 |

The improvement is mainly due to the new agrarian law, giving settlers a squatter's tenure for seventy-five years. Besides the lands held by the Dutch Company, there were in 1886 the following estates:—

|                     | No. | Acres     | Average, Acres |
|---------------------|-----|-----------|----------------|
| Europeans . . . . . | 121 | 1,980,000 | 16,500         |
| Chinese . . . . .   | 229 | 710,000   | 3,100          |
| Malays, &c. . . . . | 55  | 42,000    | 730            |
| Total . . . . .     | 405 | 2,732,000 | 6,800          |

The area under sugar was as follows:—

| Year           | Acres   |               |        |
|----------------|---------|---------------|--------|
|                | Company | Private Lands | Total  |
| 1879 . . . . . | 70,000  | 8,000         | 78,000 |
| 1887 . . . . . | 25,000  | 46,000        | 71,000 |

The production of chinchona was as follows:—

| Year           | Tons    |         |       |
|----------------|---------|---------|-------|
|                | Company | Private | Total |
| 1882 . . . . . | 126     | 48      | 174   |
| 1886 . . . . . | 263     | 672     | 935   |

The crops of 1886 also comprised 80,000 tons coffee, 300,000 tons sugar, 12,000 tons tobacco, 700 tons indigo, and 3400 tons tea.

## JAPAN

The area may be described as follows:—

|                      | Acres      |            |            |                    | Acres      |
|----------------------|------------|------------|------------|--------------------|------------|
|                      | Public     | Private    | Total      |                    |            |
| Open . . . . .       | 29,780,000 | 2,960,000  | 32,740,000 | Rice . . . . .     | 6,460,000  |
| Cultivated . . . . . | ...        | 11,500,000 | 11,500,000 | Grain, &c. . . . . | 4,110,000  |
| Forest . . . . .     | 16,900,000 | 18,300,000 | 35,200,000 | Pasture . . . . .  | 33,630,000 |

| Tea . . . . .       | ...       | 25,000    | ...            |

## WEST INDIES, BRITISH

The islands and the colony of Guiana on the mainland show approximately as follows:—

## ACRES

|                           | Sugar   | Sundries  | Culti- vated | Unculti- vated | Area       |
|---------------------------|---------|-----------|--------------|----------------|------------|
| Jamaica . . . . .         | 35,000  | 565,000   | 600,000      | 2,100,000      | 2,700,000  |
| Trinidad . . . . .        | 50,000  | 680,000   | 730,000      | 370,000        | 1,100,000  |
| Small islands } . . . . . | 80,000  | 520,000   | 600,000      | 3,800,000      | 4,400,000  |
| Guiana . . . . .          | 80,000  | 80,000    | 160,000      | 69,840,000     | 70,000,000 |
| Total . . . . .           | 245,000 | 1,845,000 | 2,090,000    | 76,110,000     | 78,200,000 |

The sugar crop of the islands has fluctuated thus:—

| Year           | Tons    | Year           | Tons    |
|----------------|---------|----------------|---------|
| 1824 . . . . . | 400,000 | 1877 . . . . . | 160,000 |
| 1830 . . . . . | 220,000 | 1887 . . . . . | 220,000 |

Jamaica is capable of producing much more than it does, not quite one-fourth of the island being cultivated.

The rice crop averages 5 million tons, of which 400,000 are used for making Sake beer, 150,000 for confectionery, and the rest for food. A bushel of rice produces 10 gallons of Sake, the quantity produced being about 160 million gallons yearly. There are 266 great land-lords, called Daimios, who have rent-rolls from £15,000 a year upwards. They own most of Japan, and have 893,000 tenants. The value of the crops is approximately as follows: rice, £30,000,000; wheat, £17,200,000; other grain, £6,700,000; tea, £2,700,000; sugar and sundries, £1,400,000; making a total of 58 millions sterling for 13 million acres under crops.

The area under all crops and the production of sugar compare thus with population :—

|                    | Popula-<br>tion | Tillage   |                     | Sugar   |                        |
|--------------------|-----------------|-----------|---------------------|---------|------------------------|
|                    |                 | Acres     | Per In-<br>habitant | Tons    | Lbs. per<br>Inhabitant |
| Jamaica .          | 600,000         | 600,000   | 1.0                 | 40,000  | 150                    |
| Trinidad .         | 180,000         | 730,000   | 5.1                 | 70,000  | 800                    |
| Small<br>islands } | 510,000         | 600,000   | 1.2                 | 110,000 | 500                    |
| Guiana .           | 280,000         | 160,000   | 0.6                 | 140,000 | 1,100                  |
| Total .            | 1,570,000       | 2,090,000 | 1.3                 | 360,000 | 500                    |

SPANISH WEST INDIES

The possessions are now reduced to two islands, viz :—

|              | Acres      | Population | Acres per<br>Inhabitant | Sugar<br>Crop, Tons |
|--------------|------------|------------|-------------------------|---------------------|
| Cuba . . .   | 30,700,000 | 1,020,000  | 30                      | 580,000             |
| Porto Rico . | 2,400,000  | 640,000    | 4                       | 120,000             |
| Total .      | 33,100,000 | 1,660,000  | 20                      | 700,000             |

Cuba is naturally a productive island, one-half larger than Ireland, but ruined by misgovernment and taxation. A rebellion, which lasted ten years, was put down in 1878, after one-third of the sugar estates had been burnt, reducing the number from 1190 to 700. The Census of 1880 showed 192 coffee estates, 700 sugar plantations, 4500 vegas or tobacco-fields, 3200 potreros or cattle farms, and 17,000 small farms and plantations.

The export of sugar has been :—

| Year              | Tons    |
|-------------------|---------|
| 1833 . . . . .    | 90,000  |
| 1869-73 . . . . . | 660,000 |
| 1874-78 . . . . . | 580,000 |
| 1880-86 . . . . . | 540,000 |

The tobacco crop averages 20,000 tons, value 5 millions sterling, sugar being worth about 10 millions. The total value of products is over 20 millions.

Porto Rico, about the size of Corsica, suffers in a less degree than Cuba from exorbitant export duties.

The crops average :—

|                   | Tons    | Value, £  |
|-------------------|---------|-----------|
| Sugar . . . . .   | 120,000 | 1,500,000 |
| Coffee . . . . .  | 20,000  | 1,200,000 |
| Tobacco . . . . . | 10,000  | 500,000   |
| Total . . . . .   | ...     | 3,200,000 |

The area under crops is less than one-fourth of the island. Cattle-farms also cover a portion.

CANARY ISLANDS

Another Spanish colony, backward owing to misgovernment. The islands are :—

|                       | Acres     | Population | Acres per<br>Inhabitant |
|-----------------------|-----------|------------|-------------------------|
| Teneriffe . . . . .   | 680,000   | 94,000     | 7                       |
| Grand Canary . . .    | 580,000   | 69,000     | 8                       |
| Palma . . . . .       | 160,000   | 31,000     | 5                       |
| Other islands . . . . | 380,000   | 43,000     | 9                       |
| Total . . . . .       | 1,700,000 | 237,000    | 7                       |

Most of the soil is barren, official returns showing only 450,000 acres under cultivation. The value of the farms in 1860 was assessed at 13 millions sterling; that of the wine and grain crops, £400,000. The crops averaged 6

million gallons of wine, 800,000 bushels of grain, 40,000 tons of potatoes, and 6 million lbs. cochineal.

PHILIPPINE ISLANDS

Also Spanish, and badly governed. There are 10 large and 970 small islands, with an aggregate area of 85 million acres, of which 5 per cent. is cultivated.

Luzon has 2,670,000 acres, the other islands 1,780,000, under tillage, viz :—

|                        | Acres     | Crops            |
|------------------------|-----------|------------------|
| Rice . . . . .         | 3,140,000 | 60,000,000 bush. |
| Sugar . . . . .        | 640,000   | 450,000 tons     |
| Hemp . . . . .         | 260,000   | ...              |
| Tobacco, coffee, &c. . | 410,000   | ...              |
| Total . . . . .        | 4,450,000 | ...              |

About one-third of the sugar is exported, besides 10,000 tons of tobacco. Coffee was first planted in 1836, and the crop now reaches 60,000 tons. There are 160 sugar-estates with steam-mills. The canals made by the Jesuits have been suffered to fill up.

ALCOHOL

The degrees in wines and liquors are :—

|                    |      |                     |      |                    |      |
|--------------------|------|---------------------|------|--------------------|------|
| Beer . . . . .     | 4.0  | Gooseberry . . . .  | 11.8 | Ratafia . . . . .  | 21.0 |
| Porter . . . . .   | 4.5  | Champagne . . . . . | 12.2 | Madeira . . . . .  | 21.0 |
| Ale . . . . .      | 7.4  | Claret . . . . .    | 13.3 | Port . . . . .     | 23.2 |
| Cider . . . . .    | 8.6  | Burgundy . . . . .  | 13.6 | Curacao . . . . .  | 27.0 |
| Perry . . . . .    | 8.8  | Malaga . . . . .    | 17.3 | Aniseed . . . . .  | 33.0 |
| Elder . . . . .    | 9.3  | Lisbon . . . . .    | 18.5 | Maraschino . . . . | 34.0 |
| Moselle . . . . .  | 9.6  | Canary . . . . .    | 18.8 | Chartreuse . . . . | 43.0 |
| Tokay . . . . .    | 10.2 | Sherry . . . . .    | 19.0 | Gin . . . . .      | 51.6 |
| Rhine . . . . .    | 11.0 | Vermouth . . . . .  | 19.0 | Brandy . . . . .   | 53.4 |
| Orange . . . . .   | 11.2 | Cape . . . . .      | 19.2 | Rum . . . . .      | 53.7 |
| Bordeaux . . . . . | 11.5 | Malmsey . . . . .   | 19.7 | Irish whisky . . . | 53.9 |
| Hock . . . . .     | 11.6 | Marsala . . . . .   | 20.2 | Scotch whisky . .  | 54.3 |

Spirits are said to be "proof" when they contain 57 per cent. The maximum amount of alcohol, says Parkes, that a man takes daily without injury to his health is that contained in 2 oz. brandy,  $\frac{1}{2}$  pint of sherry,  $\frac{1}{2}$  pint claret, or 1 pint of beer.

ALCOHOLIC DRINKS

The consumption of all kinds of liquor is as follows :—

|                     | Millions of Gallons |                   |                                      | Gallons per Inhab. |                   |         |                          |
|---------------------|---------------------|-------------------|--------------------------------------|--------------------|-------------------|---------|--------------------------|
|                     | Wine                | Beer and<br>Cider | Spirits<br>All Reduced<br>to Alcohol | Wine               | Beer and<br>Cider | Spirits | Equivalent<br>in Alcohol |

| Canada . . . . .    | 3                   | 40                | 5                                    | 5                  | 0.6               | 8.0     | 1.0                      |
| Australia . . . . . | 2                   | 40                | 3                                    | 4                  | 0.6               | 12.0    | 1.0                      |
| Total . . . . .     | 2,017               | 3,685             | 426                                  | 605                | 5.0               | 8.8     | 1.1                      |

The value of liquor consumed may be summed up as follows:—

|                                   | Million £ |
|-----------------------------------|-----------|
| 2,007 million gallons wine (20d.) | 167       |
| 3,685 „ „ beer, &c. (16d.)        | 240       |
| 420 „ „ spirits (48d.)            | 85        |
| Total                             | 492       |

#### LIQUOR CONSUMPTION IN UNITED KINGDOM PER ANNUM

| Year      | Millions of Gallons |                |         |                       | Gallons per Inhabitant |                |         |                       |
|-----------|---------------------|----------------|---------|-----------------------|------------------------|----------------|---------|-----------------------|
|           | Wine                | Beer and Cider | Spirits | Equivalent in Alcohol | Wine                   | Beer and Cider | Spirits | Equivalent in Alcohol |
| 1700-20   | 3                   | 390            | 3       | 21                    | 0.3                    | 43             | 0.3     | 2.32                  |
| 1720-50   | 3                   | 530            | 6       | 30                    | 0.3                    | 53             | 0.6     | 3.00                  |
| 1760-80   | 4                   | 560            | 4       | 31                    | 0.3                    | 51             | 0.3     | 2.76                  |
| 1790-1800 | 6                   | 370            | 6       | 23                    | 0.4                    | 27             | 0.4     | 1.63                  |
| 1810-20   | 6                   | 490            | 10      | 31                    | 0.3                    | 26             | 0.5     | 1.61                  |
| 1830-50   | 6                   | 670            | 23      | 47                    | 0.2                    | 26             | 0.9     | 1.79                  |
| 1850-70   | 11                  | 810            | 28      | 57                    | 0.3                    | 27             | 1.0     | 1.91                  |
| 1871-80   | 16                  | 1,005          | 34      | 70                    | 0.5                    | 30             | 1.0     | 2.10                  |
| 1886-88   | 14                  | 1,020          | 34      | 71                    | 0.4                    | 27             | 0.9     | 1.88                  |

On this subject G. R. Porter (1843) gives good reasons that the consumption of alcohol affords no evidence as to intemperance. This is confirmed by the fact that, although convictions for drunkenness per 1000 inhabitants are much higher in Ireland than in England, the consumption of alcohol is one-third less. The consumption of liquor in 1885 was as follows:—

|                       | Gallons, Millions |          |         |                | Gallons per Inhabitant |          |         |                |
|-----------------------|-------------------|----------|---------|----------------|------------------------|----------|---------|----------------|
|                       | England           | Scotland | Ireland | United Kingdom | England                | Scotland | Ireland | United Kingdom |
| Beer                  | 880               | 48       | 80      | 1,008          | 32                     | 16       | 16      | 28             |
| Cider                 | 12                | ...      | ...     | 12             | 0.4                    | ...      | ...     | 0.3            |
| Spirits               | 23                | 7        | 5       | 35             | 0.8                    | 1.9      | 1.0     | 0.9            |
| Wine                  | 12                | 1        | 1       | 14             | 0.5                    | 0.5      | 0.2     | 0.4            |
| Equivalent in alcohol | 59                | 6        | 7       | 72             | 2.13                   | 1.60     | 1.40    | 2.00           |

See *Beer, Cider, Spirits, Wine*, under their proper titles.

#### UNITED STATES

The returns of the Excise Department show consumption as follows:—

| Year | Million Gallons |      |      |                       | Gallons per Inhabitant |      |      |                       |
|------|-----------------|------|------|-----------------------|------------------------|------|------|-----------------------|
|      | Spirits         | Wine | Beer | Equivalent in Alcohol | Spirits                | Wine | Beer | Equivalent in Alcohol |
| 1840 | 43              | 6    | 23   | 24                    | 2.5                    | 0.3  | 1.4  | 1.38                  |
| 1850 | 52              | 6    | 37   | 29                    | 2.2                    | 0.3  | 1.6  | 1.24                  |
| 1860 | 90              | 11   | 101  | 52                    | 2.9                    | 0.4  | 3.2  | 1.70                  |
| 1870 | 80              | 12   | 204  | 50                    | 2.1                    | 0.3  | 5.3  | 1.38                  |
| 1880 | 64              | 28   | 413  | 58                    | 1.2                    | 0.6  | 8.3  | 1.14                  |
| 1889 | 81              | 34   | 780  | 87                    | 1.3                    | 0.5  | 13.0 | 1.31                  |

The above does not include cider, the consumption of which may reach 20 million gallons yearly, or one-third of a gallon per head. This would make the total consumption of alcohol about 1.34 per inhabitant, against 1.88 in the United Kingdom.

#### FRANCE

The annual consumption of wine, beer, and spirits has been as follows:—

| Year    | Million Gallons |      |         |                       | Gallons per Inhabitant |      |         |                       |
|---------|-----------------|------|---------|-----------------------|------------------------|------|---------|-----------------------|
|         | Wine            | Beer | Spirits | Equivalent in Alcohol | Wine                   | Beer | Spirits | Equivalent in Alcohol |
| 1810-12 | 447             | 56   | 7       | 52                    | 16                     | 2    | 0.3     | 1.80                  |
| 1830-32 | 484             | 62   | 8       | 55                    | 16                     | 2    | 0.3     | 1.80                  |
| 1840-42 | 766             | 96   | 11      | 88                    | 23                     | 3    | 0.4     | 2.50                  |
| 1850-52 | 882             | 110  | 14      | 101                   | 25                     | 3    | 0.4     | 2.70                  |
| 1860-62 | 655             | 140  | 19      | 83                    | 18                     | 4    | 0.5     | 2.10                  |
| 1870-72 | 940             | 155  | 22      | 113                   | 25                     | 5    | 0.6     | 2.80                  |
| 1880-82 | 805             | 190  | 34      | 107                   | 21                     | 6    | 0.9     | 2.60                  |
| 1886-88 | 750             | 200  | 40      | 105                   | 19                     | 6    | 1.1     | 2.50                  |

The above does not include cider, of which 200 million gallons are consumed yearly. See *Wine, Beer, &c.*

The French Government publishes the following table of the production and consumption of alcohol:—

| Year | Gallons Produced | Value, £  | Pence per Gallon | Gallons Consumed | Gallons per Inhabitant |
|------|------------------|-----------|------------------|------------------|------------------------|
| 1850 | 20,700,000       | 2,150,000 | 25               | 12,800,000       | 0.32                   |
| 1860 | 19,100,000       | 2,870,000 | 36               | 18,700,000       | 0.50                   |
| 1870 | 27,300,000       | 2,840,000 | 25               | 19,400,000       | 0.51                   |
| 1880 | 34,800,000       | 4,480,000 | 31               | 28,800,000       | 0.80                   |
| 1885 | 40,900,000       | 3,580,000 | 21               | 31,700,000       | 0.85                   |

#### EXPENDITURE ON ALCOHOLIC LIQUORS

|                    | Millions Sterling |      |       |         |       | Amount per Inhabitant |
|--------------------|-------------------|------|-------|---------|-------|-----------------------|
|                    | Wine              | Beer | Cider | Spirits | Total |                       |
| United Kingdom     | 3                 | 68   | 1     | 7       | 79    | £ s. d.<br>2 2 0      |
| France             | 63                | 13   | 8     | 8       | 92    | 2 8 0                 |
| Germany            | 10                | 59   | ...   | 12      | 81    | 1 14 0                |

| Sweden and Norway  | 1                 | 3    | ...   | 6       | 10    | 1 9 0                 |
| Belgium            | 1                 | 11   | ...   | 2       | 14    | 2 7 0                 |
| Holland            | 1                 | 3    | ...   | 2       | 6     | 1 7 0                 |
| United States      | 3                 | 42   | 1     | 19      | 65    | 1 1 0                 |
| Total              | 177               | 223  | 10    | 79      | 489   | 1 5 0                 |

The foregoing values are "in bond," that is, in first hands, and exclusive of duties, which come under the head of taxation. See *Wine, Beer, Drunkenness*.

#### AMPHITHEATRES

The first, of stone, was built by Statilius for the Emperor Augustus, in the Campus Martius, Rome. The Colosseum, begun by Vespasian, was finished by Titus, A.D. 80, and held 100,000 spectators.

The dimensions of the principal amphitheatres were:—

|           |                |
|-----------|----------------|
| Colosseum | 615 x 510 feet |
| Verona    | 513 x 410 "    |
| Vienne    | 508 x 436 "    |
| Pozzuoli  | 480 x 382 "    |
| Arles     | 460 x 338 "    |
| Limoges   | 450 x 378 "    |
| Nismes    | 437 x 332 "    |
| Pompeii   | 430 x 335 "    |

The height ranged from 60 to 100 feet, except the Colosseum, which was 164 feet high.

## ANATOMY

**Blood.**—An adult has ordinarily 28 lbs. of blood, and at each pulsation the heart sends 10 lbs. through the veins and arteries. The pulsations are 120 per minute in infancy, 80 in manhood, 60 in old age, and rather more in women than in men.

The components of human blood are:—

|                     | Man   | Woman |
|---------------------|-------|-------|
| Water . . . . .     | 77.8  | 79.6  |
| Albumen . . . . .   | 6.2   | 6.4   |
| Colour . . . . .    | 14.1  | 12.2  |
| Saline, &c. . . . . | 1.9   | 1.8   |
|                     | 100.0 | 100.0 |

Human blood compares with that of the brute creation as follows:—

|                         | Man   | Ox    | Sheep | Dog   | Pig   | Chicken |
|-------------------------|-------|-------|-------|-------|-------|---------|
| Chlor. of sod. . . . .  | 58.5  | 46.7  | 57.1  | 50.5  | 41.3  | 50.3    |
| Soda . . . . .          | 4.2   | 21.9  | 13.3  | 3.9   | 7.6   | 14.3    |
| Potash . . . . .        | 12.0  | 7.0   | 5.3   | 17.2  | 22.2  | 4.4     |
| Lime . . . . .          | 1.7   | 0.8   | 1.0   | 0.4   | 1.2   | 1.0     |
| Magnesia . . . . .      | 1.0   | 0.4   | 0.3   | 2.5   | 1.2   | 0.8     |
| Oxide of iron . . . . . | 8.3   | 7.0   | 8.7   | 10.7  | 9.1   | 9.1     |
| Phosph. acid. . . . .   | 10.2  | 4.2   | 5.2   | 12.8  | 12.3  | 13.4    |
| Sulph. . . . .          | 1.7   | 1.2   | 1.7   | 1.4   | 1.7   | 4.1     |
| Carbon . . . . .        | 1.2   | 6.0   | 7.0   | 0.5   | 0.7   | ...     |
| Sundries . . . . .      | 1.2   | 4.8   | 0.4   | 0.1   | 2.7   | 2.6     |
| Total . . . . .         | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0   |

The temperature of human blood averages as follows (Fahrenheit):—

|                       |       |                       |       |
|-----------------------|-------|-----------------------|-------|
| Good health . . . . . | 98.6  | Strong fever, morning | 102.2 |
| Fever . . . . .       | 101.3 | " " afternoon         | 104.0 |

The following table shows the temperature of man compared with some of the brute creation:—

|                    |      |                   |       |
|--------------------|------|-------------------|-------|
| Snail . . . . .    | 76   | Cat . . . . .     | 102   |
| Oyster . . . . .   | 82   | Ox . . . . .      | 102   |
| Man . . . . .      | 98.6 | Monkey . . . . .  | 104.5 |
| Horse . . . . .    | 99.5 | Sheep . . . . .   | 104.5 |
| Porpoise . . . . . | 100  | Hog . . . . .     | 105   |
| Rat . . . . .      | 102  | Chicken . . . . . | 111   |

The quantity of iron in blood is shown thus:—

|               | Grammes per Ton | Ox. per Cwt. |                | Grammes per Ton | Ox. per Cwt. |
|---------------|-----------------|--------------|----------------|-----------------|--------------|
| Man . . . . . | 510             | 0.91         | Pig . . . . .  | 590             | 1.06         |
| Ox . . . . .  | 560             | 1.00         | Frog . . . . . | 420             | 0.75         |

According to the *Dic. Sci. Med.*, the dimensions of the globules of blood, in parts of a millimetre, are:—

|                 |      |                    |      |
|-----------------|------|--------------------|------|
| Goat . . . . .  | 0043 | Ape . . . . .      | 0071 |
| Sheep . . . . . | 0048 | Duck . . . . .     | 0074 |
| Horse . . . . . | 0055 | Man . . . . .      | 0077 |
| Ox . . . . .    | 0058 | Fish . . . . .     | 0084 |
| Pig . . . . .   | 0063 | Elephant . . . . . | 0095 |
| Hare . . . . .  | 0070 | Tortoise . . . . . | 0117 |
| Goose . . . . . | 0070 | Frog . . . . .     | 0133 |
| Dog . . . . .   | 0070 | Snake . . . . .    | 0188 |

A human adult has half an ounce of sugar in his blood, which is proportionately more than a sheep and less than a cow.

**Brain.**—The latest classification of races, according to Bastian and other experts, shows weight of brain as follows:—

|                   | Oz.  |                     | Oz.  |
|-------------------|------|---------------------|------|
| Scotch . . . . .  | 50.0 | Pawnees . . . . .   | 47.1 |
| Germans . . . . . | 49.6 | Italians . . . . .  | 46.9 |
| English . . . . . | 49.5 | Hindoo . . . . .    | 45.1 |
| French . . . . .  | 47.9 | Gypsy . . . . .     | 44.8 |
| Zulus . . . . .   | 47.5 | Bushmen . . . . .   | 44.6 |
| Chinese . . . . . | 47.2 | Esquimaux . . . . . | 43.9 |

\* For a complete alphabetical list, see *Animals*.

Compared with size of body, the brain of the Esquimaux is as heavy as the Scotchman's.

The measurement of that part of the skull which holds the brain is stated in cubic inches thus:—

|                       |     |                             |    |
|-----------------------|-----|-----------------------------|----|
| Anglo-Saxon . . . . . | 105 | Ancient Egyptian . . . . .  | 93 |
| German . . . . .      | 105 | Hottentot . . . . .         | 58 |
| Negro . . . . .       | 96  | Australian native . . . . . | 58 |

In all races the male brain is about 10 per cent. heavier than the female. The highest class of apes has only 16 oz. of brain.

After the age of 50 the brain loses an ounce every 10 years. Cuvier's weighed 64, Byron's 79, and Cromwell's 90 ounces, but the last was diseased. Post-mortem examinations in France give an average of 55 to 60 ounces for the brains of the worst class of criminals.

**Hair.**—The number of hairs on an adult's head usually ranges from 129,000 to 150,000.

## Nervous System

|                      | Infants | Youths | Adults | Aged Persons | Idiots |
|----------------------|---------|--------|--------|--------------|--------|
| Water . . . . .      | 82.8    | 74.3   | 72.5   | 73.9         | 70.9   |
| Albumen . . . . .    | 7.0     | 10.2   | 9.4    | 8.6          | 8.4    |
| Fat . . . . .        | 3.5     | 5.3    | 6.1    | 4.3          | 5.0    |
| Salts, &c. . . . .   | 5.9     | 8.6    | 10.2   | 12.2         | 14.8   |
| Phosphorus . . . . . | 0.8     | 1.6    | 1.8    | 1.0          | 0.9    |
| Total . . . . .      | 100.0   | 100.0  | 100.0  | 100.0        | 100.0  |

**Respiratory System.**—The quantity of carbonic acid exhaled in twenty-four hours is as follows:—

| Person          | Age | Oz. Exhaled | Person        | Age | Oz. Exhaled |
|-----------------|-----|-------------|---------------|-----|-------------|
| Girl . . . . .  | 10  | 9           | Boy . . . . . | 16  | 16          |
| Boy . . . . .   | 10  | 10          | Man . . . . . | 28  | 17          |
| Woman . . . . . | 19  | 12          |               |     |             |

The quantity varies according to exertion, viz.:—

|                                 | Oz. per Hour |                     | Oz. per Hour |
|---------------------------------|--------------|---------------------|--------------|
| Sleeping . . . . .              | 0.6          | Riding . . . . .    | 4.0          |
| Walking 2 miles per hr. . . . . | 2.1          | Swimming . . . . .  | 4.4          |
| " 3 " " " . . . . .             | 3.0          | Treadmill . . . . . | 5.5          |

**Sight.**—Experiments for the British Association, in 1889, gave the following result:—

|             | Judgment of Eye in<br>Dividing a Line<br>into Halves |         | Judgment of Eye in<br>Estimating an Angle<br>of 90 Degrees |         |
|-------------|------------------------------------------------------|---------|------------------------------------------------------------|---------|
|             | Males                                                | Females | Males                                                      | Females |
| Correct . . | 35.6                                                 | 45.5    | 63.0                                                       | 33.7    |
| Incorrect . | 64.4                                                 | 54.5    | 37.0                                                       | 66.3    |
| Total       | 100.0                                                | 100.0   | 100.0                                                      | 100.0   |

The colour of the eyes was as follows:—

|                  | Males | Females |
|------------------|-------|---------|
| Light . . . . .  | 44.6  | 34.2    |
| Medium . . . . . | 43.1  | 45.1    |
| Dark . . . . .   | 12.3  | 20.7    |
| Total . . . . .  | 100.0 | 100.0   |

**Sleep.**—The *Dic. Sci. Med.* mentions many cases of forty days and upwards.

**Sweat.**—It has been analysed by Funke and Schottin thus:—

|                        | Funke   | Schottin |
|------------------------|---------|----------|
| Water . . . . .        | 98.84   | 97.74    |
| Salt . . . . .         | 44      | 70       |
| Other solids . . . . . | 72      | 1.56     |
| Total . . . . .        | 100.000 | 100.000  |

Krause says an adult perspires 800 grammes, that is, 28 oz. in twenty-four hours. Funke states the quantity of sweat thrown off by an adult as follows:—

| Temperature, Shade (Fahr.) | Condition                 | Oz. per Hour | Percentage of Solid Matter |
|----------------------------|---------------------------|--------------|----------------------------|
| 64                         | Walking in a room . .     | 1.2          | 2.56                       |
| 68                         | Walking in a room . .     | 1.7          | 1.70                       |
| 66                         | Walking quickly in a room | 2.6          | 1.17                       |
| 55                         | Walking out of doors . .  | 4.7          | 0.79                       |
| 80                         | Walking in the sun . .    | 11.3         | 0.84                       |
| 77                         | Running in the sun . .    | 13.7         | 0.82                       |
| 88                         | Running in the sun . .    | 18.0         | 0.86                       |

*Urine.*—Harley says that the urine of males and females, age 25, weight 154 lbs., will be found to average thus, in grammes:—

|                        | Men  | Women |
|------------------------|------|-------|
| Organic matter . . .   | 36.6 | 31.5  |
| Inorganic matter . . . | 16.4 | 13.5  |

The temperature is the same as that of the blood. The composition varies with race, viz.:—

|                   | Grammes              |
|-------------------|----------------------|
| French . . . . .  | 39.5 of solid matter |
| English . . . . . | 53.0 " "             |
| German . . . . .  | 67.8 " "             |

A man in good health, weight 140 lbs., secretes 49 oz. in twenty-four hours; a woman 35 oz. Children emit 50 per cent. more for their weight than adults. Food has a direct influence. Lehmann says that 100 oz. of animal food, such as eggs, give 97 oz. of urine, and 100 oz. of vegetable food only 74 of urine.

*Weight.*—Banting gives the following scale of normal weights for height:—

| Inches | Lbs. | Inches | Lbs. | Inches | Lbs. | Inches | Lbs. |
|--------|------|--------|------|--------|------|--------|------|
| 61 ... | 120  | 64 ... | 136  | 67 ... | 148  | 70 ... | 169  |
| 62 ... | 126  | 65 ... | 142  | 68 ... | 155  | 71 ... | 174  |
| 63 ... | 133  | 66 ... | 145  | 69 ... | 162  | 72 ... | 178  |

Detailed tables on this subject will be found under *Anthropometry*.

## ANIMALS

The temperature of the animal creation, in Fahrenheit, is as follows:—

|                    |                      |                    |
|--------------------|----------------------|--------------------|
| Ape . . . . . 104  | Guinea-pig . . . 100 | Porpoise . . . 100 |
| Bat . . . . . 100  | Hare . . . . . 100   | Rabbit . . . 100   |
| Cat . . . . . 102  | Hen . . . . . 108    | Rat . . . . . 102  |
| Chicken . . . 111  | Hog . . . . . 105    | Serpent . . . 88   |
| Crow . . . . . 109 | Horse . . . . . 99   | Shark . . . . 77   |
| Dog . . . . . 102  | Jackal . . . 101     | Sheep . . . 104    |
| Donkey . . . 98    | Jackdaw . . . 107    | Snail . . . . . 76 |
| Duck . . . . . 111 | Man . . . . . 99     | Sparrow . . . 108  |
| Elephant . . 100   | Monkey . . . 104     | Squirrel . . . 102 |
| Elk . . . . . 103  | Ox . . . . . 102     | Tiger . . . . . 99 |
| Fox . . . . . 102  | Oyster . . . . 82    | Turkey . . . 109   |
| Glow-worm . . 74   | Panther . . . 102    | Woodcock . . 108   |
| Goat . . . . . 104 | Parrot . . . 106     | Wolf . . . . . 105 |
| Goose . . . . 107  | Petrel . . . . 104   | ...                |
| Guinea-fowl . 111  | Pigeon . . . 109     | ...                |

A draught horse usually weighs 1100 lbs.

The period of gestation among animals is as follows:—

| Days        | Days        | Days        | Days         |
|-------------|-------------|-------------|--------------|
| Rabbit . 30 | Pig . 120   | Bear . 180  | Mare . 342   |
| Cat . 55    | Lion . 150  | Monkey 210  | Camel . 365  |
| Dog . 63    | Sheep . 150 | Cow . 282   | Ass . 385    |
| Wolf . 90   | Goat . 153  | Buffalo 308 | Elephant 730 |

The longest span of life belongs to whales, say 500 years; eagles, say 200; alligators about 300, and elephants

from 100 upwards. The age of toads is said often to exceed any of the foregoing.

|                  | Weight (Lbs.) | Years of Life |                  | Weight (Lbs.) | Years of Life |
|------------------|---------------|---------------|------------------|---------------|---------------|
| Rabbit . . . . . | 5             | 5             | Cow . . . . .    | 750           | 25            |
| Dog . . . . .    | 40            | 15            | Ox . . . . .     | 900           | 25            |
| Sheep . . . . .  | 70            | 12            | Horse . . . . .  | 1,000         | 27            |
| Pig . . . . .    | 160           | 10            | Camel . . . . .  | 1,200         | 40            |
| Lion . . . . .   | 500           | 40            | Elephant . . . . | 6,000         | 100           |

The limits of animal life are not precisely fixed. Hooker found animal life in thermal springs of 208 Fahr., that is, 4 degrees below boiling-point; and again at minus 70° centigrade, equal to 92 degrees below zero Fahrenheit.

*Ape.*—The cranium compares with that of man in dimensions as follows (man 100):—

|                   |                 |                     |
|-------------------|-----------------|---------------------|
| Male gorilla . 35 | Male orang . 29 | Male chimpanze . 28 |
| Female gorilla 31 | Female orang 28 | Female chimpanze 27 |

*Camel.*—A camel has twice the carrying power of an ox; with a load of 400 lbs. he can travel twelve or fourteen days without water, going forty miles a day. They are fit to work at five years old, but their strength begins to decline at twenty-five, and they live till forty. The Tartars have herds of 1000 or more. The patriarch Job had 3000. The Timbuctoo or Meharri breed is used only for couriers, going 800 miles in eight days, with a meal of dates or grain at nightfall. Napoleon conveyed 1500 infantry on camels across the desert from Cairo to St. Jean d'Acre. The caravans from Berber to Suakim use camels carrying 600 lbs., which travel three miles an hour, and earn one penny (English) per mile. These camels are sold from £5 to £20 each; very fine ones fetch up to £40 sterling.

*Cat.*—The number of cats in the United Kingdom is fully seven millions, although a remarkable decrease has been noticed in seaports, owing to exportation. They came into England before the Conquest, for the tariff of indemnity, in the 10th century, valued them at twopence, being equal to two hens or two gallons of beer. Southey mentions that the first settlers in Brazil paid £300 for a cat, and for kittens, their weight in gold-dust. An offer of £500 for a Persian cat at the Sydenham Cat Show in 1869 was refused.

### Dogs

|                       | Number Licensed | Per 1000 Inhabitants |
|-----------------------|-----------------|----------------------|
| Great Britain . . . . | 1,128,000       | 38                   |
| Ireland . . . . .     | 368,000         | 73                   |
| France . . . . .      | 2,864,000       | 75                   |
| Germany . . . . .     | 1,432,000       | 31                   |
| Sweden . . . . .      | 513,000         | 11                   |

The largest known is a St. Bernard dog, Plinlimmon, exhibited at Birmingham 1886: weight, 214 lbs.; height, 35 inches at shoulder.

Sheep-dogs are not taxed in the United Kingdom, and the total number of dogs in the kingdom is at least 2,000,000, say 55 per 1000 inhabitants, worth £800,000. It is found that 100 male dogs go mad as compared with 14 female. A dog accidentally locked up at Metz passed thirty-nine days without food, and recovered.

The number of hunting dogs in the United Kingdom is as follows:—

|                     | England | Ireland | Scotland | United Kingdom |
|---------------------|---------|---------|----------|----------------|
| Stag-hounds . . . . | 604     | 246     | ...      | 850            |
| Fox-hounds . . . .  | 12,865  | 1,522   | 660      | 15,048         |
| Harriers . . . . .  | 3,258   | 1,516   | ...      | 4,774          |
| Beagles . . . . .   | 448     | ...     | 74       | 522            |
| Total . . . . .     | 17,176  | 3,284   | 734      | 21,194         |

The weight of brain in drachms is as follows:—

|                  |                    |                  |
|------------------|--------------------|------------------|
| Sheep-dog . 29.5 | Retriever . . 25.7 | Greyhound . 23.4 |
| Fox-hound . 29.2 | Collie . . . 25.4  | Terrier . . 20.0 |
| Setter . . 26.1  | Bulldog . . 24.0   | Spaniel . . 18.1 |
| Mastiff . . 26.1 | Newfoundland 24.0  | Lapdog . . 18.0  |

As compared with the above, the wolf has 42, the jackal 15, the fox 13, and some classes of apes 120 drachms.

**Elephant.**—The ivory found on an ordinary elephant is 120 lbs., worth £60, and it is necessary to kill 12,000 yearly to supply 650 tons of ivory to the English market, of which Sheffield consumes one-third. A tusk weighing 162 lbs. was shown at London in 1851, but Gordon Cumming since got one of 173 lbs. Tame elephants have risen in price in India, from £45 in 1835, ranging at present between £150 and £800.

The demand for ivory threatens to exterminate elephants in Africa. Stanley calculates the consumption of ivory at 75,000 lbs. a year in Europe, 13,000 in India, and 7000 in United States; that is, 95,000 lbs. a year.

**Kangaroo.**—In 1888 the total number in Australia was 1,170,000, having diminished notably in the last ten years. A kangaroo consumes as much grass as six sheep; for this reason the farmers destroy them.

**Llamas.**—There are four millions in Peru, mostly employed as beasts of burden. The skin weighs 6 lbs., gives 18 feet of leather, and is worth 20s.

**Reindeer.**—Official returns are:—

|               | Herds | Head of Deer | Average |
|---------------|-------|--------------|---------|
| Finland . . . | 2,822 | 44,400       | 15      |
| Norway . . .  | 2,400 | 101,800      | 43      |
| Sweden . . .  | 3,200 | 220,800      | 65      |
| Total . . .   | 8,422 | 367,000      | 44      |

They can travel with a sleigh 130 miles a day, and are worth usually 30s. a head.

**Squirrels.**—There are 25 millions killed annually in Russia for their skins. See *Hunting*.

**Turtle.**—A good-sized one gives 80 lbs. of tortoise-shell.

## ANTHROPOMETRY

The average height of male adults, according to Topinard, is as follows:—

|            | Inches |            | Inches |             | Inches |
|------------|--------|------------|--------|-------------|--------|
| Laplanders | 60.7   | Caucasians | 65.0   | Danes       | 66.2   |
| Bushmen    | 62.0   | Hindoo     | 65.0   | Irish       | 67.0   |
| Malays     | 63.1   | Esquimaux  | 65.0   | English     | 67.4   |
| Peruvians  | 63.1   | Berbers    | 65.0   | Scotch      | 67.4   |
| Burmese    | 63.4   | Russians   | 65.4   | Swedes      | 67.4   |
| Fins       | 63.8   | Kirghese   | 65.4   | Kaffirs     | 67.8   |
| Araucans   | 63.8   | Fuegians   | 65.4   | Iroquois    | 68.2   |
| Chinese    | 64.2   | Germans    | 66.2   | Polynesians | 69.5   |
| Magyars    | 64.2   | Arabs      | 66.2   | Patagonians | 70.3   |
| Jews       | 64.6   | Charruas   | 66.2   | Average     | 65.6   |
| French     | 65.0   | Belgians   | 66.2   |             |        |

## HEIGHT AND WEIGHT OF ENGLISH, BELGIANS, AND AMERICANS

| Age | A.—Height in Inches |               |         |        | B.—Weight in Lbs. |               |         |        |
|-----|---------------------|---------------|---------|--------|-------------------|---------------|---------|--------|
|     | English Male        | American Male | Belgian |        | English Male      | American Male | Belgian |        |
|     |                     |               | Male    | Female |                   |               | Male    | Female |
| 10  | 51.8                | 51.7          | 50.1    | 49.2   | 67                | 66            | 56      | 51     |
| 15  | 62.2                | 62.3          | 59.6    | 58.6   | 103               | 105           | 91      | 88     |
| 20  | 67.5                | 67.4          | 65.8    | 62.0   | 143               | 147           | 131     | 117    |
| 24  | 67.7                | 67.9          | 66.2    | 62.1   | 148               | 147           | 146     | 123    |
| 30  | 67.9                | 68.1          | 66.4    | 62.2   | 156               | 150           | 146     | 122    |

Height is without shoes, but weight includes clothing.

Dr. Gould's measurement of men in the United States army (1863) gave the following table of average:—

| Age         | Natives of    |        |         |         |          |        |         |             | Average |
|-------------|---------------|--------|---------|---------|----------|--------|---------|-------------|---------|
|             | United States | Canada | England | Ireland | Scotland | France | Germany | Scandinavia |         |
| 18-20 . . . | 67.0          | 66.2   | 66.0    | 66.1    | 66.3     | 65.7   | 65.9    | 66.7        | 65.5    |
| 20-22 . . . | 67.9          | 67.0   | 66.5    | 66.7    | 67.0     | 66.2   | 66.6    | 67.3        | 66.1    |
| 22-24 . . . | 68.2          | 67.4   | 66.8    | 67.0    | 67.2     | 66.7   | 66.9    | 67.5        | 66.2    |
| 24-26 . . . | 68.2          | 67.5   | 66.9    | 67.1    | 67.4     | 66.6   | 66.8    | 67.8        | 66.3    |
| 26-28 . . . | 68.3          | 67.5   | 67.0    | 67.2    | 67.3     | 66.7   | 66.8    | 67.6        | 66.4    |
| 28-30 . . . | 68.4          | 67.5   | 67.0    | 67.2    | 67.5     | 66.7   | 66.8    | 67.4        | 66.5    |
| Over 30 . . | 68.4          | 67.5   | 66.9    | 67.1    | 67.6     | 66.7   | 66.8    | 67.4        | 66.3    |
| Average . . | 67.8          | 67.1   | 66.7    | 67.0    | 67.3     | 66.5   | 66.7    | 67.3        | 66.1    |

The above measurement comprised great numbers of men; Irish alone 83,000.

## AVERAGE HEIGHT OF MEN IN EUROPEAN ARMIES (1860)

|              | <i>Inches</i> | <i>Inches</i> | <i>Inches</i> |             |      |
|--------------|---------------|---------------|---------------|-------------|------|
| Italian . .  | 65.0          | Austrian . .  | 66.5          | Irish . .   | 68.0 |
| Spaniard . . | 65.5          | Belgian . .   | 66.9          | Scotch . .  | 68.5 |
| French . .   | 66.0          | Russian . .   | 67.0          | Swede . .   | 68.9 |
| Hungarian .  | 66.1          | English . .   | 67.5          | Norwegian . | 69.0 |

## HEIGHT OF CHILDREN IN VARIOUS COUNTRIES (INCHES)

| Age | Man-<br>chester |       | Brussels         |       | Boston            |       | Turin             |       | Bor-<br>deaux  |       | Average |

| 16  | 62.2            | 59.5  | 61.1             | 59.9  | 65.0              | 61.4  | 62.2              | 60.6  | ...            | ...   | 62.6    |
| 17  | 63.8            | 60.7  | 62.6             | 61.1  | 66.2              | 61.8  | 63.0              | 61.0  | ...            | ...   | 63.9    |

## LENGTH AND WEIGHT OF NEW-BORN INFANTS (DUNCAN)

| Mother's Age | Length, Inches |       |         | Weight, Lbs. |       |         |
|--------------|----------------|-------|---------|--------------|-------|---------|
|              | Boys           | Girls | General | Boys         | Girls | General |
| Under 20 .   | 19.9           | 19.7  | 19.8    | 7.1          | 6.8   | 7.0     |
| 20 to 30 .   | 20.1           | 19.9  | 20.0    | 7.3          | 7.0   | 7.2     |
| 30 to 40 .   | 20.2           | 20.0  | 20.1    | 7.4          | 7.2   | 7.3     |
| 40 to 45 .   | 20.3           | 20.1  | 20.2    | 7.3          | 7.3   | 7.3     |
| Over 45 .    | 19.7           | 19.8  | 19.8    | 6.6          | 7.0   | 6.8     |

An infant weighing 7 lbs. at birth will weigh 7½ lbs. on the tenth day, and 11 lbs. on the 30th day.

## HEIGHT AND WEIGHT OF BELGIAN INFANTS AND ADULTS (QUETELET)

| Age          | Height, Ins. |         |         | Weight, Lbs. |         |         |
|--------------|--------------|---------|---------|--------------|---------|---------|
|              | Males        | Females | General | Males        | Females | General |
| Under 1 year | 27.6         | 27.2    | 27.4    | 19.8         | 18.0    | 18.9    |
| 1-2          | 31.1         | 30.7    | 30.9    | 24.2         | 24.2    | 24.2    |
| 2-3          | 33.9         | 33.5    | 33.7    | 27.5         | 27.3    | 27.4    |
| 3-4          | 36.7         | 36.3    | 36.5    | 30.8         | 30.6    | 30.7    |
| 4-5          | 38.6         | 38.2    | 38.4    | 35.0         | 33.6    | 34.3    |
| 5-6          | 41.4         | 40.6    | 41.0    | 39.2         | 37.0    | 38.1    |
| 6-8          | 45.8         | 45.0    | 45.4    | 47.5         | 41.8    | 44.7    |
| 8-10         | 50.2         | 49.4    | 49.8    | 55.4         | 50.8    | 53.1    |
| 10-12        | 54.4         | 53.2    | 53.8    | 63.8         | 63.8    | 63.8    |
| 12-14        | 58.0         | 57.2    | 57.6    | 81.6         | 79.8    | 80.7    |
| 14-16        | 61.2         | 60.0    | 60.6    | 99.9         | 95.7    | 97.8    |
| 16-18        | 64.4         | 61.6    | 63.0    | 118.6        | 109.6   | 114.1   |
| 18-20        | 66.0         | 62.0    | 64.0    | 130.9        | 117.0   | 124.0   |
| 20-22        | 66.0         | 62.0    | 64.0    | 138.4        | 119.6   | 129.0   |
| 22-25        | 66.4         | 62.4    | 64.4    | 145.6        | 119.6   | 132.6   |
| 25-30        | 66.8         | 62.4    | 64.6    | 145.4        | 121.6   | 133.5   |

## DISTINCTION OF CLASSES (ENGLAND)

| Age | Height, Ins. |         |               |           | Weight, Lbs. |         |               |           |
|-----|--------------|---------|---------------|-----------|--------------|---------|---------------|-----------|
|     | Affluent     | Artisan | Farm Labourer | Male Pop. | Affluent     | Artisan | Farm Labourer | Male Pop. |
| 10  | 52.9         | 50.7    | 50.9          | 51.8      | 69           | 64      | 67            | 67        |
| 15  | 62.9         | 61.4    | 61.8          | 62.2      | 107          | 96      | 101           | 103       |
| 20  | 68.3         | 66.5    | 66.9          | 67.5      | 146          | 136     | 144           | 143       |
| 24  | 68.4         | 66.8    | 67.5          | 67.7      | 148          | 143     | 152           | 148       |
| 30  | 68.5         | 66.8    | 67.6          | 67.9      | 160          | 149     | 158           | 156       |
| 40  | 68.7         | 67.1    | 67.6          | 68.0      | 170          | 154     | 161           | 164       |
| 50  | 68.1         | 66.6    | 67.8          | 67.9      | 172          | 149     | 166           | 164       |
| 60  | 68.1         | 66.5    | 68.0          | 67.7      | 170          | 138     | 171           | 162       |

| Age             | Height, Ins. |          |               |           | Weight, Lbs. |          |               |           |
|-----------------|--------------|----------|---------------|-----------|--------------|----------|---------------|-----------|
|                 | Artisan      | Criminal | Farm Labourer | Male Pop. | Artisan      | Criminal | Farm Labourer | Male Pop. |
| 20-25           | 66.5         | 65.2     | 67.2          | 67.6      | 139          | 137      | 150           | 146       |
| 25-35           | 66.8         | 65.7     | 67.5          | 67.8      | 147          | 140      | 157           | 152       |
| 35-45           | 67.0         | 65.7     | 67.5          | 68.0      | 154          | 141      | 161           | 164       |
| 45-55           | 66.6         | 65.8     | 67.8          | 67.9      | 149          | 143      | 166           | 164       |
| General average | 66.6         | 65.6     | 67.5          | 67.7      | 147          | 140      | 158           | 158       |

Rural population is usually taller and heavier than that of towns. In Scotland agricultural males are 4 inches and 36 lbs. over the average of Glasgow and Edinburgh. The fishing population of Yorkshire exceeds the Sheffield artisans by 3 inches and 24 lbs. On the other hand, London is  $1\frac{1}{2}$  inch and 8 lbs. over the population of Hertfordshire; and Quetelet observed the same in Belgium, which he ascribed to better food in the towns.

## GROWTH OF MALE CONVICTS IN ENGLISH JAILS (DANSON)

| Age | Height, Inches |      | Weight, Lbs. |      |
|-----|----------------|------|--------------|------|
|     | 1858           | 1878 | 1858         | 1878 |
| 18  | 64.3           | 64.1 | 122          | 125  |
| 20  | 65.2           | 65.1 | 133          | 137  |
| 22  | 66.2           | 65.7 | 139          | 142  |
| 24  | 65.9           | 65.4 | 142          | 141  |
| 26  | 66.2           | 65.6 | 142          | 143  |
| 28  | 66.7           | 65.7 | 143          | 144  |
| 30  | 66.4           | 65.5 | 142          | 144  |

## GROWTH OF BOYS AND MEN (ENGLAND)

The following table is from the Anthropometric Report, British Association, 1883, the result of measurement of 10,000 males:—

| Age   | Height, Ins. | Weight, Lbs. | Chest, Ins. | Strength of Arm, Lbs. | Average Ann. Increase |              |             |                |
|-------|--------------|--------------|-------------|-----------------------|-----------------------|--------------|-------------|----------------|
|       |              |              |             |                       | Height, Ins.          | Weight, Lbs. | Chest, Ins. | Strength, Lbs. |
| 11    | 55           | 79           | 27          | 38                    | 1.5                   | 4.8          | 0.2         | ...            |
| 12    | 57           | 85           | 27          | 39                    | 2.1                   | 6.2          | 0.2         | 1.8            |
| 13    | 59           | 92           | 28          | 46                    | 1.8                   | 6.7          | 0.7         | 6.3            |
| 14    | 61           | 102          | 29          | 53                    | 2.2                   | 10.6         | 1.0         | 7.1            |
| 15    | 64           | 114          | 30          | 60                    | 2.3                   | 12.2         | 1.2         | 7.6            |
| 16    | 66           | 129          | 32          | 69                    | 2.6                   | 15.2         | 2.0         | 8.9            |
| 17    | 68           | 142          | 34          | 80                    | 1.6                   | 12.2         | 1.5         | 11.0           |
| 18    | 68           | 146          | 34          | 86                    | 0.4                   | 4.8          | 0.5         | 6.0            |
| 19    | 68           | 148          | 35          | 90                    | 0.3                   | 2.0          | 0.2         | 2.0            |
| 20    | 69           | 152          | 35          | 94                    | 0.5                   | 3.9          | 0.6         | 3.9            |
| 21    | 69           | 153          | 35          | 88                    | ...                   | 0.4          | 0.1         | ...            |
| 22    | 69           | 153          | 35          | 93                    | 0.1                   | ...          | ...         | 4.5            |
| 23-30 | 69           | 155          | 36          | 97                    | 0.1                   | 1.8          | 0.5         | 4.7            |

## GROWTH OF MALES IN TOWNS AND RURAL DISTRICTS (ENGLAND)

| Age   | Height, Ins. |       | Weight, Lbs. |       | Rural Excess |      |
|-------|--------------|-------|--------------|-------|--------------|------|
|       | Town         | Rural | Town         | Rural | Ins.         | Lbs. |
| 10-13 | 56           | 57    | 73           | 76    | 1            | 3    |
| 13-16 | 63           | 64    | 101          | 106   | 1            | 5    |
| 16-19 | 67           | 67    | 131          | 134   | ...          | 3    |
| 19-22 | 68           | 69    | 143          | 147   | 1            | 4    |
| 22-25 | 67           | 69    | 139          | 153   | 2            | 14   |

## GROWTH OF TELEGRAPH GIRLS (ENGLAND)

The following results were obtained by the Committee from 3700 girls:—

| Age | Height, Ins. | Weight, Lbs. | Chest, Ins. | Lifting Power, Lbs. | Average Annual Increase |              |             |               |
|-----|--------------|--------------|-------------|---------------------|-------------------------|--------------|-------------|---------------|
|     |              |              |             |                     | Height, Ins.            | Weight, Lbs. | Chest, Ins. | Lifting, Lbs. |
| 13  | 56           | 79           | 25          | 182                 | ...                     | ...          | ...         | ...           |
| 14  | 58           | 85           | 26          | 192                 | 2                       | 6            | 1           | 10            |
| 15  | 60           | 90           | 27          | 218                 | 2                       | 5            | 1           | 26            |
| 16  | 62           | 108          | 28          | 278                 | 2                       | 18           | 1           | 60            |
| 17  | 64           | 116          | 30          | 308                 | 2                       | 8            | 2           | 30            |
| 18  | 65           | 127          | 30          | 316                 | 1                       | 11           | 0           | 8             |
| 19  | 66           | 130          | 30          | 329                 | 1                       | 3            | 0           | 13            |

## ITALIAN BOYS AND GIRLS (PAGLIONI)

| Age | Weight, Lbs. |       | Height, Ins. |       | Drawing Power, Lbs. |       |
|-----|--------------|-------|--------------|-------|---------------------|-------|
|     | Boys         | Girls | Boys         | Girls | Boys                | Girls |
| 10  | 54           | 60    | 50           | 52    | 146                 | 90    |
| 11  | 57           | 62    | 51           | 53    | 151                 | 85    |
| 12  | 63           | 70    | 53           | 56    | 174                 | 115   |
| 13  | 70           | 82    | 55           | 58    | 209                 | 129   |
| 14  | 73           | 95    | 56           | 61    | 231                 | 151   |
| 15  | 87           | 100   | 59           | 61    | 261                 | 152   |
| 16  | 91           | 101   | 60           | 62    | 266                 | 152   |
| 17  | 95           | 107   | 60           | 62    | 299                 | 154   |
| 18  | 98           | 105   | 61           | 62    | 312                 | 155   |
| 19  | 103          | ...   | 62           | ...   | 330                 | ...   |

## MEN AND WOMEN OF UNITED STATES

The average weight of 20,000 men and women at Boston in 1864, and of 22,000 weighed at Cincinnati in 1882, was as follows:—

|                | Men      | Women    |
|----------------|----------|----------|
| Boston . . .   | 142 lbs. | 125 lbs. |
| Cincinnati . . | 154 ..   | 131 ..   |

There was no account taken of age. The people of the Western States are evidently much heavier than those of New England, properly known as Yankees.

It is, moreover, to be observed that the above averages for Boston closely coincide with those of Belgium (p. 62), where Quetelet gives 146 lbs. for men, and 122 for women, aged 30; but the British Association found an average in England of 155 lbs. for men over 23 years.

## ENGLISH MEN AND WOMEN (ROBERTS)

The comparison of weight, strength, &c., with stature, shows:—

| Height, Ins. | Weight, Lbs. |       | Chest, Ins. |       | Drawing-Bow, Lbs. |       |
|--------------|--------------|-------|-------------|-------|-------------------|-------|
|              | Men          | Women | Men         | Women | Men               | Women |
| 58           | 133          | 114   | 31          | 26    | 68                | 41    |
| 60           | 138          | 118   | 32          | 27    | 71                | 43    |
| 62           | 143          | 122   | 33          | 28    | 73                | 44    |
| 64           | 147          | 125   | 35          | 29    | 76                | 45    |
| 66           | 152          | 129   | 36          | 30    | 78                | 47    |
| 68           | 156          | 133   | 37          | 31    | 80                | 48    |
| 70           | 161          | 137   | 38          | 32    | 83                | 50    |
| 72           | 166          | 141   | 39          | 33    | 85                | 51    |

## BRITISH AND IRISH MALES, STATURE AND WEIGHT

The Anthropometric Committee in 1883 measured 8600 men, of ages from 23 to 50 years, and found as follows:—

| Height   |         |       |        |            | Weight    |         |       |        |            |
|----------|---------|-------|--------|------------|-----------|---------|-------|--------|------------|
| Inches   | English | Irish | Scotch | U. Kingdom | Pounds    | English | Irish | Scotch | U. Kingdom |
| Under 60 | 0.9     | 0.3   | 0.2    | 0.7        | Under 100 | 0.5     | 2.0   | 0.1    | 0.4        |
| 60-62    | 3.2     | 1.1   | 0.9    | 2.9        | 100-120   | 8.5     | 3.3   | 2.4    | 7.0        |
| 62-64    | 13.7    | 6.4   | 5.0    | 12.4       | 120-140   | 34.8    | 40.1  | 19.5   | 32.2       |
| 64-66    | 26.1    | 26.3  | 19.1   | 25.8       | 140-160   | 35.2    | 35.2  | 43.8   | 37.2       |
| 66-68    | 29.1    | 39.0  | 32.2   | 29.8       | 160-180   | 14.4    | 15.4  | 24.2   | 16.3       |
| 68-70    | 19.8    | 18.8  | 25.5   | 19.9       | 180-200   | 4.4     | 3.6   | 7.5    | 4.8        |
| Over 70  | 7.2     | 8.1   | 17.1   | 8.5        | Over 200  | 2.2     | 0.4   | 2.5    | 2.1        |
| Total    | 100.0   | 100.0 | 100.0  | 100.0      | Total     | 100.0   | 100.0 | 100.0  | 100.0      |

The following summary shows that the Irish are a much lighter race than the English, Welsh, or Scotch, and also that they weigh less per inch of stature:—

|             | Average Height, Ins. | Average Weight, Lbs. | Average, Lbs. per Inch |
|-------------|----------------------|----------------------|------------------------|
| English . . | 67.4                 | 155                  | 2.30                   |
| Welsh . .   | 66.7                 | 158                  | 2.38                   |
| Irish . .   | 67.9                 | 154                  | 2.27                   |
| Scotch . .  | 68.7                 | 165                  | 2.41                   |
| U. Kingdom  | 67.7                 | 158                  | 2.33                   |

## HEIGHT ACCORDING TO CLASSES

| Boys 11 to 12 Years       | Ins. | Adults 25 to 30 Years  | Ins. |
|---------------------------|------|------------------------|------|
| Eton and Harrow . .       | 55.0 | Professional class . . | 69.1 |
| Middle schools . .        | 53.8 | Commercial class . .   | 68.0 |
| Agricultural peasants . . | 53.0 | Farmers . . . . .      | 67.5 |
| Artisans' sons . .        | 52.6 | Artisans . . . . .     | 66.6 |
| Factory boys . .          | 51.6 | Criminals . . . . .    | 66.0 |
| Military orphans . .      | 51.2 | Tailors . . . . .      | 65.9 |
| Industrial schools . .    | 50.0 | Insane . . . . .       | 65.7 |

The height and weight of factory children of ten to twelve years in England, have increased in the last half century:—

| Year               | Height, Inches |       | Weight, Lbs. |       |
|--------------------|----------------|-------|--------------|-------|
|                    | Boys           | Girls | Boys         | Girls |
| 1833 . . . . .     | 50.5           | 50.4  | 59           | 57    |
| 1873 . . . . .     | 50.7           | 50.8  | 64           | 63    |
| Increase . . . . . | 0.2            | 0.4   | 5            | 6     |

|                                              | Ins. | Lbs. |
|----------------------------------------------|------|------|
| Fellows of the Royal Society average . . . . | 69.5 | 161  |
| Members of Athletic Associations . . . .     | 68.4 | 144  |
| Policemen and Fire-brigade . . . . .         | 70.1 | 185  |
| Burglars and other convicts . . . . .        | 65.6 | 140  |

The low physical type of criminals and insane is remarkable.

## HEIGHT OF MALE ADULTS IN VARIOUS COUNTRIES

| Inches           | Jews    | Saxons |       | Italians  | Belgians | Swedes    | Dutch     | United Kingdom |       |        |
|------------------|---------|--------|-------|-----------|----------|-----------|-----------|----------------|-------|--------|
|                  | Bavaria | Town   | Rural | Conscript | Militia  | Conscript | Conscript | English        | Irish | Scotch |
| Under 62 . . . . | 6.4     | 15.0   | 14.6  | 14.0      | 13.6     | 1.8       | 5.2       | 4.1            | 1.4   | 1.1    |
| 62-64 . . . .    | 20.9    | 17.8   | 17.6  | 20.3      | 12.1     | 11.3      | 10.5      | 13.7           | 6.4   | 5.0    |
| 64-66 . . . .    | 34.3    | 29.2   | 28.4  | 26.2      | 26.7     | 14.0      | 27.0      | 26.1           | 26.3  | 19.1   |
| 66-68 . . . .    | 22.8    | 22.9   | 23.9  | 21.2      | 26.8     | 37.1      | 26.1      | 29.1           | 39.1  | 32.2   |
| Over 68 . . . .  | 15.6    | 15.1   | 16.5  | 18.3      | 20.8     | 35.8      | 31.2      | 27.0           | 26.9  | 42.6   |
| Total . . . .    | 100.0   | 100.0  | 100.0 | 100.0     | 100.0    | 100.0     | 100.0     | 100.0          | 100.0 | 100.0  |

The Scotch are by far the tallest in the above table, but are surpassed by the Iroquois Indians, measured by Gould, of whom 54 per cent. exceeded 68 inches.

## HEIGHT AND CHEST MEASUREMENT OF BRITISH ARMY (1882)

| Inches   | Height   |        |       | Inches   | Chest                  |
|----------|----------|--------|-------|----------|------------------------|
|          | Eng-lish | Scotch | Irish |          | English, Scotch, Irish |
| Under 66 | 47.3     | 45.0   | 55.3  | Under 36 | 33.5                   |
| 66-70    | 41.1     | 42.6   | 36.1  | 36-38    | 41.8                   |
| Over 70  | 11.6     | 12.4   | 8.6   | Over 38  | 24.7                   |
|          | 100.0    | 100.0  | 100.0 |          | 100.0                  |

| Inches   | Height of French Conscripts |         |         |
|----------|-----------------------------|---------|---------|
|          | 1837-47                     | 1848-57 | 1858-68 |
| Under 62 | 14.0                        | 13.6    | 11.5    |
| 62-64    | 24.1                        | 25.3    | 26.6    |
| 64-66    | 33.2                        | 32.6    | 32.2    |
| 66-68    | 21.9                        | 21.8    | 22.7    |
| Over 68  | 6.8                         | 6.7     | 7.0     |
| Total    | 100.0                       | 100.0   | 100.0   |

| Inches   | Height of Dutch Conscripts |         |         |
|----------|----------------------------|---------|---------|
|          | 1866-71                    | 1872-77 | 1878-83 |
| Under 62 | 9.3                        | 7.6     | 5.7     |
| 62-64    | 13.9                       | 12.9    | 11.6    |
| 64-68    | 52.0                       | 53.5    | 53.9    |
| Over 68  | 24.8                       | 26.0    | 28.8    |
| Total    | 100.0                      | 100.0   | 100.0   |

The improvement of stature in Holland is ascribed to better food, resulting from the abolition of the Grist-tax, and to sanitation of cities. It is further observed that in swampy provinces 8½ per cent. of the young men drawn for military service are rejected for being under 62 inches, and in the rest of the kingdom only 5 per cent.

## HEIGHT OF SWEDISH CONSCRIPTS

| Period  | Average<br>Ins. | Period  | Average<br>Ins. |
|---------|-----------------|---------|-----------------|
| 1841-50 | 66.0            | 1861-70 | 66.6            |
| 1851-60 | 66.2            | 1871-75 | 66.7            |

The improvement in Sweden is likewise ascribed to better food.

## COMPLEXION OF PERSONS (UNITED KINGDOM)

| Hair  | England   |           |        | Scotland  |           |        | Ireland   |           |        |
|-------|-----------|-----------|--------|-----------|-----------|--------|-----------|-----------|--------|

| Total | 100       | 100       | 100    | 100       | 100       | 100    | 100       | 100       | 100    |

## DIFFERENCE OF SEXES (EUROPE)

|        | Male | Female |          | Male | Female |
|--------|------|--------|----------|------|--------|
| Height | 100  | 94     | Skull    | 100  | 88     |
| Size   | 100  | 93     | Brain    | 100  | 91     |
| Weight | 100  | 84     | Strength | 100  | 67     |

## ARMS

*Artillery.*—The first piece of cannon was invented by Friar Schwartz in 1330, and the Moors used artillery at Cordoba in 1343. The English had four pieces at Crecy in 1346; the Venetian fleet used artillery against the Genoese in 1377. Mortars for bombs were cast in England in 1543, having been invented at Naples in 1435. Petards were first used by the Huguenots in 1579. The most famous pieces of cannon have been:—

| Date | Name          | Place     | Tons | Feet | Bore, Ins. |
|------|---------------|-----------|------|------|------------|
| 1430 | Dulle Griete  | Holland   | 14   | ...  | ...        |
| 1450 | Mons Meg      | Edinburgh | 6    | 13   | 20         |
| 1464 | Mahomet       | Turkey    | 20   | ...  | ...        |
| 1540 | Carlos Quinto | Dover     | ...  | 24   | ...        |
| 1548 | Malik Mydan   | India     | 40   | ...  | 23         |
| 1550 | Simon         | Cologne   | ...  | 19   | 18         |
| 1586 | Pooshka       | Moscow    | 39   | ...  | ...        |
| 1856 | Horsfall      | Liverpool | 22   | 16   | ...        |
| 1874 | Infant        | Woolwich  | 80   | 27   | ...        |
| 1880 | Armstrong     | Newcastle | 100  | ...  | 12         |
| 1889 | Krupp         | Essen     | 130  | 44   | 16         |

The cannon of the Middle Ages was as follows:—

| Name          | Shot,<br>Lbs. | Powder,<br>Lbs. | Gun,<br>Cwts. | Length,<br>Feet |
|---------------|---------------|-----------------|---------------|-----------------|
| Cannon        | 64            | 32              | 72            | 12              |
| Serpentine    | 52            | 26              | 62            | 12              |
| Culverin      | 19            | 15              | 40            | 12              |
| Demi-culverin | 10            | 8               | 20            | 10              |
| Falcon        | 2             | 2               | 6             | 7               |

The cannon used at Trafalgar (1805) were:—

| Pounder | Inch | Gun, Cwts. | Powder, Lbs. |
|---------|------|------------|--------------|
| 3       | 3.9  | 7          | 1.0          |
| 6       | 3.7  | 22         | 1.3          |
| 12      | 4.6  | 34         | 4.0          |
| 18      | 5.3  | 42         | 6.0          |
| 24      | 5.8  | 50         | 8.0          |
| 32      | 6.4  | 52         | 10.0         |

None of the above carried over 2000 yards.

The artillery now in use (1889) may be classified thus:—

| Inches<br>Bore | Gun,<br>Tons | Shot,<br>Lbs. | Powder,<br>Lbs. | Initial<br>Velocity,<br>Feet per<br>Second | Muzzle<br>Energy,<br>Foot-<br>Tons | Penetra-<br>tion,<br>Ins. at<br>Muzzle |
|----------------|--------------|---------------|-----------------|--------------------------------------------|------------------------------------|----------------------------------------|
| 7              | 4½           | 112           | 22              | 1,325                                      | 1,400                              | 7                                      |
| 8              | 9            | 175           | 35              | 1,384                                      | 2,300                              | 9                                      |
| 9              | 12           | 253           | 50              | 1,440                                      | 3,600                              | 11                                     |
| 10             | 18           | 406           | 70              | 1,379                                      | 5,400                              | 13                                     |

| 16             | 100          | 2,000         | 550             | 1,700                                      | 40,000                             | 27                                     |
| 16             | 111          | 1,800         | 960             | 2,104                                      | ...                                | 36                                     |
| 16             | 119          | 2,028         | 846             | 2,000                                      | ...                                | ...                                    |
| 16             | 130          | 2,600         | 700             | ...                                        | ...                                | ...                                    |

The progress of artillery science since 1837 has been as follows:—

1859. Armstrong's breech-loading rifle-gun, charge only 5 lbs., sent a shot 5 miles.  
1861. Richard Gatling, of North Carolina, patented his gun, firing 200 shots a minute; it now fires 400.

1862. Armstrong's smooth-bore, charge 40 lbs., sent a 300-lbs. shot through a 5-inch wrought-iron plate.
1866. Woolwich 9-inch rifle, charge 43 lbs., sent a 250-lbs. Palliser shot through an 8-inch plate.
1872. First Woolwich Infant, 35 tons, shot 700 lbs., powder 120 lbs.. It sent a Palliser shot through 18½ inches iron and 12 of teak.
1874. Second Woolwich Infant, 80 tons, shot 1650 lbs., powder 300 lbs.
1876. Third Woolwich Infant, 81 tons, shot 1250 lbs., went through 50 feet of sand.
1876. Armstrong 100-ton guns, broke 22-inch Creusot steel plates.
1879. Shot from 9-inch gun, 75 lbs. powder, unable to pierce a 12-inch plate of iron and steel, alternate layers.
1880. Result of Krupp's experiments at Meppen :—

| Gun           | Inch | Shot, Lbs. | Penetration | Foot-Tons |
|---------------|------|------------|-------------|-----------|
| Krupp . . .   | 9½   | 348        | 18.1        | 8,630     |
| British . . . | 11½  | 812        | 17.9        | 12,260    |

Krupp's shot penetrated 18-inch plates; the British did not.

1889. Krupp's cast steel 130-ton gun has a range of 12 miles, and fires two shots per minute; each shot costs £300 sterling, and weighs 2600 lbs., going through 19 inches of armour; charge of powder, 700 lbs.

Down to 1876, Mr. Krupp had delivered 15,000 cannons from his factory to different nations. Great Britain sometimes manufactures two million shot and shell in a year, weighing 20,000 tons of iron. The cost of heavy guns is as follows (1882), per ton :—

|                 |     |                 |      |
|-----------------|-----|-----------------|------|
| Cast iron . . . | £21 | Krupp . . .     | £170 |
| Armstrong . . . | 100 | Whitworth . . . | 175  |

During the siege of Sebastopol, 1855, the Allies threw 30,000 tons of shot and shell into that place.

The cannon in various countries may be summed up thus (those in fortifications, &c., being approximately) :—

|                     | Army   | Navy   | Fort, &c. | Total  |
|---------------------|--------|--------|-----------|--------|
| Great Britain . . . | 70.    | 3,087  | 2,000     | 5,789  |
| France . . .        | 2,060  | 2,834  | 2,800     | 7,694  |
| Germany . . .       | 1,486  | 570    | 3,324     | 5,380  |
| Russia . . .        | 1,540  | 836    | 2,048     | 4,424  |
| Austria . . .       | 850    | 320    | 1,000     | 2,170  |
| Italy . . .         | 700    | 480    | 500       | 1,680  |
| Spain . . .         | 416    | 525    | 300       | 1,241  |
| Portugal . . .      | 132    | 178    | 110       | 420    |
| Holland . . .       | 220    | 560    | 120       | 900    |
| Belgium . . .       | 204    | ...    | 120       | 324    |
| Denmark . . .       | 120    | 245    | 170       | 535    |
| Sweden and Norway   | 300    | 672    | 100       | 1,072  |
| Greece . . .        | 120    | 70     | 110       | 300    |
| Roumania . . .      | 312    | 36     | 94        | 442    |
| Turkey . . .        | 1,188  | 200    | 2,374     | 3,762  |
| Europe . . .        | 10,350 | 10,613 | 15,170    | 36,133 |
| United States . . . | 100    | 1,055  | 3,000     | 4,155  |
| Brazil . . .        | 50     | 166    | 200       | 416    |
| Japan . . .         | 120    | 149    | 100       | 369    |
| The World . . .     | 10,620 | 11,983 | 18,470    | 41,073 |

## RIFLES

|               | Maker       | Weight, Lbs. | Calibre | Rounds |
|---------------|-------------|--------------|---------|--------|
| England . . . | Lee-Mitford | 9.4          | .303    | 8      |
| France . . .  | Lebel       | 9.2          | .315    | 8      |
| Germany . . . | Mausers     | 9.5          | .310    | 5      |
| Austria . . . | Mannlicher  | 10.2         | .315    | 5      |
| Italy . . .   | Vetterli    | 10.6         | .409    | 5      |
| United States | Lee         | ...          | .433    | 5      |
| Belgium . . . | Mausers     | 9.5          | .310    | 5      |
| Turkey . . .  | Mausers     | ...          | .433    | 8      |
| China . . .   | Lee         | ...          | .433    | 5      |

The competition for the Elcho Shield in twenty-four years shows the following score :—

|                | Average | Highest |
|----------------|---------|---------|
| England . . .  | 1,345   | 1,642   |
| Ireland . . .  | 1,540   | 1,652   |
| Scotland . . . | 1,280   | 1,510   |

## ARMY

|                     | Peace Footing (1889) |           |           |                |           | Artillery Guns | War Footing |
|---------------------|----------------------|-----------|-----------|----------------|-----------|----------------|-------------|
|                     | Cavalry              | Infantry  | Artillery | Engineers, &c. | Total     |                |             |

In the war footing of European armies as given above only the first line of reserves is included. If all reserves were included the above numbers might be safely doubled.

According to Napoleon Bonaparte, the proportions of an army should be 70 per cent. infantry, 17 per cent.

cavalry, and 13 per cent. between artillery, engineers, and train. The proportions of European armies in the above statement are 66 per cent. infantry, 12 per cent. cavalry, and 22 per cent. between artillery, engineers, and train.

The standing armies of twelve principal countries of Europe have been as follows:—

|               | Army      |           |           | War Footing | Soldiers per 10,000 Inhabitants in 1888 |     |
|---------------|-----------|-----------|-----------|-------------|-----------------------------------------|-----|
|               | 1810      | 1851      | 1888-89   | 1888-89     | Peace                                   | War |
| Great Britain | 307,000   | 129,000   | 210,000   | 606,000     | 56                                      | 160 |
| France        | 570,000   | 365,000   | 555,000   | 1,315,000   | 138                                     | 370 |

| Austria       | 347,000   | 282,000   | 323,000   | 1,150,000   | 80                                      | 280 |
| Italy         | 75,000    | 142,000   | 255,000   | 940,000     | 85                                      | 310 |
| Spain         | 54,000    | 87,000    | 145,000   | 400,000     | 76                                      | 230 |
| Portugal      | 10,000    | 28,000    | 26,000    | 150,000     | 60                                      | 350 |
| Belgium       | ...       | 40,000    | 48,000    | 148,000     | 85                                      | 240 |
| Holland       | 22,000    | 50,000    | 29,000    | 55,000      | 70                                      | 140 |
| Denmark       | 75,000    | 25,000    | 17,000    | 60,000      | 90                                      | 300 |
| Sweden        | 43,000    | 57,000    | 57,000    | 230,000     | 90                                      | 330 |
| Europe        | 2,221,000 | 2,195,000 | 2,957,000 | 8,266,000   | 91                                      | 270 |

The minimum height in the principal armies is as follows:

|          | <i>Ins.</i> |                | <i>Ins.</i> |
|----------|-------------|----------------|-------------|
| British  | 63.0        | Belgian        | 61.9        |
| French   | 60.7        | Swedish        | 63.3        |
| German   | 61.9        | American       | 63.0        |
| Austrian | 61.2        | Prussian Guard | 67.0        |
| Italian  | 61.5        | Uhlans         | 65.9        |
| Spanish  | 61.5        | Infantry       | 61.9        |

For average height, see p. 62.

The proportion of men drafted to the ranks out of 1000 recruits or conscripts was:—

| Nation        | Rejected for |           | Good for Service | Date    |
|---------------|--------------|-----------|------------------|---------|
|               | Under Height | Infirmity |                  |         |
| British       | ...          | ...       | 670              | 1844-52 |
| French        | 61           | 327       | 612              | 1860-68 |
| Prussian      | 95           | 380       | 525              | 1831-63 |
| Bavarian      | 16           | 233       | 751              | 1822-53 |
| Saxon         | 220          | 380       | 400              | 1826-54 |
| Wurtemburger  | 120          | 410       | 470              | 1834-56 |
| Austrian      | 113          | 343       | 544              | 1857-64 |
| Russian       | ...          | ...       | 780              | 1860-61 |
| Swede         | 101          | 180       | 719              | 1847-48 |
| Dane          | 150          | 320       | 530              | 1852-56 |
| Spaniard      | 101          | 75        | 824              | 1857-66 |
| Belgian       | 121          | 107       | 772              | 1841-60 |
| Hollander     | 160          | 71        | 769              | 1851-61 |
| United States | ...          | ...       | 720              | 1863-65 |

The following table shows the death-rate and ratio invalided:—

| Army          | Per 10,000 Soldiers Yearly |           | Date    |
|---------------|----------------------------|-----------|---------|
|               | Died                       | Invalided |         |
| British       | 95                         | 340       | 1860-68 |
| French        | 101                        | 70        | 1862-69 |
| Prussian      | 64                         | 140       | 1860-63 |
| Belgian       | 129                        | 90        | 1868-69 |
| Austrian      | 116                        | 210       | 1869    |
| Portuguese    | 127                        | 170       | 1861-67 |
| Russian       | 165                        | ...       | 1858-68 |
| United States | 140                        | 250       | 1859    |
| Do. Blacks    | 180                        | ...       | 1859    |

The dietary of the various armies is as follows:—

| Army     | Daily Rations, Oz. |      |      |                  |          | Weekly Rations, Oz. |        | Extras Weekly |
|----------|--------------------|------|------|------------------|----------|---------------------|--------|---------------|
|          | Bread              | Meat | Rice | Dried Vegetables | Potatoes | Salt                | Coffee |               |
| British  | 16                 | 12   | 2    | 8                | 16       | 2                   | 4      | 9 oz. sugar   |
| French   | 22                 | 9    | 4    | 11               | 11       | 6                   | 3      | ...           |
| Russian  | 16                 | 16   | ...  | 35               | ...      | 6                   | ...    | 2 galls. beer |
| Austrian | 32                 | 8    | 1    | 11               | 9        | ...                 | ...    | 8 oz. grease  |
| Italian  | 27                 | 11   | 4    | ...              | ...      | 4                   | 4      | 1 gall. wine  |
| Spanish  | 18                 | 8    | 6    | ...              | 16       | ...                 | 3      | 3 lbs. fish   |
| Belgian  | 27                 | 9    | ...  | ...              | 35       | 8                   | 3      | 5 oz. butter  |
| Turkish  | 32                 | 9    | 3    | 1                | ...      | ...                 | ...    | 3 oz. grease  |
| American | 22                 | 20   | 2    | ...              | 16       | 5                   | 10     | 22 oz. beans  |
| German   | 28                 | 8    | 3    | ...              | ...      | ...                 | 4      | 7 oz. sugar   |

The years of service under the colours and in the reserve are:—

|         | Colours | First Reserve | Second Reserve | Age at Enrolment |
|---------|---------|---------------|----------------|------------------|
| France  | 5       | 4             | 11             | 20               |
| Germany | 3       | 4             | 15             | 20               |
| Austria | 3       | 7             | 12             | 20               |
| Italy   | 3       | 5             | 12             | 21               |

The equipment of infantry and cavalry weighs as follows:—

|         | Infantry | Cavalry  |
|---------|----------|----------|
| British | 60 lbs.  | 125 lbs. |
| German  | 60 "     | 122 "    |
| French  | 72 "     | 155 "    |
| Russian | 68 "     | ...      |

The rate of marching per hour is as follows:—

|         | English Miles |       |              |
|---------|---------------|-------|--------------|
|         | Ordinary      | Quick | Double Quick |
| British | 3.0           | 3.3   | 5.0          |
| German  | ...           | 3.0   | 5.0          |
| French  | 2.7           | 3.3   | 5.0          |

## BRITISH ARMY

The strength of the regular standing army at various periods has been thus :—

| Year         | Men    | Per 10,000 Inhabitants | Year         | Men     | Per 10,000 Inhabitants | Year         | Expenditure, £ |
|--------------|--------|------------------------|--------------|---------|------------------------|--------------|----------------|
| 1661 . . . . | 5,200  | 9                      | 1810 . . . . | 306,700 | 171                    | 1780 . . . . | 7,800,000      |
| 1688 . . . . | 28,000 | 51                     | 1830 . . . . | 108,700 | 46                     | 1810 . . . . | 26,700,000     |
| 1730 . . . . | 17,000 | 30                     | 1850 . . . . | 138,800 | 52                     | 1830 . . . . | 8,600,000      |
| 1764 . . . . | 40,000 | 53                     | 1860 . . . . | 229,500 | 79                     | 1860 . . . . | 18,000,000     |
| 1792 . . . . | 57,300 | 60                     | 1889 . . . . | 212,000 | 58                     | 1888 . . . . | 18,400,000     |

The forces of the United Kingdom, regular or irregular, were :—

|                          | 1850    | 1870    | 1888    |
|--------------------------|---------|---------|---------|
| Army . . . . .           | 139,000 | 193,000 | 210,000 |
| Reserves and militia . . | 20,000  | 122,000 | 174,000 |
| Volunteers . . . . .     | ...     | 193,000 | 222,000 |
| Total . . . . .          | 159,000 | 508,000 | 606,000 |

If Yeomanry and Royal Irish Constabulary be added, the total for 1888 will reach 630,000 men. The several Arms in 1888 were :—

|                        | Army    | Reserves and Militia | Volunteers | Indian Army | Total   |
|------------------------|---------|----------------------|------------|-------------|---------|
| Infantry . . . . .     | 140,000 | 122,000              | 174,000    | 114,000     | 550,000 |
| Cavalry . . . . .      | 17,000  | 18,000               | 1,000      | 23,000      | 59,000  |
| Artillery . . . . .    | 34,000  | 22,000               | 38,000     | 4,000       | 98,000  |
| Engineers, &c. . . . . | 19,000  | 12,000               | 9,000      | 4,000       | 44,000  |
| Total . . . . .        | 210,000 | 174,000              | 222,000    | 145,000     | 751,000 |

The total land force of the British Empire is as follows :—

|                              |         |
|------------------------------|---------|
| British regular army . . . . | 212,000 |
| Reserve and militia . . . .  | 205,000 |
| Volunteers . . . . .         | 222,000 |
| Yeomanry . . . . .           | 14,000  |
| Irish constabulary . . . .   | 13,000  |
| Anglo-Indian army . . . .    | 145,000 |
| Indian police . . . . .      | 190,000 |
| Colonial forces . . . . .    | 15,000  |

Total . . . . . 1,016,000

The regular army has 9,400 officers, and 16,100 petty officers.

The following table shows the garrison of the United Kingdom since 1800, exclusive of the auxiliary forces :—

| Year           | Horse  | Foot   | Artillery, &c. | Total   |
|----------------|--------|--------|----------------|---------|
| 1800 . . . . . | 14,000 | 49,000 | 8,000          | 71,000  |
| 1810 . . . . . | 20,000 | 74,000 | 19,000         | 113,000 |
| 1820 . . . . . | 10,000 | 47,000 | 4,000          | 61,000  |
| 1830 . . . . . | 8,000  | 35,000 | 5,000          | 48,000  |
| 1840 . . . . . | 7,000  | 39,000 | 4,000          | 50,000  |
| 1850 . . . . . | 8,000  | 50,000 | 9,000          | 67,000  |
| 1860 . . . . . | 11,000 | 62,000 | 17,000         | 90,000  |
| 1870 . . . . . | 11,000 | 56,000 | 17,000         | 84,000  |
| 1880 . . . . . | 13,000 | 72,000 | 22,000         | 107,000 |
| 1889 . . . . . | 13,000 | 70,000 | 22,000         | 105,000 |

The equipment and distribution of the regular army were as follows :—

| 1889                   |                  |        | 1888     |         |           |                |         |
|------------------------|------------------|--------|----------|---------|-----------|----------------|---------|
|                        | Officers and Men | Horses | Infantry | Cavalry | Artillery | Engineers, &c. | Total   |
| England . . . . .      | 74,000           | 9,600  | 43,000   | 9,000   | 15,000    | 16,000         | 83,000  |
| Scotland . . . . .     | 4,000            | 340    | 3,000    | 1,000   | ...       | 1,000          | 5,000   |
| Ireland . . . . .      | 28,000           | 3,300  | 21,000   | 3,000   | 3,000     | 3,000          | 30,000  |
| United Kingdom . . . . | 106,000          | 13,240 | 67,000   | 13,000  | 18,000    | 20,000         | 118,000 |
| India . . . . .        | 73,000           | 11,100 | 53,000   | 6,000   | 13,000    | ...            | 72,000  |
| Egypt . . . . .        | 3,400            | 300    | 5,000    | ...     | 1,000     | ...            | 6,000   |
| Colonies . . . . .     | 29,400           | 710    | 15,000   | ...     | 4,000     | 6,000          | 25,000  |
| Total . . . . .        | 211,800          | 25,350 | 140,000  | 19,000  | 36,000    | 26,000         | 221,000 |

The Indian establishment \* is as follows :—

|                     | European Army | Indian Army | Total Force |             | European Army |
|---------------------|---------------|-------------|-------------|-------------|---------------|
| Horse . . . . .     | 6,000         | 23,000      | 29,000      | Bengal . .  | 45,000        |
| Foot . . . . .      | 54,000        | 114,000     | 168,000     | Bombay . .  | 13,000        |
| Artillery . . . . . | 13,000        | 8,000       | 21,000      | Madras, &c. | 15,000        |
| Total . . . . .     | 73,000        | 145,000     | 218,000     |             | 73,000        |

\* The feudatory States of India have also armies of their own, viz. :—

|                       | Men     | Guns  |
|-----------------------|---------|-------|
| Hindoo States . . . . | 275,000 | 3,372 |
| Mahometan . . . . .   | 75,000  | 865   |
| Total . . . . .       | 350,000 | 4,237 |

The Volunteer force, created in 1860, showed as follows :—

| Year           | Roll    | Efficient |
|----------------|---------|-----------|
| 1860 . . . . . | 160,300 | 106,400   |
| 1865 . . . . . | 226,700 | 133,800   |
| 1870 . . . . . | 245,000 | 170,700   |
| 1875 . . . . . | 238,300 | 168,700   |
| 1880 . . . . . | 243,500 | 196,900   |
| 1888 . . . . . | 258,000 | 222,000   |

The composition of the regular army is as follows :—

| Nationality (1883)   | Age (1883)          | Religion (1889)       |
|----------------------|---------------------|-----------------------|
| English . . . . . 70 | Under 18 . . . 2    | Church of England 67  |
| Irish . . . . . 20   | 18-30 . . . . 74    | Roman Catholics . 19  |
| Scotch . . . . . 8   | 30-40 . . . . 20    | Presbyterians . . . 8 |
| Colonial . . . . . 2 | Over 40 . . . . 4   | Dissenters . . . . 6  |
| Total . . . . . 100  | Total . . . . . 100 | Total . . . . . 100   |

In 1881 there were 93 per cent. of the men able to read and write, against 68 per cent. in 1860.

The health of the army has been greatly improved since Dr. Farr's barrack reform begun in 1860, on a basis of 600 cubic feet of air per man in Europe, and 1000 in India, with an allowance of 1600 cubic feet for each horse. In many barracks of Great Britain, down to 1861, the average accommodation only allowed 300 to 400 cubic feet per man. The new barracks at Chelsea are considered a model, the cost being £245 per man, including cost of site.

The death-rate of the garrisons under the old and new systems (exclusive of deaths in war) showed thus:—

|                         | Per 1000 Men Yearly |         |
|-------------------------|---------------------|---------|
|                         | 1830-40             | 1876-80 |
| Great Britain . . . . . | 16                  | 7       |
| India . . . . .         | 68                  | 10      |
| Jamaica . . . . .       | 143                 | 22      |
| Ceylon . . . . .        | 57                  | 22      |
| Canada . . . . .        | 21                  | 18      |
| Sierra Leone . . . . .  | 483                 | ...     |

The following table shows, moreover, what an improvement has taken place in the health of the army, both at home and abroad, since 1861:—

|                          | Per 1000 Men        |         |        |         |
|--------------------------|---------------------|---------|--------|---------|
|                          | Hospital Admissions |         | Deaths |         |
|                          | 1861                | 1871-80 | 1861   | 1871-80 |
| India . . . . .          | 1,768               | 1,454   | 37     | 19      |
| China . . . . .          | 1,492               | 1,196   | 28     | 14      |
| Ceylon . . . . .         | 1,440               | 971     | 20     | 15      |
| Bermuda . . . . .        | 461                 | 632     | 14     | 9       |
| West Indies . . . . .    | 1,002               | 913     | 14     | 11      |
| Mauritius . . . . .      | 608                 | 1,834   | 12     | 17      |
| Malta . . . . .          | 772                 | 857     | 11     | 10      |
| Canada . . . . .         | 644                 | 667     | 8      | 7       |
| Gibraltar . . . . .      | 927                 | 675     | 9      | 7       |
| United Kingdom . . . . . | 1,025               | 817     | 9      | 8       |

Death-rate in the United Kingdom ranges from  $5\frac{1}{2}$  per 1000 in cavalry to  $7\frac{1}{2}$  in the engineers, the general average being under 7 per 1000. The saving of life consequent on the barrack reforms is equal to 4200 men yearly in India, and 2500 in the rest of the army.

The following table shows the nominal and actual levies, the numbers rejected by the army doctors, and those drafted to the colours.

| Years             | Nominal Levy | Actual Levy | Rejected for |              |        | Drafted to Colours | Percentage Rejected |
|-------------------|--------------|-------------|--------------|--------------|--------|--------------------|---------------------|
|                   |              |             | Under Height | Other Causes | Total  |                    |                     |
| 1813 . . . . .    | 1,140,000    | ...         | ...          | ...          | ...    | ...                | ...                 |
| 1816-20 . . . . . | 297,000      | ...         | ...          | ...          | ...    | 40,000             | ...                 |
| 1821-30 . . . . . | 283,000      | ...         | ...          | ...          | ...    | 60,000             | ...                 |
| 1831-40 . . . . . | 300,000      | ...         | ...          | ...          | ...    | 80,000             | ...                 |
| 1841-50 . . . . . | 305,000      | 143,000     | 12,000       | 51,000       | 63,000 | 80,000             | 37.7                |
| 1851-60 . . . . . | 306,000      | 179,000     | 14,000       | 57,000       | 71,000 | 108,000            | 34.4                |
| 1861-70 . . . . . | 316,000      | 164,000     | 10,000       | 54,000       | 64,000 | 100,000            | 35.1                |
| 1867 . . . . .    | 316,000      | ...         | 7,000        | 91,000       | 98,000 | 218,000            | 31.0                |

The minimum height at various periods was fixed thus:—

| Year           | Ins. | Year           | Ins. | Year           | Ins. |
|----------------|------|----------------|------|----------------|------|
| 1691 . . . . . | 66.1 | 1813 . . . . . | 60.0 | 1832 . . . . . | 61.5 |
| 1776 . . . . . | 65.0 | 1818 . . . . . | 61.8 | 1868 . . . . . | 61.0 |
| 1792 . . . . . | 64.0 | 1830 . . . . . | 60.7 | 1872 . . . . . | 60.7 |

For the average height of conscripts at various dates, see 65, Anthropometry.

In active service the death-rate among officers is heavier than among the rank and file.

The Duke of Wellington's army roll from 1811 to 1814 showed:—

|                           | Officers       | Men            |
|---------------------------|----------------|----------------|
| Killed . . . . .          | 14.5 per cent. | 10.2 per cent. |
| Wounded . . . . .         | 81.0 "         | 49.0 "         |
| Died of disease . . . . . | 13.0 "         | 38.0 "         |

#### FRENCH ARMY

The strength has been at various periods as follows:—

| Date           | Men     | Horses  | Expenditure, £ |
|----------------|---------|---------|----------------|
| 1783 . . . . . | 127,000 | 30,000  | ...            |
| 1812 . . . . . | 743,000 | 180,000 | ...            |
| 1836 . . . . . | 280,000 | 54,000  | 8,700,000      |
| 1848 . . . . . | 445,000 | 90,000  | 16,800,000     |
| 1869 . . . . . | 426,000 | 90,000  | 18,400,000     |
| 1880 . . . . . | 498,000 | 124,000 | 33,000,000     |
| 1888 . . . . . | 525,000 | 122,000 | 22,200,000     |

The army list for 1890 shows as follows:—

|                        | France  | Algeria | Tunis, &c. | Total   |
|------------------------|---------|---------|------------|---------|
| Horse . . . . .        | 67,000  | 8,000   | 2,000      | 77,000  |
| Foot . . . . .         | 291,000 | 29,000  | 7,000      | 327,000 |
| Artillery . . . . .    | 73,000  | 3,000   | 1,000      | 77,000  |
| Gendarmes . . . . .    | 22,000  | 1,000   | ...        | 23,000  |
| Engineers, &c. . . . . | 40,000  | 9,000   | 2,000      | 51,000  |
| Total . . . . .        | 493,000 | 50,000  | 12,000     | 555,000 |
| Horses . . . . .       | 119,000 | 15,000  | 4,000      | 138,000 |

Deducting sick and absent, the effective force in January 1890 was 511,000 between officers and men, the officers numbering 26,600, reserve 860,000, militia 1,022,000, total 2,337,000. The artillery consists of 2060 field-guns and 99 fortress batteries. Napoleon's army in 1805 consisted of 380,000 infantry, 76,000 cavalry, and 35,000 artillery.

The army roll shows that from June 1791 to November 1813 the number enrolled was 4,556,000 men, but the Minister of War in 1814 was of opinion that only 2,022,000 had actually passed under the colours.

The number of volunteers who joined the colours was as follows:—

|                |        |                |        |
|----------------|--------|----------------|--------|
| 1845 . . . . . | 6,800  | 1860 . . . . . | 12,900 |
| 1850 . . . . . | 8,700  | 1865 . . . . . | 10,100 |
| 1855 . . . . . | 21,900 | 1869 . . . . . | 6,100  |

The average age of officers in 1866 was 37 years 8 months, and of men 26 years 3 months.

The annual death-rate for ten years ending 1884 averaged 10 per thousand. In 1885 it was only 7.6, which is about the same as in the United Kingdom, the arms varying thus :—

Engineers . . . 5.1 | Artillery . . . 6.7 | Train . . . 8.5  
Cavalry . . . 6.6 | Infantry . . . 7.5 | Zouaves . . . 9.7

There were in 1885 under the colours 452,000 men, whose aggregate of days in hospital was 6,300,000; this was equal to nearly 4 per cent. (3.8) of the men being constantly in hospital. The number of courts-martial in 1886 was as follows :—

|                    | Tried | Condemned |
|--------------------|-------|-----------|
| Officers . . . . . | 16    | 10        |
| Men . . . . .      | 5,549 | 4,750     |
| Total . . . . .    | 5,565 | 4,760     |

The numbers condemned in 1886 compared with 1882 thus :—

|                        | 1882  | 1886  |
|------------------------|-------|-------|
| Shot . . . . .         | 57    | 69    |
| Galley . . . . .       | 136   | 114   |
| Imprisonment . . . . . | 3,828 | 4,313 |
| Reprimand . . . . .    | 289   | 264   |
| Total . . . . .        | 4,310 | 4,760 |

#### GERMAN ARMY

The strength at various periods has been as follows :—

| Year           | Strength | Year           | Strength |
|----------------|----------|----------------|----------|
| 1810 . . . . . | 160,000  | 1865 . . . . . | 441,000  |
| 1831 . . . . . | 331,000  | 1871 . . . . . | 937,000  |
| 1851 . . . . . | 346,000  | 1890 . . . . . | 492,000  |

The army of Prussia at various dates was :—

|                |         |                |         |
|----------------|---------|----------------|---------|
| 1740 . . . . . | 76,000  | 1830 . . . . . | 162,000 |
| 1744 . . . . . | 95,000  | 1865 . . . . . | 239,000 |
| 1801 . . . . . | 220,000 | 1871 . . . . . | 750,000 |
| 1808 . . . . . | 42,000  | 1886 . . . . . | 377,000 |

The army in 1890 stands thus :—

|                        | 1890     |         |         | 1886    |         |              |         |
|------------------------|----------|---------|---------|---------|---------|--------------|---------|
|                        | Officers | Men     | Total   | Prussia | Bavaria | Other States | Total   |
| Horse . . . . .        | 2,360    | 65,000  | 67,360  | 51,000  | 7,000   | 7,000        | 65,000  |
| Foot . . . . .         | 11,200   | 329,000 | 340,200 | 267,000 | 40,000  | 38,000       | 345,000 |
| Artillery . . . . .    | 2,720    | 59,000  | 61,720  | 43,000  | 6,000   | 6,000        | 55,000  |
| Engineers, &c. . . . . | 3,220    | 19,500  | 22,720  | 16,000  | 3,000   | 3,000        | 22,000  |
| Total . . . . .        | 19,500   | 472,500 | 492,000 | 377,000 | 56,000  | 54,000       | 487,000 |
| Horses . . . . .       | ...      | ...     | ...     | 66,000  | 9,000   | 9,000        | 84,000  |

The strength of the principal garrisons in 1883 was as follows :—

|                 |                  |                  |
|-----------------|------------------|------------------|
| Berlin . 17,800 | Mayence . 7,700  | Konigsberg 6,400 |
| Metz . 14,400   | Cologne . 7,700  | Potsdam . 6,600  |
| Strasburg 9,000 | Coblentz . 6,400 | Magdeburg 6,100  |

The expenditure for the German army in 1889 amounted to £18,840,000, equal to £38 per man, of which £5,500,000 was for pay, £4,300,000 for food, and £1,200,000 for clothing.

#### RUSSIAN ARMY

The strength at various periods was as follows :—

| Year           | Force   | Year           | Force   | Year           | Force   |
|----------------|---------|----------------|---------|----------------|---------|
| 1712 . . . . . | 108,000 | 1800 . . . . . | 433,000 | 1855 . . . . . | 888,000 |
| 1725 . . . . . | 196,000 | 1812 . . . . . | 540,000 | 1869 . . . . . | 834,000 |
| 1750 . . . . . | 163,000 | 1827 . . . . . | 870,000 | 1874 . . . . . | 794,000 |
| 1765 . . . . . | 313,000 | 1846 . . . . . | 730,000 | 1888 . . . . . | 770,000 |

Official returns in 1801 showed that the army then consisted of 234,000 infantry, 180,000 cavalry and Cos-

In 1801 it consisted of 40,000 horse and 180,000 foot.

Before the dismemberment of the German Confederation in 1865, the army also included an Austrian contingent, which is not included above. For example, the confederate army in 1865 comprised :—

|                        | Men     | Horses  |
|------------------------|---------|---------|
| Prussia . . . . .      | 239,000 | 54,000  |
| Austria . . . . .      | 222,000 | 31,000  |
| Bavaria . . . . .      | 67,000  | 8,000   |
| Small States . . . . . | 135,000 | 17,000  |
| Total . . . . .        | 663,000 | 111,000 |

The forces in campaign against France at the outbreak of the war in August 1870, and their maximum in February 1871, are shown thus :—

|                         | August 1870 | February 1871 |
|-------------------------|-------------|---------------|
| Prussians . . . . .     | 564,000     | 719,000       |
| Bavarians . . . . .     | 98,000      | 105,000       |
| Saxons . . . . .        | 43,000      | 44,000        |
| Wurtembergers . . . . . | 27,000      | 29,000        |
| Various . . . . .       | 49,000      | 40,000        |
| Total . . . . .         | 781,000     | 937,000       |

The recruits annually enrolled, and the proportion unable to read and write, were as follows :—

| Period            | Recruits | Illiterate, per Cent. | Recruits for 1887     |
|-------------------|----------|-----------------------|-----------------------|
| 1876-80 . . . . . | 141,000  | 19                    | Prussia . . . 104,000 |
| 1881-87 . . . . . | 154,000  | 12                    | Bavaria . . . 20,500  |
| 1876 . . . . .    | 140,000  | 24                    | Other States . 44,500 |
| 1887 . . . . .    | 169,000  | 7                     | Total . . . 169,000   |

sacks, and 19,000 artillery, in all 433,000 men, but the actual fighting strength was believed hardly to reach 250,000. During the war with Turkey in 1827 the nominal strength was 650,000 infantry, 170,000 cavalry, and 50,000 artillery, in all 870,000, but the real force was probably under 500,000.

According to an official statement in 1890 the army is summed up thus :—

|                        | Peace   |       | War       |       |
|------------------------|---------|-------|-----------|-------|
|                        | Men     | Guns  | Men       | Guns  |
| Infantry . . . . .     | 386,000 | ...   | 810,000   | ...   |
| Cavalry . . . . .      | 57,000  | ...   | 156,000   | ...   |
| Artillery . . . . .    | 62,000  | 1,540 | 75,000    | 4,030 |
| Engineers, &c. . . . . | 50,000  | ...   | 71,000    | ...   |
| Cossacks . . . . .     | 52,000  | ...   | 138,000   | 240   |
| Reserves . . . . .     | 193,000 | ...   | 470,000   | 1,020 |
| Total . . . . .        | 800,000 | 1,540 | 1,720,000 | 5,290 |

The peace footing has 170,000 horses. The above does not include the Siberian force of 131,000 men and 300 guns.

The *Statesman's Year-Book* gives the following estimated war footing for the whole Empire:—

|                  | Com-<br>batants | Non-Com-<br>batants | Horses  | Guns  |
|------------------|-----------------|---------------------|---------|-------|
| European Russia  | 1,770,000       | 85,000              | 340,000 | 3,380 |
| Caucasia . . .   | 250,000         | 15,000              | 68,000  | 300   |
| Siberia, &c. . . | 130,000         | 8,000               | 36,000  | 196   |
| Total . . .      | 2,150,000       | 108,000             | 444,000 | 3,876 |

#### AUSTRO-HUNGARIAN ARMY

The strength at various dates showed thus:—

| Year       | Army    | Year       | Army    | Year       | Army    |
|------------|---------|------------|---------|------------|---------|
| 1740 . . . | 30,000  | 1809 . . . | 280,000 | 1866 . . . | 647,000 |
| 1805 . . . | 220,000 | 1830 . . . | 286,000 | 1889 . . . | 323,000 |

The establishment for 1889 stood thus:—

|                  | Peace<br>Footing | War Footing |          |           |
|------------------|------------------|-------------|----------|-----------|
|                  |                  | Army        | Reserves | Total     |
| Horse . . . .    | 48,000           | 64,000      | 29,000   | 93,000    |
| Foot . . . .     | 193,000          | 563,000     | 737,000  | 1,300,000 |
| Artillery . . .  | 30,000           | 91,000      | ...      | 91,000    |
| Engineers, &c. . | 52,000           | 110,000     | 37,000   | 147,000   |
| Total . . .      | 323,000          | 828,000     | 803,000  | 1,631,000 |

The reserves consist of 350,000 Landwehr and 453,000 Landsturm. The artillery has 850 guns in time of peace, and 2008 on a war footing. There are 49,000 horses in peace, and 217,000 on war footing. Of the standing army in time of peace, Austria contributes 60, Hungary 40 per cent.

The strength of the several arms compares thus:—

|                 | 1830    | 1889    | Ratio |       |
|-----------------|---------|---------|-------|-------|
|                 |         |         | 1830  | 1889  |
| Infantry . . .  | 196,000 | 193,000 | 68.5  | 59.8  |
| Cavalry . . .   | 45,000  | 48,000  | 15.8  | 14.8  |
| Artillery . . . | 31,000  | 30,000  | 10.8  | 9.3   |
| Engineers . . . | 14,000  | 52,000  | 4.9   | 16.1  |
| Total . . .     | 286,000 | 323,000 | 100.0 | 100.0 |

The proportion of conscripts rejected by the army doctors was much greater in ten years ending 1872 than before, viz:—

|                        | Rejected per 1000 |         |
|------------------------|-------------------|---------|
|                        | 1857-64           | 1863-72 |
| Under height . . .     | 113               | 197     |
| Physical infirmity . . | 343               | 553     |
| Total . . .            | 456               | 750     |

In the latter period the proportion of Austrians rejected as too short was relatively one-fourth greater than that of Hungarians.

#### ITALIAN ARMY

The strength at various dates of the military forces of the States now forming the kingdom of Italy was:—

| Year       | Army    | Year       | Army    |
|------------|---------|------------|---------|
| 1810 . . . | 75,000  | 1869 . . . | 190,000 |
| 1830 . . . | 85,000  | 1878 . . . | 215,000 |
| 1851 . . . | 142,000 | 1889 . . . | 255,000 |

The establishment in 1889 was composed as follows:—

|                       | Army       |              | Reserves |              | War Footing |
|-----------------------|------------|--------------|----------|--------------|-------------|
|                       | Under Arms | On Fur-lough | Mobile   | Terri-torial | Total       |
| Horse . . .           | 26,000     | 10,000       | ...      | 31,000       | 67,000      |
| Foot . . .            | 107,000    | 203,000      | 210,000  | 567,000      | 1,087,000   |
| Artillery . .         | 33,000     | 60,000       | 25,000   | 49,000       | 167,000     |
| Rifles . . .          | 13,000     | 29,000       | 22,000   | 36,000       | 100,000     |
| Carbineers .          | 24,000     | 4,000        | ...      | 9,000        | 37,000      |
| Engineers, }<br>&c. } | 52,000     | 81,000       | 42,000   | 63,000       | 238,000     |
| Total . . .           | 255,000    | 387,000      | 299,000  | 755,000      | 1,696,000   |

There is still another line of reserves, 1,069,000 men, which would bring up the total to 2,765,000.

The ratio of conscripts rejected by the army doctors shows thus:—

|                |              |                 |              |
|----------------|--------------|-----------------|--------------|
| From Rome . .  | 18 per cent. | From Piedmont   | 31 per cent. |
| " Naples . . . | 23 "         | " Venetia . . . | 34 "         |
| " Sicily . . . | 30 "         | " Lombardy . .  | 44 "         |

According to the *Annales de Demog.*, the above results were obtained from one million conscripts.

#### SPANISH ARMY

The strength at various dates was as follows:—

| Year       | Army   | Year       | Army    |
|------------|--------|------------|---------|
| 1810 . . . | 54,000 | 1851 . . . | 87,000  |
| 1831 . . . | 46,000 | 1889 . . . | 145,000 |

The actual establishment is as follows:—

|                 | Peace   | War     |
|-----------------|---------|---------|
| Horse . . . .   | 14,000  | 21,000  |
| Foot . . . .    | 116,000 | 343,000 |
| Artillery . . . | 11,000  | 30,000  |
| Engineers . . . | 4,000   | 7,000   |
| Total . . .     | 145,000 | 401,000 |

There are 104,000 men in Spain, 30,000 in Cuba and Porto Rico, and 11,000 in the Philippine Islands.

#### PORTUGUESE ARMY

The strength at various dates was as follows:—

| Year       | Army   | Year       | Army   |
|------------|--------|------------|--------|
| 1810 . . . | 10,000 | 1851 . . . | 28,000 |
| 1830 . . . | 26,000 | 1888 . . . | 26,000 |

Including reserves, the peace and war footings show thus:—

|              | Peace  | War     |
|--------------|--------|---------|
| Men . . . .  | 33,000 | 150,000 |
| Horses . . . | 4,000  | 13,000  |
| Guns . . . . | 132    | 264     |

The garrison of Portugal is 17,000; of the colonies, 9000 men.

#### SWEDISH ARMY

Before the annexation of Norway, the Swedish army in 1805 counted 11,000 horse, 24,000 foot, and 4000 artillery, in all 39,000 men. The combined strength of Sweden and Norway in 1830, on peace footing, was 42,000, and in 1851 it amounted to 57,000.

The present establishment is as follows:—

|               | Peace  |         |        | War     |         |         |
|---------------|--------|---------|--------|---------|---------|---------|
|               | Sweden | Nor-way | Total  | Sweden  | Nor-way | Total   |
| Horse . . .   | 5,000  | 1,300   | 6,300  | 9,000   | 3,000   | 12,000  |
| Foot . . .    | 27,500 | 15,000  | 42,500 | 157,500 | 34,000  | 191,500 |
| Artillery . . | 4,500  | 1,800   | 6,300  | 13,000  | 2,000   | 15,000  |
| Engineers . . | 1,300  | 700     | 2,000  | 10,500  | 1,000   | 11,500  |
| Total . . .   | 38,300 | 18,800  | 57,100 | 190,000 | 40,000  | 230,000 |

## DANISH ARMY

In 1805 it comprised the forces of Denmark and Norway, viz. :—

|                 | Denmark | Norway | Total  |
|-----------------|---------|--------|--------|
| Infantry . . .  | 30,000  | 34,000 | 64,000 |
| Cavalry . . .   | 7,100   | 3,200  | 10,300 |
| Artillery . . . | 3,100   | ...    | 3,100  |
| Total . . .     | 40,200  | 37,200 | 77,400 |

In 1830 the force was only 39,000, Norway having been united to Sweden, and even this must have included irregulars; the regular army in 1850 amounted only to 25,000 men. In 1889, the forces were approximately as follows :—

|                  | Peace  | Reserves | War Footing |
|------------------|--------|----------|-------------|
| Horse . . .      | 2,000  | 2,000    | 4,000       |
| Foot . . .       | 12,000 | 33,600   | 45,600      |
| Artillery, &c. . | 2,600  | 6,400    | 9,000       |
| Total . . .      | 16,600 | 42,000   | 58,600      |

The artillery has 120 field-guns in time of peace.

## DUTCH ARMY

The establishment in 1888 was approximately as follows :—

|                  | Peace  | Reserves | War Footing |
|------------------|--------|----------|-------------|
| Horse . . .      | 2,000  | 1,000    | 3,000       |
| Foot . . .       | 21,000 | 16,000   | 37,000      |
| Artillery . . .  | 5,000  | 9,000    | 14,000      |
| Engineers, &c. . | 1,000  | ...      | 1,000       |
| Total . . .      | 29,000 | 26,000   | 55,000      |

There is also a militia, numbering 100,000 men; also a colonial army in Java, comprising 34,000 men, of whom 15,000 are Dutch and 19,000 natives.

## BELGIAN ARMY

The establishment is as follows :—

|                  | Peace  |              | Peace  | War     |
|------------------|--------|--------------|--------|---------|
| Horse . . .      | 6,000  | Men . . .    | 47,500 | 148,000 |
| Foot . . .       | 31,000 | Horses . . . | 9,000  | 14,000  |
| Artillery, &c. . | 10,500 | Guns . . .   | 200    | 240     |
| Total . . .      | 47,500 |              | ...    | ...     |

In time of war the Civic Guard (42,000) could be added, making a total of 190,000 men.

The death-rate has been as follows per 1000 men yearly :—

| Year       | Rate | Year       | Rate | Year       | Rate |
|------------|------|------------|------|------------|------|
| 1835 . . . | 80   | 1860 . . . | 20   | 1880 . . . | 20   |
| 1850 . . . | 40   | 1870 . . . | 40   | 1888 . . . | 13   |

The military hospital returns were :—

| Year | Entries | Deaths | Deaths per 1000 Admitted | Days per Bed |
|------|---------|--------|--------------------------|--------------|
| 1870 | 21,380  | 310    | 15.0                     | 21           |
| 1880 | 16,290  | 190    | 12.4                     | 21           |
| 1886 | 17,660  | 184    | 10.5                     | 22           |

The levy averages 20,100 men, of whom 13,300 are passed to the colours; those rejected average 34 per cent. of the number drawn, 3½ per cent. being rejected as short of the required height.

## SWISS ARMY

In 1889 the force was as follows :—

|                  | Line    | Landwehr | Landsturm | War Footing |
|------------------|---------|----------|-----------|-------------|
| Horse . . .      | 3,000   | 3,000    | ...       | 6,000       |
| Foot . . .       | 96,000  | 65,000   | 260,000   | 421,000     |
| Artillery . . .  | 18,000  | 10,000   | 3,000     | 31,000      |
| Engineers, &c. . | 9,000   | 3,000    | ...       | 12,000      |
| Total . . .      | 126,000 | 81,000   | 263,000   | 470,000     |

The artillery has 42 guns in peace, and 300 on a war footing.

## GREEK ARMY

The strength in 1889 was as follows :—

|                  |        |              |        |
|------------------|--------|--------------|--------|
| Horse . . .      | 3,000  | Men . . .    | 26,000 |
| Foot . . .       | 16,000 | Horses . . . | 3,700  |
| Artillery, &c. . | 7,000  | Guns . . .   | 120    |
| Total . . .      | 26,000 |              |        |

By calling out the militia, the war footing could be raised to 105,000 men.

## ROUMANIAN ARMY

In 1889 the establishment was approximately as follows :—

|                  | Army   | Militia | War Footing |
|------------------|--------|---------|-------------|
| Horse . . .      | 4,000  | 4,000   | 8,000       |
| Foot . . .       | 23,000 | 75,000  | 98,000      |
| Artillery . . .  | 6,000  | 3,000   | 9,000       |
| Engineers, &c. . | 3,000  | ...     | 3,000       |
| Total . . .      | 36,000 | 82,000  | 118,000     |

## SERVIAN ARMY

The strength in 1889 was as follows, approximately :—

|                  |        |              |        |
|------------------|--------|--------------|--------|
| Horse . . .      | 1,000  | Men . . .    | 18,000 |
| Foot . . .       | 14,000 | Horses . . . | 2,000  |
| Artillery, &c. . | 3,000  | Guns . . .   | 144    |
| Total . . .      | 18,000 |              |        |

By calling out the reserves a war footing of 100,000 could be attained.

## BULGARIAN ARMY

In 1888 the strength was approximately thus :—

|                  |        |              |        |
|------------------|--------|--------------|--------|
| Horse . . .      | 2,000  | Men . . .    | 29,000 |
| Foot . . .       | 23,000 | Horses . . . | 2,000  |
| Artillery, &c. . | 4,000  | Guns . . .   | 96     |
| Total . . .      | 29,000 |              |        |

The war footing is estimated at 100,000.

## TURKISH ARMY

The strength at various dates was as follows :—

| Year       | Army    | Year       | Army    |
|------------|---------|------------|---------|
| 1810 . . . | 297,000 | 1869 . . . | 220,000 |
| 1855 . . . | 165,000 | 1889 . . . | 160,000 |

The present establishment is as follows :—

|                  |         |              |         |
|------------------|---------|--------------|---------|
| Horse . . .      | 20,000  | Men . . .    | 160,000 |
| Foot . . .       | 98,000  | Horses . . . | 25,000  |
| Artillery, &c. . | 42,000  | Guns . . .   | 1,190   |
| Total . . .      | 160,000 |              |         |

The reserves and Bashi-Bazonks are variously estimated. On paper, Turkey has a war footing of 800,000 men, but the total is generally supposed not to exceed 470,000.

#### UNITED STATES

The number of soldiers at various periods was:—  
1775–83, War of Independence, enrolled 231,800 men.  
1812, war with England, 68,000 men, of whom 32,400 regulars, the rest volunteers and militia.

1861–63, Federal Government enrolled 2,688,000 men; Confederate, 300,000.

In 1880 the army counted 2200 officers and 26,000 men, viz.:—Horse, 8000; foot, 15,000; artillery, &c., 3000. Two regiments of horse and two of foot are composed of negro soldiers, with white officers.

#### ARMIES OF SOUTH AMERICA

The following table shows approximately the disciplined forces of Spanish America:—

|                         | Horse  | Foot   | Artillery, &c. | Total  |
|-------------------------|--------|--------|----------------|--------|
| Mexico . . . .          | 5,500  | 19,500 | 2,500          | 27,500 |
| Central America . . . . | 1,200  | 5,000  | 800            | 7,000  |
| Columbia . . . .        | 1,000  | 4,000  | 1,000          | 6,000  |
| Venezuela . . . .       | 1,000  | 2,500  | 500            | 4,000  |
| Ecuador . . . .         | 500    | 2,000  | 500            | 3,000  |
| Peru . . . .            | 600    | 4,800  | 500            | 5,900  |
| Chile . . . .           | 1,000  | 4,000  | 500            | 5,500  |
| Bolivia . . . .         | 500    | 2,000  | 500            | 3,000  |
| Paraguay . . . .        | 100    | 400    | 100            | 600    |
| Uruguay . . . .         | 1,000  | 2,000  | 500            | 3,500  |
| Argentina . . . .       | 2,500  | 3,500  | 1,000          | 7,000  |
| Brazil . . . .          | 2,500  | 9,500  | 4,000          | 16,000 |
| Total . . . .           | 17,400 | 59,200 | 12,400         | 89,000 |

In time of war the numbers are doubled, or even quadrupled, by adding raw levies of peasants.

#### JAPANESE ARMY

The actual strength, according to the *Statesman's Year-Book*, is as follows:—

|                      |        |                |        |
|----------------------|--------|----------------|--------|
| Horse . . . .        | 3,000  | Men . . . .    | 60,500 |
| Foot . . . .         | 47,000 | Horses . . . . | 7,200  |
| Artillery, &c. . . . | 10,500 | Guns . . . .   | 160    |
| Total . . . .        | 60,500 | ...            | ...    |

There are also two lines of reserves, together 247,000 men, making up a total war footing of 307,500 men.

#### PERSIAN ARMY

It may be stated approximately as follows:—

|                      | Peace  | Reserves | War Footing |
|----------------------|--------|----------|-------------|
| Horse . . . .        | 6,000  | 19,200   | 25,200      |
| Foot . . . .         | 17,000 | 58,300   | 75,300      |
| Artillery, &c. . . . | 2,000  | 3,000    | 5,000       |
| Total . . . .        | 25,000 | 80,500   | 105,500     |

The real strength of the Empire on war footing is believed not to exceed 50,000 men.

#### ARMIES OF ANTIQUITY

| Date      | General                    | Number    | Observation        |
|-----------|----------------------------|-----------|--------------------|
| B.C. 480  | Xerxes                     | 1,800,000 | Invading Greece    |
| B.C. 332  | Darius                     | 750,000   | War with Alexander |
| A.D. 720  | Abderahman                 | 300,000   | Battle of Tours    |
| A.D. 1095 | { Godfrey de }<br>Bouillon | 300,000   | First Crusade      |

#### ARMY TRANSPORT

| Date         | Army of       | Number  | From     | To          | Miles | Days |
|--------------|---------------|---------|----------|-------------|-------|------|
| 193 . . . .  | Sept. Severus | 35,000  | Pannonia | Rome        | 800   | 40   |
| 1235 . . . . | Gelaleddin    | ...     | Tiflis   | Kerman      | 1,000 | 17   |
| 1805 . . . . | Napoleon      | 150,000 | Boulogne | Germany     | 450   | 25   |
| 1863 . . . . | Federals      | 25,000  | Kentucky | Vicksburg   | 1,000 | 4    |
| 1865 . . . . | Federals      | 16,000  | Eastport | New Orleans | 1,330 | 13   |
| 1866 . . . . | Austrians     | 123,000 | Venice   | Danube      | 500   | 10   |
| 1877 . . . . | Americans     | 400     | Atlanta  | Idaho       | 4,302 | 15   |

#### ASTRONOMY

According to Dr. Gould, there are 6100 stars in the Northern, and 7200 in the Southern Hemisphere distinctly visible to the naked eye. Mr. Proctor estimated the number of stars as follows:—

|                                |            |
|--------------------------------|------------|
| Down to 10th magnitude . . . . | 1,000,000  |
| " 11th " . . . .               | 3,000,000  |
| " 12th " . . . .               | 9,000,000  |
| " 13th " . . . .               | 27,000,000 |

According to the Paris Observatory, the number down to 14th magnitude is about 50 millions. Dr. Gould fixed the position of 85,000 stars in the Southern Hemisphere in his *Uranometria Argentina*.

It seems that the first catalogue of the stars was that by Tycho Brahe, which included 777 fixed stars, and was published about 1590. A second, embracing 2884 stars, was made in 1725 by the Astronomer Royal at Greenwich, Flamsteed. His successor, Bradley, noted the position of 60,000, and the two Herschels, father and son, made catalogues respectively of the northern and southern hemispheres. The second Herschel also made a catalogue of 4000 double stars.

The following table shows the number of observatories and the size of the principal telescopes in the world:—

| Observatories           |     | Telescopes                   |                 |
|-------------------------|-----|------------------------------|-----------------|
|                         |     |                              | Inches Aperture |
| United Kingdom . . . .  | 14  | Lord Rosse . . . .           | 72              |
| France . . . .          | 6   | Lassell . . . .              | 48              |
| Germany . . . .         | 29  | Herschell . . . .            | 48              |
| Russia . . . .          | 12  | Polkova . . . .              | 30              |
| Italy . . . .           | 9   | San José, California . . . . | 28              |
| Austria . . . .         | 8   | Vienna . . . .               | 27              |
| Switzerland . . . .     | 4   | Washington . . . .           | 26              |
| Other countries . . . . | 12  | Newcastle . . . .            | 25              |
| Europe . . . .          | 94  | Pultowa . . . .              | 16              |
| United States . . . .   | 19  | Cambridge, U.S. . . .        | 15              |
| Canada . . . .          | 1   | Paris . . . .                | 13              |
| Spanish America . . . . | 7   | Greenwich . . . .            | 12              |
| Asia . . . .            | 2   | Cincinnati . . . .           | 12              |
| Africa . . . .          | 2   | Munich . . . .               | 11              |
| Australia . . . .       | 3   | Rome . . . .                 | 10              |
| The World . . . .       | 128 | Berlin . . . .               | 10              |

Leyden Observatory was founded 1632, Copenhagen 1637, Greenwich 1675, Paris 1677.

## PLANETS

|                   | Miles Diameter | Millions of Miles      |                           |                              | Ratios of Size, Weight, &c. |        |         |              |
|-------------------|----------------|------------------------|---------------------------|------------------------------|-----------------------------|--------|---------|--------------|
|                   |                | Mean Distance from Sun | Least Distance from Earth | Greatest Distance from Earth | Size                        | Weight | Density | Days in Year |

| Encke . . . . .    | 3                   | 387                        | 32             | 1890        |

## STARS ACCORDING TO MAGNITUDE

| Magnitude      | No.        | Years for Light to Reach the Earth |
|----------------|------------|------------------------------------|
| 1st . . . . .  | 18         | 3                                  |
| 2nd . . . . .  | 55         | 6                                  |
| 3rd . . . . .  | 170        | 9                                  |
| 4th . . . . .  | 500        | 12                                 |
| 6th . . . . .  | 6,000      | 36                                 |
| 12th . . . . . | 10,000,000 | ...                                |

All down to the 36th magnitude inclusive, that is, over 8000 in number, are clearly visible to the naked eye. A 9-foot telescope reveals those of the 12th magnitude, an 18-foot one those of the 13th, whose light takes 2700 years reach to us. Down to the 13th inclusive comprises 27,000,000.

| 50 "     | W. F. Knapp .     | 2     | 29      | 41      | "    | F. W. Allard . | 2     | 43      | 54      | ..   |
| 100 "    | F. R. Fry . .     | 5     | 50      | 5       | 1883 | A. L. Bower .  | 6     | 9       | 26      | ..   |

G. P. Mills rode from Land's End to John o' Groats, 86½ miles, in 5 days 2 hours; another person, from Tunbridge to Liverpool, 234 miles, in 18½ hours. In 1879, G. Waller rode, at the Agricultural Hall, Islington, 1405 miles in 6 days of 18 hours; in 1880, at the same

place, H. Higham, 230 miles in 17 hours, without dismounting. In June 1888, in a six-days' race at Islington, between horse and bicycle, the horse won by 2 miles. In 1882 there were 9800 bicycle riders in London, and 96,000 in England and Wales.

## CRICKET

The highest individual score on record is 485, by A. E. Stoddart, in 1886, in a match of Hampstead v. Stoics. The largest gross score is 920, by the Orleans Club, 3rd August 1882.

The highest records of throwing the cricket-ball are:—

| Date | Throw      | Yards | Place     |
|------|------------|-------|-----------|
| 1873 | W. H. Game | 127   | Oxford    |
| 1888 | — Crane    | 128   | Melbourne |

Mr. Crane, the champion thrower, is an American.

## JUMPS

| Date | Jump          | Athlete       | Feet | Inches |
|------|---------------|---------------|------|--------|
| 1881 | Long standing | E. A. Johnson | 11   | 1      |
| 1883 | Long running  | P. Davin      | 23   | 2      |
| 1878 | High standing | E. A. Johnson | 5    | 3      |
| 1887 | High running  | W. Byrd Page  | 6    | 4      |
| 1886 | Pole jump     | Tom Ray       | 11   | 6      |

## RUNNING AND WALKING

| Date | Miles | Athlete         | Hours | Minutes | Seconds | Place      |
|------|-------|-----------------|-------|---------|---------|------------|
| 1886 | 1     | W. S. George    | 0     | 4       | 13      | London     |
| 1863 | 2     | W. Lang         | 0     | 9       | 11      | Manchester |
| 1863 | 5     | G. White        | 0     | 24      | 40      | ...        |
| 1885 | 10    | W. Cummings     | 0     | 51      | 7       | London     |
| 1880 | 20    | J. E. Warburton | 1     | 56      | 38      | ...        |
| 1881 | 30    | G. Mason        | 3     | 15      | 9       | ...        |
| 1881 | 40    | G. Bailey       | 4     | 34      | 27      | ...        |
| 1887 | 50    | G. Cartwright   | 5     | 55      | 5       | ...        |
| 1882 | 100   | C. Rowell       | 13    | 26      | 30      | New York   |

The greatest distance walked in one hour was 8 miles 172 yards by W. Griffin in 1881, and in four hours was 27½ miles by W. Franks in 1882. The greatest distance run in one hour was 11 miles 970 yards by Louis Bennett in 1863.

The following pedestrian feats in six days are recorded:—

| Date          | Miles | Athlete    | Place    |
|---------------|-------|------------|----------|
| 1880. . . . . | 550   | Brown      | London   |
| 1888. . . . . | 621   | Albert     | "        |
| 1888. . . . . | 623   | Littlewood | New York |
| 1882. . . . . | 660   | Hazel      | "        |

Mr. Hazel was an Englishman, and won £4000. In 1874, at Bristol, Miss Richards gained £50 for her aged parents by walking 1000 miles in 1000 consecutive hours. Mr. Weston has walked 5000 miles in 100 days.

## SKATING

| Date | Miles | Athlete       | Hours | Minutes | Seconds | Place     |
|------|-------|---------------|-------|---------|---------|-----------|
| 1889 | 1     | A. Paschin    | 0     | 2       | 57      | Vienna    |
| 1889 | 1     | O'Donoghue    | 0     | 2       | 57      | "         |
| 1890 | 2     | Norseng       | 0     | 6       | 25      | Amsterdam |
| 1884 | 3     | A. Paulsen    | 0     | 10      | 34      | New York  |
| 1890 | 5     | Norseng       | 0     | 16      | 48      | Amsterdam |
| 1884 | 10    | A. Paulsen    | 0     | 36      | 37      | New York  |
| 1884 | 20    | "             | 1     | 14      | 7       | "         |
| 1882 | 30    | S. Montgomery | 2     | 31      | 12      | "         |
| 1882 | 40    | "             | 3     | 21      | 22      | "         |
| 1882 | 50    | "             | 4     | 13      | 36      | "         |

## SWIMMING

Captain Webb swam from Dover to Calais, August 24, 1875, in 21 hours 45 minutes, but was beaten by William Beckwith in a swimming match for 90 miles in 60 hours. Lord Byron swam across the Dardanelles.

| Swimmer           | Distance             | Miles | Time    |
|-------------------|----------------------|-------|---------|
| Miss Beckwith . . | London to Greenwich  | ...   | ...     |
| Miss Parker . . . | London to Blackwall  | 7     | 95 min. |
| Miss Dicks . . .  | Shoreham to Brighton | 6     | ...     |
| Miss Saigeman . . | "                    | 6     | ...     |
| Fr. Cavil . . . . | Putney to Blackwall  | 16    | 4 hrs.  |
| " . . . .         | Calais to Dover      | 23    | 13 hrs. |

Miss Beckwith was only 14 years of age when she swam from London to Greenwich (1875).

| Date          | Distance  | Swimmer    | Hrs. | Min. | Sec. |
|---------------|-----------|------------|------|------|------|
| 1884. . . . . | 1 mile    | J. Collier | 0    | 28   | 20   |
| 1881. . . . . | 500 yards | J. Finney  | 0    | 7    | 7    |

## BOAT RACES

The quickest runs from Putney to Mortlake were:—

| Year         | Winner    | Minutes | Seconds |
|--------------|-----------|---------|---------|
| 1869 . . . . | Oxford    | 20      | 4       |
| 1873 . . . . | Cambridge | 19      | 35      |

In 45 years Oxford won 23, Cambridge 21, and one was a dead heat.

## B.

## BALLOON

The most remarkable ascents on record are:—

| Date | Aeronaut      | Place of Ascent | Height, Yards | Distance, Miles |
|------|---------------|-----------------|---------------|-----------------|
| 1783 | Montgolfier . | Lyons . . .     | 2,000         | ...             |
| 1804 | Gay-Lussac .  | Paris . . .     | 7,700         | ...             |
| 1836 | Holland . . . | London . .      | ...           | 500             |
| 1859 | Wise . . . .  | New York .      | ...           | 1,150           |
| 1862 | Glaisher . .  | Wolverton .     | 12,000        | ...             |

During the siege of Paris, September 1870 to February 1871, there were 64 balloons sent up, containing 91 passengers, 354 pigeons, and 3 million letters (weighing 9 tons). Mr. Glaisher states that in 3500 balloon ascents only fifteen deaths have occurred, that is, about four per thousand.

Mr. Godard, who died in November 1890, made over 2000 ascents. Charles Green, who died in 1870, had made 600; and Mr. Coxwell, who is still living, over 700, having attained with Mr. Glaisher a height of seven miles.

The results of Professor Glaisher's observations during nine ascents in 1863-64 were as follows:—

| Elevation, Feet | Decrease of Temperature, Fahr. |       | Humidity        |            |
|-----------------|--------------------------------|-------|-----------------|------------|
|                 | Cloudy Sky                     | Clear | Cloudy Sky (74) | Clear (59) |
| 1,000           | 4                              | 6     | 76              | 61         |
| 2,000           | 8                              | 11    | 76              | 70         |
| 5,000           | 18                             | 21    | 74              | 69         |
| 10,000          | 31                             | 34    | 48              | 46         |
| 15,000          | 42                             | 44    | 59              | 44         |
| 20,000          | 49                             | 52    | 39              | 33         |
| 25,000          | 52                             | 56    | 40              | 16         |
| 30,000          | ...                            | 62    | ...             | ...        |

## BANKS

The banking power of the world has increased in a surprising degree in the last fifty years, viz. :—

|                   | 1840       | 1870       | 1888-90    |
|-------------------|------------|------------|------------|
|                   | Millions £ | Millions £ | Millions £ |
| United Kingdom    | 132        | 720        | 910        |
| United States . . | 90         | 440        | 1,030      |
| France . . . . .  | 16         | 64         | 268        |
| Germany . . . .   | 12         | 49         | 231        |
| Australia . . . . | 5          | 38         | 134        |
| Canada . . . . .  | 3          | 12         | 40         |
| River Plate . . . | 2          | 9          | 37         |
| Other countries . | 48         | 270        | 547        |
| Total . . . . .   | 308        | 1,602      | 3,197      |

The issues of State banks in England, France, Austria, Germany, Russia, and United States, compared with specie reserve at the subjoined dates as follows:—

|                  | Issue, Millions £ |      |      | Specie Reserve, Millions £ |      |      |
|------------------|-------------------|------|------|----------------------------|------|------|
|                  | 1870              | 1880 | 1890 | 1870                       | 1880 | 1890 |
| Bank of England  | 24                | 27   | 25   | 21                         | 28   | 21   |
| Bank of France   | 58                | 92   | 120  | 50                         | 79   | 103  |
| Bank of Austria  | 30                | 33   | 42   | 11                         | 17   | 22   |
| German banks .   | 43                | 50   | 49   | 20                         | 31   | 42   |
| Bank of Russia . | 100               | 140  | 123  | 24                         | 28   | 33   |
| U. States banks  | 96                | 73   | 27   | 28                         | 68   | 229  |
| " Treasury       | 63                | 72   | 181  |                            |      |      |
| Total . . . . .  | 414               | 487  | 567  | 154                        | 251  | 450  |

In twenty years the specie reserve was trebled, while the paper issue only rose 33 per cent. The ratio of specie

to paper money in general was 38 per cent. in 1870, and 79 per cent. in 1890.

It appears that the amount of capital employed in banking has almost doubled since 1870, and multiplied nearly tenfold since 1840. Banking power consists of capital, right of issue, and deposits in all banks, viz. :—

|                         | Millions, £ Sterling |          |       | £ per Inhabitant |
|-------------------------|----------------------|----------|-------|------------------|
|                         | Capital, &c.         | Deposits | Total |                  |
| United Kingdom . . . .  | 284                  | 626      | 910   | 24.0             |
| France . . . . .        | 140                  | 128      | 268   | 7.0              |
| Germany . . . . .       | 85                   | 146      | 231   | 5.0              |
| Russia . . . . .        | 42                   | 64       | 106   | 1.2              |
| Austria . . . . .       | 45                   | 102      | 147   | 3.8              |
| Italy . . . . .         | 25                   | 83       | 108   | 3.6              |
| Spain . . . . .         | 31                   | 16       | 47    | 2.8              |
| Portugal . . . . .      | 6                    | 4        | 10    | 2.2              |
| Sweden . . . . .        | 9                    | 15       | 24    | 5.3              |
| Norway . . . . .        | 5                    | 1        | 6     | 3.0              |
| Denmark . . . . .       | 2                    | 21       | 23    | 11.6             |
| Belgium . . . . .       | 11                   | 19       | 30    | 5.0              |
| Holland . . . . .       | 14                   | 6        | 20    | 4.5              |
| Switzerland . . . . .   | 5                    | 12       | 17    | 6.0              |
| Europe . . . . .        | 704                  | 1,243    | 1,947 | 5.5              |
| United States . . . . . | 270                  | 760      | 1,030 | 16.1             |
| Australia . . . . .     | 26                   | 108      | 134   | 37.0             |
| Canada . . . . .        | 13                   | 27       | 40    | 8.0              |
| Cape Colony . . . . .   | 2                    | 7        | 9     | 6.0              |
| Argentina . . . . .     | 12                   | 17       | 29    | 8.0              |
| Uruguay . . . . .       | 3                    | 5        | 8     | 12.0             |
| Total . . . . .         | 1,030                | 2,167    | 3,197 | 7.5              |

The issue and specie reserves of the banks of all nations in 1889 were as follows :—

|                         | £ Sterling  |                | Specie Ratio |
|-------------------------|-------------|----------------|--------------|
|                         | Issue       | Specie in Safe |              |
| United Kingdom          | 39,000,000  | 28,000,000     | Per cent.    |
| France . . . . .        | 121,400,000 | 101,000,000    | 70           |
| Germany . . . . .       | 64,000,000  | 59,000,000     | 84           |
| Russia . . . . .        | 123,000,000 | 33,000,000     | 91           |
| Austria . . . . .       | 43,500,000  | 21,500,000     | 26           |
| Italy . . . . .         | 43,000,000  | 14,000,000     | 50           |
| Spain . . . . .         | 29,500,000  | 9,500,000      | 33           |
| Sweden . . . . .        | 6,300,000   | 2,700,000      | 32           |
| Norway . . . . .        | 2,400,000   | 2,500,000      | 44           |
| Denmark . . . . .       | 4,400,000   | 3,100,000      | 104          |
| Belgium . . . . .       | 15,200,000  | 4,400,000      | 70           |
| Holland . . . . .       | 17,200,000  | 10,600,000     | 29           |
| Switzerland . . . . .   | 6,200,000   | 3,900,000      | 60           |
| Greece . . . . .        | 3,000,000   | 1,000,000      | 63           |
| Europe . . . . .        | 518,100,000 | 294,200,000    | 33           |
| United States . . . . . | 26,700,000  | 34,300,000     | 47           |
| Canada . . . . .        | 6,300,000   | 1,400,000      | 128          |
| Australia . . . . .     | 5,400,000   | 19,300,000     | 22           |
| Cape Colony . . . . .   | 700,000     | 1,600,000      | 357          |
| Argentina . . . . .     | 44,000,000  | 4,500,000      | 230          |
| Uruguay . . . . .       | 3,100,000   | 600,000        | 10           |
| India . . . . .         | 12,000,000  | 12,000,000     | 20           |
| Total . . . . .         | 616,300,000 | 367,900,000    | 100          |

The above does not include Government issues (for which see *Money*). The specie reserve in Argentina and Uruguay is full of doubt.

The statements of the twelve great banks of Europe in December 1889 was as follows :—

| Bank of               | Issue, £    | Specie, £   | Deposits, £ | Discount, £ | Capital, £ |
|-----------------------|-------------|-------------|-------------|-------------|------------|
| England . . . . .     | 24,400,000  | 17,800,000  | 28,600,000  | 36,900,000  | 14,500,000 |
| France . . . . .      | 121,400,000 | 100,900,000 | 27,800,000  | 51,600,000  | 7,300,000  |
| Germany . . . . .     | 50,000,000  | 38,900,000  | 17,600,000  | 33,100,000  | 6,000,000  |
| Austria . . . . .     | 43,500,000  | 21,500,000  | 10,700,000  | 17,900,000  | 9,000,000  |
| Russia . . . . .      | 123,500,000 | 33,100,000  | 5,400,000   | 11,500,000  | 4,000,000  |
| Italy . . . . .       | 23,400,000  | 9,300,000   | 6,500,000   | 7,700,000   | 8,100,000  |
| Spain . . . . .       | 29,500,000  | 10,500,000  | 16,100,000  | 42,200,000  | 6,000,000  |
| Netherlands . . . . . | 17,200,000  | 10,600,000  | 1,200,000   | 9,500,000   | 2,000,000  |
| Belgium . . . . .     | 14,800,000  | 4,000,000   | 2,200,000   | 12,100,000  | 3,000,000  |
| Denmark . . . . .     | 4,400,000   | 3,100,000   | ...         | 2,000,000   | 1,000,000  |
| Sweden . . . . .      | 2,500,000   | 1,100,000   | 800,000     | 3,400,000   | 2,200,000  |
| Norway . . . . .      | 2,400,000   | 2,500,000   | 500,000     | 1,200,000   | 700,000    |
| Total . . . . .       | 457,000,000 | 253,300,000 | 117,400,000 | 229,100,000 | 63,700,000 |

The figures for Spain and Netherlands are those of March 1890, the deposits for Austria of 1887, and the Scandinavian banks 1888.

The rates of interest\* since 1851 have been as follows :—

|                       | 1851-60 | 1861-70 | 1871-80 | 1881-85 | Average, 35 Years | 1889 |
|-----------------------|---------|---------|---------|---------|-------------------|------|
| Great Britain . . . . | 4.17    | 4.23    | 3.28    | 3.30    | 3.81              | 3.55 |
| France . . . . .      | 4.30    | 3.55    | 3.94    | 3.34    | 3.84              | 3.18 |
| Germany . . . . .     | 4.05    | 4.56    | 4.30    | 4.20    | 4.28              | 3.70 |
| Austria . . . . .     | 5.26    | 4.77    | 4.79    | 4.71    | 4.91              | 4.12 |
| Italy . . . . .       | 5.35    | 5.69    | 4.85    | 4.74    | 5.22              | ...  |
| Holland . . . . .     | 3.60    | 3.98    | 3.40    | 3.56    | 3.64              | 2.50 |
| Belgium . . . . .     | 3.62    | 3.59    | 3.60    | 3.66    | 3.62              | 3.62 |
| Europe . . . . .      | 4.27    | 4.30    | 3.71    | 3.93    | 4.12              | 3.44 |

\* In the Middle Ages 10 per cent. was the ordinary rate. Philip Augustus promulgated a law in France in 1222 limiting the maximum to 10 per cent.

The discounts of the principal banks (according to Spallart, down to 1880), were :—

| Bank of—              | 1868         | 1880         | 1889-90      |
|-----------------------|--------------|--------------|--------------|
| England . . . . .     | £ 18,500,000 | £ 24,000,000 | £ 36,900,000 |
| France . . . . .      | 19,700,000   | 41,000,000   | 51,600,000   |
| Germany . . . . .     | 22,800,000   | 32,400,000   | 33,100,000   |
| Austria . . . . .     | 8,200,000    | 13,900,000   | 17,900,000   |
| Belgium . . . . .     | 5,800,000    | 10,100,000   | 12,100,000   |
| Holland . . . . .     | 3,200,000    | 4,600,000    | 9,500,000    |
| U. States banks . . . | 131,100,000  | 217,700,000  | 378,000,000  |
| Total . . . . .       | 209,300,000  | 343,700,000  | 539,100,000  |

It has been already shown that the banking power doubled between 1870 and 1888. The above table like-

**BANKING.**

*Banking Capital, millions £.*

*Savings-Banks Deposits, Shillings per Inhabitant.*

*Depositors per 1000 Inhabitants.*

wise shows that discounts more than doubled between 1868 and 1890.

The rates of exchange in London on the principal markets for forty-two years were :—

| Period  | London on |         |           | Calcutta on London | Price of Silver per Oz., Pence |
|---------|-----------|---------|-----------|--------------------|--------------------------------|
|         | Paris     | Hamburg | Amsterdam |                    |                                |
| 1841-50 | 25.76     | 13.12   | 12.1      | 23.1               | 59.8                           |
| 1851-60 | 25.44     | 13.08   | 11.4      | 25.1               | 61.6                           |
| 1861-70 | 25.46     | 13.09   | 11.6      | 24.3               | 60.5                           |
| 1871-80 | 25.55     | 20.62   | 12.3      | 21.6               | 56.1                           |
| 1881-82 | 25.53     | 20.67   | 12.5      | 19.9               | 51.7                           |
| 1885-89 | ...       | ...     | ...       | ...                | 45.0                           |

London rates on Paris from 1800 to 1880 were :—

| Period  | Highest | Lowest | Average | Date of Highest | Date of Lowest |
|---------|---------|--------|---------|-----------------|----------------|
| 1800-10 | 25.2    | 19.6   | 22.4    | 1805            | 1809           |
| 1811-20 | 26.1    | 17.6   | 22.0    | 1816            | 1811           |
| 1821-30 | 25.9    | 25.2   | 25.6    | 1829            | 1824           |
| 1831-40 | 25.9    | 25.2   | 25.5    | 1832            | 1831           |
| 1841-50 | 26.7    | 24.9   | 25.8    | 1848            | 1850           |
| 1851-60 | 25.5    | 24.9   | 25.4    | 1856            | 1851           |
| 1861-70 | 25.5    | 25.0   | 25.4    | 1869            | 1869           |
| 1871-80 | 26.9    | 25.2   | 25.6    | 1872            | 1874           |

The rates of interest in the United States, according to the New England Mutual Insurance Company, have steadily declined in the last twenty-one years, viz. :—

| Years   | Per Cent. |
|---------|-----------|
| 1869-73 | 6.1       |
| 1874-78 | 5.9       |
| 1879-83 | 5.0       |
| 1884-89 | 4.7       |

Berlin rates on the other great cities were as follows :—

|                | 1875   | 1880   | 1887   | 1888   |
|----------------|--------|--------|--------|--------|
| London         | 20.60  | 20.44  | 20.35  | 20.48  |
| Paris          | 81.60  | 80.95  | 80.70  | 81.00  |
| Amsterdam      | 174.90 | 169.10 | 168.65 | ...    |
| Vienna         | 183.50 | 170.70 | 160.60 | 172.60 |
| St. Petersburg | 281.25 | 213.80 | 202.80 | 193.80 |

The use of cheques compared with money at various dates and places shows thus :—

| Date | Place               | Per Cent. |                |
|------|---------------------|-----------|----------------|
|      |                     | Cheques   | Notes and Coin |
| 1839 | London              | 93.2      | 6.8            |
| 1859 | "                   | 96.8      | 3.2            |
| 1881 | "                   | 98.9      | 1.1            |
| 1859 | Provinces           | 47.3      | 52.7           |
| 1872 | "                   | 68.2      | 31.8           |
| 1881 | England and Wales   | 97.0      | 3.0            |
| 1881 | New York            | 98.7      | 1.3            |
| 1881 | Western States      | 81.7      | 18.3           |
| 1881 | United States       | 91.6      | 8.4            |
| 1881 | United States Banks | 94.4      | 5.6            |

|          | Paid Capital | Reserve    | Value of Stock | Deposits    | Discounts   | Assets        |
|----------|--------------|------------|----------------|-------------|-------------|---------------|
| England  | 53,800,000   | 27,800,000 | 165,500,000    | 387,700,000 | 289,800,000 | 517,100,000   |
| Scotland | 9,100,000    | 5,600,000  | 22,900,000     | 88,300,000  | 58,000,000  | 113,400,000   |
| Ireland  | 7,000,000    | 3,100,000  | 17,700,000     | 37,800,000  | 27,600,000  | 54,800,000    |
| Colonial | 43,000,000   | 19,100,000 | 77,600,000     | 240,700,000 | 303,100,000 | 387,000,000   |
| Total    | 112,900,000  | 55,600,000 | 283,700,000    | 754,500,000 | 678,500,000 | 1,072,300,000 |

The cheques paid in London and New York in one month aggregate 1270 millions sterling, which is much in excess of all the gold and silver coin in existence.

The business of the principal clearing-houses shows thus :—

| LONDON  |             |            | NEW YORK |             |            |
|---------|-------------|------------|----------|-------------|------------|
| Year    | Millions, £ | Per Day, £ | Year     | Millions, £ | Per Day, £ |
| 1817    | 880         | 2,900,000  | 1853     | 261         | 800,000    |
| 1839    | 980         | 3,200,000  | 1863     | 3,486       | 11,000,000 |
| 1867-70 | 3,540       | 12,000,000 | 1873     | 5,665       | 18,000,000 |
| 1871-80 | 5,210       | 17,000,000 | 1881     | 7,723       | 25,000,000 |
| 1881    | 6,383       | 20,500,000 | 1886     | 6,750       | 21,500,000 |
| 1889    | 7,620       | 25,400,000 | ...      | ...         | ...        |

The clearing-houses of thirty-six cities in the United States show the following aggregate returns :—

|      |                          |
|------|--------------------------|
| 1886 | 10,240 millions sterling |
| 1889 | 11,580 " "               |

The latest annual returns for Continental cities are, in millions sterling, thus: Berlin, 3780; Paris, 2200; Vienna, 498.

#### UNITED KINGDOM

The banking power has multiplied more than tenfold since 1825, viz. :—

| Year | Million £ | £ per Inhabitant |
|------|-----------|------------------|
| 1825 | 89        | 4.1              |
| 1835 | 101       | 4.0              |
| 1840 | 132       | 5.0              |
| 1850 | 260       | 9.3              |
| 1874 | 782       | 24.4             |
| 1890 | 910       | 24.0             |

The figures from 1825 to 1840 are taken from the *British Almanac*, those since 1850 from the *Banker's Magazine*, viz. :—

| Banks   | Million £           |      |       |
|---------|---------------------|------|-------|
|         | Capital and Deposit |      |       |
|         | 1850                | 1874 | 1890  |
| English | 207                 | 628  | 871   |
| Scotch  | 36                  | 106  | 111   |
| Irish   | 17                  | 48   | 56    |
| Total   | 260                 | 782  | 1,038 |

In the interval of twenty-four years from 1850 to 1874 the increase of banking power averaged 22 millions sterling per annum, and in that of sixteen years down to 1890 it averaged 16 millions per annum. In the whole period of forty years, about £18,500,000 per annum.

In the above table capital stands for the market value of the stock. English includes foreign and colonial banks domiciled in London, as appears from the following statement for 1890 :—

The value of stock or share capital along with the deposits makes up a total banking power of 1038 millions sterling; but this includes 128 millions of deposits belonging to the Colonies, deducting which, we find the banking power of the United Kingdom is 910 millions sterling. There are in the United Kingdom 4460 banking offices, representing 175 joint-stock banks, whose stock is held among 90,000 shareholders.

The Bank of England was founded in 1694 by Rev. W. Patterson, a Scotchman, who died in poverty. The principal features of its business are indicated below.

The capital of the Bank has risen as follows :—

| Year           | £          | Year           | £          |
|----------------|------------|----------------|------------|
| 1694 . . . . . | 1,200,000  | 1782 . . . . . | 11,600,000 |
| 1708 . . . . . | 4,400,000  | 1816 . . . . . | 14,500,000 |
| 1746 . . . . . | 10,800,000 | 1882 . . . . . | 14,500,000 |

| Year | Yearly Average |             |              |             |
|------|----------------|-------------|--------------|-------------|
|      | Issue          | Deposits    | Securities   | Bullion     |
| 1780 | £ 8,400,000    | £ 4,700,000 | £ 10,900,000 | £ 3,600,000 |
| 1790 | 10,000,000     | 6,200,000   | 10,300,000   | 8,600,000   |
| 1800 | 16,800,000     | 7,100,000   | 21,400,000   | 6,100,000   |
| 1810 | 21,000,000     | 12,500,000  | 35,400,000   | 3,500,000   |
| 1820 | 23,500,000     | 4,100,000   | 26,200,000   | 4,900,000   |
| 1830 | 20,100,000     | 20,800,000  | 24,200,000   | 9,200,000   |
| 1840 | 16,500,000     | 6,600,000   | 21,600,000   | 4,300,000   |
| 1850 | 20,400,000     | 18,400,000  | 26,000,000   | 16,000,000  |
| 1860 | 21,500,000     | 18,800,000  | 29,400,000   | 14,000,000  |
| 1870 | 24,500,000     | 24,200,000  | 29,500,000   | 22,300,000  |
| 1880 | 27,100,000     | 33,100,000  | 34,800,000   | 27,900,000  |
| 1882 | 25,700,000     | 28,800,000  | 37,100,000   | 20,400,000  |
| 1886 | 24,400,000     | 29,400,000  | 34,100,000   | 21,900,000  |
| 1890 | 24,600,000     | 32,300,000  | 36,600,000   | 20,800,000  |

The Bank first issued £10 notes in 1759, and £5 notes

The note issue of the United Kingdom was as follows :—

|                    | 1844         | 1854         | 1864         | 1874         | 1889         |
|--------------------|--------------|--------------|--------------|--------------|--------------|
| England . . . . .  | £ 28,400,000 | £ 27,900,000 | £ 26,700,000 | £ 31,500,000 | £ 27,200,000 |
| Scotland . . . . . | 3,000,000    | 4,100,000    | 4,300,000    | 6,000,000    | 5,700,000    |
| Ireland . . . . .  | 5,900,000    | 6,400,000    | 5,600,000    | 6,800,000    | 5,800,000    |
| Total . . . . .    | 37,300,000   | 38,400,000   | 36,600,000   | 44,300,000   | 38,700,000   |

The issue and specie reserves in 1849 and 1887 were as follows :—

|                       | 1849       |            |                 | 1887       |            |                 |
|-----------------------|------------|------------|-----------------|------------|------------|-----------------|
|                       | Issue, £   | Specie, £  | Ratio of Specie | Issue, £   | Specie, £  | Ratio of Specie |
| Bank of England . . . | 18,300,000 | 14,300,000 | Per Cent. 79    | 24,400,000 | 21,200,000 | Per Cent. 87    |
| All other banks . . . | 13,900,000 | 2,600,000  | 19              | 14,200,000 | 6,800,000  | 48              |
| Total, United Kingdom | 32,200,000 | 16,900,000 | 53              | 38,600,000 | 28,000,000 | 73              |

#### FRANCE.

Banking power seems to have increased seventeen-fold since 1839, viz. :—

| Year           | Millions, £ Sterling | £ per Inhabitant |
|----------------|----------------------|------------------|
| 1839 . . . . . | 16                   | 0.5              |
| 1869 . . . . . | 64                   | 1.7              |
| 1881 . . . . . | 268                  | 7.3              |

According to the *Journal des Economistes*, the increase of banking power between 1869 and 1881 was fourfold, viz. :—

in 1793.\* Specie payments were suspended in 1797, consequent on the war with France, and one-pound notes issued. The notes steadily depreciated till 1813, when a £5 note was worth 73s., a loss of 27 per cent., that is to say, gold was at 37 per cent. premium. From 1814 a progressive improvement took place, until specie payments were resumed in 1821. The rate of interest was as follows :—

| Period    | Per Cent. |        |         |
|-----------|-----------|--------|---------|
|           | Highest   | Lowest | Average |
| 1694-1800 | 6.0       | 3.0    | 4.5     |
| 1801-1850 | 8.0       | 2.5    | 4.5     |
| 1851-1860 | 10.0      | 2.0    | 4.1     |
| 1861-1870 | 10.0      | 2.0    | 4.2     |
| 1871-1880 | 9.0       | 2.0    | 3.3     |
| 1881-1888 | 5.8       | 2.0    | 3.3     |

The year which had the highest average was 1864, namely, 7½ per cent., although the rate never exceeded 9 in that year; the year with lowest average was 1852, namely, 2½ per cent. The rate has only twice reached 10 per cent.—in the crises of 1857 and 1866. The maximum issue of notes was in March 1879, namely, 31 millions sterling, and the highest bullion reserve in September of same year, namely, £35,500,000. In the crisis of 1857 the bullion reserve fell to £6,400,000. Deposits reached a maximum in June 1879, namely, 37 millions.

\* There had been, nevertheless, issued at earlier dates, as the records show, viz. :—

| Year           | £         | Year           | £         |
|----------------|-----------|----------------|-----------|
| 1700 . . . . . | 860,000   | 1740 . . . . . | 4,500,000 |
| 1710 . . . . . | 600,000   | 1750 . . . . . | 4,200,000 |
| 1720 . . . . . | 2,500,000 | 1760 . . . . . | 4,900,000 |
| 1730 . . . . . | 4,200,000 | 1770 . . . . . | 5,500,000 |

|                    | 1869, Millions, £ | 1881, Millions, £ |
|--------------------|-------------------|-------------------|
| Capital . . . . .  | 32                | 140               |
| Deposits . . . . . | 32                | 128               |
| Total . . . . .    | 64                | 268               |

The number of joint-stock banks was 20 in 1869, and 192 in 1881. There is no statement of capital and deposits in 1839, but as the turnover of the Bank of France for that year was one-fourth of the same in 1869, it is reasonable to infer that banking business had increased in the same degree. In 1881, on the authority above stated, there were in Paris 51 banks with a paid-up

capital of £48,200,000.\* In 1889 were published the balance-sheets of 46 banks in France with an aggregate paid-up capital of £59,000,000. The market value of the stock being £96,000,000, that is, an average premium of 63 per cent.; the aggregate dividend was £4,600,000, or almost 8 per cent. on capital. The Bank of France was founded in 1803, capital £3,650,000 in shares of £40, with sole right of issue; no notes to be under £4. In 1857 the capital was doubled, the Bank lending the Government 40 millions sterling and receiving permission to issue £2 notes, the limit of issue being raised to 72 millions sterling. During the Franco-German war of 1870-71 the Government demands reached 260 millions sterling, the Bank being authorised to suspend specie payments and issue small notes down to five francs. The limit of issue was ultimately raised in 1872 to 128 millions sterling, at which it now stands. The Bank has 90 branches in the Departments. Official returns show as follows:—

| Year | Issue, £    | Gold, Reserve, £ | Gold and Silver, £ | Year's Discounts, £ | Bank Rate |
|------|-------------|------------------|--------------------|---------------------|-----------|
| 1800 | 640,000     | 300,000          | 300,000            | 3,800,000           | 6.0       |
| 1810 | 4,000,000   | 800,000          | 1,700,000          | 31,700,000          | 4.0       |
| 1820 | 6,200,000   | ...              | 7,800,000          | 12,200,000          | 4.7       |
| 1830 | 9,000,000   | 100,000          | 5,800,000          | 24,700,000          | 4.0       |
| 1840 | 9,000,000   | 800,000          | 9,900,000          | 44,200,000          | 4.0       |
| 1850 | 19,800,000  | 700,000          | 18,300,000         | 46,800,000          | 4.0       |
| 1860 | 29,400,000  | ...              | 20,600,000         | 198,600,000         | 3.6       |
| 1870 | 62,600,000  | 23,400,000       | 45,200,000         | 265,000,000         | 4.0       |
| 1880 | 92,400,000  | 27,200,000       | 81,000,000         | 348,000,000         | 2.8       |
| 1889 | 114,800,000 | 53,300,000       | 103,800,000        | 340,000,000         | 3.2       |

The *Almanach de Gotha* (1888) compares the aggregate banking returns as follows:—

|                   | 1875        | 1880        | 1885        | 1888        |
|-------------------|-------------|-------------|-------------|-------------|
| Issue             | £52,500,000 | £49,200,000 | £53,000,000 | £64,400,000 |
| Specie reserve    | 33,800,000  | 37,000,000  | 38,200,000  | 59,400,000  |
| Current discounts | 179,000,000 | 157,000,000 | 165,000,000 | 164,000,000 |

In 1875 there were thirty-three banks of issue, but the number soon after fell to nineteen, the Reichsbank or Imperial German Bank having bought up several of them.

Besides the above banking issue the Government had £6,700,000 of Treasury notes in circulation.

The average rate of discount at Berlin for eight years ending 1889 was 3.9 per cent.

The Bank of Prussia (now the Imperial Bank) was founded in 1765, capital two millions sterling; this was doubled in 1856, the Government taking one-fourth of the stock, and giving it a charter to issue notes up to three times the amount of bullion at any time on hand. In 1875 it was reconstructed as the Imperial Bank, capital £6,000,000 in shares of £150 each; the Government drew out its capital, and the bank agreed to pay £100,000 per annum as royalty to the Imperial Treasury. The books of the old bank down to 1870 showed the turn-over thus:—

|      |             |      |             |
|------|-------------|------|-------------|
| 1820 | £11,400,000 | 1850 | £77,100,000 |
| 1830 | 35,500,000  | 1860 | 208,000,000 |
| 1840 | 45,200,000  | 1870 | 830,000,000 |

The turn-over of the Imperial Bank in 1877 was 2377 millions sterling.

The Bank of Munich, capital £1,700,000, has an issue

\* Deposits in 1881 were made up thus:—

|                 |             |
|-----------------|-------------|
| Bank of France  | £34,100,000 |
| 22 large banks  | 81,200,000  |
| 170 small banks | 12,700,000  |

Total . . . £128,000,000

The share of discounts done at Paris was as follows:—

|                | 1840  | 1850  | 1860  | 1870  | 1880  | 1887  |
|----------------|-------|-------|-------|-------|-------|-------|
| Paris . . . .  | 84.3  | 29.2  | 32.7  | 43.2  | 47.0  | 47.2  |
| Branches . . . | 15.7  | 70.8  | 67.3  | 56.8  | 53.0  | 52.8  |
| Total . . . .  | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

In 1887 the average amount per bill was £30 sterling; 1,600,000 were for sums under £4.

#### GERMANY

If we take the annual turn-over of the Bank of Prussia as a measure of the banking power of Germany, the latter may be set down thus:—

| Year | Banking Power, Millions £ Sterling |
|------|------------------------------------|
| 1840 | 7                                  |
| 1850 | 11                                 |
| 1860 | 31                                 |
| 1870 | 125                                |
| 1888 | 231                                |

In 1876 Germany had 195 joint-stock banks with an aggregate capital of £85,000,000. Deposits in 1888 reached £146,000,000. This gives a total banking power of 231 millions, but the official return for 1887 gives the total of current discounts at only 164 millions sterling. The discount business is distributed thus:—

|                      |              |
|----------------------|--------------|
| Imperial Bank        | £25,700,000  |
| Other banks of issue | 14,500,000   |
| Joint-stock, &c.     | 123,800,000  |
| Total                | £164,000,000 |

of about one million sterling; those of Dresden and Stuttgart less. The aggregate issue of the minor banks in December 1887 amounted to £17,100,000; that of the Imperial Bank to £43,300,000.

#### RUSSIA

It appears that the banking capital is as follows:—

|                 |             |
|-----------------|-------------|
| Imperial Bank   | £4,000,000  |
| 29 great banks  | 15,000,000  |
| 347 small banks | 23,000,000  |
| Total           | £42,000,000 |

The latest complete returns are those of 1878, which showed an aggregate of deposits reaching 64 millions sterling. This makes the total banking power 106 millions. The aggregate of discounts was 82 millions sterling. The Imperial Bank was founded in 1859, with sole right of issue. It materially serves the Government by printing inconvertible paper money, the amount of which in circulation is 123 millions sterling, and has twenty-six branches in various parts of the Empire. The balance-sheet for December 1889 was as follows:—

|          | Liabilities, £ |                  | Assets, £   |
|----------|----------------|------------------|-------------|
| Issue    | 123,000,000    | Bullion          | 33,100,000  |
| Capital  | 4,000,000      | Discounts        | 11,500,000  |
| Deposits | 5,400,000      | Government bonds | 90,500,000  |
| Sundries | 27,600,000     | Sundries         | 24,900,000  |
| Total    | 160,000,000    | Total            | 160,000,000 |

For Land banks and Mortgage banks, see farther on.

## AUSTRIA

Official returns of all banks for 1887 were as follows :—

|                  | Austria    | Hungary    | Total       |
|------------------|------------|------------|-------------|
|                  | £          | £          | £           |
| Paid capital . . | 24,200,000 | 14,000,000 | 38,200,000  |
| Reserve fund . . | 4,000,000  | 3,200,000  | 7,200,000   |
| Deposits . . .   | 65,000,000 | 36,600,000 | 101,600,000 |
| Banking power .  | 93,200,000 | 53,800,000 | 147,000,000 |

The Austro-Hungarian Bank has the exclusive right of issue until December 1897. It was founded in 1861; capital £3,000,000 in shares of £60 each, with authority to issue uncovered notes up to 20 millions sterling, in notes from two shillings upwards. It was remodelled in 1880, the capital being raised to £9,000,000 sterling. The balance-sheet for 1887 showed :—

|                | Liabilities, £ |             | Assets, £  |
|----------------|----------------|-------------|------------|
| Capital . . .  | 9,000,000      | Cash . . .  | 22,400,000 |
| Issue . . .    | 39,100,000     | Discounts . | 16,000,000 |
| Mortgages, &c. | 12,900,000     | Sundries .  | 22,600,000 |
| Total . .      | 61,000,000     | Total . .   | 61,000,000 |

The issue and reserve have been :—

| Year       | Issue      | Reserve    | Ratio of Reserve | Premium on Gold |
|------------|------------|------------|------------------|-----------------|
|            | £          | £          | Per Cent.        | Per Cent.       |
| 1848 . . . | 27,600,000 | 3,100,000  | 11.2             | ...             |
| 1870 . . . | 29,700,000 | 11,200,000 | 37.0             | ...             |
| 1875 . . . | 28,600,000 | 13,400,000 | 47.0             | 17              |
| 1880 . . . | 32,900,000 | 17,300,000 | 52.5             | 21              |
| 1890 . . . | 42,500,000 | 21,400,000 | 50.1             | 25              |

The discounts of this bank during eight years ending 1885 averaged £5,900,000 in Vienna, £2,600,000 in Buda-Pesth, and £5,900,000 in the provinces; total, £14,400,000. The specie reserve in July 1890 was composed of £5,000,000 gold and £16,400,000 silver. There are 52 Austrian and 144 Hungarian joint-stock banks, besides 836 People's Banks in Hungary, and 1178 in Austria.

## ITALY

Banking power in 1881 amounted to 87 millions sterling, viz. :—

|                         | Capital and Reserve Fund | Deposits   | Total      |
|-------------------------|--------------------------|------------|------------|
| Bank of Italy . .       | 6,900,000                | 8,700,000  | 19,500,000 |
| 5 chartered banks .     | 3,900,000                |            |            |
| 113 joint-stock banks . | 8,200,000                |            |            |
| 362 other banks . .     | 4,200,000                | 17,500,000 | 25,700,000 |
|                         |                          | 37,300,000 | 41,500,000 |
| Total . . .             | 23,200,000               | 63,500,000 | 86,700,000 |

In 1889 the capital and deposits of all banks (exclusive of Post-Office savings banks) were approximately as follows :—

|                    | Capital, £ | Deposits, £ | Banking-Power, £ |
|--------------------|------------|-------------|------------------|
| Chartered banks .  | 12,600,000 | 28,500,000  | 41,100,000       |
| Joint-stock, &c. . | 12,400,000 | 54,100,000  | 66,500,000       |
| Total . .          | 25,000,000 | 82,600,000  | 107,600,000      |

The current discounts of the six great banks in 1889 amounted to 31 millions sterling, or three-fourths of their banking power.

The oldest chartered bank is that of Naples, founded in 1816, which now occupies the second rank, coming next after the Bank of Italy, founded in 1850. There are four other chartered banks with right of issue.

The returns of the chartered banks in 1876 were as follows :—

| Founded | Name            | Capital and Reserve, £ | Number of Branches | Issue, £   |
|---------|-----------------|------------------------|--------------------|------------|
| 1850    | Bank of Italy . | 6,900,000              | 68                 | 16,300,000 |
| 1816    | " " Naples .    | 1,700,000              | 12                 | 5,800,000  |
| 1857    | " " Tuscany .   | 900,000                | 8                  | 2,000,000  |
| 1850    | " " Rome .      | 700,000                | 1                  | 1,600,000  |
| 1843    | " " Sicily .    | 400,000                | 8                  | 1,500,000  |
| 1860    | Tuscan Credit . | 200,000                | 1                  | 600,000    |
|         | Total . .       | 10,800,000             | 98                 | 27,800,000 |

The Bank of Italy has a nominal capital of 10 millions sterling, of which 8 millions are paid-up, and a reserve fund of £1,600,000. It has right of issue up to 40 millions sterling, its actual issue in 1889 being £23,200,000, and its specie reserve £9,400,000, equal to 40 per cent. Taking the aggregate of discount business of the six chartered banks, the Bank of Italy stands for 40 per cent. of the total, according to returns published for 1875 and 1876, viz. :—

|                           | Number of Bills Discounted |           | Amount for Twelve Months |             |
|---------------------------|----------------------------|-----------|--------------------------|-------------|
|                           | 1875                       | 1876      | 1875                     | 1876        |
| Bank of Italy .           | 546,000                    | 555,000   | 51,600,000               | 46,100,000  |
| Other 5 chartered banks } | 792,000                    | 785,000   | 84,100,000               | 72,500,000  |
| Total .                   | 1,338,000                  | 1,340,000 | 135,700,000              | 118,600,000 |

The bills in the Bank of Italy averaged 60, those in the other banks, 36 days. The amount of each bill was £90 in the five chartered banks, £81 in the Bank of Italy, and £44 in the joint-stock banks.

In December 1889 the Bank of Italy showed :—

|                                |             |                  |              |
|--------------------------------|-------------|------------------|--------------|
| Capital and reserve fund . . . | £ 9,600,000 | Issue . . . . .  | £ 23,400,000 |
| Deposits . . . . .             | 6,500,000   | Specie . . . . . | 9,300,000    |

## SPAIN

In June 1890 the Bank of Spain had notes in circulation to the amount of £30,000,000, against a specie reserve of £11,500,000. The deposits reached £16,200,000, and discounts £43,500,000. The Bank of Madrid has likewise issue up to £1,000,000.

## PORTUGAL

Banking power is much greater than might be expected, a statement published in 1878 giving the aggregate of banks as follows :—

|                    |             |
|--------------------|-------------|
| Capital . . . . .  | £ 6,000,000 |
| Deposits . . . . . | 3,500,000   |

Banking power . . . . . 9,500,000

Nevertheless usurers do a large business. In 1861 they held mortgages for six millions sterling on real estate, interest 15 to 20 per cent.

## SWITZERLAND

Banking power 17 millions sterling, the returns of all Swiss banks in 1880 showing thus:—

|                         |             |
|-------------------------|-------------|
| Capital . . . . .       | £ 4,500,000 |
| Deposits . . . . .      | 12,200,000  |
| Banking power . . . . . | 16,700,000  |

Free banking is the rule, and there are thirty-four banks of issue, which show:—

| Year           | Issue<br>£ | Specie Reserve<br>£ |
|----------------|------------|---------------------|
| 1871 . . . . . | 1,000,000  | ...                 |
| 1877 . . . . . | 2,900,000  | 1,400,000           |
| 1885 . . . . . | 5,000,000  | 3,100,000           |
| 1890 . . . . . | 6,200,000  | 3,900,000           |

The aggregate of discounts or bills in portfolio in 1877 was £6,900,000. The paid-up capital of the thirty-four banks is £4,900,000.

## HOLLAND

The Netherlands Bank was founded in 1814, with sole right of issue up to 25 millions sterling, provided the specie reserve never fell below 40 per cent., the notes to have forced currency side by side with Government Treasury notes up to £1,200,000. The capital was at first £1,280,000 in £80 shares, but it has since been raised to two millions sterling. There are fifteen branches through Holland, and the notes are from £2 upwards. The statements for 1877 and 1890 showed thus:—

|                          | 1877<br>£  | 1890<br>£  |
|--------------------------|------------|------------|
| Issue . . . . .          | 15,800,000 | 17,200,000 |
| Specie reserve . . . . . | 12,800,000 | 10,600,000 |

Discounts average £9,600,000 (or 86 millions yearly), the average term of bills being under forty days. There are 287 other banks and branches, holding deposits to the sum of £4,800,000. Total banking power about 20 millions sterling.

## BELGIUM

The Bank of Belgium was founded in 1850, capital two millions sterling, which has since been raised to three millions in £40 shares, with sole right of issue. It has forty branches, and circulates notes from 16s. to £40. The balance-sheets showed as follows:—

| Year | Issue, £   | Bullion, £ | Deposits, £ | Discounts, £ | Rate |
|------|------------|------------|-------------|--------------|------|
| 1851 | 2,000,000  | 1,200,000  | 1,000,000   | 1,800,000    | 4.0  |
| 1860 | 4,800,000  | 2,500,000  | 3,300,000   | 6,200,000    | 3.2  |
| 1870 | 8,100,000  | 3,800,000  | 3,300,000   | 7,800,000    | 3.4  |
| 1880 | 13,600,000 | 4,000,000  | 2,900,000   | 11,400,000   | 3.4  |
| 1890 | 15,200,000 | 4,400,000  | 2,700,000   | 12,800,000   | 3.6  |

There are fifty-two other banks, the oldest, that of Flanders, founded at Ghent in 1836. The aggregate balance-sheets for 1888 showed:—

|                        |            |                            |            |
|------------------------|------------|----------------------------|------------|
| Paid capital . . . . . | 7,600,000  | Discounts . . . . .        | 16,600,000 |
| Reserve fund . . . . . | 3,200,000  | Loans & advances . . . . . | 8,200,000  |
| Deposits, &c. . . . .  | 16,400,000 | Sundries . . . . .         | 2,400,000  |
| Liabilities . . . . .  | 27,200,000 | Assets . . . . .           | 27,200,000 |

The total banking power is just 30 millions £.

## SWEDEN

The Riks-bank or State Bank of Sweden was founded in 1656 by John Palmstruck, having obtained right of issue. It stopped payment four times, viz., in 1745, 1776, 1808, and 1813. The creditors received 70 per cent. in 1776, and 37 per cent. in 1813.

In 1830 the first of the Enskilda or private banks of issue was established, of which there are now 28, with 153 branches all over Sweden. They issue notes from £5 upwards, their specie reserve never falling below 35 per cent. The shareholders must be Swedes, each bank with a minimum capital of £55,000, and each shareholder individually liable up to the whole of that sum. The stock of the 28 banks in 1876 was held by 9100 persons.

The other fifteen joint-stock banks have no right of issue, and the shareholders are liable for no more than the amount of their shares.

Returns of all banks in 1889 showed as follows:—

|                          | State Bank  | Joint-Stock, &c. | Total       |
|--------------------------|-------------|------------------|-------------|
| Capital . . . . .        | £ 2,200,000 | £ 4,600,000      | £ 6,800,000 |
| Reserve fund . . . . .   | 300,000     | 900,000          | 1,200,000   |
| Issue . . . . .          | 2,500,000   | 3,800,000        | 6,300,000   |
| Deposits . . . . .       | 800,000     | 14,100,000       | 14,900,000  |
| Sundries . . . . .       | 1,700,000   | 10,400,000       | 12,100,000  |
| Liabilities . . . . .    | 7,500,000   | 33,800,000       | 41,300,000  |
| Bullion . . . . .        | 1,100,000   | 1,600,000        | 2,700,000   |
| Treasury bills . . . . . | 1,100,000   | 2,200,000        | 3,300,000   |
| Discounts . . . . .      | 3,400,000   | 17,400,000       | 20,800,000  |
| Cash, &c. . . . .        | 1,900,000   | 12,600,000       | 14,500,000  |
| Assets . . . . .         | 7,500,000   | 33,800,000       | 41,300,000  |

## NORWAY

The balance-sheets for 1888 summed up thus:—

|                         | Norges    | Joint-Stock, &c. | Total       |
|-------------------------|-----------|------------------|-------------|
| Paid capital . . . . .  | £ 700,000 | £ 800,000        | £ 1,500,000 |
| Reserve fund . . . . .  | 230,000   | 170,000          | 400,000     |
| Deposits . . . . .      | 500,000   | 10,200,000       | 10,700,000  |
| Banking power . . . . . | 1,430,000 | 11,170,000       | 12,600,000  |

The discounts of the Norges or State bank average £1,200,000, that is, £9,600,000 in a year, the average term being forty-five days. The Norges was founded in 1816 with sole right of issue, capital £450,000, since raised to £700,000, with a reserve fund of £230,000. It can issue up to £3,000,000: the actual issue in 1888 was only £2,400,000, and the bullion reserve was £2,500,000.

## DENMARK

The capital and deposits of all banks in Denmark in 1886 were as follows:—

|                    |             |
|--------------------|-------------|
| Capital . . . . .  | £ 2,200,000 |
| Deposits . . . . . | 20,800,000  |
| Total . . . . .    | 23,000,000  |

In 1813 the currency was on a bad footing, gold being at 300 per cent. premium, and the notes only worth one-fourth of their written value.

In 1814 the Bank of Copenhagen was converted into a Riks-bank, with sole right of issue up to £2,250,000, provided the specie reserve never fell below 50 per cent.; it fell to 40 per cent. in 1865, but the notes remained at par.

The charter was enlarged in 1860. The balance-sheet for 1888 showed thus: issue, £4,400,000; bullion, £3,100,000; discounts about £2,000,000. The first joint-stock bank was established at Copenhagen in 1857, with a paid-up capital of £700,000; in 1876 its discounts averaged £1,000,000.

## SERVIA

There are 37 banks, the principal being the National, with sole right of issue, and a paid-up capital of £800,000 sterling; the issue in 1889 was £1,200,000, specie reserve, £180,000. The others are 16 ordinary and 22 savings-banks.

The balance-sheets for 1881 and 1890 compare as follows:—

|                             | Deposits, £ |             | Discounts, £ |             |
|-----------------------------|-------------|-------------|--------------|-------------|
|                             | 1881        | 1890        | 1881         | 1890        |
| New South Wales . . . . .   | 18,800,000  | 34,600,000  | 17,200,000   | 39,800,000  |
| Victoria . . . . .          | 20,400,000  | 39,300,000  | 18,200,000   | 48,900,000  |
| Queensland . . . . .        | 3,400,000   | 9,900,000   | 4,000,000    | 17,100,000  |
| South Australia . . . . .   | 4,500,000   | 7,300,000   | 5,500,000    | 9,000,000   |
| New Zealand . . . . .       | 9,300,000   | 12,200,000  | 11,500,000   | 14,500,000  |
| Tasmania . . . . .          | 2,300,000   | 4,100,000   | 1,600,000    | 3,500,000   |
| Western Australia . . . . . | 300,000     | 900,000     | 400,000      | 1,400,000   |
| Total . . . . .             | 59,000,000  | 108,300,000 | 58,400,000   | 134,200,000 |

## AUSTRALIA

The increase of banking power is shown by the following statement of discounts and deposits:—

| Year           | Discounts, £ | Deposits, £ |
|----------------|--------------|-------------|
| 1872 . . . . . | 31,500,000   | 32,000,000  |
| 1881 . . . . . | 58,400,000   | 59,000,000  |
| 1890 . . . . . | 134,200,000  | 108,300,000 |

|                           | 1890      |            |                         |
|---------------------------|-----------|------------|-------------------------|
|                           | Issue     | Bullion    | Deposits per Inhabitant |
|                           | £         | £          | £ s. d.                 |
| New South Wales . . . . . | 1,520,000 | 5,200,000  | 38 0 0                  |
| Victoria . . . . .        | 1,670,000 | 6,900,000  | 43 0 0                  |
| Queensland . . . . .      | 670,000   | 2,200,000  | 25 0 0                  |
| South Australia . . . . . | 450,000   | 1,700,000  | 22 0 0                  |
| New Zealand . . . . .     | 880,000   | 2,400,000  | 18 10 0                 |
| Tasmania . . . . .        | 160,000   | 600,000    | 27 10 0                 |
| West Australia . . . . .  | 50,000    | 300,000    | 22 10 0                 |
| Total . . . . .           | 5,400,000 | 19,300,000 | 29 0 0                  |

The percentages of banking business in the principal provinces were in 1881 as follows:—

|                          |      |
|--------------------------|------|
| Quebec . . . . .         | 55.4 |
| Ontario . . . . .        | 35.1 |
| Nova Scotia, &c. . . . . | 9.5  |

Total . . . . . 100.0

Bullion reserve in 1888 was only £1,400,000, or 22 per cent. of issue. Liabilities of all the banks, £34,400,000; assets, £50,800,000, being 48 per cent. over liabilities.

## SOUTH AFRICA

Banking power is about nine millions sterling, capital two millions, deposits £7,000,000. The returns of 1887 for the two colonies were:—

|                          | Cape      | Natal     | Total     |
|--------------------------|-----------|-----------|-----------|
|                          | £         | £         | £         |
| Issue . . . . .          | 460,000   | 150,000   | 610,000   |
| Deposits . . . . .       | 5,950,000 | 1,200,000 | 7,150,000 |
| Specie reserve . . . . . | 1,300,000 | 300,000   | 1,600,000 |
| Discounts . . . . .      | 6,600,000 | 1,200,000 | 7,800,000 |

In 1888 the issue of Cape Colony reached £660,000, and the eleven banks had an aggregate of £2,350,000 in paid-up capital and reserve fund. Assets, £10,600,000.

## CANADA

In 1888 there were 41 banks, an increase of 14 since 1868; the balance-sheets summed up as follows:—

|                         | 1868       | 1878       | 1888       |
|-------------------------|------------|------------|------------|
|                         | £          | £          | £          |
| Paid capital . . . . .  | 6,300,000  | 13,100,000 | 12,500,000 |
| Deposits . . . . .      | 6,900,000  | 15,000,000 | 26,800,000 |
| Banking power . . . . . | 13,200,000 | 28,100,000 | 39,300,000 |
| Issue . . . . .         | 1,800,000  | 4,100,000  | 6,300,000  |
| Discounts . . . . .     | ...        | ...        | 31,200,000 |

## UNITED STATES

In 1783 the total banking capital was only £600,000; it appears to have multiplied twelve-fold in the ensuing eighteen years. We have regular statistics from 1801, as follows:—

| Year           | Number of Banks | Capital, £  | Deposits, £ | Issue, £   | Specie Reserve, £ | Ratio of Reserve |
|----------------|-----------------|-------------|-------------|------------|-------------------|------------------|
|                |                 |             |             |            |                   | Per Cent.        |
| 1801 . . . . . | 33              | 7,000,000   | ...         | ...        | ...               | ...              |
| 1811 . . . . . | 89              | 11,000,000  | ...         | 5,800,000  | 3,100,000         | 53               |
| 1815 . . . . . | 208             | 17,100,000  | ...         | 9,600,000  | 3,500,000         | 36               |
| 1820 . . . . . | 308             | 28,400,000  | 7,500,000   | 9,400,000  | 4,200,000         | 45               |
| 1830 . . . . . | 330             | 30,200,000  | 11,600,000  | 12,700,000 | 4,600,000         | 36               |
| 1836 . . . . . | 689             | 48,000,000  | 10,100,000  | 27,600,000 | 8,200,000         | 30               |
| 1840 . . . . . | 901             | 74,400,000  | 15,800,000  | 24,400,000 | 6,900,000         | 28               |
| 1845 . . . . . | 707             | 42,800,000  | 18,400,000  | 18,700,000 | 9,200,000         | 49               |
| 1850 . . . . . | 872             | 47,200,000  | 27,100,000  | 32,200,000 | 10,200,000        | 31               |
| 1860 . . . . . | 1,562           | 87,600,000  | 52,800,000  | 43,000,000 | 17,500,000        | 41               |
| 1870 . . . . . | ...             | 130,000,000 | 420,000,000 | 62,800,000 | ...               | ...              |
| 1876 . . . . . | 6,611           | 149,600,000 | 432,000,000 | 69,400,000 | ...               | ...              |
| 1882 . . . . . | 7,448           | 149,200,000 | 604,200,000 | 65,600,000 | 21,400,000        | 33               |
| 1887 . . . . . | 6,666           | 167,600,000 | 684,100,000 | 34,800,000 | 34,300,000        | 99               |
| 1889 . . . . . | 6,721           | 180,100,000 | 759,400,000 | 26,700,000 | 34,300,000        | 128              |

In the above table it is well to remember that the figures for 1870 are depreciated paper-money at 13 per cent. discount, and 10 per cent. in 1876. Discounts in 1879 comprised 3,200,000 bills for 700 millions sterling, say £220 each.

The first bank was that of Massachusetts, founded in 1740, the second that of North America in 1781, the third that of New York in 1784. The United States Bank was established at Philadelphia in 1790 with a capital of \$10,000,000, having several branches, and col-

lapsed in the "Wild Cat" crisis of 1837. There were 901 banks in the year 1840, but the land speculation that ensued smashed more than 200, the number falling to 691 in 1843. From the latter year steady progress was made till 1861, when the war for the Union brought a suspension of specie payments. Nevertheless rapid advance was made till 1876, when a new tax on banks caused a contraction of about 10 per cent. in the capital employed in banking, without, however, causing any decline in the amount of deposits or discounts.

From information contained in the *Statesman's Year-Book* and the official Abstract for 1890, the banking of the Union may be summed up thus:—

| Banks              | No.   | Capital      | Reserve Fund | Deposits     | Discounts    |
|--------------------|-------|--------------|--------------|--------------|--------------|
| National . . . . . | 3,194 | £125,000,000 | £41,000,000  | £317,000,000 | £378,000,000 |
| State . . . . .    | 1,403 | 32,200,000   | 11,800,000   | 85,400,000   | ...          |
| Private . . . . .  | 1,323 | 19,600,000   | 10,700,000   | 73,100,000   | ...          |
| Savings . . . . .  | 801   | 3,300,000    | 27,500,000   | 283,900,000  | ...          |
| Total . . . . .    | 6,721 | 180,100,000  | 91,000,000   | 759,400,000  | ...          |

The above shows a total banking power of 1030 millions sterling.

The National banks showed the following balance-sheets:—

|                    | Liabilities  |              |                     | Assets       |              |
|--------------------|--------------|--------------|---------------------|--------------|--------------|
|                    | 1880         | 1889         |                     | 1880         | 1889         |
| Capital . . . . .  | £130,000,000 | £166,000,000 | Discounts . . . . . | £216,000,000 | £378,000,000 |
| Issue . . . . .    | 66,000,000   | 26,700,000   | Bullion . . . . .   | 20,800,000   | 34,000,000   |
| Deposits . . . . . | 185,000,000  | 317,000,000  | Bonds . . . . .     | 75,000,000   | 30,400,000   |
| Sundries . . . . . | 57,000,000   | 114,300,000  | Sundries . . . . .  | 126,200,000  | 181,600,000  |
| Total . . . . .    | 438,000,000  | 624,000,000  | Total . . . . .     | 438,000,000  | 624,000,000  |

In the above table capital includes also reserve fund.

The ratio of banking power to population was as follows:—

| Year           | Banking Power | Population | Banking Power per Head |
|----------------|---------------|------------|------------------------|
| 1801 . . . . . | £7,000,000    | £5,300,000 | 1.3                    |
| 1820 . . . . . | 35,900,000    | 9,600,000  | 3.8                    |
| 1840 . . . . . | 90,200,000    | 17,100,000 | 5.3                    |
| 1860 . . . . . | 140,400,000   | 31,400,000 | 4.4                    |
| 1876 . . . . . | 581,600,000   | 44,400,000 | 13.1                   |
| 1889 . . . . . | 1,030,500,000 | 64,000,000 | 16.1                   |

The distribution of banking power, according to official returns, was:—

| States                | Million, £ Sterling |      |      |
|-----------------------|---------------------|------|------|
|                       | 1850                | 1860 | 1880 |
| New England . . . . . | 18                  | 34   | 162  |
| Middle . . . . .      | 33                  | 63   | 274  |
| Southern . . . . .    | 19                  | 33   | 35   |
| Western . . . . .     | 4                   | 10   | 125  |
| Total . . . . .       | 74                  | 140  | 596  |

No other than National banks have right of issue, and they compare with the earlier chartered banks of issue in 1811-30 as follows:—

| Year           | Capital     | Issue      | Deposit     |
|----------------|-------------|------------|-------------|
| 1811 . . . . . | £5,100,000  | £2,700,000 | £...        |
| 1820 . . . . . | 13,000,000  | 5,500,000  | 4,100,000   |
| 1830 . . . . . | 19,800,000  | 8,100,000  | 6,800,000   |
| 1889 . . . . . | 125,000,000 | 26,700,000 | 317,000,000 |

In 1880 the shares of the National Banks were held by 208,000 persons, showing an average banking capital of £700 per shareholder, against £800 in Great Britain. Of 7 million shares, only 26,000 were held in Europe, of which 7000 in Great Britain.

#### MEXICO

The Banco Nacional, founded in 1881, has a nominal capital of 20 million dollars or £3,000,000 sterling, of which only 40 per cent. is paid up. Its issue in December 1888 was 14 millions, say £2,100,000 sterling, and balance-sheet 48 millions, say £7,200,000. The Bank of London and Mexico has a capital of £300,000, and no issue; balance-sheet, £1,500,000. There are various land-banks.

#### CHILE

There are nineteen banks of issue, aggregate capital 23 million dollars, say £2,500,000; issue, 17 millions, or £1,800,000. The balance-sheets of these banks in December 1886 showed:—

| Bank of                  | Dollars     | £ Sterling |
|--------------------------|-------------|------------|
| Valparaiso . . . . .     | 83,000,000  | 9,100,000  |
| Chile . . . . .          | 66,000,000  | 7,200,000  |
| Guarantees . . . . .     | 50,000,000  | 5,500,000  |
| Edwards . . . . .        | 16,500,000  | 1,800,000  |
| Fifteen others . . . . . | 68,500,000  | 7,500,000  |
| Total . . . . .          | 284,000,000 | 31,100,000 |

#### BRAZIL

In December 1886 there were sixteen banks, whose balance-sheets showed as follows:—

| Bank             | £          | Bank                | £          |
|------------------|------------|---------------------|------------|
| Brazil . . .     | 26,900,000 | London and Brazil   | 3,100,000  |
| Rural . . .      | 7,400,000  | English . . .       | 2,200,000  |
| Commercial . . . | 5,500,000  | International . . . | 2,000,000  |
| Industrial . . . | 3,300,000  | Nine others . . .   | 11,600,000 |

Summing up a total of 62 millions sterling. The Bank of Brazil was remodelled in 1872, with a paid-up capital of £3,600,000 in shares of £22 each; it has a reserve fund of £500,000, and a right of issue until December 1900 of £3,000,000 sterling; it must always lend up to 70 per cent. of its capital to planters, at 6 per cent. annual interest.

## JAPAN

In December 1889 were published the accounts of 100 National Banks, with an aggregate capital of £7,100,000, the Tokio Bank standing for £3,500,000. Of the total number, 69 paid dividends ranging from 10 to 20 per cent., and 31 paid less than 10 per cent.

## ARGENTINA

In 1884 there were six banks at Buenos Ayres, with an aggregate banking power of 35 millions sterling, viz. :—

|                    | Capital, £ | Deposits, £ | Total, £   |
|--------------------|------------|-------------|------------|
| B. of Buenos Ayres | 6,600,000  | 13,400,000  | 20,000,000 |
| National . . . . . | 4,100,000  | 2,800,000   | 6,900,000  |
| Four foreign banks | 4,400,000  | 3,600,000   | 8,000,000  |
| Total . . . . .    | 15,100,000 | 19,800,000  | 34,900,000 |

In 1885 specie payments were suspended, and a number of banks sprung up issuing forced currency notes. In September 1889 there were 52 banks in Buenos Ayres and the other provinces of Argentina, with an aggregate capital of 185 million dollars, nominally 37 millions sterling, but the currency dollar having lost 67 cents of its value, the capital (in July 1890) is only equal to 12 millions sterling. Deposits in like manner were nominally close on 50 millions sterling, equivalent to 17 millions in gold. Banking power is therefore about 29 millions.

In September 1889 the aggregate balance-sheets of 24 banks (nothing being stated of the other 28) showed as follows :—

|                        | Gold, \$   | Paper, \$   | Nominal Value in £ Sterling | Approximate Real Value in 1890, £ |
|------------------------|------------|-------------|-----------------------------|-----------------------------------|
| Capital . . . . .      | 8,500,000  | 149,600,000 | 31,600,000                  | 10,500,000                        |
| Reserve fund . . . . . | 1,600,000  | 2,200,000   | 700,000                     | 200,000                           |
| Deposits . . . . .     | 66,300,000 | 166,000,000 | 46,400,000                  | 15,500,000                        |
| Discounts . . . . .    | 85,200,000 | 253,700,000 | 68,000,000                  | 22,700,000                        |
| Cash . . . . .         | 28,700,000 | 28,300,000  | 10,400,000                  | 3,500,000                         |

Paper issue has risen as follows :—

| Year           | Million \$  | Real Value Reduced to Gold, £ |
|----------------|-------------|-------------------------------|
| 1836 . . . . . | 15,000,000  | 360,000                       |
| 1840 . . . . . | 51,000,000  | 300,000                       |
| 1852 . . . . . | 125,000,000 | 1,250,000                     |
| 1877 . . . . . | 711,000,000 | 4,500,000                     |
| 1884 . . . . . | 56,000,000  | 11,200,000                    |
| 1890 . . . . . | 270,000,000 | 18,000,000                    |

In 1881 the old currency was called in and converted, one new dollar being given for 25 old ones. Another

issue called Cédulas is described under *Land Banks*, p. 85.

## URUGUAY

Banking power is about 8 millions sterling, discounts in June 1889 showing more or less as follows :—

|                              |           |
|------------------------------|-----------|
| National Bank . . . . .      | 3,800,000 |
| Four foreign banks . . . . . | 4,300,000 |
| Total . . . . .              | 8,100,000 |

Issue and reserve of specie were as follows :—

|                           | Issue, £  |           | Reserve of Specie, £ |
|---------------------------|-----------|-----------|----------------------|
|                           | 1882      | 1889      | 1889                 |
| National Bank . . . . .   | ...       | 1,700,000 | 1,100,000            |
| All other banks . . . . . | 1,100,000 | 1,400,000 | 1,900,000            |
| Total . . . . .           | 1,100,000 | 3,100,000 | 3,000,000            |

The National Bank suspended specie payments in June 1890.

## LAND BANKS

In many countries there are institutions called Land Banks or Mortgage Banks for lending money or debentures on real estate.

*France.*—The Credit Foncier, founded in 1852, capital £3,600,000, has the power to issue debentures up to £72,000,000. The issue was as follows :—

| Year | Issue, £   | No. of Mortgages | Average, £ |
|------|------------|------------------|------------|
| 1856 | 3,050,000  | 1,390            | 2,100      |
| 1866 | 31,170,000 | 12,180           | 2,500      |
| 1873 | 46,480,000 | 20,116           | 2,300      |

Deducting the amount redeemed, the actual issue in 1873 was £34,700,000. The Credit Agricole, founded in 1860, has a paid-up capital of £800,000; issue outstanding in 1873 about 15 millions sterling.

*Germany.*—The Bank of Munich has a Mortgage branch, being compelled by law to keep £1,200,000 always lent out to agriculturists at 4 per cent. per annum, the mortgage never to exceed 50 per cent. of the value of the farm. In 1864 it commenced to issue debentures bearing 4½ per cent. interest, the borrower having also to pay ½ per cent. sinking-fund. The borrower in selling these debentures gets barely 90 per cent. cash. In 1871 the issue had reached £5,000,000. The Bank of Nuremberg also grants loans on mortgage. Saxony has four Land Banks of this description, the borrower paying 5 per cent. for forty-one years, when the loan is extinct. The Ritter's Bank of Leipzig is a mutual landowner's bank, making advances only to its members, interest 4 per cent. The Wurttemberg Land Bank makes advances to small proprietors at 6 per cent., including sinking-fund, the loan becoming extinct in twenty-five years. The Mortgage Bank of Prussia, founded in 1810, issues 4 per cent. debentures; the issue and the market price were as follows :—

| Year | Issue, £   | Maximum | Minimum | Average Price |
|------|------------|---------|---------|---------------|
| 1815 | 9,500,000  | 103     | 64      | 84            |
| 1835 | 14,100,000 | 107     | 101     | 104           |
| 1845 | 16,500,000 | 105     | 94      | 100           |
| 1868 | 28,800,000 | 84      | 78      | 81            |

The above was mainly for impoverished noblemen. The Rent-charge Bank, founded in 1811, had issued to peasant proprietors debentures up to 13 millions sterling prior to 1870; these bore 4 per cent. interest, and sold in the market at 87 per cent. of nominal value; outstanding £11,500,000. The amount advanced on mortgage by

banks and private individuals in 1870 was officially stated thus:—

|                        | £           |
|------------------------|-------------|
| Prussia . . . . .      | 190,000,000 |
| Bavaria . . . . .      | 25,000,000  |
| Saxony . . . . .       | 26,000,000  |
| Wurtemberg . . . . .   | 10,000,000  |
| Small States . . . . . | 22,000,000  |
| Total . . . . .        | 273,000,000 |

In 1837 it was found that many of the nobles had mortgaged their estates beyond their value, in some cases up to 114 per cent. From 1858 to 1867 the authorities sold off 34,000 bankrupt estates, which reduced the sum due by Prussian noblemen to the Land-banks to 25 millions sterling. The Mortgage Bank of Bavaria, distinct from the Munich Bank, was founded in 1848, to enable the peasants to buy their lands. In twenty-two years, down to 1870, the debentures issued by it reached 18½ millions sterling, the amount outstanding being £15,300,000. In 1880 the Land-banks of Germany had an aggregate capital of 18 millions sterling, and the debentures in circulation summed up 80 millions sterling.

*Russia.*—The Imperial Bank as early as 1859 had advanced 30 millions sterling on mortgage to the nobles, who owed altogether 60 millions sterling. Subsequently a separate office or bank was started as a Mortgage-bank, and in December 1889 the amount of existing loans on mortgage was 196 million roubles, nominally £31,000,000, but at the present exchange only £19,600,000. Moreover, a Land-bank was founded about 1861 to help the peasants to buy their lands from the nobles. According to Sir A. Buchanan, the peasants owed 85 millions sterling in 1875; this was perhaps an error, as the *Statesman's Year-Book* gives the following:—"Up to December 1889, the Land-bank lent 58 million roubles (say £5,800,000) to 234,000 peasants towards purchasing 4,240,000 acres, valued at £7,300,000, the peasants finding the remaining £1,500,000. The peasants did not buy individually, but in 7240 villages or associations. The above purchases only refer to Beggar's Lots (see *Land*), as the peasants in ten years, ending 1870, became masters of 35,000,000 acres.

*Norway.*—The Hypothek Bank was founded in 1852 to lend on mortgage; it belongs to the State, and has a capital of £600,000. The outstanding loans in December 1888 reached £4,600,000, and the bonds in circulation £4,200,000.

*Austria.*—The Bank of Vienna in 1878 held mortgages on real estate for £10,300,000, of which £7,900,000 was on lands. In 1886 the various banks held mortgages to the amount of £65,000,000.

*Italy.*—The Credito Fondiario was founded in 1866 at Naples, with branches at Milan, &c., to make advances in 5 per cent. debentures on real estate, no loan to exceed £20,000, nor to be for more than 50 per cent. of the value of the property. The borrower pays also 1 per cent. sinking-fund; the debentures usually sell about 80 per cent. of nominal value. Issue averages £500,000 per annum. In 1870 two other Land-banks were founded, the Agricola Italiana and Agricola Nazionale. The amount of all mortgages held by these Land-banks in 1887 was £28,000,000 sterling.

*Spain and Portugal.*—There are no Land-banks in Spain; usurers have a free field. Murcia is mortgaged up to 65 per cent. of its value, and the usurers get 10 per cent. of the crops. The Credito Portuguez was founded in 1866 to rescue Portuguese landowners from usurers; it lends money at 6 per cent. in debentures, the advances down to 1869 reaching £1,100,000 on 1630 estates of distressed noblemen. In 1861 the mortgages then held in Portugal were:—

| Loans by                   | Amount, £ | Interest     |
|----------------------------|-----------|--------------|
| Usurers . . . . .          | 6,300,000 | 15 per cent. |
| Religious houses . . . . . | 1,600,000 | 5 "          |
| Total . . . . .            | 7,900,000 | ...          |

*Sweden.*—The General Mortgage Bank, founded in 1861, has 47,000 shareholders, the qualification being the possession of property worth £50, or upwards. In 1877, debentures had been issued to the amount of 13½ millions sterling, of which 2 millions had been redeemed. Borrowers pay 6 per cent. per annum, which cancels the loan in sixty years, the bank reserving ¼ per cent. for expenses, which, however, do not exceed 15d. per £100. The debentures rarely fall below 100; the reserve fund is £900,000, one-half in Government stock. The House-Mortgage Bank is on similar principles, applicable to house property.

*Denmark.*—The Landman's Bank advances on mortgages of land in 4 per cent. debentures, which sell in the market at 85 or 90 per cent. of their nominal value. Sinking-fund 1 per cent.; borrowers pay altogether 5 per cent.

*Switzerland.*—There are no distinct Land-banks; mortgages on land amount to one-fourth the estimated value.

*Brazil.*—The Rural Mortgage Bank was established in 1853 to make loans to planters; capital £900,000, reserve fund £400,000 sterling. The Bank of Brazil is, moreover, by its charter obliged to have always £2,600,000 in similar loans at 6 per cent. annual interest.

*Chile.*—There are several Mortgage-banks which issue Cédulas on houses and lands. The amount of these Cédulas in 1888 was 76 millions, say £8,300,000 sterling.

*Argentina.*—The Mortgage Bank of Buenos Ayres was founded in 1873, to make advances in 6 per cent. debentures up to half the value of the houses or lands mortgaged, the Bank charging 1 per cent. commission, its debentures being, moreover, guaranteed by the State. The National Mortgage Bank was established on like principles in 1886. Similar banks have been founded in Santa Fé and other provinces.

The balance-sheets for December 1888 showed as follows:—

|                                         | Issued     | Redeemed   | Balance Outstanding |
|-----------------------------------------|------------|------------|---------------------|
|                                         | £          | £          | £                   |
| Mortgage Bank of Buenos Ayres . . . . . | 47,000,000 | 11,300,000 | 35,700,000          |
| National Mortgage Bank . . . . .        | 15,000,000 | 600,000    | 14,400,000          |
| Total . . . . .                         | 62,000,000 | 11,900,000 | 50,100,000          |

The above was the nominal amount, but the currency was at 33 per cent. discount. The real value of debentures in circulation was about £33,500,000.

In December 1889 the actual Cédulas in circulation were approximately:—

|                                      | Millions | Nominal Value | At Current Exchange |
|--------------------------------------|----------|---------------|---------------------|
|                                      | \$       | £             | £                   |
| National Mortgage Bank               | 120      | 24,000,000    | 10,000,000          |
| Buenos Ayres Mortgage Bank . . . . . | 280      | 56,000,000    | 23,000,000          |
| Total . . . . .                      | 400      | 80,000,000    | 33,000,000          |

#### SAVINGS-BANKS

The first was established at Brunswick in 1765, the second at Hamburg in 1778. Mrs. Wakefield founded one in England in 1803. The first in France was in 1818

at Paris. In 1835 we find the following returns of France, Vienna, and Prague :—

|                  | Depositors | Amount, £ |
|------------------|------------|-----------|
| France . . . . . | 122,000    | 2,500,000 |
| Vienna . . . . . | 57,000     | 1,400,000 |
| Prague . . . . . | 18,000     | 520,000   |

From this time they began to grow rapidly in many countries. In the following table, 1889 includes latest information as regards some countries for which we have no particulars for that year :—

|                               | 1840       | 1850       | 1860        | 1870        | 1889        |
|-------------------------------|------------|------------|-------------|-------------|-------------|
|                               | £          | £          | £           | £           | £           |
| United Kingdom . . . . .      | 23,400,000 | 30,100,000 | 41,300,000  | 53,100,000  | 107,200,000 |
| France . . . . .              | 7,600,000  | 5,400,000  | 15,100,000  | 27,400,000  | 111,800,000 |

| Italy . . . . .               | 170,000              | 570,000    | 1,970,000  | 3                           | 23   | 66   |
| Belgium and Holland . . . . . | 40,000               | 180,000    | 310,000    | 5                           | 20   | 31   |
| Switzerland . . . . .         | 52,000               | 512,000    | 1,080,000  | 20                          | 195  | 360  |
| Scandinavia . . . . .         | 150,000              | 900,000    | 1,600,000  | 25                          | 110  | 180  |
| Europe . . . . .              | 2,748,000            | 10,482,000 | 19,875,000 | 12                          | 40   | 67   |

*United Kingdom.*—The savings-banks of the United Kingdom have shown as follows :—

| Year | Amount of Deposits, £ |            |           | Shillings per Inhabitant |           |          |
|------|-----------------------|------------|-----------|--------------------------|-----------|----------|
|      | England               | Scotland   | Ireland   | Eng-land                 | Scot-land | Ire-land |
| 1830 | 12,600,000            | ...        | 910,000   | 18                       | ...       | 2        |
| 1840 | 20,700,000            | 520,000    | 2,200,000 | 25                       | 4         | 5        |
| 1850 | 27,680,000            | 1,080,000  | 1,360,000 | 30                       | 7         | 4        |
| 1860 | 36,700,000            | 2,410,000  | 2,140,000 | 37                       | 16        | 7        |
| 1870 | 46,230,000            | 4,130,000  | 2,690,000 | 40                       | 25        | 10       |
| 1880 | 66,900,000            | 7,200,000  | 3,700,000 | 52                       | 39        | 15       |
| 1888 | 88,600,000            | 10,400,000 | 5,300,000 | 62                       | 50        | 22       |

*France.*—The official returns show as follows :—

| Year           | Depositors | Amount, £   |
|----------------|------------|-------------|
| 1835 . . . . . | 80,000     | 1,700,000   |
| 1840 . . . . . | 311,000    | 6,800,000   |
| 1850 . . . . . | 586,000    | 3,000,000   |
| 1860 . . . . . | 1,126,000  | 13,600,000  |
| 1870 . . . . . | 2,050,000  | 27,400,000  |
| 1880 . . . . . | 3,508,000  | 46,200,000  |
| 1886 . . . . . | 4,937,000  | 88,400,000  |
| 1888 . . . . . | 6,492,000  | 111,800,000 |

In 1888 the Post-Office savings-banks showed £12,000,000 in deposits, the average to each depositor

The returns for 1887 give the following aggregates (taking the florin at 20 pence) :—

|                   | Depositors | Amount, £   |                       | Depositors | Amount, £   |
|-------------------|------------|-------------|-----------------------|------------|-------------|
| Austria . . . . . | 2,620,000  | 91,300,000  | Post-office . . . . . | 722,000    | 5,200,000   |
| Hungary . . . . . | 584,000    | 31,300,000  | Ordinary . . . . .    | 2,491,000  | 117,400,000 |
| Total . . . . .   | 3,213,000  | 122,600,000 | Total . . . . .       | 3,213,000  | 122,600,000 |

being £9, 4s. ; the private savings-banks £99,800,000, average £18, 6s.

*Russia.*—In 1888 the Government savings-banks showed £820,000 at St. Petersburg, £640,000 at Moscow, and £7,200,000 for the whole Empire.

*Italy.*—The number of depositors and amount showed :—

| Year           | Depositors | Amount, £  |
|----------------|------------|------------|
| 1850 . . . . . | 170,000    | 2,200,000  |
| 1870 . . . . . | 571,000    | 14,800,000 |
| 1881 . . . . . | 1,970,000  | 33,600,000 |
| 1888 . . . . . | 3,510,000  | 69,200,000 |

The returns for 1887 make up as follows :—

|                        | Offices | Depositors | Deposits, £ |
|------------------------|---------|------------|-------------|
| Post-office . . . . .  | 4,237   | 1,571,000  | 9,600,000   |
| Ordinary . . . . .     | 395     | 1,295,000  | 40,300,000  |
| Co-operative . . . . . | 619     | 390,000    | 13,800,000  |
| Total . . . . .        | 5,251   | 3,256,000  | 63,700,000  |

*Austria.*—Depositors and amount are shown approximately as follows :—

| Year           | Depositors | Amount, £   |
|----------------|------------|-------------|
| 1850 . . . . . | 160,000    | 19,600,000  |
| 1870 . . . . . | 1,300,000  | 40,300,000  |
| 1881 . . . . . | 1,850,000  | 85,100,000  |
| 1887 . . . . . | 3,017,000  | 122,600,000 |

*Belgium.*—The first was opened in 1835, in which year the deposits reached £720,000. Subsequent returns are as follows:—

| Year           | Depositors | Amount, £  |
|----------------|------------|------------|
| 1840 . . . . . | 38,500     | 2,060,000  |
| 1850 . . . . . | 29,500     | 1,100,000  |
| 1860 . . . . . | 32,400     | 1,050,000  |
| 1870 . . . . . | 52,000     | 800,000    |
| 1880 . . . . . | 200,600    | 5,040,000  |
| 1888 . . . . . | 599,000    | 10,400,000 |

The above does not include People's Banks, which showed as follows:—

| Year           | Capital, £ | Discounts, £ | Deposits, £ |
|----------------|------------|--------------|-------------|
| 1861 . . . . . | 1,400,000  | 300,000      | 200,000     |
| 1870 . . . . . | 2,700,000  | 600,000      | 900,000     |
| 1880 . . . . . | 3,200,000  | 800,000      | 1,200,000   |
| 1888 . . . . . | 2,800,000  | 900,000      | 1,300,000   |

*Holland.*—The returns of 1888 for State savings-banks, and of 1885 for private ones, sum up thus:—

|                   | Depositors | Amount, £ |
|-------------------|------------|-----------|
| State . . . . .   | 202,000    | 1,100,000 |
| Private . . . . . | 270,000    | 3,900,000 |
| Total . . . . .   | 472,000    | 5,000,000 |

In 1888 there were 499,000 depositors, holding a total of £5,980,000.

*Scandinavia.*—The returns for 1886–88 were as follows:—

|                   | Depositors | Amount, £  |
|-------------------|------------|------------|
| Denmark . . . . . | 697,000    | 20,900,000 |
| Sweden . . . . .  | 1,010,000  | 13,700,000 |
| Norway . . . . .  | 452,000    | 10,400,000 |
| Total . . . . .   | 2,159,000  | 44,100,000 |

*United States.*—No distinct returns were kept before 1873; the returns since then show as follows:—

| Year           | Depositors | Amount, £   |
|----------------|------------|-------------|
| 1873 . . . . . | 2,190,000  | 135,200,000 |
| 1880 . . . . . | 2,528,000  | 185,400,000 |
| 1884 . . . . . | 3,071,000  | 227,800,000 |
| 1889 . . . . . | 4,022,000  | 283,900,000 |

The following table shows the States where savings banks are most in use (1889):—

|                         | Depositors | Amount, £   | Depositors per 100 Inhab. | Amount per Inhabitant, £ |
|-------------------------|------------|-------------|---------------------------|--------------------------|
| New York . . . . .      | 1,363,000  | 109,000,000 | 20                        | 16.4                     |
| Massachusetts . . . . . | 983,000    | 65,500,000  | 42                        | 26.5                     |
| Connecticut . . . . .   | 288,000    | 22,000,000  | 35                        | 27.0                     |
| California . . . . .    | 114,000    | 18,100,000  | 10                        | 15.6                     |
| Pennsylvania . . . . .  | 213,000    | 13,500,000  | 4                         | 2.4                      |
| N. Hampshire . . . . .  | 145,000    | 12,000,000  | 31                        | 25.5                     |
| Rhode Island . . . . .  | 123,000    | 12,100,000  | 34                        | 33.0                     |
| Maine . . . . .         | 125,000    | 8,600,000   | 15                        | 10.1                     |
| Maryland . . . . .      | 123,000    | 7,100,000   | 10                        | 5.8                      |
| New Jersey . . . . .    | 115,000    | 6,400,000   | 8                         | 4.2                      |
| Various . . . . .       | 430,000    | 9,600,000   | ...                       | ...                      |
| Total . . . . .         | 4,022,000  | 283,900,000 | 6                         | 4.4                      |

*Canada.*—The deposits were as follow:—

| Year           | Sum       |                  | 1887      |
|----------------|-----------|------------------|-----------|
|                | £         | £                | £         |
| 1867 . . . . . | 300,000   | Ontario          | 3,200,000 |
| 1879 . . . . . | 1,900,000 | Quebec           | 730,000   |
| 1887 . . . . . | 4,060,000 | Nova Scotia, &c. | 130,000   |

*Australia.*—In 1888 the returns were as follows:—

|                             | Depositors | Amount, £  | Depositors per 100 Inhab. | Amount per Inhabitant, £ |
|-----------------------------|------------|------------|---------------------------|--------------------------|
| New South Wales . . . . .   | 128,000    | 4,040,000  | 12                        | 3.7                      |
| Victoria . . . . .          | 248,000    | 4,880,000  | 23                        | 4.5                      |
| Queensland . . . . .        | 43,000     | 1,610,000  | 11                        | 4.2                      |
| South Australia . . . . .   | 62,000     | 1,760,000  | 20                        | 5.6                      |
| New Zealand . . . . .       | 103,000    | 2,690,000  | 17                        | 4.4                      |
| Tasmania . . . . .          | 23,000     | 470,000    | 16                        | 3.2                      |
| Western Australia . . . . . | 3,000      | 30,000     | 7                         | 0.7                      |
| Total . . . . .             | 610,000    | 15,480,000 | 17                        | 4.2                      |

The aggregate of the seven colonies was as follows:—

| Year           | Depositors | Amount, £  | Depositors per 100 Inhabitants | Amount per Inhabitant, £ |
|----------------|------------|------------|--------------------------------|--------------------------|
| 1861 . . . . . | 28,800     | 1,360,000  | 2                              | 1.1                      |
| 1871 . . . . . | 114,000    | 3,660,000  | 6                              | 1.9                      |
| 1881 . . . . . | 308,000    | 9,420,000  | 11                             | 3.3                      |
| 1888 . . . . . | 610,000    | 15,480,000 | 17                             | 4.2                      |

*India.*—The official returns for 1884 and 1888 (taking the rupee at 18 pence) were:—

|            | 1884      | 1888      | 1888      |                   |
|------------|-----------|-----------|-----------|-------------------|
|            |           |           | No.       | Amount            |
| Depositors | 204,000   | 332,000   | Europeans | 65,000 1,100,000  |
| Amount, £  | 3,010,000 | 4,940,000 | Natives   | 267,000 3,840,000 |

There are 6150 savings-banks, of which 5960 belong to the Post-Office.

## BANKRUPTCY

The averages for the years 1879–81 in five principal countries were:—

|                          | No. of Failures | Amount     | Ratio to Commerce |
|--------------------------|-----------------|------------|-------------------|
|                          |                 | £          | Per Cent.         |
| United Kingdom . . . . . | 13,720          | 31,300,000 | 5½                |
| France . . . . .         | 5,580           | 10,200,000 | 3                 |
| Austria . . . . .        | 1,414           | 1,820,000  | 1½                |
| United States . . . . .  | 5,715           | 16,300,000 | 5½                |
| Canada . . . . .         | 920             | 2,730,000  | 8                 |

## UNITED KINGDOM

Wholesale failures in the years 1880–89 were as follows:—

| Year           | London | Provinces | Scotland | Ireland | Total |
|----------------|--------|-----------|----------|---------|-------|
| 1880 . . . . . | 385    | 972       | 99       | 22      | 1,478 |
| 1882 . . . . . | 399    | 823       | 78       | 14      | 1,314 |
| 1883 . . . . . | 377    | 885       | 83       | 16      | 1,361 |
| 1889 . . . . . | 193    | 563       | 51       | 11      | 818   |

Wholesale and retail for nineteen years in England and Wales showed thus:—

| Years             | Annual Average |            | Average per Failure, £ | Assets, Annual Average, £ | Percentage of Assets |
|-------------------|----------------|------------|------------------------|---------------------------|----------------------|
|                   | Number         | Sum, £     |                        |                           |                      |
| 1870–72 . . . . . | 6,039          | 15,300,000 | 2,500                  | 4,600,000                 | 30                   |
| 1873–75 . . . . . | 7,766          | 21,600,000 | 2,800                  | 6,300,000                 | 29                   |
| 1876–78 . . . . . | 10,077         | 23,500,000 | 2,300                  | 7,100,000                 | 30                   |
| 1879–81 . . . . . | 11,052         | 21,200,000 | 1,930                  | 6,500,000                 | 31                   |
| 1882–84 . . . . . | 7,263          | 18,100,000 | 2,500                  | 5,200,000                 | 29                   |
| 1885–88 . . . . . | 4,587          | 8,300,000  | 1,800                  | 2,800,000                 | 33                   |

The ratio of assets for the years 1870 and 1881 in England and Wales were:—

| Assets              | Number |       | Percentage |      |
|---------------------|--------|-------|------------|------|
|                     | 1870   | 1881  | 1870       | 1881 |
| Under 5 per cent. . | 123    | 963   | 7          | 25   |
| 5-25 " .            | 833    | 2,256 | 44         | 58   |
| 25-40 " .           | 316    | 349   | 17         | 9    |
| Over 40 " .         | 616    | 322   | 32         | 8    |
| Total . .           | 1,888  | 3,890 | 100        | 100  |

From a judicial report in 1881 are taken the following:—

| Year             | No. of Cases | Amount     | Assets    | Ratio of Assets |
|------------------|--------------|------------|-----------|-----------------|
|                  |              | £          | £         | Per Cent.       |
| 1870 . . .       | 5,002        | 17,400,000 | 5,300,000 | 30              |
| 1880 . . .       | 10,298       | 16,200,000 | 4,600,000 | 28              |
| Average 10 years | 9,515        | 20,300,000 | 6,200,000 | 31              |

In eight years ending 1888 the bankruptcies averaged thus: liabilities, £13,100,000; assets, £3,300,000.

The cases liquidated in court showed that law-costs absorbed 40 per cent. of assets.

In the eighteenth century the number of bankruptcies in England averaged 177 yearly down to 1750, and 460 in the fifty years following.

In Scotland the bankruptcies were:—

| Period   | Annual Average |           | Average per Failure, £ | Percentage of Assets |
|----------|----------------|-----------|------------------------|----------------------|
|          | No.            | Amount, £ |                        |                      |
| 1874-88  | 603            | 1,360,000 | 2,270                  | 46                   |
| 1881-84  | 412            | 6,300,000 | 15,200                 | 11                   |
| 1885-88  | 425            | 1,450,000 | 3,400                  | 46                   |
| 15 years | 505            | 2,690,000 | 5,300                  | 25                   |

Some of the above were for bankruptcies of previous years, liquidated as above.

The aggregate of business in Ireland that passed through the Court of Bankruptcy in five years ending 1880 was as follows:—

|                   |           |                    |         |
|-------------------|-----------|--------------------|---------|
| Liabilities . . . | 2,750,000 | Law-costs . . .    | 245,000 |
| Assets . . . . .  | 805,000   | To creditors . . . | 560,000 |

The average dividend, therefore, was 20 per cent. on the liabilities. Law-costs absorbed 30 per cent. of the assets.

Irish bankruptcy business from 1880 to 1887 showed:—

|                        |           |                  |
|------------------------|-----------|------------------|
|                        |           | <i>Per Annum</i> |
| Number of bankruptcies | 4,124     | 516              |
| Liabilities, £ . . .   | 9,700,000 | 1,210,000        |

This gives an average of £2300 per failure.

France.—Official returns give the following:—

| Years          | Annual Average  |                 |
|----------------|-----------------|-----------------|
|                | No. of Failures | Ratio of Assets |
|                |                 | Per Cent.       |
| 1840-50 . . .  | 3,480           | 31              |
| 1860-70 . . .  | 5,120           | 21              |
| 1878-81 . . .  | 5,580           | 17              |
| 1881-84 . . .  | 7,135           | ...             |
| 1885 . . . . . | 8,024           | 25              |

The following table shows the number of failures compared with that of merchants and traders:—

| Year           | No. of Merchants | Failed | Ratio to Merchants | Failures over £2000 |
|----------------|------------------|--------|--------------------|---------------------|
|                |                  |        | Per Cent.          | Per Cent.           |
| 1844 . . . . . | 1,414,000        | 3,011  | 2.1                | 52                  |
| 1854 . . . . . | 1,420,000        | 3,691  | 2.6                | 48                  |
| 1864 . . . . . | 1,410,000        | 4,642  | 3.3                | 43                  |
| 1874 . . . . . | 1,606,000        | 5,508  | 3.4                | 54                  |

Not only has the ratio of failures risen, but also the average amount per failure.

The following table is for fourteen years ending 1885:—

| Period          | Annual Average  |            |                       |
|-----------------|-----------------|------------|-----------------------|
|                 | No. of Failures | Amount, £  | Amount per Failure, £ |
| 1872-75 . . . . | 5,442           | 9,200,000  | 1,700                 |
| 1876-80 . . . . | 5,832           | 10,600,000 | 1,800                 |
| 1881-84 . . . . | 7,135           | 10,700,000 | 1,500                 |
| 1885 . . . . .  | 8,024           | 14,200,000 | 1,750                 |

Austria.—The annual number of bankruptcies was as follows:—

|                   |       |
|-------------------|-------|
| 1871-75 . . . . . | 909   |
| 1876-80 . . . . . | 1,304 |
| 1881-83 . . . . . | 1,017 |

No returns as to liabilities or assets.

Germany.—The number of bankruptcies in 1886 was 5912, against 5905 in 1882; amount not stated.

Australia.—There are no returns for Western Australia. The aggregate for the other six colonies showed as follows:—

| Year           | Failures | Liabilities | Assets    | Ratio of Assets |
|----------------|----------|-------------|-----------|-----------------|
|                |          | £           | £         | Per Cent.       |
| 1861 . . . . . | 2,037    | 2,000,000   | 1,095,000 | 55              |
| 1871 . . . . . | 2,257    | 1,490,000   | 695,000   | 47              |
| 1881 . . . . . | 3,632    | 1,720,000   | 1,230,000 | 72              |
| 1888 . . . . . | 2,769    | 2,260,000   | 1,510,000 | 67              |

The returns for 1888 were as follows:—

|                   | Failures | Liabilities | Assets    | Ratio of Assets |
|-------------------|----------|-------------|-----------|-----------------|
|                   |          | £           | £         | Per Cent.       |
| N. S. Wales . . . | 851      | 660,000     | 460,000   | 70              |
| Victoria . . . .  | 479      | 350,000     | 185,000   | 53              |
| Queensland . . .  | 249      | 260,000     | 120,000   | 46              |
| South Australia . | 219      | 80,000      | 60,000    | 75              |
| New Zealand . .   | 881      | 865,000     | 670,000   | 77              |
| Tasmania . . . .  | 90       | 45,000      | 15,000    | 33              |
| Total . . . . .   | 2,769    | 2,260,000   | 1,510,000 | 67              |

#### UNITED STATES

The annual averages have been as follows since 1857:—

| Period          | Number of Failures | Amount, £  | Amount per Failure, £ |
|-----------------|--------------------|------------|-----------------------|
| 1857-60 . . . . | 3,262              | 23,500,000 | 7,100                 |
| 1861-65 . . . . | 1,830              | 10,600,000 | 5,800                 |
| 1866-69 . . . . | 2,425              | 15,100,000 | 6,200                 |
| 1870-75 . . . . | 4,882              | 30,500,000 | 6,100                 |
| 1876-80 . . . . | 7,970              | 32,400,000 | 4,100                 |
| 1881-86 . . . . | 8,823              | 28,300,000 | 3,200                 |
| 1889 . . . . .  | 11,719             | 29,200,000 | 2,400                 |

## CANADA

| Years          | Number | Amount, £ | Average, £ |
|----------------|--------|-----------|------------|
| 1879-80 . . .  | 1,060  | 3,080,000 | 3,000      |
| 1881-82 . . .  | 625    | 1,450,000 | 2,300      |
| 1885 . . . . . | 1,246  | 1,920,000 | 1,600      |
| 1886 . . . . . | 1,186  | 2,320,000 | 2,000      |

## REMARKABLE CRISES

1763. Amsterdam, originating with the house of De Neufville. Failures—20 in Holland, 20 in England, 37 in Hamburg.
1773. Failures in Holland exceeding 10 millions.
1799. Hamburg, 82 failures, 2 millions.
1814. England, 240 banks suspended.
1825. Manchester, failures 2 millions.
1831. Calcutta, failures 15 millions.
1837. United States "Wild Cat" crisis; all banks closed.
1839. Bank of England saved by Bank of France. Severe also in France, where 93 companies failed for 6 millions.
1844. England. State loans to merchants.
1847. England, failures 20 millions; discount 13 per cent.
1857. United States, 7200 houses failed for 111 millions.
1866. London, Overend-Gurney; failures 100 millions.

## BANQUET

One of the greatest on record was that given at Paris by President Carnot, 19th July 1889, to 15,000 mayors, senators, deputies, and other officials. There were 195 cooks, 1050 waiters, 80,000 plates, 30,000 loaves, 23,000 bottles of wine, 600 gallons soup, 3 tons fish, 32 cwts. beef, and 7200 poultry, with 6 tons ice.

## BATHS

*Baths.*—The use of baths among the working-classes in London is shown by the receipts thus: 1850, £9,800; 1860, £25,000; 1880, £41,000.

## BATTLES

|                  | Men Engaged | Hors de Combat | Per Cent. |
|------------------|-------------|----------------|-----------|
| Agincourt . . .  | 62,000      | 11,400         | 18        |

## BEER

Table of yearly production and consumption (1886-89) :—

|                   | Number of Breweries | Millions of Gallons |           | Value of Beer Produced, £ |
|-------------------|---------------------|---------------------|-----------|---------------------------|
|                   |                     | Pro-duced           | Con-sumed |                           |
| U. Kingdom . .    | 16,114              | 1,040               | 1,022     | 69,000,000                |
| France . . . .    | 2,722               | 186                 | 193       | 12,000,000                |
| Germany . . .     | 26,458              | 930                 | 910       | 62,000,000                |
| Russia . . . .    | 1,592               | 92                  | 92        | 6,200,000                 |
| Austria . . . .   | 1,962               | 290                 | 280       | 19,000,000                |
| Italy . . . . .   | 135                 | 4                   | 5         | 300,000                   |
| Switzerland . .   | 417                 | 20                  | 21        | 1,300,000                 |
| Belgium . . . .   | 1,248               | 204                 | 206       | 14,000,000                |
| Holland . . . .   | 560                 | 32                  | 32        | 2,100,000                 |
| Denmark . . . .   | 441                 | 25                  | 25        | 1,600,000                 |
| Sweden . . . .    | 253                 | 21                  | 21        | 1,400,000                 |
| Norway . . . .    | 56                  | 13                  | 13        | 900,000                   |
| Europe . . . .    | 51,958              | 2,857               | 2,820     | 189,800,000               |
| United States . . | 3,293               | 753                 | 780       | 40,000,000                |
| Australia . . .   | 187                 | 18                  | 22        | 1,200,000                 |
| India . . . . .   | 24                  | 3                   | 5         | 200,000                   |
| Total . . . . .   | 55,462              | 3,631               | 3,627     | 231,200,000               |

The breweries of the world consume yearly 4 million tons of barley (say 160 million bushels), and 70,000 tons of hops. Germany has an annual surplus of 8000 tons of hops, Austria 3000, but England and France have to import some. British breweries consume 56 million bushels barley, and 70,000 tons sugar.

## RETROSPECT OF PRODUCTION

|      | Millions of Gallons |        |         |         |         |               |       |
|------|---------------------|--------|---------|---------|---------|---------------|-------|
|      | United Kingdom      | France | Germany | Austria | Belgium | United States | Total |
| 1840 | 650                 | 92     | 500     | 160     | 100     | 23            | 1,525 |
| 1850 | 710                 | 106    | 600     | 180     | 120     | 36            | 1,752 |
| 1860 | 770                 | 140    | 700     | 200     | 140     | 100           | 2,050 |
| 1870 | 980                 | 150    | 800     | 220     | 153     | 204           | 2,507 |
| 1880 | 1,020               | 180    | 815     | 240     | 200     | 413           | 2,868 |
| 1887 | 1,040               | 186    | 930     | 290     | 204     | 612           | 3,262 |

The figures for Germany, Austria, and Belgium previous to 1870 are conjectural.

## ENGLAND AND WALES

The annual consumption in England and Wales has been :—

| Period              | Million Gallons | Per Inhab. | Period              | Million Gallons | Per Inhab. |
|---------------------|-----------------|------------|---------------------|-----------------|------------|
| 1660-1700 . . . . . | 255             | 44         | 1801-1830 . . . . . | 335             | 30         |
| 1701-1750 . . . . . | 215             | 35         | 1831-1860 . . . . . | 560             | 33         |
| 1751-1800 . . . . . | 252             | 32         | 1861-1880 . . . . . | 835             | 36         |

The price per gallon during 680 years has ruled thus :—

| Period              | Pence | Period              | Pence |
|---------------------|-------|---------------------|-------|
| 1201-1300 . . . . . | 3     | 1701-1800 . . . . . | 11    |
| 1301-1600 . . . . . | 5     | 1801-1880 . . . . . | 17    |
| 1601-1700 . . . . . | 6     | 1882 . . . . .      | 20    |

The above are according to weight of silver, but the nominal price was, for example, in the thirteenth century one penny.

The strength varies as follows :—

|                          | Alcohol | Bushels of Malt per Barrel |
|--------------------------|---------|----------------------------|
| Burton ale . . . . .     | 8.2     | 4.5                        |
| Bass's ale . . . . .     | 8.4     | 4.2                        |
| Edinburgh ale . . . . .  | 4.4     | 1.8                        |
| Guinness's ale . . . . . | 6.8     | 2.9                        |
| London porter . . . . .  | 4.1     | 1.9                        |
| London beer . . . . .    | 3.9     | 1.7                        |
| Lager beer . . . . .     | 3.2     | 1.5                        |

The annual consumption of malt in England has been as follows :—

| Period              | Bushels | Duty, Pence | Bushels per Inhabitant |
|---------------------|---------|-------------|------------------------|
| 1700-20 . . . . .   | 19.2    | 6           | 3.4                    |
| 1720-50 . . . . .   | 26.7    | 6           | 4.2                    |
| 1760-80 . . . . .   | 27.6    | 9           | 3.6                    |
| 1790-1800 . . . . . | 18.0    | 16          | 2.1                    |
| 1810-20 . . . . .   | 23.7    | 50          | 2.2                    |
| 1830-50 . . . . .   | 32.7    | 31          | 2.1                    |
| 1850-70 . . . . .   | 39.8    | 31          | 1.9                    |

In 1888 the consumption was about 48 million bushels in England, 3 millions in Scotland, and 5 millions in Ireland, total 56 millions, or two bushels per barrel of beer.

## GERMANY (1885)

|                        | Number of Breweries | Product, Gallons Beer | Gallons per Inhabitant |
|------------------------|---------------------|-----------------------|------------------------|
| Prussia . . . . .      | 7,691               | 540,000,000           | 19.2                   |
| Bavaria . . . . .      | 5,395               | 277,000,000           | 50.5                   |
| Wurtemberg . . . . .   | 7,381               | 66,000,000            | 33.0                   |
| Other States . . . . . | 4,539               | 47,000,000            | 4.3                    |
| Total . . . . .        | 25,006              | 930,000,000           | ...                    |

The statistics of German breweries showed as follows :—

| Year                        | Beer, Gallons | Tons Grain Consumed | Beer per Inhabitant, Gallons | Lbs. Grain per Inhabitant |
|-----------------------------|---------------|---------------------|------------------------------|---------------------------|
| 1873 . . . . .              | 830,000,000   | 780,000             | 20                           | 40                        |
| 1880 . . . . .              | 820,000,000   | 770,000             | 18                           | 37                        |
| 1887 . . . . .              | 990,000,000   | 930,000             | 21                           | 43                        |
| 15 years' average . . . . . | 880,000,000   | 830,000             | 19½                          | 39                        |

In the above years nearly 99 per cent. of the beer produced was consumed in Germany, exports ranging from 10 to 18 million gallons.

## AUSTRIA

| Year           | Millions of Gallons |         |       | Number of Breweries |
|----------------|---------------------|---------|-------|---------------------|
|                | Austria             | Hungary | Total |                     |
| 1870 . . . . . | 204                 | 16      | 220   | 2,743               |
| 1880 . . . . . | 231                 | 9       | 240   | 2,247               |
| 1887 . . . . . | 275                 | 15      | 290   | 1,962               |

## UNITED STATES

| Year           | Number of Breweries | Capital, £ | Gallons     |
|----------------|---------------------|------------|-------------|
| 1863 . . . . . | 1,269               | 3,100,000  | 53,000,000  |
| 1870 . . . . . | 2,785               | 13,500,000 | 204,000,000 |
| 1882 . . . . . | 2,557               | 31,800,000 | 525,000,000 |
| 1889 . . . . . | 1,964               | ...        | 777,000,000 |

Statistics of production and consumption were as follows :—

| Year           | Product, Gallons | Consumption, Galls. | Consumption per Inhab. |
|----------------|------------------|---------------------|------------------------|
| 1875 . . . . . | 293,000,000      | 295,000,000         | 6.5                    |
| 1880 . . . . . | 413,000,000      | 414,000,000         | 8.3                    |
| 1885 . . . . . | 594,000,000      | 596,000,000         | 9.5                    |
| 1889 . . . . . | 777,000,000      | 780,000,000         | 12.0                   |

The principal beer-producing States were as follows :—

|                         | 1878        | 1884        | 1889        |
|-------------------------|-------------|-------------|-------------|
|                         | Gallons     | Gallons     | Gallons     |
| New York . . . . .      | 109,000,000 | 204,000,000 | 250,000,000 |
| Pennsylvania . . . . .  | 31,000,000  | 62,000,000  | 71,000,000  |
| Ohio . . . . .          | 30,000,000  | 53,000,000  | 65,000,000  |
| Illinois . . . . .      | 18,000,000  | 35,000,000  | 62,000,000  |
| Wisconsin . . . . .     | 16,000,000  | 45,000,000  | 55,000,000  |
| Missouri . . . . .      | 17,000,000  | 35,000,000  | 52,000,000  |
| New Jersey . . . . .    | 16,000,000  | 28,000,000  | 42,000,000  |
| Massachusetts . . . . . | 19,000,000  | 27,000,000  | 31,000,000  |
| Various . . . . .       | 60,000,000  | 99,000,000  | 149,000,000 |
| Total . . . . .         | 316,000,000 | 588,000,000 | 777,000,000 |

## BEES

A hive of 5000 bees produces about 50 lbs. of honey yearly, and multiplies tenfold in five years. The ordinary value of a hive in Europe is £1 sterling.

Bees eat 20 lbs. honey in making 1 lb. of wax.

|                   | Hives     |                         | Hives     |
|-------------------|-----------|-------------------------|-----------|
| France . . . . .  | 950,000   | Belgium . . . . .       | 200,000   |
| Germany . . . . . | 1,910,000 | Holland . . . . .       | 240,000   |
| Russia . . . . .  | 110,000   | Denmark . . . . .       | 90,000    |
| Austria . . . . . | 1,550,000 | Greece . . . . .        | 30,000    |
| Spain . . . . .   | 1,690,000 | United States . . . . . | 2,800,000 |

The largest bee-owner in the world is Mr. Harbison of California, who has 6000 hives, producing 200,000 lbs. honey yearly, worth £8000. There are in the United States 70,000 bee-growers, but the average which they get from their hives is only 22 lbs., whereas the average in England is 50 lbs. In 1888 there were in Ireland 28,600 hives, of which 9100 in movable frames; annual product 210 tons of honey, worth £12,000. The average is only 16 lbs. honey per hive, but in Kildare it reached 37 lbs. In 1889 the product in France was :—

|                 | Tons  | Value, £ |
|-----------------|-------|----------|
| Honey . . . . . | 6,600 | 370,000  |
| Wax . . . . .   | 2,000 | 180,000  |

The ordinary value is 10d. per lb. for wax and 6d. for honey.

In Austria the production of wax averages 2000 tons. The total annual yield of bees in Europe may be estimated thus :—

|                 | Tons   | Value, £  |
|-----------------|--------|-----------|
| Honey . . . . . | 40,000 | 2,200,000 |
| Wax . . . . .   | 15,000 | 1,350,000 |
| Total . . . . . | 55,000 | 3,550,000 |

One hundred bees weigh an ounce. The wing of a bee makes 190 movements a second, of a wasp 110, of a fly 330.

### BEETROOT

This is grown both as cattle food and for making sugar. The crop ranges from 5 tons of roots per acre in Russia, to 9 tons in Germany. In England it has given 12 tons per acre, equivalent for cattle food to 4 tons of hay, and worth 16 shillings per ton; but it has been found too costly in cultivation. Experimental growing in Canada has proved most successful. It takes about 11 tons of roots in Europe generally per ton of beet sugar, the average of saccharine matter being 9 per cent. as compared with 4 per cent. twenty years ago. In Germany 8 tons of roots give a ton of sugar.

The acreage and crop of all kinds of beetroot are approximately as follows :—

|                   | Acres     | Tons, Beet | Sugar, Beet |
|-------------------|-----------|------------|-------------|
| France . . . . .  | 1,310,000 | 13,300,000 | 5,100,000   |
| Germany . . . . . | 1,700,000 | 12,400,000 | 8,300,000   |
| Russia . . . . .  | 1,000,000 | 5,200,000  | 5,200,000   |
| Austria . . . . . | 1,100,000 | 6,500,000  | 6,500,000   |
| Belgium . . . . . | 145,000   | 2,100,000  | 2,100,000   |
| Holland . . . . . | 60,000    | 600,000    | 400,000     |
| Denmark . . . . . | 30,000    | 300,000    | 300,000     |
| Europe . . . . .  | 5,345,000 | 40,400,000 | 27,900,000  |

The *Journal de la Société Stat.* of Paris mentions that the production of beet sugar in the United States during five years ending 1884 averaged 337,000 tons per annum, from which must be inferred that the Union grows about 3 million tons of beetroot. The following table shows approximately the growth of all kinds of beetroot at different dates :—

|                   | 1836    | 1850      | 1870       | 1880       | 1888       |
|-------------------|---------|-----------|------------|------------|------------|
|                   | Tons    | Tons      | Tons       | Tons       | Tons       |
| France . . . . .  | 700,000 | 1,500,000 | 6,600,000  | 14,800,000 | 13,300,000 |
| Germany . . . . . | 40,000  | 550,000   | 2,700,000  | 11,200,000 | 12,400,000 |
| Russia . . . . .  | ...     | 100,000   | 2,200,000  | 4,800,000  | 5,200,000  |
| Austria . . . . . | 10,000  | 200,000   | 1,500,000  | 5,500,000  | 6,500,000  |
| Belgium . . . . . | ...     | 150,000   | 800,000    | 1,800,000  | 2,100,000  |
| Holland . . . . . | ...     | ...       | 100,000    | 440,000    | 400,000    |
| Denmark . . . . . | ...     | ...       | 200,000    | 300,000    | 300,000    |
| Europe . . . . .  | 750,000 | 2,500,000 | 14,100,000 | 38,840,000 | 40,200,000 |

It appears that two-thirds of the total crop is used for making sugar, the product of which now reaches 2,800,000 tons yearly in all the world.

### BELLS

The largest are the following :—

| Tons                 | Tons                  | Tons                  |
|----------------------|-----------------------|-----------------------|
| Moscow . . . . .     | Rouen . . . . .       | Montreal . . . . .    |
| Burmah . . . . .     | Olmütz . . . . .      | Cologne . . . . .     |
| Pekin . . . . .      | Vienna . . . . .      | Oxford . . . . .      |
| Novgorod . . . . .   | St. Paul's . . . . .  | St. Peter's . . . . . |
| Notre Dame . . . . . | Westminster . . . . . | ...                   |

Bell-metal should have 77 parts copper and 23 tin.

### BIRDS

In hatching, the number of days that birds sit are :—

| Days             | Days             |
|------------------|------------------|
| Pigeon . . . . . | Duck . . . . .   |
| Canary . . . . . | Goose . . . . .  |
| Hen . . . . .    | Parrot . . . . . |
| Turkey . . . . . | Swan . . . . .   |

The ages to which birds attain are :—

| Years               | Years                 | Years             |
|---------------------|-----------------------|-------------------|
| Wren . . . . .      | Lark . . . . .        | Sparrow . . . . . |
| Thrush . . . . .    | Nightingale . . . . . | Goose . . . . .   |
| Hen . . . . .       | Pigeon . . . . .      | Pelican . . . . . |
| Robin . . . . .     | Linnet . . . . .      | Parrot . . . . .  |
| Blackbird . . . . . | Canary . . . . .      | Heron . . . . .   |
| Goldfinch . . . . . | Crane . . . . .       | Crow . . . . .    |
| Partridge . . . . . | Peacock . . . . .     | Swan . . . . .    |
| Pheasant . . . . .  | Skylark . . . . .     | Eagle . . . . .   |

The flight of the following birds per hour is :—

|                      |           |                  |          |
|----------------------|-----------|------------------|----------|
| Hawk . . . . .       | 150 miles | Rook . . . . .   | 60 miles |
| Eider-duck . . . . . | 90 „      | Pigeon . . . . . | 40 „     |

Carrier-pigeons from Paris to Versailles, ten miles, usually take twenty minutes. In November 1882 some flew from Canton Vaud to Paris, 160 miles, in 6½ hours.

The departure and return of birds of passage from England (*Brit. Assoc. Report*) are usually on the following dates :—

|                    | Leave England | Return     | Days Absent |
|--------------------|---------------|------------|-------------|
| Cuckoo . . . . .   | August 25th   | April 14th | 232         |
| Blackcap . . . . . | October 10th  | „ 22nd     | 194         |
| Martin . . . . .   | „ 12th        | „ 14th     | 184         |
| Swallow . . . . .  | „ 15th        | „ 10th     | 177         |

Birds' nests are used in China for making soup; 9,000,000 are imported yearly into Canton, valued at 10s. per oz., fifty weighing about 1 lb.

### BIRTHS

The birth-rate per 1000 of population was as follows :—

|                      | 1821-40 | 1841-60 | 1861-80 | 1881-85 |                       | 1841-60 | 1861-80 | 1881-85 |
|----------------------|---------|---------|---------|---------|-----------------------|---------|---------|---------|
| France . . . . .     | 29.7    | 26.7    | 25.8    | 24.7    | Belgium . . . . .     | 30.2    | 32.0    | 31.0    |

| Total . . .     | 1,200  | 1,200  | 1,200   | 1,200  | 1,200   | 1,200   | 1,200   | 1,200   |

The number of births to 100 marriages was as follows :—

|                | 1861-80 | 1881-85 |                   | 1881-88 |
|----------------|---------|---------|-------------------|---------|
| England . . .  | 407     | 420     | Germany . . .     | 439     |
| Scotland . . . | 447     | 439     | Russia . . .      | 500     |
| Ireland . . .  | 520     | 540     | Norway . . .      | 430     |
| France . . .   | 304     | 305     | Switzerland . . . | 398     |
| Belgium . . .  | 408     | 418     | Italy . . .       | 440     |
| Holland . . .  | 422     | 470     | Austria . . .     | 419     |
| Denmark . . .  | 360     | 376     | Hungary . . .     | 404     |
| Sweden . . .   | 414     | 408     |                   |         |

## BIRTHS ACCORDING TO HOURS

| Between                 | French Towns | French Rural | Belgium, Quetelet | Dresden, Mayr | Medium |
|-------------------------|--------------|--------------|-------------------|---------------|--------|
| Midnight and 6 a.m. . . | 30.3         | 29.4         | 29.6              | 28.5          | 29.5   |
| 6 a.m. and noon . . .   | 25.6         | 25.4         | 23.2              | 23.8          | 24.5   |
| Noon and 6 p.m. . .     | 21.4         | 23.4         | 21.5              | 21.7          | 22.0   |
| 6 p.m. and midnight . . | 22.7         | 21.8         | 25.7              | 26.0          | 24.0   |
| Total . . .             | 100.0        | 100.0        | 100.0             | 100.0         | 100.0  |

From observations made (1855-74) in various countries, it appears that 1000 maids or widows between the ages of 15 and 50 have the following number of children yearly :—

|                      |                  |                   |
|----------------------|------------------|-------------------|
| Ireland . . . 4      | France . . . 18  | Scotland . . . 24 |
| Holland . . . 10     | Prussia . . . 20 | Denmark . . . 31  |
| Switzerland . . . 11 | Norway . . . 21  | Saxony . . . 33   |
| Belgium . . . 17     | Italy . . . 21   | Bavaria . . . 42  |
| England . . . 17     | Sweden . . . 23  | Average . . . 21  |

The ratio of illegitimate children in various countries is shown as follows from observations in 1865-78 :—

## ILLEGITIMATES IN 1000 BIRTHS

|                      |                        |                   |
|----------------------|------------------------|-------------------|
| Greece . . . 16      | Spain . . . 55         | Norway . . . 85   |
| Ireland . . . 23     | Portugal . . . 56      | Germany . . . 87  |
| Russia . . . 31      | Italy . . . 65         | Scotland . . . 93 |
| Holland . . . 35     | United States . . . 70 | Sweden . . . 102  |
| Switzerland . . . 48 | Belgium . . . 71       | Denmark . . . 111 |
| Canada . . . 50      | Hungary . . . 71       | Austria . . . 135 |
| England . . . 54     | France . . . 74        |                   |

The ratio of still-births in various countries is as follows :—

## PER 1000 BIRTHS

|                  |                  |                      |
|------------------|------------------|----------------------|
| France . . . 45  | Holland . . . 52 | Switzerland . . . 46 |
| Prussia . . . 41 | Belgium . . . 45 | Denmark . . . 30     |
| Austria . . . 22 | Sweden . . . 32  | Bavaria . . . 34     |
| Italy . . . 25   | Norway . . . 35  | Average . . . 37     |

The occurrence of still-births according to months, 1861-70, was as follows :—

|                 | France | Norway | Sweden | Leipzig | Frankfort | Hamburg |
|-----------------|--------|--------|--------|---------|-----------|---------|
| January . . .   | 109    | 104    | 104    | 129     | 115       | 96      |
| February . . .  | 105    | 104    | 109    | 84      | 120       | 134     |
| March . . .     | 102    | 105    | 103    | 115     | 88        | 111     |
| April . . .     | 100    | 103    | 97     | 109     | 93        | 103     |
| May . . .       | 99     | 104    | 91     | 109     | 104       | 109     |
| June . . .      | 99     | 102    | 95     | 84      | 104       | 76      |
| July . . .      | 97     | 91     | 93     | 100     | 102       | 78      |
| August . . .    | 96     | 99     | 103    | 90      | 110       | 96      |
| September . . . | 94     | 85     | 81     | 102     | 95        | 85      |
| October . . .   | 96     | 102    | 107    | 87      | 72        | 90      |
| November . . .  | 98     | 99     | 108    | 100     | 104       | 136     |
| December . . .  | 105    | 102    | 109    | 100     | 93        | 94      |
| Total . . .     | 1,200  | 1,200  | 1,200  | 1,200   | 1,200     | 1,200   |

Still-births are more frequent in towns than in rural districts, viz. :—

|             | Per 1000 Births |       |         | Per 1000 Births |       |
|-------------|-----------------|-------|---------|-----------------|-------|
|             | Urban           | Rural |         | Urban           | Rural |
| Italy . .   | 31              | 22    | France  | 53              | 39    |
| Sweden . .  | 41              | 31    | Belgium | 50              | 41    |
| Prussia . . | 45              | 40    | Holland | 54              | 51    |

Males are oftener still-born than females, because, as Bertillon thinks, the former have larger heads. The following table shows the number of males to females :—

*Still-Born Males to 100 Females*

|             |     |             |     |             |     |
|-------------|-----|-------------|-----|-------------|-----|
| Holland . . | 127 | Austria . . | 131 | Belgium . . | 135 |
| Prussia . . | 129 | Sweden . .  | 133 | Italy . .   | 141 |
| Norway . .  | 121 | Denmark . . | 125 | France . .  | 144 |

Multiple births, from observations in 1851-73, average thus :—

|              | Twins in<br>10,000 Births | Triplets in a<br>Million Births |               | Twins in<br>10,000 Births | Triplets in a<br>Million Births |
|--------------|---------------------------|---------------------------------|---------------|---------------------------|---------------------------------|
| England . .  | 112                       | 23                              | Denmark . .   | 142                       | 160                             |
| Scotland . . | 117                       | ...                             | Belgium . .   | 97                        | 100                             |
| Ireland . .  | 176                       | ...                             | Holland . .   | 131                       | 170                             |
| France . .   | 108                       | 120                             | Sweden . .    | 145                       | 180                             |
| Prussia . .  | 125                       | 150                             | Norway . .    | 125                       | 160                             |
| Russia . .   | 121                       | ...                             | Iceland . .   | 142                       | 330                             |
| Austria . .  | 134                       | 180                             | Switzerland . | 120                       | ...                             |
| Italy . .    | 118                       | 150                             | Spain . .     | 84                        | 120                             |
| Bavaria . .  | 174                       | 310                             | Wurtemberg .  | 128                       | 120                             |

In France, Italy, and Bavaria twins are most numerous in those Departments which furnish the tallest conscripts. The age of the mother has also some influence, as the tables of Lebel and Puech show :—

| Mother's Age     | Lebel | Puech | Medium |
|------------------|-------|-------|--------|
| Under 25 . . . . | 35    | 17    | 26     |
| 25-30 . . . .    | 35    | 41    | 38     |
| 30-35 . . . .    | 20    | 30    | 25     |
| Over 35 . . . .  | 10    | 12    | 11     |
| Total . . . .    | 100   | 100   | 100    |

According to Dubois, the mean ratio of multiple births in England, France, and Germany is 13 twins per 1000 births, and 160 triplets and 8 quadruplets per million births. Aristotle mentions a woman who had 5 children at a birth four times successively; Menage one who had 21 children in seven years. The Belgian official returns for 1851-60 give a case of 5 children at a birth, viz., 2 boys and 3 girls, and another case of 4, all boys. The Empress Catherine received a Russian peasant woman in 1757 who had 57 children, all living, having been born thus :—

|       |                |
|-------|----------------|
| 16 in | 4 confinements |
| 21 in | 7 "            |
| 20 in | 10 "           |
| —     | —              |
| 57    | 21             |

This woman's husband married again, and his second wife had 15 children in 7 confinements.

A similar case is that of Fedor Vassileff, of Moscow, 1782, who had 83 children living when pensioned by the Czar. He had 69 children by his first wife at 27 births, and after her death had 18 more by his second in 8 births.

The records of Florence also show that Signora Frescobaldi, who died in 1570, had 52 children, never less than 3 at a birth. Madrid newspapers in 1883 stated that Lucas Saez returned to Spain from the United States with 37 children, 79 grandchildren, and 81 great-grandchildren, in all 107 males and 90 females, his eldest son being aged 70.

The *Daily Telegraph* of London, November 1888, published the confinement of Mrs. George Hirsch, of Dallas, Texas, of 6 children, 4 being boys and 2 girls. This surpasses all records.

Twins give 108 males to 100 females, and triplets show a medium result for France, Germany, and Austria as follows :—

|                              |       |
|------------------------------|-------|
| Birth of three boys . . . .  | 26.0  |
| Birth of three girls . . . . | 22.7  |
| Two boys and a girl . . . .  | 27.0  |
| Two girls and a boy . . . .  | 24.3  |
|                              | 100.0 |

This gives 156 boys and 144 girls, that is, precisely the same ratio as in the case of twins.

The child-bearing age of women rarely passes 50; one mother in 3300 occurs after that age. If a woman has been married 18 years without children, the probabilities are 6000 to 1 against her having any. The Dublin *Evening Post* of July 16, 1801, announces that Sarah, wife of Thomas Davis, was confined the previous week of a son, her first child, after 11 years of marriage, being in her 53rd year. Men of very advanced age have begotten children. Schneider mentions a case at 86, Meade at 89, Ruttell at 92, Plater (his own grandfather) at 100. We know also that Thomas Parr was sued for adultery at 118.

There are opposing estimates as to the period of gestation :—

|                | Days |              | Days |              | Days |
|----------------|------|--------------|------|--------------|------|
| Depaul . . . . | 268  | Schwegel . . | 270  | Rann . . . . | 272  |
| Wallichs . . . | 269  | Schoeder . . | 271  | Reid . . . . | 276  |

Reid's table is as follows :—

| Days            | Ratio |
|-----------------|-------|
| 260-266 . . . . | 12.5  |
| 267-273 . . . . | 17.5  |
| 274-280 . . . . | 15.0  |
| 281-287 . . . . | 15.0  |
| 288-294 . . . . | 10.0  |
|                 | 100.0 |

Reid and Tourdes agree in fixing 294 days as the maximum, but French law allows 300 as the limit for legitimacy. The number of children born yearly to 1000 wives is as follows :—

|                 |     |                  |     |
|-----------------|-----|------------------|-----|
| France . . . .  | 180 | Ireland . . . .  | 298 |
| Norway . . . .  | 284 | England . . . .  | 312 |
| Prussia . . . . | 286 | Belgium . . . .  | 317 |
| Saxony . . . .  | 295 | Scotland . . . . | 339 |

According to Bertillon and other authorities, the European averages show that 100 married women will have in their life 420 children, 100 unmarried 21; furthermore, that as regards prostitutes 100 will give birth in their life to 60 children. The poorer classes have more children than the rich. Bertillon's observations during ten years, 1851-60, in Norway, show as follows :—

|                                |              |
|--------------------------------|--------------|
| 100 rich families have         | 313 children |
| 100 middle-class families have | 360 children |
| 100 poor families have         | 370 children |

Drysdale found, in 1888, that 100 women of Montmartre, the work-people of Paris, have 175 children, while 100 women of the fashionable Champs Elysées quarter have only 86.

As regards the sexes of infants, it is observed that young couples are most likely to have boys, middle-aged ones girls. Bertillon says that observations in Denmark, Norway, and Austria give this average:—

## Males Born to 100 Females

|                      | First-Born | Subsequent Births |
|----------------------|------------|-------------------|
| Lawful . . . . .     | 110        | 105               |
| Illegitimate . . . . | 104        | 106               |

Salder's table, published in 1830, was as follows:—

|                       | Children to 100 Couples | Male Infants to 100 Females |
|-----------------------|-------------------------|-----------------------------|
| Husband younger . .   | 487                     | 87                          |
| Even age with wife .  | 617                     | 95                          |
| Husband 4 years older | 571                     | 104                         |
| " 8 " " "             | 547                     | 127                         |
| " 14 " " "            | 558                     | 146                         |
| " 20 " " "            | 455                     | 163                         |

## UNITED KINGDOM

The surplus of births over deaths, per 1000 of the population, of late years is greater in England than in Scotland:—

|                  | Births and Deaths per 1000 Population in England |         |         |         |          |
|------------------|--------------------------------------------------|---------|---------|---------|----------|
|                  | 1841-50                                          | 1851-60 | 1861-70 | 1871-80 | 40 Years |
| Births . . . . . | 32.6                                             | 34.1    | 35.3    | 35.5    | 34.4     |
| Deaths . . . . . | 22.4                                             | 22.2    | 22.6    | 21.5    | 22.2     |
| Surplus births   | 10.2                                             | 11.9    | 12.7    | 14.0    | 12.2     |

## SCOTLAND

|                      | 1855-60 | 1861-70 | 1871-80 | 26 Years |
|----------------------|---------|---------|---------|----------|
| Births . . . . .     | 33.9    | 35.0    | 35.2    | 34.8     |
| Deaths . . . . .     | 20.8    | 22.0    | 21.8    | 21.6     |
| Surplus births . . . | 13.1    | 13.0    | 13.4    | 13.2     |

## IRELAND

|                      | 1864-70 | 1871-80 | 17 Years |
|----------------------|---------|---------|----------|
| Births . . . . .     | 26.3    | 26.2    | 26.2     |
| Deaths . . . . .     | 16.7    | 18.1    | 17.5     |
| Surplus births . . . | 9.6     | 8.1     | 8.7      |

The percentage of births, according to Quarter, compares in England with other countries thus:—

| Quarter Ending     | England | Scotland | France | Germany |
|--------------------|---------|----------|--------|---------|
| March . . . . .    | 26.2    | 24.7     | 27.0   | 25.9    |
| June . . . . .     | 26.0    | 26.2     | 25.0   | 24.2    |
| September . . . .  | 24.0    | 24.4     | 24.1   | 24.9    |
| December . . . . . | 23.8    | 24.7     | 23.9   | 25.0    |
| Total . . . . .    | 100.0   | 100.0    | 100.0  | 100.0   |

According to the *Dic. Medicale*, the forceps is less used in lying-in hospitals of London or Dublin than elsewhere, viz.:—

| In               | Per 10,000 Births | In               | Per 10,000 Births |
|------------------|-------------------|------------------|-------------------|
| Dublin . . . . . | 15                | Vienna . . . . . | 37                |
| London . . . . . | 18                | Paris . . . . .  | 39                |

Illegitimacy is declining in England, as appears thus:—

| Period            | Per 1000 Births | Period            | Per 1000 Births |
|-------------------|-----------------|-------------------|-----------------|
| 1841-50 . . . . . | 67              | 1861-70 . . . . . | 61              |
| 1851-60 . . . . . | 65              | 1871-80 . . . . . | 51              |

## FRANCE

The birth-rate is declining since 1801, viz.:—

| Period  | France | Paris | Period  | France | Paris |
|---------|--------|-------|---------|--------|-------|
| 1801-10 | 33.0   | ...   | 1841-50 | 27.3   | 31.4  |
| 1811-20 | 31.8   | ...   | 1851-60 | 26.1   | 31.5  |
| 1821-30 | 30.6   | 35.9  | 1861-70 | 26.0   | 30.1  |
| 1831-40 | 28.8   | 35.1  | 1871-80 | 25.6   | 27.4  |

In 1886 there were 10,425,341 families with children thus:—

| Children         | Number of Families | Ratio |
|------------------|--------------------|-------|
| None . . . . .   | 2,073,205          | 19.9  |
| 1 . . . . .      | 2,542,611          | 24.4  |
| 2 . . . . .      | 2,265,337          | 21.7  |
| 3 . . . . .      | 1,512,054          | 14.5  |
| 4 . . . . .      | 936,853            | 9.0   |
| 5 . . . . .      | 540,693            | 5.2   |
| Over 5 . . . . . | 554,588            | 5.3   |
|                  | 10,425,341         | 100.0 |

According to a return by the Minister of Finance, there are 148,808 families, each with seven children or more, which have claimed the exemption from certain taxes recently voted by the French Parliament. These families have 1,157,547 children, or as nearly as possible eight each.

In 1856 the ratio of married couples that had no children was much lower, only 15.5 per cent. If we compare the number of lawful births with that of marriages, we see, moreover, a constant decline since 1830, viz.:—

| Period            | Per Marriage |
|-------------------|--------------|
| 1800-30 . . . . . | 3.82         |
| 1831-60 . . . . . | 3.20         |
| 1861-70 . . . . . | 3.09         |
| 1871-80 . . . . . | 2.98         |

The ratio of illegitimacy has varied little in forty years, viz.:—

| Period            | Per 100 Births |
|-------------------|----------------|
| 1841-50 . . . . . | 7.2            |
| 1851-60 . . . . . | 7.4            |
| 1861-70 . . . . . | 7.5            |
| 1871-80 . . . . . | 7.3            |

It is a custom common in France for fathers to declare lawful their illegitimate children. The proportion thus recognised in the years 1870-74 was 25 per cent., against 21 per cent. in the fifteen years preceding. In ordinary births there are 105 males to 100 females, but in twins only 102 to 100. Births of twins average thus per 1000:—

335 of boys  
315 of girls  
350 mixed

1000

The increase of still-births is an alarming feature, viz.:—

|         | Per 1000 Births |        |       |        |              |       |
|---------|-----------------|--------|-------|--------|--------------|-------|
|         | Male            | Female | Total | Lawful | Illegitimate | Total |
| 1841-50 | 39              | 29     | 34    | 32     | 66           | 34    |
| 1853-62 | 49              | 35     | 42    | 40     | 71           | 42    |
| 1863-70 | 51              | 38     | 45    | 41     | 81           | 45    |

## GERMANY

The annual birth and death rates of all Germany for forty-six years ending 1886 were as follows :—

| Period        | Per 1000 Inhabitants |        |                | Of 100 Births |              |
|---------------|----------------------|--------|----------------|---------------|--------------|
|               | Births               | Deaths | Surplus Births | Still-born    | Illegitimate |
| 1841-50 . . . | 37.5                 | 28.2   | 9.3            | 3.9           | 10.8         |
| 1851-60 . . . | 36.8                 | 27.8   | 9.0            | 4.0           | 11.4         |
| 1861-70 . . . | 38.7                 | 28.4   | 10.3           | 4.1           | 11.5         |
| 1871-80 . . . | 40.7                 | 28.7   | 12.0           | 4.0           | 8.9          |
| 1881-86 . . . | 38.5                 | 27.3   | 11.2           | 3.8           | 9.3          |

Birth-rates have been as follows :—

| Prussia       |                     |              | Saxony        |                     |              |
|---------------|---------------------|--------------|---------------|---------------------|--------------|
| Period        | Per 1000 Population | Per Marriage | Period        | Per 1000 Population | Per Marriage |
| 1748-90 . . . | 40.6                | ...          | 1831-40 . . . | 38.1                | 4.2          |
| 1816-40 . . . | 40.8                | 4.3          | 1841-50 . . . | 39.2                | 4.1          |
| 1841-60 . . . | 38.6                | ...          | 1851-60 . . . | 39.4                | 4.1          |
| 1861-70 . . . | 39.5                | 4.6          | 1861-70 . . . | 40.4                | 4.0          |
| 1871-80 . . . | 38.7                | 4.5          | 1871-80 . . . | 42.7                | 4.5          |
| 1881-85 . . . | 37.4                | 4.7          | 1881-85 . . . | 41.9                | 4.7          |

| Bavaria       |                     |              | Wurtemberg    |                     |              |
|---------------|---------------------|--------------|---------------|---------------------|--------------|
| Period        | Per 1000 Population | Per Marriage | Period        | Per 1000 Population | Per Marriage |
| 1830-50 . . . | 30.7                | 4.6          | 1815-29 . . . | 36.4                | 5.1          |
| 1851-70 . . . | 35.5                | 4.7          | 1861-68 . . . | 40.8                | 5.2          |
| 1871-80 . . . | 40.6                | 4.8          | 1876-80 . . . | 42.7                | 5.9          |
| 1881-85 . . . | 38.7                | 5.5          | 1881-85 . . . | 37.7                | 5.9          |

In Saxony the proportion of still-births was as follows :—

| Per 1000 Births |        |              |       |
|-----------------|--------|--------------|-------|
| Period          | Lawful | Illegitimate | Total |
| 1801-40 . . .   | 53     | 75           | 57    |
| 1841-60 . . .   | 47     | 75           | 51    |
| 1861-70 . . .   | 43     | 71           | 48    |
| 1871-75 . . .   | 40     | 74           | 47    |
| 1871-75 . . .   | 44     | 91           | 52    |

The proportion of still-births in Prussia was thus :—

|                       | Per 1000 Jew Births (1820-64) | Per 1000 Christian Births (1865-74) |
|-----------------------|-------------------------------|-------------------------------------|
| Male . . .            | 22                            | 44                                  |
| Female . . .          | 19                            | 36                                  |
| General average . . . | 21                            | 41                                  |

The surplus of births over deaths in Prussia from 1822 to 1866 showed more favourably among Jews than in the Christian population, viz. :—

|                      | Among 1000 Jews |         | Among 1000 Christians |         |
|----------------------|-----------------|---------|-----------------------|---------|
|                      | 1822-40         | 1841-66 | 1822-40               | 1841-66 |
| Births . . .         | 35.5            | 34.7    | 40.0                  | 39.5    |
| Deaths . . .         | 21.4            | 18.9    | 29.6                  | 29.1    |
| Surplus births . . . | 14.1            | 15.8    | 10.4                  | 10.4    |

In sixty years ending 1875 the average number of births yearly was :—

|                               |     |
|-------------------------------|-----|
| To 1000 married women . . .   | 285 |
| To 1000 unmarried women . . . | 25  |

In a period of forty-six years ending 1886 the proportion of illegitimate births was as follows :—

|                                     |    |
|-------------------------------------|----|
| In 1000 Jewish births . . .         | 24 |
| In 1000 Roman Catholic births . . . | 28 |
| In 1000 Protestant births . . .     | 85 |

The proportion was 98 per 1000 in town births, and 72 in rural. The average during fifty-eight years in the large cities was as follows :—

|               | Per 1000 |                  | Per 1000 |
|---------------|----------|------------------|----------|
| Cologne . . . | 105      | Breslau . . .    | 180      |
| Berlin . . .  | 157      | Königsberg . . . | 189      |

The illegitimate ratios in Bavaria and Saxony were :—

| Bavaria       |                 | Saxony        |                 |
|---------------|-----------------|---------------|-----------------|
| Period        | Per 1000 Births | Period        | Per 1000 Births |
| 1850-59 . . . | 240             | 1821-40 . . . | 128             |
| 1862-70 . . . | 210             | 1841-50 . . . | 151             |
| 1871-78 . . . | 130             | 1861-75 . . . | 143             |

Twins appear to be increasing in Prussia, viz. :—

|               |                      |
|---------------|----------------------|
| 1821-57 . . . | 115 in 10,000 births |
| 1858-74 . . . | 126 " "              |

In Saxony the proportion in 1834-49 was 127 in 10,000. Sexes of twins in Prussia were: 327 of boys, 303 of girls, and 370 mixed, in 1000 cases, being as 105 boys to 100 girls.

## HOLLAND

Birth-rate from 1840 showed as follows :—

| Period        | Per 1000 Inhab. | Per Marriage |
|---------------|-----------------|--------------|
| 1841-60 . . . | 34.9            | 4.6          |
| 1861-80 . . . | 36.3            | 4.5          |
| 1881-85 . . . | 34.8            | 4.8          |

## SWEDEN

The birth-rate from 1751 was as follows :—

| Period          | Per 1000 Pop. | Per Marriage |
|-----------------|---------------|--------------|
| 1751-70 . . .   | 35.2          | 4.0          |
| 1771-90 . . .   | 32.5          | 4.0          |
| 1791-1810 . . . | 32.1          | 3.8          |
| 1811-30 . . .   | 34.1          | 4.0          |
| 1831-50 . . .   | 31.4          | 4.3          |
| 1851-70 . . .   | 32.4          | 4.6          |
| 1871-80 . . .   | 30.8          | 4.5          |
| 1881-85 . . .   | 29.4          | 4.6          |

The number of births yearly to 1000 women of 15 to 50 years of age was as follows :—

|                 |     |               |     |
|-----------------|-----|---------------|-----|
| 1776-1820 . . . | 122 | 1841-60 . . . | 127 |
| 1821-40 . . .   | 130 | 1861-75 . . . | 123 |

In 1875 of 10,000 births the ages of the mothers were :—

| Age            | Rural  | City   | Total  |
|----------------|--------|--------|--------|
| Under 18 . . . | 21     | 25     | 22     |
| 18-20 . . .    | 115    | 185    | 125    |
| 21-25 . . .    | 1,378  | 1,555  | 1,404  |
| 26-35 . . .    | 4,988  | 5,326  | 5,041  |
| 36-45 . . .    | 3,315  | 2,818  | 3,238  |
| 46-50 . . .    | 180    | 88     | 167    |
| Over 50 . . .  | 3      | 3      | 3      |
| Total . . .    | 10,000 | 10,000 | 10,000 |

The records of 100 years down to 1885 showed the average ages of every 10,000 women confined to be thus :—

|                      |        |
|----------------------|--------|
| Under 20 . . .       | 194    |
| 20-30 . . .          | 4,059  |
| 31-40 . . .          | 4,593  |
| 41-45 . . .          | 988    |
| 46 and upwards . . . | 166    |
| Total . . .          | 10,000 |

The number of children born yearly to 1000 women at various ages, married and unmarried, is as follows :—

| Age             | Per 1000 |           |           |
|-----------------|----------|-----------|-----------|
|                 | Wives    | Unmarried | All Women |
| 16-20 . . . . . | 477      | 3         | 9         |
| 20-25 . . . . . | 464      | 30        | 106       |
| 25-35 . . . . . | 342      | 46        | 220       |
| 35-40 . . . . . | 251      | 32        | 203       |
| 40-45 . . . . . | 142      | 14        | 121       |
| 45-50 . . . . . | 22       | 1         | 18        |

From observations during the years 1871-75 it appears that the mothers of every 1000 children born were as follows :—

| Mothers              | Urban | Rural | All Sweden |
|----------------------|-------|-------|------------|
| Wives . . . . .      | 773   | 908   | 890        |
| Spinsters . . . . .  | 218   | 85    | 104        |
| Widows . . . . .     | 9     | 7     | 6          |
| All births . . . . . | 1,000 | 1,000 | 1,000      |

Birth-rate was higher in the towns, with reference to population, than in rural districts, viz. :—

| Period            | Per 1000 of Population |       |            |
|-------------------|------------------------|-------|------------|
|                   | Towns                  | Rural | All Sweden |
| 1861-70 . . . . . | 33.2                   | 31.2  | 31.5       |
| 1871-75 . . . . . | 31.9                   | 30.5  | 30.7       |

In the same periods 1000 married women produced the following number of children :—

| Period            | Town | Rural | All Sweden |
|-------------------|------|-------|------------|
| 1861-70 . . . . . | 197  | 172   | 174        |
| 1871-75 . . . . . | 184  | 168   | 170        |

The ratio of women who had midwives in their confinement was as follows, per cent. :—

| Period            | Town | Rural | All Sweden |
|-------------------|------|-------|------------|
| 1861-70 . . . . . | 93   | 37    | 45         |
| 1871-75 . . . . . | 92   | 43    | 50         |

The number of boys born to 1000 girls was as follows :—

| Period            | Town  | Rural | All Sweden |
|-------------------|-------|-------|------------|
| 1861-70 . . . . . | 1,046 | 1,052 | 1,050      |
| 1871-75 . . . . . | 1,042 | 1,055 | 1,052      |

Bertillon found that the clergy had 108 boys, the nobles only 98 to 100 girls; the common people 105. The ratio of births to 100 deaths was as follows :—

| Period            | Town | Rural | All Sweden |
|-------------------|------|-------|------------|
| 1861-70 . . . . . | 126  | 162   | 157        |
| 1871-75 . . . . . | 124  | 178   | 168        |

Illegitimate births have increased very rapidly :—

| Period              | Per 1000 Births | Period            | Per 1000 Births |
|---------------------|-----------------|-------------------|-----------------|
| 1771-90 . . . . .   | 41              | 1841-60 . . . . . | 97              |
| 1791-1815 . . . . . | 59              | 1861-70 . . . . . | 105             |
| 1816-40 . . . . .   | 72              | 1871-75 . . . . . | 115             |

In the last period the ratio was 90 per 1000 in the rural districts and 220 in the towns. Still-births were as follows :—

| Period            | Per 1000 Births | Period            | Per 1000 Births |
|-------------------|-----------------|-------------------|-----------------|
| 1816-40 . . . . . | 27              | 1861-70 . . . . . | 33              |
| 1841-60 . . . . . | 32              | 1871-75 . . . . . | 32              |

Still-births occur more frequently in town than in country :—

| Period            | Per 1000 Births |       |            |
|-------------------|-----------------|-------|------------|
|                   | Urban           | Rural | All Sweden |
| 1861-70 . . . . . | 40              | 32    | 33         |
| 1871-75 . . . . . | 39              | 31    | 32         |

Twins and triplets occurred as follows :—

| Period              | Twins per 10,000 Births | Triplets per Million Births | Period            | Twins per 10,000 Births | Triplets per Million Births |
|---------------------|-------------------------|-----------------------------|-------------------|-------------------------|-----------------------------|
| 1776-95 . . . . .   | 174                     | 310                         | 1831-50 . . . . . | 140                     | 200                         |
| 1796-1810 . . . . . | 165                     | 260                         | 1851-70 . . . . . | 141                     | 195                         |
| 1811-30 . . . . .   | 155                     | 250                         | 1871-75 . . . . . | 146                     | 160                         |

In the years 1871-75 the rate for twins was 150 in towns and 144 in rural districts among 10,000 births.

#### NORWAY

Birth-rate from the beginning of the century was thus :—

| Period            | Per 1000 Inhab. | Per Marriage | Period            | Per 1000 Inhab. | Per Marriage |
|-------------------|-----------------|--------------|-------------------|-----------------|--------------|
| 1801-25 . . . . . | 30.6            | 3.7          | 1861-70 . . . . . | 30.8            | 4.7          |
| 1826-45 . . . . . | 31.3            | 4.2          | 1871-80 . . . . . | 30.8            | 4.3          |
| 1846-60 . . . . . | 32.4            | 4.2          | 1881-85 . . . . . | 31.1            | 4.7          |

The number of children born yearly to 1000 women between 20 and 45 years of age was as follows :—

| Period            | Per 1000 Wives | Per 1000 Unmarried |
|-------------------|----------------|--------------------|
| 1836-45 . . . . . | 286            | 25                 |
| 1846-55 . . . . . | 305            | 32                 |
| 1856-65 . . . . . | 311            | 32                 |
| 1866-70 . . . . . | 284            | 32                 |

Wives and unmarried women had more children in town than in the country, the returns for ten years down to 1870 showing that 1000 women between the ages of 15 and 45 gave birth as follows :—

|                      | Per 1000 |           |
|----------------------|----------|-----------|
|                      | Wives    | Unmarried |
| Town . . . . .       | 311      | 33        |
| Rural . . . . .      | 301      | 20        |
| All Norway . . . . . | 303      | 21        |

The ratio of illegitimates in the same period was 80 per 1000 births rural, 95 for urban, and 83 per 1000 for all Norway. Still-births were 38 per 1000, against 42 in the decade ending 1860. Twins occurred as follows :—

| Period            | Per 10,000 Births |       |            |
|-------------------|-------------------|-------|------------|
|                   | Urban             | Rural | All Norway |
| 1851-60 . . . . . | 109               | 124   | 121        |
| 1861-70 . . . . . | 117               | 120   | 119        |

## BIRTHS

97

## BIRTHS

The average of triplets in the above twenty years was 160 per million births. The number of boys born to 100 girls was as follows :—

|                      | Urban | Rural | All Norway |
|----------------------|-------|-------|------------|
| Lawful . . . .       | 1,040 | 1,058 | 1,053      |
| Illegitimate . . . . | 1,090 | 1,070 | 1,060      |
| Total . . . .        | 1,045 | 1,060 | 1,055      |

The preponderance of males varies with the length of time the parents may be married, thus :—

|                             |                        |
|-----------------------------|------------------------|
| Married under 7 years . . . | 116 boys to 100 girls. |
| " 7-12 " . . .              | 107 " "                |
| " over 12 " . . .           | 94 " "                 |

The sex of the first-born likewise varies thus :—

|                             |                        |
|-----------------------------|------------------------|
| Both parents under 25 . . . | 208 boys to 100 girls. |
| Father over 35 . . . .      | 92 " "                 |
| Both parents over 35 . . .  | 87 " "                 |

## FINLAND

Birth-rate for fifteen years ending 1865 averaged 36.2, against 34.3 in the twenty years preceding; still-births, 29 in 1000 births; twins, 149 in 10,000; illegitimate, 72 per 1000.

## ITALY

In the period from 1862 to 1885 the birth-rate showed :—

|                 | Per 1000<br>Inhabitants | Per<br>Marriage |
|-----------------|-------------------------|-----------------|
| 1862-70 . . . . | 37.5                    | 5.0             |
| 1871-80 . . . . | 36.9                    | 4.9             |
| 1881-85 . . . . | 38.0                    | 4.7             |

The ratio of still-births was found in 1872-74 to vary from 15 to 41 per 1000 in various parts of the kingdom, viz. :—

|                 |               |                  |
|-----------------|---------------|------------------|
| Sicily . . . 15 | Rome . . . 41 | Piedmont . . 34  |
| Naples . . . 18 | Lombardy . 38 | Tuscany . . . 35 |

The ratio for the whole kingdom was only 29 per 1000. From a census taken in Turin it was found that of 1000 children born in a given year, the ratios were as follows :—

|                  |     |                     |     |
|------------------|-----|---------------------|-----|
| 1st born . . . . | 231 | 5th born . . . .    | 88  |
| 2nd " . . . .    | 188 | 6th " . . . .       | 67  |
| 3rd " . . . .    | 152 | 7th " . . . .       | 50  |
| 4th " . . . .    | 118 | 8th, &c. born . . . | 106 |

## RUSSIA

The birth-rate has been as follows per 1000 population :—

| Years              | Years              | Years              |
|--------------------|--------------------|--------------------|
| 1801-20 . . . 39.6 | 1846-58 . . . 45.5 | 1876-80 . . . 48.4 |
| 1866-75 . . . 44.6 | 1801-65 . . . 50.7 | 1881-85 . . . 48.7 |

From 1861 to 1883 the number of births averaged 520 to 100 marriages. The sexes of children born were :—

|                      |                          |
|----------------------|--------------------------|
| 1801 to 1830 . . . . | 110 males to 100 females |
| 1831 to 1860 . . . . | 105 " 100 "              |

At St. Petersburg 1000 births occurred as follows :—

| Quarter Ending       |      |
|----------------------|------|
| March 31st . . . .   | 256  |
| June 30th . . . .    | 260  |
| September 30th . . . | 247  |
| December 31st . . .  | 237  |
| Total . . . .        | 1000 |

## AUSTRIA-HUNGARY

Birth-rates in Austria and Hungary were as follows :—

| Period          | Austria                 |                 | Hungary                 |                 |
|-----------------|-------------------------|-----------------|-------------------------|-----------------|
|                 | Per 1000<br>Inhabitants | Per<br>Marriage | Per 1000<br>Inhabitants | Per<br>Marriage |
| 1830-47 . . . . | 39.7                    | ...             | ...                     | ...             |
| 1853-60 . . . . | 40.6                    | 4.9             | ...                     | ...             |
| 1861-70 . . . . | 38.2                    | 4.4             | 42.2                    | 4.6             |
| 1871-80 . . . . | 39.7                    | 4.6             | 43.0                    | 4.5             |
| 1881-85 . . . . | 38.0                    | 4.8             | 45.2                    | 4.0             |

Illegitimacy has a high ratio in the cities, viz. :—

|                |              |
|----------------|--------------|
| Vienna . . . . | 402 per 1000 |
| Prague . . . . | 470 " "      |

In Prague in 1880 it was found that 1000 married women gave birth to 155 children yearly, and 1000 unmarried to 75. The birth-rate of Prague per 1000 inhabitants is 44, that of Vienna 42. Still-births in Vienna are 43 in 1000. The ratio of sexes in Vienna shows that 106 boys are born for 100 girls.

Returns for Austria proper during ten years to 1886 gave the following ratios of births :—

|                  |                    |                 |
|------------------|--------------------|-----------------|
| Male . . . 515   | Legitimate . 856   | Live-born . 973 |
| Female . . . 485 | Illegitimate . 144 | Still-born . 27 |
| Total. 1000      | 1000               | 1000            |

Returns for Hungary for six years ending 1886 give the following average :—

|         | Live-Born | Illegitimate |              | Still-Births |
|---------|-----------|--------------|--------------|--------------|
| Males . | 295,200   | 26,300       | Lawful .     | 9,510        |
| Females | 281,700   | 25,200       | Illegitimate | 1,620        |
| Total   | 576,900   | 51,000       | Total .      | 11,130       |

This gives a ratio of nearly 9 per cent. for illegitimates; still-births 19 per 1000. The proportion of still-born among bastards was very high, 32 per 1000. In the said interval of six years there were in Hungary the following multiple births :—

|                   | Number<br>of Births | Male  | Female | Total  |
|-------------------|---------------------|-------|--------|--------|
| Twins . . . .     | 8,485               | 8,620 | 8,350  | 16,970 |
| Triplets . . . .  | 104                 | 150   | 162    | 312    |
| Quadruplets . . . | 2                   | 3     | 5      | 8      |

## BELGIUM

The annual average of births was as follows :—

| Period          | Births  | Excess over<br>Deaths | Birth-rate<br>per 1000<br>Population | Births to 100<br>Marriages |
|-----------------|---------|-----------------------|--------------------------------------|----------------------------|
| 1831-40 . . . . | 140,000 | 32,000                | 33.4                                 | 4.57                       |
| 1841-50 . . . . | 130,000 | 26,000                | 30.3                                 | 4.50                       |
| 1851-60 . . . . | 137,000 | 35,000                | 30.0                                 | 4.08                       |
| 1861-70 . . . . | 155,000 | 40,000                | 31.6                                 | 4.26                       |
| 1871-80 . . . . | 172,000 | 52,000                | 32.1                                 | 4.42                       |
| 1881-87 . . . . | 175,000 | 57,000                | 30.7                                 | 4.43                       |

The above being the total number of births, legitimate and illegitimate, it follows that the number of children

born to each marriage was really less than shown above. The official tables show as follows :—

| Period  | Males Born to 100 Female Births | Births to 100 Deaths | Births to 100 Women of 15 to 45 Years of Age |
|---------|---------------------------------|----------------------|----------------------------------------------|
| 1841-50 | 105.3                           | 125                  | 13.4                                         |
| 1851-60 | 105.2                           | 134                  | 13.1                                         |
| 1861-70 | 105.2                           | 136                  | 14.4                                         |
| 1871-80 | 104.7                           | 143                  | 14.5                                         |
| 1887    | 106.0                           | 152                  | 13.7                                         |

The following is an official table of ratios :—

| Period  | Percentage of Illegitimate Births | Illegitimate Births to 100 Single Women (15-45) | Male Births to 100 Female |              | Still-births, Percentage |
|---------|-----------------------------------|-------------------------------------------------|---------------------------|--------------|--------------------------|
|         |                                   |                                                 | Legitimate                | Illegitimate |                          |
| 1841-50 | 7.4                               | 1.62                                            | 105.5                     | 102.5        | 4.37                     |
| 1851-60 | 7.9                               | 1.67                                            | 105.4                     | 102.5        | 4.73                     |
| 1861-70 | 7.1                               | 1.76                                            | 105.4                     | 103.0        | 4.81                     |
| 1871-80 | 7.2                               | 1.84                                            | 104.9                     | 102.4        | 4.54                     |
| 1887    | 8.8                               | 2.14                                            | 105.3                     | 100.9        | 4.97                     |

In Brussels the ratio of illegitimacy rises to 285 per 1000 births.

#### DENMARK

Since 1840 the birth-rate has been as follows :—

| Period  | Per 1000 Population | Per Marriage |
|---------|---------------------|--------------|
| 1840-60 | 32.8                | 4.0          |
| 1861-70 | 31.0                | 4.1          |
| 1871-80 | 31.5                | 4.0          |
| 1881-85 | 32.5                | 4.2          |

The number of male children born to 100 females shows thus :—

| Mother's Age | Male Births |
|--------------|-------------|
| Under 30     | 108         |
| 30 to 35     | 107         |
| Over 35      | 106         |

The ages of 1000 women in their confinement in the years 1861-70 were :—

|          |      |
|----------|------|
| Under 20 | 14   |
| 20 to 30 | 414  |
| 30 to 40 | 461  |
| Over 40  | 111  |
|          | 1000 |

#### GREECE

During ten years ending 1878 the birth-rate averaged 120 per 1000 women between 15 and 50 years, and 27.6 per 1000 of the general population. The number of lawful births per 1000 married women was 178 yearly.

#### SWITZERLAND

Birth-rate during twenty years showed as follows :—

| Period  | Per 1000 Population | Per Marriage |
|---------|---------------------|--------------|
| 1867-74 | 29.8                | ...          |
| 1876-80 | 32.2                | 4.3          |
| 1881-85 | 28.2                | 4.0          |
| 1886    | 27.4                | 4.0          |

The ratio of illegitimacy is high at Geneva, especially among the foreign population, viz. :—

| Illegitimacy in 100 Births |       |         |
|----------------------------|-------|---------|
| Period                     | Swiss | Foreign |
| 1847-56                    | 6.8   | 11.4    |
| 1857-66                    | 5.8   | 14.8    |
| 1867-76                    | 6.7   | 18.1    |

#### ALGERIA

The birth-rate among various classes of the population showed :—

| Race    | 1853-56 | 1872-76 |
|---------|---------|---------|
| French  | 41.0    | 38.0    |
| Spanish | 47.5    | 39.5    |
| Italian | 38.5    | 39.0    |
| Maltese | 44.0    | 38.4    |
| Germans | 31.0    | 28.8    |
| Jews    | 56.5    | 49.0    |

The number of children to 100 marriages, and the ratio of twins were as follows :—

| Race    | Children per 100 Marriages | Twins in 10,000 Births |
|---------|----------------------------|------------------------|
| French  | 370                        | 102                    |
| German  | 480                        | 160                    |
| Italian | 570                        | 120                    |
| Spanish | 630                        | 40                     |

The average of children to marriages and the ratio of male births have been as follows :—

| Period  | Children to 100 Marriages | Boys to 100 Girls |
|---------|---------------------------|-------------------|
| 1836-53 | 390                       | 117               |
| 1854-77 | 440                       | 107               |

#### AUSTRALIA

The annual birth and death rates of the seven colonies during thirteen years down to 1888 were as follows :—

|                 | Per 1000 Population |        |                | Percentage of Illegitimates |
|-----------------|---------------------|--------|----------------|-----------------------------|
|                 | Births              | Deaths | Surplus Births |                             |
| N. S. Wales     | 37.8                | 15.5   | 22.3           | 4.4                         |
| Victoria        | 31.6                | 15.1   | 16.5           | 4.5                         |
| Queensland      | 36.9                | 17.3   | 19.6           | 4.0                         |
| South Australia | 36.9                | 14.1   | 22.8           | 2.2                         |
| New Zealand     | 37.2                | 11.1   | 26.1           | 2.7                         |
| Tasmania        | 33.1                | 15.8   | 17.3           | 4.2                         |
| W. Australia    | 34.7                | 16.3   | 18.4           | 4.2                         |
| All Australia   | 35.5                | 15.0   | 20.5           | 4.3                         |

#### ARGENTINA

The birth-rate of Buenos Ayres is 31 per 1000 of population. Of 1000 children born the parents were :—

|            |      |
|------------|------|
| Argentines | 168  |
| Italians   | 434  |
| Various    | 398  |
|            | 1000 |

There were 35 still-births in 1000 births.

## BOTANY

The growth of various trees and products stops at the following heights above sea-level:—

|             |       |            |       |            |       |
|-------------|-------|------------|-------|------------|-------|
|             | Feet  |            | Feet  |            | Feet  |
| Vine . . .  | 2,300 | Oak . . .  | 3,350 | Pine . . . | 6,300 |
| Maize . . . | 2,800 | Walnut . . | 3,600 | Fir . . .  | 6,700 |

The number of leguminous plants in various parts of the world is as follows:—

|               |     |               |     |                |     |
|---------------|-----|---------------|-----|----------------|-----|
| Europe . . .  | 184 | S. America .  | 605 | Levant . . .   | 250 |
| Mediterranean | 468 | Australia . . | 229 | N. Africa . .  | 108 |
| United States | 183 | China . . .   | 77  | Central Africa | 130 |
| Mexico . . .  | 152 | East Indies . | 452 | S. Africa . .  | 395 |
| West Indies . | 221 | Siberia . . . | 129 | Islands . . .  | 42  |

The number of seeds in a bushel is 556,000 of wheat, 883,000 of rye, 16,400,000 of clover.

The quantity of seed to the acre is usually, in bushels, thus:—

|              |     |             |     |              |     |
|--------------|-----|-------------|-----|--------------|-----|
| Wheat . . .  | 1.6 | Rye . . .   | 1.5 | Hemp . . .   | 1.2 |
| Barley . . . | 2.0 | Rice . . .  | 2.0 | Flax . . .   | 0.5 |
| Oats . . .   | 3.0 | Beans . . . | 1.5 | Potatoes . . | 8.0 |

*Batata*.—Better known as the sweet potato, gives a crop of 5 tons per acre.

*Carob*.—Also called algarroba or locust tree; it flourishes in Cyprus, where there are 600,000 trees, covering 20,000 acres. The yield of beans varies from 10 to 100 lbs. Average crop 25,000 tons, value £75,000, the bulk being exported to Scotland to make whiskey. The bean has 66 per cent. sugar and gum.

*Caster-oil Plant*.—Flourishes in Algeria; average crop 10 cwt. per acre, which gives from 50 to 60 gallons oil, worth 10s. per gallon.

*Mulberry*.—An ordinary tree produces from 50 to 200 lbs. of leaves yearly, according to age, viz.:—

| Age, Years | Lbs., Leaves | Age, Years | Lbs., Leaves |
|------------|--------------|------------|--------------|
| 4          | 25           | 12         | 148          |
| 9          | 105          | 21         | 218          |

At the age of 45 the production begins to decline, and the tree dies at 70. Lombardy has 10 millions of these trees, and all Italy probably 40 millions; France has 6 millions. It is found that 10 lbs. of leaves suffice to yield one ounce of raw silk.

## BRIDGES AND VIADUCTS

One of the most remarkable bridges of the Middle Ages is that built over the Adda in Italy in 1377, which is of stone, and has a single span of 237 feet. Among those of historical interest may be mentioned:—

| Name             | Length (Feet) | Date | Over         |
|------------------|---------------|------|--------------|
| Ratisbon . . .   | 994           | 1135 | Danube       |
| St. Esprit . . . | 2,690         | 1285 | Rhone        |
| Cordoba . . .    | 460           | 1301 | Guadalquivir |
| Verona . . .     | 365           | 1354 | Po           |
| Rialto . . .     | 99            | 1588 | At Venice    |
| Prague . . .     | 1,706         | 1650 | Moldau       |
| Schaffhausen .   | 364           | 1758 | Rhine        |
| Neuilly . . .    | 740           | 1768 | Seine        |

Those of the greatest height appear to be the following:—

|                | Height (Feet) | Span (Feet) |
|----------------|---------------|-------------|
| Brooklyn . . . | 210           | 1,620       |
| Annecy . . .   | 656           | 636         |
| Clifton . . .  | 257           | 703         |
| Forth . . .    | ...           | 5,330       |

Brooklyn bridge has four cables, each of 5000 wires of  $\frac{1}{4}$  inch. Forth is by far the greatest ever constructed (see *Engineering*); the heaviest train deflection is 4 inches. The first iron bridge in the United Kingdom was at Coalbrookdale in 1779; the following table shows the most notable in all parts of the world since then:—

| Date       | Bridge          | Over          | Length (Feet) | Iron (Tons) | Cost      | Builder     |
|------------|-----------------|---------------|---------------|-------------|-----------|-------------|
| 1779 . . . | Coalbrookdale . | Severn . . .  | 100           | 378         | £         | Darby       |
| 1796 . . . | Sunderland . .  | Wear . . .    | 236           | 260         | 27,000    | Wilson      |
| 1819 . . . | Southwark . .   | Thames . .    | 800           | 5,780       | 800,000   | Rennie      |
| 1825 . . . | Menai . . .     | Menai Straits | 1,050         | 2,187       | 212,000   | Telford     |
| 1849 . . . | Newcastle . .   | Tyne . . .    | 900           | 5,050       | 243,000   | Stephenson  |
| 1850 . . . | Britannia . . . | Menai Straits | 1,511         | 9,600       | 602,000   | Stephenson  |
| 1855 . . . | Niagara . . .   | Niagara . .   | 850           | 400         | 83,000    | Roebling    |
| 1859 . . . | Victoria . . .  | St. Lawrence  | 7,200         | 8,230       | 1,700,000 | Stephenson  |
| 1860 . . . | Pesth-Buda . .  | Danube . .    | 1,900         | 7,000       | ...       | ...         |
| 1862 . . . | Freyburg . . .  | Sarine . . .  | 1,095         | 3,100       | 100,000   | ...         |
| 1867 . . . | Cincinnati . .  | Ohio . . .    | 2,252         | ...         | ...       | Roebling    |
| 1868 . . . | Clifton . . .   | Niagara . .   | 1,270         | ...         | 40,000    | ...         |
| 1874 . . . | St. Louis . . . | Mississippi . | 2,200         | 4,200       | 400,000   | Eads        |
| 1875 . . . | Wuzerabad . .   | Punjaub . .   | 9,300         | ...         | 650,000   | ...         |
| 1877 . . . | Oporto . . .    | Douro . . .   | 1,160         | ...         | ...       | Eiffel      |
| 1878 . . . | Annan . . .     | Solway . . .  | 5,120         | 1,600       | ...       | ...         |
| 1879 . . . | Empress . . .   | Sutlej . . .  | 6,000         | 6,650       | 550,000   | ...         |
| 1880 . . . | Moordyk . . .   | Maas . . .    | 4,850         | ...         | ...       | ...         |
| 1880 . . . | Pultowa . . .   | Dnieper . .   | 3,550         | ...         | ...       | ...         |
| 1881 . . . | Saratov . . .   | Volga . . .   | 4,872         | 5,150       | 695,000   | Beleloubski |
| 1882 . . . | Benares . . .   | Ganges . .    | 3,000         | ...         | 425,000   | ...         |
| 1883 . . . | Brooklyn . . .  | Hudson . .    | 4,500         | 30,000      | 3,100,000 | Roebling    |
| 1889 . . . | Forth . . .     | Forth . . .   | 5,330         | 48,000      | 2,550,000 | Fowler      |

The Chinese had suspension bridges of iron chains during many centuries. Ogilvy saw one over the Yunnan in 1669, erected by the Emperor Ming, who was contemporary with Tiberius Caesar.

In 1816 Captain Brown built an iron bridge of 112 feet, only for foot-passengers, at Galashiels, for the sum of £40, the cheapest bridge on record.

The quickest bridge ever built was by Mr. Dredge, in 1846, who in eight days placed an iron bridge, 74 feet span, across the Blackwater, co. Tyrone, Ireland. The greatest number of bridges built by one man was by Mr. Telford, surnamed Pontifex, who erected 1200 bridges in Scotland, between the years 1800 and 1820.

London has spent  $5\frac{1}{2}$  millions sterling on bridges since 1816, viz. :—

| Name            | Length, Feet | Cost      | Per Foot | Date |
|-----------------|--------------|-----------|----------|------|
| London . . .    | 900          | 2,000,000 | 2,200    | 1831 |
| Southwark . .   | 800          | 800,000   | 1,000    | 1819 |
| Waterloo . . .  | 1,326        | 1,060,000 | 800      | 1817 |
| Blackfriars . . | 1,000        | 270,000   | 270      | 1869 |
| Charing Cross . | 1,365        | 180,000   | 130      | 1817 |
| Westminster . . | 1,220        | 480,000   | 390      | 1862 |
| Vauxhall . . .  | 806          | 412,000   | 500      | 1816 |
| Hammersmith .   | 480          | 80,000    | 170      | 1827 |
| Total . . .     | 7,897        | 5,412,000 | 680      | ...  |

The French Government in 56 years spent 76 millions sterling on bridges, thus :—

| Years          | Cost       | Per Annum |
|----------------|------------|-----------|
| 1814-30 . . .  | 13,500,000 | 800,000   |
| 1831-47 . . .  | 22,500,000 | 1,330,000 |
| 1848-70 . . .  | 40,200,000 | 1,800,000 |
| 56 years . . . | 76,200,000 | 1,350,000 |

The most remarkable viaducts hitherto made are the following :—

|                | Length, Feet | No. of Arches | Span, Feet | Height, Feet | Width, Feet | Cost, Pence per Cubic Yd. |
|----------------|--------------|---------------|------------|--------------|-------------|---------------------------|
| Weaver . . .   | 1,484        | 20            | 60         | 84           | 30          | 92                        |
| Stockport . .  | 1,792        | 26            | 63         | 90           | 32          | 91                        |
| Dane . . .     | 1,717        | 23            | 63         | 88           | 31          | 75                        |
| Rugby . . .    | 720          | 13            | 50         | 51           | 30          | 88                        |
| Tanworth . .   | 710          | 20            | 30         | 45           | ...         | 99                        |
| Llangollen .   | 1,800        | 19            | 85         | 150          | ...         | 90                        |
| Wharnccliffe . | 895          | 11            | 70         | 83           | 35          | 144                       |
| Trent . . .    | 1,286        | 56            | 20         | 33           | 29          | 86                        |
| Kinzua (N.Y.)  | 2,050        | 20            | 60         | 301          | ...         | ...                       |
| Cantal (Fr.) . | 1,880        | ...           | ...        | 413          | ...         | ...                       |

The Kinzua, built by Mr. Barnes, consists of 2000 tons iron and 7000 tons masonry, supported by twenty iron piers, and costing altogether £62,000. The Cantal, by M. Eiffel, is the highest in the world, being nearly the same height as the top of the great Pyramid.

### BURIALS

The minimum time between death and burial was among the Egyptians 4 days, Romans 6, and Greeks 11 days. At present it is 48 hours in England, Germany, and Austria, 36 in Holland, 24 in France.

The cemeteries in England and France in 1882 were :—

|               | No.    | Per 100,000 Inhabitants |
|---------------|--------|-------------------------|
| England . . . | 11,304 | 45                      |
| Wales . . .   | 958    | 71                      |
| France . . .  | 38,041 | 101                     |

London has 22 cemeteries, with an aggregate of 2210 acres, that is, an acre for 1700 inhabitants. Besides those above stated for England and Wales, there are 1411 cemeteries that have been closed by Order of Council.

The practice of cremation has been recently introduced. A body weighing 140 lbs. produces 3 lbs. ashes; time for burning, 55 minutes.

Mr. Chadwick estimates the cost of funerals in England thus :—

|                    |      |                |       |
|--------------------|------|----------------|-------|
| Paupers . . .      | 13s. | Gentry . . .   | £100  |
| Working-class . .  | £5   | Nobility . . . | £1000 |
| Middle-class . . . | £40  |                |       |

Average—£10 for each interment, or 5 millions per annum.

The French official classification was as follows :—

| Funerals of         | Annual Percentage |         |
|---------------------|-------------------|---------|
|                     | 1872-74           | 1878-79 |
| Rich persons . . .  | 3.2               | 3.5     |
| Middle-class . . .  | 13.6              | 14.3    |
| Working-class . . . | 83.2              | 82.2    |
| Total . . .         | 100.0             | 100.0   |

### BUTTER

The various kinds of butter give the following analyses :—

|                 | Fat  | Water | Various | Total | Ratio of Caseine |
|-----------------|------|-------|---------|-------|------------------|
| Devonshire . .  | 82.7 | 16.2  | 1.1     | 100.0 | 16.2             |
| Norman . . .    | 82.4 | 12.6  | 5.0     | 100.0 | 10.6             |
| London . . .    | 47.1 | 42.4  | 10.5    | 100.0 | 7.8              |
| " . . .         | 67.5 | 24.0  | 8.5     | 100.0 | 6.9              |
| Isle of Wight . | 86.3 | 3.8   | 9.9     | 100.0 | 3.3              |
| Jersey . . .    | 78.5 | 10.4  | 11.1    | 100.0 | 2.5              |
| Oleomargarine . | 86.0 | 10.0  | 4.0     | 100.0 | 0.6              |

An English cow giving 1800 quarts milk per annum produces 140 lbs. butter, consuming 4 tons hay, which contain 168 lbs. fat.

The price of butter in London since 1730 has been :—

|                 | Pence |                 | Pence |
|-----------------|-------|-----------------|-------|
| 1730-1790 . . . | 5½    | 1841-1860 . . . | 12½   |
| 1791-1815 . . . | 13    | 1861-1880 . . . | 16    |
| 1816-1840 . . . | 9½    | 1881-1883 . . . | 18    |

See Dairy.

## C.

### CABS

There are 11,000 in London, and 6000 in Paris; the former average 80,000, the latter 50,000 passengers daily. The medium fare earned per passenger is 15 pence in Paris, 18 pence in London. The earnings in London per cab are 19 shillings a day in "the season," 9 the rest of the year, or 12 shillings all the year round. In 1888 the Société Générale de Paris averaged 16½ francs receipts and 14 francs expenditure daily per cab, being a net profit of 2½ francs or 2 shillings; the expenses included

2 francs a day in taxes per cab. The average earnings of this Company all the year round were 15 pence a day per cab over the average earnings in London. The cost of food per horse in Paris in 1888 was 13½ pence, against 18 pence in 1881 daily. The ratio of horses dead or disabled during the year in the Société Générale stables was :—

|               |              |
|---------------|--------------|
| 1858-60 . . . | 20 per cent. |
| 1867-69 . . . | 18           |
| 1878-88 . . . | 14           |

A statement published in 1844 showed that Paris had then 3100 cabs, earning on an average 14 francs (say 11 shillings) each daily, and 340 omnibuses, averaging 60 francs (48 shillings) daily.

Cabs kill or disable many thousands of persons yearly in the United Kingdom.

Of all males who die in England, one in 260 is killed by a cab or other vehicle, and of all females one in 2550. The ratio of these deaths to the general mortality is as follows:—

|                     | Per 10,000<br>Deaths |                    | Per 10,000<br>Deaths |
|---------------------|----------------------|--------------------|----------------------|
| Birmingham . . . .  | 12                   | Manchester . . . . | 24                   |
| Sheffield . . . . . | 17                   | Dublin . . . . .   | 33                   |
| Glasgow . . . . .   | 19                   | London . . . . .   | 37                   |
| Liverpool . . . . . | 21                   | Leeds . . . . .    | 79                   |

The value of articles left in cabs in London, and handed over to the police at Scotland Yard, averages £21,000 per annum.

### CALENDAR

1. Jewish, 383 days; the Jewish year 5650 began on September 26, 1889.

2. Julius Cæsar's, 365 days, B.C. 46, commenced in March.

3. Mahometan, 355 days, A.D. 622; the Mahometan year 1300 began March 1, 1883.

4. Charles IX., A.D. 1564, commenced 1st January.

5. Pope Gregory XIII., A.D. 1582; now used, except in Russia.

6. The Russian year begins on January 13 of our calendar. The Gregorian calendar was adopted in England in 1752, before which date the year began on March 25, which would now be April 5.

For the purpose of finding the day of the week of any event, the student will be facilitated by knowing the day on which the year began. The following table shows since 1601 the day of the week on which the 1st of January fell:—

| Sunday | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday |
|--------|--------|---------|-----------|----------|--------|----------|
| ...    | ...    | ...     | ...       | 1601     | 1602   | 1603     |
| 1604   | ...    | 1605    | 1606      | 1607     | 1608   | ...      |
| 1609   | 1610   | 1611    | 1612      | ...      | 1613   | 1614     |
| 1615   | 1616   | ...     | 1617      | 1618     | 1619   | 1620     |
| ...    | 1621   | 1622    | 1623      | 1624     | ...    | 1625     |
| 1626   | 1627   | 1628    | ...       | 1629     | 1630   | 1631     |
| 1632   | ...    | 1633    | 1634      | 1635     | 1636   | ...      |
| 1637   | 1638   | 1639    | 1640      | ...      | 1641   | 1642     |
| 1643   | 1644   | ...     | 1645      | 1646     | 1647   | 1648     |
| ...    | 1649   | 1650    | 1651      | 1652     | ...    | 1653     |

| 1804   | ...    | 1805    | 1806      | 1807     | 1808   | ...      |
| 1809   | 1810   | 1811    | 1812      | ...      | 1813   | 1814     |
| 1815   | 1816   | ...     | 1817      | 1818     | 1819   | 1820     |
| ...    | 1821   | 1822    | 1823      | 1824     | ...    | 1825     |
| 1826   | 1827   | 1828    | ...       | 1829     | 1830   | 1831     |
| 1832   | ...    | 1833    | 1834      | 1835     | 1836   | ...      |
| 1837   | 1838   | 1839    | 1840      | ...      | 1841   | 1842     |
| 1843   | 1844   | ...     | 1845      | 1846     | 1847   | 1848     |
| ...    | 1849   | 1850    | 1851      | 1852     | ...    | 1853     |
| 1854   | 1855   | 1856    | ...       | 1857     | 1858   | 1859     |
| 1860   | ...    | 1861    | 1862      | 1863     | 1864   | ...      |
| 1865   | 1866   | 1867    | 1868      | ...      | 1869   | 1870     |
| 1871   | 1872   | ...     | 1873      | 1874     | 1875   | 1876     |
| ...    | 1877   | 1878    | 1879      | 1880     | ...    | 1881     |
| 1882   | 1883   | 1884    | ...       | 1885     | 1886   | 1887     |
| 1888   | ...    | 1889    | 1890      | 1891     | 1892   | ...      |
| 1893   | 1894   | 1895    | 1896      | ...      | 1897   | 1898     |

In connection with the preceding calendar, it will be easy by means of the following table to find the day of the week of any event:—

|                     |   |    |    |    |     |
|---------------------|---|----|----|----|-----|
| January . . . . .   | 1 | 8  | 15 | 22 | 29  |
| February . . . . .  | 5 | 12 | 19 | 26 | ... |
| March . . . . .     | 5 | 12 | 19 | 26 | ... |
| April . . . . .     | 2 | 9  | 16 | 23 | 30  |
| May . . . . .       | 7 | 14 | 21 | 28 | ... |
| June . . . . .      | 4 | 11 | 18 | 25 | ... |
| July . . . . .      | 2 | 9  | 16 | 23 | 30  |
| August . . . . .    | 6 | 13 | 20 | 27 | ... |
| September . . . . . | 3 | 10 | 17 | 24 | ... |
| October . . . . .   | 1 | 8  | 15 | 22 | 29  |
| November . . . . .  | 5 | 12 | 19 | 26 | ... |
| December . . . . .  | 3 | 10 | 17 | 24 | 31  |

Allowance must be made for February 29 in leap-years, which were those preceding the blank spaces in the previous calendar.

### CANALS

The most remarkable canals are:—

| Date | Name            | Miles | Cost       | Per Mile | Country   |
|------|-----------------|-------|------------|----------|-----------|
| 1668 | Languedoc       | 160   | 680,000    | 4,250    | France    |
| 1776 | Bridgewater     | 38    | 360,000    | 9,050    | England   |
| 1785 | Eyder . . . .   | 26    | 510,000    | 19,500   | Denmark   |
| 1822 | Caledonian      | 60    | 1,140,000  | 19,000   | Scotland  |
| 1825 | Heider . . . .  | 60    | 900,000    | 15,000   | Holland   |
| 1825 | Erie . . . . .  | 363   | 1,820,000  | 5,000    | U. States |
| 1830 | Cincinnati . .  | 306   | 610,000    | 2,000    | "         |
| ...  | Rideau . . . .  | 132   | 800,000    | 0,060    | Canada    |
| ...  | Welland . . . . | 41    | 1,400,000  | 34,150   | "         |
| 1832 | Burgundy . . .  | 158   | 2,220,000  | 14,050   | France    |
| 1854 | Bengal . . . .  | 900   | 2,000,000  | 2,200    | India     |
| 1869 | Suez . . . . .  | 92    | 17,030,000 | 185,000  | Egypt     |
| 1874 | North Sea . . . | 14    | 2,030,000  | 145,000  | Holland   |

\* First year of new style, which began September 2, 1752.

## CANALS

102

## CANALS

The following table shows the mileage of canals and navigable rivers :—

|                        | Miles  |         |         |
|------------------------|--------|---------|---------|
|                        | Canals | Rivers  | Total   |
| United Kingdom . . .   | 2,794  | 1,020   | 3,814   |
| France . . . . .       | 2,910  | 4,820   | 7,730   |
| Germany . . . . .      | 1,320  | 15,760  | 17,080  |
| Russia . . . . .       | 870    | 33,046  | 33,916  |
| Austria . . . . .      | 1,710  | 5,490   | 7,200   |
| Italy . . . . .        | 664    | 626     | 1,290   |
| Spain and Portugal . . | 270    | 1,285   | 1,555   |
| Belgium . . . . .      | 535    | 540     | 1,075   |
| Holland . . . . .      | 1,830  | 870     | 2,700   |
| Scandinavia . . . . .  | 390    | 300     | 690     |
| Europe . . . . .       | 13,293 | 63,757  | 77,050  |
| United States . . . .  | 4,479  | 47,355  | 51,834  |
| Canada . . . . .       | 535    | 2,820   | 3,355   |
| Brazil . . . . .       | ...    | 22,200  | 22,200  |
| Argentina . . . . .    | ...    | 2,200   | 2,200   |
| India . . . . .        | 2,240  | 2,600   | 4,840   |
| China . . . . .        | 5,270  | 3,800   | 9,070   |
| Total . . . . .        | 25,817 | 144,732 | 170,549 |

The average cost of making canals has been £9600 in the United Kingdom, £7000 in France, £9800 in the United States, and £15,500 in Canada, per mile.

Among those projected or in construction are the following :—

| Locality                  | Miles | Estimated Cost | Per Mile |
|---------------------------|-------|----------------|----------|
| Panama . . . . .          | 46    | £26,500,000    | 575,000  |
| Alexandria and Suez . .   | 150   | ...            | ...      |
| Manchester and Liverpool  | 44    | 5,200,000      | 120,000  |
| Malacca . . . . .         | 66    | 4,000,000      | 60,000   |
| Bordeaux and Narbonne .   | 255   | 22,000,000     | 87,000   |
| Corinth . . . . .         | 4     | 1,200,000      | 300,000  |
| Dniester and Vistula . .  | 460   | 21,000,000     | 45,000   |
| Black Sea and Caspian . . | 310   | 4,000,000      | 13,000   |

The Panama Canal was begun in September 1884, the plans showing excavations of 160 million cubic yards; this included a tunnel of 4 miles or 7000 yards, 100 feet wide and 160 in height, to cost £800 per lineal yard. The whole was to be finished in 1892, at an estimated cost of 26½ millions sterling. In December 1885, Baron Lesseps had at work 10,000 men, 169 locomotives, 12,000 waggons and 7 dredges. Each of the dredges was capable of excavating 100,000 cubic yards monthly. In March 1888, after 42 months of work, the total excavations reached only 53 million cubic yards, or one-third of the total, and had cost 40 millions sterling—say 15 shillings per cubic yard, or five times the estimates. The work remaining to be excavated was 36 million tons of stone and 54 million of clay, in all 82 million cubic yards. The works were suspended in January 1889, the company having expended 60 millions sterling, but this was the nominal amount of stock. It is thought the actual works cost less than 40 millions. Death-rate among the men varied from 3 to 10 per cent. yearly.

The Suez Canal is the most remarkable and useful engineering work of ancient or modern times. It shortens the voyage between England and the East by one-third; that is, it enables two vessels to do the same work that would require three by the Cape of Good Hope, the distance in nautical miles being as follows :—

| London to           | By Canal | By Cape | Saving Miles |
|---------------------|----------|---------|--------------|
| Bombay . . . . .    | 6,330    | 10,595  | 4,265        |
| Madras . . . . .    | 7,330    | 10,830  | 3,500        |
| Calcutta . . . . .  | 7,950    | 11,450  | 3,500        |
| Singapore . . . . . | 8,345    | 11,670  | 3,325        |

It was begun by Lesseps in 1856, and completed in 1869 at a cost of £17,000,000 sterling, viz. :—

|                                   |            |
|-----------------------------------|------------|
| Preliminary expenses . . . . .    | £3,800,000 |
| Machinery . . . . .               | 2,200,000  |
| Excavation . . . . .              | 7,700,000  |
| Docks and harbours . . . . .      | 1,400,000  |
| Transport, buildings, &c. . . . . | 1,935,000  |

Total . . . . . £17,035,000

Length, 92 miles; depth, 26 feet. Tolls average £800 per vessel, or 8 shillings per ton of net tonnage. Tugs are provided for sailing vessels at a charge of £200. The saving to commerce by reason of the canal is above five millions sterling per annum, that is, 2½ millions after payment of the fees. The flags of vessels passing through since 1870 have been 77 per cent. British, 8 French, 4 Dutch, and 11 per cent. of other nations.

The traffic returns show as follows :—

| Year           | Ships | Tons      | Average Tonnage | Fees, £   |
|----------------|-------|-----------|-----------------|-----------|
| 1870 . . . . . | 486   | 436,000   | 900             | 206,000   |
| 1875 . . . . . | 1,494 | 2,940,000 | 1,960           | 1,156,000 |
| 1880 . . . . . | 2,026 | 4,345,000 | 2,150           | 1,630,000 |
| 1886 . . . . . | 3,100 | 8,180,000 | 2,640           | 2,260,000 |
| 1889 . . . . . | 3,425 | 9,606,000 | 2,800           | 2,640,000 |

The above is the gross tonnage, the net being 70 per cent. of same, the tonnage ratio of the various flags in late years showed thus :—

|                   | 1886  | 1889  |
|-------------------|-------|-------|
| British . . . . . | 76.4  | 77.9  |
| French . . . . .  | 8.5   | 5.7   |
| Italian . . . . . | 2.3   | 2.9   |
| German . . . . .  | 3.9   | 4.8   |
| Dutch . . . . .   | 3.8   | 3.8   |
| Various . . . . . | 5.1   | 4.9   |
| Total . . . . .   | 100.0 | 100.0 |

Electric light is now used for passage by night. The mean duration of passage was 48 hours in 1883, and only 27 hours in 1889. Expenses in 1889 were £1,300,000, leaving a profit of £1,340,000.

The ordinary share capital of the company is only 8 millions sterling, and the dividend ranges from 15 per cent. per annum upwards. The sum due on debentures is £8,867,000. The nominal capital called up for making the canal and the exact sum realised are shown thus :—

| Year            | Issue      | At  | Realised   |
|-----------------|------------|-----|------------|
| 1860 . . . . .  | £9,360,000 | 100 | 9,360,000  |
| 1868 . . . . .  | 6,667,000  | 60  | 4,000,000  |
| 1871 . . . . .  | 600,000    | 80  | 480,000    |
| 1880 . . . . .  | 240,000    | 67  | 160,000    |
| Total . . . . . | 16,867,000 | 83  | 14,000,000 |

It appears, therefore, that the real cost was only 14 millions sterling, or £150,000 per mile. The British Government owns nearly half the ordinary share capital, having bought 176,602 shares, nominal value £3,530,000,

from the Khedive in 1876, at a premium of 12½ per cent., the price paid being £3,976,600. The coupons had been cut off till 1892, but the Khedive pays interest until then. The proportions of Eastern and Southern trade passing to and from Great Britain through the Suez Canal appear as follows :—

| British Trade with | By Canal    | By Cape    | Total       |
|--------------------|-------------|------------|-------------|
|                    | £           | £          | £           |
| Australia . . .    | 12,000,000  | 43,000,000 | 65,000,000  |
| China and Japan    | 23,000,000  | 2,000,000  | 25,000,000  |
| India, &c. . . .   | 69,000,000  | 15,000,000 | 84,000,000  |
| Total . . .        | 104,000,000 | 60,000,000 | 164,000,000 |

The value of what passes through the canal is equal to one-seventh of the total foreign commerce of Great Britain.

Comparing the traffic on canals in the various parts of the world, we find the average of tons per mile as follows :—

|                    |                    |                    |
|--------------------|--------------------|--------------------|
| Germany . . 6,000  | England . . 8,800  | U. States 10,000   |
| France . . . 8,000 | Russia . . . 9,000 | Suez . . . 102,000 |

## UNITED KINGDOM

It is stated by Haydn that the first canal in England was made by Henry I. to connect the Trent with the Witham in the year 1134. The first, however, of any note was that made by the Duke of Bridgewater, James Brindley being engineer; it was begun in 1759, completed in 1776 between Manchester and Liverpool at a cost of £360,000, length 38 miles. A canal from the Severn to the Thames was completed in 1789. The first in Scotland was that from the Forth to the Clyde, completed in 1790, after twenty-two years of labour. The Caledonian was begun in 1803 and completed in 1822, being known as Neptune's Staircase, with 28 locks, and so arduous in making that the cost exceeded £19,000 a mile. The Grand Canal of Ireland, connecting Dublin with the Shannon, was begun in 1765 and completed in 1788.

In 1889 the canals of the United Kingdom were :—

|                | Miles  |                  |       | Worked by |            |
|----------------|--------|------------------|-------|-----------|------------|
|                | Canals | Canalised Rivers | Total | Railways  | Canal Cos. |
| England . . .  | 2,500  | 550              | 3,050 | 1,025     | 2,025      |
| Scotland . . . | 150    | ...              | 150   | 75        | 75         |
| Ireland . . .  | 144    | 470              | 614   | 96        | 518        |
| U. Kingdom     | 2,794  | 1,020            | 3,814 | 1,196     | 2,618      |

The annual traffic was estimated as follows :—

| Worked by         | Miles | Tons Carried | Tons per Mile |
|-------------------|-------|--------------|---------------|
| Railways . . . .  | 1,196 | 6,600,000    | 5,500         |
| Companies . . . . | 2,618 | 27,700,000   | 10,600        |
| Total . . . .     | 3,814 | 34,300,000   | 9,000         |

They represent a capital of 36 millions sterling, or £9500 per mile; annual dividends ranging from 2 to 5 per cent. Some allow vessels of 6 feet draught, others only 3 feet.

The canals of the United Kingdom in actual use in 1887 were as follows :—

|                                 | Miles |
|---------------------------------|-------|
| Owned by railways . . . .       | 1,421 |
| Independent of railways . . . . | 1,537 |
| Total . . . .                   | 2,958 |

Nothing is known as to freight charges, but the net earnings do not seem to reach one shilling per ton carried.

## FRANCE

The French statistics of canals are as follows :—

| Date         | Miles | Capital Cost | Per Mile |
|--------------|-------|--------------|----------|
|              |       | £            | £        |
| 1800 . . . . | 766   | 4,600,000    | 6,100    |
| 1813 . . . . | 890   | 7,700,000    | 8,600    |
| 1830 . . . . | 1,450 | 15,100,000   | 10,400   |
| 1847 . . . . | 2,690 | 27,800,000   | 10,300   |
| 1870 . . . . | 3,150 | 31,400,000   | 10,000   |

In the interval from 1770 to 1844 the following were constructed :—

| Date of Works | Canal            | Cost, £    | Cost, £ Per Mile | Length, Miles | Fall, Feet |
|---------------|------------------|------------|------------------|---------------|------------|
| 1770-1837     | Somme            | 520,000    | 5,200            | 98            | 220        |
| 1775-1832     | Burgundy         | 2,200,000  | 14,500           | 158           | 1,650      |
| 1784-1843     | Nivernais        | 1,300,000  | 12,000           | 110           | 800        |
| 1785-1834     | { Rhone & Rhine  | 1,100,000  | 5,000            | 220           | 1,230      |
| 1806-1841     | { Nantes & Brest | 1,800,000  | 8,000            | 230           | 1,810      |
| 1808-1841     | Berry            | 1,100,000  | 5,500            | 200           | 810        |
| 1821-1838     | Ardennes         | 600,000    | 9,000            | 65            | 440        |
| 1822-1838     | Loire            | 1,200,000  | 9,600            | 124           | 350        |
| ...           | Various          | 1,580,000  | 7,500            | 205           | ...        |
|               | Total            | 11,400,000 | 8,000            | 1,410         | ...        |

A statement published in 1870 of French canals showed :—

| Date of Works   | Miles | Cost, £    | Cost, £ per Mile |
|-----------------|-------|------------|------------------|
| 1600-1820 . . . | 710   | 17,300,000 | 5,600            |
| 1821-1840 . . . | 1,860 |            |                  |
| 1841-1870 . . . | 560   |            |                  |
| Total . . . .   | 3,130 | ...        | ...              |

The following table shows the length and traffic of canals and canalised rivers at various dates :—

| Year | Miles  |        |       | Tons Carried 60 Miles |            |            |
|------|--------|--------|-------|-----------------------|------------|------------|
|      | Canals | Rivers | Total | Canals                | Rivers     | Total      |
| 1850 | 2,425  | 4,200  | 6,625 | 7,300,000             | 9,400,000  | 16,700,000 |
| 1860 | 2,750  | 4,200  | 6,950 | 10,400,000            | 8,600,000  | 19,000,000 |
| 1870 | 2,850  | 4,200  | 7,050 | 9,000,000             | 5,500,000  | 14,500,000 |
| 1880 | 2,720  | 4,140  | 6,860 | 11,000,000            | 9,100,000  | 20,100,000 |
| 1885 | 2,910  | 4,820  | 7,730 | 13,300,000            | 11,200,000 | 24,500,000 |

It will be observed that there is only a seeming discrepancy in the above statements, the first referring merely to canals, the second including canalised rivers.

The first constructed in France was the Briare, connecting the Loire and Seine, 124 miles, begun in 1605 and finished in 1642 at a cost of £1,300,000 sterling. The Languedoc, one of the finest works of the kind, was made by Riquet under Louis XIV., being opened for traffic in 1668; it is 60 feet wide, 6½ deep, and is carried up to a height of 600 feet by means of 114 locks, affording transit for small vessels between the Mediterranean and the Bay of Biscay: length, 160 miles; cost £680,000. The Central Canal connects the Loire and Saone, length 72 miles; it was completed in 1791 at a cost of £6300 per mile, being carried to a height of 240 feet by means

of 81 locks, and navigable for vessels of 5 feet draught. The Burgundy, connecting the Rhone and Seine, was 57 years in construction, length 158 miles, and the most costly in France, averaging £14,500 a mile, or three times as much as the Languedoc, being carried to a height of 1650 feet. France has altogether 74 canals, with an aggregate length of 2900 miles, the average cost having been £7000 a mile, and the traffic yearly 8000 tons per mile.

## GERMANY

The German Empire by latest accounts has 1320 miles of canal and 15,760 of navigable rivers, which differs but slightly from a statement published in 1878, viz:—

|              |   | Mileage of Canals<br>and Rivers |
|--------------|---|---------------------------------|
| Prussia      | . | 8,140                           |
| Bavaria      | . | 1,160                           |
| Other States | . | 7,690                           |
| Total        | . | 16,990                          |

The canals of Prussia in 1869 had a length of 430 miles, and the total of navigable waters 3800 miles, perhaps only for vessels of large size. The traffic in 1878 in all internal waters of Germany occupied 20,900 canal-boats and 463 steamers, with an aggregate of 1,550,000 tonnage; the goods carried on canals was about 8 million tons; the principal canal is the Altmühl, connecting the Rhine and Danube, 107 miles long, 54 feet wide; vessels drawing 5 feet can go from the German Ocean to the Black Sea. The Elbe and Oder Canal is next in importance. By far the greatest inland water traffic is done by the Rhine, which carried 5,500,000 tons in 1866 and 6,100,000 in 1871: the Prussian Government, between 1831 and 1871, spent 5 millions sterling on improving its course, reducing the length by one-fourth in point of time: the above traffic included 3 million tons of coal. The Elbe in 1872 was navigated by 11,760 vessels of all kinds, manned by 43,600 men; the Weser by 3080 vessels, manned by 10,400 men; the tonnage on the Elbe was 760,000, two-thirds up-stream.

## RUSSIA

Official returns for 1886 show as follows:—

|          | Tons      | System    | Miles Open |
|----------|-----------|-----------|------------|
| Grain    | 2,660,000 | Caspian   | 8,880      |
| Timber   | 710,000   | Black Sea | 3,820      |
| Fuel     | 2,220,000 | Baltic    | 5,050      |
| Naphtha  | 540,000   | Azof      | 2,100      |
| Sundries | 2,480,000 | Various   | 14,066     |
| Total    | 8,610,000 | Total     | 33,916     |

The total value of goods carried was £19,400,000. There were 1507 steamers, with an aggregate of 86,000 horse-power, 61,000 vessels without steam-power, and 74,000 rafts. In 1886 the Volga traffic stood for 86 per cent. of the total. It was completed in 1825 by the opening of the Vishney Canal, forming a direct highway of 1434 miles from St. Petersburg to the Caspian Sea. In 1889 a sum of £1,300,000 was set apart to make this route navigable for larger vessels up to 220 feet long. The Volga throws off another canal to Archangel in the North, by which goods are conveyed direct from the White Sea to the Caspian. The Tikwina, opened in 1822, is for empty boats returning from the Baltic to the Volga. The Kubinsko is mostly used for carrying timber; it was opened in 1828 and has 300 vessels. The great centres of the Volga trade are Astrakan, Saratov, Nijni Novgorod, Moscow, and St. Petersburg, the whole system from Astrakan on the Caspian to Archangel on the White Sea being about 2500 miles in length, the Volga running

1900 miles without a rapid, whirlpool, or sandbank; it is navigated by four steamboat companies with first-class steamers, and such is the traffic by boats and rafts that Nijni Novgorod employs 70,000 Bourlaki or raftsmen, going up or down to Moscow and Astrakan. Boats ascending the Volga usually take ninety days from the Caspian Sea to St. Petersburg. The proposed Dniester-Vistula canal, 460 miles, would connect the Black Sea with Dantzic on the German Ocean. The canal in construction from the Caspian to the Black Sea, 310 miles, is to cost £4,000,000. The inland waters of Russia employ 300,000 boatmen. Canals are open about 200 days of the year in the north, and 270 in the south. One of the earliest constructed was that by the Empress Marie at her own expense in 1808.

## AUSTRIA-HUNGARY

A statement published in 1850 gave the Empire 5450 miles of internal navigation. In 1887 the total length of navigable rivers and canals was 7200 miles, including 1700 of canals. There are, however, only two canals of much traffic, that which connects the Theiss and Danube, 80 miles, and that from Vienna to Neustadt, 33 miles. There is continuous water communication from Vienna downward by the Danube to the Black Sea, and upward by the Altmühl Canal and the Rhine to the German Ocean, in all 1800 miles, of which more than 1000 is by the Danube. Steamboats were introduced on this river in 1850, and it was thrown open to vessels of all flags in 1856. The traffic returns of the Danubian Company in 1880 and 1887 were as follows:—

|                     | 1880      | 1887      |
|---------------------|-----------|-----------|
| Steamers of Company | 193       | 190       |
| Tugs                | 700       | 729       |
| Passengers          | 2,600,000 | 1,650,000 |
| Goods, tons         | 1,350,000 | 1,710,000 |

In summer the part above Vienna is only navigable for vessels of two feet draught.

According to a Government report in 1887 Austria proper had:—

|                  | Miles |                   | Miles |
|------------------|-------|-------------------|-------|
| Navigable rivers | 2,440 | Vessels and rafts | 2,450 |
| Canals           | 1,710 | Rafts only        | 1,700 |
| Total            | 4,150 | Total             | 4,150 |

A sum of £230,000, say £50 a mile, is spent annually on their maintenance. Hungary has 3050 navigable miles.

## ITALY

The navigable mileage of Italy is as follows:—

|       | Miles |       | Miles |
|-------|-------|-------|-------|
| Po    | 340   | Tiber | 90    |
| Adige | 130   | Arno  | 66    |

to which add 664 miles of navigable canals, making in all 1290 miles. Lombardy has twelve canals, but only two are navigable, the rest being for irrigation, as are likewise those of Pavia, Padua, and Pisa. The Cavour Canal is the most important, pouring 400,000 tons of water hourly from the Po into the Ticino. Duke Torlonia made a canal recently at Lake Fucino. It is proposed to make a canal from Rome to Ostia, 16 miles long, 72 feet wide, 26 feet deep, cost £7,400,000.

## SPAIN AND PORTUGAL

Spain has 1085 miles, Portugal 470, of inland navigation. The Imperial Canal of Arragon, begun in the last century, is far from completion. In combination with

the Canal of Castile it will connect the Mediterranean with the Bay of Biscay, a length of 405 miles, of which only 175 are now made; it is 60 feet wide and 10 in depth. The other canals are of trifling importance, and sum up 95 miles. The principal watercourses of the Peninsula are:—

|                 | Miles |                        | Miles |
|-----------------|-------|------------------------|-------|
| Tagus . . . . . | 570   | Ebro . . . . .         | 470   |
| Douro . . . . . | 490   | Guadalquivir . . . . . | 300   |

Not more than half the above mileage is navigable.

#### HOLLAND

Without counting rivers, this country has 9 miles of canal for every 100 square miles of area, a proportion not equalled elsewhere, and four times as great as in the United Kingdom. The Dutch canals have an aggregate length of 1830 miles, the traffic occupying 5600 Trekshuits for conveying passengers, and 15,000 flat boats for cargo; for the maintenance of these canals the State expends £500,000 yearly. The Helder, begun in 1819 and completed six years later, is 60 miles long, 120 feet wide, and 20 deep, allowing two merchantmen to pass abreast, and navigable for the largest vessels; the traffic in 1877 exceeded 1,500,000 tons. The Y, or North Sea canal, made in 1863-74, is 240 feet wide and 23 deep, and brings Amsterdam within 15 miles of the sea: length, 14 miles, cost £2,000,000. The Maestricht is navigable for vessels up to 800 tons.

The water-ways of Holland sum up 2700 miles, irrespective of canals for irrigation.

#### BELGIUM

This country with relation to area possesses double the mileage of internal navigation that Holland can boast, and six times the European average. There are 29 canals, summing up 535 miles, and 540 miles of navigable rivers. The chief canal is from Brussels to Charleroi, 46 miles, the toll amounting to £1,020,000 yearly; working expenses, £460,000. The amount of tonnage carried on all the canals is 7,700,000 tons.

Traffic returns show as follows:—

|                                 | Tons Carried 60 Miles |           |
|---------------------------------|-----------------------|-----------|
|                                 | 1880                  | 1886      |
| Coal . . . . .                  | 1,600,000             | 1,700,000 |
| Other minerals . . . . .        | 2,100,000             | 2,100,000 |
| Agricultural products . . . . . | 1,300,000             | 1,200,000 |
| General merchandise . . . . .   | 2,200,000             | 2,700,000 |
| Total . . . . .                 | 7,200,000             | 7,700,000 |

#### SCANDINAVIA

Sweden has 365 miles of canal, which are open to traffic 210 days in the year, being frozen the rest. Over £200,000 was spent on canals between 1840 and 1860. The Gotha Canal is the most remarkable; it was attempted by various kings without success, and finally commenced by a joint-stock company in 1793, and completed in 1800, at a cost of £72,000, being only three miles long, but cut through a rock 150 feet high; it has eight locks, and is navigable for vessels of 6 feet draught, paying a usual dividend of 12 per cent. In later years a canal has been made from Lake Meler, near Stockholm, to the German Ocean. In 1886 there were 69,300 vessels paid canal tolls.

Denmark has the Eyder Canal connecting the Baltic and the German Ocean, 26 miles long and 10 feet deep, begun in 1777, and completed in 1784 at a cost of £510,000.

#### UNITED STATES

The water-ways of the great Republic were stated in 1880 thus:—

|                               | Miles  |
|-------------------------------|--------|
| Navigable rivers . . . . .    | 47,355 |
| Canals in use . . . . .       | 2,515  |
| Canals abandoned . . . . .    | 1,964  |
| Shore line of lakes . . . . . | 3,620  |

Total . . . . . 55,454

In 1860 there were 118 canals, with an aggregate of 5460 miles, supposed to have cost 48 millions sterling. This is, however, in excess of an official return published in 1880, viz:—

|                        | Miles  |           |       | Tons Carried | Earnings per Mile | Cost of Construction |
|------------------------|--------|-----------|-------|--------------|-------------------|----------------------|
|                        | In Use | Abandoned | Total |              |                   |                      |
| New York . . . . .     | 608    | 357       | 965   | 7,770,000    | £ 430             | £ 16,000,000         |
| Pennsylvania . . . . . | 629    | 477       | 1,106 | 6,100,000    | 515               | 11,000,000           |
| Ohio . . . . .         | 674    | 205       | 879   | 840,000      | 60                | 4,000,000            |
| Maryland . . . . .     | 194    | ...       | 194   | 1,310,000    | 370               | 2,000,000            |
| New Jersey . . . . .   | 171    | ...       | 171   | 1,860,000    | 750               | 2,000,000            |
| Illinois . . . . .     | 102    | ...       | 102   | 750,000      | 220               | 1,500,000            |
| Virginia . . . . .     | 43     | 197       | 240   | 4,045,000    | 490               | 2,000,000            |
| Other States . . . . . | 94     | 728       | 822   | 2,368,000    | 424               | 5,500,000            |
| Total . . . . .        | 2,515  | 1,964     | 4,479 | 25,043,000   | 355               | 44,000,000           |

The earnings per mile are computed on the canals in use. The first canal was that of Middlesex, from Boston to Concord, 27 miles, completed in 1789 at a cost of £110,000 sterling. The famous Hudson and Erie, 363 miles long and 40 feet wide, was opened in 1825, after eight years of labour, being carried over a range of hills 690 feet high by means of 83 locks and 18 aqueducts, at a cost of £1,800,000. The Delaware and Chesapeake, 14 miles long and 10 feet deep, was opened in 1826, having taken three years to make, and cost £400,000. A canal from Lake Champlain to the Hudson, 63 miles, cost £175,000. In 1830 was opened the great Cincinnati and Erie Canal, 306 miles, cost £600,000; also the Cincinnati and Miami, 70 miles, and a canal connecting the Dismal Swamp and

the Ohio. Another grand work was the Chesapeake and Ohio, opened in 1834 after six years of construction, 360 miles long, 60 feet wide, including a tunnel four miles long through the Alleghenies. Various canals were at the same time opened in Pennsylvania, in the aggregate 730 miles.

The navigable rivers are officially stated thus:—

|                                       | Miles  |                           | Miles  |
|---------------------------------------|--------|---------------------------|--------|
| Mississippi and tributaries . . . . . | 11,108 | Arkansas . . . . .        | 3,250  |
| Missouri . . . . .                    | 7,830  | Texas . . . . .           | 1,210  |
| Ohio . . . . .                        | 7,342  | Big Black . . . . .       | 1,190  |
| Red River . . . . .                   | 4,924  | Atlantic rivers . . . . . | 10,501 |

The traffic of these rivers and the great lakes is enormous. In 1880 the Mississippi and tributaries had 1100 steamboats and 850 flats, with a capacity of 415,000 tons, carrying merchandise worth 400 millions sterling per annum. The tug-boat *Ajax*, for example, has been known to tow at once 32 flats carrying 21,000 tons, which would have filled 2100 railway waggons. The great lakes have 900 steamers and 1800 sailing vessels, and flats with an aggregate of 590,000 tons, carrying over 9 million tons yearly, of which 2 million tons grain. The ordinary cost of freight in the inland waters of the Republic is 4s. per ton per 100 miles (one cent. per mile), or one-half of what is usual in Europe.

## CANADA

There are 7 canals, and these with the navigable rivers make up a total of 3355 miles of water-way. The Rideau, from Kingston to Ottawa, 132 miles, has 47 locks, and was constructed by Great Britain at a cost of £800,000. The Grenville, from Rideau to Montreal, gives a complete system of navigation up to Niagara, 460 miles. The Welland, from Erie to Ontario, 41 miles, cost £1,400,000, width 80 feet, depth 56 feet. The construction of 7 canals cost £6,500,000, being an average of £12,000 per mile; aggregate length 535 miles. Moreover, the St. Lawrence has been canalised at a cost of 6 millions sterling, so that vessels of 4000 tons can ascend to Montreal, which is 1000 miles from the sea, and those of 1500 tons, drawing 14 feet, can proceed from Montreal up to Lake Erie and Chicago: before the canalization no vessels exceeding 400 tons could get up to Montreal from the sea. The traffic showed as follows as regards vessels passing through Canadian canals:—

|                      | 1876      | 1887      |
|----------------------|-----------|-----------|
| Vessels . . . . .    | 27,400    | 22,870    |
| Tonnage . . . . .    | 3,500,000 | 3,410,000 |
| Passengers . . . . . | 92,000    | 83,000    |

Tolls paid in 1876 reached £84,000. Freight of merchandise in 1887 showed 2,820,000 tons.

## INDIA

Canals for navigation were begun in 1854, and the construction proceeded so rapidly that in 1862 the following were in traffic:—

| Name              | Miles | Cost, £   |
|-------------------|-------|-----------|
| Bengal . . . . .  | 900   | 2,000,000 |
| Jumna . . . . .   | 600   | 500,000   |
| Punjaub . . . . . | 450   | 4,000,000 |
| Total . . . . .   | 1,950 | 6,500,000 |

Irrigation canals have since been made at an outlay of 17 millions sterling. The maintenance of all canals in India costs 3 millions sterling per annum. The Bengal Canal connects with the Ganges, and has a depth of 10 feet. Navigable rivers have an aggregate length of about 2600 miles.

## CHINA

The Imperial Canal of China is the longest in the world, and the greatest in point of traffic: its length is 2100 miles, including river sections (or 825 miles the canal proper), and it connects 41 cities situated on its banks. It was completed A.D. 1350, after 600 years spent in its construction. China has 400 minor canals, of a supposed aggregate of 4450 miles, besides 3800 miles of river navigation.

## CANOE

The *Rob Roy*, which navigated 3000 miles of European rivers, was 13 feet long, 26 inches wide, and 12 inches deep.

## CAPITAL

In 1882 the following table was published of stocks quoted on the London Exchange:—

|                                | Millions £                      |                              |                                  |
|--------------------------------|---------------------------------|------------------------------|----------------------------------|
|                                | Amount Quoted on Stock Exchange | Amount Held in Great Britain | Interest Earned in Great Britain |
| National debt . . . . .        | 762                             | 700                          | 21                               |
| Colonial debts . . . . .       | 220                             | 200                          | 10                               |
| Foreign " . . . . .            | 2,016                           | 400                          | 22                               |
| British railways . . . . .     | 730                             | 700                          | 30                               |
| Foreign and colonial . . . . . | 825                             | 275                          | 14                               |
| Banks . . . . .                | 272                             | 260                          | 15                               |
| Docks, gas, &c. . . . .        | 125                             | 120                          | 10                               |
| Total . . . . .                | 4,950                           | 2,655                        | 122                              |

The amount of new capital called up in twelve years down to 1882 was:—

| Years             | Millions £ |           |       |                |
|-------------------|------------|-----------|-------|----------------|
|                   | Loans      | Companies | Total | Annual Average |
| 1871-74 . . . . . | 930        | 1,230     | 2,160 | 540            |
| 1875-78 . . . . . | 520        | 420       | 940   | 235            |
| 1879-82 . . . . . | 430        | 820       | 1,250 | 312            |
| Total . . . . .   | 1,880      | 2,470     | 4,350 | 362            |

Great Britain provided about one-fourth of the total; some estimates say one-third.

The aggregate amount called up in four years, 1879-82, was as follows:—

| Amount in Millions £    |     | Amount in Millions £    |     |
|-------------------------|-----|-------------------------|-----|
| Great Britain . . . . . | 182 | Spain . . . . .         | 25  |
| France . . . . .        | 301 | Portugal . . . . .      | 11  |
| Germany . . . . .       | 38  | Switzerland . . . . .   | 17  |
| Russia . . . . .        | 107 | Belgium . . . . .       | 27  |
| Austria . . . . .       | 75  | Holland . . . . .       | 14  |
| Italy . . . . .         | 40  | United States . . . . . | 210 |

Mr. Neumann Spallart sums up the new capital called up in England, France, Germany, and Austria during fifteen years thus:—

| Period             | Millions £ Sterling |                        |       |
|--------------------|---------------------|------------------------|-------|
|                    | Public Loans        | Railways and Companies | Total |
| 1871-75 . . . . .  | 942                 | 863                    | 1,805 |
| 1876-80 . . . . .  | 702                 | 539                    | 1,241 |
| 1881-85 . . . . .  | 368                 | 605                    | 973   |
| 15 years . . . . . | 2,012               | 2,007                  | 4,019 |

This is an average of 270 millions sterling per annum, or about 40 per cent. of the wealth annually accumulated in the above four countries. One-half of the above went in public loans. If we consider only joint-stock companies Mr. Spallart's figures give an annual average of 135 millions sterling for the four countries, which is in

harmony with a statement published in 1882 regarding the money invested in new companies of Europe, America, &c., in twelve years, viz. :—

| Years           | Millions £      |                |
|-----------------|-----------------|----------------|
|                 | Amount, Capital | Annual Average |
| 1871-74 . . . . | 1,230           | 308            |
| 1875-78 . . . . | 420             | 105            |
| 1879-82 . . . . | 820             | 205            |
| Total . . . .   | 2,470           | 206            |

It may be assumed that, irrespective of public loans, the amount of new capital absorbed by joint-stock companies all over the world reaches 200 millions sterling per annum. The average annual outlay of new capital in the years 1881-85 was approximately as follows :—

|                  | £           |                     | £         |
|------------------|-------------|---------------------|-----------|
| Railways . . . . | 102,000,000 | Mines . . . .       | 7,000,000 |
| Banks . . . .    | 22,000,000  | Electricity . . . . | 6,000,000 |
| Building . . . . | 15,000,000  | Newspapers . . . .  | 5,000,000 |

The new companies formed in 1889 were said to represent 203 millions sterling in the United Kingdom.

*United Kingdom.*—According to the *Investor's Manual*, the new capital called up in London in eleven years was as follows :—

| Years            | Million £ | Per Annum |
|------------------|-----------|-----------|
| 1879-82 . . . .  | 335       | 84        |
| 1883-85 . . . .  | 246       | 82        |
| 1886-89 . . . .  | 507       | 127       |
| 11 years . . . . | 1,088     | 99        |

The number and capital of joint-stock companies registered in the United Kingdom in twenty-four years down to 1885 were as follows :—

| Period          | Number | Capital, Million £ | New Capital per Annum, Million £ |
|-----------------|--------|--------------------|----------------------------------|
| 1862-70 . . . . | 6,179  | 1,010              | 112                              |
| 1871-80 . . . . | 10,862 | 970                | 97                               |
| 1881-85 . . . . | 8,002  | 890                | 178                              |
| Total . . . .   | 25,043 | 2,870              | 120                              |

The amount of new capital in 1881-85, if all these companies had been successfully carried out, would have been in excess of the annual accumulation of wealth.

The new capital called up at Berlin in 1888-89 was :—

|                              | 1888         | 1889         | 1889         |              |
|------------------------------|--------------|--------------|--------------|--------------|
|                              |              |              | Foreign      | German       |
| Public loans . . . .         | £ 55,500,000 | £ 20,800,000 | £ 10,000,000 | £ 10,800,000 |
| Bonds, debentures, &c. . . . | 26,300,000   | 36,400,000   | 22,500,000   | 13,900,000   |
| New companies . . . .        | 10,300,000   | 20,300,000   | 5,000,000    | 15,300,000   |
| Total . . . .                | 92,100,000   | 77,500,000   | 37,500,000   | 40,000,000   |

New companies were as follows :—

| Year         | Capital, £ | No. | Average Capital, £ |
|--------------|------------|-----|--------------------|
| 1888 . . . . | 9,700,000  | 184 | 52,500             |
| 1889 . . . . | 20,100,000 | 260 | 55,000             |

The result of the above companies down to 1885 was as follows :—

|                           | Number | Capital, Million £ |
|---------------------------|--------|--------------------|
| Burst or wound up . . . . | 15,699 | 2,375              |
| Existing in 1885 . . . .  | 9,344  | 495                |
| Total . . . .             | 25,043 | 2,870              |

The actual number of companies existing in the United Kingdom was :—

| Year         | Number | Capital, £  |
|--------------|--------|-------------|
| 1877 . . . . | ...    | 307,200,000 |
| 1887 . . . . | 10,894 | 591,500,000 |

A return published down to March 1889 showed that in twenty-seven years 30,372 companies had been registered, with an aggregate capital of 3443 millions sterling; of these, 1684 had been wound up judicially. The actual number may be taken as 11,000, with a capital of 600 millions.

The *Investor's Guardian* published the following list of new companies registered in the United Kingdom during the year 1889 :—

| New Companies        | Capital, £ | New Companies         | Capital, £ |
|----------------------|------------|-----------------------|------------|
| Banks . . . .        | 57,200,000 | Railways . . . .      | 10,100,000 |
| Mines . . . .        | 37,000,000 | Shipping . . . .      | 5,300,000  |
| Manufactures . . . . | 21,800,000 | Electric . . . .      | 5,300,000  |
| Breweries . . . .    | 17,600,000 | Gas and Water . . . . | 2,700,000  |
| Land . . . .         | 12,900,000 | Various . . . .       | 52,100,000 |

making a total of 222 millions sterling; but nearly half of these companies died still-born, Messrs. Spackmann showing that the total subscribed was only £125,400,000, and the amount actually paid on calls £39,300,000.

*France.*—New capital called up at Paris in 1889 was :—

|                         |               |
|-------------------------|---------------|
| Public loans . . . .    | £ 123,500,000 |
| Railways . . . .        | 8,100,000     |
| Banks, mines, &c. . . . | 19,800,000    |

Total . . . . 151,400,000

*Prussia.*—Engel gives the joint-stock companies established in seventy-five years thus :—

| Period                   | Number | Capital, Millions £ |
|--------------------------|--------|---------------------|
| 1801-70 . . . .          | 418    | 171                 |
| 1871-75 . . . .          | 857    | 238                 |
| 75 years . . . .         | 1,275  | 409                 |
| Liquidated . . . .       | 143    | 30                  |
| Existing in 1875 . . . . | 1,132  | 379                 |

Wenzel adds that from 1875 to 1883 there were established 567 new companies, with an aggregate capital of 28 millions sterling.

*Austria.*—The number of joint-stock companies existing at Vienna was as follows :—

| Year         | No. | Year         | No.   |
|--------------|-----|--------------|-------|
| 1840 . . . . | 23  | 1867 . . . . | 154   |
| 1850 . . . . | 35  | 1873 . . . . | 1,159 |

In the last-mentioned year the aggregate capital was 400 millions sterling. The new companies formed from 1871 to 1880 in Austria-Hungary had an aggregate capital of 393 millions sterling.

An official return in 1887 showed the average profits on capital in Austria as follows :—

|                         | Per Cent. |                       | Per Cent. |
|-------------------------|-----------|-----------------------|-----------|
| Gas . . . . .           | 12.4      | Foundries . . . . .   | 6.5       |
| Insurance . . . . .     | 10.5      | Banks . . . . .       | 6.4       |
| Sugar . . . . .         | 8.8       | Paper-mills . . . . . | 5.6       |
| Breweries . . . . .     | 8.3       | Mines . . . . .       | 4.8       |
| Textile mills . . . . . | 6.6       | Steamboats . . . . .  | 2.0       |

The general average on all companies was as follows :—

1878-83 . . . . . 7.1 | 1885-87 . . . . . 6.5

The average was only 6.2 for the year 1887.

*Italy.*—Official returns of the existing joint-stock companies showed :—

| Year           | Number | Capital, Millions £ |
|----------------|--------|---------------------|
| 1870 . . . . . | 413    | 68                  |
| 1880 . . . . . | 644    | 80                  |
| 1884 . . . . . | 1,037  | 110                 |

*India.*—In 1888 there were 910 joint-stock companies, with an aggregate paid-up capital of 22 millions sterling; this included 97 started during the year with a capital of

£1,800,000 in the aggregate. The existing companies were :—

|                                      |             |
|--------------------------------------|-------------|
| Cotton-mills . . . . .               | £ 8,700,000 |
| Banks . . . . .                      | 3,500,000   |
| Tea and coffee plantations . . . . . | 3,600,000   |
| Sundries . . . . .                   | 6,200,000   |
| Total . . . . .                      | 22,000,000  |

### CARRIAGES

The number used in Great Britain has increased since 1812 faster than wealth, as appears on comparing the licenses with the number of persons paying income-tax on more than £200 a year :—

| Year | Carriages | Over £200 Income | Ratio of Carriages | Carriages per 1000 Inhabitants |
|------|-----------|------------------|--------------------|--------------------------------|
| 1812 | 63,130    | 39,765           | 158-100            | 5                              |
| 1830 | 85,060    | ...              | ...                | 5                              |
| 1860 | 245,000   | 85,530           | 287-100            | 11                             |
| 1870 | 325,000   | 130,375          | 250-100            | 12                             |
| 1880 | 463,000   | 210,430          | 221-100            | 15                             |

### CATTLE

In the last 60 years there has been a very great increase of the various kinds of live-stock : thus horses have increased 104 per cent., cattle 127, sheep 139, pigs 55 per cent. This is much greater (except as regards pigs) than the increase of population in Europe, United States, and Colonies, which has been just 70 per cent.

The following table shows approximately the numbers of each class of live-stock in all countries at various dates :—

#### HORSES

|                            | 1830       | 1850       | 1870       | 1887       |
|----------------------------|------------|------------|------------|------------|
| United Kingdom . . . . .   | 1,500,000  | 2,000,000  | 1,900,000  | 1,940,000  |
| Continent . . . . .        | 24,020,000 | 27,450,000 | 31,080,000 | 36,710,000 |
| United States . . . . .    | 2,500,000  | 4,900,000  | 9,400,000  | 15,400,000 |
| British Colonies . . . . . | 300,000    | 800,000    | 1,900,000  | 2,900,000  |
| River Plate . . . . .      | 2,400,000  | 3,400,000  | 4,600,000  | 5,100,000  |
| Total . . . . .            | 30,720,000 | 38,550,000 | 48,880,000 | 62,050,000 |

#### CATTLE

|                            | 1830       | 1850        | 1870        | 1887        |
|----------------------------|------------|-------------|-------------|-------------|
| United Kingdom . . . . .   | 5,200,000  | 7,950,000   | 8,700,000   | 10,300,000  |
| Continent . . . . .        | 62,170,000 | 72,170,000  | 81,100,000  | 91,550,000  |
| United States . . . . .    | 8,100,000  | 17,800,000  | 25,500,000  | 49,200,000  |
| British Colonies . . . . . | 1,400,000  | 3,800,000   | 8,400,000   | 14,400,000  |
| River Plate . . . . .      | 9,200,000  | 14,400,000  | 18,300,000  | 29,700,000  |
| Total . . . . .            | 86,070,000 | 116,120,000 | 142,000,000 | 195,150,000 |

#### SHEEP

|                            | 1830        | 1850        | 1870        | 1887        |
|----------------------------|-------------|-------------|-------------|-------------|
| United Kingdom . . . . .   | 25,000,000  | 27,970,000  | 33,800,000  | 28,000,000  |
| Continent . . . . .        | 144,040,000 | 155,980,000 | 175,600,000 | 168,800,000 |
| United States . . . . .    | 6,500,000   | 21,700,000  | 40,850,000  | 43,500,000  |
| British Colonies . . . . . | 4,400,000   | 17,200,000  | 64,300,000  | 112,300,000 |
| River Plate . . . . .      | 3,400,000   | 7,300,000   | 47,500,000  | 81,000,000  |
| Total . . . . .            | 183,340,000 | 230,150,000 | 362,050,000 | 434,500,000 |

## PIGS

|                            | 1830       | 1850       | 1870       | 1887       |
|----------------------------|------------|------------|------------|------------|
| United Kingdom . . . . .   | 4,000,000  | 3,680,000  | 4,200,000  | 3,800,000  |
| Continent . . . . .        | 40,460,000 | 34,750,000 | 39,700,000 | 44,500,000 |
| United States . . . . .    | 16,000,000 | 30,400,000 | 26,700,000 | 44,400,000 |
| British Colonies . . . . . | 1,100,000  | 1,400,000  | 2,200,000  | 2,400,000  |
| River Plate . . . . .      | 200,000    | 200,000    | 300,000    | 400,000    |
| Total . . . . .            | 61,760,000 | 70,430,000 | 73,100,000 | 95,500,000 |

## VALUE OF ALL LIVE-STOCK, MILLIONS STERLING.

| Year | Europe | U. States | Colonies, &c. | Total |
|------|--------|-----------|---------------|-------|
| 1830 | 730    | 70        | 23            | 823   |
| 1850 | 1,018  | 114       | 48            | 1,180 |
| 1870 | 1,496  | 274       | 130           | 1,900 |
| 1887 | 1,900  | 501       | 215           | 2,616 |

The number of live-stock, as we have seen, has a little more than doubled in sixty years: the value, meantime, has more than trebled. It must be borne in mind that the foregoing tables include only Europe, the United States, British colonies (without India), and the River Plate, and in these the value of all descriptions of cattle has risen more than 700 millions sterling since 1870. In that interval the value in the United States and Colonies has almost doubled.

Mr. Simmonds has taken great pains to ascertain the number of each class of live stock in the several parts of the world in 1890, and sums up the result as follows:—

|                       | Horses     | Asses and Mules | Cattle      | Sheep       | Pigs        | Goats      |
|-----------------------|------------|-----------------|-------------|-------------|-------------|------------|
| Europe . . . . .      | 34,865,000 | 4,900,000       | 104,166,000 | 214,499,000 | 46,152,000  | 21,546,000 |
| Asia . . . . .        | 4,443,000  | 1,061,000       | 70,850,000  | 71,669,000  | 840,000     | 24,055,000 |
| Africa . . . . .      | 721,000    | 1,068,000       | 8,203,000   | 60,820,000  | 417,000     | 9,220,000  |
| America . . . . .     | 21,920,000 | 3,286,000       | 117,249,000 | 143,581,000 | 53,974,000  | 4,851,000  |
| Australasia . . . . . | 1,520,000  | 3,000           | 9,339,000   | 98,366,000  | 1,143,000   | 299,000    |
| Total . . . . .       | 63,469,000 | 10,318,000      | 309,807,000 | 588,935,000 | 102,526,000 | 59,971,000 |

In 1830 the live-stock of various countries in Europe was estimated approximately as follows:—

|                               | Horses     | Cattle     | Sheep       | Pigs       | Value, Million £ |
|-------------------------------|------------|------------|-------------|------------|------------------|
| United Kingdom . . . . .      | 1,500,000  | 5,200,000  | 25,000,000  | 4,000,000  | 84               |
| France . . . . .              | 2,600,000  | 6,700,000  | 35,200,000  | 4,500,000  | 96               |
| Germany . . . . .             | 2,500,000  | 9,770,000  | 17,300,000  | 4,500,000  | 88               |
| Russia . . . . .              | 12,000,000 | 19,000,000 | 36,000,000  | 15,800,000 | ...              |
| Austria . . . . .             | 2,500,000  | 10,500,000 | 12,000,000  | 5,500,000  | 80               |
| Italy . . . . .               | 800,000    | 3,500,000  | 6,500,000   | 2,500,000  | 30               |
| Spain . . . . .               | 1,400,000  | 2,950,000  | 18,700,000  | 2,730,000  | 38               |
| Portugal . . . . .            | 100,000    | 650,000    | 1,200,000   | 700,000    | 8                |
| Sweden and Norway . . . . .   | 490,000    | 2,300,000  | 2,440,000   | 580,000    | 19               |
| Denmark . . . . .             | 250,000    | 800,000    | 1,000,000   | 200,000    | 16               |
| Holland and Belgium . . . . . | 500,000    | 2,000,000  | 1,200,000   | 1,200,000  | 26               |
| Switzerland . . . . .         | 80,000     | 800,000    | 500,000     | 250,000    | 6                |
| Turkey, &c. . . . .           | 800,000    | 3,200,000  | 12,000,000  | 2,000,000  | 63               |
| Europe . . . . .              | 25,520,000 | 67,370,000 | 169,040,000 | 44,460,000 | ...              |

In 1850 the numbers were approximately as follows:—

|                          | Horses     | Cattle     | Sheep       | Pigs       | Value, Million £ |
|--------------------------|------------|------------|-------------|------------|------------------|
| United Kingdom . . . . . | 2,000,000  | 7,950,000  | 27,970,000  | 3,680,000  | 104              |
| France . . . . .         | 3,130,000  | 12,150,000 | 33,300,000  | 5,250,000  | 166              |

# CHARITIES

The following table shows the relative figures in Europe for population, horses, cattle, sheep, and pigs at various dates, taking 1830 at 100:—

|                      | 1830 | 1860 | 1870 | 1880 | 1887 |
|----------------------|------|------|------|------|------|
| Population . . . . . | 100  | 118  | 134  | 142  | 150  |
| Horses . . . . .     | 100  | 116  | 130  | 144  | 151  |
| Cattle . . . . .     | 100  | 120  | 135  | 144  | 152  |
| Sheep . . . . .      | 100  | 108  | 123  | 118  | 117  |
| Pigs . . . . .       | 100  | 86   | 99   | 107  | 109  |

It appears, therefore, that the increase of horses and cattle kept pace with that of population. The value of all kinds of cattle at different dates compared with population thus, in Europe:—

| Year           | Population  | Value of Cattle, Millions £ | Ratio per Inhabitant |
|----------------|-------------|-----------------------------|----------------------|
| 1840 . . . . . | 236,200,000 | 875                         | £ s. d.<br>3 14 0    |
| 1860 . . . . . | 275,900,000 | 1,260                       | 4 9 0                |
| 1887 . . . . . | 333,000,000 | 1,900                       | 5 14 0               |

The following table shows the number of each kind of cattle to every 100 inhabitants in each country in 1850 and in 1887:—

| PER 100 INHABITANTS |        |      |        |       |       |       |      |      |
|---------------------|--------|------|--------|-------|-------|-------|------|------|
|                     | Horses |      | Cattle |       | Sheep |       | Pigs |      |
|                     | 1850   | 1887 | 1850   | 1887  | 1850  | 1887  | 1850 | 1887 |
| U. Kingdom          | 6      | 5    | 28     | 28    | 135   | 76    | 15   | 10   |
| France . . .        | 9      | 8    | 40     | 36    | 94    | 60    | 15   | 15   |
| Germany . .         | 7      | 8    | 48     | 35    | 70    | 42    | 16   | 20   |

The countries relatively richest in horses and horned cattle are the Argentine Republic and Uruguay, while Australia leads in sheep, and pigs are most numerous in Servia and Roumania. Those poorest in horses are Italy and Spain; in cattle, Portugal; in sheep, Belgium; and in pigs, Greece. The highest prices for animals have

The following table shows the number of beds in various cities and countries:—

| Year | Place                 | Beds  | Beds per 10,000 Inhabitants | Year | Country                  | Beds   | Beds per 10,000 Inhabitants |
|------|-----------------------|-------|-----------------------------|------|--------------------------|--------|-----------------------------|
| 1889 | London . . . . .      | 7,100 | 18                          | 1882 | U. Kingdom . . . . .     | 16,400 | 5                           |
| "    | Dublin . . . . .      | 800   | 21                          | 1885 | France . . . . .         | 73,900 | 19                          |
| 1880 | Paris . . . . .       | 9,000 | 41                          | 1886 | Austria proper . . . . . | 32,500 | 16                          |
| "    | New York . . . . .    | 1,100 | 9                           | "    | Wurttemberg . . . . .    | 8,800  | 47                          |
| 1876 | Rome . . . . .        | 1,500 | 50                          | 1880 | Spain . . . . .          | 18,200 | 10                          |
| 1872 | Rio Janeiro . . . . . | 1,100 | 48                          | 1849 | Prussia . . . . .        | 8,800  | 4                           |

been recorded in England, a cow called Ouida fetching £6200 in 1880, and a horse called Ormond £14,000 in 1889.

## CEMENT

The exportation from the United Kingdom showed thus:—

| Year           | Tons    | Value, £  | Per Ton, £ |
|----------------|---------|-----------|------------|
| 1853 . . . . . | 21,000  | 64,000    | 3.0        |
| 1860 . . . . . | 79,000  | 215,000   | 2.9        |
| 1870 . . . . . | 150,000 | 366,000   | 2.4        |
| 1880 . . . . . | 277,000 | 690,000   | 2.5        |
| 1888 . . . . . | 613,000 | 1,160,000 | 1.9        |

## CHARITIES

The approximate value of property held for charitable purposes in 1880 was:—

|                   | £          | Per Inhabitant |
|-------------------|------------|----------------|
|                   |            | £ s. d.        |
| England . . . . . | 51,300,000 | 2 1 0          |
| France . . . . .  | 70,000,000 | 1 17 0         |
| Italy . . . . .   | 65,300,000 | 2 8 0          |

The supposed expenditure for charitable purposes and sources of income are shown thus:—

|                           | United Kingdom | France    | Italy     |
|---------------------------|----------------|-----------|-----------|
|                           | £              | £         | £         |
| Endowment . . . . .       | 2,490,000      | 2,400,000 | 1,880,000 |
| Annual bequests . . . . . | 650,000        | 1,194,000 | 400,000   |
| Subscription . . . . .    | 6,900,000      | 1,500,000 |           |
| State subsidy . . . . .   | ...            | 460,000   | ...       |
| Total . . . . .           | 10,040,000     | 5,554,000 | 2,280,000 |

In 1889 charitable bequests of the United Kingdom amounted to one million sterling, of which £250,000 fell to London, irrespective of donations by living persons.

Hospitals constitute the principal element of charitable institutions.

Continental hospitals usually receive large municipal subsidies, viz:—

| City                    | Subsidy | Pence per Inhab. | City                  | Subsidy | Pence per Inhab. |
|-------------------------|---------|------------------|-----------------------|---------|------------------|
|                         | £       |                  |                       | £       |                  |
| Paris . . . . .         | 358,000 | 42               | Nantes . . . . .      | 15,000  | 30               |
| Berlin . . . . .        | 70,000  | 16               | Florence . . . . .    | 14,000  | 21               |
| New York . . . . .      | 34,000  | 7                | Venice . . . . .      | 14,000  | 25               |
| Copenhagen . . . . .    | 32,000  | 36               | Stockholm . . . . .   | 11,000  | 16               |
| Leipsic . . . . .       | 31,000  | 55               | Toulouse . . . . .    | 10,000  | 18               |
| Marseilles . . . . .    | 24,000  | 16               | Turin . . . . .       | 10,000  | 13               |
| Vienna . . . . .        | 23,000  | 5                | Buda . . . . .        | 9,000   | 6                |
| Genoa . . . . .         | 23,000  | 27               | Christiania . . . . . | 8,000   | 22               |
| San Francisco . . . . . | 20,000  | 21               | Rennes . . . . .      | 8,000   | 21               |
| Rouen . . . . .         | 19,000  | 44               | Havre . . . . .       | 5,000   | 11               |
| Bordeaux . . . . .      | 17,000  | 18               | Frankfort . . . . .   | 4,000   | 8                |

In the hospitals of the United Kingdom, New York, and France the average of days to each patient are :—

|                   |    |                       |    |
|-------------------|----|-----------------------|----|
| Dublin . . . . .  | 27 | New York . . . . .    | 40 |
| Paris . . . . .   | 28 | All England . . . . . | 31 |
| Glasgow . . . . . | 30 | All France . . . . .  | 35 |

The death-rate of hospitals in various countries is shown thus :—

|                    | Per Cent. |                   | Per Cent. |
|--------------------|-----------|-------------------|-----------|
| England . . . . .  | 8.0       | Austria . . . . . | 8.0       |
| Scotland . . . . . | 9.5       | Rome . . . . .    | 7.1       |
| Ireland . . . . .  | 6.5       | Lisbon . . . . .  | 13.4      |
| France . . . . .   | 9.5       | Norway . . . . .  | 12.0      |

Next in importance after hospitals are asylums for the aged and infirm or for orphans. Those of the United Kingdom and France are shown thus :—

|                          | United Kingdom | France    |
|--------------------------|----------------|-----------|
| Number of beds . . . . . | 104,000        | 120,300   |
| Cost yearly . . . . .    | £2,600,000     | 2,760,000 |

In New York the Children's Aid Society picks up 10,000 yearly, and gives them trades. The orphan asylums of France in 1882 had 61,000 children under training. There are founding hospitals in France (of which later on), that of Paris receiving 3000 infants yearly, of whom 60 per cent. die under 12 months. At Moscow a similar institute receives 12,000 per annum, the boys being brought up for the navy.

For founders of hospitals and asylums see *Munificence*.

#### UNITED KINGDOM

The expenditure for charities is estimated thus :—

|                             | £         |
|-----------------------------|-----------|
| Charity schools . . . . .   | 4,200,000 |
| Asylums and homes . . . . . | 2,600,000 |
| Bible societies . . . . .   | 2,040,000 |
| Hospitals . . . . .         | 1,200,000 |

Total . . . . . 10,040,000

London charities stand for 46 per cent. of the total. They were :—

|                             | Number |       | Expenditure, £ |           |
|-----------------------------|--------|-------|----------------|-----------|
|                             | 1859   | 1889  | 1859           | 1889      |
| Asylums for old, blind, &c. | 135    | 205   | 113,000        | 641,000   |
| Orphanages and homes . .    | 181    | 318   | 409,000        | 835,000   |
| Hospitals and dispensaries  | 92     | 209   | 301,000        | 655,000   |
| Bible missions . . . . .    | 14     | 112   | 460,000        | 1,980,000 |
| Sundry institutions . . . . | 60     | 180   | 400,000        | 570,000   |
| Total . . . . .             | 482    | 1,024 | 1,683,000      | 4,681,000 |

London charities averaged 12s. per inhabitant in 1859, and 22s. in 1889. It is to be observed, however, that in 1889 almost half the total was devoted to Bible missions, most of which had no connection with London charities. The collections on Hospital Sunday in 1889 reached £38,700, those of Hospital Saturday average £5000 a year. These collections were distributed in 1889 among 86 hospitals and 35 dispensaries (the total number in London being 93 and 116 respectively), and the report published showed that in the year 1888 the said 121 institutions received and treated 76,900 indoor and 1,470,000 outdoor patients, at an outlay of £723,000, being £27,000 over income. The London hospitals had altogether nominally 9700 beds, but only 7100 in use, the remaining 2600 being kept vacant for want of funds.\*

\* There were also 27 poor-law infirmaries with 11,900 beds, which cost in the year £336,000, say £28 each. London has in the aggregate 239 institutions for sick relief, which in the year 1887 treated 122,050 indoor and 1,855,000 outdoor patients.

The cost per bed varied from £19 in larger to £42 in smaller hospitals.

The principal hospitals of the United Kingdom in 1882 were :—

| Hospitals             | Founded A.D. | Beds | Annual Patients | Death-Rate |
|-----------------------|--------------|------|-----------------|------------|
| St. Bartholomew's     | 1547         | 600  | 5,500           | 6.0        |
| St. Thomas's . . .    | 1548         | 360  | 3,200           | 12.0       |
| Guy's . . . . .       | 1722         | 620  | 5,600           | 9.7        |
| Bristol . . . . .     | 1735         | 270  | 2,600           | 7.0        |
| Leicester . . . . .   | ...          | 220  | 2,000           | 5.0        |
| Edinburgh . . . .     | 1736         | 500  | 4,500           | 10.5       |
| Aberdeen . . . . .    | 1739         | 240  | 2,100           | 6.5        |
| Manchester . . . .    | 1753         | 330  | 3,000           | 10.8       |
| Liverpool . . . . .   | ...          | 330  | 3,000           | 7.2        |
| Leeds . . . . .       | 1767         | 330  | 3,000           | 7.0        |
| Birmingham . . .      | 1778         | 300  | 2,700           | 8.0        |
| Glasgow . . . . .     | 1794         | 630  | 5,700           | 10.7       |
| Misericordia (Dublin) | 1855         | 230  | 2,100           | 6.5        |
| London (White-chapel) | ...          | 790  | 7,170           | ...        |

There are in the United Kingdom 496 hospitals, with 16,400 beds, relieving 145,000 sick yearly, who are attended by 820 physicians. Total expenditure, £1,200,000, or £8 per patient, equal to 5s. a day for each bed occupied. Death-rate is lowest in small hospitals, viz. :—

|                              |     |
|------------------------------|-----|
| Less than 100 beds . . . . . | 6.5 |
| 100 to 200 beds . . . . .    | 7.1 |
| Over 200 beds . . . . .      | 8.0 |

In the year 1800 there were but 51 hospitals in Great Britain and Ireland.

Charitable endowments have not increased much in the last fifty years. The amounts in 1837 and 1876 compare as follows :—

| Year           | Endowments | Wealth of U. Kingdom in Millions £ | Endowed Sums, per £1000 of Wealth |
|----------------|------------|------------------------------------|-----------------------------------|
| 1837 . . . . . | 42,600,000 | 4,100                              | £ 5. 8. 0                         |
| 1876 . . . . . | 51,300,000 | 8,050                              | £ 6. 8. 0                         |

The income of endowed charities has actually declined since 1876, viz. :—

|                |           |
|----------------|-----------|
| 1837 . . . . . | 1,940,000 |
| 1876 . . . . . | 2,108,000 |
| 1888 . . . . . | 2,052,000 |

The endowments on which income-tax was refunded in 1888 were :—

|                            |           |
|----------------------------|-----------|
| Hospitals . . . . .        | 535,000   |
| Almshouses, &c. . . . .    | 588,000   |
| Schools . . . . .          | 779,000   |
| Religious purposes . . . . | 150,000   |
| Total . . . . .            | 2,052,000 |

The investment and income of endowments in 1876 showed :—

|                       | Capital, £ | Income, £ |
|-----------------------|------------|-----------|
| Real estate . . . . . | 31,100,000 | 1,558,000 |
| Stocks . . . . .      | 20,200,000 | 640,000   |
| Total . . . . .       | 51,300,000 | 2,198,000 |

The real estate comprises 154,000 acres of land and some house property.

The above does not include Irish endowed charities, which had in 1876 an income of £270,000 per annum.

## FRANCE

Hospital returns for 1864 and 1885 compare as follows:—

|            | Admitted |         | Average Days |      | Died   |        | Deaths Per 100 |      |
|------------|----------|---------|--------------|------|--------|--------|----------------|------|
|            | 1864     | 1885    | 1864         | 1885 | 1864   | 1885   | 1864           | 1885 |
| Men . . .  | 203,100  | 236,200 | 30           | 32   | 16,480 | 22,700 | 8.1            | 8.7  |
| Women . .  | 81,300   | 124,400 | 35           | 38   | 10,430 | 14,700 | 12.8           | 10.5 |
| Children . | 26,800   | 44,500  | 42           | 58   | 2,780  | 5,500  | 10.4           | 10.8 |
| Total      | 311,200  | 405,100 | 32           | 36   | 29,690 | 42,900 | 9.5            | 9.5  |

The above hospitals in 1864 had a staff as follows:—

|                              |       |
|------------------------------|-------|
| Physicians . . . . .         | 2,348 |
| Sisters of Charity . . . . . | 8,854 |
| Servants, &c. . . . .        | 9,561 |

Total . . . . . 20,763

The expenditure was £2,320,000, say £7. 10s. per patient; the income was £2,480,000, leaving a surplus of £160,000.

In 1845 France had 9244 charitable institutions, with a gross annual outlay of £4,620,000, viz:—

|                               |           |
|-------------------------------|-----------|
| 1,138 hospitals . . . . .     | 2,140,000 |
| 7,600 soup-kitchens . . . . . | 540,000   |
| 506 asylums . . . . .         | 1,940,000 |

Total, 9,244 . . . . . 4,620,000

The summary of such institutions in 1881 and 1885 was as follows:—

|                      | Beds    |         | Finances  |           |
|----------------------|---------|---------|-----------|-----------|
|                      | 1881    | 1885    | 1881      | 1885      |
| Hospitals . . . . .  | 71,900  | 73,900  |           |           |
| Orphanages . . . . . | 17,200  | 16,700  |           |           |
| Asylums, &c. . . . . | 77,300  | 79,400  |           |           |
|                      |         |         | Receipts  |           |
|                      |         |         | Expenses  |           |
| Total . . . . .      | 166,400 | 170,000 | 4,320,000 | 4,360,000 |

Asylums and orphanages in 1885 showed as follows:—

|                      | Asylums |        |          |        | Orphanages |        |        |
|----------------------|---------|--------|----------|--------|------------|--------|--------|
|                      | Men     | Women  | Children | Total  | Boys       | Girls  | Total  |
| Admitted . . . . .   | 28,200  | 30,100 | 7,200    | 65,500 | 34,900     | 31,700 | 66,600 |
| Died . . . . .       | 3,900   | 3,900  | 410      | 8,210  | 1,390      | 1,350  | 2,740  |
| Death-rate . . . . . | 13.8    | 13.0   | 5.7      | 12.5   | 4.0        | 4.5    | 4.2    |

The expenses of the orphanages were £680,000, being a little over £10 per child.

The statistics of soup-kitchens or relief offices showed thus:—

|                            | 1840    | 1881      | 1885      |
|----------------------------|---------|-----------|-----------|
| Number . . . . .           | 7,600   | 14,033    | 14,574    |
| Persons assisted . . . . . | 696,000 | 1,449,000 | 1,778,000 |
| Expenditure, £ . . . . .   | 540,000 | 1,240,000 | 1,360,000 |

The sums received for soup-kitchens were £1,920,000 in 1881, and £2,080,000 in 1885. In the latter year £840,000 was distributed in food, £320,000 in money, and the management cost £200,000, or 15 per cent. of the annual outlay.

The number of hospitals and asylums in 1791 was 1224, and rose in 1869 to 1557, viz:—

|                             |     |
|-----------------------------|-----|
| For sick . . . . .          | 415 |
| For aged . . . . .          | 291 |
| For sick and aged . . . . . | 851 |

Total . . . . . 1,557

In 1876 the above institutions admitted 438,000 persons. A statement published in 1845 showed the amount of charitable bequests as follows:—

| Period             | To Hospitals | To Clergy | To Convents, &c. | Total     |
|--------------------|--------------|-----------|------------------|-----------|
| 1801-14 . . . . .  | 600,000      | 7,000     | 8,000            | 615,000   |
| 1815-29 . . . . .  | 2,040,000    | 72,000    | 780,000          | 2,892,000 |
| 1830-45 . . . . .  | 2,260,000    | 112,000   | 232,000          | 2,604,000 |
| 45 years . . . . . | 4,900,000    | 191,000   | 1,020,000        | 6,111,000 |

In 1881 it was stated that the average number of charitable bequests yearly of all descriptions was 4200, averaging £290 each, say £1,220,000. Foundling hospitals were established at Paris by St. Vincent de Paul in 1642, the Government giving a subsidy of £120, which was raised in 1657 to 40,000 livres, or £1600 per annum. There was, however, a foundling hospital established at Lyons in 1526, which received in the eighteenth century about 1700 infants yearly. The statistics of the Paris Foundling House were:—

| Admitted                       | 1760  | 1860  |
|--------------------------------|-------|-------|
| Legitimate infants . . . . .   | 735   | 594   |
| Illegitimate infants . . . . . | 4,297 | 3,205 |
| Total . . . . .                | 5,032 | 3,799 |

The statistics of Night Refuges and Foundling Asylums at Paris from 1876 to 1883 showed thus:—

| Period            | Annual Average |            |
|-------------------|----------------|------------|
|                   | Night Refuge   | Foundlings |
| 1876-79 . . . . . | 3,965          | 2,545      |
| 1880-83 . . . . . | 6,660          | 2,865      |

Among the French charities are lying-in hospitals, where 68,000 confinements took place in 1876, at a cost to the State of only £17,000; besides dispensaries, which gave medicine the same year to 660,000 persons, at a cost of £224,000 for the year.

The hospitals of Paris, which admitted in 1813 only 32,000 patients, now admit 110,000 sick yearly, the deaths averaging 11,600 per annum, or 10½ per cent., against 12½ per cent. in the years 1861-62. Paris has at present:—

21 hospitals with 9,000 beds  
13 asylums „ 10,000 „

This is, of course, exclusive of lunatic asylums. The principal hospital is the Hotel Dieu, with 514 beds, which cost for building £1,600,000, say £3000 per bed, or ten times the ordinary cost.

## ITALY

The endowed capital of charitable institutions in 1878 amounted to £65,040,000, belonging to 17,870 institutions, and yielding a gross revenue of £3,640,000, but a net income of only £1,880,000, distributed as follows:—

|                                 |         |
|---------------------------------|---------|
| Orphanages . . . . .            | 229,000 |
| Marriage-portions . . . . .     | 192,000 |
| Alms to indigent . . . . .      | 440,000 |
| Alms to sick poor . . . . .     | 120,000 |
| Hospitals, prisons, &c. . . . . | 899,000 |

Total . . . . . 1,880,000

Charitable bequests average £124,000 per annum. The principal hospital at Rome is Santo Spirito, which admitted in 1871-76 an average of 22,600 patients yearly, of whom only 6 per cent. died. The death-rate from July to October was only  $\frac{3}{4}$  per cent. of patients admitted, but in the rest of the year over 9 per cent. The annual death-rate from 1861-70 averaged  $\frac{8}{10}$  per cent. In 1878 there were 102 foundling asylums, with endowed property yielding £65,000 yearly; they admit 40,000 infants yearly.

## AUSTRIA

The hospitals of Austria proper in 1886 were as follows:—

|                   | No. | Beds   | Admitted | Died   | Death-Rate | Average Days |
|-------------------|-----|--------|----------|--------|------------|--------------|
| Public . . . . .  | 176 | 21,830 | 220,000  | 21,980 | 10.0       | 26           |
| Private . . . . . | 381 | 10,660 | 75,000   | 7,370  | 9.8        | 25           |
| Total . . . . .   | 557 | 32,490 | 295,000  | 29,350 | 9.9        | 26           |

The public charitable institutions in 1886 summed up thus:—

|                              | Admitted | Cost, £ | Per Patient, £ |
|------------------------------|----------|---------|----------------|
| Hospitals . . . . .          | 220,000  | 360,000 | 1.6            |
| Lying-in hospitals . . . . . | 16,000   | 32,000  | 2.0            |
| Foundling houses . . . . .   | 43,000   | 160,000 | 3.9            |
| Asylums for old . . . . .    | 37,690   | 205,000 | 5.2            |
| Soup-kitchens . . . . .      | 228,950  | 360,000 | 1.6            |
| Orphanages . . . . .         | 124,030  | ...     | ...            |

The following table shows the number of these institutions, and the numbers admitted according to sex:—

|                         | Institutes | Males   | Females | Total Entries |
|-------------------------|------------|---------|---------|---------------|
| Orphanages . . . . .    | 1,024      | 64,850  | 59,180  | 124,030       |
| Aged persons . . . . .  | 1,579      | 16,460  | 21,230  | 37,690        |
| Soup-kitchens . . . . . | 10,645     | 111,940 | 117,010 | 228,950       |

The lying-in hospitals had 1557 beds, and admitted 16,605 women for confinement, who gave birth to 15,015 infants; average of days for each woman under treatment, 18; average number of beds occupied, 820; average cost, 27 pence daily per mother. The number of deaths was:—

|                   | Per 100 |
|-------------------|---------|
| Mothers . . . . . | 0.9     |
| Infants . . . . . | 6.1     |

The foundling houses admitted during the year 42,870 children, three-fourths being at once put out to nurse. The year's returns showed:—

|                    | Infants | Died  | Death-Rate |
|--------------------|---------|-------|------------|
| In-door . . . . .  | 9,740   | 653   | 6.7        |
| Out-door . . . . . | 33,130  | 4,962 | 15.0       |
| Total . . . . .    | 42,870  | 5,615 | 13.5       |

The asylums for aged and infirm showed an average expenditure of sevenpence per head daily.

The only returns published for Hungary are those of orphanages and asylums for 1886, viz.:—

|                      | Males | Females | Total | Cost, £ | Per Head, £ |
|----------------------|-------|---------|-------|---------|-------------|
| Orphanages . . . . . | 1,015 | 1,581   | 2,596 | 23,000  | 9.0         |
| Asylums . . . . .    | 1,443 | 2,060   | 3,503 | 31,000  | 9.0         |
| Total . . . . .      | 2,458 | 3,641   | 6,099 | 54,000  | 9.0         |

## VARIOUS COUNTRIES

Belgium in 1889 had 190,000 acres of land belonging to hospitals and similar institutions. Charitable bequests were as follows:—

| Year           | No. | Amount, £ |
|----------------|-----|-----------|
| 1882 . . . . . | 603 | 188,000   |
| 1887 . . . . . | 926 | 105,000   |

The orphanages in 1887 contained 490 boys, 1213 girls—in all 1703, against 3473 in 1875, a decline of 50 per cent.

Norway has 44 hospitals, admitting yearly 8400 sick, of whom 12 per cent. die.

Brazil possesses the Misericordia Hospital of Rio Janeiro, one of the largest in the world. The returns for 1861-72 showed per annum:—

|                      | Admitted | Died  | Per Cent. |
|----------------------|----------|-------|-----------|
| Sick . . . . .       | 12,698   | 2,090 | 16.7      |
| Insane . . . . .     | 425      | 53    | 12.7      |
| Foundlings . . . . . | 601      | 296   | 48.5      |
| Total . . . . .      | 13,724   | 2,439 | 17.8      |

The New York hospitals in 1882 showed thus:—

|                        | Revenues | Patients                     |
|------------------------|----------|------------------------------|
| Subsidies . . . . .    | £34,000  | Free . . . . . 6,945         |
| Pay patients . . . . . | 16,000   | Pay . . . . . 2,220          |
| Donations . . . . .    | 38,000   | Total . . . . . 9,165        |
| Receipts . . . . .     | £88,000  | Days free . . . . . 262,000  |
| Expenditure . . . . .  | £92,000  | Total days . . . . . 368,000 |

The average was 37 days to each free, and 48 to each paying, patient, and the cost in general £10 per patient, or 5s. per day.

## CHEESE

Two analyses are given of the various kinds:—

|                    | Chester | Parma | Brie  | Dutch | Gruyère |
|--------------------|---------|-------|-------|-------|---------|
| Water . . . . .    | 30.4    | 30.3  | 34.0  | 41.4  | 32.1    |
| Nitrogen . . . . . | 8.0     | 7.9   | 5.1   | 7.0   | 8.0     |
| Fat . . . . .      | 36.6    | 31.1  | 53.3  | 42.8  | 41.8    |
| Various . . . . .  | 25.0    | 30.7  | 7.6   | 8.8   | 18.1    |
| Total . . . . .    | 100.0   | 100.0 | 100.0 | 100.0 | 100.0   |

|                  | Chester | Parma | Brie  | Dutch | Gruyère | Camembert | Roquefort | Neuchâtel |
|------------------|---------|-------|-------|-------|---------|-----------|-----------|-----------|
| Water . . . . .  | 35.9    | 27.6  | 45.3  | 36.1  | 40.0    | 51.9      | 35.6      | 36.6      |
| Azote . . . . .  | 4.1     | 7.0   | 2.9   | 4.8   | 5.0     | 3.0       | 4.2       | 1.3       |
| Fat . . . . .    | 26.3    | 16.0  | 25.7  | 27.5  | 24.0    | 21.1      | 30.1      | 40.7      |
| Salt . . . . .   | 4.2     | 5.7   | 5.6   | 6.9   | 3.0     | 4.7       | 5.1       | 0.5       |
| Sundry . . . . . | 29.5    | 43.7  | 20.5  | 24.7  | 28.0    | 19.3      | 25.0      | 20.9      |
| Total . . . . .  | 100.0   | 100.0 | 100.0 | 100.0 | 100.0   | 100.0     | 100.0     | 100.0     |

The value of cheese produced yearly by a good cow is estimated in Canada at £7, in Parma at £10, in Neuchâtel at £14, and at Camembert (France) at £36 sterling. The quantity produced annually in the United Kingdom is probably about 40,000 tons, or one-third of the consumption, the importation reaching 82,000 tons yearly. See *Dairy*.

**CHURCH**

The following table shows the number of churches and clergy in various countries (1880-82):—

|                         | Churches | Clergy | Number of Inhabitants to each Clergyman |
|-------------------------|----------|--------|-----------------------------------------|
| England . . . . .       | 35,916   | 41,320 | 610                                     |
| Ireland . . . . .       | 4,540    | 4,110  | 1,270                                   |
| France . . . . .        | 39,314   | 42,543 | 900                                     |
| Germany . . . . .       | 37,720   | 31,910 | 1,420                                   |
| Austria . . . . .       | 36,180   | 55,240 | 700                                     |
| Russia . . . . .        | 42,670   | 49,330 | 1,700                                   |
| Italy . . . . .         | 22,260   | 40,150 | 750                                     |
| Spain . . . . .         | 18,600   | 42,765 | 400                                     |
| United States . . . . . | 92,167   | 77,230 | 630                                     |
| Australia . . . . .     | 6,013    | 2,155  | 1,300                                   |

There are 126 Protestant bishops in the British Empire, viz:—

|                        | Arch-bishops | Bishops    | Total      |
|------------------------|--------------|------------|------------|

The income of English bishops ranges from £3000 upwards, the Archbishop of Canterbury having £15,000 a year.

Since the report published in 1835, the English bishops have been increased from 27 to 34, the Irish reduced from 16 to 12.

There are 1263 bishops of the Roman Catholic Church, of whom 130 hold sees in the British Empire:—

|                               | Arch-bishops | Bishops      | Total        |
|-------------------------------|--------------|--------------|--------------|

The patronage of the various livings was as follows:—

| Nominated by           | England       | Ireland      | Total         |
|------------------------|---------------|--------------|---------------|
| Crown . . . . .        | 952           | 131          | 1,083         |
| Noblemen . . . . .     | 5,096         | 340          | 5,436         |
| Bishops, &c. . . . .   | 4,694         | 924          | 5,618         |
| <b>Total . . . . .</b> | <b>10,742</b> | <b>1,395</b> | <b>12,137</b> |

In 1850 the income of the Established Church of England and Wales was as follows:—

|                        | Number     | Income           | Average    |
|------------------------|------------|------------------|------------|
| Clergy . . . . .       | 10,478     | £3,005,000       | £285       |
| Bishops . . . . .      | 27         | 160,000          | 6,000      |
| Chapels . . . . .      | ...        | 253,000          | ...        |
| <b>Total . . . . .</b> | <b>...</b> | <b>3,418,000</b> | <b>...</b> |

| Income                 | Clergy, No.   |
|------------------------|---------------|
| Under £100 . . . . .   | 1,926         |
| 100-200 . . . . .      | 2,956         |
| 200-500 . . . . .      | 4,135         |
| Over 500 . . . . .     | 1,461         |
| <b>Total . . . . .</b> | <b>10,478</b> |

A report published in 1880 upon the income of the Established Church in England and Wales, was as follows:—

|                            | £                |
|----------------------------|------------------|
| Tithes . . . . .           | 4,054,000        |
| Committee grants . . . . . | 776,000          |
| Other sources . . . . .    | 973,000          |
| <b>Total . . . . .</b>     | <b>5,803,000</b> |

The above, however, includes £962,000 of tithes that go to laymen, which leaves the real church income at £4,841,000, distributed as follows:—

| Clergy        | Number | Income    | Per Head |
|---------------|--------|-----------|----------|
| Bishops . . . | 33     | 168,000   | 5,100    |
| Canons . . .  | 166    | 240,000   | 1,440    |
| Rectors . . . | 11,780 | 3,830,000 | 330      |
| Curates . . . | 5,050  | 565,000   | 120      |
| Total . . .   | 17,029 | 4,803,000 | ...      |

Besides the above there is an offertory which has been found to range from £100 to £240 a year, and is supposed to average £120, that is £2,220,000.

At the same time the patronage of livings was as follows :—

| Proprietor         | No.    |
|--------------------|--------|
| Crown . . . . .    | 967    |
| Noblemen . . . . . | 5,357  |
| Bishops . . . . .  | 2,088  |
| Various . . . . .  | 4,476  |
| Total . . . . .    | 12,888 |

The Ecclesiastical Report for 1880 shows that in 40 years the Commissioners expended 22½ millions in creating new endowments to an annual value of £746,000 in aid of 4700 distressed parishes, say £160 each. The Commissioners distribute about £700,000 a year in creating new benefices, to an average amount of £23,000 per annum. Balance still in hand, £8,200,000. The above tables do not include collegiate endowments, worth £550,000 a year. Total clergy of Church of England, 19,000, including 2000 schoolmasters. The Church of England has, moreover, 232 clergymen in Scotland, 820 in Ireland, and 2700 in colonies and foreign countries, making a grand total of 22,752.

The official statement of the Anglican Church in Ireland in 1880 was :—

|                               |                            |
|-------------------------------|----------------------------|
| Number of clergy . . . 820    | Donations . . . £118,000   |
| Number of laity . . . 635,100 | Total income . . £248,000  |
| Endowment . . . £130,000      | Endowed capital £3,260,000 |

There are 12 bishops who receive £41,500 per annum, average £3600 each.

In November 1880 the residue of property formerly belonging to the Protestant Church in Ireland was valued at 12 millions, producing a revenue of £574,000, to be devoted to purposes of general utility or beneficence. In 1889 all had been disposed of, except a surplus of £27,000 per annum.

The Presbyterian Church in Ireland comprises 553 chapels, with an income of £168,000, of which £102,000 goes to the pastors.

In a report on the Established Church of Scotland in 1890, the annual income was shown as follows :—

| Period        | £       | Period        | £       |
|---------------|---------|---------------|---------|
| 1851-60 . . . | 208,000 | 1871-80 . . . | 515,000 |
| 1861-70 . . . | 371,000 | 1881-90 . . . | 607,000 |

The number of churches in England and Wales in 1883 was :—

|                              |                          |
|------------------------------|--------------------------|
| Church of England . . 14,573 | Quaker . . . . . 375     |
| Methodist . . . . . 11,514   | Presbyterian . . . . 201 |
| Independent . . . . . 2,603  | Jewish . . . . . 60      |
| Baptist . . . . . 2,243      | Various . . . . . 2,628  |
| Calvinist . . . . . 895      |                          |
| Roman Catholic . . . 824     | Total . . . . . 35,916   |

In the above are not included 364 Roman Catholic chapels attached to religious houses, possessing no marriage licence.

In 1882 the Roman Catholic Church in the British Empire stood thus :—

|                    | Bishops | Priests | Churches | Laity     |
|--------------------|---------|---------|----------|-----------|
| England . . . .    | 15      | 2,112   | 1,188    | 1,066,000 |
| Scotland . . . .   | 6       | 306     | 295      | 318,000   |
| Ireland . . . .    | 28      | 3,290   | 2,760    | 3,952,000 |
| Canada . . . .     | 24      | 1,210   | 1,050    | 2,150,000 |
| Australia . . . .  | 16      | 376     | 787      | 584,000   |
| India . . . . .    | 22      | 1,179   | ...      | 1,318,000 |
| Other colonies . . | 20      | 315     | 240      | 466,000   |
| Total . . . . .    | 131     | 8,788   | 6,520    | 9,854,000 |

The average income in the United Kingdom is £400 for a bishop, and £80 for a priest. In India it is £260 per bishop, and £36 per priest. In Canada and Australia it is higher than in England.

#### UNITED STATES

The Census of 1880, and the estimates of numbers of congregations from that of pews, showed as follows :—

|                   | Churches | Ministers | Laity      | Property, 1870 |
|-------------------|----------|-----------|------------|----------------|
| Baptist . . . .   | 24,794   | 15,401    | 8,532,000  | 8,400,000      |
| Methodist . . .   | 28,281   | 16,759    | 10,944,000 | 14,100,000     |
| Presbyterian . .  | 10,474   | 8,026     | 3,564,000  | 10,600,000     |
| Roman Catholic .  | 5,975    | 6,366     | 6,371,000  | 12,200,000     |
| Lutheran . . . .  | 5,556    | 3,102     | 2,740,000  | 1,200,000      |
| Christian Discip. | 4,681    | 3,658     | 2,268,000  | 1,200,000      |
| Congregational .  | 3,689    | 3,589     | 1,334,000  | 5,100,000      |
| Episcopal . . . . | 3,104    | 3,564     | 1,412,000  | 7,200,000      |
| United Brethren . | 2,573    | 2,563     | 1,196,000  | 400,000        |
| Unitarians . . .  | 342      | 394       | 172,000    | 1,200,000      |
| Quakers . . . .   | 621      | 876       | 272,000    | 800,000        |
| Jews . . . . .    | 269      | 202       | 70,000     | 1,000,000      |
| Mormons . . . .   | 654      | 3,906     | 440,000    | 200,000        |
| Various . . . .   | 1,154    | 8,824     | 10,841,000 | 7,200,000      |
| Total . . . . .   | 92,167   | 77,230    | 50,156,000 | 70,800,000     |

At the opening of the Washington Catholic University in October 1889, Cardinal Gibbons stated that in 1789 (when Dr. O'Carroll was consecrated first bishop) the total number of Catholics was only 40,000, and that they are now about 9,000,000, with 84 bishops, 8000 priests, 10,500 churches, 520 hospitals and orphan asylums, 677 colleges, and 3100 schools.

#### FRANCE

The official statistics in 1880 were as follows :—

|                                    |          |
|------------------------------------|----------|
| Clergy of all ranks . . . . .      | 55,400   |
| Sisters of charity, &c. . . . .    | 125,400  |
| Church endowed incomes . . . .     | £190,000 |
| Schools, convents, asylums . . . . | £800,000 |

The capital value of endowments for churches, schools, convents, and asylums amounted in 1880 to £23,300,000. The annual State subsidy is £1,740,000, equal to 1s. per inhabitant, or £40 a year for each priest. The ordinary income of a curé is £80.

Official returns show the number of clergy and of young men ordained priests yearly as follows :—

| Year           | Clergy | Ordained during Year |
|----------------|--------|----------------------|
| 1861 . . . . . | 54,400 | 1,206                |
| 1880 . . . . . | 55,400 | 1,541                |
| 1885 . . . . . | 54,500 | 1,527                |

This would show that a priest's life averages 36 years from ordination, or a life span of about 63 years.

## ITALY

The Italian Government confiscated properties worth 55 millions sterling, of which nearly half has been sold, viz.:-

|                      | Capital, £ | Income, £ |
|----------------------|------------|-----------|
| Sold (1868-80) . . . | 21,200,000 | 1,450,000 |
| Held by State . . .  | 33,900,000 | 1,240,000 |

Total . . . 55,100,000      2,690,000

Out of the above income the Italian Government pays £428,000 per annum to 32,590 monks and nuns, say £13 each. The Pope has always refused the allowance of £120,000 a year offered him, and is maintained by Peter's pence from all nations.

The amount of Peter's pence in 1889 was said to be as follows :-

|                     |        |                   |       |
|---------------------|--------|-------------------|-------|
| Austria . . .       | 16,000 | Ireland . . .     | 6,000 |
| Italy . . .         | 14,200 | Portugal . . .    | 6,000 |
| France . . .        | 12,800 | Asia . . .        | 4,000 |
| South America . . . | 12,400 | Roumania . . .    | 4,000 |
| Spain . . .         | 8,000  | England . . .     | 3,800 |
| North America . . . | 7,400  | Africa . . .      | 3,800 |
| Germany . . .       | 7,200  | Poland . . .      | 3,400 |
| Belgium . . .       | 6,200  | Switzerland . . . | 2,200 |

Besides other countries, the whole amounting to £120,000 sterling.

The Vatican records show that there have been 257 Popes, the longest reign being that of Pius IX., who sat for 32 years, the average being 7½ years. The table of duration shows thus :-

|                     |    |                     |     |
|---------------------|----|---------------------|-----|
| Over 20 years . . . | 11 | 5-10 years . . .    | 57  |
| 10-20 " . . .       | 69 | Under 5 years . . . | 120 |

The nationality of the various Popes has been as follows :-

|                  |   |               |     |
|------------------|---|---------------|-----|
| English . . .    | 1 | Spanish . . . | 5   |
| Dutch . . .      | 1 | German . . .  | 6   |
| Swiss . . .      | 1 | Syrian . . .  | 8   |
| Portuguese . . . | 1 | Greek . . .   | 14  |
| African . . .    | 2 | French . . .  | 15  |
| Austrian . . .   | 2 | Italian . . . | 201 |

The number of parochial clergy in Italy is 20,067, of whom 2236 have less than £30 a year income.

## AUSTRIA.

There are 98 Roman Catholic bishops, and the Church forests and other properties are valued at 19 millions sterling. Total Church revenue, £1,890,100, the highest income being £30,000 per annum to the Archbishop of Olmutz. Priests average £30 a year.

The latest returns of the clergy show thus :-

|                                    | Austria | Hungary | Total  |
|------------------------------------|---------|---------|--------|
| Latin priests . . .                | 15,026  | 4,206   | 19,232 |
| Roman Catholic Greek priests . . . | 2,110   | 2,128   | 4,238  |
| Russian Greek priests . . .        | 446     | 2,900   | 3,346  |
| Protestant clergy . . .            | 232     | 3,602   | 3,834  |
| Jewish pastors . . .               | ...     | 740     | ...    |
| Total . . .                        | 17,814  | 13,576  | 31,390 |

## GERMANY.

In 1849 the churches and pastors in Prussia were :-

|                      | Churches | Pastors |
|----------------------|----------|---------|
| Protestant . . .     | 9,001    | 6,139   |
| Roman Catholic . . . | 7,238    | 5,605   |
| Jewish . . .         | 901      | ..      |
| Total . . .          | 17,140   | 11,744  |

In 1880 the Census showed for all Germany as follows :-

|                |        |
|----------------|--------|
| Churches . . . | 37,720 |
| Clergy . . .   | 31,910 |

The Protestant Church will probably stand for about 18,000 clergy and 20,000 churches, the Roman Catholic about 12,000 clergy and 15,000 churches: there are 28 Catholic bishops, including 5 archbishops.

## RUSSIA

According to Government reports published in 1880, we find :-

|                          |        |                    |        |
|--------------------------|--------|--------------------|--------|
| Bishops . . . . .        | 40     | Convents . . . . . | 550    |
| Parish priests . . . . . | 49,200 | Churches . . . . . | 35,400 |

The State subsidy is £800,000 per annum, besides which the Church lands give a revenue of £17 to each priest.

In 1801 Russia had 18,300 parish churches, 67,700 clergy, and 554 convents and monasteries, containing 7300 monks and 1300 nuns.

In 1839 there were 29,500 churches of all denominations, with :-

|                          | Clergy |
|--------------------------|--------|
| Greek . . . . .          | 52,300 |
| Roman Catholic . . . . . | 10,330 |
| Protestant . . . . .     | 1,050  |

Total . . . . . 63,680

Besides 63,000 deacons and assistants of the Greek Church.

## BELGIUM

Church properties cover 60,000 acres; there are 6 bishops, and 5428 churches, being a church for 1100 inhabitants, besides 1560 convents.

## HOLLAND

The latest returns show as follows :-

|                          | Churches | Clergy |
|--------------------------|----------|--------|
| Protestant . . . . .     | 2,001    | 2,125  |
| Roman Catholic . . . . . | 1,022    | 2,371  |
| Jews . . . . .           | 182      | 137    |
| Total . . . . .          | 3,205    | 4,633  |

## SPAIN.

There are 54 bishops, 32,400 priests, 1680 monks, 14,600 nuns, 18,600 churches, including 65 cathedrals.

## AUSTRALIA

The condition of the various creeds in 1881 was as follows :-

|                         | Churches | Ministers | Lality    | Churches per 100,000 inhabitants |
|-------------------------|----------|-----------|-----------|----------------------------------|
| Church of England . . . | 1,398    | 659       | 1,070,000 | 142                              |
| Roman Catholics . . .   | 791      | 378       | 615,000   | 136                              |
| Methodists . . . . .    | 1,608    | 359       | 301,000   | 402                              |
| Presbyterians . . . . . | 1,046    | 370       | 374,000   | 285                              |

| 1889 . . . . . | 177,000,000      | 24,600,000 | 84,900,000 | 142,000,000   | 19,800,000 | 24,000,000 | 12,700,000 | 485,000,000 |

| Year           | Consumption, Tons |            |            |               |            |            |
|----------------|-------------------|------------|------------|---------------|------------|------------|
|                | Great Britain     | France     | Germany    | United States | Belgium    | Austria    |
| 1830 . . . . . | 15,500,000        | 2,700,000  | 2,500,000  | 1,300,000     | 2,000,000  | 300,000    |
| 1840 . . . . . | 29,000,000        | 4,800,000  | 3,400,000  | 1,800,000     | 3,500,000  | 400,000    |
| 1850 . . . . . | 46,000,000        | 9,300,000  | 6,000,000  | 8,000,000     | 4,500,000  | 2,000,000  |
| 1860 . . . . . | 75,000,000        | 14,300,000 | 15,000,000 | 15,500,000    | 6,100,000  | 3,700,000  |
| 1870 . . . . . | 98,000,000        | 18,800,000 | 30,000,000 | 33,000,000    | 10,500,000 | 10,000,000 |
| 1880 . . . . . | 128,000,000       | 28,800,000 | 52,000,000 | 72,000,000    | 11,500,000 | 14,500,000 |
| 1889 . . . . . | 148,000,000       | 34,600,000 | 75,000,000 | 143,000,000   | 14,300,000 | 22,000,000 |

The average consumption yearly per inhabitant was approximately as follows :—

|                      | Cwts. per Inhabitant |      |      |
|----------------------|----------------------|------|------|
|                      | 1830                 | 1850 | 1888 |
| United Kingdom . . . | 13                   | 33   | 72   |
| United States . . .  | 2                    | 7    | 40   |
| Germany . . .        | 1                    | 4    | 28   |
| France . . .         | 2                    | 5    | 16   |
| Belgium . . .        | 10                   | 18   | 48   |
| Russia . . .         | ...                  | ...  | 2    |
| Austria . . .        | ...                  | 2    | 11   |
| Holland . . .        | ...                  | 5    | 16   |
| Spain . . .          | ...                  | 1    | 2    |
| Italy . . .          | ...                  | 1    | 2    |
| Sweden . . .         | ...                  | 1    | 6    |
| Norway . . .         | ...                  | 1    | 6    |
| Denmark . . .        | ...                  | 1    | 6    |
| Switzerland . . .    | ...                  | 1    | 5    |
| Europe . . .         | 2                    | 5    | 18   |

Since 1830 the consumption in Europe of coal per inhabitant has multiplied ninefold.

This is caused partly by manufactures, partly by railways and steamboats, but it is expected that the use of electric power will in future supersede in some manner that of coal. Meantime the consumption of coal increases year by year.

|                     | 1874    |             |                | 1885    |             |                |
|---------------------|---------|-------------|----------------|---------|-------------|----------------|
|                     | Miners  | Tons Raised | Tons per Miner | Miners  | Tons Raised | Tons per Miner |
| Great Britain . . . | 539,000 | 125,000,000 | 232            | 485,000 | 160,000,000 | 330            |
| Belgium . . .       | 110,000 | 15,000,000  | 136            | 101,000 | 17,000,000  | 168            |
| Austria . . .       | 67,000  | 9,000,000   | 135            | 73,000  | 18,000,000  | 247            |

In 1889 the coal used for making iron was approximately as follows :—

|                     | Tons       |
|---------------------|------------|
| Great Britain . . . | 17,400,000 |
| United States . . . | 16,600,000 |
| Germany . . .       | 10,000,000 |
| France, &c. . .     | 10,300,000 |

Total . . . 54,300,000

In 1885 the coal-mining industry of the world stood approximately as follows :—

|                       | Million Tons Coal | Number of Miners | Tons per Miner | Value of Coal, £ | Product per Miner, £ |
|-----------------------|-------------------|------------------|----------------|------------------|----------------------|
| Great Britain . . .   | 160               | 485,000          | 330            | 53,700,000       | 111                  |
| United States . . .   | 104               | 300,000          | 347            | 41,600,000       | 139                  |
| Germany . . .         | 74                | 220,000          | 336            | 17,200,000       | 78                   |
| France . . .          | 20                | 102,000          | 196            | 9,000,000        | 88                   |
| Belgium . . .         | 17                | 101,000          | 168            | 6,400,000        | 63                   |
| Austria . . .         | 20                | 73,000           | 270            | 4,200,000        | 57                   |
| Other countries . . . | 20                | 100,000          | 200            | 5,000,000        | 50                   |
| Total . . .           | 415               | 1,381,000        | 300            | 137,100,000      | 99                   |

The following table shows the extent and estimated contents of some of the coalfields of the world :—

|                         | Square Miles | Tons            |
|-------------------------|--------------|-----------------|
| Great Britain . . .     | 9,000        | 90,000,000,000  |
| France . . .            | 1,800        | ...             |
| Germany . . .           | 3,600        | 39,000,000,000  |
| Russia . . .            | 27,000       | 10,000,000,000  |
| Belgium, Spain, &c. . . | 1,400        | ...             |
| United States . . .     | 194,000      | ...             |
| India . . .             | 35,000       | 14,000,000,000  |
| China and Japan . . .   | 200,000      | 150,000,000,000 |
| Total . . .             | 471,800      | 303,000,000,000 |

The contents, as estimated above, include nothing beyond a depth of 4000 feet, the deepest colliery at present working being that of Lambert in Belgium, 3500 feet. The deepest in the United Kingdom is the Rose-bridge, 2500 feet. The above five coalfields contain apparently 303,000 millions of tons, which is enough for 700 years, at the present rate of consumption. If to the above be added the contents of coalfields in the United States, Canada, Australia, France, Spain, and Belgium, the supply will be found ample for 1000 years. Improved machinery has greatly increased the yield per miner, and thus produced a fall in price, to the advantage of all industries. The official returns of Great Britain, Belgium, and Austria show as follows :—

The number of tons raised per miner is greater in United States and Germany than in Great Britain. Three English miners, nevertheless, raise as much as five French, and the price of coal in France is always much higher than in England.

Current prices at pit's mouth were :—

| Period        | Pence per Ton |        |         |         |         |               |
|---------------|---------------|--------|---------|---------|---------|---------------|
|               | England       | France | Belgium | Austria | Germany | United States |
| 1871-75 . . . | 87            | 190    | 168     | 78      | 108     | 114           |
| 1876-80 . . . | 88            | 120    | 102     | 66      | 66      | 80            |
| 1881-85 . . . | 72            | 108    | 90      | 60      | 63      | 100           |

It appears that 9 tons of Massachusetts have as much carbon as 10 tons of Newcastle (English) coal. The percentage of coke obtained is as follows :—

|                  |              |                    |              |
|------------------|--------------|--------------------|--------------|
| Westphalia . . . | 36 per cent. | Pennsylvania . . . | 89 per cent. |
| Marseilles . . . | 41 "         | Mayenne . . .      | 90 "         |
| Lancashire . . . | 58 "         | Wales . . .        | 91 "         |

The specific gravity and percentage of carbon in different kinds of coal are shown thus :—

|                        | Weight, Lbs. per Cubic Yd. | Percentage Carbon |                  | Weight, Lbs. per Cubic Yd. | Percentage Carbon |
|------------------------|----------------------------|-------------------|------------------|----------------------------|-------------------|

## UNITED KINGDOM

The production, consumption, and export since 1820 were as follows :—

| Year         | Tons       |             |           | Year         | Tons        |             |            |
|--------------|------------|-------------|-----------|--------------|-------------|-------------|------------|
|              | Production | Consumption | Export    |              | Production  | Consumption | Export     |
| 1820 . . . . | 12,500,000 | 12,250,000  | 250,000   | 1860 . . . . | 82,000,000  | 75,000,000  | 7,000,000  |
| 1830 . . . . | 15,000,000 | 15,500,000  | 500,000   | 1870 . . . . | 110,000,000 | 98,000,000  | 12,000,000 |
| 1840 . . . . | 30,000,000 | 29,000,000  | 1,000,000 | 1880 . . . . | 147,000,000 | 128,000,000 | 19,000,000 |
| 1850 . . . . | 49,000,000 | 46,000,000  | 3,000,000 | 1889 . . . . | 177,000,000 | 148,000,000 | 29,000,000 |

Chisholm's tables of British coal exported in 35 years, ending 1889, show as follows :—

| Period       | Tons Exported to |            |            |            |            |            |             |             |
|--------------|------------------|------------|------------|------------|------------|------------|-------------|-------------|
|              | France           | Germany    | Russia     | Italy      | Spain      | Egypt      | Various     | Total       |
| 1855-60 . .  | 7,500,000        | 7,800,000  | 1,600,000  | ...        | 2,500,000  | 500,000    | 19,100,000  | 39,000,000  |
| 1861-70 . .  | 17,200,000       | 17,400,000 | 5,500,000  | 2,700,000  | 6,600,000  | 3,300,000  | 43,300,000  | 96,000,000  |
| 1871-80 . .  | 28,000,000       | 25,500,000 | 10,200,000 | 10,900,000 | 9,400,000  | 5,500,000  | 59,500,000  | 149,000,000 |
| 1881-89 . .  | 37,300,000       | 27,800,000 | 13,800,000 | 24,000,000 | 14,700,000 | 10,100,000 | 86,300,000  | 214,000,000 |
| 35 years . . | 90,000,000       | 78,500,000 | 31,100,000 | 37,600,000 | 33,200,000 | 19,400,000 | 208,200,000 | 498,000,000 |

In the above table Holland is included with Germany, and Portugal with Spain. About one-sixth of the coal raised in Great Britain is exported.

The existing coal-fields of Great Britain in 1880 were as follows :—

|                  | Million Tons | Contents of Field, Million Tons | Years of Supply |
|------------------|--------------|---------------------------------|-----------------|
| South Wales . .  | 15           | 32,000                          | 2,150           |
| Midland . . . .  | 15           | 18,000                          | 1,200           |
| Northumberland . | 16           | 10,000                          | 620             |
| Stafford . . . . | 15           | 6,000                           | 400             |
| Lancashire . . . | 22           | 5,000                           | 230             |
| Yorkshire, &c. . | 46           | 9,000                           | 196             |
| Scotland . . . . | 18           | 10,000                          | 550             |
| Total . . . .    | 147          | 90,000                          | 612             |

The output in the seventeenth century averaged 2,400,000 tons per annum ; in the eighteenth nearly 5,000,000.

The production in 1889 was 177 million tons, and the uses to which the coal was devoted were more or less thus :—

|                       | Tons        |
|-----------------------|-------------|
| Factories . . . .     | 55,000,000  |
| Domestic use . . .    | 40,000,000  |
| Railways and steamers | 20,000,000  |
| Gas and water works   | 20,000,000  |
| Mines . . . . .       | 13,000,000  |
| Export . . . . .      | 29,000,000  |
| Total . . . . .       | 177,000,000 |

The price of coal in London since 1730 has averaged as follows :—

| Period          | Per Ton | Period          | Per Ton  |
|-----------------|---------|-----------------|----------|
| 1730-50 . . . . | £ 1 7 2 | 1841-50 . . . . | £ 0 19 0 |
| 1751-99 . . . . | 1 14 9  | 1851-60 . . . . | 0 18 6   |
| 1800-20 . . . . | 2 13 3  | 1861-70 . . . . | 0 18 5   |
| 1820-30 . . . . | 1 12 0  | 1871-80 . . . . | 0 18 4   |
| 1831-40 . . . . | 1 4 0   |                 |          |

The price in England since 1782, at port of shipment, has averaged as follows :—

| Period            | P nce | Period            | Pence |
|-------------------|-------|-------------------|-------|
| 1782-1800 . . . . | 180   | 1861-1870 . . . . | 122   |
| 1801-1820 . . . . | 156   | 1871-1875 . . . . | 184   |
| 1821-1850 . . . . | 120   | 1876-1880 . . . . | 116   |
| 1851-1860 . . . . | 115   | 1881-1889 . . . . | 108   |

Loss of life by colliery explosions since 1851 shows thus :—

| Period          | Explosions | Killed | Annual Average |              |                  |
|-----------------|------------|--------|----------------|--------------|------------------|
|                 |            |        | Killed         | Tons, Output | Tons, per Killed |
| 1851-71 . . . . | 1,437      | 4,977  | 238            | 82,000,000   | 344,000          |
| 1872-80 . . . . | 353        | 2,387  | 265            | 131,000,000  | 495,000          |
| 1881-89 . . . . | 211        | 1,361  | 151            | 160,000,000  | 1,060,000        |

## FRANCE

The following table shows the production and consumption, as officially stated :—

| Period          | Tons per Annum |             |             | Cwts. per Inhabitant |
|-----------------|----------------|-------------|-------------|----------------------|
|                 | Production     | Net Imports | Consumption |                      |
| 1787-89 . . . . | 227,000        | 233,000     | 460,000     | 0.4                  |
| 1802 . . . . .  | 844,000        | 91,000      | 935,000     | 0.7                  |
| 1811-20 . . . . | 895,000        | 183,000     | 1,078,000   | 0.7                  |
| 1821-30 . . . . | 1,490,000      | 438,000     | 1,928,000   | 1.3                  |
| 1831-40 . . . . | 2,570,000      | 894,000     | 3,464,000   | 2.0                  |
| 1841-50 . . . . | 4,100,000      | 2,048,000   | 6,148,000   | 3.5                  |
| 1851-60 . . . . | 6,900,000      | 4,550,000   | 11,450,000  | 6.5                  |
| 1861-70 . . . . | 11,700,000     | 6,800,000   | 18,500,000  | 10.0                 |
| 1871-80 . . . . | 17,000,000     | 7,700,000   | 24,700,000  | 13.5                 |
| 1881-86 . . . . | 19,200,000     | 9,800,000   | 29,000,000  | 15.5                 |
| 1889 . . . . .  | 24,600,000     | 10,000,000  | 34,600,000  | 18.0                 |

The first colliery in France was opened in 1722 ; the number working in 1835 was 223, employing 19,000 miners, and steam-engines representing 6000 horse-power.

The French collieries in 1879 gave :—

|                      | Amount      | Per Ton          |
|----------------------|-------------|------------------|
| Wages . . . . .      | £ 4,040,000 | £ s. d.<br>0 4 8 |
| Other expenses . . . | 3,320,000   | 0 3 11           |
| Net profit . . . . . | 1,480,000   | 0 1 9            |
| Value . . . . .      | 8,840,000   | 0 10 4           |

The most productive mines in the returns of 1842 and 1864 were:—

| Mines                  | Tons      |            |
|------------------------|-----------|------------|
|                        | 1842      | 1864       |
| Valenciennes . . . . . | 907,000   | 3,120,000  |
| St. Etienne . . . . .  | 1,290,000 | 2,950,000  |
| Calais . . . . .       | 290,000   | 1,170,000  |
| Creuzot . . . . .      | 230,000   | 680,000    |
| Others . . . . .       | 483,000   | 2,880,000  |
| Total . . . . .        | 3,200,000 | 10,800,000 |

In 1888 there were 100,100 miners, average wages 3s. a day, who raised in twelve months 22,500,000 or 225 tons each, value 9s. a ton. There were 163 collieries that paid dividends, and 129 were worked at a loss. The Pas de Calais mines yielded 12,200,000 tons, or more than half the total.

#### GERMANY

The production of the last forty years may be summed up thus:—

| Period             | Millions of Tons |         |       |
|--------------------|------------------|---------|-------|
|                    | Coal             | Lignite | Total |
| 1850-59 . . . . .  | 88               | 27      | 115   |
| 1860-69 . . . . .  | 200              | 61      | 261   |
| 1870-79 . . . . .  | 356              | 100     | 456   |
| 1880-89 . . . . .  | 570              | 148     | 718   |
| 40 years . . . . . | 1,214            | 336     | 1,550 |

According to "Engineering," Prussia has two coal-beds containing 100,000 millions of tons; other estimates say 39,000 millions, but even the latter would suffice all Germany for 450 years.

#### RUSSIA

The production has grown tenfold in twenty years, viz.:—

| Year           | Tons      |
|----------------|-----------|
| 1866 . . . . . | 390,000   |
| 1876 . . . . . | 2,050,000 |
| 1887 . . . . . | 4,450,000 |

The principal coalfields are:—

|                         | Tons      |
|-------------------------|-----------|
| Don . . . . .           | 2,000,000 |
| Kielo, Poland . . . . . | 2,000,000 |
| Moscow . . . . .        | 450,000   |

Total . . . . . 4,450,000

There are about 32,000 miners employed.

#### INDIA

The coalfields cover 35,000 square miles, or four times the area of those of the United Kingdom, but have less cubic capacity, as they are estimated to contain only 14,000 million of tons, or one-sixth of those of Great Britain. In fact, their contents would only last the British consumption for eighty years. The product of the Indian coalfields is increasing. In 1860 it was 390,000 tons, rising to 760,000 in 1880, and 1,800,000 in 1890.

#### CANADA

The official handbook gives the production thus:—

| Year           | Tons        |                  |           |
|----------------|-------------|------------------|-----------|
|                | Nova Scotia | British Columbia | Total     |
| 1874 . . . . . | 980,000     | 80,000           | 1,060,000 |
| 1880 . . . . . | 1,160,000   | 270,000          | 1,430,000 |
| 1886 . . . . . | 1,680,000   | 330,000          | 2,010,000 |

Canada imports yearly 2,100,000 tons; the consumption therefore reaches 4,100,000 tons, equal to 16 cwt. per inhabitant. Professor Dana says the Nova Scotia coal-bed has an area of 18,000 square miles.

#### AUSTRALIA

Coal was discovered in 1847, and the production has been:—

| Year           | New South Wales | New Zealand | Total     |
|----------------|-----------------|-------------|-----------|
| 1860 . . . . . | 370,000         | ...         | 370,000   |
| 1870 . . . . . | 870,000         | ...         | 870,000   |
| 1880 . . . . . | 1,450,000       | 300,000     | 1,750,000 |
| 1888 . . . . . | 3,200,000       | 620,000     | 3,820,000 |

The total quantity raised has been approximately thus:—

| Period             | New South Wales | New Zealand | Total      |
|--------------------|-----------------|-------------|------------|
| 1847-60 . . . . .  | 2,020,000       | ...         | 2,020,000  |
| 1861-70 . . . . .  | 6,700,000       | ...         | 6,700,000  |
| 1871-80 . . . . .  | 13,100,000      | 700,000     | 13,800,000 |
| 1881-88 . . . . .  | 21,330,000      | 3,900,000   | 25,230,000 |
| 42 years . . . . . | 43,150,000      | 4,600,000   | 47,750,000 |

Small quantities have also been raised in Queensland and Tasmania. The total value of coal raised in forty-two years, according to Mr. Coghlan, was:—

|                           | £          |
|---------------------------|------------|
| New South Wales . . . . . | 22,320,000 |
| New Zealand . . . . .     | 2,670,000  |
| Queensland . . . . .      | 900,000    |
| Tasmania . . . . .        | 180,000    |
| Total . . . . .           | 26,070,000 |

The returns for 1888 were as follows:—

|                         | Miners | Tons Raised | Value, £  | Tons per Miner |
|-------------------------|--------|-------------|-----------|----------------|
| New South Wales         | 9,300  | 3,200,000   | 1,460,000 | 344            |
| New Zealand . . . . .   | 1,750  | 610,000     | 340,000   | 348            |
| Queensland, &c. . . . . | 750    | 360,000     | 140,000   | 480            |
| Total . . . . .         | 11,800 | 4,170,000   | 1,940,000 | 355            |

The average pay per miner in New South Wales was £85 per annum, or 43 pence per ton of coal raised.

#### UNITED STATES

Coal was first discovered in 1768 in Rhode Island and Pennsylvania. Mining was commenced at Pittsburg in 1784, and in Rhode Island in 1808, both seams being anthracite. In the course of a few years the industry became of such importance that by 1850 Pennsylvania had already constructed 7 canals and 27 railways expressly for carrying coal. In 1840 the output was as follows:—

|                           | Tons      |
|---------------------------|-----------|
| Pennsylvania . . . . .    | 1,300,000 |
| Virginia . . . . .        | 400,000   |
| Rhode Island, &c. . . . . | 100,000   |
| Total . . . . .           | 1,800,000 |

In that year the number of miners engaged was 7000, showing an average of 260 tons per man. The production increased very rapidly, but was hardly sufficient for requirements, the Union always importing some coal from

Europe. The production, according to Census returns, compares thus with population :—

| Year           | Tons        | Cwts. per Inhabitant |
|----------------|-------------|----------------------|
| 1840 . . . . . | 1,800,000   | 2.1                  |
| 1850 . . . . . | 8,000,000   | 7.0                  |
| 1860 . . . . . | 15,200,000  | 9.5                  |
| 1870 . . . . . | 32,900,000  | 17.5                 |
| 1880 . . . . . | 70,500,000  | 28.0                 |
| 1888 . . . . . | 142,000,000 | 44.0                 |

The production in 1888 was as follows :—

|                   | Tons       |            |             |
|-------------------|------------|------------|-------------|
|                   | Anthracite | Bituminous | Total       |
| Pennsylvania . .  | 43,900,000 | 33,800,000 | 77,700,000  |

### COFFEE

In a little over fifty years the crop has increased nearly eightfold, viz. :—

| Year           | Tons    | Year           | Tons    |
|----------------|---------|----------------|---------|
| 1832 . . . . . | 95,000  | 1865 . . . . . | 422,000 |
| 1844 . . . . . | 255,000 | 1875 . . . . . | 505,000 |
| 1855 . . . . . | 321,000 | 1885 . . . . . | 718,000 |

The production by countries is shown as follows :—

|                    | 1855    | 1880    | 1885    |
|--------------------|---------|---------|---------|
|                    | Tons    | Tons    | Tons    |
| Brazil . . . . .   | 163,000 | 333,000 | 389,000 |
| Java . . . . .     | 70,000  | 90,000  | 92,000  |
| Ceylon . . . . .   | 29,000  | 33,000  | 15,000  |
| West Indies . . .  | 28,000  | 42,000  | 54,000  |
| Spanish America .  | 16,000  | 70,000  | 123,000 |
| Arabia . . . . .   | 5,000   | 5,000   | 5,000   |
| India . . . . .    | 5,000   | 15,000  | 17,000  |
| Manilla, &c. . . . | 5,000   | 20,000  | 23,000  |
| Total . . . . .    | 321,000 | 608,000 | 718,000 |

It has been asserted that the total coffee crop of the world in 1820 did not exceed 50,000 tons.

Consumption for five years ending 1884 compares with five years ending 1864 as follows :—

|                      | Tons, per Annum |         | Oz. yearly, per Inhabitant |         |
|----------------------|-----------------|---------|----------------------------|---------|
|                      | 1860-64         | 1880-84 | 1860-64                    | 1880-84 |
| United Kingdom .     | 16,000          | 15,000  | 19                         | 14      |
| France . . . . .     | 40,000          | 65,000  | 37                         | 62      |
| Germany . . . . .    | 70,000          | 105,000 | 69                         | 81      |
| Russia . . . . .     | 6,000           | 8,000   | 3                          | 3       |
| Austria . . . . .    | 21,000          | 36,000  | 19                         | 32      |
| Italy . . . . .      | 12,000          | 14,000  | 19                         | 17      |
| Spain and Portugal . | 3,000           | 5,000   | 5                          | 9       |
| Scandinavia . . .    | 12,000          | 25,000  | 80                         | 110     |
| Holland . . . . .    | 14,000          | 40,000  | 145                        | 322     |
| Belgium . . . . .    | 18,000          | 25,000  | 131                        | 158     |
| Switzerland . . .    | 7,000           | 9,000   | 98                         | 114     |
| United States . .    | 90,000          | 215,000 | 90                         | 140     |
| Brazil, &c. . . . .  | 81,000          | 78,000  | ...                        | ...     |
| Total . . . . .      | 390,000         | 640,000 | ..                         | ...     |

The coffee fields of Brazil cover 2,200,000 acres, with about 900 million trees—that is, 400 per acre, each tree averaging almost 1 lb. per annum, the industry employing 800,000 hands.

### CONSUMPTION IN UNITED KINGDOM.

| Year           | Millions Lbs. | Oz. per Inhabitant | Duty, per Lb. | Price, per Cwt. |
|----------------|---------------|--------------------|---------------|-----------------|
| 1801 . . . . . | 1             | 1                  | Pence 6       | 87              |

| West Indies . . . . .  | 1,570,000   | 14,900,000  | 2,100,000   | 3,100,000   | 160             | 127,000            |
| Cyprus . . . . .       | 220,000     | 500,000     | 200,000     | ...         | ...             | 3,600              |
| Various . . . . .      | 740,000     | 39,400,000  | 700,000     | 500,000     | 20              | 45,400             |
| Colonies . . . . .     | 18,200,000  | 285,600,000 | 42,050,000  | 237,900,000 | 23,670          | 7,076,600          |
| India . . . . .        | 214,600,000 | 163,000,000 | 77,300,000  | 185,700,000 | 14,380          | 870,000            |
| Total . . . . .        | 232,800,000 | 448,600,000 | 119,350,000 | 423,600,000 | 38,050          | 7,946,600          |

The above statement is to the end of 1887. Commerce includes merchandise and precious metals.

If we exclude Malta, Gibraltar, Cyprus, and Hong-Kong, for which the statistics are imperfect, we find the growth of the colonies (without India) as follows :—

| Year           | Population | Commerce, £ | Revenue, £ | Debt, £     | Railways, Miles |
|----------------|------------|-------------|------------|-------------|-----------------|
| 1840 . . . . . | 5,100,000  | 27,100,000  | 2,400,000  | 5,300,000   | ...             |
| 1860 . . . . . | 9,100,000  | 116,600,000 | 12,500,000 | 64,700,000  | 2,330           |
| 1870 . . . . . | 11,600,000 | 145,700,000 | 19,800,000 | 79,100,000  | 4,360           |
| 1880 . . . . . | 14,700,000 | 214,700,000 | 30,100,000 | 143,400,000 | 13,080          |
| 1887 . . . . . | 17,400,000 | 247,000,000 | 41,300,000 | 237,700,000 | 23,650          |

## INDIA

The official returns show as follows :—

| Year           | Population  | Commerce, £ | Revenue, £ | Debt, £     | Railways, Miles |
|----------------|-------------|-------------|------------|-------------|-----------------|
| 1814 . . . . . | 40,000,000  | 10,500,000  | 13,100,000 | 18,000,000  | ...             |
| 1820 . . . . . | 83,000,000  | 9,050,000   | 15,300,000 | 24,000,000  | ...             |
| 1830 . . . . . | 91,000,000  | 9,800,000   | 17,000,000 | 30,400,000  | ...             |
| 1850 . . . . . | 123,000,000 | 34,100,000  | 27,600,000 | 53,900,000  | ...             |
| 1860 . . . . . | 143,000,000 | 69,500,000  | 39,700,000 | 98,100,000  | 840             |
| 1870 . . . . . | 191,000,000 | 100,400,000 | 50,900,000 | 108,200,000 | 4,830           |
| 1880 . . . . . | 199,000,000 | 122,100,000 | 68,400,000 | 160,400,000 | 9,310           |
| 1887 . . . . . | 214,600,000 | 163,000,000 | 77,300,000 | 185,700,000 | 14,380          |

## AUSTRALIA

This group of seven colonies has made great strides :—

| Year           | Population | Commerce, £ | Revenue, £ | Debt, £     | Railways, Miles |
|----------------|------------|-------------|------------|-------------|-----------------|
| 1800 . . . . . | 10,000     | 200,000     | ...        | ...         | ...             |
| 1820 . . . . . | 90,000     | 800,000     | 70,000     | ...         | ...             |
| 1840 . . . . . | 200,000    | 3,300,000   | 600,000    | ...         | ...             |
| 1850 . . . . . | 240,000    | 6,100,000   | ...        | ...         | ...             |
| 1860 . . . . . | 1,264,000  | 49,900,000  | 6,700,000  | 11,900,000  | 160             |
| 1870 . . . . . | 1,980,000  | 57,300,000  | 11,600,000 | 36,200,000  | 950             |
| 1880 . . . . . | 2,880,000  | 94,300,000  | 17,100,000 | 87,900,000  | 4,880           |
| 1888 . . . . . | 3,680,000  | 121,800,000 | 27,600,000 | 166,000,000 | 10,430          |

In 1888 the several colonies stood thus :—

|                             | Population | Commerce, £ | Revenue, £ | Debt, £     | Railways, Miles |
|-----------------------------|------------|-------------|------------|-------------|-----------------|
| New South Wales . . . . .   | 1,086,000  | 41,700,000  | 8,900,000  | 44,100,000  | 2,200           |
| Victoria . . . . .          | 1,091,000  | 37,800,000  | 7,600,000  | 34,600,000  | 2,191           |
| South Australia . . . . .   | 313,000    | 12,400,000  | 2,500,000  | 19,200,000  | 1,500           |
| New Zealand . . . . .       | 650,000    | 13,700,000  | 4,100,000  | 37,000,000  | 1,861           |
| Queensland . . . . .        | 387,000    | 11,800,000  | 3,500,000  | 25,900,000  | 1,931           |
| Tasmania . . . . .          | 146,000    | 2,900,000   | 600,000    | 4,500,000   | 485             |
| Western Australia . . . . . | 42,000     | 1,500,000   | 400,000    | 1,300,000   | 257             |
| Total . . . . .             | 3,715,000  | 121,800,000 | 27,600,000 | 166,600,000 | 10,431          |

In the above table commerce includes both merchandise and gold.

## CANADA

The official returns of this colony, including Newfoundland, show thus :—

| Year           | Population | Commerce, £ | Revenue, £ | Debt, £    | Railways, Miles |
|----------------|------------|-------------|------------|------------|-----------------|
| 1820 . . . . . | 840,000    | 1,000,000   | 240,000    | ...        | ...             |
| 1830 . . . . . | 910,000    | 3,300,000   | 300,000    | ...        | ...             |
| 1840 . . . . . | 1,690,000  | 6,200,000   | 500,000    | 1,200,000  | ...             |
| 1850 . . . . . | 3,360,000  | 22,700,000  | 2,400,000  | 13,200,000 | 2,170           |
| 1870 . . . . . | 3,830,000  | 33,600,000  | 3,600,000  | 17,000,000 | 3,200           |
| 1880 . . . . . | 4,500,000  | 39,000,000  | 5,100,000  | 32,100,000 | 6,890           |
| 1887 . . . . . | 5,020,000  | 43,900,000  | 7,600,000  | 47,300,000 | 11,788          |

## SOUTH AFRICA

Official and other statements give us the following :—

| Year           | Population | Commerce, £ | Revenue, £ | Debt, £    | Railways, Miles |
|----------------|------------|-------------|------------|------------|-----------------|
| 1840 . . . . . | 140,000    | 1,000,000   | 200,000    | ...        | ...             |
| 1850 . . . . . | 420,000    | 5,200,000   | 800,000    | 600,000    | ...             |
| 1870 . . . . . | 860,000    | 5,900,000   | 950,000    | 1,400,000  | 40              |
| 1880 . . . . . | 1,120,000  | 19,200,000  | 3,100,000  | 13,000,000 | 1,005           |
| 1887 . . . . . | 1,860,000  | 17,000,000  | 4,000,000  | 26,500,000 | 1,820           |

The statistics for the two colonies in 1887 were as follows :—

|                   | Cape Colony | Natal     | Total      |
|-------------------|-------------|-----------|------------|
| Population . . .  | 1,380,000   | 480,000   | 1,860,000  |
| Commerce, £ . .   | 13,700,000  | 3,300,000 | 17,000,000 |
| Revenue, £ . . .  | 3,200,000   | 800,000   | 4,000,000  |
| Debt, £ . . . . . | 22,500,000  | 4,000,000 | 26,500,000 |
| Railways, miles . | 1,600       | 220       | 1,820      |

## WEST AFRICA

Official returns give the following respecting this group :—

| Year           | Population | Commerce, £ | Revenue, £ | Debt, £ |
|----------------|------------|-------------|------------|---------|
| 1850 . . . . . | 205,000    | 800,000     | 60,000     | ...     |
| 1860 . . . . . | ...        | 1,000,000   | 80,000     | ...     |
| 1870 . . . . . | 550,000    | 2,500,000   | 180,000    | ...     |
| 1880 . . . . . | ...        | 3,100,000   | 280,000    | 90,000  |
| 1887 . . . . . | 1,560,000  | 2,500,000   | 250,000    | 60,000  |

Excluding St. Helena, the West Coast colonies count only 520 whites, mostly Government officials or missionaries. The chief product is palm-oil.

The several colonies stood thus in 1887 :—

|                  | Population | Commerce, £ | Revenue, £ | Debt, £ |
|------------------|------------|-------------|------------|---------|
| Gold Coast . . . | 1,405,000  | 700,000     | 120,000    | ...     |
| Lagos . . . . .  | 75,000     | 1,000,000   | 50,000     | ...     |
| Sierra Leone . . | 60,000     | 600,000     | 60,000     | 60,000  |
| Gambia . . . . . | 15,000     | 200,000     | 10,000     | ...     |
| St. Helena . . . | 5,000      | ...         | 10,000     | ...     |
| Total . . . . .  | 1,560,000  | 2,500,000   | 250,000    | 60,000  |

## MAURITIUS

We have statistics from 1827 as follows :—

| Year           | Population | Commerce, £ | Revenue, £ | Debt, £   | Railway, Miles |
|----------------|------------|-------------|------------|-----------|----------------|
| 1827 . . . . . | 95,000     | 1,000,000   | 200,000    | ...       | ...            |
| 1850 . . . . . | 180,000    | 2,300,000   | 300,000    | ...       | ...            |
| 1860 . . . . . | 310,000    | 5,000,000   | 600,000    | ...       | ...            |
| 1870 . . . . . | 320,000    | 4,200,000   | 600,000    | 1,100,000 | 70             |
| 1880 . . . . . | 380,000    | 5,900,000   | 800,000    | 800,000   | 90             |
| 1887 . . . . . | 370,000    | 5,200,000   | 700,000    | 700,000   | 90             |

The export of sugar, the chief product, rose from 30,000 tons in 1836 to 140,000 tons in 1877, but has now declined to 100,000 tons.

## CEYLON

The principal items are shown as follows :—

| Year           | Population | Commerce, £ | Revenue, £ | Debt, £   | Railway, Miles |
|----------------|------------|-------------|------------|-----------|----------------|
| 1850 . . . . . | 1,580,000  | 3,800,000   | 400,000    | ...       | ...            |
| 1860 . . . . . | 1,890,000  | 6,100,000   | 800,000    | ...       | ...            |
| 1870 . . . . . | 2,410,000  | 8,400,000   | 1,100,000  | 700,000   | 70             |
| 1880 . . . . . | 2,760,000  | 8,700,000   | 1,200,000  | 1,400,000 | 140            |
| 1887 . . . . . | ...        | 7,200,000   | 1,100,000  | 2,200,000 | 180            |

Coffee-planting began about 1840, the exportation reaching 32,000 tons in 1860, and rising to 50,000 tons in 1878, but now it barely reaches 9000 tons. Tea is, however, assuming importance, the shipment rising from £2000 worth in 1878, to a value of £700,000 in 1887. In like manner Chinchona\* has risen from £90,000 in 1881 to £350,000 in 1886.

\* This is often incorrectly called Cinchon. It takes its name from the Marquis of Chinchon, Viceroy of Peru, whose wife was cured by a Jesuit who prescribed this remedy.

## SINGAPORE

Sometimes called the Straits Settlement. Statistics show thus :—

| Year           | Population | Commerce, £ | Revenue, £ |
|----------------|------------|-------------|------------|
| 1860 . . . . . | 280,000    | 14,500,000  | 100,000    |
| 1870 . . . . . | 310,000    | 18,700,000  | 300,000    |
| 1880 . . . . . | 420,000    | 25,700,000  | 400,000    |
| 1887 . . . . . | 540,000    | 47,200,000  | 700,000    |

## WEST INDIES

Under this heading may be comprised all the following colonies, for which the statistics are given for 1887:—

|                          | Population       | Commerce, £       | Revenue, £       | Debt, £          | Railway, Miles |
|--------------------------|------------------|-------------------|------------------|------------------|----------------|
| Jamaica . . . . .        | 600,000          | 2,800,000         | 600,000          | 1,600,000        | 70             |
| Trinidad . . . . .       | 180,000          | 3,800,000         | 500,000          | 600,000          | 50             |
| Barbados . . . . .       | 170,000          | 2,100,000         | 200,000          | ...              | 20             |
| Bahamas . . . . .        | 40,000           | 300,000           | 50,000           | 200,000          | ...            |
| Honduras . . . . .       | 30,000           | 400,000           | 50,000           | ...              | ...            |
| British Guiana . . . . . | 280,000          | 3,800,000         | 500,000          | 600,000          | 20             |
| Small islands . . . . .  | 270,000          | 1,700,000         | 200,000          | 200,000          | ...            |
| <b>Total . . . . .</b>   | <b>1,570,000</b> | <b>14,900,000</b> | <b>2,100,000</b> | <b>3,100,000</b> | <b>160</b>     |

The progress of the group is shown as follows:—

| Year | Population | Com-<br>merce, £ | Revenue, £ | Debt, £   | Rail-<br>ways,<br>Miles |
|------|------------|------------------|------------|-----------|-------------------------|
| 1850 | 900,000    | 9,100,000        | 700,000    | 900,000   | ...                     |
| 1860 | 1,090,000  | 11,900,000       | 1,000,000  | 1,000,000 | ...                     |
| 1870 | 1,280,000  | 14,600,000       | 1,400,000  | 1,600,000 | 30                      |
| 1880 | 1,490,000  | 17,800,000       | 1,900,000  | 1,800,000 | 80                      |
| 1887 | 1,570,000  | 14,900,000       | 2,100,000  | 3,100,000 | 160                     |

commerce of Malta, Gibraltar, and Hong-Kong, the items for which are the latest published, over ten years old.

Hong-Kong is a thriving colony, with considerable trade, shipping entries in 1888 reaching 6,500,000 tons. Statistics show:—

|                                  | 1879      | 1888       |
|----------------------------------|-----------|------------|
| Saving-bank deposits, £          | 1,400,000 | 8,300,000  |
| Joint-stock companies capital, £ | 8,000,000 | 20,000,000 |

## FRENCH COLONIES

The protected countries are stated to be as follows:—

|                        | Population        | Square Miles   |
|------------------------|-------------------|----------------|
| Tonquin . . . . .      | 12,000,000        | 34,700         |
| Gambia . . . . .       | 850,000           | 268,000        |
| Madagascar . . . . .   | 1,500,000         | 228,000        |
| Annam . . . . .        | 5,000,000         | 106,000        |
| Cambodia . . . . .     | 1,500,000         | 32,400         |
| <b>Total . . . . .</b> | <b>20,850,000</b> | <b>669,100</b> |

The following colonial statistics refer to 1885:—

|                        | Births | Deaths | Acres<br>Tilled | Value of<br>Farms, £ |
|------------------------|--------|--------|-----------------|----------------------|
| Reunion . . . . .      | 4,200  | 5,200  | 140,000         | 3,900,000            |
| Cochin-China . . . . . | 62,000 | 36,000 | 2,300,000       | ...                  |
| Martinique . . . . .   | 5,570  | 4,020  | 90,000          | 3,600,000            |
| Guadeloupe . . . . .   | 4,300  | 4,720  | 100,000         | 5,900,000            |

The above returns are for 1887, except as regards the

An official statement in 1885 gives the following returns:—

|                         | Population       | Square Miles   | Imports, £        | Exports, £        | Railway, Miles | Revenue, £       |
|-------------------------|------------------|----------------|-------------------|-------------------|----------------|------------------|

## ALGERIA

This is the best of the French colonies, and its progress is shown by the number of European settlers:—

|                        | 1883         | 1845          | 1856           | 1866           | 1876           | 1886           |
|------------------------|--------------|---------------|----------------|----------------|----------------|----------------|
| French . . . . .       | 3,500        | 46,300        | 92,800         | 122,100        | 155,700        | 219,600*       |
| Spaniards . . . . .    | 1,300        | 25,300        | 42,200         | 58,500         | 92,500         | 120,100        |
| Italians . . . . .     | 1,100        | 7,700         | 9,500          | 16,700         | 25,800         | ...            |
| Maltese . . . . .      | 1,200        | 8,100         | 7,100          | 10,600         | 14,200         | 86,200         |
| Sundry . . . . .       | 700          | 7,900         | 9,200          | 10,100         | 23,300         | ...            |
| <b>Total . . . . .</b> | <b>7,800</b> | <b>95,300</b> | <b>160,800</b> | <b>218,000</b> | <b>311,500</b> | <b>425,900</b> |

\* This appears to include 70,000 children born in the colony.

The population of the territory was made up thus in 1876:—

|                                 |                  |
|---------------------------------|------------------|
| Arabs under military rule . . . | 1,408,000        |
| Arabs under civil rule . . .    | 763,000          |
| French settlers . . .           | 156,000          |
| Foreign settlers . . .          | 155,000          |
| Jewish population . . .         | 33,000           |
| <b>Total . . .</b>              | <b>2,515,000</b> |

The territory under military law covered 110,000, that under civil law 16,000 square miles, total 126,000 square miles, or 78 million acres. The ordinary garrison is 50,000 men, not included above.

The work of colonisation from the time of the conquest (1830-36) was slow until 1848, when General Lamoricière obtained a grant of two millions sterling from the French Legislature for the purpose. In 1863 an agricultural census showed 102,000 Europeans living on farms that covered an area of 1,300,000 acres. Further grants of 240,000 acres were made in 1871 for Alsatian refugees, and in 1877 the area of farms held by settlers was 2,570,000 acres, distributed among 510 colonies or villages. The figures for 1863 and 1877 showed thus:—

|                                 | 1863             | 1877             |
|---------------------------------|------------------|------------------|
| Men . . . . .                   | 42,300           | 57,600           |
| Women . . . . .                 | 28,600           | 38,500           |
| Children . . . . .              | 30,900           | 47,300           |
| <b>Farming population . . .</b> | <b>101,800</b>   | <b>143,300</b>   |
| <b>Acres . . . . .</b>          | <b>1,300,000</b> | <b>2,570,000</b> |

Each colony or group of settlers averages 5000 acres, with 60 habitations and 300 inhabitants, the Government having expended £120 for each family, or £6000 per colony, in all £3,000,000 sterling. There are 2,100,000 Arabs, holding 39½ million acres. Forests and crown-

#### CUBA AND PORTO RICO

The principal products of these islands are as follows:—

|                        | Value, £          |                  |                   | Tons       |            |            |
|------------------------|-------------------|------------------|-------------------|------------|------------|------------|
|                        | Cuba              | Porto Rico       | Total             | Cuba       | Porto Rico | Total      |
| Sugar . . . . .        | 9,000,000         | 800,000          | 9,800,000         | 670,000    | 60,000     | 730,000    |
| Tobacco . . . . .      | 5,000,000         | 130,000          | 5,130,000         | 20,000     | 2,000      | 22,000     |
| Coffee . . . . .       | 1,000,000         | 900,000          | 1,900,000         | 20,000     | 20,000     | 40,000     |
| Sundries . . . . .     | 3,800,000         | 300,000          | 4,100,000         | ...        | ...        | ...        |
| <b>Total . . . . .</b> | <b>18,800,000</b> | <b>2,130,000</b> | <b>20,930,000</b> | <b>...</b> | <b>...</b> | <b>...</b> |

Cuba has 930 miles of railway and 2800 of telegraphs. The revenue averages £5,100,000, of which £2,400,000 are Customs-dues, the rest taxes. The consolidated debt consists of £25,000,000 in 6 per cents., largely held in Germany. Shipping entries at Havana and other ports sum up 1,350,000 tons yearly, 540,000 tons being Spanish, and the remainder 60 per cent. foreign flags. Havana has a population of 108,000.

The Philippine Islands have 120 miles of railway and 700 of telegraphs. Shipping entries at Manila do not exceed yearly 300,000 tons. Imports, £4,100,000; exports, £5,200,000, viz.:—

|                        |                  |
|------------------------|------------------|
| Sugar . . . . .        | 1,800,000        |
| Hemp . . . . .         | 1,100,000        |
| Tobacco . . . . .      | 500,000          |
| Coffee . . . . .       | 300,000          |
| Sundries . . . . .     | 1,500,000        |
| <b>Total . . . . .</b> | <b>5,200,000</b> |

The revenue reaches £2,000,000, of which £400,000

lands cover 35 million acres. The Arabs have nearly 7 million acres under tillage; their flocks and herds count 8,000,000 head. The French have spent over 20 millions sterling on roads and other public works: the roads over the Atlas and other ranges are excellent. The colony has suffered much from locusts. The first railway was begun in 1863, and there are now 1550 miles in traffic. In 1886 the imports were £9,700,000, exports £7,300,000. Revenue £1,800,000, which is much less than the annual expenditure. Entries of shipping 1,980,000 tons yearly, of which 1,170,000 are French.

#### TUNIS

This territory can hardly be called a colony: it was annexed by France in 1881, but has few French residents. There are 30,000 Christians and 30,000 Jews; the former including 10,000 Italians, 8000 Maltese, and the rest a mixture of all nations. Revenue, £960,000; debt, £5,700,000. The shipping entries reach 1,600,000 tons yearly.

#### SPANISH COLONIES

Official and other documents give us the following:—

|                        | Square Miles   | Population       | Commerce, £       | Railway, Miles | Revenue, £ |
|------------------------|----------------|------------------|-------------------|----------------|------------|
| Cuba . . . . .         | 46,000         | 1,520,000        | 28,000,000        | 930            | 5,100,000  |

| Macao . . . . .        | 4              | 70,000           | ...            |
| <b>Total . . . . .</b> | <b>206,114</b> | <b>2,765,000</b> | <b>445,000</b> |

Madeira and the Azores are not treated as colonial possessions, but as two integral provinces of Portugal, with deputies sitting in the Lisbon Cortes.

## DUTCH COLONIES

The latest information is to the following effect :—

|                         | Square Miles | Population |
|-------------------------|--------------|------------|
| Java . . . . .          | 51,300       | 18,100,000 |
| Sumatra . . . . .       | 46,200       | 940,000    |
| Bencoolen . . . . .     | 9,600        | 130,000    |
| Borneo . . . . .        | 197,000      | 1,210,000  |
| Celebes . . . . .       | 45,200       | 350,000    |
| Moluccas . . . . .      | 42,400       | 330,000    |
| New Guinea . . . . .    | 67,400       | 200,000    |
| Palembang . . . . .     | 61,200       | 480,000    |
| Other islands . . . . . | 95,200       | 2,160,000  |
| East Indies . . . . .   | 615,500      | 23,900,000 |
| Dutch Guiana . . . . .  | 46,100       | 60,000     |
| Curaçoa, &c. . . . .    | 440          | 46,000     |
| Total . . . . .         | 662,040      | 24,006,000 |

The East Indian possessions show an aggregate commerce of 14 millions sterling imports and 16 millions exports. The gross revenue is £11,800,000. The Dutch-India Company has a monopoly of Java, which gives a net profit of 3 millions sterling per annum. The population of the East Indian possessions is as follows :—

|                             |            |
|-----------------------------|------------|
| European settlers . . . . . | 34,000     |
| Garrison . . . . .          | 14,000     |
| Chinese . . . . .           | 310,000    |
| Natives . . . . .           | 23,542,000 |

Total . . . . . 23,900,000

Most of the natives are Mahometans, except those of the Moluccas, who are Christians.

The revenue is obtained thus :—

|                              |            |
|------------------------------|------------|
| Coffee plantations . . . . . | £4,700,000 |
| Opium plantations . . . . .  | 1,500,000  |
| Land-tax, &c. . . . .        | 5,600,000  |

Total . . . . . 11,800,000

## DANISH COLONIES

Latest information may be summed up thus :—

|                         | Square Miles | Population |
|-------------------------|--------------|------------|
| Iceland . . . . .       | 40,200       | 72,000     |
| Greenland . . . . .     | 34,000       | 10,000     |
| Faroe Islands . . . . . | 500          | 11,000     |
| St. Thomas, &c. . . . . | 140          | 33,000     |
| Total . . . . .         | 74,840       | 126,000    |

Iceland is in reality a republic, under Danish protection. In 1804 the Census showed 4750 farms, with 47,000 inhabitants; some grain was then cultivated. At present the island depends mainly on its fisheries. A vessel of 60 tons with twelve men can earn £440 in the cod-fishing season. Greenland also depends on fishing, the annual product averaging 12,000 barrels of blubber and 3000 of cod-liver. The West Indian possessions comprise the three islands of St. Thomas, Sainte Croix, and St. John, which produce yearly 7000 tons of sugar and one million barrels of rum. Denmark was the first of all countries to abolish slavery, by liberating her West Indian slaves in 1826.

## GERMAN COLONIES

The extent and population of the new German possession of Cameroons in Africa are not known. The other possessions are :—

|                                | Square Miles | Population |
|--------------------------------|--------------|------------|
| New Guinea . . . . .           | 70,000       | 107,000    |
| Bismarck Archipelago . . . . . | 20,000       | 188,000    |
| Solomon Islands . . . . .      | 9,000        | 80,000     |
| Marshall Islands . . . . .     | 40           | 10,000     |
| Total . . . . .                | 99,040       | 385,000    |

## COMMERCE

International trade has increased fortyfold since the beginning of the eighteenth century. The following table shows approximately the aggregate value of imports and exports for each country :—

MILLIONS, £ STERLING

|                               | 1720 | 1750 | 1780 | 1800 | 1820 | 1830 | 1840 | 1850 | 1860  | 1870  | 1880  | 1889  |

| India . . . . .              | 293     | 368     | 322     | 983      | 518     | 597     | 495     | 1,610    |
| China and Japan . . . . .    | 244     | 289     | 170     | 703      | 233     | 271     | 160     | 664      |
| South America . . . . .      | 528     | 587     | 317     | 1,432    | 513     | 658     | 359     | 1,530    |
| Egypt . . . . .              | 73      | 52      | 49      | 174      | 184     | 136     | 74      | 394      |
| Java . . . . .               | 52      | 91      | 84      | 227      | 93      | 165     | 96      | 354      |
| Other countries . . . . .    | 223     | 318     | 542     | 1,083    | 230     | 311     | 602     | 1,143    |
| Total . . . . .              | 9,228   | 13,787  | 9,771   | 32,786   | 8,301   | 12,157  | 8,961   | 29,419   |

Imports, of course, always sum up a higher value than exports, the former including freight, insurance, commission, and other charges, which make up about 6 per cent. on the original value of exports at port of shipment. The surplus thus represented by imports has been declining in ratio since 1880, probably owing to cheaper freights and the facilities afforded by telegraphs. The surplus was as follows :—

| Period            | Millions Sterling | Percentage over Exports |
|-------------------|-------------------|-------------------------|
| 1861-70 . . . . . | 927               | 11.7                    |
| 1871-80 . . . . . | 1,630             | 13.6                    |
| 1881-86 . . . . . | 810               | 9.0                     |
| 1887-88 . . . . . | 94                | 6.0                     |

The surplus of imports has been chiefly among European nations as follows :—

|                              | Millions £ Sterling |         |         |          | Percentage over Exports |         |         |          |
|------------------------------|---------------------|---------|---------|----------|-------------------------|---------|---------|----------|

| Cotton . . . . .    | 400,000                           | 600,000    | 1,000,000  | 1,200,000   | 1,800,000   |
| Wool . . . . .      | 20,000                            | 100,000    | 250,000    | 300,000     | 350,000     |
| Jute . . . . .      | ...                               | 100,000    | 300,000    | 400,000     | 600,000     |
| Meat . . . . .      | ...                               | 100,000    | 400,000    | 650,000     | 700,000     |
| Coffee . . . . .    | 200,000                           | 300,000    | 400,000    | 500,000     | 600,000     |
| Wine . . . . .      | 200,000                           | 500,000    | 900,000    | 1,200,000   | 1,400,000   |
| Salt . . . . .      | 800,000                           | 1,000,000  | 1,200,000  | 1,300,000   | 1,300,000   |
| Sundries . . . . .  | 9,180,000                         | 16,660,000 | 24,250,000 | 28,950,000  | 33,750,000  |
| Total . . . . .     | 20,000,000                        | 56,000,000 | 88,000,000 | 113,000,000 | 140,100,000 |

The total weight of sea-borne merchandise composing the commerce of 27 years, down to 1887, and the value approximately of same at shipment, are shown as follows :—

|                     | Millions of Tons | Value, Millions | Ratio of |       |
|---------------------|------------------|-----------------|----------|-------|
|                     |                  |                 | Weight   | Value |
| Coal . . . . .      | 830              | 410             | 36.0     | 1.3   |
| Iron . . . . .      | 170              | 480             | 7.4      | 1.6   |
| Timber . . . . .    | 220              | 660             | 9.5      | 2.1   |
| Grain . . . . .     | 180              | 1,050           | 7.8      | 3.4   |
| Sugar . . . . .     | 55               | 1,130           | 2.4      | 3.7   |
| Petroleum . . . . . | 32               | 180             | 1.4      | 0.6   |
| Cotton . . . . .    | 27               | 180             | 1.2      | 0.6   |
| Salt . . . . .      | 30               | 18              | 1.3      | ...   |
| Wine . . . . .      | 23               | 510             | 1.0      | 1.6   |
| Coffee . . . . .    | 11               | 840             | 0.5      | 2.7   |
| Meat . . . . .      | 10               | 560             | 0.4      | 1.8   |
| Sundries . . . . .  | 712              | 24,982          | 31.1     | 80.6  |
| Total . . . . .     | 2,300            | 31,000          | 100.0    | 100.0 |

If we compare the weight of sea-borne merchandise with the tonnage of shipping of all nations at various dates, we find as follows :—

| Year | Tons Shipping | Tons Merchandise | Tons Carried per Ton of Shipping |
|------|---------------|------------------|----------------------------------|
| 1840 | 9,400,000     | 20,000,000       | 2.1                              |
| 1865 | 17,000,000    | 56,000,000       | 3.3                              |
| 1875 | 18,000,000    | 88,000,000       | 4.9                              |
| 1880 | 20,300,000    | 113,000,000      | 5.6                              |
| 1887 | 21,200,000    | 140,000,000      | 6.6                              |

Each ton of shipping now carries more than three times as much as it did in 1840, which is, of course, due to the use of steam, one ton of steam-ship being equivalent to four of sailing-ships. The traffic of 1887 was approximately as follows :—

|                    | Tonnage Register | Tons Carried |
|--------------------|------------------|--------------|
| Steamers . . . . . | 8,600,000        | 102,000,000  |
| Sailing . . . . .  | 12,600,000       | 38,000,000   |
| Total . . . . .    | 21,200,000       | 140,000,000  |

## GREAT BRITAIN

There are non-continuous records of British commerce since the time of Edward III.

| Year | Reign        | Imports     | Exports     | Total       | Per Inhabitant |
|------|--------------|-------------|-------------|-------------|----------------|
|      |              | £           | £           | £           | £ s. d.        |
| 1355 | Edward III.  | 120,000     | 294,000     | 414,000     | 0 2 10         |
| 1573 | Elizabeth    | 2,100,000   | 1,880,000   | 3,980,000   | 0 15 0         |
| 1614 | James I.     | 2,140,000   | 2,090,000   | 4,230,000   | 0 16 6         |
| 1687 | James II.    | 4,200,000   | 4,080,000   | 8,280,000   | 1 10 2         |

| Total . . . . .            | 427,200,000     | 248,000,000   | 675,200,000    | 100.0 |

The above Board of Trade returns exclude exports of colonial and foreign merchandise from the United Kingdom, namely, £65,000,000, the total trade for the year having been £740,200,000. Our trade with the United States is much greater than with any other country, India coming second on the list, and France third.

The following table shows the value of merchandise imported from the several foreign countries and colonies since 1854, the earliest date supplied by statistical abstracts of the Board of Trade :—

|                             | Millions £ Sterling |         |         |         |          | Percentage |         |         |

The ratio of our trade with British colonies is increasing, and with European countries declining, except as regards Spain, Belgium, Holland, Scandinavia, and Roumania.

During the said period of 34 years there was a balance of trade against the United Kingdom, the value of imports exceeding that of exports by 2425 millions, or 72 millions sterling per annum. The countries from which we had the largest excess of imports are seen in the following table:—

| From                        | Surplus Imports, Millions £ |         |       |
|-----------------------------|-----------------------------|---------|-------|
|                             | 1854-80                     | 1881-87 | Total |
| United States . . . . .     | 694                         | 373     | 1,067 |
| Russia . . . . .            | 244                         | 67      | 311   |
| France . . . . .            | 226                         | 84      | 310   |
| Egypt . . . . .             | 204                         | 39      | 243   |
| India . . . . .             | 212                         | 18      | 230   |
| China and Japan . . . . .   | 164                         | 12      | 176   |
| Sweden and Norway . . . . . | 93                          | 41      | 134   |
| Spain . . . . .             | 82                          | 40      | 122   |
| West Indies . . . . .       | 101                         | 10      | 111   |
| Other countries . . . . .   | 287                         | 137     | 424   |
| Total . . . . .             | 2,307                       | 821     | 3,128 |

At the same time there were twelve countries which showed a balance of trade in favour of Great Britain, the excess of our exports thither being as follows:—

| To                        | Surplus Exports, Millions £ |         |       |
|---------------------------|-----------------------------|---------|-------|
|                           | 1854-80                     | 1881-87 | Total |
| Germany . . . . .         | 244                         | 31      | 275   |
| Italy . . . . .           | 54                          | 32      | 86    |

#### IRELAND

Dobbs gives returns for the 17th century ; the rest are from Blue-books :—

| Date              | Imports, £ | Exports, £ | Total, £   |
|-------------------|------------|------------|------------|
| 1665 . . . . .    | 336,000    | 358,000    | 694,000    |
| 1681 . . . . .    | 433,000    | 583,000    | 1,016,000  |
| 1695 . . . . .    | 392,000    | 296,000    | 688,000    |
| 1698 . . . . .    | 577,000    | 996,000    | 1,573,000  |
| 1725 . . . . .    | 1,000,000  | 1,400,000  | 2,400,000  |
| 1750-52 . . . . . | 1,900,000  | 1,600,000  | 3,500,000  |
| 1760-62 . . . . . | 2,300,000  | 1,700,000  | 4,000,000  |
| 1770-72 . . . . . | 3,300,000  | 2,400,000  | 5,700,000  |
| 1780-82 . . . . . | 3,100,000  | 2,700,000  | 5,800,000  |
| 1790-92 . . . . . | 5,100,000  | 4,100,000  | 9,200,000  |
| 1800-2 . . . . .  | 4,100,000  | 5,600,000  | 9,700,000  |
| 1810 . . . . .    | 6,500,000  | 5,300,000  | 11,800,000 |
| 1820 . . . . .    | 6,000,000  | 6,300,000  | 12,300,000 |
| 1826 . . . . .    | 7,500,000  | 8,500,000  | 16,000,000 |

Since 1826 no separate tables of Irish trade have been kept. In 1725 the exports were as follows :—

|                   |           |
|-------------------|-----------|
| Meat . . . . .    | £ 860,000 |
| Linen . . . . .   | 470,000   |
| Grain &c. . . . . | 70,000    |
|                   | 1,400,000 |

\* This table is exclusive of colonial merchandise.

In the years 1796 to 1799 the annual average was as follows :—

| From                | Imports, £ | To                  | Exports, £ |
|---------------------|------------|---------------------|------------|
| Great Britain . .   | 4,010,000  | Great Britain . .   | 4,970,000  |
| Other countries . . | 1,270,000  | Other countries . . | 810,000    |
| Total . . . . .     | 5,280,000  | Total . . . . .     | 5,780,000  |

The trade between Great Britain and Ireland in the same year was :—

|                    | Imported from Great Britain |                  | Exported to Great Britain |
|--------------------|-----------------------------|------------------|---------------------------|
| Woollens . . . .   | £ 690,000                   | Linen . . . .    | £ 2,490,000               |
| Coal . . . . .     | 160,000                     | Meat . . . .     | 870,000                   |
| Cottons and silk . | 130,000                     | Butter . . . .   | 740,000                   |
| Iron and steel . . | 120,000                     | Wheat . . . .    | 440,000                   |
| Fish . . . . .     | 100,000                     | Cattle . . . .   | 140,000                   |
| Sundries . . . . . | 2,810,000                   | Sundries . . . . | 290,000                   |
| Total . . . . .    | 4,010,000                   | Total . . . . .  | 4,970,000                 |

#### FRANCE

Official returns date continuously from 1716, yearly averages being as follows :—

| Period    | Imports     | Exports     | Total       | Per Inhabitant |
|-----------|-------------|-------------|-------------|----------------|
|           | £           | £           | £           | £ s. d.        |
| 1716-20   | 2,600,000   | 4,200,000   | 6,800,000   | 0 7 0          |
| 1721-30   | 3,200,000   | 4,600,000   | 7,800,000   | 0 7 6          |
| 1731-40   | 3,600,000   | 5,200,000   | 8,800,000   | 0 8 0          |
| 1741-50   | 4,100,000   | 7,700,000   | 11,800,000  | 0 10 6         |
| 1751-60   | 5,800,000   | 9,200,000   | 15,000,000  | 0 12 6         |
| 1761-70   | 6,600,000   | 12,400,000  | 19,000,000  | 0 16 0         |
| 1771-80   | 8,300,000   | 10,400,000  | 18,700,000  | 0 15 0         |
| 1781-90   | 12,100,000  | 14,200,000  | 26,300,000  | 1 1 0          |
| 1791-1800 | 17,000,000  | 14,500,000  | 31,500,000  | 1 3 0          |
| 1801-10   | 16,300,000  | 14,400,000  | 30,700,000  | 1 1 0          |
| 1811-20   | 11,300,000  | 16,100,000  | 27,400,000  | 0 18 0         |
| 1821-30   | 20,600,000  | 20,900,000  | 41,500,000  | 1 6 0          |
| 1831-40   | 28,500,000  | 30,700,000  | 59,200,000  | 1 16 0         |
| 1841-50   | 33,000,000  | 40,500,000  | 73,500,000  | 2 2 0          |
| 1851-60   | 62,000,000  | 65,000,000  | 127,000,000 | 3 10 0         |
| 1861-70   | 110,000,000 | 110,000,000 | 220,000,000 | 6 0 0          |
| 1871-80   | 157,000,000 | 140,000,000 | 297,000,000 | 8 0 0          |
| 1881-86   | 181,000,000 | 134,000,000 | 315,000,000 | 8 6 0          |
| 1889      | 167,000,000 | 144,300,000 | 311,300,000 | 8 3 0          |

The trade returns of 1800 showed thus :—

|                    | Imports, £ |                  | Exports, £ |
|--------------------|------------|------------------|------------|
| Coffee . . . . .   | 1,500,000  | Wine . . . . .   | 2,000,000  |
| Raw cotton . . .   | 1,400,000  | Silks . . . . .  | 1,600,000  |
| Sundries . . . . . | 10,100,000 | Sundries . . . . | 7,200,000  |
| Total . . . . .    | 13,000,000 | Total . . . . .  | 10,800,000 |

The weight of merchandise imported and exported yearly averaged thus :—

| Period          | Imports, Tons | Exports, Tons | Total, Tons |
|-----------------|---------------|---------------|-------------|
| 1857-66 . . . . | 9,200,000     | 2,400,000     | 11,600,000  |
| 1867-76 . . . . | 12,800,000    | 4,300,000     | 17,100,000  |
| 1877-89 . . . . | 20,400,000    | 4,600,000     | 25,000,000  |

The statement of French trade for ten years ending 1886 shows thus :—

|                         | Millions £ Sterling |            |             |       |
|-------------------------|---------------------|------------|-------------|-------|
|                         | Imports from        | Exports to | Gross Trade | Ratio |
| Great Britain . . . .   | 248                 | 358        | 606         | 19.4  |
| Belgium . . . . .       | 178                 | 179        | 357         | 11.4  |

| Cotton . . . . .        | 9,200,000   | 6,400,000   | 7,900,000        | 7,400,000   |
| Timber . . . . .        | 8,100,000   | 5,800,000   | 8,400,000        | 6,200,000   |
| Coal . . . . .          | 6,900,000   | 5,000,000   | 6,300,000        | 5,400,000   |
| Cattle and meat . . . . | 7,400,000   | 6,400,000   | 8,600,000        | 4,800,000   |
| Fruit and seeds . . . . | 5,900,000   | 11,600,000  | 9,600,000        | 8,400,000   |
| Coffee . . . . .        | 4,300,000   | 4,100,000   | 3,800,000        | 5,100,000   |
| Flax . . . . .          | 2,000,000   | 2,200,000   | 2,600,000        | 2,400,000   |
| Sundries . . . . .      | 65,390,000  | 61,500,000  | 69,700,000       | 62,100,000  |
| Total . . . . .         | 159,500,000 | 168,300,000 | 178,500,000      | 167,000,000 |

The exports according to quantity were as follows :—

|                             | 1876    | 1886    | 1877-86   |
|-----------------------------|---------|---------|-----------|
| Wines, million gallons . .  | 84      | 64      | 640       |
| Wool, million lbs. . . . .  | 46      | 108     | 730       |
| Grain, million bushels . .  | 23      | 7       | 120       |
| Cheese and butter, tons . . | 43,000  | 34,000  | 370,000   |
| Eggs, tons . . . . .        | 33,000  | 21,000  | 220,000   |
| Fruit . . . . .             | 44,000  | 64,000  | 520,000   |
| Hides . . . . .             | 24,000  | 35,000  | 340,000   |
| Sugar . . . . .             | 230,000 | 140,000 | 1,520,000 |
| Raw cotton, million lbs. .  | 120     | 56      | 770       |

The net imports averaged for ten years, 1877-86, as follows :—

|                           | Quantity    | Value, £ Sterling |
|---------------------------|-------------|-------------------|
| Wines, gallons . . . . .  | 79,000,000  | 6,400,000         |
| Wool, lbs. . . . .        | 257,000,000 | 8,700,000         |
| Grain, bushels . . . . .  | 65,000,000  | 15,700,000        |
| Silk, raw, lbs. . . . .   | 13,000,000  | 6,000,000         |
| Hides, tons . . . . .     | 38,000      | 4,000,000         |
| Raw cotton, lbs. . . . .  | 233,000,000 | 5,800,000         |
| Timber . . . . .          | ...         | 7,200,000         |
| Coal, tons . . . . .      | 9,200,000   | 6,300,000         |
| Cattle and meat . . . . . | ...         | 7,400,000         |
| Fruit and seeds, tons . . | 610,000     | 8,100,000         |
| Coffee, tons . . . . .    | 62,000      | 3,800,000         |
| Sundries . . . . .        | ...         | 72,300,000        |
| Total . . . . .           | ...         | 151,700,000       |

The French coasting trade in 1889 was 2,360,000 tons.

#### ALGERIA

Trade returns show as follows for 1888 :—

| From                    | Imports, £ | To                      | Exports, £ | Total Trade, £ |
|-------------------------|------------|-------------------------|------------|----------------|
| France . . . . .        | 7,200,000  | France . . . . .        | 6,600,000  | 13,800,000     |
| Other countries . . . . | 2,200,000  | Other countries . . . . | 1,300,000  | 3,500,000      |
| Total . . . . .         | 9,400,000  | Total . . . . .         | 7,900,000  | 17,300,000     |

| Imports, £         |           | Exports, £     |           |
|--------------------|-----------|----------------|-----------|
| Cotton goods . . . | 1,100,000 | Grain . . .    | 1,300,000 |
| Leather . . .      | 600,000   | Wine . . .     | 1,700,000 |
| Hardware . . .     | 300,000   | Cattle . . .   | 1,400,000 |
| Haberdashery . . . | 300,000   | Wool . . .     | 800,000   |
| Sundries . . .     | 7,100,000 | Sundries . . . | 2,700,000 |
| Total . . .        | 9,400,000 | Total . . .    | 7,900,000 |

The trade with Great Britain, imports and exports, reaches £900,000.

## GERMANY

The *Répertoire Générale* gives the trade for 1822 as follows:—

|                      | Imports, £ | Exports, £ | Total, £   |
|----------------------|------------|------------|------------|
| Prussia . . . . .    | 13,100,000 | 14,200,000 | 27,300,000 |
| Other states . . . . | 6,400,000  | 6,500,000  | 12,900,000 |
| Total . . . . .      | 19,500,000 | 20,700,000 | 40,200,000 |

In 1850, according to Levi's estimate, the total trade was:—

|         |              |
|---------|--------------|
| Imports | £ 22,000,000 |
| Exports | 20,000,000   |
| Total   | 42,000,000   |

This was much below the reality. We know that the trade of the Zollverein in 1856 reached 106 millions sterling, and the increase of six years could hardly have exceeded 50 per cent. The trade seems to have been as follows:—

| Year           | Millions £ Sterling |         |       | Per Inhabitant    |
|----------------|---------------------|---------|-------|-------------------|
|                | Imports             | Exports | Total |                   |
| 1822 . . . . . | 19                  | 21      | 40    | £ s. d.<br>1 10 0 |
| 1840 . . . . . | 25                  | 27      | 52    | 1 14 0            |
| 1850 . . . . . | 34                  | 36      | 70    | 2 2 0             |
| 1872 . . . . . | 163                 | 116     | 279   | 7 0 0             |
| 1880 . . . . . | 142                 | 152     | 294   | 6 11 0            |
| 1888 . . . . . | 172                 | 168     | 340   | 7 4 0             |
| 1889 . . . . . | 204                 | 163     | 367   | 7 16 0            |

The statement for German trade for seven years ending 1886 was as follows:—

|                       | Millions £ Sterling |            |             | Ratio |
|-----------------------|---------------------|------------|-------------|-------|
|                       | Imports from        | Exports to | Gross Trade |       |
| Great Britain . . .   | 151                 | 167        | 318         | 14.9  |
| Austria . . . . .     | 151                 | 107        | 258         | 12.1  |
| Russia . . . . .      | 125                 | 61         | 186         | 8.7   |
| Belgium . . . . .     | 89                  | 57         | 146         | 6.8   |
| France . . . . .      | 84                  | 101        | 185         | 8.7   |
| Holland . . . . .     | 81                  | 83         | 164         | 7.7   |
| Switzerland . . . .   | 55                  | 58         | 113         | 5.3   |
| United States . . .   | 48                  | 61         | 109         | 5.1   |
| Italy . . . . .       | 25                  | 26         | 51          | 2.5   |
| Other countries . . . | 254                 | 348        | 602         | 28.2  |
| Total . . . . .       | 1,063               | 1,069      | 2,132       | 100.0 |

There is not much difference between the total value of imports and that of exports. The trade with Russia and Austria, however, shows a heavy excess of imports, which is counterbalanced by a surplus of exports to Great Britain, France, United States, and other countries.

The principal articles of import were as follows:—

|                     | 1876        | 1886        | 1877-86, Ten Years | Net Import |
|---------------------|-------------|-------------|--------------------|------------|
|                     | £           | £           | Mill. £            | Mill. £    |
| Grain . . . . .     | 29,800,000  | 10,300,000  | 222                | 133        |
| Wool . . . . .      | 10,400,000  | 10,900,000  | 104                | 78         |
| Cotton . . . . .    | 10,200,000  | 8,800,000   | 93                 | 78         |
| Coffee . . . . .    | 9,600,000   | 6,900,000   | 73                 | 73         |
| Cattle . . . . .    | 8,000,000   | 4,700,000   | 63                 | 6          |
| Hides . . . . .     | 3,900,000   | 4,600,000   | 44                 | 44         |
| Horses . . . . .    | 3,500,000   | 3,500,000   | 28                 | 16         |
| Petroleum . . . . . | 5,200,000   | 2,800,000   | 31                 | 28         |
| Silk, raw . . . . . | 6,600,000   | 7,500,000   | 60                 | 60         |
| Tobacco . . . . .   | 4,100,000   | 3,200,000   | 33                 | 29         |
| Yarn . . . . .      | 8,500,000   | 8,100,000   | 69                 | 40         |
| Wine . . . . .      | 2,900,000   | 1,700,000   | 24                 | 24         |
| Sundries . . . . .  | 87,400,000  | 71,400,000  | 772                | 772        |
| Total . . . . .     | 190,100,000 | 144,400,000 | 1,616              | 1,381      |

The principal exports were:—

|                        | 1876        | 1886        | 1877-86, Ten Years |
|------------------------|-------------|-------------|--------------------|
|                        | £           | £           | Mill. £            |
| Woollen fabrics . . .  | 6,300,000   | 8,600,000   | 81                 |
| Silk fabrics . . . . . | 2,800,000   | 9,000,000   | 71                 |
| Cotton fabrics . . . . | 1,900,000   | 4,900,000   | 33                 |
| Sugar . . . . .        | 1,900,000   | 7,100,000   | 64                 |
| Leather goods . . . .  | 3,400,000   | 7,600,000   | 56                 |
| Iron and machinery . . | 5,500,000   | 7,500,000   | 80                 |
| Cattle . . . . .       | 7,000,000   | 4,200,000   | 57                 |
| Yarn . . . . .         | 2,700,000   | 3,100,000   | 29                 |
| Paper . . . . .        | 800,000     | 2,500,000   | 18                 |
| Grain . . . . .        | 11,100,000  | 3,100,000   | 89                 |
| Coal . . . . .         | 1,600,000   | 4,000,000   | 28                 |
| Wool . . . . .         | 3,300,000   | 2,000,000   | 26                 |
| Sundries . . . . .     | 79,100,000  | 85,700,000  | 859                |
| Total . . . . .        | 127,400,000 | 149,300,000 | 1,491              |

The trade returns for 1888 were as follows:—

|                     | Imports, £  | Exports, £                     |
|---------------------|-------------|--------------------------------|
| Textiles . . . . .  | 51,300,000  | Textiles . . . . . 53,800,000  |

The principal exports of European Russia were as follows:—

|                 | 1876       | 1886       | 1877-86, Ten Years, Millions Sterling |
|-----------------|------------|------------|---------------------------------------|
|                 | £          | £          | £                                     |
| Wheat . . .     | 14,000,000 | 9,700,000  | 162                                   |
| Rye . . .       | 7,600,000  | 4,800,000  | 74                                    |
| Oats . . .      | 3,300,000  | 2,600,000  | 45                                    |
| Barley, &c. . . | 2,200,000  | 4,600,000  | 42                                    |
| All grain . . . | 27,100,000 | 21,700,000 | 323                                   |
| Flax . . .      | 5,100,000  | 4,300,000  | 70                                    |
| Hemp . . .      | 1,200,000  | 1,200,000  | 18                                    |
| Linseed . . .   | 3,200,000  | 1,500,000  | 31                                    |
| Timber . . .    | 4,100,000  | 2,000,000  | 33                                    |
| Wool . . .      | 1,600,000  | 2,100,000  | 15                                    |
| Cattle . . .    | 1,600,000  | 900,000    | 13                                    |
| Sundries . . .  | 6,800,000  | 10,000,000 | 87                                    |
| Total . . .     | 50,700,000 | 43,700,000 | 590                                   |

Exports of the whole Russian Empire at various dates were officially valued thus:—

| Year       | Grain, £   | Sundries, £ | Total, £   |
|------------|------------|-------------|------------|
| 1830 . . . | 3,000,000  | 9,400,000   | 12,400,000 |
| 1840 . . . | 5,800,000  | 10,900,000  | 16,700,000 |
| 1860 . . . | 10,400,000 | 15,800,000  | 26,200,000 |
| 1870 . . . | 24,400,000 | 29,900,000  | 54,300,000 |
| 1880 . . . | 26,600,000 | 31,600,000  | 58,200,000 |
| 1886 . . . | 21,700,000 | 27,100,000  | 48,800,000 |

Official returns, allowing for discount on paper-money at various periods, may be summed up since 1742 thus:—

| Date    | Imports    | Exports    | Total       | Per Inhabitant |
|---------|------------|------------|-------------|----------------|
|         | £          | £          | £           | £ s. d.        |
| 1742    | 3,600,000  | 4,700,000  | 8,300,000   | 0 8 0          |
| 1750    | 6,900,000  | 7,200,000  | 14,100,000  | 0 13 0         |
| 1760    | 7,400,000  | 9,900,000  | 17,300,000  | 0 15 0         |
| 1770    | 11,400,000 | 15,000,000 | 26,400,000  | 1 2 0          |
| 1780    | 15,500,000 | 19,700,000 | 35,200,000  | 1 7 0          |
| 1790    | 20,800,000 | 21,800,000 | 42,600,000  | 1 10 0         |
| 1802    | 14,100,000 | 15,800,000 | 29,900,000  | 0 16 0         |
| 1820-39 | 10,500,000 | 12,000,000 | 22,500,000  | 0 10 0         |
| 1840    | 11,200,000 | 15,200,000 | 26,400,000  | 0 11 0         |
| 1841-49 | 15,000,000 | 18,000,000 | 33,000,000  | 0 12 0         |
| 1850-59 | 21,000,000 | 23,000,000 | 44,000,000  | 0 15 0         |
| 1860    | 21,500,000 | 26,200,000 | 47,700,000  | 0 15 0         |
| 1870    | 48,900,000 | 54,300,000 | 103,200,000 | 1 6 0          |
| 1880    | 72,600,000 | 58,200,000 | 130,800,000 | 1 11 0         |
| 1886    | 42,700,000 | 48,800,000 | 91,500,000  | 1 1 0          |
| 1888    | 39,100,000 | 79,400,000 | 118,500,000 | 1 7 0          |

The principal exports of Austria-Hungary were:—

|                     | 1860       | 1870       | 1880       | 1886       | Million £, 1877-86 |
|---------------------|------------|------------|------------|------------|--------------------|
|                     | £          | £          | £          | £          | £                  |
| Timber . . .        | 1,600,000  | 2,400,000  | 3,700,000  | 4,200,000  | 42                 |
| Grain . . .         | 2,000,000  | 5,200,000  | 6,700,000  | 6,300,000  | 81                 |
| Fancy goods . . .   | 1,800,000  | 4,400,000  | 4,300,000  | 5,200,000  | 56                 |
| Cattle . . .        | 800,000    | 1,000,000  | 3,000,000  | 3,300,000  | 37                 |

| Textile goods . . . | 3,100,000  | 4,200,000  | 4,200,000  | 4,400,000  | 44                 |
| Sugar . . .         | ...        | ...        | 4,900,000  | 4,000,000  | 47                 |
| Sundries . . .      | 16,100,000 | 20,900,000 | 28,000,000 | 28,700,000 | 259                |
| Total . . .         | 26,500,000 | 39,500,000 | 56,300,000 | 58,200,000 | 583                |

The statement for ten years ending 1886 shows as follows:—

|                         | Millions £ Sterling |            |             | Ratio |
|-------------------------|---------------------|------------|-------------|-------|
|                         | Imports from        | Exports to | Gross Trade |       |
| Germany . . .           | 201                 | 165        | 366         | 36.2  |
| Great Britain . . .     | 123                 | 169        | 292         | 28.9  |
| Austria . . .           | 23                  | 31         | 54          | 5.3   |
| France . . .            | 18                  | 48         | 66          | 6.5   |
| Turkey . . .            | 14                  | 10         | 24          | 2.4   |
| Italy . . .             | 9                   | 12         | 21          | 2.1   |
| Holland . . .           | 6                   | 36         | 42          | 4.1   |
| Sweden and Norway . . . | 4                   | 16         | 20          | 2.0   |
| Other countries . . .   | 79                  | 49         | 128         | 12.5  |
| Total . . .             | 477                 | 536        | 1,013       | 100.0 |

The exports of grain since 1867 averaged in quantity as follows:—

|                | Millions of Bushels |         |      |      |
|----------------|---------------------|---------|------|------|
|                | 1867-76             | 1877-86 | 1887 | 1888 |
| Wheat . . .    | 50                  | 67      | 75   | 122  |
| Oats . . .     | 20                  | 46      | 59   | 85   |
| Rye . . .      | 27                  | 46      | 50   | 68   |
| Barley . . .   | 6                   | 20      | 34   | 58   |
| Maize, &c. . . | 7                   | 16      | 28   | 34   |
| Total . . .    | 110                 | 195     | 246  | 367  |

The trade returns for European Russia in 1888 may be summed up thus:—

|                  | Imports, £ | Exports, £                      |
|------------------|------------|---------------------------------|
| Raw cotton . . . | 6,800,000  | Grain . . . 42,200,000          |
| Wool . . .       | 2,500,000  | Flax . . . 6,700,000            |
| Tea . . .        | 1,600,000  | Seeds . . . 3,800,000           |
| Machinery . . .  | 1,600,000  | Timber . . . 3,800,000          |
| Iron wares . . . | 1,500,000  | Hemp . . . 1,700,000            |
| Coal . . .       | 1,300,000  | Butter and eggs . . . 1,500,000 |
| Sundries . . .   | 17,900,000 | Sundries . . . 13,000,000       |
| Total . . .      | 33,200,000 | Total . . . 72,700,000          |

#### AUSTRIA-HUNGARY

The following are the official returns:—

| Year | Imports    | Exports    | Total       | Per Inhab. |
|------|------------|------------|-------------|------------|
|      | £          | £          | £           | £ s. d.    |

Trade returns for 1887 may be summed up thus :—

|                             | Imports, £ |                    | Exports, £ |
|-----------------------------|------------|--------------------|------------|
| Cotton . . . . .            | 4,700,000  | Grain . . . . .    | 7,800,000  |
| Wool . . . . .              | 3,600,000  | Timber . . . . .   | 4,600,000  |
| Coffee . . . . .            | 2,800,000  | Sugar . . . . .    | 3,700,000  |
| Silk . . . . .              | 1,600,000  | Hardware . . . . . | 3,000,000  |
| Tobacco . . . . .           | 1,500,000  | Woolens . . . . .  | 2,100,000  |
| Waxes . . . . .             | 2,600,000  | Cattle . . . . .   | 2,200,000  |
| Hides and leather . . . . . | 2,700,000  | Glass . . . . .    | 1,700,000  |
| Sundries . . . . .          | 27,900,000 | Sundries . . . . . | 31,000,000 |
| Total . . . . .             | 47,400,000 | Total . . . . .    | 56,100,000 |

|                         | Imports from | Exports to | Total Trade |
|-------------------------|--------------|------------|-------------|
|                         | £            | £          | £           |
| Germany . . . . .       | 30,200,000   | 33,300,000 | 63,500,000  |
| Russia . . . . .        | 2,100,000    | 1,500,000  | 3,600,000   |
| Great Britain . . . . . | 1,600,000    | 900,000    | 2,500,000   |
| Servia . . . . .        | 1,200,000    | 1,000,000  | 2,200,000   |
| Various . . . . .       | 12,300,000   | 19,400,000 | 31,700,000  |
| Total . . . . .         | 47,400,000   | 56,100,000 | 103,500,000 |

The above includes the total foreign trade of both Austria and Hungary, in which only a small portion seems to fall to Hungary, since the returns for that kingdom for 1888, including trade with Austria, show :—

|                             | Imports from | Exports to | Total Trade |
|-----------------------------|--------------|------------|-------------|
|                             | £            | £          | £           |
| Austria . . . . .           | 32,400,000   | 25,800,000 | 58,200,000  |
| Foreign countries . . . . . | 6,300,000    | 11,400,000 | 17,700,000  |
| Total . . . . .             | 38,700,000   | 37,200,000 | 75,900,000  |

Hungary exported grain worth £14,000,000 and cattle £5,000,000: her imports included textiles worth £16,600,000 sterling.

## ITALY

The trade of Genoa increased 80 per cent. from 1835 to 1867.\* If we suppose a similar increase for Italy, the trade of the kingdom would have been 35 millions sterling in the former year, but it was doubtless much below that figure. Levi's estimate for 1850 was only 11 millions for imports, and 8 millions for exports, which was certainly too low. We have regular statistics from 1861 :—

| Year           | Million £ Sterling |         |       | Per Inhabitant   |
|----------------|--------------------|---------|-------|------------------|
|                | Imports            | Exports | Total |                  |
| 1835 . . . . . | 13                 | 11      | 24    | £ s. d.<br>1 7 0 |
| 1850 . . . . . | 23                 | 15      | 38    | 1 18 0           |
| 1861 . . . . . | 33                 | 19      | 52    | 2 7 0            |
| 1870 . . . . . | 36                 | 30      | 66    | 2 13 0           |
| 1880 . . . . . | 47                 | 44      | 91    | 3 3 0            |
| 1886 . . . . . | 58                 | 41      | 99    | 3 6 0            |
| 1889 . . . . . | 56                 | 38      | 94    | 3 3 0            |

The aggregate for ten years, 1877-86, was :—

|                           | Millions £ Sterling |             |             | Ratio |
|---------------------------|---------------------|-------------|-------------|-------|
|                           | Imported from       | Exported to | Gross Trade |       |
| France . . . . .          | 136                 | 194         | 330         | 34.0  |
| Great Britain . . . . .   | 116                 | 36          | 152         | 15.6  |
| Austria . . . . .         | 84                  | 58          | 142         | 14.4  |
| Germany . . . . .         | 33                  | 27          | 60          | 6.2   |
| Switzerland . . . . .     | 21                  | 44          | 65          | 6.7   |
| Russia . . . . .          | 24                  | 9           | 33          | 3.4   |
| United States . . . . .   | 24                  | 20          | 44          | 4.5   |
| India . . . . .           | 27                  | 8           | 35          | 3.6   |
| Other countries . . . . . | 62                  | 48          | 110         | 11.6  |
| Total . . . . .           | 527                 | 444         | 971         | 100.0 |

This table includes bullion both ways.

\* From £8,200,000 to £14,400,000.

| Imports of Italy        | 1862       | 1870       | 1880       | 1886       | 1877-86,<br>Millions Sterling | Net Imports,<br>Millions Sterling |
|-------------------------|------------|------------|------------|------------|-------------------------------|-----------------------------------|

| Cattle . . . . .   | 500,000    | 900,000    | 1,200,000  | 700,000    | 13                         |
| Hemp . . . . .     | 400,000    | 800,000    | 900,000    | 1,000,000  | 11                         |
| Sulphur . . . . .  | 1,200,000  | 1,000,000  | 1,300,000  | 1,000,000  | 12                         |
| Sundries . . . . . | 8,540,000  | 13,340,000 | 20,300,000 | 16,400,000 | 190                        |
| Total . . . . .    | 23,100,000 | 30,200,000 | 44,100,000 | 40,800,000 | 426                        |

The trade of 1888 may be summed up thus :—

|                     | Imports, £ |                    | Exports, £ |
|---------------------|------------|--------------------|------------|
| Grain . . . . .     | 5,900,000  | Silk . . . . .     | 11,600,000 |
| Coal . . . . .      | 3,600,000  | Oil . . . . .      | 2,500,000  |
| Cotton . . . . .    | 3,400,000  | Wine . . . . .     | 2,200,000  |
| Textiles . . . . .  | 2,500,000  | Fruit . . . . .    | 1,700,000  |
| Machinery . . . . . | 1,600,000  | Hemp . . . . .     | 1,100,000  |
| Timber . . . . .    | 1,200,000  | Sulphur . . . . .  | 900,000    |
| Sundries . . . . .  | 28,800,000 | Sundries . . . . . | 15,600,000 |
| Total . . . . .     | 47,000,000 | Total . . . . .    | 35,600,000 |

#### SPAIN

The official returns show as follows :—

| Year | Imports    | Exports    | Total      | Per Inhabitant |
|------|------------|------------|------------|----------------|
|      | £          | £          | £          | £ s. d.        |
| 1795 | 8,800,000  | 4,800,000  | 13,600,000 | 1 7 0          |
| 1827 | 3,800,000  | 2,900,000  | 6,700,000  | 0 12 0         |
| 1850 | 5,900,000  | 4,800,000  | 10,700,000 | 0 15 0         |
| 1860 | 14,500,000 | 10,700,000 | 25,200,000 | 1 11 0         |
| 1872 | 21,100,000 | 20,100,000 | 41,200,000 | 2 11 0         |
| 1880 | 24,900,000 | 25,500,000 | 50,400,000 | 3 3 0          |
| 1885 | 29,500,000 | 27,500,000 | 57,000,000 | 3 7 0          |
| 1888 | 28,600,000 | 30,500,000 | 59,100,000 | 3 8 0          |

The exports of 1795 were as follows :—

|                    |           |
|--------------------|-----------|
|                    | £         |
| Wool . . . . .     | 1,500,000 |
| Wine . . . . .     | 1,600,000 |
| Sundries . . . . . | 1,700,000 |
| Total . . . . .    | 4,800,000 |

The statement for ten years ending December 1885 showed as follows :—

|                           | Million £ Sterling |            |             |       |
|---------------------------|--------------------|------------|-------------|-------|
|                           | Imports from       | Exports to | Gross Trade | Ratio |
| France . . . . .          | 78                 | 85         | 163         | 31.3  |
| Great Britain . . . . .   | 61                 | 77         | 138         | 26.6  |
| Germany . . . . .         | 20                 | 3          | 23          | 4.4   |
| United States . . . . .   | 33                 | 7          | 40          | 7.7   |
| Cuba . . . . .            | 11                 | 25         | 36          | 7.0   |
| Other countries . . . . . | 72                 | 47         | 119         | 23.0  |
| Total . . . . .           | 275                | 244        | 519         | 100.0 |

The above table includes bullion both ways. Notwithstanding heavy import duties, the imports surpassed exports. In 1888, however, there was a surplus of exports.

The imports were as follows :—

|                     | 1860       | 1872       | 1880       | 1885       | 1876-85, Millions Sterling | Net Imports, Millions Sterling |
|---------------------|------------|------------|------------|------------|----------------------------|--------------------------------|

| Total . . . . .     | 14,500,000 | 21,100,000 | 24,900,000 | 29,500,000 | 260                        | ...                            |

The above is of merchandise only, excluding bullion. The exports were as follows :—

|                    | 1860       | 1872       | 1880       | 1885       | 1876-85, Millions Sterling |
|--------------------|------------|------------|------------|------------|----------------------------|
|                    | £          | £          | £          | £          | £                          |
| Wine . . . . .     | 3,200,000  | 6,800,000  | 10,000,000 | 12,600,000 | 92                         |
| Minerals . . . . . | ...        | 3,600,000  | 6,400,000  | 4,800,000  | 53                         |
| Fruit . . . . .    | ...        | 2,100,000  | 1,600,000  | 1,900,000  | 19                         |
| Oil . . . . .      | 200,000    | 600,000    | 500,000    | 1,600,000  | 7                          |
| Sundries . . . . . | 7,300,000  | 7,000,000  | 7,000,000  | 6,600,000  | 70                         |
| Total . . . . .    | 10,700,000 | 20,100,000 | 25,500,000 | 27,500,000 | 241                        |

The trade of 1888 may be summed up thus :—

|                                      | Imports, £ |                                     | Exports, £ |
|--------------------------------------|------------|-------------------------------------|------------|
| Cotton . . .                         | 2,300,000  | Wine . . .                          | 12,100,000 |
| Grain . . .                          | 2,400,000  | Metals and minerals }<br>Cork . . . | 6,800,000  |
| Coal . . .                           | 1,200,000  | Fruit . . .                         | 2,300,000  |
| Textiles . . .                       | 2,000,000  | Cattle . . .                        | 800,000    |
| Machinery and iron }<br>Timber . . . | 1,600,000  | Wool . . .                          | 700,000    |
| Sugar . . .                          | 1,200,000  | Oil . . .                           | 600,000    |
| Sundries . . .                       | 16,700,000 | Sundries . . .                      | 400,000    |
| Total . . .                          | 28,600,000 | Total . . .                         | 6,800,000  |
|                                      |            |                                     | 30,500,000 |

## PORTUGAL

Official returns are as follows :—

| Year | Imports    | Exports   | Total      | Per Inhabitant |
|------|------------|-----------|------------|----------------|
|      | £          | £         | £          | £ s. d.        |
| 1806 | 7,100,000  | 7,600,000 | 14,700,000 | 4 15 0         |
| 1842 | 2,400,000  | 1,700,000 | 4,100,000  | 1 4 0          |
| 1850 | 3,100,000  | 2,200,000 | 5,300,000  | 1 9 0          |
| 1870 | 5,700,000  | 4,600,000 | 10,300,000 | 2 11 0         |
| 1880 | 7,900,000  | 5,600,000 | 13,500,000 | 3 1 0          |
| 1886 | 10,500,000 | 5,700,000 | 16,200,000 | 3 10 0         |
| 1888 | 10,600,000 | 7,200,000 | 17,800,000 | 4 0 0          |

The trade of 1806 was probably abnormally high on account of the war with Spain. There has been a steady increase since 1842.

The returns for imports are as follows :—

|                   | 1872      | 1880      | 1886       | 1877-86, Average |
|-------------------|-----------|-----------|------------|------------------|
|                   | £         | £         | £          | £                |
| Grain . . .       | 400,000   | 1,200,000 | 1,100,000  | 1,200,000        |
| Textile goods     | 1,500,000 | 1,200,000 | 1,400,000  | 1,300,000        |
| Cotton and wool } | 200,000   | 300,000   | 500,000    | 300,000          |
| Fish . . .        | 300,000   | 300,000   | 400,000    | 300,000          |
| Coal . . .        | 200,000   | 300,000   | 300,000    | 300,000          |
| Sundries . . .    | 3,900,000 | 6,800,000 | 6,800,000  | 4,700,000        |
| Total . . .       | 6,500,000 | 7,900,000 | 10,500,000 | 8,100,000        |

The exports were as follows :—

|                | 1872      | 1880      | 1886      | 1877-86   |
|----------------|-----------|-----------|-----------|-----------|
|                | £         | £         | £         | £         |
| Wine . . .     | 2,000,000 | 2,200,000 | 3,700,000 | 2,400,000 |
| Copper . . .   | 400,000   | 400,000   | ...       | 300,000   |
| Cork . . .     | 200,000   | 600,000   | 500,000   | 500,000   |
| Cattle . . .   | 300,000   | 400,000   | 200,000   | 400,000   |
| Fruit . . .    | 200,000   | 200,000   | 100,000   | 200,000   |
| Sundries . . . | 2,100,000 | 1,800,000 | 1,200,000 | 1,400,000 |
| Total . . .    | 5,200,000 | 5,600,000 | 5,700,000 | 5,200,000 |

The statement for ten years ending December 1882 was as follows :—

|                       | Millions £ Sterling |            |       | Ratio |
|-----------------------|---------------------|------------|-------|-------|
|                       | Imports from        | Exports to | Total |       |
| Great Britain . . .   | 34                  | 27         | 61    | 48.0  |
| France . . .          | 10                  | 4          | 14    | 11.0  |
| Spain . . .           | 5                   | 10         | 15    | 11.8  |
| United States . . .   | 7                   | 1          | 8     | 6.3   |
| Spain . . .           | 5                   | 3          | 8     | 6.3   |
| Other countries . . . | 15                  | 6          | 21    | 16.6  |
| Total . . .           | 76                  | 51         | 127   | 100.0 |

## SWEDEN

Official returns of merchandise are as follows :—

| Year    | Imports    | Exports    | Total      | Per Inhabitant |
|---------|------------|------------|------------|----------------|
|         | £          | £          | £          | £ s. d.        |
| 1801    | 1,400,000  | 1,000,000  | 2,400,000  | 1 1 0          |
| 1805    | 1,500,000  | 1,700,000  | 3,200,000  | 1 6 0          |
| 1831-40 | 1,300,000  | 1,600,000  | 2,900,000  | 1 1 0          |
| 1850    | 3,300,000  | 3,700,000  | 7,000,000  | 2 1 0          |
| 1860    | 4,400,000  | 4,800,000  | 9,200,000  | 2 8 0          |
| 1870    | 7,800,000  | 8,400,000  | 16,200,000 | 3 18 0         |
| 1880    | 15,100,000 | 13,100,000 | 28,200,000 | 6 5 0          |
| 1885    | 18,700,000 | 13,700,000 | 32,400,000 | 6 10 0         |
| 1887    | 16,300,000 | 13,500,000 | 29,800,000 | 6 0 0          |

A statement for ten years ending December 1885 shows thus :—

|                       | Millions £ Sterling |            |             | Ratio |
|-----------------------|---------------------|------------|-------------|-------|
|                       | Imports from        | Exports to | Gross Trade |       |
| Great Britain . . .   | 44                  | 63         | 107         | 37.2  |
| Germany . . .         | 40                  | 9          | 49          | 17.1  |
| Denmark . . .         | 28                  | 13         | 41          | 14.3  |
| Norway . . .          | 9                   | 4          | 13          | 4.5   |
| France . . .          | 4                   | 15         | 19          | 6.6   |
| Other countries . . . | 37                  | 21         | 58          | 20.3  |
| Total . . .           | 162                 | 125        | 287         | 100.0 |

The above table includes bullion both ways.

The imports were as follows of merchandise :—

|                           | 1875       | 1885       | 1876-85 | Net Imports |
|---------------------------|------------|------------|---------|-------------|
|                           | £          | £          | Mill. £ | Mill. £     |
| Textile goods . . .       | 1,500,000  | 2,000,000  | 16      | 15          |
| Grain . . .               | 1,100,000  | 2,000,000  | 16      | ...         |
| Cotton, wool, and yarns } | 1,100,000  | 1,300,000  | 11      | 11          |
| Coal . . .                | 800,000    | 900,000    | 8       | 8           |
| Sundries . . .            | 10,000,000 | 12,500,000 | 107     | ...         |
| Total . . .               | 14,500,000 | 18,700,000 | 158     | ...         |

The exports were as follows :—

|                | 1875       | 1885       | 1876-85   |
|----------------|------------|------------|-----------|
|                | £          | £          | Million £ |
| Timber . . .   | 4,700,000  | 5,100,000  | 50        |
| Iron . . .     | 2,100,000  | 1,900,000  | 17        |
| Grain . . .    | 1,800,000  | 1,500,000  | 18        |
| Butter . . .   | 400,000    | 1,100,000  | 6         |
| Sundries . . . | 2,300,000  | 4,100,000  | 30        |
| Total . . .    | 11,300,000 | 13,700,000 | 121       |

The trade of 1887 may be summed up thus :—

|                | Imports, £ |                 | Exports, £ |
|----------------|------------|-----------------|------------|
| Textiles . . . | 2,700,000  | Timber . . .    | 5,400,000  |
| Grain . . .    | 1,700,000  | Butter, &c. . . | 2,400,000  |
| Fibre . . .    | 1,600,000  | Metals . . .    | 1,800,000  |
| Coal . . .     | 1,200,000  | Hardware . . .  | 400,000    |
| Sundries . . . | 9,100,000  | Sundries . . .  | 3,500,000  |
| Total . . .    | 16,300,000 | Total . . .     | 13,500,000 |

## NORWAY

Previously to 1872 the value of exports was not recorded, but merely the quantities. The trade has been approximately as follows:—

| Year | Imports   | Exports   | Total      | Per Inhabitant |
|------|-----------|-----------|------------|----------------|
|      | £         | £         | £          | £ s. d.        |
| 1830 | 700,000   | 800,000   | 1,500,000  | 1 8 0          |
| 1850 | 1,600,000 | 1,800,000 | 3,400,000  | 2 9 0          |
| 1860 | 2,400,000 | 2,200,000 | 4,600,000  | 3 0 0          |
| 1872 | 7,600,000 | 5,800,000 | 13,400,000 | 7 10 0         |
| 1880 | 8,400,000 | 6,100,000 | 14,500,000 | 7 3 0          |
| 1888 | 8,800,000 | 6,800,000 | 15,600,000 | 7 15 0         |

The imports were as follows:—

|                   | 1876      | 1886      | 1877-86    |
|-------------------|-----------|-----------|------------|
|                   | £         | £         | Millions £ |
| Grain . . . . .   | 2,000,000 | 1,500,000 | 18         |
| Textile goods . . | 800,000   | 800,000   | 8          |
| Hardware . . . .  | 700,000   | 500,000   | 5          |
| Sundries . . . .  | 5,800,000 | 4,700,000 | 54         |
| Total . . . . .   | 9,300,000 | 7,500,000 | 85         |

The exports were as follows:—

|                  | 1876      | 1886      | 1877-86    |
|------------------|-----------|-----------|------------|
|                  | £         | £         | Millions £ |
| Timber . . . . . | 2,400,000 | 1,600,000 | 19         |
| Fish . . . . .   | 2,400,000 | 1,800,000 | 19         |
| Sundries . . . . | 1,800,000 | 2,300,000 | 22         |
| Total . . . . .  | 6,600,000 | 5,700,000 | 60         |

The statement for ten years ending December 1886 shows:—

|                   | Millions £ Sterling |            |             | Ratio |
|-------------------|---------------------|------------|-------------|-------|
|                   | Imports from        | Exports to | Gross Trade |       |
| Great Britain . . | 22                  | 20         | 42          | 29.0  |
| Germany . . . .   | 25                  | 8          | 33          | 22.7  |
| Sweden . . . . .  | 9                   | 7          | 16          | 11.0  |
| Other countries   | 29                  | 25         | 54          | 37.3  |
| Total . . . . .   | 85                  | 60         | 145         | 100.0 |

The trade of 1888 may be summed up thus:—

|                  | Imports, £ | Exports, £                   |
|------------------|------------|------------------------------|
| Grain . . . . .  | 1,700,000  | Fish . . . . . 2,300,000     |
| Textiles . . . . | 1,000,000  | Timber . . . . . 1,800,000   |
| Hardware . . . . | 700,000    | Metals and minerals 500,000  |
| Sundries . . . . | 5,400,000  | Sundries . . . . . 2,200,000 |
| Total . . . . .  | 8,800,000  | Total . . . . . 6,800,000    |

## DENMARK

Official returns show as follows:—

| Year | Imports    | Exports    | Gross Trade | Per Inhab. |
|------|------------|------------|-------------|------------|
|      | £          | £          | £           | £ s. d.    |
| 1789 | 950,000    | 1,020,000  | 1,970,000   | ...        |
| 1850 | 4,700,000  | 3,100,000  | 7,800,000   | 5 5 0      |
| 1872 | 10,800,000 | 8,100,000  | 18,900,000  | 10 8 0     |
| 1880 | 11,500,000 | 9,800,000  | 21,300,000  | 10 15 0    |
| 1888 | 15,200,000 | 10,700,000 | 25,900,000  | 13 0 0     |

The exports in 1836 were as follows:—

|                           | Quantity  | Value, £ |
|---------------------------|-----------|----------|
| Wheat, bushels . . .      | 800,000   | 150,000  |
| Barley and rye, bushels . | 2,300,000 | 250,000  |
| Butter, barrels . . .     | 70,000    | 400,000  |
| Cattle, No. . . . .       | 40,000    | 300,000  |
| Sundries . . . . .        | ...       | 860,000  |

Total . 1,960,000

The imports of merchandise in ten years ending 1885 were:—

|                      | 1875    | 1885    | 1876-85   |
|----------------------|---------|---------|-----------|
| Coal, tons . . . .   | 500,000 | 900,000 | 7,000,000 |
| Grain . . . . .      | 65,000  | 145,000 | 1,150,000 |
| Iron goods, tons . . | 50,000  | 55,000  | 510,000   |
| Oil . . . . .        | 8,000   | 19,000  | 16,000    |
| Salt . . . . .       | 25,000  | 25,000  | 240,000   |
| Sugar . . . . .      | 26,000  | 20,000  | 270,000   |

The exports of Denmark were:—

|                     | 1875    | 1885    | 1876-85   |
|---------------------|---------|---------|-----------|
| Grain, tons . . . . | 240,000 | 150,000 | 2,100,000 |
| Cattle, No. . . . . | 340,000 | 350,000 | 4,200,000 |
| Bacon, tons . . . . | 5,000   | 16,000  | 75,000    |
| Butter . . . . .    | 13,000  | 18,000  | 145,000   |

It will be observed that the exports of grain much exceeded the imports, the net export for ten years being one million tons, or 40 million bushels.

The countries trading with Denmark in the period of ten years ending December 1885 were:—

|                     | Million £ Sterling |            |       | Ratio |
|---------------------|--------------------|------------|-------|-------|
|                     | Imports from       | Exports to | Total |       |
| Germany . . . . .   | 49                 | 31         | 80    | 34.8  |
| Great Britain . . . | 30                 | 37         | 67    | 29.1  |
| Sweden . . . . .    | 16                 | 15         | 31    | 13.4  |
| Other countries . . | 38                 | 15         | 53    | 22.7  |
| Total . . . . .     | 133                | 98         | 231   | 100.0 |

The trade of 1888 may be summed up thus:—

| Imports                       | Exports                      |
|-------------------------------|------------------------------|
| Textiles . . . . . 2,200,000  | Butter and eggs . 5,100,000  |
| Grain . . . . . 1,600,000     | Cattle . . . . . 1,600,000   |
| Metals . . . . . 1,300,000    | Grain . . . . . 900,000      |
| Sundries . . . . . 10,100,000 | Sundries . . . . . 3,100,000 |
| Total . 15,200,000            | Total . 10,700,000           |

## HOLLAND

Official statements are as follows:—

| Year | Imports     | Exports    | Total       | Per Inhabitant |
|------|-------------|------------|-------------|----------------|
|      | £           | £          | £           | £ s. d.        |
| 1843 | 15,200,000  | 11,400,000 | 26,600,000  | 8 10 0         |
| 1850 | 22,000,000  | 18,000,000 | 40,000,000  | 11 5 0         |
| 1860 | 25,300,000  | 20,200,000 | 45,500,000  | 12 10 0        |
| 1870 | 38,800,000  | 31,800,000 | 70,600,000  | 18 10 0        |
| 1880 | 69,000,000  | 52,100,000 | 121,100,000 | 30 5 0         |
| 1888 | 106,000,000 | 92,900,000 | 198,900,000 | 45 0 0         |

More than half the trade is in a manner goods in transit, since we see that the net imports are less than half the gross imports.

The imports of Holland were as follows :—

|                           | 1861       | 1870       | 1880       | 1886       | 1877-86    | Net Import |
|---------------------------|------------|------------|------------|------------|------------|------------|
|                           | £          | £          | £          | £          | Millions £ | Millions £ |
| Chinchona . . . . .       | 600,000    | 500,000    | 2,500,000  | 8,800,000  | 46         | 4          |
| Grain . . . . .           | 5,000,000  | 5,500,000  | 10,300,000 | 15,000,000 | 115        | 57         |
| Iron . . . . .            | 1,400,000  | 2,000,000  | 7,700,000  | 8,000,000  | 78         | 21         |
| Coal . . . . .            | 1,400,000  | 1,500,000  | 2,500,000  | 3,000,000  | 26         | 26         |
| Coffee . . . . .          | 2,700,000  | 3,500,000  | 3,500,000  | 3,100,000  | 37         | 12         |
| Cotton and yarn . . . . . | 3,800,000  | 4,000,000  | 4,200,000  | 3,800,000  | 42         | 15         |
| Wool and yarn . . . . .   | 1,600,000  | 2,200,000  | 1,700,000  | 2,900,000  | 21         | 5          |
| Timber . . . . .          | 800,000    | 900,000    | 1,800,000  | 1,800,000  | 19         | 19         |
| Lard . . . . .            | ...        | ...        | 2,300,000  | 2,400,000  | 20         | 17         |
| Sugar . . . . .           | 3,300,000  | 4,600,000  | 2,800,000  | 2,500,000  | 30         | 7          |
| Petroleum . . . . .       | ...        | 900,000    | 1,000,000  | 1,700,000  | 12         | 12         |
| Sundries . . . . .        | 6,700,000  | 13,200,000 | 28,700,000 | 36,400,000 | 335        | ...        |
| Total . . . . .           | 27,300,000 | 38,800,000 | 69,000,000 | 89,400,000 | 781        | ...        |

The exports of Holland were as follows :—

|                           | 1861       | 1870       | 1880       | 1886       | 1877-86   |
|---------------------------|------------|------------|------------|------------|-----------|
|                           | £          | £          | £          | £          | Million £ |
| Chinchona . . . . .       | 500,000    | 400,000    | 2,400,000  | 9,100,000  | 42        |
| Iron . . . . .            | 900,000    | 1,400,000  | 5,700,000  | 4,800,000  | 57        |
| Butter . . . . .          | 1,200,000  | 1,400,000  | 2,400,000  | 4,700,000  | 29        |
| Coffee . . . . .          | 2,300,000  | 2,900,000  | 2,400,000  | 2,700,000  | 25        |
| Sugar . . . . .           | 2,700,000  | 3,800,000  | 2,200,000  | 2,500,000  | 23        |
| Cattle . . . . .          | 700,000    | 800,000    | 1,100,000  | 1,100,000  | 11        |
| Cotton and yarn . . . . . | 3,100,000  | 3,100,000  | 2,600,000  | 2,400,000  | 27        |
| Wool and yarn . . . . .   | 1,400,000  | 1,800,000  | 1,200,000  | 2,500,000  | 16        |
| Grain . . . . .           | 1,500,000  | 2,100,000  | 5,200,000  | 7,800,000  | 58        |
| Sundries . . . . .        | 7,200,000  | 14,500,000 | 29,300,000 | 50,400,000 | 300       |
| Total . . . . .           | 21,000,000 | 31,800,000 | 52,100,000 | 78,900,000 | 588       |

The statement for ten years ending December 1886 showed :—

|                           | Million £ Sterling |            |       | Ratio |
|---------------------------|--------------------|------------|-------|-------|
|                           | Imports from       | Exports to | Total |       |
| Germany . . . . .         | 227                | 267        | 494   | 35.5  |
| Great Britain . . . . .   | 207                | 140        | 347   | 25.0  |
| Belgium . . . . .         | 107                | 92         | 199   | 14.3  |
| Java . . . . .            | 58                 | 37         | 95    | 6.8   |
| United States . . . . .   | 48                 | 17         | 65    | 4.7   |
| Russia . . . . .          | 57                 | 6          | 63    | 4.5   |
| Other countries . . . . . | 92                 | 34         | 126   | 9.2   |
| Total . . . . .           | 796                | 593        | 1,389 | 100.0 |

The summary for ten years shows that imports exceeded exports by 203 millions sterling. This excess is to be observed in the trade of Holland with all countries except Germany. The largest excess is in respect of Russia, the imports from which are ten times the exports thither. Trade with the United States is also very unequal.

The trade of 1888 may be summed up thus :—

|                          | Imports, £  |                             | Exports, £ |
|--------------------------|-------------|-----------------------------|------------|
| Grain . . . . .          | 16,300,000  | Drugs . . . . .             | 13,000,000 |
| Drugs . . . . .          | 16,400,000  | Textiles . . . . .          | 9,500,000  |
| Iron and steel . . . . . | 12,000,000  | Grain . . . . .             | 7,700,000  |
| Textiles . . . . .       | 9,000,000   | Butter and cheese . . . . . | 4,900,000  |
| Sundries . . . . .       | 52,300,000  | Sundries . . . . .          | 57,800,000 |
| Total . . . . .          | 106,000,000 | Total . . . . .             | 92,900,000 |

The above includes bullion both ways.

#### BELGIUM

The values of the principal imports at various dates were as follows :—

|                    | 1840      | 1850      | 1860       | 1870       | 1880       | 1887       |
|--------------------|-----------|-----------|------------|------------|------------|------------|
|                    | £         | £         | £          | £          | £          | £          |
| Grain . . . . .    | 400,000   | 200,000   | 2,400,000  | 2,900,000  | 7,400,000  | 6,600,000  |
| Wool . . . . .     | 500,000   | 700,000   | 2,100,000  | 3,500,000  | 7,400,000  | 3,100,000  |
| Hides . . . . .    | 100,000   | 200,000   | 1,900,000  | 2,400,000  | 2,600,000  | 2,900,000  |

#### GREECE

Official returns of merchandise show as follows :—

| Year | Imports     | Exports     | Total       | Per Inhabitant   |
|------|-------------|-------------|-------------|------------------|
| 1861 | £ 1,700,000 | £ 1,000,000 | £ 2,700,000 | £ s. d.<br>2 1 0 |
| 1870 | 3,100,000   | 1,400,000   | 4,500,000   | 3 1 0            |
| 1880 | 4,100,000   | 1,500,000   | 5,600,000   | 3 6 0            |
| 1888 | 4,000,000   | 3,400,000   | 7,400,000   | 3 15 0           |

The import trade was as follows :—

|                         | 1861      | 1870      | 1875        | 1888        |
|-------------------------|-----------|-----------|-------------|-------------|
| Grain . . . . .         | £ 220,000 | £ 650,000 | £ 1,100,000 | £ 1,400,000 |
| Textile goods . . . . . | 360,000   | 540,000   | 600,000     | 800,000     |
| Sundries . . . . .      | 1,120,000 | 1,910,000 | 2,400,000   | 1,800,000   |
| Total . . . . .         | 1,700,000 | 3,100,000 | 4,100,000   | 4,000,000   |

The exports were as follows :—

|                    | 1861      | 1870      | 1875        | 1888        |
|--------------------|-----------|-----------|-------------|-------------|
| Fruit . . . . .    | £ 580,000 | £ 720,000 | £ 1,500,000 | £ 1,900,000 |
| Oil . . . . .      | ...       | ...       | 470,000     | 100,000     |
| Sundries . . . . . | 420,000   | 680,000   | 730,000     | 1,400,000   |
| Total . . . . .    | 1,000,000 | 1,400,000 | 2,700,000   | 3,400,000   |

The countries trading with Greece in 1888 showed thus :—

|                         | Imports from | Exports to  | Total Trade |
|-------------------------|--------------|-------------|-------------|
| Great Britain . . . . . | £ 1,100,000  | £ 1,400,000 | £ 2,500,000 |
| France . . . . .        | 400,000      | 600,000     | 1,000,000   |
| Austria . . . . .       | 500,000      | 300,000     | 800,000     |
| Various . . . . .       | 2,000,000    | 1,100,000   | 3,100,000   |
| Total . . . . .         | 4,000,000    | 3,400,000   | 7,400,000   |

#### TURKEY

Official returns are as follows :—

|      | Imports      | Exports     | Total        |
|------|--------------|-------------|--------------|
| 1881 | £ 16,100,000 | £ 7,600,000 | £ 23,700,000 |
| 1889 | 19,500,000   | 13,500,000  | 33,000,000   |

Judging by the proportion of British trade with Turkey, the returns for the Ottoman Empire (excluding Egypt) should have been :—

| Year           | £ Sterling |            |            |
|----------------|------------|------------|------------|
|                | Imports    | Exports    | Total      |
| 1854 . . . . . | 8,000,000  | 7,000,000  | 15,000,000 |
| 1860 . . . . . | 12,000,000 | 9,000,000  | 21,000,000 |
| 1870 . . . . . | 19,000,000 | 20,000,000 | 39,000,000 |
| 1880 . . . . . | 16,000,000 | 8,000,000  | 24,000,000 |
| 1879 . . . . . | 19,500,000 | 13,500,000 | 33,000,000 |

The trade of 1888 may be summed up thus :—

|                    | Imports, £ |                    | Exports, £ |
|--------------------|------------|--------------------|------------|
| Cottons . . . . .  | 3,000,000  | Fruit . . . . .    | 2,300,000  |
| Linens . . . . .   | 800,000    | Silk . . . . .     | 1,200,000  |
| Woollens . . . . . | 700,000    | Grain . . . . .    | 700,000    |
| Sugar . . . . .    | 1,200,000  | Wool . . . . .     | 600,000    |
| Grain . . . . .    | 1,400,000  | Mohair . . . . .   | 500,000    |
| Coffee . . . . .   | 700,000    | Opium . . . . .    | 400,000    |
| Sundries . . . . . | 13,200,000 | Sundries . . . . . | 7,800,000  |
| Total . . . . .    | 21,000,000 | Total . . . . .    | 13,500,000 |

The countries trading with Turkey were :—

|                         | Imports from | Exports to  | Total Trade  |
|-------------------------|--------------|-------------|--------------|
| Great Britain . . . . . | £ 8,500,000  | £ 3,600,000 | £ 12,100,000 |
| Austria . . . . .       | 3,800,000    | 1,000,000   | 4,800,000    |
| France . . . . .        | 2,400,000    | 4,200,000   | 6,600,000    |
| Russia . . . . .        | 2,200,000    | 200,000     | 2,400,000    |
| Various . . . . .       | 4,100,000    | 4,500,000   | 8,600,000    |
| Total . . . . .         | 21,000,000   | 13,500,000  | 34,500,000   |

#### ROUMANIA

Official returns are as follows :—

| Year | Imports     | Exports     | Total        | Per Inhabitant   |
|------|-------------|-------------|--------------|------------------|
| 1872 | £ 4,400,000 | £ 6,700,000 | £ 11,100,000 | £ s. d.<br>2 4 0 |
| 1880 | 10,200,000  | 8,800,000   | 19,000,000   | 3 14 0           |
| 1887 | 12,600,000  | 10,600,000  | 23,200,000   | 3 12 0           |

The statement for ten years ending December 1885 showed thus :—

## MILLIONS £ STERLING

|                   | Imports from | Exports to | Total | Ratio |
|-------------------|--------------|------------|-------|-------|
| Austria . . .     | 54           | 30         | 84    | 42.4  |
| Great Britain . . | 20           | 24         | 44    | 22.2  |
| Germany . . .     | 13           | 1          | 14    | 7.1   |
| France . . .      | 9            | 8          | 17    | 8.6   |
| Turkey . . .      | 5            | 7          | 12    | 6.1   |
| Other countries   | 10           | 17         | 27    | 13.6  |
| Total . .         | 111          | 87         | 198   | 100.0 |

The imports were as follows :—

|                   | 1880       | 1885       | 1880-85   | 1887       |
|-------------------|------------|------------|-----------|------------|
| Textile goods     | 1,600,000  | 1,800,000  | 1,700,000 | 5,500,000  |
| Cotton yarn       | 1,000,000  | 400,000    | 700,000   | ...        |
| Shoes and leather | 500,000    | 800,000    | 700,000   | 700,000    |
| Sundries . .      | 7,100,000  | 7,700,000  | 6,800,000 | 6,400,000  |
| Total . .         | 10,200,000 | 10,700,000 | 9,900,000 | 12,600,000 |

The exports were as follows :—

|              | 1880      | 1885      | 1880-85   | 1887       |
|--------------|-----------|-----------|-----------|------------|
| Grain . .    | 6,000,000 | 6,800,000 | 6,200,000 | 8,600,000  |
| Sundries . . | 2,800,000 | 3,100,000 | 2,700,000 | 2,000,000  |
| Total . .    | 8,800,000 | 9,900,000 | 8,900,000 | 10,600,000 |

## UNITED STATES

## TRADE WITH ALL COUNTRIES, MILLIONS STERLING

| Carolina . . . . .     | 17,000     | 14,000     | 192,000    | 133,000    | 457,000    | 345,000    |
| Virginia, &c. . . . .  | 235,000    | 199,000    | 510,000    | 351,000    | 675,000    | 392,000    |
| Total . . . . .        | 309,000    | 343,000    | 814,000    | 1,313,000  | 1,370,000  | 1,979,000  |

The weight of the principal exports was approximately as follows :—

| Period             | Tons       |            |           |           |                   |             |
|--------------------|------------|------------|-----------|-----------|-------------------|-------------|
|                    | Cotton     | Grain      | Meat      | Tobacco   | Butter and Cheese | Total       |
| 1827-36 . . . . .  | 1,600,000  | 1,800,000  | 60,000    | 450,000   | ...               | 3,910,000   |
| 1837-46 . . . . .  | 3,400,000  | 2,000,000  | 1,000,000 | 650,000   | 20,000            | 6,170,000   |
| 1847-56 . . . . .  | 4,800,000  | 6,000,000  | 350,000   | 750,000   | 40,000            | 11,940,000  |
| 1857-66 . . . . .  | 4,000,000  | 11,000,000 | 600,000   | 900,000   | 200,000           | 16,700,000  |
| 1867-76 . . . . .  | 4,200,000  | 18,500,000 | 1,500,000 | 900,000   | 400,000           | 25,500,000  |
| 1877-86 . . . . .  | 8,800,000  | 47,000,000 | 3,600,000 | 1,100,000 | 700,000           | 61,200,000  |
| 60 years . . . . . | 26,800,000 | 86,300,000 | 6,210,000 | 4,750,000 | 1,360,000         | 125,420,000 |

It appears that whereas the value of exports increased tenfold since the decade ending 1836 the weight increased 32-fold.

All the values in the above tables are in gold, allowance being made in each year from 1862 to 1878 for the difference between greenbacks and gold.

Bullion is not included in either imports or exports.

## CANADA

Official returns show as follows :—

| Year | Imports    | Exports    | Total      | Per Inhabitant |
|------|------------|------------|------------|----------------|
|      | £          | £          | £          | £ s. d.        |
| 1832 | 1,600,000  | 900,000    | 2,500,000  | 2 10 0         |
| 1834 | 2,490,000  | 1,100,000  | 3,590,000  | 2 15 0         |

| Grain . . . . .    | 700,000   | 2,800,000  | 5,100,000  | 4,600,000  | 3,200,000  |
| Meat . . . . .     | ...       | 300,000    | 700,000    | 1,200,000  | 2,200,000  |
| Cheese . . . . .   | ...       | ...        | 800,000    | 1,200,000  | 1,900,000  |
| Timber . . . . .   | 1,000,000 | 1,800,000  | 3,700,000  | 3,700,000  | 4,500,000  |
| Fish . . . . .     | 550,000   | 1,000,000  | 1,900,000  | 1,900,000  | 1,700,000  |
| Sundries . . . . . | 2,950,000 | 4,900,000  | 4,700,000  | 6,900,000  | 5,200,000  |
| Total . . . . .    | 5,200,000 | 10,800,000 | 16,900,000 | 19,500,000 | 18,700,000 |

In the foregoing tables the whole Canadian Dominion and Newfoundland are included. Meat includes live cattle.

## MEXICO

Official reports are as follows :—

|      | Imports   | Exports    | Total      | Per Inhabitant |
|------|-----------|------------|------------|----------------|
|      | £         | £          | £          | £ s. d.        |
| 1880 | 5,000,000 | 6,800,000  | 11,800,000 | 1 2 0          |
| 1889 | 8,100,000 | 12,500,000 | 20,600,000 | 2 2 0          |

The trade of ten years summed up thus :—

|         |             |
|---------|-------------|
| Imports | 71,000,000  |
| Exports | 87,000,000  |
| Total   | 158,000,000 |

## MILLIONS £ STERLING

|                 | Imports from | Exports to | Total | Ratio |
|-----------------|--------------|------------|-------|-------|
| United States . | 100          | 74         | 174   | 41.1  |
| Great Britain . | 91           | 95         | 186   | 44.0  |
| Germany . . .   | 3            | ...        | 3     | 0.7   |
| France . . . .  | 4            | 1          | 5     | 1.2   |
| Cuba . . . . .  | 3            | 2          | 5     | 1.2   |
| Other countries | 28           | 22         | 50    | 11.8  |
| Total . . . . . | 229          | 194        | 423   | 100.0 |

The quantities of exported goods in thirty years showed approximately thus :—

|                             | Tons       |            |            |            |
|-----------------------------|------------|------------|------------|------------|
|                             | 1857-66    | 1867-76    | 1877-86    | 30 Years   |
| Grain . . . . .             | 3,600,000  | 3,900,000  | 7,500,000  | 15,000,000 |
| Timber . . . . .            | 12,400,000 | 17,900,000 | 19,200,000 | 49,500,000 |
| Meat . . . . .              | 130,000    | 140,000    | 280,000    | 550,000    |
| Cheese and butter . . . . . | 25,000     | 80,000     | 320,000    | 425,000    |
| Fish . . . . .              | 650,000    | 900,000    | 1,220,000  | 2,770,000  |
| Coal . . . . .              | ...        | 2,500,000  | 4,300,000  | 6,800,000  |
| Ores . . . . .              | 45,000     | 70,000     | 280,000    | 395,000    |
| Total . . . . .             | 16,850,000 | 25,490,000 | 33,100,000 | 75,440,000 |

The returns for 1889 give only exports in detail, viz. :—

|                    | Exports    | Exported to                |
|--------------------|------------|----------------------------|
| Silver . . . . .   | 5,800,000  | United States 6,100,000    |
| Hemp . . . . .     | 1,000,000  | Great Britain 1,900,000    |
| Coffee . . . . .   | 600,000    | France . . . 500,000       |
| Hides . . . . .    | 300,000    | Germany . . . 300,000      |
| Sundries . . . . . | 4,800,000  | Various . . . 3,700,000    |
| Total . . . . .    | 12,500,000 | Total . . . . . 12,500,000 |

## CENTRAL AMERICA

The aggregate trade of Guatemala, Salvador, Honduras, Costa Rica, and Nicaragua in 1888 summed up—imports, \$19,600,000; exports, \$23,100,000; but as these dollars are worth only three shillings, the amount is only £3,000,000 for imports, and £3,500,000 for exports.

## SOUTH AMERICA

The latest returns for the various States show as follows:—

|                   | Imports    | Exports    | Total       |
|-------------------|------------|------------|-------------|
|                   | £          | £          | £           |
| Brazil . . . .    | 19,700,000 | 21,200,000 | 40,900,000  |
| Argentina . . . . | 14,300,000 | 12,500,000 | 26,800,000  |
| Chili . . . . .   | 6,600,000  | 7,500,000  | 14,100,000  |
| Uruguay . . . .   | 6,300,000  | 6,200,000  | 12,500,000  |
| Venezuela . . . . | 2,500,000  | 3,300,000  | 5,800,000   |
| Colombia . . . .  | 2,800,000  | 1,600,000  | 4,400,000   |
| Ecuador . . . .   | 2,200,000  | 2,000,000  | 4,200,000   |
| Peru . . . . .    | 1,800,000  | 1,300,000  | 3,100,000   |
| Bolivia . . . . . | 900,000    | 1,500,000  | 2,400,000   |
| Paraguay . . . .  | 300,000    | 200,000    | 500,000     |
| Total . . . .     | 57,200,000 | 57,300,000 | 114,500,000 |

## BRAZIL

Inconvertible paper money has so often been a disturbing element that values were at times obscured. Reduced to gold, the trade showed approximately thus:—

| Period  | Annual Average |            |            |
|---------|----------------|------------|------------|
|         | Imports        | Exports    | Total      |
|         | £              | £          | £          |
| 1836-41 | 5,200,000      | 4,700,000  | 9,900,000  |
| 1852-61 | 12,000,000     | 10,800,000 | 22,800,000 |
| 1862-74 | 15,500,000     | 18,300,000 | 33,800,000 |
| 1882-88 | 17,200,000     | 18,000,000 | 35,200,000 |

The exports in 1888 were as follows:—

|                | £          | To            | £          |
|----------------|------------|---------------|------------|
| Coffee . . . . | 15,100,000 | United States | 11,000,000 |
| Sugar . . . .  | 1,300,000  | Great Britain | 5,200,000  |
| Cotton . . . . | 1,200,000  | France . . .  | 2,800,000  |
| Sundries . . . | 3,600,000  | Various . . . | 2,200,000  |
| Total . . . .  | 21,200,000 | Total . . . . | 21,200,000 |

The weight of exports in the years 1880-84 averaged thus:—

|                | <i>Tons</i> |                  | <i>Tons</i> |
|----------------|-------------|------------------|-------------|
| Coffee . . . . | 230,000     | Tobacco . . . .  | 22,000      |
| Sugar . . . .  | 217,000     | India-rubber . . | 7,100       |

## ARGENTINA

Official records of merchandise are as follows:—

| Year | Imports    | Exports    | Total      | Per Inhab. |
|------|------------|------------|------------|------------|
|      | £          | £          | £          | £ s. d.    |
| 1795 | 510,000    | 920,000    | 1,430,000  | 3 10 0     |
| 1825 | 1,600,000  | 1,200,000  | 2,800,000  | 4 0 0      |
| 1837 | 1,200,000  | 1,400,000  | 2,600,000  | 3 0 0      |
| 1842 | 1,300,000  | 1,400,000  | 2,700,000  | 3 3 0      |
| 1850 | 2,100,000  | 2,200,000  | 4,300,000  | 4 6 0      |
| 1865 | 5,400,000  | 4,400,000  | 9,800,000  | 6 0 0      |
| 1870 | 9,500,000  | 5,800,000  | 15,300,000 | 8 0 0      |
| 1880 | 8,800,000  | 11,300,000 | 20,100,000 | 8 0 0      |
| 1889 | 14,300,000 | 12,500,000 | 26,800,000 | 8 0 0      |

The trade of the country was stagnant from the period of Independence down to 1842, but after the latter date numbers of Irish sheep-farmers arrived (now numbering 20,000), to whom, in Consul Cowper's words, "the wealth and progress of Argentina are in a great measure due."

The statement for ten years ending December 1886 showed:—

|                         | Millions £ Sterling |            |       | Ratio |
|-------------------------|---------------------|------------|-------|-------|
|                         | Imports from        | Exports to | Total |       |
| Great Britain . . . .   | 38                  | 11         | 49    | 21.8  |
| France . . . . .        | 22                  | 31         | 53    | 23.4  |
| Belgium . . . . .       | 7                   | 23         | 30    | 13.7  |
| Germany . . . . .       | 8                   | 7          | 15    | 6.8   |
| United States . . . .   | 8                   | 6          | 14    | 6.4   |
| Uruguay . . . . .       | 6                   | 4          | 10    | 4.4   |
| Other countries . . . . | 28                  | 24         | 52    | 23.5  |
| Total . . . .           | 117                 | 106        | 223   | 100.0 |

The principal exports appear in the following table:—

|                       | 1873      | 1880       | 1888       | 1877-86    |
|-----------------------|-----------|------------|------------|------------|
|                       | £         | £          | £          | £          |
| Wool . . . .          | 3,900,000 | 5,300,000  | 5,900,000  | 5,100,000  |
| Hides and skins . . . | 2,800,000 | 3,600,000  | 2,700,000  | 2,900,000  |
| Meat . . . .          | 700,000   | 900,000    | 700,000    | 700,000    |
| Grain . . . .         | ...       | 150,000    | 1,400,000  | 700,000    |
| Sundries . . .        | 1,800,000 | 1,350,000  | 2,600,000  | 1,200,000  |
| Total . . . .         | 9,200,000 | 11,300,000 | 13,300,000 | 10,600,000 |

Fuller details of exports will be found under *Agriculture*, p. 49.

## URUGUAY

Official returns are as follows:—

| Period  | Annual Trade, £ Sterling |           |            | Per Inhabitant |
|---------|--------------------------|-----------|------------|----------------|
|         | Imports                  | Exports   | Total      |                |
|         |                          |           |            | £ s. d.        |
| 1841-50 | 1,300,000                | 1,200,000 | 2,500,000  | 20 10 0        |
| 1851-60 | 1,800,000                | 1,700,000 | 3,500,000  | 20 5 0         |
| 1861-70 | 2,700,000                | 2,400,000 | 5,100,000  | 18 10 0        |
| 1871-80 | 3,500,000                | 3,300,000 | 6,800,000  | 18 12 0        |
| 1881-87 | 4,500,000                | 4,600,000 | 9,100,000  | 16 10 0        |
| 1888    | 6,300,000                | 6,200,000 | 12,500,000 | 20 0 0         |

The statement for ten years ending 1886 was as follows:—

## MILLIONS £ STERLING

|                         | Imports from | Exports to | Total | Ratio |
|-------------------------|--------------|------------|-------|-------|
| Great Britain . . . .   | 12           | 10         | 22    | 26.8  |
| France . . . . .        | 7            | 7          | 14    | 16.7  |
| United States . . . .   | 3            | 5          | 8     | 9.5   |
| Brazil . . . . .        | 4            | 8          | 12    | 14.4  |
| Belgium . . . . .       | 1            | 6          | 7     | 8.3   |
| Germany . . . . .       | 3            | 1          | 4     | 4.8   |
| Other countries . . . . | 10           | 7          | 17    | 20.1  |
| Total . . . .           | 40           | 44         | 84    | 100.0 |

The returns for 1887 were as follows:—

|                       | Imports   |                | Exports   |
|-----------------------|-----------|----------------|-----------|
|                       | £         |                | £         |
| Wines . . . .         | 700,000   | Wool . . . .   | 1,200,000 |
| Raw material . . . .  | 1,000,000 | Meat . . . .   | 1,200,000 |
| Textile goods . . . . | 900,000   | Hides . . . .  | 700,000   |
| Groceries . . . .     | 1,100,000 | Sundries . . . | 1,400,000 |
| Sundries . . . .      | 1,500,000 |                |           |
| Total . . . .         | 5,200,000 | Total . . . .  | 4,500,000 |

## CHILE

Official reports give the following :—

| Year       | Imports   | Exports   | Total      |
|------------|-----------|-----------|------------|
|            | £         | £         | £          |
| 1844 . . . | 1,500,000 | 1,400,000 | 2,900,000  |
| 1854 . . . | 3,400,000 | 3,000,000 | 6,400,000  |
| 1865 . . . | 4,800,000 | 4,400,000 | 9,200,000  |
| 1875 . . . | 7,600,000 | 7,200,000 | 14,800,000 |
| 1888 . . . | 6,600,000 | 7,500,000 | 14,100,000 |

The statement for ten years ending 1886 showed :—

|                           | Millions £ Sterling |            |       | Ratio |
|---------------------------|---------------------|------------|-------|-------|
|                           | Imports from        | Exports to | Total |       |
| Great Britain . . .       | 18                  | 45         | 63    | 54.6  |
| Germany . . . . .         | 7                   | 3          | 10    | 9.0   |
| France . . . . .          | 7                   | 4          | 11    | 10.0  |
| Argentine Republic . . .  | 3                   | 1          | 4     | 3.2   |
| United States . . . . .   | 2                   | 2          | 4     | 3.6   |
| Other countries . . . . . | 11                  | 12         | 23    | 19.6  |
| Total . . . . .           | 48                  | 67         | 115   | 100.0 |

The above amounts for 1888 are computed at the current rate for the year, 27 pence per dollar.

## AUSTRALIA

Official reports show as follows :—

| Year       | Imports    | Exports    | Total       | Per Inhab. |
|------------|------------|------------|-------------|------------|
|            | £          | £          | £           | £ s. d.    |
| 1824 . . . | 420,000    | 120,000    | 540,000     | 5 2 0      |
| 1830 . . . | 670,000    | 310,000    | 980,000     | 8 2 0      |
| 1838 . . . | 2,970,000  | 1,530,000  | 4,500,000   | 22 10 0    |
| 1851 . . . | 4,300,000  | 3,700,000  | 8,000,000   | 17 10 0    |
| 1861 . . . | 25,100,000 | 24,500,000 | 49,600,000  | 31 10 0    |
| 1871 . . . | 30,100,000 | 34,700,000 | 64,800,000  | 24 0 0     |
| 1881 . . . | 50,200,000 | 48,600,000 | 98,800,000  | 33 0 0     |
| 1888 . . . | 65,300,000 | 57,600,000 | 122,900,000 | 29 5 0     |
| 1889 . . . | 68,300,000 | 61,500,000 | 129,800,000 | 35 0 0     |

The above exports include gold, the production of which has been as follows :—

| Period         | Millions £ Sterling | Per Annum £ |
|----------------|---------------------|-------------|
| 1851-60 . . .  | 104 ...             | 10,400,000  |
| 1861-70 . . .  | 82 ...              | 8,200,000   |
| 1871-80 . . .  | 72 ...              | 7,200,000   |
| 1881-88 . . .  | 42 ...              | 5,200,000   |
| 38 years . . . | 300                 | 8,000,000   |

The following table shows the growth of trade since 1861 :—

| From                      | Imports, £ |            |            |            |
|---------------------------|------------|------------|------------|------------|
|                           | 1861       | 1871       | 1881       | 1888       |
| Great Britain . . . . .   | 13,500,000 | 12,000,000 | 25,700,000 | 30,100,000 |
| Foreign nations . . . . . | 5,000,000  | 4,600,000  | 7,700,000  | 9,700,000  |
| Intercolonial . . . . .   | 6,600,000  | 13,500,000 | 16,800,000 | 25,500,000 |
| Total . . . . .           | 25,100,000 | 30,100,000 | 50,200,000 | 65,300,000 |
| To                        | Exports, £ |            |            |            |
|                           | 1861       | 1871       | 1881       | 1888       |
| Great Britain . . . . .   | 12,200,000 | 18,500,000 | 24,300,000 | 28,700,000 |
| Foreign nations . . . . . | 4,400,000  | 4,600,000  | 6,800,000  | 5,600,000  |
| Intercolonial . . . . .   | 7,900,000  | 11,600,000 | 17,500,000 | 23,300,000 |
| Total . . . . .           | 24,500,000 | 34,700,000 | 48,600,000 | 57,600,000 |

The export of wool during the same period has been as follows :—

| Period         | Million Lbs. | Value, Million £ | Million Lbs. Yearly | Value, £ Yearly |
|----------------|--------------|------------------|---------------------|-----------------|
| 1851-60 . . .  | 560          | 48               | 56                  | 4,800,000       |
| 1861-70 . . .  | 1,350        | 102              | 135                 | 10,200,000      |
| 1871-80 . . .  | 3,060        | 184              | 306                 | 18,400,000      |
| 1881-88 . . .  | 3,100        | 142              | 390                 | 17,800,000      |
| 38 years . . . | 8,070        | 476              | 212                 | 12,600,000      |

It appears that the wool exports of 38 years exceeded the product of the goldfields in the same term by 176 millions sterling. At present the clip averages a value of 21 millions sterling, or five times that of the gold product.

The statement for ten years ending 1886 showed, including bullion :—

|                           | Millions £ Sterling |            |       |
|---------------------------|---------------------|------------|-------|
|                           | Imports from        | Exports to | Total |
| Great Britain . . . . .   | 274                 | 243        | 517   |
| United States . . . . .   | 18                  | 8          | 26    |
| France . . . . .          | 2                   | 2          | 4     |
| China . . . . .           | 10                  | ...        | 10    |
| Other countries . . . . . | 77                  | 98         | 175   |
| Foreign trade . . . . .   | 381                 | 351        | 732   |
| Intercolonial . . . . .   | 178                 | 137        | 315   |
| Total . . . . .           | 559                 | 488        | 1,047 |

The trade of the several colonies in the same period was :—

|                         | Millions £ Sterling |         |       | Per Inhab. per Annum |
|-------------------------|---------------------|---------|-------|----------------------|
|                         | Imports             | Exports | Total |                      |
| New South Wales . . .   | 188                 | 161     | 349   | £ s. d.<br>47 0 0    |
| Victoria . . . . .      | 171                 | 151     | 322   | 37 0 0               |
| New Zealand . . . . .   | 76                  | 64      | 140   | 28 0 0               |
| South Australia . . . . | 55                  | 52      | 107   | 38 0 0               |
| Queensland . . . . .    | 49                  | 41      | 90    | 42 0 0               |
| Tasmania . . . . .      | 15                  | 14      | 29    | 25 0 0               |
| Western Australia . . . | 5                   | 5       | 10    | 33 0 0               |
| Total . . . . .         | 559                 | 488     | 1,047 | 38 0 0               |

| With                      | Total Trade, £ |            |            |             |
|---------------------------|----------------|------------|------------|-------------|
|                           | 1861           | 1871       | 1881       | 1888        |
| Great Britain . . . . .   | 25,700,000     | 30,500,000 | 50,000,000 | 58,800,000  |
| Foreign nations . . . . . | 9,400,000      | 9,200,000  | 14,500,000 | 15,300,000  |
| Intercolonial . . . . .   | 14,500,000     | 25,100,000 | 34,300,000 | 48,800,000  |
| Total . . . . .           | 49,600,000     | 64,800,000 | 98,800,000 | 122,900,000 |

In the above table foreign includes even British colonies outside of Australia, and intercolonial only the traffic between the seven Australasian colonies.

Excluding intercolonial traffic, the trade of Australia has risen from 40 millions sterling in 1871 to 74 millions in 1888, an increase of 85 per cent. The following table of ratios shows that trade with Great Britain is relatively on the decline, probably the result of Protection tariffs.

| With                      | Ratio of Trade |       |       |       |
|---------------------------|----------------|-------|-------|-------|
|                           | 1861           | 1871  | 1881  | 1888  |
| Great Britain . . . . .   | 51.8           | 47.1  | 50.6  | 48.2  |
| Foreign nations . . . . . | 19.0           | 14.2  | 14.7  | 12.4  |
| Intercolonial . . . . .   | 29.2           | 38.7  | 34.7  | 39.4  |
| Total . . . . .           | 100.0          | 100.0 | 100.0 | 100.0 |

The trade returns of 1889 were as follows:—

|                        | Imports, £ | Exports, £ | Total, £    | £ per Inhab. |
|------------------------|------------|------------|-------------|--------------|
| N. S. Wales            | 22,600,000 | 23,300,000 | 45,900,000  | 41.7         |
| Victoria . . . . .     | 24,200,000 | 12,500,000 | 36,700,000  | 33.4         |
| Queensland . . . . .   | 6,000,000  | 6,900,000  | 12,900,000  | 32.5         |
| S. Australia . . . . . | 6,800,000  | 7,300,000  | 14,100,000  | 44.7         |
| New Zealand . . . . .  | 6,300,000  | 9,300,000  | 15,600,000  | 26.0         |
| Tasmania . . . . .     | 1,600,000  | 1,500,000  | 3,100,000   | 21.0         |
| W. Australia . . . . . | 800,000    | 700,000    | 1,500,000   | 36.0         |
| Total . . . . .        | 68,300,000 | 61,500,000 | 129,800,000 | 35.5         |

The figures for Western Australia are those of 1888.

The foreign and intercolonial trade of the several colonies was distinguished in the returns for 1888 as follows:—

|                             | Imports    | Exports    | Total       | Foreign    | Intercolonial |
|-----------------------------|------------|------------|-------------|------------|---------------|
|                             | £          | £          | £           | £          | £             |
| New South Wales . . . . .   | 20,900,000 | 20,900,000 | 41,800,000  | 23,400,000 | 18,400,000    |
| Victoria . . . . .          | 24,000,000 | 13,900,000 | 37,900,000  | 25,000,000 | 12,900,000    |
| Queensland . . . . .        | 6,700,000  | 6,100,000  | 12,800,000  | 5,600,000  | 7,200,000     |
| South Australia . . . . .   | 5,400,000  | 7,000,000  | 12,400,000  | 7,400,000  | 5,000,000     |
| New Zealand . . . . .       | 5,900,000  | 7,800,000  | 13,700,000  | 10,900,000 | 2,800,000     |
| Tasmania . . . . .          | 1,600,000  | 1,300,000  | 2,900,000   | 800,000    | 2,100,000     |
| Western Australia . . . . . | 800,000    | 700,000    | 1,500,000   | 1,000,000  | 500,000       |
| Total . . . . .             | 65,300,000 | 57,700,000 | 123,000,000 | 74,100,000 | 48,900,000    |

The exports were as follows:—

#### SOUTH AFRICA

|                    | 1860      | 1870      | 1880      | 1888       | 1877-86   |
|--------------------|-----------|-----------|-----------|------------|-----------|
|                    | £         | £         | £         | £          | £         |
| Wool . . . . .     | 1,400,000 | 1,800,000 | 2,900,000 | 2,900,000  | 2,500,000 |
| Diamonds . . . . . | ...       | 200,000   | 3,400,000 | 4,000,000  | 3,000,000 |
| Copper . . . . .   | 100,000   | 150,000   | 300,000   | 900,000    | 400,000   |
| Feathers . . . . . | 20,000    | 100,000   | 900,000   | 300,000    | 800,000   |
| Sundries . . . . . | 680,000   | 750,000   | 1,100,000 | 2,200,000  | 1,100,000 |
| Total . . . . .    | 2,200,000 | 3,000,000 | 8,600,000 | 10,300,000 | 7,800,000 |

The foregoing table shows that, although sheep-farming is prosperous, and wool continues to form a staple product of the colony, the first rank as regards value among the exports now belongs to diamonds, of which there seems to be no decline in number or quality. In twelve years ending 1889 the production of diamonds reached a value of nearly 40 millions sterling. At the same time the yield of copper has risen to importance. The only item which shows a decline is ostrich feathers, an industry which gave great promise ten years ago.

Official returns, comprising Cape Colony and Natal, show as follows:—

| Year | Imports    | Exports    | Total      | Per Inhabitant |
|------|------------|------------|------------|----------------|
|      | £          | £          | £          | £ s. d.        |
| 1851 | 1,800,000  | 700,000    | 2,500,000  | 8 0 0          |
| 1860 | 3,000,000  | 2,200,000  | 5,200,000  | 12 10 0        |
| 1870 | 2,800,000  | 3,000,000  | 5,800,000  | 7 0 0          |
| 1880 | 10,000,000 | 8,600,000  | 18,600,000 | 17 0 0         |
| 1888 | 8,400,000  | 10,300,000 | 18,700,000 | 15 0 0         |

Distinguishing Natal from Cape Colony, the trade stood thus:—

|                 | Imports   |           | Exports   |            |
|-----------------|-----------|-----------|-----------|------------|
|                 | 1860      | 1888      | 1860      | 1888       |
|                 | £         | £         | £         | £          |
| Cape Colony     | 2,600,000 | 5,500,000 | 2,100,000 | 8,900,000  |
| Natal . . . . . | 400,000   | 2,900,000 | 100,000   | 1,400,000  |
| Total . . . . . | 3,000,000 | 8,400,000 | 2,200,000 | 10,300,000 |

The statement for ten years ending 1886 showed :—

|                       | Millions £ Sterling |            |       | Ratio |
|-----------------------|---------------------|------------|-------|-------|
|                       | Imports from        | Exports to | Total |       |
| Great Britain . . .   | 66                  | 72         | 138   | 84.7  |
| Other countries . . . | 19                  | 6          | 25    | 15.3  |
| Total . . .           | 85                  | 78         | 163   | 100.0 |

Exports for 1888 were as follows :—

|                | Cape, £   | Natal, £  | South Africa, £ |
|----------------|-----------|-----------|-----------------|
| Wool . . .     | 2,200,000 | 700,000   | 2,900,000       |
| Diamonds . . . | 4,000,000 | ...       | 4,000,000       |
| Sundries . . . | 2,700,000 | 700,000   | 3,400,000       |
| Total . . .    | 8,900,000 | 1,400,000 | 10,300,000      |

#### WEST AFRICA

This group of colonies comprises Lagos, Gold Coast, Sierra Leone, and Gambia. Official records show the aggregate trade thus :—

| Year | Imports   | Exports   | Total     | Per Inhabitant   |
|------|-----------|-----------|-----------|------------------|
| 1851 | £ 300,000 | £ 300,000 | £ 600,000 | £ s. d.<br>3 0 0 |
| 1860 | 400,000   | 400,000   | 800,000   | 2 0 0            |
| 1870 | 1,000,000 | 1,300,000 | 2,300,000 | 4 10 0           |
| 1880 | 1,300,000 | 1,500,000 | 2,800,000 | 4 14 0           |
| 1888 | 1,200,000 | 1,200,000 | 2,400,000 | 1 12 0           |

The trade of the several colonies in 1887 was :—

|                    | Imports, £ | Exports, £ |
|--------------------|------------|------------|
| Lagos . . .        | 420,000    | 490,000    |
| Gold Coast . . .   | 360,000    | 270,000    |
| Sierra Leone . . . | 310,000    | 310,000    |
| Gambia . . .       | 80,000     | 90,000     |
| Total . . .        | 1,170,000  | 1,160,000  |

The exports were from the West Indies in 1887 as follows :—

|                     | Sugar     | Rum       | Coffee    | Cocoa   | Sundries  | Total       |
|---------------------|-----------|-----------|-----------|---------|-----------|-------------|
| Jamaica . . .       | £ 200,000 | £ 300,000 | £ 210,000 | £ ...   | £ 740,000 | £ 1,510,000 |
| Barbadoes . . .     | 800,000   | ...       | ...       | ...     | 260,000   | 1,060,000   |
| Trinidad . . .      | 850,000   | ...       | ...       | 410,000 | 610,000   | 1,870,000   |
| Guiana . . .        | 1,840,000 | 140,000   | ...       | ...     | 210,000   | 2,190,000   |
| Small islands . . . | ...       | ...       | ...       | ...     | ...       | 1,370,000   |
| Total . . .         | ...       | ...       | ...       | ...     | ...       | 8,000,000   |

The statement for ten years ending 1886 showed :—

#### MILLIONS £ STERLING

|                       | Imports from | Exports to | Total | Ratio |
|-----------------------|--------------|------------|-------|-------|
| Great Britain . . .   | 36           | 49         | 85    | 50.0  |
| United States . . .   | 17           | 15         | 32    | 19.0  |
| Canada . . .          | 6            | 4          | 10    | 6.0   |
| Other countries . . . | 25           | 17         | 42    | 24.0  |
| Total . . .           | 84           | 85         | 169   | 100.0 |

#### INDIA

Imports of British merchandise in the early part of the eighteenth century averaged to India as follows per annum :—

The statement for ten years ending 1886 showed :—

|                       | Millions £ Sterling |            |       | Ratio |
|-----------------------|---------------------|------------|-------|-------|
|                       | Imports from        | Exports to | Total |       |
| Great Britain . . .   | 9                   | 7          | 16    | 58.5  |
| Germany . . .         | 2                   | 2          | 4     | 14.6  |
| Other countries . . . | 2                   | 5          | 7     | 26.9  |
| Total . . .           | 13                  | 14         | 27    | 100.0 |

#### WEST INDIES

Under this term may be comprised the various British possessions, Jamaica, Trinidad, Guiana, Barbadoes, and minor islands. Official records show :—

| Year | Imports     | Exports     | Total       | Per Inhab.        |
|------|-------------|-------------|-------------|-------------------|
| 1851 | £ 4,600,000 | £ 4,500,000 | £ 9,100,000 | £ s. d.<br>10 2 0 |
| 1860 | 5,800,000   | 6,100,000   | 11,900,000  | 10 10 0           |
| 1870 | 6,800,000   | 7,500,000   | 14,300,000  | 11 0 0            |
| 1880 | 8,100,000   | 8,500,000   | 16,600,000  | 11 1 0            |
| 1887 | 6,900,000   | 8,000,000   | 14,900,000  | 9 10 0            |

The exports have been nearly stationary in value during the past twenty years, sugar having fallen greatly in price. Returns show as follows :—

|                | 1851        | 1860        | 1870        | 1887        | 1877-86<br>Mill. £ |
|----------------|-------------|-------------|-------------|-------------|--------------------|
| Sugar . . .    | £ 2,100,000 | £ 3,000,000 | £ 3,800,000 | £ 3,700,000 | 41                 |
| Rum . . .      | 300,000     | 600,000     | 600,000     | 400,000     | 5                  |
| Coffee . . .   | 100,000     | 100,000     | 200,000     | 200,000     | 2                  |
| Cocoa . . .    | 100,000     | 100,000     | 200,000     | 400,000     | 4                  |
| Sundries . . . | 1,900,000   | 2,300,000   | 2,700,000   | 3,300,000   | 33                 |
| Total . . .    | 4,500,000   | 6,100,000   | 7,500,000   | 8,000,000   | 85                 |

1709-18 . . . . . £ 4,800,000  
1719-28 . . . . . 4,400,000  
1729-34 . . . . . 5,000,000

The trade, excluding bullion, has been :—

| Year  | Imports     | Exports     | Total        | Per Inhabitant   |
|-------|-------------|-------------|--------------|------------------|
| 1815  | £ 8,100,000 | £ 2,600,000 | £ 10,700,000 | £ s. d.<br>0 2 6 |
| 1830  | 5,700,000   | 4,100,000   | 9,800,000    | 0 2 0            |
| 1851  | 11,600,000  | 18,200,000  | 29,800,000   | 0 5 0            |
| 1860  | 24,200,000  | 28,000,000  | 52,200,000   | 0 7 0            |
| 1870  | 32,900,000  | 52,500,000  | 85,400,000   | 0 11 0           |
| 1880  | 41,200,000  | 67,200,000  | 108,400,000  | 0 12 0           |
| *1889 | 66,600,000  | 97,000,000  | 163,600,000  | 0 16 0           |

\* The Indian Customs still compute rupees at 24 pence, and hence the values here stated are 33 per cent. too much.

Imports of India were as follows :—

|                               | 1851              | 1870              | 1880              | 1889              | 1877-86           |
|-------------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|

| Sundries . . . . .     | 100,000          | 500,000          | 800,000          | 1,100,000        | 1,900,000        |
| <b>Total . . . . .</b> | <b>1,100,000</b> | <b>2,300,000</b> | <b>3,800,000</b> | <b>3,500,000</b> | <b>3,200,000</b> |

Sundries for 1888 included £1,020,000 for tea, now the principal export of the island.

The statement for ten years ending 1886 showed—

|                   | Millions £ Sterling |            |       | Ratio |
|-------------------|---------------------|------------|-------|-------|
|                   | Imports from        | Exports to | Total |       |
| India . . . .     | 28                  | 5          | 33    | 42.3  |
| Great Britain . . | 12                  | 22         | 34    | 43.6  |
| Other countries   | 3                   | 8          | 11    | 14.1  |
| Total . . . .     | 43                  | 35         | 78    | 100.0 |

#### STRAITS SETTLEMENT

This colony, formerly known as Singapore, shows the following trade :—

|      | Imports, £ | Exports, £ | Total, £   |
|------|------------|------------|------------|
| 1861 | 7,900,000  | 6,600,000  | 14,500,000 |
| 1870 | 9,700,000  | 7,100,000  | 16,800,000 |
| 1880 | 11,700,000 | 10,500,000 | 22,200,000 |
| 1887 | 21,500,000 | 18,800,000 | 40,300,000 |

Singapore is a great emporium for trade between Europe and the East, and hence its trade is out of all proportion to the population of the colony ; average, £80 per inhabitant.

The imports were as follows :—

|                    | 1861    | 1860      | 1870      | 1887      | 1877-86   |
|--------------------|---------|-----------|-----------|-----------|-----------|
|                    | £       | £         | £         | £         | £         |
| Grain . . . . .    | 330,000 | 770,000   | 660,000   | 570,000   | 600,000   |
| Textiles . . . . . | 110,000 | 170,000   | 280,000   | 170,000   | 200,000   |
| Sundries . . . . . | 460,000 | 1,360,000 | 1,060,000 | 1,660,000 | 1,500,000 |
| Total . . . . .    | 900,000 | 2,300,000 | 2,000,000 | 2,400,000 | 2,300,000 |

The exports were as follows :—

|                    | 1861      | 1860      | 1870      | 1888      | 1877-86   |
|--------------------|-----------|-----------|-----------|-----------|-----------|
|                    | £         | £         | £         | £         | £         |
| Sugar . . . . .    | 1,000,000 | 2,100,000 | 1,900,000 | 2,300,000 | 3,300,000 |
| Sundries . . . . . | 100,000   | 200,000   | 200,000   | 300,000   | 300,000   |
| Total . . . . .    | 1,100,000 | 2,300,000 | 2,100,000 | 2,600,000 | 3,600,000 |

#### CHINA

Official returns are as follows :—

| Year           | Imports, £ | Exports, £ | Total, £   |
|----------------|------------|------------|------------|
| 1876 . . . . . | 20,900,000 | 24,100,000 | 45,000,000 |
| 1880 . . . . . | 23,000,000 | 22,500,000 | 45,500,000 |
| 1888 . . . . . | 26,000,000 | 23,000,000 | 49,000,000 |

The statement for ten years ending 1886 showed :—

|                     | Millions £ Sterling |            |       | Ratio |
|---------------------|---------------------|------------|-------|-------|
|                     | Imports from        | Exports to | Total |       |
| Hong-Kong . . . .   | 84                  | 45         | 129   | 30.7  |
| Great Britain . . . | 45                  | 63         | 108   | 25.6  |
| India . . . . .     | 52                  | 1          | 53    | 12.5  |
| Japan . . . . .     | 11                  | 4          | 15    | 3.6   |

| Total . . . . .     | 222                 | 197        | 419   | 100.0 |

The statement for ten years ending 1886 showed :—

|                   | Millions £ Sterling |            |       | Ratio |
|-------------------|---------------------|------------|-------|-------|
|                   | Imports from        | Exports to | Total |       |
| Great Britain . . | 36                  | 28         | 64    | 21.5  |
| India . . . . .   | 25                  | 9          | 34    | 11.4  |
| Hong-Kong . . . . | 18                  | 11         | 29    | 9.8   |
| Java . . . . .    | 27                  | 36         | 63    | 21.2  |
| Malacca . . . . . | 17                  | 13         | 30    | 10.1  |
| Siam . . . . .    | 11                  | 10         | 21    | 7.1   |
| Other countries   | 22                  | 34         | 56    | 18.9  |
| Total . . . . .   | 156                 | 141        | 297   | 100.0 |

The trade of 1888, merchandise and bullion, amounted to—imports, 32 ; exports, 27 millions sterling.

#### MAURITIUS

The trade returns show as follows :—

|      | Imports, £ | Exports, £ | Total, £  |
|------|------------|------------|-----------|
| 1851 | 900,000    | 1,200,000  | 2,100,000 |
| 1860 | 2,300,000  | 2,300,000  | 4,600,000 |
| 1870 | 2,000,000  | 2,100,000  | 4,100,000 |
| 1880 | 1,700,000  | 3,000,000  | 4,700,000 |
| 1888 | 1,200,000  | 2,600,000  | 3,800,000 |

The imports were as follows :—

|                    | 1876       | 1886       | 1877-86    | 1888       |
|--------------------|------------|------------|------------|------------|
|                    | £          | £          | £          | £          |
| Opium . . . . .    | 8,400,000  | 6,200,000  | 7,500,000  | 7,600,000  |
| Cotton goods . . . | 6,000,000  | 7,200,000  | 6,600,000  | 10,500,000 |
| Sundries . . . . . | 6,500,000  | 8,500,000  | 8,200,000  | 7,900,000  |
| Total . . . . .    | 20,900,000 | 21,900,000 | 22,300,000 | 26,000,000 |

The exports were as follows :—

|                    | 1876       | 1886       | 1877-86    | 1888       |
|--------------------|------------|------------|------------|------------|
|                    | £          | £          | £          | £          |
| Tea . . . . .      | 11,000,000 | 8,500,000  | 8,900,000  | 7,200,000  |
| Silk . . . . .     | 10,800,000 | 7,200,000  | 6,900,000  | 7,500,000  |
| Sundries . . . . . | 2,300,000  | 3,600,000  | 3,900,000  | 8,300,000  |
| Total . . . . .    | 24,100,000 | 19,300,000 | 19,700,000 | 23,000,000 |

The quantities of tea exported were :—

|                |                  |
|----------------|------------------|
| 1876 . . . . . | 190 million lbs. |
| 1880 . . . . . | 222 " "          |
| 1888 . . . . . | 290 " "          |

## PERSIA

The total trade of the Empire in 1881 was said to reach £7,700,000, but the estimates of the *Times* correspondent for 1889 do not exceed £6,000,000, viz:—

|                | Imports, £ |                | Exports, £ |
|----------------|------------|----------------|------------|
| Cottons . . .  | 1,800,000  | Opium . . .    | 500,000    |
| Silks . . .    | 600,000    | Silk, raw . .  | 400,000    |
| Woolens . . .  | 400,000    | Rice . . .     | 300,000    |
| Sugar . . .    | 300,000    | Fruit . . .    | 100,000    |
| Sundries . . . | 700,000    | Sundries . . . | 900,000    |
| Total . . .    | 3,800,000  | Total . . .    | 2,200,000  |

## PHILIPPINE ISLANDS

The exports of these islands were as follows:—

|              | 1889    | To        | 1888                          |
|--------------|---------|-----------|-------------------------------|
|              | Tons    | £         | £                             |
| Sugar        | 220,000 | 2,200,000 | Great Britain . . 1,700,000   |
| Hemp . . .   | 115,000 | 3,200,000 | Spain . . . . . 600,000       |
| Coffee . . . | 6,000   | 500,000   | Other countries . . 4,300,000 |
| Tobacco . .  | 10,000  | 700,000   |                               |
| Total . . .  | ...     | 6,600,000 | Total . . . . . 6,600,000     |

Imports average about £2,000,000, English cotton goods representing £900,000.

## JAPAN

Official returns are as follows:—

| Year         | Imports, £ | Exports, £ | Total, £   |
|--------------|------------|------------|------------|
| 1876 . . . . | 5,000,000  | 5,700,000  | 10,700,000 |
| 1880 . . . . | 7,600,000  | 5,700,000  | 13,300,000 |
| 1888 . . . . | 10,900,000 | 10,800,000 | 21,700,000 |

The imports and exports in 1888 were:—

|                               | Imports, £ |               | Exports, £ |
|-------------------------------|------------|---------------|------------|
| Cotton yarn . .               | 2,300,000  | Silk . . . .  | 4,800,000  |
| Cotton manu-<br>facture . . . | 500,000    | Tea . . . .   | 1,000,000  |
| Woolen . . . .                | 1,100,000  | Copper . . .  | 600,000    |
| Sugar . . . .                 | 1,100,000  | Rice . . . .  | 1,200,000  |
| Sundries . . .                | 5,900,000  | Sundries . .  | 3,200,000  |
| Total . . . .                 | 10,900,000 | Total . . . . | 10,800,000 |

There have been nine Statistical Congresses, attended by members as follows:—

| Date          | Place            | British | French | German | Russian | Austrian | Italian | Hungarian | Dutch | Various | Total |
|---------------|------------------|---------|--------|--------|---------|----------|---------|-----------|-------|---------|-------|
| 1853          | Brussels . . . . | 16      | 11     | 22     | ...     | 1        | 2       | ...       | 5     | 96      | 153   |
| 1855          | Paris . . . . .  | 22      | 203    | 29     | ...     | 5        | 9       | ...       | 2     | 41      | 311   |
| 1859          | Vienna . . . . . | 4       | 11     | 37     | 3       | 430      | 8       | 24        | 4     | 16      | 537   |
| 1860          | London . . . . . | 478     | 9      | 25     | 12      | 5        | 1       | ...       | 4     | 51      | 585   |
| 1863          | Berlin . . . . . | 13      | 7      | 397    | 13      | 10       | 4       | 2         | 3     | 28      | 477   |
| 1867          | Florence . . . . | 16      | 14     | 17     | 14      | 4        | 665     | ...       | 1     | 20      | 751   |
| 1869          | Hague . . . . .  | 20      | 15     | 18     | 10      | 5        | 9       | 3         | 372   | 36      | 488   |
| 1872          | Petersburgh . .  | 17      | 5      | 23     | 512     | 15       | 10      | 7         | 4     | 45      | 638   |
| 1876          | Pesth . . . . .  | 10      | 12     | 33     | 32      | 42       | 8       | 282       | 3     | 33      | 455   |
| Total . . . . |                  | 596     | 287    | 601    | 596     | 517      | 716     | 318       | 398   | 366     | 4,395 |

Valuable statistical papers were read at the above meetings.

The statement for seven years ending 1886 showed:—

|                     | Millions £ Sterling |            |       | Ratio |
|---------------------|---------------------|------------|-------|-------|
|                     | Imports from        | Exports to | Total |       |
| Great Britain . . . | 20                  | 5          | 25    | 25.8  |

## EGYPT

Official returns are as follows:—

| Year           | Imports, £ | Exports, £ | Total, £   |
|----------------|------------|------------|------------|
| 1824 . . . . . | 1,100,000  | 2,100,000  | 3,200,000  |
| 1874 . . . . . | 5,300,000  | 14,000,000 | 19,300,000 |
| 1880 . . . . . | 6,800,000  | 13,500,000 | 20,300,000 |
| 1889 . . . . . | 7,300,000  | 12,200,000 | 19,500,000 |

The imports of 1889 were as follows:—Textiles, £1,800,000; coal, £450,000; iron and machinery, £500,000; coffee, £300,000; and sundries, £4,250,000.

The exports were as follows:—

|                   | 1876       | 1886       | 1877-86    | 1889       |
|-------------------|------------|------------|------------|------------|
|                   | £          | £          | £          | £          |
| Raw cotton . . .  | 9,200,000  | 7,500,000  | 7,800,000  | 8,800,000  |
| Cotton seed . . . | 1,500,000  | 1,300,000  | 1,400,000  | 1,500,000  |
| Sugar . . . . .   | 500,000    | 500,000    | 600,000    | 500,000    |
| Grain . . . . .   | 1,700,000  | 700,000    | 1,400,000  | 600,000    |
| Sundries . . . .  | 1,200,000  | 900,000    | 1,200,000  | 800,000    |
| Total . . . . .   | 14,100,000 | 10,900,000 | 12,400,000 | 12,200,000 |

Egyptian exports have been for some years declining in value, which is due rather to a fall in prices than to any decrease of quantities produced.

## CONGRESS

The first United States Federal Congress met, 4th March 1789, and the fifty-first on 4th March 1889. The first actual Congress of American delegates took place in 1774, and another was held on July 4, 1776, at which the Act of Independence was signed. Congress now consists of 82 Senators and 330 Representatives, all of whom receive a salary of \$5000 each per annum, besides 20 cents a mile travelling expenses, and \$125 for stationery.

## COPPER

The production of this metal has multiplied fivefold since 1850, shown thus :—

|                   | Fine Copper, Tons |        |        |         |         |
|-------------------|-------------------|--------|--------|---------|---------|
|                   | 1850              | 1860   | 1870   | 1880    | 1888    |
| Great Britain . . | 11,800            | 13,540 | 7,220  | 3,440   | 1,500   |
| France . . . . .  | 2,300             | 2,500  | 4,900  | 5,100   | 3,000   |
| Germany . . . .   | 1,650             | 3,200  | 6,850  | 10,140  | 15,000  |
| Russia . . . . .  | 6,000             | 5,500  | 5,500  | 6,100   | 5,000   |
| Spain . . . . .   | 200               | 300    | 1,100  | 21,300  | 53,000  |
| Sweden . . . . .  | 2,300             | 2,200  | 2,000  | 1,600   | 1,000   |
| Austria, &c. . .  | 1,600             | 1,900  | 2,000  | 2,200   | 2,700   |
| Europe . . . . .  | 25,850            | 9,140  | 29,570 | 49,880  | 81,200  |
| United States . . | 2,700             | 5,530  | 12,650 | 20,260  | 103,000 |
| Chili . . . . .   | 14,300            | 25,100 | 30,200 | 36,800  | 31,000  |
| Australia . . . . | 2,400             | 7,600  | 9,700  | 13,100  | 8,000   |
| Cape Colony . .   | ...               | ...    | 1,000  | 5,000   | 8,000   |
| Venezuela . . . . | 2,000             | 2,000  | 3,000  | 4,000   | 4,000   |
| Japan . . . . .   | 3,000             | 3,000  | 3,000  | 5,000   | 11,000  |
| Other countries . | 2,000             | 3,000  | 5,000  | 8,000   | 15,800  |
| Total . . . . .   | 52,250            | 75,370 | 94,120 | 142,040 | 262,000 |

In 1889 the production in the United States was 107,000 tons fine copper, and the consumption 75,000 tons.

The ratio of copper to copper ore is as follows :—

|                   | Per Cent. of<br>Pure Copper |                       | Per Cent. of<br>Pure Copper |
|-------------------|-----------------------------|-----------------------|-----------------------------|
| Germany . . . . . | 3                           | England . . . . .     | 7                           |
| Austria . . . . . | 4                           | Australia . . . . .   | 12                          |
| France . . . . .  | 5                           | United States . . . . | 18                          |

The British copper trade since 1850 has been as follows :—

| Year            | Tons      |           | Value     |           | Fine Copper per Ton |
|-----------------|-----------|-----------|-----------|-----------|---------------------|
|                 | Im-ported | Ex-ported | Imports   | Exports   |                     |
| 1850 . . . . .  | 51,000    | 11,000    | 1,412,000 | 1,080,000 | 102                 |
| 1851-60 . . . . | 78,000    | 26,000    | 2,254,000 | 2,531,000 | 98                  |
| 1860 . . . . .  | 109,000   | 31,000    | 3,404,000 | 3,153,000 | 107                 |
| 1861-70 . . . . | 133,000   | 46,000    | 4,016,000 | 3,844,000 | 89                  |
| 1870 . . . . .  | 137,000   | 52,000    | 4,039,000 | 3,772,000 | 76                  |
| 1871-80 . . . . | 147,000   | 56,000    | 5,151,000 | 4,413,000 | 78                  |
| 1881 . . . . .  | 182,000   | 65,000    | 4,593,200 | 4,284,000 | 68                  |
| 1888 . . . . .  | 280,000   | 40,000    | 8,600,000 | 3,100,000 | 80                  |

The imports include, besides copper, a quantity of "regulus," or half-smelted ore.

The following table shows the annual yield of copper-mines in Great Britain :—

| Period          | Tons  | Value, £ | Period          | Tons   | Value, £  |
|-----------------|-------|----------|-----------------|--------|-----------|
| 1725-45 . . . . | 560   | 84,000   | 1801-20 . . . . | 5,880  | 720,000   |
| 1746-65 . . . . | 1,030 | 160,000  | 1821-40 . . . . | 13,220 | 1,360,000 |
| 1766-85 . . . . | 2,020 | 290,000  | 1841-60 . . . . | 12,840 | 1,355,000 |
| 1786-1800 . . . | 2,710 | 430,000  | 1861-80 . . . . | 8,070  | 686,000   |

The total value of the output for 100 years ending 1880 was 91 millions sterling. In 1888 the total product of copper in the world was valued at 20 millions sterling per annum. The prices of this metal, however, vary exceedingly; in 1882 it was £67 per ton, falling in 1886 to £40; whereupon a French "ring" drove up the price to £80, but it fell afterwards to £50.

It is remarkable that, although copper-money is no longer in use, the consumption of this metal is more than five times as great as it was forty years ago. This is in great measure explained by the enormous development of telegraph wire, cartridges, and other things in which copper largely enters.

## COTTON

According to Baines and other authorities, the production of raw cotton was as follows :—

|                | Million Lbs.  |               |       |       |         |       |
|----------------|---------------|---------------|-------|-------|---------|-------|
|                | United States | South America | Egypt | India | Various | Total |
| 1791 . . . . . | 2             | 102           | ...   | 130   | 256     | 490   |
| 1801 . . . . . | 48            | 102           | ...   | 160   | 210     | 520   |
| 1811 . . . . . | 80            | 104           | ...   | 170   | 201     | 555   |
| 1821 . . . . . | 180           | 86            | 6     | 175   | 183     | 630   |
| 1831 . . . . . | 385           | 82            | 18    | 180   | 155     | 820   |
| 1840 . . . . . | 878           | 90            | 30    | 212   | 100     | 1,310 |
| 1850 . . . . . | 890           | 90            | 45    | 310   | 100     | 1,435 |
| 1860 . . . . . | 1,880         | 90            | 51    | 420   | 100     | 2,551 |
| 1870 . . . . . | 1,540         | 270           | 240   | 625   | 100     | 2,775 |
| 1880 . . . . . | 2,593         | 86            | 282   | 540   | 100     | 3,601 |
| 1888 . . . . . | 3,420         | 85            | 290   | 888   | 100     | 4,783 |

Ellison's table and others show the consumption to have been at various dates as follows :—

|                   | Millions of Lbs. |      |       |       |       |       |        |
|-------------------|------------------|------|-------|-------|-------|-------|--------|
|                   | 1830             | 1840 | 1850  | 1860  | 1869  | 1880  | 1887-8 |
| United Kingdom .  | 250              | 454  | 588   | 1,140 | 1,101 | 1,404 | 1,530  |
| France . . . . .  | 68               | 116  | 140   | 226   | 220   | 200   | 310    |
| Germany . . . .   | 16               | 26   | 46    | 140   | 147   | 286   | 378    |
| Russia . . . . .  | 4                | 14   | 48    | 87    | 97    | 220   | 369    |

The production and consumption of raw cotton in 67 years ending December 1887 were approximately as follows :—

| Period           | Production, Tons Aggregate |            |           |             |            |
|------------------|----------------------------|------------|-----------|-------------|------------|
|                  | United States              | India      | Egypt     | Brazil, &c. | Total      |
| 1821-30 . . . .  | 1,050,000                  | 310,000    | 100,000   | 120,000     | 1,580,000  |
| 1831-40 . . . .  | 2,270,000                  | 480,000    | 120,000   | 120,000     | 2,990,000  |
| 1841-50 . . . .  | 3,950,000                  | 950,000    | 170,000   | 150,000     | 5,220,000  |
| 1851-60 . . . .  | 6,450,000                  | 1,400,000  | 260,000   | 150,000     | 8,260,000  |
| 1861-70 . . . .  | 3,750,000                  | 2,900,000  | 870,000   | 670,000     | 8,190,000  |
| 1871-80 . . . .  | 8,700,000                  | 2,630,000  | 1,290,000 | 305,000     | 12,925,000 |
| 1881-87 . . . .  | 8,680,000                  | 2,240,000  | 910,000   | 230,000     | 12,060,000 |
| 67 years . . . . | 34,850,000                 | 10,910,000 | 3,720,000 | 1,685,000   | 51,165,000 |

It appears that the United States have produced two-thirds of the cotton which has been consumed by the factories of the world in the last 67 years, and that the cotton-crop of the world shows a steady increase, the decade ending 1890 showing 400,000 tons a year more than the preceding. Great Britain consumes one-third of all the cotton produced, the United States being the next largest consumer. In this industry France stood ahead of Germany until the war of 1870.

## Consumption, Tons Aggregate

|                         | 1821-40   | 1841-50   | 1851-60   | 1861-70   | 1871-80    | 1881-87    | Total      |

There is an apparent discrepancy in the above table, the consumption of cotton in the period 1881-87 exceeding the production by 910,000 tons, which is explained by the circumstance that cotton yarn is often counted with raw cotton. In the said period the cotton-mills of

Continental Europe figure above for 4,930,000 tons of raw cotton, but this included 910,000 tons of yarn, which was thus counted twice, having been already included as raw cotton in the mills of Great Britain and other countries, that produce more yarn than they require.

The following table shows approximately the output of cotton cloth in English statute miles :—

|                         | 1821-40    | 1841-60    | 1861-70    | 1871-80    | 1881-87    | Total       |

| 1831-40  | 2,990,000      | 14,820,000     | 220              | 874               | 654   |
| 1841-50  | 5,220,000      | 26,050,000     | 267              | 1,055             | 788   |
| 1851-60  | 8,260,000      | 42,600,000     | 500              | 1,440             | 940   |
| 1861-70  | 8,190,000      | 42,400,000     | 987              | 1,810             | 823   |
| 1871-80  | 12,865,000     | 70,100,000     | 915              | 2,234             | 1,319 |
| 1881-87  | 12,970,000     | 71,150,000     | 742              | 1,782             | 1,040 |
| 67 years | 52,075,000     | 274,500,000    | 3,744            | 9,827             | 6,083 |

The world produces and consumes annually more than 10 million miles of cotton cloth. The cost of production was found in 1880 to be:—

|                    | Pence per 100 Yds. |        |
|--------------------|--------------------|--------|
|                    | Calico             | Prints |
| British . . . . .  | 276                | 384    |
| American . . . . . | 424                | 502    |
| Greek . . . . .    | 353                | ...    |
| Chinese . . . . .  | 310                | 510    |
| German . . . . .   | 298                | 408    |
| French . . . . .   | 312                | 425    |

The cotton manufacturing industry is shown as follows, according to Spencer's tables (to 1875):—

|                       | Spindles   |            |            |            |            |            |
|-----------------------|------------|------------|------------|------------|------------|------------|
|                       | 1832       | 1845       | 1861       | 1875       | 1885       | 1888       |
| Great Britain . . . . | 9,000,000  | 17,500,000 | 30,300,000 | 37,500,000 | 44,300,000 | 42,740,000 |
| United States . . . . | 1,200,000  | 2,500,000  | 5,000,000  | 9,500,000  | 13,300,000 | 13,500,000 |
| Continent . . . . .   | 2,800,000  | 7,500,000  | 10,000,000 | 19,500,000 | 22,350,000 | 23,780,000 |
| India, &c. . . . .    | ...        | ...        | 340,000    | 1,000,000  | 2,400,000  | 2,420,000  |
| Total . . . . .       | 13,000,000 | 27,500,000 | 45,640,000 | 67,500,000 | 82,350,000 | 82,640,000 |

The number of spindles has increased more than sixfold since 1832, the production of cotton more than sevenfold.

## GREAT BRITAIN

The principal features of cotton manufacture are shown thus:—

| Year | Raw Cotton,<br>Million Lbs. | Yarn Spun,<br>Million Lbs. | Cloth Produced,<br>Million Yards | Value, Millions £ |                        |       |
|------|-----------------------------|----------------------------|----------------------------------|-------------------|------------------------|-------|
|      |                             |                            |                                  | Manu-<br>factures | Yarn, &c.,<br>Exported | Total |

According to Kennedy, Cowell, and others, 10 lbs. raw cotton produce 9 lbs. spun yarn.

The cotton manufactures of Great Britain are almost equal to the aggregate of all other European nations. They constitute, moreover, one of the most important elements of British industry, the output, as shown above, being valued at more than £300,000 a day. If we

The area under cotton in the principal countries is shown thus:—

|                     | Acres      | Crop,<br>Million Lbs. | Lbs. per<br>Acre |
|---------------------|------------|-----------------------|------------------|
| United States . . . | 18,450,000 | 3,420                 | 186              |
| India . . . . .     | 14,530,000 | 888                   | 62               |
| Egypt . . . . .     | 1,060,000  | 290                   | 275              |
| Brazil . . . . .    | 150,000    | 35                    | 230              |
| Other countries . . | 240,000    | 50                    | 208              |
| *Total . . . . .    | 34,260,000 | 4,733                 | 140              |

One man can cultivate 12 acres, or, with machinery, 30 acres. Seed-cotton weighs three times as much as ginned cotton or cotton-wool, the seed forming two-thirds. Thus, in the above table, in the United States a yield of 186 lbs. cotton means that before ginned the crop averaged 560 lbs. seed-cotton per acre.

The average length of fibre is as follows:—

|                      | Inches |                       | Inches |
|----------------------|--------|-----------------------|--------|
| Sea Island . . . . . | 1.61   | Brazilian . . . . .   | 1.17   |
| Egyptian . . . . .   | 1.41   | New Orleans . . . .   | 1.02   |
| Peruvian . . . . .   | 1.30   | East Indian . . . . . | 0.89   |

measure the production of cotton cloth not by yards, but by English statute miles, we find that the mills of Great Britain turn out daily more than 10,000 miles. The daily consumption of raw cotton averages 5,000,000 lbs., say 2200 tons. Each operative consumes yearly as much cotton as 20 acres can produce, and turns out about 7 miles of cotton cloth. This is irrespective of yarn produced for exportation. If all the yarn spun in Great Britain were made into cotton cloth, the output would be nearly one-fourth more.

The quantities of cotton cloth and yarn consumed in Great Britain and exported were approximately as follows:—

| Year | Cotton Cloth, Million Yards |               |       | Yarn, Million Lbs. |               |       |
|------|-----------------------------|---------------|-------|--------------------|---------------|-------|
|      | Home<br>Use                 | Ex-<br>ported | Total | Home<br>Use        | Ex-<br>ported | Total |
| 1814 | 148                         | 192           | 340   | 70                 | 16            | 86    |

| 1880 . . . . .    | 3,059                       | 1,437   | 4,496 | 216                     | 57,100,000        | 18,500,000 | 75,600,000 | 23                          |
| 1887 . . . . .    | 3,473                       | 1,431   | 4,904 | 251                     | 51,700,000        | 19,300,000 | 71,000,000 | 19                          |
| 1888 . . . . .    | 3,608                       | 1,430   | 5,038 | 256                     | 52,600,000        | 19,400,000 | 72,000,000 | 19                          |

The birth of the cotton industry may be said to date from 1793, when Whitney's improved gin was invented in the United States. From that time, as shown above, there was a steady and rapid increase, until the American war of 1861 caused a cotton famine, which was estimated to have caused a loss of 66 millions sterling to Great Britain—more properly 98 millions. The cotton-factories of the United Kingdom advanced thus :—

| Year | Number of<br>Factories | Operatives | Spindles   | Power-<br>Looms | Cotton,<br>Million Lbs. | Cotton, Lbs.<br>per Operative |
|------|------------------------|------------|------------|-----------------|-------------------------|-------------------------------|
| 1838 | 1,815                  | 259,000    | 13,000,000 | 109,000         | 410                     | 1,574                         |
| 1850 | 1,952                  | 331,000    | 20,900,000 | 250,000         | 588                     | 1,780                         |
| 1860 | 2,887                  | ...        | 30,400,000 | 400,000         | 1,140                   | ...                           |
| 1870 | 2,483                  | 449,000    | 38,000,000 | 440,000         | 1,101                   | 2,420                         |
| 1880 | 2,674                  | 487,000    | 41,900,000 | 513,000         | 1,404                   | 2,860                         |
| 1885 | 2,635                  | 504,000    | 44,400,000 | 561,000         | 1,500                   | 2,975                         |

In 1889 Mr. Ellison published the following statement :—

|                            | 1850-61         | 1887            |
|----------------------------|-----------------|-----------------|
| Products exported . . .    | £<br>49,030,000 | £<br>70,960,000 |
| Home consumption . . .     | 27,970,000      | 30,440,000      |
| Total value of products .  | 77,000,000      | 101,400,000     |
| Paid for cotton . . . . .  | 29,290,000      | 34,460,000      |
| Wages . . . . .            | 20,990,000      | 29,400,000      |
| Expenses and profits . . . | 26,720,000      | 37,540,000      |
| Total as above . . . . .   | 77,000,000      | 101,400,000     |

In 1869 Mr. Forwood, of Liverpool, published the following comparative statement :—

|                           | 1860         | 1868         |
|---------------------------|--------------|--------------|
|                           | Million Lbs. | Million Lbs. |
| Cotton consumed . . .     | 1,079        | 996          |
| Waste in spinning . . .   | 113          | 120          |
| Yarn produced . . . . .   | 966          | 876          |
| Yarn exported . . . . .   | 197          | 169          |
| Yarn manufactured . . .   | 769          | 707          |
|                           | £            | £            |
| Value of manufactures     | 70,000,000   | 76,600,000   |
| Do. home use . . . . .    | 24,400,000   | 19,200,000   |
| Do. exported . . . . .    | 45,600,000   | 57,400,000   |
| Do. yarn exported . . . . | 9,900,000    | 14,700,000   |
| Total product . . . . .   | 80,600,000   | 91,300,000   |
| Cost of cotton . . . . .  | 28,900,000   | 41,000,000   |
| Wages, &c. . . . .        | 33,600,000   | 34,900,000   |
| Net profit . . . . .      | 18,100,000   | 15,400,000   |

The ratios of the four preceding tables may be shown thus :—

|                | Forwood |       |               | Ellison |       |
|----------------|---------|-------|---------------|---------|-------|
|                | 1860    | 1868  |               | 1850-61 | 1887  |
| Cost of cotton | 35.9    | 44.9  | Cotton . .    | 38.0    | 34.0  |
| Wages, &c. .   | 41.7    | 38.2  | Wages . .     | 27.3    | 29.0  |
| Net profit . . | 22.4    | 16.9  | Balance . .   | 34.7    | 37.0  |
| Total . . . .  | 100.0   | 100.0 | Total . . . . | 100.0   | 100.0 |

Although Mr. Forwood estimated the profits of mill-owners at £15,400,000 per annum, it is believed that this is above the reality.

The consumption of British cotton cloth was approximately as follows :—

|                     | Millions of Yards |       |       |       |       |
|---------------------|-------------------|-------|-------|-------|-------|
|                     | 1820              | 1840  | 1860  | 1880  | 1889  |
| United Kingdom . .  | 176               | 654   | 1,385 | 1,650 | 1,630 |
| United States . . . | 24                | 32    | 227   | 78    | 49    |
| Spanish America . . | 56                | 279   | 527   | 652   | 720   |
| Europe . . . . .    | 128               | 200   | 201   | 365   | 370   |
| Africa . . . . .    | 10                | 75    | 358   | 589   | 630   |
| East Indies . . . . | 11                | 145   | 825   | 1,813 | 2,363 |
| China . . . . .     | 3                 | 30    | 324   | 632   | 557   |
| Various . . . . .   | 17                | 30    | 303   | 367   | 313   |
| Total . . . . .     | 425               | 1,445 | 4,150 | 6,146 | 6,632 |

The customers who took British yarn were as follows :—

|                     | Exported Yarn, Million Lbs. |      |      |      |      |
|---------------------|-----------------------------|------|------|------|------|
|                     | 1820                        | 1840 | 1860 | 1880 | 1889 |
| Europe . . . . .    | 22                          | 92   | 116  | 95   | 133  |
| East Indies . . . . | ...                         | 16   | 31   | 47   | 49   |
| China and Japan . . | ...                         | 2    | 9    | 46   | 36   |
| Various . . . . .   | 1                           | 9    | 41   | 28   | 34   |
| Total . . . . .     | 23                          | 119  | 197  | 216  | 252  |

Ellison shows the progress of British cotton-mills as follows :—

| Period  | Spinnors | Weavers | Yarn Produced, Million Lbs. | Yarn Consumed, Million Lbs. | Lbs. per Spinner | Lbs. per Weaver |
|---------|----------|---------|-----------------------------|-----------------------------|------------------|-----------------|
| 1819-21 | 110,000  | 250,000 | 107                         | 81                          | 968              | 342             |
| 1829-31 | 140,000  | 275,000 | 217                         | 142                         | 1,546            | 521             |
| 1844-46 | 190,000  | 210,000 | 523                         | 348                         | 2,754            | 1,681           |
| 1859-61 | 248,000  | 203,000 | 910                         | 651                         | 3,671            | 3,206           |
| 1886-87 | 245,000  | 255,000 | 1,415                       | 1,162                       | 5,900            | 4,559           |

He estimates the capital employed in cotton-mills in 1887 at 105 millions sterling.

#### FRANCE

The earliest mention of cotton factories is in 1688, when the consumption of raw cotton reached 500,000 lbs. yearly. The next is in 1750, when it was 4 million pounds. The following table shows approximately the principal features of this industry.

| Period   | Tons, Cotton Consumed | Miles Cloth Made | Value, Millions Lbs. |                   |     |
|----------|-----------------------|------------------|----------------------|-------------------|-----|
|          |                       |                  | Cotton               | Manu-<br>factures | Net |
| 1821-30  | 230,000               | 1,300,000        | 17                   | 106               | 89  |
| 1831-40  | 430,000               | 2,500,000        | 33                   | 160               | 127 |
| 1841-50  | 610,000               | 3,300,000        | 33                   | 136               | 103 |
| 1851-60  | 830,000               | 4,700,000        | 50                   | 158               | 108 |
| 1861-70  | 760,000               | 4,300,000        | 95                   | 180               | 85  |
| 1871-80  | 950,000               | 5,500,000        | 71                   | 165               | 94  |
| 1881-87  | 940,000               | 5,500,000        | 56                   | 132               | 76  |
| 67 years | 4,750,000             | 27,100,000       | 355                  | 1,037             | 682 |

The loss of Alsace in 1871 reduced the number of cotton-spindles in France from 6,120,000 to 4,620,000. In 1884 the number had risen to 5,111,000, but this included 227,000 that were idle. There are 1065 cotton-mills in France, with 108,000 operatives, 75,000 power-

looms and 40,000 hand-looms. In ten years ending 1887 the imports of cotton manufactures averaged £2,600,000, the exports £3,600,000 per annum.

#### GERMANY

The consumption of raw cotton and imported yarn has grown sixfold in half a century, viz :—

| Period          | Consumption Yearly, Million Lbs. Fibre | Number of Spindles | Output, £  |
|-----------------|----------------------------------------|--------------------|------------|
| 1836-40 . . . . | 62                                     | 600,000            | 5,600,000  |
| 1861-70 . . . . | 147                                    | 2,260,000          | 14,700,000 |
| 1881-87 . . . . | 378                                    | 5,150,000          | 24,000,000 |

The business of sixty-seven years was approximately as follows :—

| Period  | Tons Cotton Consumed | Miles Cloth Made | Value Millions £ |                   |     |
|---------|----------------------|------------------|------------------|-------------------|-----|
|         |                      |                  | Cotton           | Manu-<br>factures | Net |
| 1821-30 | 70,000               | 400,000          | 5                | 32                | 27  |
| 1831-40 | 120,000              | 700,000          | 9                | 42                | 33  |
| 1841-50 | 410,000              | 2,300,000        | 23               | 92                | 69  |
| 1851-60 | 660,000              | 3,500,000        | 40               | 125               | 85  |
| 1861-70 | 650,000              | 3,500,000        | 81               | 147               | 66  |
| 1871-80 | 1,140,000            | 6,500,000        | 86               | 195               | 109 |
| 1881-87 | 1,220,000            | 7,000,000        | 73               | 168               | 95  |
| Total   | 4,270,000            | 23,900,000       | 317              | 801               | 484 |

Germany gained 1,450,000 spindles by the annexation of Alsace. The imports of cotton manufactures in ten years down to 1888 averaged £900,000, exports £3,600,000 per annum.

#### RUSSIA

In 1824, according to Schubert, the mills consumed 4 million pounds of cotton and yarn yearly. There were then 484 mills, against 129 in 1812.

The industry has grown rapidly of late years, viz :—

| Year           | Million Lbs. Fibre | Spindles  | Output, £  |
|----------------|--------------------|-----------|------------|
| 1840 . . . . . | 44                 | 700,000   | 4,300,000  |
| 1870 . . . . . | 94                 | 2,500,000 | 9,800,000  |
| 1887 . . . . . | 369                | 4,400,000 | 21,000,000 |

The business of 67 years is summed up approximately thus :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |                   |     |
|----------|----------------------|------------------|-------------------|-------------------|-----|
|          |                      |                  | Cot-<br>ton       | Manu-<br>factures | Net |
| 1821-30  | 50,000               | 300,000          | 4                 | 24                | 20  |
| 1831-40  | 130,000              | 750,000          | 10                | 45                | 35  |
| 1841-50  | 240,000              | 1,400,000        | 14                | 56                | 42  |
| 1851-60  | 360,000              | 2,100,000        | 22                | 69                | 47  |
| 1861-70  | 320,000              | 1,800,000        | 40                | 75                | 35  |
| 1871-80  | 820,000              | 4,600,000        | 62                | 138               | 76  |
| 1881-87  | 890,000              | 5,150,000        | 54                | 123               | 69  |
| 67 years | 2,810,000            | 16,100,000       | 206               | 530               | 324 |

In ten years ending 1887 Russia imported cotton goods worth £6,400,000 yearly.

## AUSTRIA

In 1830 the consumption of raw cotton barely reached 20 million lbs. The following table sums up the business approximately :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |               |     |
|----------|----------------------|------------------|-------------------|---------------|-----|
|          |                      |                  | Cot-ton           | Manu-factures | Net |
| 1821-30  | 60,000               | 350,000          | 5                 | 30            | 25  |
| 1831-40  | 100,000              | 550,000          | 7                 | 31            | 24  |
| 1841-50  | 200,000              | 1,100,000        | 11                | 44            | 33  |
| 1851-60  | 370,000              | 2,100,000        | 22                | 69            | 47  |
| 1861-70  | 330,000              | 1,900,000        | 41                | 77            | 36  |
| 1871-80  | 650,000              | 3,600,000        | 49                | 108           | 59  |
| 1881-87  | 640,000              | 3,500,000        | 38                | 84            | 46  |
| 67 years | 2,350,000            | 13,100,000       | 173               | 443           | 270 |

Imports and exports of cotton manufactures in the last ten years were even.

## ITALY

The annual consumption of cotton in 1830 was only 4 million lbs. The business of 67 years sums up thus :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |               |     |
|----------|----------------------|------------------|-------------------|---------------|-----|
|          |                      |                  | Cot-ton           | Manu-factures | Net |
| 1821-30  | 10,000               | 50,000           | 1                 | 6             | 5   |
| 1831-40  | 30,000               | 150,000          | 2                 | 9             | 7   |
| 1841-50  | 50,000               | 250,000          | 3                 | 12            | 9   |
| 1851-60  | 90,000               | 500,000          | 6                 | 18            | 12  |
| 1861-70  | 120,000              | 650,000          | 15                | 27            | 12  |
| 1871-80  | 310,000              | 1,700,000        | 23                | 51            | 28  |
| 1881-87  | 410,000              | 2,300,000        | 25                | 55            | 30  |
| 67 years | 1,020,000            | 5,600,000        | 75                | 178           | 103 |

A statement published in 1877 showed that the mills had 54,000 operatives, 14,000 looms, 880,000 spindles, steam-power 3000 horse, water-mills 10,000 horse. In ten years ending 1887 Italy imported cotton manufactures worth £2,100,000 yearly.

## SPAIN

In 1769 the first cotton factory was built in Spain. A statement published in 1833 showed 2840 mills, with 810,000 spindles, 60,000 operatives, consuming 11 million lbs. cotton and yarn; product, 55 million yards cloth. The business of 67 years was approximately as follows :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |               |     |
|----------|----------------------|------------------|-------------------|---------------|-----|
|          |                      |                  | Cot-ton           | Manu-factures | Net |
| 1821-30  | 30,000               | 150,000          | 3                 | 15            | 12  |
| 1831-40  | 50,000               | 250,000          | 4                 | 15            | 11  |
| 1841-50  | 110,000              | 600,000          | 6                 | 24            | 18  |
| 1851-60  | 200,000              | 1,100,000        | 12                | 36            | 24  |
| 1861-70  | 170,000              | 900,000          | 21                | 39            | 18  |
| 1871-80  | 340,000              | 1,900,000        | 26                | 57            | 31  |
| 1881-87  | 340,000              | 1,900,000        | 21                | 46            | 25  |
| 67 years | 1,240,000            | 6,800,000        | 93                | 232           | 139 |

A statement in 1886 gave 53,000 operatives, 33,000 looms, 1,800,000 spindles, and goods manufactured to the yearly value of £12,400,000, that is, at an average of sixpence per yard of calico. The value is absurd, a fictitious one, being the result of enormous import duties.

In ten years ending 1887 Spain imported £400,000 worth of cotton goods yearly, and Portugal £700,000.

As regards Portugal, the consumption is close on 10 million lbs. cotton and yarn yearly; output, £600,000; spindles, 140,000.

## SWEDEN

In 1830 the output of the mills was valued at £200,000 a year. The business may be summed up thus :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |               |     |
|----------|----------------------|------------------|-------------------|---------------|-----|
|          |                      |                  | Cot-ton           | Manu-factures | Net |
| 1821-50  | 30,000               | 150,000          | 2                 | 8             | 6   |
| 1851-60  | 50,000               | 250,000          | 3                 | 9             | 6   |
| 1861-70  | 50,000               | 250,000          | 6                 | 11            | 5   |
| 1871-80  | 90,000               | 500,000          | 7                 | 15            | 8   |
| 1881-87  | 90,000               | 500,000          | 6                 | 13            | 7   |
| 67 years | 310,000              | 1,650,000        | 24                | 56            | 32  |

Denmark and Norway have no cotton factories, but consume imported goods. In ten years ending 1887 the net imports of cotton manufactured goods averaged thus :—

|                   |   |           |
|-------------------|---|-----------|
| Denmark           | £ | 2,200,000 |
| Sweden and Norway | £ | 600,000   |
| Total             | £ | 2,800,000 |

Thus the total consumption of cotton goods in Scandinavia approaches a value of 5 millions sterling per annum.

## HOLLAND

The industry may be briefly summed up as follows :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |               |     |
|----------|----------------------|------------------|-------------------|---------------|-----|
|          |                      |                  | Cot-ton           | Manu-factures | Net |
| 1821-50  | 30,000               | 150,000          | 2                 | 8             | 6   |
| 1851-60  | 25,000               | 150,000          | 2                 | 6             | 4   |
| 1861-70  | 20,000               | 100,000          | 3                 | 5             | 2   |
| 1871-80  | 65,000               | 350,000          | 5                 | 11            | 6   |
| 1881-87  | 70,000               | 400,000          | 4                 | 9             | 5   |
| 67 years | 210,000              | 1,150,000        | 16                | 39            | 23  |

## BELGIUM

The business of 67 years was approximately as follows :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |               |     |
|----------|----------------------|------------------|-------------------|---------------|-----|
|          |                      |                  | Cot-ton           | Manu-factures | Net |
| 1821-30  | 40,000               | 200,000          | 3                 | 16            | 13  |
| 1831-40  | 110,000              | 600,000          | 8                 | 36            | 28  |
| 1841-50  | 120,000              | 700,000          | 7                 | 28            | 21  |
| 1851-60  | 130,000              | 750,000          | 8                 | 25            | 17  |
| 1861-70  | 120,000              | 700,000          | 15                | 29            | 14  |
| 1871-80  | 200,000              | 1,100,000        | 15                | 33            | 18  |
| 1881-87  | 170,000              | 950,000          | 13                | 26            | 13  |
| 67 years | 890,000              | 5,000,000        | 69                | 193           | 124 |

The report for 1835 showed that 60,000 operatives turned out goods to the value of £3,400,000 sterling. At present Belgium produces a little more cotton goods than she requires, the net exports for ten years ending 1887 averaging £200,000.

## SWITZERLAND

The business since 1820 sums up approximately thus :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |                   |     |
|----------|----------------------|------------------|-------------------|-------------------|-----|
|          |                      |                  | Cotton            | Manu-<br>factures | Net |
| 1821-40  | 80,000               | 450,000          | 6                 | 33                | 27  |
| 1841-50  | 90,000               | 500,000          | 5                 | 20                | 15  |
| 1851-60  | 120,000              | 650,000          | 7                 | 21                | 14  |
| 1861-70  | 100,000              | 550,000          | 13                | 24                | 11  |
| 1871-80  | 200,000              | 1,100,000        | 15                | 33                | 18  |
| 1881-87  | 160,000              | 900,000          | 10                | 22                | 12  |
| 67 years | 750,000              | 4,150,000        | 56                | 153               | 97  |

## UNITED STATES

The first cotton-mill was founded at Providence, Rhode

The growth of this manufacture is shown as follows :—

| Year           | No. of Mills | Spindles   | Looms   | Operatives | Cotton, Million Lbs. | Capital, Mill. Stg. | Wages, Mill. Stg. | Cotton, Mill. Stg. | Product, Mill. Stg. |
|----------------|--------------|------------|---------|------------|----------------------|---------------------|-------------------|--------------------|---------------------|
| 1830 . . . . . | 801          | 1,240,000  | 33,000  | 62,000     | 77                   | £ 8                 | £ 2               | £                  | £ 8                 |
| 1840 . . . . . | ...          | 2,200,000  | ...     | 72,000     | 135                  | ...                 | ...               | ...                | 10                  |
| 1850 . . . . . | 1,094        | 3,000,000  | ...     | 92,000     | 288                  | 15                  | 3                 | 7                  | 14                  |
| 1860 . . . . . | 1,091        | 5,240,000  | 126,000 | 122,000    | 390                  | 21                  | 5                 | 12                 | 24                  |
| 1870 . . . . . | 956          | 7,130,000  | 157,000 | 135,000    | 400                  | 25                  | 7                 | 19                 | 30                  |
| 1880 . . . . . | 756          | 10,650,000 | 226,000 | 173,000    | 768                  | 43                  | 9                 | 21                 | 44                  |
| 1888 . . . . . | ...          | 13,500,000 | ...     | ...        | 1,010                | ...                 | ...               | ...                | 60                  |

The industry in the United States may be summed up thus approximately :—

| Period   | Tons Cotton Consumed | Miles Cloth Made | Value, Millions £ |                   |     |
|----------|----------------------|------------------|-------------------|-------------------|-----|
|          |                      |                  | Cotton            | Manu-<br>factures | Net |
| 1821-30  | 160,000              | 900,000          | 11                | 43                | 32  |
| 1831-40  | 490,000              | 2,800,000        | 31                | 109               | 78  |
| 1841-50  | 990,000              | 5,700,000        | 49                | 160               | 111 |
| 1851-60  | 1,550,000            | 8,800,000        | 84                | 218               | 134 |
| 1861-70  | 1,970,000            | 11,200,000       | 223               | 376               | 153 |
| 1871-80  | 2,320,000            | 13,300,000       | 157               | 337               | 180 |
| 1881-87  | 2,780,000            | 16,200,000       | 150               | 320               | 170 |
| 67 years | 10,260,000           | 58,900,000       | 705               | 1,563             | 858 |

In ten years ending 1887, the imports of cotton manufactures averaged £5,800,000, the exports £2,500,000. The consumption between home-made and imported goods in 1887 amounted to £52,300,000 sterling.

The cotton crop proceeds from 11 States, and is given by Ellison as follows :—

|                 | Million Lbs. |      |      |       |       |       |       |
|-----------------|--------------|------|------|-------|-------|-------|-------|
|                 | 1800         | 1820 | 1840 | 1860  | 1870  | 1880  | 1888  |
| North Carolina  | 4            | 10   | 52   | 58    | 58    | 175   | 177   |

| Total crop . .  | 36           | 160  | 797  | 2,158 | 1,205 | 2,588 | 3,423 |
| Exported . . .  | 20           | 128  | 661  | 1,760 | 806   | 1,820 | 2,385 |
| Consumption . . | 16           | 32   | 136  | 398   | 399   | 768   | 1,038 |

The above figures from 1840 to 1870 differ somewhat from those of the Agricultural Report, as on page 42.

Island, in 1790, and power-looms were first used at Waltham in 1815. The consumption of raw cotton in 1810 was 5 million lbs.

Mr. Atkinson's report on the cotton-mills of Massachusetts shows, since 1830, as follows :—

| Year           | Average Wages per Operative | Yards Cloth per Operative | Cost of Work, Pence per 100 Yards |
|----------------|-----------------------------|---------------------------|-----------------------------------|
| 1830 . . . . . | £ 34                        | 8,300                     | 98                                |
| 1840 . . . . . | 36                          | 9,600                     | 91                                |
| 1850 . . . . . | 40                          | 12,200                    | 78                                |
| 1860 . . . . . | 41                          | 21,800                    | 46                                |
| 1870 . . . . . | 49                          | 19,900                    | 59                                |
| 1880 . . . . . | 54                          | 28,000                    | 47                                |
| 1884 . . . . . | 60                          | 28,000                    | 54                                |

## INDIA

The first cotton-mill was established at Bombay in 1851; there were 51 mills in 1876, with 40,000 operatives and 1,240,000 spindles, since which year 46 mills have been built, besides 10 more now in course of construction. In June 1889 there were 124 mills, with 92,000 operatives, 19,000 looms, 2,760,000 spindles, consuming yearly 353 million lbs. The capital employed is about £8,800,000 sterling. Cotton-growing covers an area of 14,530,000 acres, of which 5½ millions in Bombay and Scinde: about 30 per cent. of the crop is exported, the rest consumed in India.

## CRIME

The following table is from Professor Bodio's international records of crime, mostly for the years 1876-84 :—

|               | Number of Crimes, Annual Average          |          |         |         |         |
|---------------|-------------------------------------------|----------|---------|---------|---------|
|               | Murder                                    | Wounding | Robbery | Various | Total   |
| France . . .  | 701                                       | 21,404   | 36,140  | 3,610   | 61,855  |
| Germany . .   | 610                                       | 54,250   | 31,480  | 10,550  | 96,890  |
| Italy . . .   | 2,902                                     | 48,620   | 49,860  | 1,420   | 102,802 |
| Spain . . .   | 1,330                                     | 7,310    | 9,513   | 245     | 18,398  |

The percentage of criminals as regards sex in Germany is 826 males to 174 females, and in Denmark 754 to 246. The prison population of Italy is relatively three times as great as in the United Kingdom.

The percentage of criminals punished yearly for insubordination or misconduct in prison was (1871) :—

|                 | Per 100 Males | Per 100 Females |               | Per 100 Males | Per 100 Females |
|-----------------|---------------|-----------------|---------------|---------------|-----------------|
| Great Britain . | 51            | 31              | Sweden . .    | 8             | 8               |
| France . . .    | 46            | 34              | Denmark . .   | 8             | 4               |
| Prussia . . .   | 21            | 14              | Holland . .   | 24            | 14              |
| Austria . . .   | 44            | 13              | Belgium . .   | 14            | ...             |
| Italy . . .     | 38            | 30              | Switzerland . | 18            | 21              |

The classification of crime differs so much in countries that it is almost impossible to make comparisons. As regards murder, some countries include infanticide and all cases of criminal homicide. Statistics on this subject will be found under the various countries in the following pages. Dr. Lombroso found skulls of Italian criminals had 10 per cent. less than ordinary capacity. Dr. Bordier found the reverse in France. Dugdall considers crime in a manner hereditary, and cites the case of Jukes, an Englishman, who emigrated to North America in 1720, and whose descendants numbered 709 persons, including 76 criminals, 128 prostitutes, 142 vagabonds, and 131 blind, insane, and otherwise infirm.

## UNITED KINGDOM

The annual average of committals from 1840 was as follows :—

| Period        | Annual Average of Committals |          |         |                | Number per 100,000 Inhabitants |          |         |                |
|---------------|------------------------------|----------|---------|----------------|--------------------------------|----------|---------|----------------|
|               | England                      | Scotland | Ireland | United Kingdom | England                        | Scotland | Ireland | United Kingdom |
| 1840-49 . . . | 27,910                       | 4,045    | 25,220  | 57,175         | 164                            | 149      | 302     | 204            |
| 1850-59 . . . | 23,924                       | 3,860    | 13,640  | 41,424         | 126                            | 130      | 227     | 151            |
| 1860-69 . . . | 19,230                       | 3,315    | 5,060   | 27,605         | 91                             | 104      | 91      | 92             |
| 1870-79 . . . | 15,290                       | 3,110    | 4,412   | 22,812         | 64                             | 89       | 84      | 69             |
| 1880-89 . . . | 14,100                       | 2,450    | 3,320   | 19,870         | 50                             | 70       | 66      | 55             |

The annual average of convictions was :—

| Period        | Annual Average |          |         |                | Percentage of Convictions to Committals |          |         |                |
|---------------|----------------|----------|---------|----------------|-----------------------------------------|----------|---------|----------------|
|               | England        | Scotland | Ireland | United Kingdom | England                                 | Scotland | Ireland | United Kingdom |
| 1840-49 . . . | 21,280         | 3,029    | 11,730  | 36,039         | 75                                      | 75       | 47      | 63             |
| 1850-59 . . . | 18,291         | 2,902    | 7,705   | 28,898         | 76                                      | 74       | 58      | 70             |
| 1860-69 . . . | 14,530         | 2,463    | 2,918   | 19,911         | 76                                      | 74       | 58      | 72             |
| 1870-79 . . . | 11,720         | 2,190    | 2,492   | 16,402         | 78                                      | 71       | 56      | 72             |
| 1880-89 . . . | 10,800         | 1,910    | 1,760   | 14,470         | 77                                      | 77       | 53      | 72             |

The number of criminal convictions has declined 37 per cent. in the last 22 years, viz. :—

| Year           | Number of Convictions |          |         |                | Per 100,000 Inhabitants |          |         |                |
|----------------|-----------------------|----------|---------|----------------|-------------------------|----------|---------|----------------|
|                | England               | Scotland | Ireland | United Kingdom | England                 | Scotland | Ireland | United Kingdom |
| 1867 . . . . . | 14,207                | 2,510    | 2,733   | 19,450         | 64                      | 75       | 50      | 63             |
| 1877 . . . . . | 11,542                | 2,009    | 2,300   | 16,251         | 48                      | 60       | 45      | 48             |
| 1889 . . . . . | 9,348                 | 1,723    | 1,225   | 12,296         | 32                      | 43       | 25      | 33             |

The number of offenders of all descriptions in the three kingdoms in 1880 was as follows :—

| Guilty of             | England | Scotland | Ireland | United Kingdom | Per 10,000 Inhabitants |          |         |                |
|-----------------------|---------|----------|---------|----------------|------------------------|----------|---------|----------------|
|                       |         |          |         |                | England                | Scotland | Ireland | United Kingdom |
| Crimes and offences . | 203,600 | 80,900   | 55,100  | 339,600        | 80                     | 220      | 104     | 100            |
| Drunkenness . . .     | 172,900 | 26,900   | 88,000  | 287,800        | 68                     | 73       | 166     | 85             |
| Misdemeanour . . .    | 301,400 | 26,700   | 101,400 | 429,500        | 118                    | 72       | 191     | 126            |
| Total . . . . .       | 677,900 | 134,500  | 244,500 | 1,056,900      | 266                    | 365      | 461     | 311            |

Similar returns for 1887 showed as follows :—

| Guilty of             | England | Scotland | Ireland | United Kingdom | Per 10,000 Inhabitants |          |         |                |
|-----------------------|---------|----------|---------|----------------|------------------------|----------|---------|----------------|
|                       |         |          |         |                | England                | Scotland | Ireland | United Kingdom |
| Crimes and offences . | 163,359 | 73,650   | 34,978  | 271,987        | 58                     | 185      | 70      | 73             |
| Drunkenness . . .     | 162,772 | 17,621   | 79,476  | 259,869        | 58                     | 45       | 160     | 70             |
| Misdemeanour . . .    | 366,683 | 29,133   | 105,209 | 501,025        | 99                     | 75       | 210     | 135            |
| Total . . . . .       | 692,814 | 120,404  | 219,663 | 1,032,881      | 215                    | 305      | 440     | 278            |

In 1887 there were 237 persons tried for wilful murder, viz., 163 in England, 23 in Scotland, and 51 in Ireland, the last being for the most part connected with agrarian troubles.

The prison population in 1880 was as follows :—

|               | England | Scotland | Great Britain |
|---------------|---------|----------|---------------|
| Males . . .   | 23,791  | 2,063    | 25,854        |
| Females . . . | 4,533   | 1,008    | 5,541         |
| Total . . .   | 28,324  | 3,071    | 31,395        |

|               | Per 100,000 Inhabitants |          |               |
|---------------|-------------------------|----------|---------------|
|               | England                 | Scotland | Great Britain |
| Males . . .   | 189                     | 114      | 179           |
| Females . . . | 34                      | 52       | 36            |
| General . . . | 109                     | 83       | 105           |

In England there are 84 male to 16 female offenders ; in Scotland 67 of the former to 33 of the latter.

#### ENGLAND AND WALES

There are no records of the number of criminals before the present century. Henry VIII. put to death 71,400 persons as criminals during his reign, but most of them were either virtuous or unoffending persons. He hanged 300 beggars in one year for soliciting alms. In the first half of the present century 2734 persons were hanged in England.

|                        |      |
|------------------------|------|
| For murder . . .       | 616  |
| For burglary . . .     | 1235 |
| For incendiarism . . . | 147  |
| For forgery, &c. . .   | 736  |
| Total . . .            | 2734 |

Hantute's table of convictions compared with the number of executions shows thus :—

| Period          | Convictions Yearly | Executed Yearly | Per 1000 Convictions |
|-----------------|--------------------|-----------------|----------------------|
| 1801-20 . . . . | 9,600              | 85              | 9.0                  |
| 1821-30 . . . . | 18,100             | 67              | 3.7                  |
| 1831-50 . . . . | 25,000             | 18              | 0.7                  |

In one year (1820) no fewer than 46 persons were hanged for forging Bank of England notes, some of which were afterwards asserted to be good. In twenty years ending 1880 there were 279 criminals executed for murder in the United Kingdom, say fourteen yearly.

The number of homicides in England and Wales in 1880 was as follows :—

|                        | Number of Victims |        |       |
|------------------------|-------------------|--------|-------|
|                        | Male              | Female | Total |
| Willful murder . . . . | 43                | 54     | 97    |
| Manslaughter . . . .   | 115               | 58     | 173   |
| Infanticide . . . .    | 48                | 56     | 104   |
| Total . . . .          | 206               | 168    | 374   |

Judicial statistics for ten years ending December 1888 in England and Wales show thus :—

|                                  |      |
|----------------------------------|------|
| Murders committed . . . .        | 1766 |
| No trace of criminal . . . .     | 1094 |
| Persons tried for murder . . . . | 672  |
| Acquitted . . . .                | 231  |
| Found insane . . . .             | 142  |
| Sentenced to death . . . .       | 299  |
| Executed . . . .                 | 154  |

Of those sentenced to death, fifty were women, of whom only nine were executed.

The total number of offenders punished in 1887 was as follows :—

|                       |         |
|-----------------------|---------|
| Criminals . . . .     | 163,359 |
| Misdemeanants . . . . | 529,455 |
| Total . . . .         | 692,814 |

The nationality of the criminals was as follows :—

|                 |                |
|-----------------|----------------|
| English . . . . | 135,770 = 83.1 |
| Welsh . . . .   | 5,193 = 3.2    |
| Scotch . . . .  | 3,103 = 1.9    |
| Irish . . . .   | 15,928 = 9.7   |
| Foreign . . . . | 3,365 = 2.1    |
| Total . . . .   | 163,359 100.0  |

The nationality of criminals in 1887 compares with similar returns for 25 years down to 1881 thus :—

|                 | 1857-71 | 1872-81 | 1887  |
|-----------------|---------|---------|-------|
| English . . . . | 78.2    | 78.7    | 83.1  |
| Welsh . . . .   | 2.6     | 3.0     | 3.2   |
| Scotch . . . .  | 2.1     | 2.3     | 1.9   |
| Irish . . . .   | 14.4    | 13.6    | 9.7   |
| Foreign . . . . | 2.7     | 2.4     | 2.1   |
| Total . . . .   | 100.0   | 100.0   | 100.0 |

The nature of the crimes for which they were punished in 1887 was :—

|                              |       |                      |         |
|------------------------------|-------|----------------------|---------|
| Murder . . . .               | 163   | Grave crimes . . . . | 5,863   |
| Shooting or stabbing . . . . | 970   | Robbery . . . .      | 47,223  |
| Burglary . . . .             | 3,852 | Assault . . . .      | 75,873  |
| Attacks on women . . . .     | 878   | Sundry . . . .       | 34,400  |
| Total . . . .                | 5,863 | Total . . . .        | 163,359 |

The sentences passed on the criminals were :—

|                         |         |
|-------------------------|---------|
| Death . . . .           | 35      |
| Penal servitude . . . . | 948     |
| Imprisonment . . . .    | 162,376 |
| Total . . . .           | 163,359 |

In 1880 the ratio of ages in local prisons was as follows :—

|                        |       |
|------------------------|-------|
| Under 21 years . . . . | 20.6  |
| 21 to 40 . . . .       | 54.7  |
| 41 to 60 . . . .       | 20.8  |
| Over 60 . . . .        | 3.9   |
| Total . . . .          | 100.0 |

The sexes of all classes of offenders and misdemeanants in 1887 showed :—

|                 |         |
|-----------------|---------|
| Males . . . .   | 568,280 |
| Females . . . . | 124,534 |
| Total . . . .   | 692,814 |

As regards criminals the classification was as follows :—

|                        | Number  | Ratio |
|------------------------|---------|-------|
| Able to read . . . .   | 119,993 | 68.6  |
| Unable to read . . . . | 43,366  | 31.4  |
| Total . . . .          | 163,359 | 100.0 |
| Shopkeepers, &c. . . . | 8,445   | 5.2   |
| Mechanics . . . .      | 23,310  | 14.3  |
| Operatives . . . .     | 48,353  | 29.6  |
| Vagrants, &c. . . .    | 83,251  | 50.9  |
| Total . . . .          | 163,359 | 100.0 |

There are 60 local prisons which admitted in 1887 :—

|                                     | Number  | Ratio |
|-------------------------------------|---------|-------|
| New offenders . . . . .             | 96,112  | 55.6  |
| Convicted up to ten times . . . . . | 62,024  | 36.0  |
| Convicted over ten times . . . . .  | 14,311  | 8.4   |
| Total . . . . .                     | 172,447 | 100.0 |

The proportion of sexes showed as follows :—

|                   | Number  | Ratio |
|-------------------|---------|-------|
| Males . . . . .   | 131,812 | 76.7  |
| Females . . . . . | 40,635  | 23.3  |
| Total . . . . .   | 172,447 | 100.0 |

The record for 1887 showed thus :—

|                                    | Local Prisons | Convict Prisons |
|------------------------------------|---------------|-----------------|
| Served time . . . . .              | 156,406       | 2,038           |
| Committed suicide . . . . .        | 12            | 4               |
| Died . . . . .                     | 117           | 73              |
| Sent to lunatic asylums . . . . .  | 169           | 5               |
| Sent to convict prisons . . . . .  | 1,347         | ...             |
| Remaining, December 31st . . . . . | 14,396        | 6,413           |
| Total . . . . .                    | 172,447       | 8,533           |

Of those who served their time out in convict prisons and were liberated, only 617 really finished the term of sentences, 1421 being released on "ticket-of-leave."

The cost of maintenance and the proceeds of labour in the sixty local and ten convict prisons in 1887 showed :—

|                           | Maintenance | Labour Proceeds |
|---------------------------|-------------|-----------------|
| Local prisons . . . . .   | £ 340,000   | £ 116,000       |
| Convict prisons . . . . . | 245,000     | 145,000         |
| Total . . . . .           | 585,000     | 261,000         |

The mean prison population and the cost per criminal were :—

|                           | Criminals, Number | Cost per Annum     |
|---------------------------|-------------------|--------------------|
| Local prisons . . . . .   | 15,119            | £ s. d.<br>22 10 0 |
| Convict prisons . . . . . | 6,800             | 36 14 0            |
| Total . . . . .           | 21,919            | 26 12 0            |

The cost in 1868 averaged £33 per criminal.

The criminal population of England and Wales is shown thus :—

|                                       |        |
|---------------------------------------|--------|
| In prison . . . . .                   | 21,919 |
| In reformatories . . . . .            | 3,230  |
| Adult criminals at large . . . . .    | 28,730 |
| Juvenile criminals at large . . . . . | 4,870  |
| Total . . . . .                       | 58,749 |

As regards the inmates of convict prisons, 11 per cent. of the men and 34 per cent. of the women have been convicted ten times or upwards. During the year 1889 there were 1512 juvenile convicts sent to reformatories.

## SCOTLAND

The prison population has been as follows :—

| Year           | Males | Females | Total | Per 100,000 Inhabitants |
|----------------|-------|---------|-------|-------------------------|
| 1840 . . . . . | 1,362 | 686     | 2,048 | 80                      |
| 1850 . . . . . | 2,042 | 1,017   | 3,059 | 108                     |
| 1860 . . . . . | 1,106 | 1,059   | 2,165 | 71                      |
| 1870 . . . . . | 1,726 | 1,099   | 2,825 | 83                      |
| 1888 . . . . . | 2,065 | 1,008   | 3,073 | 83                      |
| 1887 . . . . . | ...   | ...     | 2,074 | 52                      |

The record for 1887 was composed thus :—

|                      |        |
|----------------------|--------|
| Murder . . . . .     | 23     |
| Burglary . . . . .   | 948    |
| Robbery . . . . .    | 11,119 |
| Assault, &c. . . . . | 61,560 |

Total . . . . . 73,650

The classification of offences and misdemeanours being different from that used in England and Ireland, the number of crimes and offences appears unduly high. The local and convict prisons admitted in 1887 offenders of both sexes to the number of 46,108; the cost of prison maintenance reaching £127,000, or about £40 per inmate.

## IRELAND

The record for 1887 showed as follows for persons tried :—

|                       |     |                       |         |
|-----------------------|-----|-----------------------|---------|
| Murder . . . . .      | 51  | Crimes . . . . .      | 1,213   |
| Shooting, &c. . . . . | 171 | Offences . . . . .    | 33,765  |
| Burglary . . . . .    | 135 | Drunkenness . . . . . | 79,476  |
| Assault, &c. . . . .  | 856 | Sundry . . . . .      | 105,209 |

Crimes . . . . . 1,213 Total . . . . . 219,663

The following classifications are given :—

|                          | Per Cent. |       |
|--------------------------|-----------|-------|
|                          | Men       | Women |
| Able to read . . . . .   | 70        | 53    |
| Unable to read . . . . . | 30        | 47    |
| Total . . . . .          | 100       | 100   |

There are 4 convict and 26 local prisons, the admissions to which showed :—

|                                    | Per Cent. |       |
|------------------------------------|-----------|-------|
|                                    | Men       | Women |
| New offenders . . . . .            | 47        | 24    |
| Convicted up to 10 times . . . . . | 37        | 23    |
| Convicted over 10 times . . . . .  | 16        | 53    |
| Total . . . . .                    | 100       | 100   |

The maintenance of the prisons in 1887 cost £124,000.

## FRANCE

Official returns since 1826 are as follows :—

| Period            | Convictions Yearly for Crime | For Crimes and Offences |
|-------------------|------------------------------|-------------------------|
| 1831-40 . . . . . | 5,486                        | 55,100                  |
| 1841-50 . . . . . | 4,970                        | 97,200                  |
| 1851-60 . . . . . | 3,572                        | 119,500                 |
| 1871-80 . . . . . | 3,650                        | 132,500                 |
| 1883-87 . . . . . | 3,105                        | 206,400                 |

The number of crimes and offences compared with population was as follows :—

| Period  | Per Million Inhabitants |          |       | Convicts in Penal Servitude |                         |
|---------|-------------------------|----------|-------|-----------------------------|-------------------------|
|         | Crimes                  | Offences | Total | Number                      | Per Million Inhabitants |
| 1830-40 | 230                     | 2,080    | 2,310 | 16,820                      | 511                     |
| 1841-60 | 195                     | 3,610    | 3,805 | 18,330                      | 515                     |
| 1861-70 | 110                     | 3,870    | 3,980 | 18,210                      | 489                     |
| 1871-80 | 120                     | 4,320    | 4,440 | 16,630                      | 458                     |
| 1883-87 | 81                      | 5,390    | 5,471 | 13,380                      | 352                     |

The annual ratio of some of the graver crimes is shown as follows :—

| Period            | Arson | Infanti-<br>cide | Assault<br>on Girls | Murder |
|-------------------|-------|------------------|---------------------|--------|
| 1826-30 . . . . . | 87    | 120              | 136                 | 10     |
| 1831-40 . . . . . | 122   | 184              | 196                 | 64     |
| 1841-50 . . . . . | 194   | 247              | 383                 | 80     |
| 1851-60 . . . . . | 225   | 347              | 638                 | 116    |
| 1861-70 . . . . . | 202   | 343              | 744                 | 116    |
| 1871-80 . . . . . | 180   | 296              | 758                 | 70     |

Before 1860 the law against criminal assaults regarded only girls under eleven, but since that year it was extended to the age of thirteen. The above return of murders only comprises those of the most aggravated character; the real number is much greater. In 1880, for example, there were 645 murders and homicides, against 808 in the United Kingdom.

The classification of criminals since 1826 has been as follows :—

| Period            | Sexes per Cent. |         | Percentage of Age |       |         | Per Cent. |           | Per Cent.    |        |
|-------------------|-----------------|---------|-------------------|-------|---------|-----------|-----------|--------------|--------|
|                   | Males           | Females | Under 21          | 21-40 | Over 40 | Married   | Unmarried | Able to Read | Unable |
| 1826-30 . . . . . | 81              | 19      | 18                | 58    | 24      | ...       | ...       | 39           | 61     |
| 1831-40 . . . . . | 83              | 17      | 17                | 60    | 23      | 42        | 58        | 42           | 58     |
| 1841-50 . . . . . | 83              | 17      | 17                | 57    | 26      | 45        | 55        | 48           | 52     |
| 1851-60 . . . . . | 82              | 18      | 16                | 56    | 28      | 47        | 53        | 56           | 44     |
| 1861-70 . . . . . | 84              | 16      | 16                | 54    | 30      | 46        | 54        | 61           | 39     |
| 1871-80 . . . . . | 83              | 17      | 18                | 54    | 28      | 45        | 55        | 67           | 33     |

The proportion of "recidivists" or old offenders has increased as follows :—

|                |              |                |              |
|----------------|--------------|----------------|--------------|
| 1826 . . . . . | 10 per cent. | 1870 . . . . . | 41 per cent. |
| 1850 . . . . . | 28 "         | 1880 . . . . . | 48 "         |

The number of criminals to each class in society was as follows :—

|                     | Per Million Persons |        |
|---------------------|---------------------|--------|
|                     | Male                | Female |
| Unmarried . . . . . | 400                 | 90     |
| Married . . . . .   | 200                 | 30     |
| Widowed . . . . .   | 240                 | 40     |

In eight years ending 1868 the number to each class was as follows :—

| Criminals per Million           |     |                                 |     |
|---------------------------------|-----|---------------------------------|-----|
| Husband with child . . . . .    | 186 | Widower with child . . . . .    | 237 |
| Wife with child . . . . .       | 32  | Widow with child . . . . .      | 44  |
| Husband without child . . . . . | 287 | Widower without child . . . . . | 262 |
| Wife without child . . . . .    | 60  | Widow without child . . . . .   | 35  |

The following table shows the total number of persons tried :—

| Year | Tried         |         |           | Con-<br>demned | Per 1000<br>Population |
|------|---------------|---------|-----------|----------------|------------------------|
|      | Law<br>Courts | Police  | Total     |                |                        |
| 1831 | 372,000       | 105,000 | 477,000   | 426,000        | 13.3                   |
| 1840 | 373,000       | 228,000 | 601,000   | 549,000        | 16.1                   |
| 1850 | 486,000       | 306,000 | 792,000   | 736,000        | 21.0                   |
| 1860 | 431,000       | 509,000 | 940,000   | 894,000        | 24.2                   |
| 1870 | 337,000       | 234,000 | 571,000   | 549,000        | 14.4                   |
| 1880 | 598,000       | 424,000 | 1,022,000 | 995,000        | 26.5                   |
| 1885 | 675,000       | 467,000 | 1,142,000 | 1,111,000      | 29.4                   |

The prison population at various dates was thus :—

| Year           | Galleys | Prisons | Refor-<br>matories | Total  |
|----------------|---------|---------|--------------------|--------|
| 1852 . . . . . | 6,800   | 47,000  | 6,400              | 60,200 |
| 1860 . . . . . | 3,600   | 42,100  | 8,600              | 54,300 |
| 1870 . . . . . | 2,600   | 33,600  | 6,800              | 43,000 |
| 1880 . . . . . | 11,700  | 40,600  | 9,000              | 61,300 |
| 1884 . . . . . | 13,400  | 40,000  | 7,000              | 60,400 |

The prison population in 1885 was :—

|                   |        |                          |        |
|-------------------|--------|--------------------------|--------|
| Males . . . . .   | 53,299 | Prisons . . . . .        | 47,456 |
| Females . . . . . | 7,537  | Penal colonies . . . . . | 13,380 |

Total . . 60,836 Total . . 60,836

In December 1880 there were 13,927 at the galleys, viz. :—

|                               |       |   |                |
|-------------------------------|-------|---|----------------|
| First offenders . . . . .     | 2,891 | = | 20.9 per cent. |
| Up to 3 convictions . . . . . | 4,733 | = | 34.0 "         |
| Over 3 convictions . . . . .  | 6,303 | = | 45.1 "         |

Total . . 13,927 = 100.0 "

|                     | Per Million |         |
|---------------------|-------------|---------|
|                     | Males       | Females |
| Unmarried . . . . . | 590         | 100     |
| Married . . . . .   | 200         | 35      |
| Widowed . . . . .   | 270         | 50      |

| Age               | Per Million |         |            |
|-------------------|-------------|---------|------------|
|                   | Males       | Females | Both Sexes |
| 7-21 . . . . .    | 230         | 50      | 90         |
| 21-40 . . . . .   | 370         | 75      | 240        |
| 41-60 . . . . .   | 180         | 35      | 130        |
| Over 60 . . . . . | 100         | 10      | 60         |

The general ratio was 100 criminals in rural population and 220 in towns per million inhabitants.

The rank and position of French criminals was :—

|                          |             |
|--------------------------|-------------|
| Men of fortune . . . . . | 6 per cent. |
| Servants . . . . .       | 13 "        |
| Tradesmen . . . . .      | 14 "        |
| Artisans, &c. . . . .    | 67 "        |

100.0 " \*

Criminals under sixteen years of age in 1859 were :—

| Guilty of          | Boys  | Girls | Total |
|--------------------|-------|-------|-------|
| Murder . . . .     | 6     | 3     | 9     |
| Wounding . . . .   | 269   | 50    | 319   |
| Robbery, &c. . . . | 6,887 | 1,706 | 8,593 |
| Total . . . .      | 7,162 | 1,759 | 8,921 |

The number of criminals of all ages tried annually in the term of five years ending 1880 was as follows :—

Males . . . 3,682 = 200 per million of population  
Females . . . 692 = 40 " " "

Total . 4,374 = 120 " " "

In a period of 47 years ending 1880 sentence of death was passed on 1775 murderers, of whom 205 were women ; they were as follows :—

|                 |     |                  |       |
|-----------------|-----|------------------|-------|
| 1833-40 . . . . | 326 | 1861-70 . . . .  | 193   |
| 1841-50 . . . . | 485 | 1871-80 . . . .  | 272   |
| 1851-60 . . . . | 499 | 48 years . . . . | 1,775 |

The ratio of age of the above murderers was :—

|                  | Number | Ratio |
|------------------|--------|-------|
| Under 21 . . . . | 106    | 6.2   |
| 21-40 . . . .    | 1,182  | 66.2  |
| 41-60 . . . .    | 420    | 24.1  |
| Over 60 . . . .  | 67     | 3.5   |
| Total . . . .    | 1,775  | 100.0 |

The condemned persons belonged to the following States :—

| Against              | Prussia | Bavaria | Saxony | Wurtemberg | Baden  | Duchies | Total   |
|----------------------|---------|---------|--------|------------|--------|---------|---------|
| Person . . . .       | 79,839  | 24,147  | 5,786  | 4,968      | 3,891  | 15,388  | 134,019 |
| Property . . . .     | 97,864  | 20,433  | 10,675 | 5,636      | 5,170  | 18,745  | 158,523 |
| Public order . . . . | 39,011  | 5,084   | 3,976  | 3,013      | 1,435  | 7,939   | 60,458  |
| Total . . . .        | 216,714 | 49,664  | 20,437 | 13,617     | 10,496 | 42,072  | 353,000 |

Of the above offenders 102,800, say 29 per cent., had been previously convicted. The number of persons convicted compared with the population over twelve years of age gave the following ratios per 10,000 :—

| Against          | 1882 | 1883 | 1884 | 1885 | 1886 |
|------------------|------|------|------|------|------|
| Person . . . .   | 34   | 35   | 39   | 39   | 41   |
| Property . . . . | 53   | 51   | 51   | 49   | 48   |
| Order . . . .    | 16   | 16   | 17   | 17   | 18   |
| Total . . . .    | 103  | 102  | 107  | 105  | 107  |

The ratios in 1886 were as follows :—

|                     | Offenders per 10,000 Population over 12 Years Old ; against— |          |       |       |
|---------------------|--------------------------------------------------------------|----------|-------|-------|
|                     | Person                                                       | Property | Order | Total |
| Prussia . . . .     | 40                                                           | 49       | 20    | 109   |
| Bavaria . . . .     | 62                                                           | 53       | 13    | 128   |
| Saxony . . . .      | 26                                                           | 47       | 18    | 91    |
| Wurtemberg . . . .  | 35                                                           | 40       | 22    | 97    |
| Baden . . . .       | 34                                                           | 45       | 13    | 92    |
| Hesse . . . .       | 39                                                           | 32       | 12    | 83    |
| Mecklenburg . . . . | 20                                                           | 31       | 16    | 67    |
| Oldenburg . . . .   | 20                                                           | 34       | 14    | 68    |
| Brunswick . . . .   | 31                                                           | 43       | 15    | 89    |
| Hamburg . . . .     | 28                                                           | 61       | 25    | 114   |
| Bremen . . . .      | 35                                                           | 72       | 36    | 143   |
| Alsace . . . .      | 41                                                           | 32       | 25    | 98    |

Only 1067 were actually executed, 671 being commuted, and 37 dying in prison, for the most part of suicide.

In the year 1885 the number of prisoners sent to hospital was equal to 67 per cent. among the men and 60 per cent. among women.

Prison diet consists of 5 oz. of bread and 13 oz. vegetables and potatoes daily, with a meat ration of 4 oz. twice a week.

#### GERMANY

In 1886 the criminal records of the Empire were :—

|                      | Accused | Condemned | Under 18 Years of Age | Condemned |        |
|----------------------|---------|-----------|-----------------------|-----------|--------|
|                      |         |           |                       | Men       | Women  |
| Murder . . . .       | 337     | 298       | 18                    | 231       | 67     |
| Assault . . . .      | 56,785  | 42,586    | 720                   | 31,188    | 11,398 |
| Burglary . . . .     | 19,325  | 15,983    | 509                   | 13,880    | 2,103  |
| Robbery . . . .      | 104,206 | 88,816    | 17,266                | 64,668    | 24,148 |
| Fraud . . . .        | 17,628  | 13,609    | 1,195                 | 10,825    | 2,784  |
| Perjury . . . .      | 3,330   | 2,948     | 345                   | 2,425     | 523    |
| Embezzlement . . . . | 18,025  | 14,731    | 1,514                 | 11,639    | 3,092  |
| Various . . . .      | 213,171 | 174,029   | 9,946                 | 156,578   | 17,451 |
| Total . . . .        | 432,807 | 353,000   | 31,513                | 291,434   | 61,566 |

It appears that women formed less than 18 per cent. of the total number of convicts, but as regards robbery their ratio was much higher, namely, 27 per cent. Convicts under 18 years of age were 9 per cent. of the total.

In a term of 14 years ending 1852 the number of criminals and offenders in Saxony averaged yearly as follows :—

| Age             | Per Million Persons |         |
|-----------------|---------------------|---------|
|                 | Males               | Females |
| 16-20 . . . .   | 900                 | 180     |
| 21-30 . . . .   | 2,100               | 400     |
| 31-40 . . . .   | 2,300               | 600     |
| 41-50 . . . .   | 1,300               | 250     |
| 51-60 . . . .   | 800                 | 160     |
| Over 60 . . . . | 300                 | 60      |

The number of male criminals and offenders per million male inhabitants rose as follows in Saxony :—

| Period          | Per Million |
|-----------------|-------------|
| 1832-44 . . . . | 1,170       |
| 1845-54 . . . . | 1,280       |
| 1872 . . . .    | 1,515       |

In a period of 10 years ending 1879, the number of criminals found guilty of wilful murder in Prussia, Bavaria, and Austria was :—

|                 | Number | Per Annum |
|-----------------|--------|-----------|
| Prussia . . . . | 484    | 48        |
| Bavaria . . . . | 245    | 25        |
| Austria . . . . | 816    | 82        |
| Total . . . .   | 1,945  | 195       |

Only 23 of the above assassins suffered death, namely, 16 in Austria and 7 in Bavaria.

In Prussia during a term of 14 years ending 1874 the number of murders yearly committed showed as compared with population thus:—

Committed by men . . . 30 per million  
Committed by women . . . 10 „ „

## RUSSIA

Statistics for 1887 may be summed up thus:—

| Before               | Convictions | Sentence            |           |
|----------------------|-------------|---------------------|-----------|
| Senate . . . . .     | 10,800      | Exile . . . . .     | 20,590    |
| Supreme courts . . . | 172,100     | Penal servitude . . | 58,020    |
| Divisional . . . . . | 207,000     | Hard labour, &c. .  | 1,097,190 |
| Police . . . . .     | 785,900     |                     |           |
| Total . . . . .      | 1,175,800   | Total . . . . .     | 1,175,800 |

The prison population was made up thus:—

|                   |                  |                     |
|-------------------|------------------|---------------------|
| Convicts . 82,570 | Males . 98,710   | In Russia . 75,350  |
| Untried . 26,270  | Females . 10,130 | Siberia, &c. 33,490 |
| Total . 108,840   | Total . 108,840  | Total . 108,840     |

## AUSTRIA

The criminal records of Austria proper in 1886 showed:—

| For       | Supreme Court |           | For        | Police and other Courts |           |
|-----------|---------------|-----------|------------|-------------------------|-----------|
|           | Accused       | Condemned |            | Accused                 | Condemned |
| Murder .  | 379           | 274       | Fraud .    | 25,030                  | 13,083    |
| Assault . | 5,702         | 4,787     | Theft .    | 184,182                 | 124,521   |
| Fraud .   | 3,920         | 2,689     | Assault .  | 148,186                 | 98,843    |
| Robbery . | 17,383        | 15,054    | Disorder . | 130,753                 | 87,881    |
| Various . | 8,750         | 6,902     | Sundry .   | 549,952                 | 234,115   |
| Total .   | 36,134        | 29,706    | Total .    | 1,038,103               | 558,443   |

The sentences passed on the condemned persons were:—

| Supreme Court          |        | Lower Courts       |         |
|------------------------|--------|--------------------|---------|
| Death . . . . .        | 5      | 8 to 30 days . . . | 83,663  |
| Galley for life . . .  | 27     | Over 30 days . . . | 13,254  |
| 5 to 20 years . . . .  | 574    | Fined . . . . .    | 368,311 |
| 1 to 5 years . . . . . | 4,147  | Reprimanded . . .  | 980     |
| Under 12 months . .    | 24,953 | ... . . . .        | ...     |
| Total . . . . .        | 29,706 | Total . . . . .    | 558,443 |

The age and condition of the greater criminals were:—

|                    | Age    |                   | Males  | Females | Total  |
|--------------------|--------|-------------------|--------|---------|--------|
| Under 20 . . . . . | 5,287  | Single . . . . .  | 15,113 | 2,318   | 17,431 |
| 20 to 30 . . . . . | 12,370 | Married . . . . . | 9,767  | 1,553   | 11,320 |
| 30 to 60 . . . . . | 11,328 | Widowed . . . . . | 572    | 383     | 955    |
| Over 60 . . . . .  | 721    | ... . . . .       | ...    | ...     | ...    |
| Total . . . . .    | 29,706 | Total . . . . .   | 25,452 | 4,254   | 29,706 |

The reformatories contain 3046 boys and 279 girls. The ratios of sex among all persons condemned in 1886 were:—

|                   | Supreme Court | Lower Courts |
|-------------------|---------------|--------------|
| Males . . . . .   | 85.7          | 81.5         |
| Females . . . . . | 14.3          | 18.5         |
| Total . . . . .   | 100.0         | 100.0        |

Prison population was as follows:—

|                   | 1882   | 1886   |
|-------------------|--------|--------|
| Males . . . . .   | 10,139 | 9,785  |
| Females . . . . . | 1,598  | 1,439  |
| Total . . . . .   | 11,737 | 11,224 |

There are 21 penal establishments, of which six are for women.

## HUNGARY

The records for 1886 show the number of persons condemned as follows:—

|                      | Males   | Females | Total   |
|----------------------|---------|---------|---------|
| Supreme court . . .  | 17,817  | 2,393   | 20,210  |
| Divisional . . . . . | 44,113  | 14,891  | 59,004  |
| Correctional . . . . | 29,583  | 6,501   | 36,084  |
| Police . . . . .     | 220,026 | 35,032  | 255,058 |
| Total . . . . .      | 311,539 | 58,817  | 370,356 |

The crimes tried and sentences passed at the Supreme Court were:—

| Crimes             | Sentences                       |
|--------------------|---------------------------------|
| Murder . . . . .   | 190                             |
| Incendiarism . . . | 132                             |
| Assault . . . . .  | 2,502                           |
| Robbery . . . . .  | 4,905                           |
| Various . . . . .  | 12,481                          |
| Total . . . . .    | 20,210                          |
|                    | Death . . . . . 20              |
|                    | Imprisonment over 5 years . 771 |
|                    | „ 1 to 5 years . 5,119          |
|                    | „ 6 to 12 months . 5,505        |
|                    | „ under 6 months . 8,795        |
| Total . . . . .    | 20,210                          |

The convictions in the Divisional and Correctional Courts were as follows:—

|                    | Divisional |         |        | Correctional |         |        |
|--------------------|------------|---------|--------|--------------|---------|--------|
|                    | Males      | Females | Total  | Males        | Females | Total  |
| Theft . . . . .    | 8,830      | 2,021   | 10,851 | 7,766        | 1,455   | 9,221  |
| Assault . . . . .  | 7,304      | 541     | 7,845  | 6,114        | 406     | 6,520  |
| Disorder . . . . . | 9,256      | 1,815   | 11,071 | 7,224        | 1,204   | 8,428  |
| Fraud . . . . .    | 2,552      | 580     | 3,132  | 1,156        | 221     | 1,380  |
| Various . . . . .  | 16,171     | 9,934   | 26,105 | 7,323        | 3,212   | 10,535 |
| Total . . . . .    | 44,113     | 14,891  | 59,004 | 29,583       | 6,501   | 36,084 |

The sentences passed in the above courts and that of Police were:—

| Imprisonment         | Divisional | Correctional | Police  | Total   |
|----------------------|------------|--------------|---------|---------|
| Over 6 months . . .  | ...        | 885          | ...     | 885     |
| 1 to 6 months . . .  | 3,340      | 2,656        | 2,230   | 8,226   |
| 14 to 30 days . . .  | 7,934      | 6,242        | 5,080   | 19,256  |
| 1 to 14 days . . . . | 24,505     | 26,301       | 44,850  | 95,656  |
| Fined . . . . .      | 23,225     | ...          | 134,400 | 157,625 |
| Reprimanded . . . .  | ...        | ...          | 68,498  | 68,498  |
| Total . . . . .      | 59,004     | 36,084       | 255,058 | 350,146 |

Criminals condemned at the Supreme Court and offenders at the Divisional Court were classified thus according to age:—

| Age                | Criminals |         |        | Offenders |         |        |
|--------------------|-----------|---------|--------|-----------|---------|--------|
|                    | Males     | Females | Total  | Males     | Females | Total  |
| Under 20 . . . . . | 2,574     | 393     | 2,967  | 4,592     | 1,333   | 5,925  |
| 20-30 . . . . .    | 7,923     | 925     | 8,848  | 19,054    | 6,129   | 25,183 |
| 30-60 . . . . .    | 6,950     | 1,013   | 7,963  | 19,654    | 7,192   | 26,846 |
| Over 60 . . . . .  | 370       | 62      | 432    | 813       | 237     | 1,050  |
| Total . . . . .    | 17,817    | 2,393   | 20,210 | 44,113    | 14,891  | 59,004 |

## CRIME

## SCANDINAVIA

The convictions for 1881 and 1887 show as follows :—

| Tried for    | Sweden |        | Norway |        |
|--------------|--------|--------|--------|--------|
|              | 1881   | 1887   | 1881   | 1887   |
| Crimes . .   | 9,608  | 9,157  | 3,318  | 2,932  |
| Offences . . | 48,598 | 45,404 | 25,369 | 22,664 |
| Total . .    | 58,206 | 54,561 | 28,687 | 25,596 |
| Males . .    | 54,792 | 51,491 | 26,684 | 23,639 |
| Females . .  | 3,414  | 3,070  | 2,003  | 1,957  |
| Total . .    | 58,206 | 54,561 | 28,687 | 25,596 |

Denmark showed 3525 persons convicted of crime in 1885, including 872 women.

## EGYPT

The records for five years are as follows :—

|                | 1888   | Average<br>Four Years |
|----------------|--------|-----------------------|
| Crimes . . .   | 1,144  | 530                   |
| Offences . . . | 32,236 | 17,710                |
| Total . . .    | 33,380 | 18,240                |

The above does not include Upper Egypt.

## AUSTRALIA

Official returns are as follows :—

| Year        | Per 10,000 Pop. |                 |                  |
|-------------|-----------------|-----------------|------------------|
|             | Arrests         | Com-<br>mittals | Con-<br>victions |
| 1861. . . . | 53,570          | 2,745           | 1,656            |
| 1871. . . . | 68,800          | 2,617           | 1,557            |
| 1881. . . . | 117,130         | 3,361           | 2,024            |
| 1888. . . . | 130,250         | 3,630           | 2,212            |

Arrests include all manner of crimes and offences ; com-  
mittals only crimes. The several colonies showed thus  
in 1888 :—

|                   | Arrests | Com-<br>mittals | Con-<br>victions | Convictions<br>per 10,000<br>Population |
|-------------------|---------|-----------------|------------------|-----------------------------------------|
| New South Wales   | 42,580  | 1,423           | 915              | 8.3                                     |
| Victoria . . .    | 37,310  | 873             | 557              | 5.1                                     |
| Queensland . .    | 18,430  | 538             | 275              | 7.0                                     |
| South Australia . | 6,600   | 190             | 91               | 2.9                                     |
| New Zealand . .   | 10,170  | 499             | 308              | 5.1                                     |
| Tasmania . . .    | 6,160   | 107             | 66               | 4.4                                     |
| Total . . .       | 130,250 | 3,630           | 2,212            | 6.2                                     |

## CANADA

The records for 1888 may be summed up thus :—

| Crimes        |       | Offences       |        |
|---------------|-------|----------------|--------|
| Accused . .   | 5,867 | Fined . .      | 31,276 |
| Acquitted . . | 2,120 | Imprisoned . . | 2,626  |
| Convicted . . | 3,747 | Total . .      | 33,902 |

The prison population in December 1887 was 3024,  
or 64 per 100,000 inhabitants.

## CAPE COLONY

The official returns for 1888 were as follows :—

| Prison Population |       |             |       | Convictions in 1888 |        |
|-------------------|-------|-------------|-------|---------------------|--------|
| Coloured . .      | 2,012 | Males . .   | 2,032 | Crimes . .          | 1,408  |
| White . . .       | 220   | Females . . | 200   | Offences . .        | 39,172 |
| Total . . .       | 2,232 | Total . . . | 2,232 | Total . .           | 40,580 |

The prison population was equal to 150 per 100,000  
inhabitants.

## INDIA

The returns for all classes of criminals and offenders  
in 1887 compare with those for 1881 as follows :—

|                    | 1881      | 1887      |
|--------------------|-----------|-----------|
| Tried . . . .      | 1,172,000 | 1,377,000 |
| Acquitted . . . .  | 527,000   | 703,000   |
| Convicted . . . .  | 645,000   | 674,000   |
| Fined . . . .      | 468,000   | 500,000   |
| Imprisoned . . . . | 177,000   | 174,000   |

The prison population in the same years was as  
follows :—

|                 | 1881   | 1887   |
|-----------------|--------|--------|
| Males . . . .   | 83,429 | 73,940 |
| Females . . . . | 3,888  | 2,570  |
| Total . . . .   | 87,317 | 76,510 |

There were 15,259 criminals whipped in 1887, against  
75,200 in 1878. The prison population is only 38 per  
100,000 inhabitants, or less than half the ratio that pre-  
vails in the United Kingdom.

## ALGERIA

In 1886 the records showed as follows :—

| Convictions             | Sentence |
|-------------------------|----------|
| Criminal courts . . . . | 12,408   |
| Police courts . . . .   | 59,981   |
| Total . . . .           | 72,389   |
| Imprisonment . . . .    | 17,502   |
| Fine . . . .            | 54,887   |
| Total . . . .           | 72,389   |

## MINOR COLONIES

|                 | Crimes | Offences | Total  | Per<br>Million<br>Inhab. | Year |
|-----------------|--------|----------|--------|--------------------------|------|
| Mauritius . . . | 129    | 13,707   | 13,836 | 381                      | 1888 |
| Jamaica . . .   | 2,412  | 8,119    | 10,531 | 176                      | 1887 |
| Singapore . . . | 227    | 36,111   | 36,338 | 179                      | 1888 |
| Hong-Kong . .   | 99     | 9,932    | 10,031 | 478                      | 1888 |
| Ceylon . . . .  | 1,330  | 12,961   | 14,291 | 48                       | 1886 |

## UNITED STATES

The number of offenders in prison at the following  
dates, according to Census returns, was :—

| Year         | Number | Per Million<br>Inhabitants |
|--------------|--------|----------------------------|
| 1850 . . . . | 6,737  | 292                        |
| 1860 . . . . | 19,086 | 610                        |
| 1870 . . . . | 32,901 | 875                        |
| 1880 . . . . | 59,258 | 1,180                      |

The Census of 1880 classified offenders as follows :—

|             |        |            |        |             |        |
|-------------|--------|------------|--------|-------------|--------|
| Males . . . | 54,190 | Americans  | 46,348 | White . . . | 42,280 |
| Females . . | 5,068  | Foreigners | 12,910 | Coloured    | 16,978 |
| Total . . . | 59,258 | Total      | 59,258 | Total . . . | 59,258 |

The *Chicago Tribune* gives the following statistics of murders and executions in the United States since 1884 :—

| Year        | Murders | Legal Executions | Lynchings |
|-------------|---------|------------------|-----------|
| 1884 . . .  | 3,377   | 103              | 219       |
| 1885 . . .  | 1,808   | 108              | 181       |
| 1886 . . .  | 1,499   | 83               | 133       |
| 1887 . . .  | 2,335   | 79               | 123       |
| 1888 . . .  | 2,184   | 87               | 144       |
| 1889 . . .  | 3,567   | 98               | 175       |
| Total . . . | 14,770  | 558              | 975       |

There are four States in which capital punishment is not allowed: Maine, Rhode Island, Wisconsin, and Michigan.

### CURIOSITIES

Prices paid in recent times have been for—

*Books*.—Mr. Quaritch paid £4900 for a Latin Psalter, and £3900 for a Mazarin Bible at Syson Hall sale.

*Coins*.—In 1889 a silver penny of William the Conqueror fetched £32, a half-crown of Elizabeth £44, and one of Charles I. £35 sterling.

*Letters and Autographs*.—In 1889 at public sale in London the following prices were paid :—

|                   |    |                 |    |                 |    |
|-------------------|----|-----------------|----|-----------------|----|
| Addison . . .     | 5  | Franklin . . .  | 6  | Pope . . .      | 16 |
| Bolingbroke . .   | 9  | Gibbon . . .    | 6  | Quincey . . .   | 7  |
| Bruce (trav.) . . | 6  | Hood . . .      | 6  | Richelieu . . . | 5  |
| Burke . . .       | 8  | Hume . . .      | 5  | Schiller . . .  | 6  |
| Burns . . .       | 18 | Irving, W. . .  | 2  | Scott . . .     | 17 |
| Byron . . .       | 7  | Johnson, S. . . | 6  | Shelley . . .   | 19 |
| Carlyle . . .     | 4  | Kean, E. . .    | 9  | Smollett . . .  | 8  |
| Coleridge . . .   | 3  | Keats . . .     | 14 | Sterne . . .    | 8  |
| Dickens . . .     | 9  | Lamb, C. . .    | 6  | Tennyson . . .  | 7  |
| Disraeli . . .    | 5  | Nelson . . .    | 11 | Thackeray . .   | 6  |
| Elizabeth, Q. . . | 11 | Newton . . .    | 64 | Washington . .  | 10 |
| Elliot, G. . .    | 11 | Poe, E. . .     | 6  |                 |    |

*Manuscripts*.—That of Burns's poem "Scots Wha Hae" was sold in London in May 1890 for £70; that of Wilkie Collins's novel "The Woman in White," on the same occasion, for £320.

*Postage Stamps*.—A collection was sold in Paris in 1880 for £8000 sterling; the purchaser was said to be the Duchess Galiera, otherwise known for her princely donations to the poor of Genoa.

*Violins*.—At a sale in Paris in 1887 the following prices were paid :—

|                    | Date | £     |
|--------------------|------|-------|
| Stradivarius . . . | 1689 | 760   |
| " . . .            | 1691 | 480   |
| Ruggeri . . .      | 1650 | 1,280 |

A violin bow by Tourte fetched £44 sterling.

*Walking-Stick*.—That of George IV. was sold at auction in July 1890 for £18 sterling.

### CUSTOMS

The following table shows the customs revenue of nations :—

|                       | Amount, £   |             | Ratio to Total Commerce |           | Shillings per Inhabitant |           |
|-----------------------|-------------|-------------|-------------------------|-----------|--------------------------|-----------|
|                       | 1871-80     | 1887        | 1871-80                 | 1887      | 1871-80                  | 1887      |
|                       |             |             | Per Cent                | Per Cent. | Per Cent.                | Per Cent. |
| United Kingdom . . .  | 20,110,000  | 19,900,000  | 3.36                    | 3.10      | 12.5                     | 10.5      |
| France . . .          | 10,320,000  | 13,400,000  | 3.78                    | 4.45      | 5.7                      | 7.0       |
| Germany . . .         | 8,640,000   | 12,700,000  | 3.28                    | 4.10      | 4.0                      | 4.5       |
| Russia . . .          | 10,525,000  | 10,200,000  | 10.02                   | 10.20     | 3.0                      | 2.2       |
| Austria . . .         | 2,610,000   | 3,000,000   | 2.38                    | 2.40      | 1.5                      | 1.6       |
| Italy . . .           | 5,080,000   | 10,000,000  | 5.80                    | 11.10     | 3.6                      | 6.5       |
| Spain . . .           | 4,410,000   | 3,600,000   | 12.10                   | 6.00      | 5.5                      | 4.2       |
| Portugal . . .        | 1,790,000   | 3,400,000   | 15.22                   | 41.00     | 8.5                      | 18.0      |
| Belgium . . .         | 780,000     | 1,200,000   | 0.87                    | 1.10      | 3.1                      | 4.0       |
| Holland . . .         | 415,000     | 400,000     | 0.36                    | 0.20      | 2.2                      | 2.0       |
| Denmark . . .         | 950,000     | 1,200,000   | 5.42                    | 5.70      | 10.0                     | 12.0      |
| Sweden and Norway . . | 2,390,000   | 2,600,000   | 7.05                    | 6.10      | 7.6                      | 8.0       |
| Europe . . .          | 68,020,000  | 81,600,000  | 3.90                    | 4.10      | 4.4                      | 5.5       |
| United States . . .   | 26,030,000  | 44,600,000  | 13.10                   | 15.00     | 12.0                     | 15.0      |
| Canada . . .          | 2,715,000   | 4,800,000   | 8.23                    | 11.20     | 13.0                     | 18.5      |
| Australia . . .       | 4,250,000   | 7,500,000   | 6.11                    | 7.50      | 34.0                     | 45.0      |
| Brazil . . .          | 6,680,000   | 9,200,000   | 20.32                   | 21.00     | 13.1                     | 15.0      |
| India . . .           | 2,220,000   | 3,200,000   | 2.33                    | 2.20      | 0.2                      | 0.3       |
| Egypt . . .           | 780,000     | 800,000     | 4.51                    | 4.00      | 4.0                      | 4.0       |
| The world . . .       | 110,695,000 | 151,700,000 | 5.10                    | 5.60      | 3.9                      | 5.2       |

The British customs revenue is shown as follows :—

| Year       | £          | Ratio to Commerce | Shillings per Inhabitant |
|------------|------------|-------------------|--------------------------|
| 1580 . . . | 14,000     | 0.42              | 0.1                      |
| 1614 . . . | 178,000    | 4.22              | 0.8                      |
| 1684 . . . | 530,000    | 6.70              | 2.0                      |
| 1720 . . . | 1,555,000  | 10.40             | 5.1                      |
| 1800 . . . | 6,788,000  | 10.02             | 13.0                     |
| 1827 . . . | 21,009,000 | 23.10             | 18.1                     |
| 1844 . . . | 24,277,000 | 20.05             | 18.0                     |
| 1866 . . . | 21,276,000 | 4.95              | 14.2                     |
| 1881 . . . | 19,184,000 | 3.36              | 11.4                     |
| 1888 . . . | 20,100,000 | 2.93              | 10.5                     |

In 1883 the incidence of British Customs was estimated :—

|                  | Amount Paid by Classes |           |            | Total Amount |
|------------------|------------------------|-----------|------------|--------------|
|                  | Rich                   | Middle    | Working    |              |
|                  | £                      | £         | £          | £            |
| Spirits . . .    | 170,000                | 1,350,000 | 2,703,000  | 4,223,000    |
| Wine . . .       | 455,000                | 885,000   | 26,000     | 1,366,000    |
| Tea . . .        | 160,000                | 1,288,000 | 2,526,000  | 3,974,000    |
| Coffee . . .     | 11,000                 | 90,000    | 212,000    | 313,000      |
| Fruits . . .     | 35,000                 | 285,000   | 190,000    | 510,000      |
| Tobacco, &c. . . | 370,000                | 2,890,000 | 5,620,000  | 8,890,000    |
| Total . . .      | 1,201,000              | 6,808,000 | 11,267,000 | 19,276,000   |

The incidence per head on each class was as follows:—

|               | Rich |    |    | Middle |    |    | Working |    |    | Total |    |    |
|---------------|------|----|----|--------|----|----|---------|----|----|-------|----|----|
|               | £    | s. | d. | £      | s. | d. | £       | s. | d. | £     | s. | d. |
| Spirits . . . | 0    | 2  | 11 | 0      | 2  | 10 | 0       | 2  | 3  | 0     | 2  | 5  |
| Wine . . .    | 0    | 7  | 10 | 0      | 1  | 10 | 0       | 0  | 0  | 0     | 0  | 10 |
| Tea . . .     | 0    | 2  | 9  | 0      | 2  | 9  | 0       | 2  | 1  | 0     | 2  | 3  |
| Coffee . . .  | 0    | 0  | 2  | 0      | 0  | 2  | 0       | 0  | 2  | 0     | 0  | 2  |
| Fruits . . .  | 0    | 0  | 7  | 0      | 0  | 7  | 0       | 0  | 2  | 0     | 0  | 3  |
| Tobacco, &c.  | 0    | 6  | 5  | 0      | 5  | 6  | 0       | 5  | 0  | 0     | 5  | 5  |
| Total . . .   | 1    | 0  | 8  | 0      | 13 | 8  | 0       | 9  | 8  | 0     | 11 | 4  |

The working classes form 69 per cent., the middle class 28 per cent., and the upper class 3 per cent. of the population of the United Kingdom, as appears from the Probate returns (1877).

The duties *ad valorem* on English cotton goods in foreign countries in 1884 were:—

|                              | Per Cent. |                            | Per Cent. |
|------------------------------|-----------|----------------------------|-----------|
| China, Guiana . . .          | 5         | Belgium, Greece . . .      | 15        |
| India, Queensland . . .      | 5         | Holland, New Zealand . . . | 15        |
| Turkey . . .                 | 7         | Austria . . .              | 18        |

| Spirits, gallon . . .         | 6    | 22   | 22   | 10   |
| Sugar, cwt.                   | 27   | 63   | 63   | ...  |
| Tallow . . .                  | ...  | 3    | 1    | ...  |
| Tea . . .                     | 45   | 224  | 240  | 56   |
| Tobacco . . .                 | 392  | 448  | 784  | 392  |
| Wine, gallon . . .            | 5    | 14   | 53   | 1    |
| Wool, cwt.                    | ...  | 56   | 9    | ...  |

Blanks in the above table signify duty-free. Grain was subject to import-dues on a sliding scale, according to market prices in Great Britain, down to 1846.

The customs revenue of China in 1883 reached 6 millions sterling.

## D.

## DAIRY

The subjoined table shows approximately the number of milch cows and the dairy products of various countries. English cows average 400 gallons of milk yearly, and the butter produce of a good cow is about 140 lbs. In Holland each cow gives about 80 lbs. of butter, and 180 lbs. cheese. New York cows average 330 lbs. cheese, Canadian 280 lbs., and Parma 300 lbs. It takes a gallon of milk to make a pound of cheese.

|                      | Milch Cows | Tons Butter and Cheese | Value of Butter, Cheese, and Milk |
|----------------------|------------|------------------------|-----------------------------------|
|                      |            |                        | £                                 |
| United Kingdom . . . | 3,400,000  | 110,000                | 31,200,000                        |
| France . . .         | 4,800,000  | 160,000                | 47,000,000                        |

## UNITED KINGDOM

The annual production of milk in the United Kingdom exceeds 400 gallons per cow, say 1400 million gallons, of which 400 millions are used for making butter and cheese, 600 millions as milk for the table at an average of 16 gallons per inhabitant, and 400 millions in fattening calves, &c. The consumption in London is only a little over 6 gallons per inhabitant. At the churning competition of England in 1889 the average production of

butter was 4 per cent., that is 2½ gallons milk to one pound of butter.

The consumption of dairy products in the United Kingdom has been approximately as follows:—

| Year | Native Butter and Cheese, Tons | Tons Imported |        |         | Total Consumption | Lbs. per Inhabitant |
|------|--------------------------------|---------------|--------|---------|-------------------|---------------------|
|      |                                | Butter        | Cheese | Total   |                   |                     |
| 1850 | 90,000                         | 15,000        | 15,000 | 30,000  | 120,000           | 10                  |
| 1860 | 95,000                         | 37,000        | 26,000 | 63,000  | 158,000           | 12                  |
| 1870 | 100,000                        | 52,000        | 46,000 | 98,000  | 198,000           | 14                  |
| 1880 | 105,000                        | 104,000       | 79,000 | 183,000 | 288,000           | 18                  |
| 1889 | 110,000                        | 136,000       | 82,000 | 218,000 | 328,000           | 19                  |

The item of imported butter in 1889 was made up of 83,000 tons real butter and 53,000 tons margarine.

A farm in Cheshire of fifty milch cows has been found to produce 9½ tons of cheese, equal to 420 lbs. per cow, valued at £750 sterling. The farm covered 200 acres, of which 15 were under wheat, and the farmer's balance-sheet was as follows:—

|                  | Payments, £ |            | Receipts, £ |  |
|------------------|-------------|------------|-------------|--|
| Rent . . . .     | 400         | Cheese . . | 750         |  |
| Taxes . . . .    | 60          | Pigs . . . | 150         |  |
| Labour (7 hands) | 296         | Sheep . .  | 133         |  |
| Sundries . . .   | 268         | Wheat . .  | 180         |  |
| Total . . .      | 1,024       | Total . .  | 1,213       |  |

This left the farmer a balance of £189 to support his family.

#### FRANCE

In 1883 the production of milk reached 1660 million gallons, or about 350 per cow. French economists think that about 40 per cent., say 660 million gallons, is used for making butter and cheese, the product of which would be about 360 million lbs. or 160,000 tons. The value of milk is officially put down at 7d. per gallon.

#### UNITED STATES

The following table shows the official returns of butter and cheese for various years, and an estimate for 1890:—

| Year | Milk Cows  | Cheese, Tons | Butter, Tons | Total Product | Consumed | Lbs. per Inhab. |
|------|------------|--------------|--------------|---------------|----------|-----------------|
| 1850 | 6,400,000  | 47,000       | 138,000      | 185,000       | 178,000  | 16              |
| 1860 | 8,600,000  | 46,000       | 205,000      | 251,000       | 237,000  | 17              |
| 1870 | 10,100,000 | 68,000       | 228,000      | 296,000       | 268,000  | 15              |
| 1880 | 12,030,000 | 121,000      | 347,000      | 468,000       | 394,000  | 17              |
| 1890 | 15,950,000 | 160,000      | 450,000      | 610,000       | 560,000  | 20              |

#### DEATHS

The death-rates per 1000 inhabitants yearly were:—

|                  | 1861-70 | 1871-80 |
|------------------|---------|---------|
| England . . . .  | 22.6    | 21.3    |
| Scotland . . . . | 22.1    | 21.8    |
| Ireland . . . .  | 16.8    | 18.3    |
| United Kingdom   | 21.4    | 21.0    |
| France . . . .   | 22.9    | 24.3    |
| Germany . . . .  | ...     | 27.1    |
| Austria Proper . | 30.4    | 31.2    |
| Hungary . . . .  | 38.7    | 40.1    |
| Italy . . . .    | 30.1    | 29.7    |
| Spain . . . .    | ...     | 29.7    |
| Belgium . . . .  | 22.8    | 22.6    |
| Holland . . . .  | 24.9    | 24.3    |
| Denmark . . . .  | 20.1    | 19.3    |
| Sweden . . . .   | 20.0    | 18.4    |
| Switzerland . .  | 24.0    | 24.0    |

The rates in the principal cities (1878-80) were:—

|                 |      |                |      |                |      |
|-----------------|------|----------------|------|----------------|------|
| Alexandria . .  | 34.2 | Dublin . . .   | 27.1 | New York . .   | 26.2 |
| Amsterdam . .   | 23.7 | Edinburgh . .  | 20.2 | Nottingham .   | 22.4 |
| Baltimore . .   | 21.1 | Geneva . . .   | 21.2 | Oldham . . .   | 22.8 |
| Belfast . . .   | 28.2 | Glasgow . . .  | 25.3 | Palermo . . .  | 28.5 |
| Berlin . . . .  | 27.6 | Hamburg . . .  | 24.5 | Paris . . . .  | 28.6 |
| Birmingham .    | 19.8 | Havana . . .   | 45.7 | Philadelphia . | 20.3 |
| Bombay . . .    | 33.7 | Hull . . . .   | 23.8 | Portsmouth .   | 19.7 |
| Bordeaux . . .  | 26.7 | Leeds . . . .  | 21.6 | Quebec . . .   | 22.9 |
| Boston . . . .  | 23.5 | Leicester . .  | 21.8 | Rio Janeiro .  | 39.4 |

The following table shows the death-rate for ages per 1000 inhabitants:—

|                 | Under 5 | 5-10 | 10-25 | 25-45 | 45-55 | 55-65 | 65-75 |
|-----------------|---------|------|-------|-------|-------|-------|-------|
| England . . .   | 63.6    | 6.6  | 5.5   | 10.2  | 17.4  | 31.8  | 64.3  |
| United States   | 58.8    | 10.1 | 5.4   | 10.8  | 17.6  | 27.2  | 51.4  |
| France . . . .  | 75.6    | 9.2  | 8.8   | 12.7  | 16.6  | 28.3  | 66.3  |
| Prussia . . . . | ...     | 9.2  | 6.4   | 11.5  | 18.6  | 33.0  | 64.5  |
| Austria . . .   | 111.7   | 9.8  | 6.6   | 11.3  | 21.1  | 41.5  | 92.8  |
| Switzerland .   | ...     | 8.5  | 6.3   | 11.6  | 19.3  | 38.4  | 82.5  |
| Italy . . . .   | 110.6   | 11.6 | 7.8   | 11.7  | 17.3  | 33.1  | 70.1  |
| Spain . . . .   | 106.2   | 11.7 | 8.8   | 12.9  | 23.8  | 42.0  | 95.0  |
| Belgium . . .   | 68.1    | 12.7 | 8.1   | 12.9  | 19.0  | 32.3  | 74.5  |
| Sweden . . .    | 57.6    | 8.0  | 4.8   | 8.2   | 14.7  | 27.4  | 62.6  |
| Medium . . .    | 81.5    | 9.7  | 6.8   | 11.4  | 18.5  | 33.5  | 72.4  |

Under another classification of ages the *Demography* (1877) gives as follows:—

|                 | Under 1 | 1-5  | 5-10 | 10-20 | 20-40 | Over 60 | General | Period  |
|-----------------|---------|------|------|-------|-------|---------|---------|---------|
| Norway . . . .  | 116     | 29.1 | 7.2  | 6.5   | 11.0  | 58.9    | 18.4    | 1860-68 |
| Sweden . . . .  | 150     | 31.1 | 6.9  | 5.9   | 12.6  | 70.0    | 20.5    | 1861-70 |
| Denmark . . .   | 150     | 23.4 | 7.4  | 6.8   | 13.0  | 71.4    | 21.6    | 1860-69 |
| France . . . .  | 216     | 34.7 | 7.2  | 8.6   | 12.9  | 68.2    | 22.8    | 1856-65 |
| England . . .   | 191     | 36.7 | 6.7  | 8.2   | 15.7  | 67.9    | 22.8    | 1857-66 |
| Belgium . . .   | 186     | 36.1 | 7.7  | 8.5   | 13.4  | 79.1    | 23.3    | 1851-60 |
| Holland . . .   | 211     | 36.4 | 8.0  | 8.0   | 15.4  | 70.1    | 25.0    | 1860-68 |
| Prussia . . . . | 220     | 46.0 | 7.2  | 7.0   | 15.4  | 72.7    | 25.8    | "       |
| Bavaria . . .   | 372     | 39.8 | 7.4  | 8.8   | 17.3  | 81.5    | 29.5    | "       |
| Spain . . . .   | 226     | 67.8 | 8.2  | 8.2   | 17.0  | 95.0    | 29.6    | "       |
| Italy . . . .   | 254     | 53.7 | 8.2  | 8.1   | 17.4  | 88.2    | 30.1    | "       |
| Austria . . .   | 303     | 40.6 | 7.3  | 8.1   | 17.1  | 84.0    | 32.4    | "       |
| Russia . . . .  | 312     | 54.7 | 9.7  | 8.6   | 19.4  | 78.1    | 36.8    | "       |
| Scotland . . .  | 157     | 34.4 | 7.1  | 9.3   | 16.4  | 67.9    | 22.3    | "       |
| Portugal . . .  | 139     | 36.0 | 7.2  | 6.0   | 13.5  | 80.0    | ...     | 1860-62 |

According to the above table the countries which have the highest and the lowest death-rates at various ages are as follow:—

| Age, Years       | Highest  | Lowest  |
|------------------|----------|---------|
| Under 1 . . . .  | Bavaria  | Norway  |
| 1-5 . . . .      | Spain    | Denmark |
| 5-15 . . . .     | Russia   | England |
| 15-30 . . . .    | Scotland | Sweden  |
| 30-60 . . . .    | Russia   | Norway  |
| Over 60 . . . .  | Spain    | Norway  |
| All ages . . . . | Russia   | Norway  |

## DEATH-RATE AT CERTAIN AGES PER 1000

| Age | England | Scotland | France | Belgium | Spain | Switzerland | Austria Proper | Prussia | Sweden | Italy |
|-----|---------|----------|--------|---------|-------|-------------|----------------|---------|--------|-------|
| 5   | 12.5    | 13.0     | 11.2   | 11.4    | 30.4  | 13.2        | 28.3           | 17.5    | 15.9   | 23.3  |
| 10  | 4.3     | 5.7      | 5.4    | 4.3     | 7.9   | 4.5         | 8.5            | 6.5     | 6.2    | 8.0   |
| 15  | 4.1     | 5.9      | 5.4    | 4.6     | 6.4   | 4.4         | 6.2            | 4.6     | 4.5    | 5.9   |
| 20  | 5.5     | 7.3      | 7.4    | 6.4     | 7.7   | 6.3         | 8.7            | 6.1     | 5.2    | 7.8   |
| 25  | 6.9     | 8.2      | 9.1    | 7.7     | 8.2   | 7.7         | 11.6           | 7.6     | 6.1    | 8.8   |
| 30  | 8.2     | 8.9      | 9.8    | 8.6     | 9.0   | 8.7         | 11.5           | 9.7     | 6.8    | 8.8   |
| 35  | 10.2    | 10.4     | 10.1   | 9.4     | 10.1  | 10.1        | 11.4           | 10.7    | 7.4    | 9.7   |
| 40  | 11.9    | 11.6     | 11.1   | 11.1    | 12.3  | 11.9        | 14.1           | 10.9    | 8.7    | 10.4  |
| 45  | 14.7    | 14.5     | 12.6   | 12.4    | 14.1  | 14.0        | 16.2           | 11.6    | 9.9    | 12.9  |
| 50  | 17.0    | 16.9     | 15.5   | 16.3    | 16.3  | 17.5        | 22.3           | 18.0    | 13.0   | 15.4  |
| 55  | 24.4    | 23.9     | 20.1   | 19.4    | 18.0  | 24.4        | 27.1           | 24.3    | 15.5   | 22.0  |
| 60  | 30.4    | 29.6     | 28.3   | 30.5    | 31.1  | 36.1        | 40.9           | 37.1    | 24.9   | 29.8  |
| 65  | 47.2    | 45.3     | 41.5   | 39.4    | 41.6  | 52.3        | 52.0           | 50.1    | 32.3   | 48.2  |
| 70  | 60.7    | 57.9     | 62.9   | 66.6    | 70.4  | 79.4        | 84.3           | 80.3    | 56.9   | 71.8  |
| 75  | 96.7    | 92.9     | 92.2   | 88.4    | 93.5  | 116.2       | 110.2          | 107.1   | 76.5   | 112.6 |
| 80  | 125.5   | 121.0    | 135.6  | 143.5   | 124.1 | 167.5       | 172.9          | 151.1   | 130.0  | 146.4 |

The percentage of death at various ages was as follows :—

| Age          | France  | Prussia | Austria Pr. | Italy   | Switzerland | Belgium | Holland | Sweden  | Brussels |
|--------------|---------|---------|-------------|---------|-------------|---------|---------|---------|----------|
|              | 1866-72 | 1868-73 | 1868-74     | 1872-74 | 1873-74     | 1865-74 | 1870-73 | 1868-73 | ...      |
| Under 1 year | 18.5    | 21.1    | 32.4        | 26.4    | 26.3        | 20.2    | 29.1    | 21.3    | 21.3     |
| 1-5          | 11.0    | 24.5    | 16.1        | 21.3    | 7.7         | 16.7    | 15.7    | 13.6    | 18.1     |
| 5-10         | 3.2     | 4.1     | 4.2         | 4.5     | 2.5         | 4.7     | 3.9     | 4.7     | 3.7      |
| 10-15        | 1.8     | 1.9     | 1.9         | 2.1     | 1.6         | 2.1     | 2.2     | 2.1     | 1.9      |
| 15-20        | 2.6     | 2.3     | 2.1         | 2.2     | 2.1         | 2.4     | 2.3     | 2.2     | 2.0      |
| 20-30        | 7.7     | 5.7     | 5.4         | 5.6     | 5.8         | 6.3     | 5.6     | 5.3     | 17.1     |
| 30-40        | 6.5     | 6.1     | 5.7         | 5.2     | 6.5         | 6.1     | 5.9     | 5.9     |          |
| 40-50        | 6.9     | 6.8     | 6.3         | 5.5     | 7.3         | 6.3     | 6.0     | 7.2     | 8.9      |
| 50-60        | 8.7     | 7.9     | 7.8         | 6.5     | 9.4         | 7.2     | 6.8     | 8.4     | 8.7      |
| 60-70        | 12.6    | 9.5     | 8.7         | 8.8     | 13.7        | 10.8    | 8.8     | 10.8    | 8.8      |
| 70-80        | 13.9    | 7.5     | 6.7         | 8.1     | 12.5        | 11.4    | 9.6     | 12.6    | 9.5      |
| 80-90        | 6.0     | 2.4     | 2.4         | 3.4     | 4.4         | 5.2     | 3.8     | 5.4     |          |
| Over 90      | 0.6     | 0.2     | 0.3         | 0.4     | 0.3         | 0.6     | 0.3     | 0.5     | ...      |
| Total        | 100.0   | 100.0   | 100.0       | 100.0   | 100.0       | 100.0   | 100.0   | 100.0   | 100.0    |

The ratio of deaths in quarters of the year was :—

|              | Quarter ending |           |            |           | Year  |
|--------------|----------------|-----------|------------|-----------|-------|
|              | March 31st     | June 30th | Sept. 30th | Dec. 31st |       |
| Amsterdam    | 298            | 235       | 223        | 244       | 1,000 |
| Berlin       | 216            | 252       | 325        | 207       | 1,000 |
| Birmingham   | 306            | 224       | 235        | 235       | 1,000 |
| Bombay       | 288            | 257       | 233        | 222       | 1,000 |
| Buda-Pesth   | 272            | 278       | 238        | 212       | 1,000 |
| Calcutta     | 254            | 233       | 207        | 306       | 1,000 |

Wappaeus gives the following table on the subject :—

| Month               | Sardinia | Bavaria | Saxony  | Belgium | Holland | Denmark | Norway  | Sweden  | France  |
|---------------------|----------|---------|---------|---------|---------|---------|---------|---------|---------|
|                     | 1828-37  | 1844-51 | 1847-59 | 1841-50 | 1840-49 | 1845-54 | 1845-55 | 1851-55 | 1831-40 |
| January . . . . .   | 114      | 114     | 115     | 125     | 119     | 108     | 118     | 99      | 107     |
| February . . . . .  | 116      | 123     | 103     | 122     | 109     | 111     | 114     | 115     | 111     |
| March . . . . .     | 107      | 128     | 105     | 121     | 110     | 118     | 114     | 121     | 123     |
| April . . . . .     | 105      | 119     | 106     | 114     | 102     | 118     | 118     | 118     | 114     |
| May . . . . .       | 86       | 98      | 104     | 101     | 97      | 111     | 113     | 107     | 97      |
| June . . . . .      | 84       | 88      | 92      | 96      | 94      | 97      | 95      | 85      | 87      |
| July . . . . .      | 91       | 83      | 88      | 85      | 91      | 97      | 84      | 76      | 84      |
| August . . . . .    | 108      | 86      | 97      | 84      | 95      | 88      | 84      | 82      | 92      |
| September . . . . . | 102      | 88      | 98      | 87      | 99      | 80      | 88      | 102     | 102     |
| October . . . . .   | 91       | 88      | 92      | 83      | 91      | 83      | 88      | 95      | 91      |
| November . . . . .  | 98       | 92      | 99      | 85      | 91      | 91      | 92      | 101     | 84      |
| December . . . . .  | 98       | 93      | 101     | 97      | 102     | 98      | 92      | 99      | 108     |
| Year . . . . .      | 1,200    | 1,200   | 1,200   | 1,200   | 1,200   | 1,200   | 1,200   | 1,200   | 1,200   |

The death-rate distinguishing married and single shows thus :—

#### DEATHS YEARLY PER 10,000 OF EACH CLASS

##### Men

| Age             | France, 1856-65 |         | Belgium, 1851-60 |         | Holland, 1850-59 |         | Average |         |
|-----------------|-----------------|---------|------------------|---------|------------------|---------|---------|---------|
|                 | Single          | Married | Single           | Married | Single           | Married | Single  | Married |
| 15-20 . . . . . | 69              | 513     | 64               | 119     | 64               | 121     | 66      | 251     |
| 20-30 . . . . . | 117             | 75      | 88               | 82      | 106              | 76      | 104     | 78      |
| 31-40 . . . . . | 124             | 71      | 96               | 80      | 144              | 102     | 121     | 84      |
| 41-50 . . . . . | 180             | 105     | 144              | 118     | 220              | 150     | 181     | 124     |
| 51-60 . . . . . | 288             | 186     | 225              | 197     | 365              | 258     | 293     | 214     |
| 61-70 . . . . . | 515             | 385     | 430              | 406     | 605              | 465     | 517     | 418     |
| 71-80 . . . . . | 990             | 902     | 840              | 870     | 1,110            | 940     | 980     | 903     |

## Women

| Age             | France, 1856-65 |         | Belgium, 1851-60 |         | Holland, 1850-59 |         | Average |         |
|-----------------|-----------------|---------|------------------|---------|------------------|---------|---------|---------|
|                 | Single          | Married | Single           | Married | Single           | Married | Single  | Married |
| 15-20 . . . . . | 75              | 119     | 84               | 132     | 67               | 140     | 75      | 130     |
| 20-30 . . . . . | 86              | 95      | 83               | 126     | 78               | 126     | 82      | 115     |
| 31-40 . . . . . | 104             | 94      | 91               | 117     | 115              | 143     | 103     | 118     |
| 41-50 . . . . . | 145             | 104     | 122              | 119     | 160              | 141     | 142     | 121     |
| 51-60 . . . . . | 240             | 167     | 212              | 175     | 280              | 200     | 244     | 181     |
| 61-70 . . . . . | 490             | 380     | 440              | 355     | 525              | 415     | 485     | 383     |
| 71-80 . . . . . | 1,150           | 905     | 920              | 750     | 1,030            | 870     | 1,033   | 842     |

The general rates for single and married of both sexes show thus :—

| Age             | Scotland |         | France |         | Belgium |         | Holland |         | Average |         |
|-----------------|----------|---------|--------|---------|---------|---------|---------|---------|---------|---------|
|                 | Single   | Married | Single | Married | Single  | Married | Single  | Married | Single  | Married |
| 15-20 . . . . . | ...      | ...     | 72     | 316     | 74      | 126     | 65      | 130     | 70      | 191     |
| 20-30 . . . . . | 136      | 72      | 101    | 85      | 86      | 104     | 92      | 101     | 104     | 90      |
| 31-40 . . . . . | 160      | 102     | 114    | 82      | 93      | 99      | 130     | 122     | 124     | 101     |
| 41-50 . . . . . | 198      | 155     | 162    | 105     | 133     | 119     | 190     | 145     | 171     | 131     |
| 51-60 . . . . . | 274      | 228     | 264    | 176     | 218     | 186     | 322     | 230     | 270     | 205     |
| 61-70 . . . . . | 524      | 440     | 502    | 382     | 435     | 380     | 565     | 440     | 506     | 410     |
| 71-80 . . . . . | ...      | ...     | 1,070  | 903     | 880     | 810     | 1,070   | 905     | 1,007   | 873     |

The above does not include widowed persons.

The deaths according to sex for ten years ending 1874 were :—

## DEATHS OF MALES TO 100 FEMALES

|                   |                   |                     |
|-------------------|-------------------|---------------------|
| England . . . 107 | Austria . . . 107 | Hungary . . . 108   |
| France . . . 107  | Sweden . . . 104  | Switzerland . . 108 |
| Prussia . . . 107 | Holland . . . 104 | Italy . . . 106     |
| Bavaria . . . 107 | Belgium . . . 106 | Average . . . 106   |

The following table shows the percentage of deaths according to condition for ten years ending 1874 :—

|                   | France | Prussia | Belgium | Holland | Sweden | Italy |
|-------------------|--------|---------|---------|---------|--------|-------|
| Single . . . . .  | 505    | 641     | 594     | 628     | 552    | 652   |
| Married . . . . . | 305    | 231     | 250     | 232     | 267    | 216   |
| Widowed . . . . . | 190    | 128     | 156     | 140     | 181    | 132   |
| Total . . . . .   | 1,000  | 1,000   | 1,000   | 1,000   | 1,000  | 1,000 |

According to Dr. Gairdner, overcrowding increases the death-rate notably, viz. :—

| Population per Square Mile | Deaths per 1000 Inhabitants Yearly |
|----------------------------|------------------------------------|
| 100-150 . . . . .          | 16                                 |
| 150-300 . . . . .          | 20                                 |
| Over 300 . . . . .         | 24                                 |

The following table shows death-rate with distinction of sex and age :—

| Age             | Per 10,000 of each Class |         |               |         |                 |         |
|-----------------|--------------------------|---------|---------------|---------|-----------------|---------|
|                 | France, 1857-65          |         | Belgium, 1856 |         | Sweden, 1861-70 |         |
|                 | Males                    | Females | Males         | Females | Males           | Females |
| 1-5 . . . . .   | 348                      | 344     | 237           | 250     | 235             | 225     |
| 5-10 . . . . .  | 85                       | 89      | 73            | 72      | 54              | 49      |
| 10-20 . . . . . | 60                       | 69      | 77            | 92      | 53              | 46      |
| 20-30 . . . . . | 96                       | 91      | 129           | 110     | 75              | 62      |
| 30-40 . . . . . | 87                       | 98      | 168           | 154     | 107             | 90      |
| 40-50 . . . . . | 123                      | 115     | 177           | 195     | 162             | 122     |
| 50-60 . . . . . | 208                      | 186     | 298           | 225     | 280             | 214     |
| 60-70 . . . . . | 427                      | 410     | 660           | 575     | 630             | 530     |
| 70-80 . . . . . | 1,000                    | 1,000   | 1,210         | 1,170   | 1,310           | 1,150   |

The following table was published about 1870, showing the death-rate of clergymen in various countries :—

|                                     | Age   |       |       |
|-------------------------------------|-------|-------|-------|
|                                     | 25-45 | 45-65 | 25-65 |
| Church of England . . . . .         | 5.4   | 15.8  | 10.1  |
| Catholic priests, English . . . . . | 9.7   | 26.9  | 15.7  |
| German Protestant clergy . . . . .  | 5.8   | 20.0  | 11.8  |
| Population of Germany . . . . .     | 9.7   | 25.9  | 16.8  |
| Austrian Catholic priests . . . . . | 8.0   | 21.8  | 15.2  |
| Austrian Greek clergy . . . . .     | 8.7   | 22.1  | 15.1  |
| English male population . . . . .   | 11.5  | 25.2  | 18.4  |

It is observed in most countries that the death-rate among the poor is much heavier than in the classes of easy fortune. Professor Conrad's table is as follows :—

|                         | Ratio of Deaths |        |         |
|-------------------------|-----------------|--------|---------|
|                         | Affluent        | Middle | Working |
| Still-born . . . . .    | 28              | 53     | 53      |
| 0-1 year . . . . .      | 118             | 240    | 206     |
| 1-5 years . . . . .     | 95              | 192    | 220     |
| 5-15 " . . . . .        | 48              | 49     | 58      |
| 15-20 " . . . . .       | 35              | 24     | 21      |
| 20-30 " . . . . .       | 86              | 63     | 64      |
| 30-60 " . . . . .       | 247             | 204    | 222     |
| Over 60 years . . . . . | 343             | 175    | 156     |
| Total . . . . .         | 1,000           | 1,000  | 1,000   |

## INFANT MORTALITY

The annual death-rate of infants under twelve months was in the years 1876-80 as follows :—

| Per 1000 Living   |                   |                   |  |
|-------------------|-------------------|-------------------|--|
| England . . . 145 | Bavaria . . . 298 | Italy . . . 209   |  |
| France . . . 163  | Wurtemberg 302    | Switzerland . 189 |  |
| Prussia . . . 205 | Austria . . . 249 | Sweden . . . 126  |  |

The influence of season on the death-rate of infants is shown in the ratio of deaths thus :—

|                  | Deaths under Two Years of Age |         |       |       |        |         |         |        |
|------------------|-------------------------------|---------|-------|-------|--------|---------|---------|--------|
|                  | Holland                       | Belgium | Nice  | Genoa | Naples | Palermo | Algiers | Bagdad |
| Spring . . . . . | 246                           | 279     | 226   | 224   | 230    | 202     | 205     | 212    |
| Summer . . . . . | 235                           | 203     | 307   | 242   | 307    | 318     | 278     | 353    |
| Autumn . . . . . | 254                           | 216     | 222   | 244   | 209    | 241     | 285     | 222    |
| Winter . . . . . | 265                           | 302     | 245   | 290   | 254    | 239     | 232     | 213    |
| Total . . . . .  | 1,000                         | 1,000   | 1,000 | 1,000 | 1,000  | 1,000   | 1,000   | 1,000  |

|                    | Deaths under Thirty Days |        |        |        |       |
|--------------------|--------------------------|--------|--------|--------|-------|
|                    | Spring                   | Summer | Autumn | Winter | Year  |
| Austria . . . . .  | 250                      | 246    | 255    | 249    | 1,000 |
| Belgium . . . . .  | 259                      | 193    | 246    | 302    | 1,000 |
| France . . . . .   | 239                      | 225    | 267    | 269    | 1,000 |
| Florence . . . . . | 253                      | 183    | 182    | 382    | 1,000 |
| Geneva . . . . .   | 280                      | 177    | 210    | 333    | 1,000 |
| Genoa . . . . .    | 253                      | 169    | 214    | 364    | 1,000 |
| Holland . . . . .  | 246                      | 212    | 248    | 294    | 1,000 |
| Hungary . . . . .  | 231                      | 216    | 271    | 282    | 1,000 |
| Levant . . . . .   | 285                      | 162    | 178    | 375    | 1,000 |
| Milan . . . . .    | 231                      | 214    | 225    | 330    | 1,000 |
| Naples . . . . .   | 263                      | 202    | 187    | 348    | 1,000 |
| Sicily . . . . .   | 228                      | 205    | 240    | 328    | 1,000 |

According to Lombard and other authorities, deaths of children under five form the following proportions in 1000 deaths of all ages :—

|                       |     |                   |     |
|-----------------------|-----|-------------------|-----|
| France . . . . .      | 295 | Prussia . . . . . | 456 |
| Switzerland . . . . . | 340 | Italy . . . . .   | 477 |
| Sweden . . . . .      | 349 | Austria . . . . . | 485 |
| Belgium . . . . .     | 369 | Russia . . . . .  | 554 |
| Holland . . . . .     | 448 |                   |     |

The following table shows how many of 1000 infants born died in each of the first five years of life :—

| Period                      | 1st Year | 2nd Year | 3rd Year | 4th Year | 5th Year | Total | Number Surviving |
|-----------------------------|----------|----------|----------|----------|----------|-------|------------------|
| England, 1866-75 . . . . .  | 154      | 54       | 24       | 16       | 11       | 259   | 741              |
| Italy, . . . . .            | 223      | 91       | 38       | 26       | 19       | 397   | 603              |
| Austria prop. . . . .       | 259      | 56       | 32       | 21       | 17       | 385   | 615              |
| Belgium, . . . . .          | 174      | 53       | 29       | 17       | 12       | 285   | 715              |
| Prussia, . . . . .          | 218      | 56       | 29       | 18       | 13       | 334   | 666              |
| Sweden, . . . . .           | 137      | 42       | 21       | 15       | 12       | 227   | 773              |
| Scotland, 1876-80 . . . . . | 123      | 55       | 28       | 19       | 14       | 239   | 761              |
| Switzerland, . . . . .      | 190      | 32       | 14       | 9        | 7        | 252   | 748              |
| Bavaria, 1860-69 . . . . .  | 324      | 40       | 19       | 13       | 10       | 406   | 594              |

According to the latest tables published, the number of children of 1000 born who live to complete their fifth year is as follows :—\*

|                       |                           |                        |
|-----------------------|---------------------------|------------------------|
| In                    | In                        | In                     |
| Russia . . . . . 425  | Prussia . . . . . 684     | England . . . . . 762  |
| Spain . . . . . 571   | Switzerland . . . . . 748 | Scotland . . . . . 780 |
| Austria . . . . . 614 | France . . . . . 751      | Sweden . . . . . 783   |
| Bavaria . . . . . 622 | Denmark . . . . . 755     | Ireland . . . . . 837  |
| Italy . . . . . 632   | Belgium . . . . . 756     | Norway . . . . . 838   |

The death-rate of illegitimate children is 55 per cent. extra in Switzerland, and 100 per cent. in France over the normal rate. In Paris it is observed that for 100 children who die if suckled by the mother, 220 die if given out to nurse ; also that 230 spoon-fed children die for 100

\* This table, except as regards Ireland and Russia, is for the years 1881-83. Brun makes the number of children in Russia who complete their fifth year 460 per thousand ; later writers only 425.

reared at the breast. The death-rate of foundlings in the first year was as follows : Marseilles, 38 ; St. Petersburg, 40 ; Lyons, 42 ; Paris, 57 per cent.

The following table from the archives of 1881 shows the deaths of infants at Rome and Berlin during the years 1877-80 :—

| At               | Die per 1000 Born |              |                 |              |
|------------------|-------------------|--------------|-----------------|--------------|
|                  | Under 30 Days     |              | Under 12 Months |              |
|                  | Lawful            | Illegitimate | Lawful          | Illegitimate |
| Rome . . . . .   | 52                | 164          | 174             | 329          |
| Berlin . . . . . | 57                | 262          | 133             | 452          |

The following table is from Sir Lyon Playfair and the Swedish returns, showing how many of 1000 infants born in each class will survive to complete their fifth year :—

| Condition              | England | Sweden | Medium |
|------------------------|---------|--------|--------|
| Rich . . . . .         | 820     | 750    | 785    |
| Middle class . . . . . | 640     | 630    | 635    |
| Poor . . . . .         | 450     | 560    | 505    |

Dr. Bianco gives similar tables for Turin.

According to Drysdale, the death-rate of infants in 1889 was 11 per cent. in the wealthy parishes of London, and 38 per cent. among the poor of the East End.

#### DEATHS FROM VIOLENCE

The following table was published in 1840 :—

#### PER MILLION INHABITANTS YEARLY

| Period  | Country           | Suicides | Accidents, &c. | Total Violent Deaths |
|---------|-------------------|----------|----------------|----------------------|
| 1810-30 | Sweden . . . . .  | 51       | 626            | 677                  |
| 1820-34 | Prussia . . . . . | 90       | 396            | 486                  |
| 1838-39 | England . . . . . | 64       | 682            | 746                  |
| 1839    | France . . . . .  | 81       | 187            | 268                  |

In or about the year 1880 the number of violent deaths in various countries was as follows :—

|                          | Number  | Ratio per 1000 Deaths |
|--------------------------|---------|-----------------------|
| United Kingdom . . . . . | 23,822  | 33.1                  |
| France . . . . .         | 16,373  | 19.7                  |
| Germany . . . . .        | 24,592  | 21.4                  |
| Russia . . . . .         | 18,500  | 7.4                   |
| Austria proper . . . . . | 10,150  | 16.0                  |
| Italy . . . . .          | 6,656   | 8.3                   |
| Spain . . . . .          | 4,700   | 9.6                   |
| Switzerland . . . . .    | 2,550   | 38.2                  |
| Belgium . . . . .        | 2,577   | 22.0                  |
| Denmark . . . . .        | 1,054   | 28.1                  |
| Sweden . . . . .         | 2,740   | 31.6                  |
| Norway . . . . .         | 1,290   | 37.7                  |
| Europe . . . . .         | 115,004 | 16.2                  |
| United States . . . . .  | 22,740  | 41.1                  |

The following table of violent deaths was published in 1865 :—

|                         | Period  | No. per Million<br>Inhabitants per<br>Annum | Per 1000 Deaths |         |         | Females to<br>100 Males |
|-------------------------|---------|---------------------------------------------|-----------------|---------|---------|-------------------------|
|                         |         |                                             | Males           | Females | General |                         |
| England . . . . .       | 1850-64 | 692                                         | 28              | 10      | 19      | 36                      |
| Belgium . . . . .       | 1840-49 | 332                                         | 22              | 7       | 14      | 33                      |
| Norway . . . . .        | 1851-55 | 679                                         | ...             | ...     | 40      | ...                     |
| Sweden . . . . .        | 1856-60 | 420                                         | 32              | 9       | 21      | 27                      |
| United States . . . . . | 1860    | 575                                         | 60              | 30      | 46      | 50                      |
| France . . . . .        | 1854-60 | 450                                         | 26              | 6       | 16      | 22                      |
| Bavaria . . . . .       | 1857-61 | 236                                         | 12              | 4       | 8       | 32                      |
| Hanover . . . . .       | 1852-57 | 396                                         | 27              | 7       | 17      | 26                      |
| Prussia . . . . .       | 1851-60 | 407                                         | 22              | 7       | 15      | 29                      |
| Saxony . . . . .        | 1852-58 | 298                                         | 13              | 3       | 8       | 25                      |

The following table was published in 1875 :—

|                          | Period  | Annual Average |         |          |        | Per Million<br>Inhabitants | Per 1000<br>Deaths |
|--------------------------|---------|----------------|---------|----------|--------|----------------------------|--------------------|
|                          |         | Accidents      | Murders | Suicides | Total  |                            |                    |
| England . . . . .        | 1865-73 | 15,083         | 413     | 1,470    | 16,966 | 763                        | 34.2               |
| Italy . . . . .          | 1865-74 | 6,704          | 2,165   | 801      | 9,670  | 370                        | 12.3               |
| Prussia . . . . .        | 1865-73 | 10,430         | 414     | 3,211    | 14,055 | 601                        | 21.4               |
| Bavaria . . . . .        | 1868-74 | 1,617          | 157     | 436      | 2,210  | 450                        | 14.4               |
| Austria proper . . . . . | 1866-74 | 6,575          | 698     | 1,610    | 8,883  | 426                        | 13.5               |
| Belgium . . . . .        | 1870-74 | 1,974          | 82      | 364      | 2,420  | 466                        | 20.1               |
| Sweden . . . . .         | 1865-73 | 2,100          | 88      | 342      | 2,530  | 603                        | 32.0               |

The ratio of violent deaths was stated to be :—

|                     | England | Italy | Prussia | Bavaria | Austria | Belgium | Sweden | Seven<br>Countries |
|---------------------|---------|-------|---------|---------|---------|---------|--------|--------------------|
| Accidents . . . . . | 88.7    | 69.4  | 74.1    | 73.2    | 74.1    | 81.5    | 83.0   | 78.5               |
| Murders . . . . .   | 2.5     | 22.3  | 2.9     | 7.0     | 7.8     | 3.4     | 3.5    | 7.1                |
| Suicides . . . . .  | 8.8     | 8.3   | 23.0    | 19.8    | 18.1    | 15.1    | 13.5   | 14.4               |
| Total . . . . .     | 100.0   | 100.0 | 100.0   | 100.0   | 100.0   | 100.0   | 100.0  | 100.0              |

If we take the returns of the United Kingdom for 1886 and the latest information regarding other countries, estimating the United States with its actual population at the latest ascertained ratios, we can have a conspectus of all the violent deaths approximately that occur every year. Hungary and Holland are missing, and the number of murders in Russia, Denmark, and Norway is unknown. The table stands thus :—

|                          | Number Yearly |          |         |         | Per Million<br>Inhabitants | Per 10,000<br>Deaths | Percentage of<br>Males in 100<br>Violent Deaths |
|--------------------------|---------------|----------|---------|---------|----------------------------|----------------------|-------------------------------------------------|
|                          | Accidents     | Suicides | Murders | Total   |                            |                      |                                                 |
| England . . . . .        | 14,830        | 2,254    | 311     | 17,414  | 622                        | 324                  | 72                                              |
| Scotland . . . . .       | 2,164         | 261      | 19      | 2,444   | 614                        | 328                  | 71                                              |
| Ireland . . . . .        | 1,611         | 116      | 131     | 1,860   | 380                        | 207                  | 70                                              |

## DEATHS FROM ALCOHOL

The following is a table of deaths from drink:—

|              | Per Annum | Per 1000 Deaths |                 | Per Annum | Per 1000 Deaths |
|--------------|-----------|-----------------|-----------------|-----------|-----------------|
| England . .  | 1,405     | 2.60            | Italy . .       | 709       | 0.85            |
| Scotland . . | 230       | 3.29            | Switzerland . . | 244       | 3.81            |
| Ireland . .  | 280       | 2.78            | Sweden . .      | 502       | 6.25            |
| France . .   | 448       | 0.54            | Norway . .      | 72        | 2.36            |
| Belgium . .  | 456       | 3.83            | New York . .    | 324       | 12.08           |

Lombard's table on deaths from drink will be found under *Diseases*:—

The returns of sickness and death from drink in armies is as follows:—

In the French army 33 men per million die yearly of drink. In the American war, 1861-63, deaths from drink were 350 per million, and 15 in 10,000 were sent to hospital for drink. In the British army the sick and deaths from this cause are:—

| Station            | Sick per 10,000 | Deaths per 100,000 |
|--------------------|-----------------|--------------------|
| United Kingdom . . | 64              | 13                 |
| Mediterranean . .  | 130             | 18                 |
| Halifax . .        | 200             | 70                 |
| West Indies . .    | 400             | 138                |
| Trinidad . .       | 530             | 290                |
| Demerara . .       | 850             | 560                |

## DEATH-RATES OF ARMIES

Army death-rates per 10,000 men yearly, not including killed in war, are shown as follows:—

| Army           | Date    | Per 10,000 |
|----------------|---------|------------|
| British . .    | 1879-80 | 67         |
| French . .     | 1872-74 | 87         |
| German . .     | 1878    | 58         |
| Russian . .    | 1871-74 | 147        |
| Austrian . .   | 1870-73 | 153        |
| Italian . .    | 1870-76 | 116        |
| Belgian . .    | 1870-74 | 107        |
| Portuguese . . | 1861-67 | 127        |

The rates for the United Kingdom in later years compare with those of 1830-40 as follows:—

|              | Deaths Yearly per 10,000 |         |      |
|--------------|--------------------------|---------|------|
|              | 1830-1840                | 1879-80 | 1887 |
| Cavalry . .  | 153                      | 52      | 43   |
| Infantry . . | 155                      | 65      | 46   |

The death-rate among our troops before Dr. Farr's barrack reforms was enormous, the averages for the years 1818-40 being as follows per 10,000 men:—

| Great Britain . . | 159 | Mauritius . .    | 305  |
|-------------------|-----|------------------|------|
| Australia . .     | 141 | Madras . .       | 520  |
| Cape . .          | 155 | Ceylon . .       | 570  |
| Canada . .        | 212 | Bengal . .       | 630  |
| Gibraltar . .     | 221 | Jamaica . .      | 1430 |
| Corfu . .         | 283 | Sierra Leone . . | 4830 |

The rates in the United Kingdom in 1879-80 were as follows per 10,000:—

| Station            |    | Arm           |    |
|--------------------|----|---------------|----|
| Ireland . .        | 65 | Cavalry . .   | 52 |
| England . .        | 65 | Engineers . . | 63 |
| Scotland . .       | 78 | Infantry . .  | 65 |
| United Kingdom . . | 67 | Artillery . . | 72 |

The improved condition of troops in England is shown by the returns for the foot-guards thus:—

|              | Deaths per 10,000 |      |
|--------------|-------------------|------|
|              | 1858              | 1875 |
| Fever . .    | 25                | 4    |
| Phthisis . . | 125               | 17   |
| Various . .  | 54                | 56   |
| Total . .    | 204               | 77   |

On foreign service the death-rates have declined per 10,000 thus:—

|               | 1818-36 | 1875 |
|---------------|---------|------|
| Gibraltar . . | 214     | 55   |
| India . .     | 690     | 175  |

The death-rates of the French army in the years 1872-77 were:—

| Per 10,000 Men |     |               |     |
|----------------|-----|---------------|-----|
| Engineers . .  | 60  | Artillery . . | 106 |
| Infantry . .   | 95  | Cavalry . .   | 114 |
| Zouaves . .    | 106 | Turcos . .    | 177 |
| Under 20 . .   | 54  | 20-25 . .     | 103 |
| 25-30 . .      | 71  | 30-35 . .     | 71  |

The French army, according to a report in 1867, showed the following ratios:—

| Years of Service | Composition of Force | Ratio of Deaths | Annual Death-Rate per 1000 Men |
|------------------|----------------------|-----------------|--------------------------------|
| Under 1 . .      | 9.6                  | 9.7             | 10.1                           |
| 1-4 . .          | 19.3                 | 21.3            | 12.0                           |
| 4-6 . .          | 19.0                 | 21.0            | 11.2                           |
| 6-8 . .          | 16.4                 | 14.0            | 8.6                            |
| 8-11 . .         | 12.5                 | 9.8             | 7.8                            |
| 11-14 . .        | 10.5                 | 11.0            | 10.4                           |
| Over 14 . .      | 12.7                 | 13.2            | 10.4                           |
|                  | 100.0                | 100.0           | 100.0                          |

It appears the mortality is heaviest from the first to the end of the fifth year, and lightest from the sixth to the end of the tenth year. The death-rate has declined, viz.:—

|             |      |
|-------------|------|
| 1862-69 . . | 11.5 |
| 1872-77 . . | 9.5  |

The ratio in Algeria is usually double what it is in France. The Prussian army in 1872 had a death-rate of 7.2 per 1000, but in 1878 the rate for the whole German

# DEATHS

181

# DEATHS

army had been brought down to 5.8. The Austrian, moreover, which averaged 15.3 in the years 1870-73, showed only 9 per thousand in 1878.

The Italian army likewise shows improvement, viz. :—

|                   |      |
|-------------------|------|
| 1860-70 . . . . . | 13.8 |
| 1870-76 . . . . . | 11.6 |

In Russia the army death-rate has been reduced by one-half, viz. :—

| Arm               | 1841-52 | 1857-61 |
|-------------------|---------|---------|
| Infantry . . . .  | 42.0    | 21.0    |
| Cavalry . . . .   | 23.0    | 14.0    |
| Artillery . . . . | 27.0    | 15.0    |
| General rate . .  | 38.0    | 19.0    |

## ENGLAND AND WALES

The death-rate of England and Wales showed thus :—

| Age     | Death-Rate per 1000 Inhabitants per Annum |         |         |         |
|---------|-------------------------------------------|---------|---------|---------|
|         | 1841-50                                   | 1851-60 | 1861-70 | 1871-80 |
| Under 5 | 66.2                                      | 68.0    | 68.6    | 63.5    |
| 5-20    | 7.3                                       | 7.2     | 6.3     | 5.3     |
| 20-35   | 9.8                                       | 9.3     | 9.0     | 8.1     |
| 35-45   | 15.1                                      | 14.6    | 15.2    | 15.3    |
| 45-65   | 30.1                                      | 29.1    | 30.5    | 32.0    |
| 65-75   | 64.0                                      | 62.0    | 63.0    | 65.0    |

| Age   | Males   |         |         | Females |         |         |
|-------|---------|---------|---------|---------|---------|---------|
|       | 1841-60 | 1861-80 | 1881-85 | 1841-60 | 1861-80 | 1881-85 |
| 0-5   | 72.0    | 71.0    | 59.6    | 62.1    | 61.1    | 59.5    |
| 5-10  | 8.8     | 7.5     | 5.8     | 8.6     | 7.1     | 5.6     |
| 10-15 | 5.0     | 4.2     | 3.2     | 5.2     | 4.2     | 3.3     |
| 15-20 | 6.9     | 5.8     | 4.6     | 7.6     | 6.2     | 4.7     |
| 20-25 | 9.2     | 8.0     | 6.0     | 8.8     | 7.4     | 5.9     |
| 25-35 | 9.8     | 9.6     | 8.2     | 10.2    | 9.2     | 7.9     |
| 35-45 | 12.7    | 13.7    | 12.7    | 12.6    | 11.8    | 10.9    |
| 45-55 | 18.2    | 19.4    | 19.4    | 15.7    | 15.5    | 15.2    |
| 55-65 | 31.4    | 33.9    | 33.6    | 27.8    | 28.4    | 27.8    |
| 65-75 | 66.5    | 67.8    | 68.8    | 59.9    | 59.9    | 59.5    |
| 75-85 | 147.4   | 147.4   | 144.6   | 135.2   | 134.0   | 129.4   |

| Period          | Per 1000 Inhabitants per Annum |        |            |
|-----------------|--------------------------------|--------|------------|
|                 | Male                           | Female | Total Pop. |
| 1841-50 . . . . | 23.1                           | 21.6   | 22.4       |
| 1851-60 . . . . | 23.1                           | 21.4   | 22.3       |
| 1861-70 . . . . | 23.7                           | 21.4   | 22.6       |
| 1871-80 . . . . | 22.6                           | 20.1   | 21.3       |
| 1881-85 . . . . | 20.4                           | 18.2   | 19.3       |

Neison gives the following death-rate per annum for 1000 persons between the ages of 25 and 65 :—

|                          |      |                       |      |
|--------------------------|------|-----------------------|------|
| Ladies' maids . . . .    | 8.0  | Coachmen . . . .      | 18.4 |
| Protestant clergy . . .  | 10.6 | Surgeons . . . . .    | 19.1 |
| Barristers . . . . .     | 11.9 | Apothecaries . . . .  | 19.1 |
| Grooms . . . . .         | 12.6 | Wine merchants . . .  | 25.0 |
| Physicians . . . . .     | 12.9 | Innkeepers . . . . .  | 27.0 |
| Valets . . . . .         | 16.7 | Cabdrivers . . . . .  | 26.6 |
| Attorneys . . . . .      | 16.8 | All England . . . . . | 18.0 |
| Catholic priests . . . . | 18.3 |                       |      |

The total of deaths in 18 years ending 1830 was :—

|                   |           |
|-------------------|-----------|
| Males . . . . .   | 1,996,200 |
| Females . . . . . | 1,942,300 |
| Total . . . . .   | 3,938,500 |

The annual death-rate from 1818 to 1824 was 20.3.

The ratio of all deaths in England for 18 years ending 1830 and that for 1886 were :—

| Age   | 1818-1830 |         |            | Age     | 1886  |         |            |
|-------|-----------|---------|------------|---------|-------|---------|------------|
|       | Males     | Females | Total Pop. |         | Males | Females | Total Pop. |
| 0-1   | 219       | 176     | 198        | 0-1     | 272   | 229     | 251        |
| 1-4   | 150       | 145     | 147        | 1-5     | 141   | 139     | 140        |
| 5-9   | 44        | 41      | 42         | 5-10    | 28    | 28      | 28         |
| 10-19 | 58        | 64      | 61         | 10-20   | 36    | 40      | 38         |
| 20-29 | 72        | 84      | 78         | 20-35   | 78    | 85      | 82         |
| 30-39 | 62        | 73      | 67         | 35-45   | 66    | 66      | 66         |
| 40-49 | 65        | 67      | 66         | 45-55   | 78    | 70      | 74         |
| 50-59 | 72        | 68      | 70         | 55-65   | 94    | 95      | 95         |
| 60-69 | 91        | 92      | 92         | 65-75   | 110   | 122     | 116        |
| 70-79 | 101       | 108     | 105        | 75-85   | 78    | 96      | 86         |
| 80    | 66        | 82      | 74         | Over 85 | 19    | 30      | 24         |
| Total | 1,000     | 1,000   | 1,000      | Total   | 1,000 | 1,000   | 1,000      |

In 1879 the death-rate of able-bodied males was as follows :—

|                     | Death-rate per 1000 |                       | Death-rate per 1000 |
|---------------------|---------------------|-----------------------|---------------------|
| Civilians . . . . . | 10.02               | Royal navy . . . .    | 8.88                |
| Soldiers . . . . .  | 6.66                | Merchant navy . . . . | 19.10               |

Of 100 deaths in merchant shipping, 55 are from drowning, 35 from sickness, and 10 from various causes.

Dr. Farr shows the influence of town life on the death-rate of the working classes as follows :—

## DEATHS PER 1000 YEARLY

| Age             | Rural | Urban |
|-----------------|-------|-------|
| 35-45 . . . . . | 9     | 12    |
| 45-55 . . . . . | 12    | 17    |
| 55-65 . . . . . | 25    | 29    |
| 65-75 . . . . . | 55    | 68    |
| 75-85 . . . . . | 148   | 174   |
| Over . . . . .  | 324   | 418   |

The distribution of all deaths in the United Kingdom in quarters of the year is as follows :—

| Quarter Ending     | England | Scotland | Ireland |
|--------------------|---------|----------|---------|
| March 31st . . . . | 28.0    | 29.3     | 30.9    |
| June 30th . . . .  | 24.5    | 25.0     | 25.9    |
| September 30th . . | 22.4    | 21.8     | 20.0    |
| December 31st . .  | 25.1    | 23.9     | 23.2    |
|                    | 100.0   | 100.0    | 100.0   |

The death-rate of London in the early part of the seventeenth century was 70 per thousand, or more than three times what it is at present; the returns for the healthy years 1606-10 were :—

| Quarter Ending     | Deaths per 1000 Inhab. per Annum |
|--------------------|----------------------------------|
| 31st March . . . . | 56                               |
| 30th June . . . .  | 60                               |
| 30th September . . | 84                               |
| 31st December . .  | 80                               |
| Year's average . . | 70                               |

The following table shows the number of deaths in London from 1647 to 1829, and those that were violent :—

| Period    | Total Number of Deaths | Violent Deaths | Ratio per 10,000 Deaths | Number of Violent Deaths Yearly |
|-----------|------------------------|----------------|-------------------------|---------------------------------|
| 1647-1700 | 1,054,000              | 10,700         | 102                     | 200                             |
| 1701-49   | 1,223,000              | 12,600         | 104                     | 257                             |
| 1750-99   | 1,044,000              | 13,600         | 130                     | 272                             |
| 1800-29   | 586,000                | 9,900          | 170                     | 330                             |

## DEATHS

## DEATHS

|              | 1647-1700 | 1741-49 | 1780-99 | 1800-29 |
|--------------|-----------|---------|---------|---------|
| Suicide . .  | 85        | 162     | 150     | 186     |
| Murder . .   | 65        | 34      | 21      | 17      |
| Executed . . | 99        | 56      | 90      | 101     |
| Drowned . .  | 327       | 323     | 544     | 520     |
| Burnt . .    | 40        | 31      | 71      | 96      |
| Various . .  | 384       | 394     | 124     | 80      |
| Total . .    | 1,000     | 1,000   | 1,000   | 1,000   |

The following table shows the death-rate of London since 1725 :—

|             |      |             |      |             |      |
|-------------|------|-------------|------|-------------|------|
| 1725-50 . . | 39.9 | 1800-30 . . | 33.7 | 1874-78 . . | 22.8 |
| 1751-99 . . | 38.8 | 1840-45 . . | 24.5 | 1879-81 . . | 21.7 |

## VIOLENT DEATHS IN ENGLAND (1886).

| Cause                        | Males  | Females | Total  | Per 100,000 of all Deaths |
|------------------------------|--------|---------|--------|---------------------------|
| Railways . . .               | 736    | 62      | 798    | 149                       |
| Mines . . .                  | 916    | ...     | 916    | 170                       |
| Fire . . .                   | 891    | 990     | 1,881  | 350                       |
| Drowned (accidentally) . . . | 2,389  | 410     | 2,799  | 521                       |
| Poisoned . . .               | 213    | 116     | 329    | 61                        |
| Cabs, &c. . .                | 1,259  | 213     | 1,472  | 273                       |
| Fall . . .                   | 1,867  | 829     | 2,696  | 502                       |
| Suffocation . . .            | 975    | 779     | 1,754  | 325                       |
| Various . . .                | 1,566  | 619     | 2,185  | 407                       |
| Accidental . . .             | 10,812 | 4,018   | 14,830 | 2,758                     |
| Suicide . . .                | 1,694  | 560     | 2,254  | 420                       |
| Murder . . .                 | 181    | 130     | 311    | 58                        |
| Executed . . .               | 18     | 1       | 19     | 4                         |
| Total . . .                  | 12,705 | 4,709   | 17,414 | 3,240                     |

The ratio of sex in violent deaths in late years averaged thus :—

|                      | Per Cent. |        |
|----------------------|-----------|--------|
|                      | Male      | Female |
| England . . .        | 72.6      | 27.4   |
| Scotland . . .       | 73.7      | 26.3   |
| Ireland . . .        | 69.7      | 30.3   |
| United Kingdom . . . | 72.5      | 27.5   |

A return of accidental deaths in England and Wales for the year 1838 showed at follows :—

| Ratio in 10,000 Deaths of each Class | Nature of Accident |       |
|--------------------------------------|--------------------|-------|
| Educated classes . . . 29            | Fractures . . .    | 32.9  |
| Tradesmen . . . 51                   | Drowned . . .      | 20.9  |
| Servants . . . 95                    | Burnt . . .        | 19.2  |
| Labourers . . . 150                  | Poisoned . . .     | 3.6   |
|                                      | Scalded . . .      | 4.0   |
|                                      | Various . . .      | 19.4  |
|                                      |                    | 100.0 |

The ratios of violent deaths according to age and sex in England were (1871-80) :—

## PER MILLION PERSONS YEARLY

| Age           | Males | Females | General Population |
|---------------|-------|---------|--------------------|
| Under 5 . . . | 1,300 | 1,080   | 1,200              |
| 5-15 . . .    | 670   | 260     | 470                |
| 16-45 . . .   | 960   | 110     | 540                |
| 46-65 . . .   | 1,340 | 250     | 800                |
| 66-75 . . .   | 1,560 | 600     | 1,060              |
| Over 75 . . . | 2,270 | 1,740   | 2,000              |

The violent deaths of the United Kingdom from 1840 to 1880 were :—

| Period        | Per 1000 Deaths |          |         |                |
|---------------|-----------------|----------|---------|----------------|
|               | England         | Scotland | Ireland | United Kingdom |
| 1840-60 . . . | 34.2            | 32.3     | ...     | ...            |
| 1861-70 . . . | 34.5            | 31.8     | 24.1    | 32.7           |
| 1871-80 . . . | 34.3            | 35.5     | 21.1    | 32.6           |

## SCOTLAND

The death-rate per 1000 inhabitants yearly was :—

|               |      |
|---------------|------|
| 1855-60 . . . | 20.8 |
| 1861-70 . . . | 22.0 |
| 1871-80 . . . | 21.8 |

The death-rate for various professions of persons between 45 and 55 years of age is stated thus :—

| Per 1000            | Per 1000            | Per 1000             |
|---------------------|---------------------|----------------------|
| Farmers . . . 12    | Carpenters . . . 17 | Beersellers . . . 28 |
| Shoemakers . . . 15 | Miners . . . 20     | Scotchmen . . . 19   |
| Grocers . . . 16    | Butchers . . . 23   | Scotchwomen . . . 16 |

The rates for age, distinguishing urban from rural, show thus :—

| Age           | Deaths Yearly per 1000 of each Class |        |         |       |       |
|---------------|--------------------------------------|--------|---------|-------|-------|
|               | Male                                 | Female | General | Urban | Rural |
| 0-1 . . .     | 154                                  | 126    | 140     | 159   | 96    |
| 1-5 . . .     | 31.9                                 | 30.7   | 31.3    | 37.9  | 15.6  |
| 5-15 . . .    | 58.9                                 | 51.8   | 55.3    | 65.5  | 31.9  |
| 15-30 . . .   | 6.2                                  | 6.2    | 6.2     | 7.2   | 3.9   |
| 30-60 . . .   | 8.5                                  | 7.7    | 8.1     | 8.7   | 7.5   |
| Over 60 . . . | 17.5                                 | 14.3   | 15.9    | 18.2  | 10.9  |
|               | 208                                  | 210    | 209     | 167   | 256   |

The ratios of deaths at each age were as follows :—

| Age           | All Scotland |         |       |         | Scotch Cities, 1886 |         |
|---------------|--------------|---------|-------|---------|---------------------|---------|
|               | 1876-85      |         | 1886  |         | Males               | Females |
|               | Males        | Females | Males | Females |                     |         |
| 0-1 . . .     | 223          | 176     | 226   | 176     | 242                 | 193     |
| 1-2 . . .     | 84           | 77      | 77    | 70      | 99                  | 89      |
| 2-3 . . .     | 37           | 36      | 33    | 31      | 42                  | 41      |
| 3-4 . . .     | 24           | 23      | 20    | 18      | 26                  | 24      |
| 4-5 . . .     | 17           | 17      | 14    | 14      | 17                  | 15      |
| Under 5 . . . | 385          | 329     | 370   | 309     | 426                 | 362     |
| 5-10 . . .    | 45           | 43      | 41    | 38      | 44                  | 44      |
| 10-15 . . .   | 25           | 26      | 25    | 25      | 23                  | 24      |
| 15-20 . . .   | 34           | 33      | 31    | 33      | 31                  | 31      |
| 20-30 . . .   | 67           | 72      | 66    | 71      | 69                  | 76      |
| 30-40 . . .   | 59           | 66      | 60    | 66      | 70                  | 73      |
| 40-50 . . .   | 68           | 64      | 72    | 66      | 83                  | 76      |
| 50-60 . . .   | 79           | 76      | 84    | 81      | 87                  | 90      |
| 60-70 . . .   | 95           | 101     | 98    | 111     | 87                  | 100     |
| 70-80 . . .   | 91           | 112     | 96    | 116     | 60                  | 82      |
| Over 80 . . . | 52           | 78      | 57    | 84      | 20                  | 42      |
| Total . . .   | 1,000        | 1,000   | 1,000 | 1,000   | 1,000               | 1,000   |

The death-rate in Scotch cities in 1886 was :—

## PER 1000 INHABITANTS

|                 |      |                |      |
|-----------------|------|----------------|------|
| Edinburgh . . . | 19.2 | Aberdeen . . . | 19.4 |
| Glasgow . . .   | 25.1 | Greenock . . . | 17.3 |
| Dundee . . .    | 18.2 | Paisley . . .  | 22.7 |

The death-rate at various dates per 1000 of population was :—

| Year           | Scotland |         | Cities |         | Small Towns |         | Rural |         |
|----------------|----------|---------|--------|---------|-------------|---------|-------|---------|
|                | Males    | Females | Males  | Females | Males       | Females | Males | Females |
| 1855 . . . . . | 21.6     | 20.0    | 29.3   | 25.8    | 21.6        | 19.9    | ...   | ...     |
| 1860 . . . . . | 23.2     | 21.5    | 31.7   | 28.0    | 23.0        | 21.3    | ...   | ...     |
| 1871 . . . . . | 22.9     | 21.5    | 30.4   | 27.9    | 21.4        | 20.6    | 16.7  | 16.0    |
| 1880 . . . . . | 21.3     | 19.6    | 25.8   | 22.7    | 20.7        | 19.7    | 16.6  | 16.0    |
| 1886 . . . . . | 19.1     | 18.3    | 21.9   | 20.2    | 18.3        | 17.9    | 15.9  | 14.9    |

The proportion of deaths in cities according to age and season were :—

| Age     | Spring | Summer | Autumn | Winter |
|---------|--------|--------|--------|--------|
| 0-5     | 42.6   | 42.3   | 43.1   | 41.4   |
| 5-20    | 10.6   | 11.7   | 10.6   | 9.1    |
| 20-60   | 29.5   | 28.9   | 29.2   | 30.2   |
| Over 60 | 17.3   | 17.1   | 17.1   | 19.3   |
| Total   | 100.0  | 100.0  | 100.0  | 100.0  |

The number of children of either sex who die in the first five years is as follows :—

|                | Of 1000 Born of each Class |       |       |
|----------------|----------------------------|-------|-------|
|                | Boys                       | Girls | Total |
| 1st Year . . . | 133                        | 113   | 123   |
| 2nd Year . . . | 56                         | 55    | 55    |
| 3rd Year . . . | 27                         | 28    | 28    |
| 4th Year . . . | 19                         | 19    | 19    |
| 5th Year . . . | 13                         | 14    | 14    |
| Total . . .    | 248                        | 229   | 239   |

Violent deaths in 1886 were as follows :—

| Cause         | Number |         |       | Per Million Inhab. | Per 10,000 Deaths |
|---------------|--------|---------|-------|--------------------|-------------------|
|               | Males  | Females | Total |                    |                   |
| Fire . . .    | 116    | 116     | 232   | 58                 | 31                |
| Drowned . .   | 423    | 67      | 490   | 123                | 66                |
| Suffocated .  | 168    | 140     | 308   | 77                 | 41                |
| Poison . . .  | 34     | 20      | 54    | 14                 | 7                 |
| Fracture . .  | 649    | 173     | 822   | 206                | 110               |
| Various . . . | 180    | 78      | 258   | 65                 | 35                |
| Accidents .   | 1,570  | 594     | 2,164 | 543                | 290               |
| Suicide . . . | 188    | 73      | 261   | 66                 | 35                |
| Murder . . .  | 8      | 11      | 19    | 5                  | 3                 |
| Total . . .   | 1,766  | 678     | 2,444 | 614                | 328               |

#### IRELAND

Deaths at various ages in 1886 were as follows :—

| Age     | Number |         |        | Ratio |         |       |
|---------|--------|---------|--------|-------|---------|-------|
|         | Males  | Females | Total  | Males | Females | Total |
| 0-1     | 5,995  | 4,765   | 10,760 | 138   | 109     | 124   |
| 1-5     | 3,620  | 3,661   | 7,281  | 83    | 83      | 83    |
| 5-10    | 1,262  | 1,399   | 2,661  | 29    | 32      | 31    |
| 10-15   | 939    | 1,257   | 2,196  | 21    | 29      | 25    |
| 15-20   | 1,514  | 1,780   | 3,294  | 35    | 41      | 38    |
| 20-35   | 4,528  | 4,651   | 9,179  | 104   | 107     | 105   |
| 35-45   | 2,478  | 2,816   | 5,294  | 57    | 64      | 61    |
| 45-55   | 3,317  | 3,302   | 6,619  | 76    | 76      | 76    |
| 55-65   | 4,755  | 4,982   | 9,737  | 110   | 112     | 111   |
| 65-75   | 6,436  | 6,677   | 13,113 | 149   | 153     | 151   |
| 75-85   | 6,160  | 6,147   | 12,307 | 141   | 140     | 140   |
| Over 85 | 2,489  | 2,362   | 4,851  | 57    | 54      | 55    |
| Total   | 43,493 | 43,799  | 87,292 | 1,000 | 1,000   | 1,000 |

The death-rate is the lowest rate in Europe, viz. :—

|                   |                          |
|-------------------|--------------------------|
| 1864-70 . . . . . | 16.7 per 1000 population |
| 1871-80 . . . . . | 18.1 " "                 |
| 1877-86 . . . . . | 18.4 " "                 |

This is the more remarkable as the cities have very high rates, viz., Dublin, 24; Cork, 26; Belfast, 28 per 1000.

In the year 1886 violent deaths formed the same ratio to population as for the ten years ending 1885, and were made up thus :—

|               | Number |         |       | Per Million Population | Per 10,000 Deaths |
|---------------|--------|---------|-------|------------------------|-------------------|
|               | Males  | Females | Total |                        |                   |
| Fire . . .    | 160    | 184     | 344   | 70                     | 38                |
| Drowned . .   | 296    | 62      | 358   | 73                     | 39                |
| Suffocated .  | 82     | 39      | 121   | 25                     | 14                |
| Poison . . .  | 26     | 7       | 33    | 7                      | 4                 |
| Fracture . .  | 431    | 171     | 602   | 123                    | 68                |
| Various . . . | 113    | 40      | 153   | 30                     | 17                |
| Accidents .   | 1,108  | 503     | 1,611 | 328                    | 180               |
| Suicide . . . | 92     | 24      | 116   | 25                     | 13                |
| Murder . . .  | 91     | 40      | 131   | 27                     | 14                |
| Executed . .  | 2      | ...     | 2     | ...                    | ...               |
| Total         | 1,293  | 567     | 1,860 | 380                    | 207               |

Under the above item of Murder are included deaths from aggravated assault, which in some countries are put down as deaths from fracture, also deaths resulting from riot. The Registrar-General classified the Dublin death-rate in 1887 thus :—

|                        |      |
|------------------------|------|
| Affluent . . . . .     | 15.9 |
| Middle class . . . . . | 26.0 |
| Poor . . . . .         | 29.4 |

The general rate for the city in that year was 23.5 per 1000.

#### AUSTRALIA

The death-rate for thirteen years ending 1888 of the several colonies, and that of the four principal cities, for three years to 1889 was as follows :—

Per 1000 Population Yearly

|                     |                   |                    |
|---------------------|-------------------|--------------------|
| N. S. Wales . 15.5  | Queensland . 17.3 | Sydney . . 16.9    |
| Victoria . . 15.1   | Tasmania . 15.8   | Adelaide . 16.4    |
| S. Australia . 14.1 | W. Australia 16.3 | Brisbane . . 17.7  |
| N. Zealand . 11.1   | Melbourne . 21.7  | All Australia 15.0 |

There is no part of the world with so low a death-rate as Australia, which is partly explained by the preponderance of young people. The ratio of ages in New South Wales by the Census of 1881 compares with the United Kingdom thus :—

| Years              | U. Kingdom | N. S. Wales |
|--------------------|------------|-------------|
| Under 20 . . . . . | 462        | 498         |
| 20-40 . . . . .    | 292        | 309         |
| Over 40 . . . . .  | 246        | 193         |
| Total . . . . .    | 1,000      | 1,000       |

## CANADA

The returns for 1886 of deaths in the principal towns were as follow :—

| Age                           | Montreal | Toronto | Quebec | Hamilton | Halifax | Ottawa | St. John,<br>N.B. | Winnipeg |
|-------------------------------|----------|---------|--------|----------|---------|--------|-------------------|----------|
| 0-5 . . . . .                 | 605      | 495     | 604    | 408      | 414     | 625    | 316               | 526      |
| 5-20 . . . . .                | 73       | 112     | 87     | 123      | 119     | 94     | 137               | 124      |
| 20-40 . . . . .               | 116      | 148     | 82     | 152      | 147     | 105    | 167               | 224      |
| 40-60 . . . . .               | 87       | 110     | 76     | 133      | 122     | 66     | 123               | 81       |
| Over 60 . . . . .             | 119      | 135     | 151    | 184      | 198     | 110    | 257               | 45       |
| Total . . . . .               | 1,000    | 1,000   | 1,000  | 1,000    | 1,000   | 1,000  | 1,000             | 1,000    |
| Per 1000 population . . . . . | 28.0     | 21.5    | 33.6   | 20.7     | 20.5    | 28.8   | 21.2              | 19.8     |

## VARIOUS COLONIES

The rates in some of the colonies for the years 1876-80 were :—

|                     |                  |                    |
|---------------------|------------------|--------------------|
| St. Helena . . 13.2 | Jamaica . . 21.9 | Mauritius . . 28.3 |
| Singapore . . 20.1  | Bermuda . . 24.1 | Trinidad . . 34.1  |
| Ceylon . . 21.6     | Hong-Kong . 25.6 | Demerara . 34.5    |

## FRANCE

The death-rate per 1000 inhabitants yearly has been :—

|                   |      |                   |      |
|-------------------|------|-------------------|------|
| 1800-10 . . . . . | 27.7 | 1841-50 . . . . . | 23.3 |
| 1811-20 . . . . . | 26.0 | 1851-60 . . . . . | 23.9 |
| 1821-30 . . . . . | 25.0 | 1861-70 . . . . . | 23.6 |
| 1831-40 . . . . . | 24.8 | 1871-80 . . . . . | 24.3 |

The rate for various ages in France and at Paris in the years 1874-78 showed thus :—

| Age             | Per 1000 Persons |       |
|-----------------|------------------|-------|
|                 | France           | Paris |
| 0-5 . . . . .   | 64.6             | 102.0 |
| 5-10 . . . . .  | 6.6              | 9.5   |
| 11-20 . . . . . | 5.0              | 5.7   |
| 21-30 . . . . . | 8.9              | 10.0  |
| 31-40 . . . . . | 9.9              | 12.6  |
| 41-50 . . . . . | 12.0             | 15.8  |
| 51-60 . . . . . | 19.5             | 24.6  |
| 61-70 . . . . . | 40.3             | 48.7  |

The span of life has lengthened much in the last 100 years, the ratio of deaths in France showing thus :—

| Age               | 1770  | 1857-66 |
|-------------------|-------|---------|
| Under 1 . . . . . | 27.9  | 20.4    |
| 1-3 . . . . .     | 13.7  | 8.6     |
| 3-5 . . . . .     | 5.0   | 3.4     |
| 5-10 . . . . .    | 5.2   | 3.4     |
| 10-20 . . . . .   | 4.1   | 4.7     |
| 20-30 . . . . .   | 6.2   | 6.5     |
| 30-40 . . . . .   | 7.2   | 5.8     |
| 40-50 . . . . .   | 7.0   | 6.5     |
| 50-60 . . . . .   | 7.2   | 8.5     |
| 60-70 . . . . .   | 7.5   | 12.7    |
| Over 70 . . . . . | 9.0   | 19.5    |
|                   | 100.0 | 100.0   |

French death-rate in the years 1872-75 showed as follows :—

|                  |      |
|------------------|------|
| Towns . . . . .  | 25.1 |
| Rural . . . . .  | 21.1 |
| France . . . . . | 22.4 |

Infant mortality has, nevertheless, increased of late, viz. :—

| Period            | Deaths under Twelve Months of<br>1000 Born |       |       |
|-------------------|--------------------------------------------|-------|-------|
|                   | Boys                                       | Girls | Total |
| 1840-49 . . . . . | 172                                        | 151   | 160   |
| 1850-59 . . . . . | 185                                        | 158   | 172   |
| 1860-69 . . . . . | 188                                        | 161   | 175   |
| 1874-76 . . . . . | ...                                        | ...   | 180   |

In the last period, of 1000 children born, 50 died in the first month, 32 in the two following, 35 between three and six months, and 63 in the second half-year, making in all 180 before reaching the age of twelve months. The following table shows the difference of infant mortality according to conditions :—

| General Rate 100  |     |                        |     |
|-------------------|-----|------------------------|-----|
| Males . . . . .   | 107 | Rural . . . . .        | 92  |
| Females . . . . . | 93  | Urban . . . . .        | 113 |
|                   |     | Legitimate . . . . .   | 93  |
|                   |     | Illegitimate . . . . . | 185 |

The following table shows the death-rate of Paris for sixty years :—

| Deaths Yearly per 1000 Inhabitants |      |                   |      |
|------------------------------------|------|-------------------|------|
| 1821-30 . . . . .                  | 32.0 | 1861-70 . . . . . | 26.7 |
| 1831-40 . . . . .                  | 31.9 | 1871-74 . . . . . | 21.6 |
| 1841-50 . . . . .                  | 29.6 | 1875-77 . . . . . | 23.7 |
| 1851-60 . . . . .                  | 30.0 | 1878-80 . . . . . | 24.5 |

Deaths according to months, taking the year as 1200, were :—

|                     | France, 1853 |       | Rural Population |       |         |
|---------------------|--------------|-------|------------------|-------|---------|
|                     | Urban        | Rural | Under<br>5 Years | 5-60  | Over 60 |
| January . . . . .   | 101          | 104   | 96               | 112   | 113     |
| February . . . . .  | 113          | 125   | 98               | 110   | 107     |
| March . . . . .     | 123          | 134   | 95               | 112   | 106     |
| April . . . . .     | 113          | 122   | 96               | 109   | 109     |
| May . . . . .       | 101          | 101   | 88               | 105   | 100     |
| June . . . . .      | 91           | 91    | 89               | 96    | 92      |
| July . . . . .      | 89           | 82    | 96               | 90    | 84      |
| August . . . . .    | 97           | 83    | 124              | 90    | 87      |
| September . . . . . | 97           | 88    | 140              | 96    | 96      |
| October . . . . .   | 86           | 84    | 106              | 97    | 102     |
| November . . . . .  | 85           | 84    | 87               | 95    | 101     |
| December . . . . .  | 104          | 102   | 85               | 88    | 103     |
| Total . . . . .     | 1,200        | 1,200 | 1,200            | 1,200 | 1,200   |

Accidental deaths in France showed the following :—

| Year           | Number | Year           | Number |
|----------------|--------|----------------|--------|
| 1830 . . . . . | 4,478  | 1870 . . . . . | 10,418 |
| 1840 . . . . . | 6,805  | 1880 . . . . . | 12,787 |
| 1850 . . . . . | 9,151  | 1885 . . . . . | 13,205 |
| 1860 . . . . . | 10,298 |                |        |

## DEATHS

185

## DEATHS

The causes of violent deaths in ten years ending 1860 averaged thus :—

|                   | Males | Females | Total |
|-------------------|-------|---------|-------|
| Drowned . . . .   | 43.6  | 45.0    | 43.9  |
| Run over . . . .  | 11.7  | 6.8     | 10.8  |
| Burnt . . . . .   | 5.0   | 22.0    | 8.1   |
| Hunger . . . . .  | 2.1   | 3.1     | 2.3   |
| Drink . . . . .   | 1.5   | 2.5     | 1.7   |
| Machinery . . . . | 4.3   | 1.6     | 3.8   |
| Fall . . . . .    | 15.5  | 10.2    | 14.5  |
| Various . . . . . | 16.3  | 8.8     | 14.9  |
|                   | 100.0 | 100.0   | 100.0 |

Accidents in Paris in the years 1861-67 showed the following yearly average :—

## PER MILLION PERSONS OF EACH CLASS

|                           | Killed |       |          | Injured |       |          |
|---------------------------|--------|-------|----------|---------|-------|----------|
|                           | Men    | Women | Children | Men     | Women | Children |
| Run over . . . .          | 118    | 16    | 32       | 1,180   | 317   | 237      |
| Other accidents } . . . . | 554    | 82    | 209      | 1,356   | 167   | 265      |
| Total . . . . .           | 672    | 98    | 241      | 2,536   | 484   | 502      |

The general ratio for the whole population, per million inhabitants, was as follows :—

|                           | Killed | Injured |
|---------------------------|--------|---------|
| Run over . . . . .        | 62     | 648     |
| Other accidents . . . .   | 300    | 666     |
| Total per million . . . . | 362    | 1,314   |

Accidents in French mines showed thus :—

| Period          | Number of Miners | Killed Yearly | Killed per 10,000 |
|-----------------|------------------|---------------|-------------------|
| 1851-54 . . . . | 72,000           | 115           | 16                |
| 1855-59 . . . . | 108,000          | 196           | 18                |
| 1860-63 . . . . | 117,000          | 228           | 20                |

Deaths at various ages according to season showed :—

|                  | 2-5   | 5-10  | 10-20 | 20-30 | 30-50 | 50-70 |
|------------------|-------|-------|-------|-------|-------|-------|
| Spring . . . . . | 29.0  | 32.5  | 29.7  | 28.9  | 29.3  | 29.4  |
| Summer . . . . . | 23.6  | 23.6  | 24.2  | 23.0  | 22.4  | 20.5  |
| Autumn . . . . . | 22.3  | 18.6  | 20.9  | 21.8  | 21.4  | 21.3  |
| Winter . . . . . | 25.1  | 25.3  | 25.2  | 26.3  | 26.9  | 28.8  |
| Total . . . . .  | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

The returns for the Institute of France during 75 years ending 1870 showed the following comparison of death-rate with the general population of France :—

| Age             | Death-Rate |                    | Life-Expectation, Years |                    |
|-----------------|------------|--------------------|-------------------------|--------------------|
|                 | Institute  | General Population | Institute               | General Population |
| 35-40 . . . . . | 12         | 13                 | 32                      | 29                 |
| 40-50 . . . . . | 14         | 15                 | 26                      | 24                 |
| 50-60 . . . . . | 21         | 22                 | 18                      | 17                 |
| 60-70 . . . . . | 44         | 47                 | 12                      | 11                 |
| 70-80 . . . . . | 82         | 90                 | 7                       | 6½                 |

Deaths from lightning in France in ten years ending 1863 averaged 64 men and 24 women yearly. The total

number of persons killed on railways in sixteen years was as follows :—

|                    | No.   | Per Annum |
|--------------------|-------|-----------|
| Travellers . . . . | 324   | 20        |
| Servants . . . . . | 2,154 | 135       |
| Others . . . . .   | 992   | 62        |
| Total . . . . .    | 3,470 | 217       |

Deaths from drowning were in 1881 as follows :—

|                    | Men   | Women | Total |
|--------------------|-------|-------|-------|
| Accidental . . . . | 3,263 | 679   | 3,942 |
| Suicidal . . . . . | 1,295 | 639   | 1,934 |
| Total . . . . .    | 4,558 | 1,318 | 5,876 |

The distribution of deaths according to the hours of day or night is shown for France, compared with Quetetet's observations for Belgium, thus :—

|                        | France |       | Quetetet, Belgium |
|------------------------|--------|-------|-------------------|
|                        | Towns  | Rural |                   |
| Midnight to 6 A.M. . . | 21.9   | 24.4  | 27.4              |
| 6 A.M. to noon . . . . | 26.3   | 27.5  | 26.4              |
| Noon to 6 P.M. . . . . | 30.8   | 26.3  | 24.0              |
| 6 P.M. to midnight . . | 21.0   | 21.8  | 22.2              |

## GERMANY

The death-rate of all Germany during eleven years ending 1881 for 1000 persons of each age was as follows :—

| Age          | Males | Females | Age        | Males | Females |
|--------------|-------|---------|------------|-------|---------|
| 1 . . . . .  | 64.9  | 63.6    | 25 . . . . | 8.5   | 8.8     |
| 2 . . . . .  | 33.2  | 32.6    | 30 . . . . | 9.3   | 9.7     |
| 3 . . . . .  | 23.1  | 22.5    | 40 . . . . | 13.6  | 12.2    |
| 4 . . . . .  | 17.1  | 16.9    | 50 . . . . | 21.5  | 16.0    |
| 5 . . . . .  | 13.0  | 12.9    | 60 . . . . | 38.2  | 32.9    |
| 10 . . . . . | 4.7   | 4.8     | 70 . . . . | 81.1  | 74.7    |
| 15 . . . . . | 3.9   | 4.2     | 80 . . . . | 174.5 | 168.3   |
| 20 . . . . . | 7.5   | 6.1     |            |       |         |

The death-rate of Prussia in the years 1868-72 was :—

| Age             | Deaths per 1000 |         | Expectations of Life, Years |         |
|-----------------|-----------------|---------|-----------------------------|---------|
|                 | Males           | Females | Males                       | Females |
| 4-5 . . . . .   | 19.0            | 19.3    | 51.9                        | 53.7    |
| 5-10 . . . . .  | 10.1            | 10.2    | 51.5                        | 53.3    |
| 10-15 . . . . . | 4.8             | 5.2     | 48.1                        | 49.8    |
| 15-20 . . . . . | 6.2             | 6.0     | 44.1                        | 45.5    |
| 20-30 . . . . . | 9.5             | 8.8     | 38.0                        | 39.5    |
| 30-40 . . . . . | 11.2            | 11.6    | 30.3                        | 31.3    |
| 40-50 . . . . . | 18.0            | 15.0    | 23.0                        | 23.7    |
| 50-60 . . . . . | 27.0            | 25.0    | 16.2                        | 16.2    |
| 60-70 . . . . . | 49.0            | 50.0    | 10.0                        | 9.9     |
| 70-80 . . . . . | 90.0            | 94.0    | 5.7                         | 5.4     |

The average age of all who died in ten years ending 1876 was :—

|                   |      |
|-------------------|------|
| Males . . . . .   | 25.8 |
| Females . . . . . | 27.6 |

The death-rate among Jews was much lower than among Christians, as shown thus :—

| Period          | Deaths Yearly per 1000 |         |       |         |
|-----------------|------------------------|---------|-------|---------|
|                 | Christians             |         | Jews  |         |
|                 | Males                  | Females | Males | Females |
| 1822-40 . . . . | 28.7                   | 27.0    | 22.1  | 19.1    |
| 1841-66 . . . . | 30.2                   | 28.2    | 19.8  | 17.9    |

The mean death-rate of five principal cities during sixty years down to 1875 was as follows :—

|                   |      |                   |      |
|-------------------|------|-------------------|------|
| 1816-40 . . . . . | 33.9 | 1867-71 . . . . . | 37.4 |
| 1841-66 . . . . . | 35.4 | 1872-75 . . . . . | 40.6 |

The mean rate during sixty years was as follows :—

|                      | Males | Females |
|----------------------|-------|---------|
| Berlin . . . . .     | 36.7  | 28.5    |
| Breslau . . . . .    | 36.8  | 33.0    |
| Cologne . . . . .    | 30.6  | 28.8    |
| Königsberg . . . . . | 38.2  | 31.9    |

The mean rate for all Prussia in sixty years was per 1000 inhabitants :—

|                   |      |                    |      |
|-------------------|------|--------------------|------|
| Males . . . . .   | 30.2 | Urban population . | 30.1 |
| Females . . . . . | 27.7 | Rural „ . . . . .  | 28.4 |

The general rate for all Prussia during sixty years averaged 29.0 per thousand.

The deaths of infants at Berlin show that of 1000 born 237 die in the first year, 80 the second, 36 the third, and 9 the fourth, leaving only 638 surviving to begin their fifth year. Of 100 accidental deaths in Prussia in ten years down to 1874, 78 were of males, 22 of females.

Hanoverian statistics show the death-rate of unhealthy trades as follows :—

| Per 1000 Yearly  |      |                   |      |
|------------------|------|-------------------|------|
| Painters . . . . | 15.6 | Glass-blowers . . | 20.8 |
| Varnishers . . . | 18.8 | Dyers . . . . .   | 25.1 |

In Saxony the death-rates in 1845-47 were :—

| Age               | Per 1000 Yearly |         |         |
|-------------------|-----------------|---------|---------|
|                   | Males           | Females | General |
| 1-14 . . . . .    | 17.5            | 15.8    | 16.6    |
| 14-30 . . . . .   | 6.6             | 6.6     | 6.6     |
| 30-60 . . . . .   | 16.2            | 16.3    | 16.2    |
| Over 60 . . . . . | 94.4            | 94.6    | 94.5    |

Distinguishing town-rates from rural, the rates in the year 1863 were :—

| Age     | Cities |         |         | Rural |         |         |
|---------|--------|---------|---------|-------|---------|---------|
|         | Males  | Females | General | Males | Females | General |
| Under 6 | 116.0  | 100.0   | 108.0   | 101.0 | 83.0    | 92.0    |
| 6-14    | 4.6    | 4.8     | 4.7     | 4.4   | 4.3     | 4.4     |
| 14-20   | 4.8    | 5.5     | 5.1     | 4.3   | 4.1     | 4.2     |
| 20-30   | 8.7    | 8.5     | 8.6     | 6.4   | 6.9     | 6.7     |
| 30-40   | 11.4   | 12.9    | 12.1    | 8.1   | 10.3    | 9.2     |
| 40-50   | 19.0   | 14.4    | 16.6    | 14.2  | 13.4    | 13.8    |
| 50-60   | 32.0   | 25.9    | 28.8    | 26.9  | 24.6    | 25.7    |
| 60-70   | 62.5   | 56.9    | 59.5    | 58.8  | 57.9    | 58.3    |
| 70-80   | 142.0  | 150.0   | 146.0   | 118.0 | 134.0   | 126.0   |

Distinguishing married from single at Leipzig, in ten years ending 1875 the rates were :—

| Age     | Males   |        | Females |        | General |
|---------|---------|--------|---------|--------|---------|
|         | Married | Single | Married | Single |         |
| 15-20   | ...     | 3.6    | 11.0    | 3.0    | 3.4     |
| 20-30   | 9.0     | 8.2    | 8.2     | 6.5    | 7.5     |
| 30-40   | 12.5    | 18.5   | 11.6    | 8.8    | 12.5    |
| 40-50   | 21.8    | 31.0   | 12.2    | 13.2   | 18.8    |
| 50-60   | 31.0    | 31.4   | 17.4    | 22.2   | 26.6    |
| 60-70   | 55.0    | 56.0   | 35.0    | 55.0   | 49.0    |
| Over 70 | 117.0   | 111.0  | 85.0    | 111.0  | 123.0   |

The effect of over-crowding on death-rate is shown thus :—

| Living in                  | Berlin, 1871 | Leipzig, 1875 |
|----------------------------|--------------|---------------|
| One room . . . . .         | 48.7         | 21.4          |
| Two rooms . . . . .        | 24.9         | 25.9          |
| Three rooms . . . . .      | 11.2         | 20.2          |
| Over three rooms . . . . . | 15.2         | 32.5          |
|                            | 100.0        | 100.0         |

It would appear from the foregoing that there is much over-crowding at Berlin and little at Leipzig, nearly half the deaths in the former city occurring in families living in one room, and at Leipzig less than one-fourth. The mortality of infants, however, is much higher at Leipzig in the crowded population than among the other quarters of the city, viz. :—

| Inhabitants per Room  | Death-Rate Yearly per 1000 Infants |                             |
|-----------------------|------------------------------------|-----------------------------|
|                       | Under Twelve Months                | Twelve Months to Five Years |
| Over 3 . . . . .      | 419                                | 49                          |
| 2-3 . . . . .         | 338                                | 45                          |
| 1 . . . . .           | 255                                | 37                          |
| Less than 1 . . . . . | 111                                | 14                          |

The death-rate in Leipzig for all persons over five years was 9.9 per 1000 where the population was less than one per room, and 18.4 in the rest. Infant mortality at Leipzig in ten years ending 1875 showed thus :—

Of 1000 born, die under twelve months

|                        |     |
|------------------------|-----|
| Males . . . . .        | 233 |
| Females . . . . .      | 205 |
| General rate . . . . . | 219 |

The death-rate of infants is increasing, the rates for all Saxony of 1000 born who die under twelve months showing thus :—

| Period            | Boys | Girls | General Rate |
|-------------------|------|-------|--------------|
| 1845-55 . . . . . | 277  | 235   | 257          |
| 1856-65 . . . . . | 283  | 241   | 263          |
| 1866-75 . . . . . | 293  | 252   | 272          |

Mortality is much higher with illegitimate than with lawful children, averages for six years ending 1870 being thus :—

|                        | Deaths per 1000 Born |         |
|------------------------|----------------------|---------|
|                        | Saxony               | Dresden |
| Legitimate . . . . .   | 256                  | 250     |
| Illegitimate . . . . . | 353                  | 705     |

The general death-rate of Saxony was 30.1 in ten years ending 1849, and 30.3 in ten years ending 1876.

At Munich the death-rate of infants shows that of 1000 born, the Jews lose 170 in the first year, Protestants 320, and Roman Catholics 400, the last including all the working-classes, who suffer from overcrowding.

#### SWITZERLAND

The death-rate per 1000 inhabitants yearly for all Switzerland for ten years ending 1880 was 24.0. Rates, however, vary much with the cantons. For example, infant mortality at Berne is 101 per thousand, and at St. Gall 301. The statistics of Geneva for 25 years ending 1871 showed the annual average death-rate thus :—

|                             |      |
|-----------------------------|------|
| Swiss . . . . .             | 21.7 |
| Foreign residents . . . . . | 15.4 |

## DEATHS

187

## DEATHS

At Geneva there were 101 deaths to 100 births among natives, whereas among foreign residents there were 156 births to 100 deaths. Ladame gives the rates of infant mortality, distinguishing legitimate from illegitimate, thus :—

|                    | Of 1000 Born   |                  |
|--------------------|----------------|------------------|
|                    | Die in 30 Days | Die in 12 Months |
| Legitimate . . .   | 77             | 180              |
| Illegitimate . . . | 136            | 280              |

Climatic changes have occurred at Geneva since the seventeenth century, August and September having much lower ratios of deaths than in 1633-1700, viz. :—

## OF 1200 DEATHS YEARLY

|                | 1633-1700 | 1838-55 |                 | 1633-1700 | 1838-55 |
|----------------|-----------|---------|-----------------|-----------|---------|
| January . . .  | 114       | 114     | July . . .      | 84        | 86      |
| February . . . | 106       | 117     | August . . .    | 108       | 83      |
| March . . .    | 105       | 120     | September . . . | 105       | 90      |
| April . . .    | 100       | 111     | October . . .   | 89        | 95      |
| May . . .      | 100       | 95      | November . . .  | 95        | 96      |
| June . . .     | 86        | 92      | December . . .  | 108       | 101     |

Accidental deaths in the years 1876-81 averaged 1697 per annum, equal to 605 per million inhabitants, or 280 in 10,000 deaths.

## SWEDEN

Death-rates for age from 1751 to 1875 showed thus :—

| Age           | 1751-90 | 1791-1830 | 1831-60 | 1861-70 | 1871-75 |
|---------------|---------|-----------|---------|---------|---------|
| 0-10 . . .    | 55.4    | 45.4      | 36.5    | 35.1    | 30.0    |
| 10-20 . . .   | 7.3     | 5.8       | 5.1     | 4.5     | 4.0     |
| 21-30 . . .   | 9.5     | 8.5       | 7.3     | 6.4     | 7.0     |
| 31-40 . . .   | 12.4    | 11.6      | 10.5    | 8.3     | 8.7     |
| 41-50 . . .   | 17.2    | 16.6      | 15.1    | 12.0    | 11.4    |
| 51-60 . . .   | 21.9    | 26.6      | 24.5    | 20.3    | 18.1    |
| Over 60 . . . | 76.5    | 81.0      | 74.0    | 68.8    | 64.0    |

The rates for the years 1871-75 were thus :—

|               | 0-20 | 20-30 | 31-40 | 41-50 | Over 50 |
|---------------|------|-------|-------|-------|---------|
| Males . . .   | 19.1 | 7.8   | 9.3   | 13.0  | 42.2    |
| Females . . . | 16.8 | 6.3   | 8.1   | 10.0  | 38.9    |

Distinguishing the sexes, and also urban from rural, the rates for ten years ending 1870 were :—

| Age           | Males |       | Females |       |
|---------------|-------|-------|---------|-------|
|               | Town  | Rural | Town    | Rural |
| Under 1 . . . | 256.0 | 159.0 | 222.0   | 133.0 |
| 1-5 . . .     | 54.0  | 31.0  | 53.0    | 29.0  |
| 5-10 . . .    | 12.9  | 9.2   | 12.9    | 8.6   |
| 10-20 . . .   | 5.9   | 4.4   | 4.8     | 4.2   |
| 20-30 . . .   | 10.5  | 6.6   | 8.1     | 5.4   |
| 30-40 . . .   | 16.7  | 7.7   | 10.2    | 7.4   |
| 40-50 . . .   | 25.4  | 12.5  | 13.8    | 10.5  |
| 50-60 . . .   | 40.0  | 22.0  | 20.0    | 17.0  |
| 60-70 . . .   | 66.0  | 46.0  | 36.0    | 39.0  |
| 70-80 . . .   | 130.0 | 112.0 | 96.0    | 94.0  |
| General rate  | 29.7  | 20.5  | 25.5    | 18.9  |

The average age at death was in years as follows :—

|             | Males   |         |         | Females |         |         |
|-------------|---------|---------|---------|---------|---------|---------|
|             | 1861-65 | 1866-70 | 1871-75 | 1861-65 | 1866-70 | 1871-75 |
| Town . . .  | 23.3    | 24.3    | 25.8    | 28.4    | 29.9    | 31.3    |
| Rural . . . | 30.0    | 33.5    | 34.2    | 34.5    | 37.4    | 38.4    |
| Gen. . .    | 29.0    | 32.0    | 32.6    | 33.6    | 36.2    | 37.3    |

## RATIO OF DEATHS

|                 | Males   |         | Females |         |
|-----------------|---------|---------|---------|---------|
|                 | 1861-70 | 1871-75 | 1861-70 | 1871-75 |
| Unmarried . . . | 59.7    | 57.5    | 54.3    | 51.3    |
| Married . . .   | 28.4    | 29.8    | 22.6    | 24.6    |
| Widowed . . .   | 11.9    | 12.7    | 23.1    | 24.1    |
| Total . . .     | 100.0   | 100.0   | 100.0   | 100.0   |

The number of females dying to 100 males was :—

|              | 1861-70 | 1871-75 |
|--------------|---------|---------|
| Town . . .   | 95.4    | 92.2    |
| Rural . . .  | 96.4    | 97.3    |
| Sweden . . . | 96.2    | 96.3    |

Ratios of deaths according to months showed thus :—

|                 | 1749-60 | 1861-65 | 1861-73 |       |         |
|-----------------|---------|---------|---------|-------|---------|
|                 | Sweden  | Sweden  | Urban   | Rural | General |
| January . . .   | 102     | 100     | 107     | 115   | 114     |
| February . . .  | 104     | 116     | 108     | 117   | 116     |
| March . . .     | 113     | 121     | 107     | 119   | 117     |
| April . . .     | 124     | 118     | 109     | 117   | 116     |
| May . . .       | 120     | 107     | 103     | 108   | 108     |
| June . . .      | 105     | 84      | 95      | 92    | 92      |
| July . . .      | 94      | 76      | 96      | 81    | 83      |
| August . . .    | 90      | 82      | 95      | 79    | 81      |
| September . . . | 86      | 102     | 95      | 79    | 81      |
| October . . .   | 84      | 95      | 91      | 86    | 87      |
| November . . .  | 87      | 100     | 92      | 99    | 98      |
| December . . .  | 91      | 99      | 102     | 108   | 107     |
| Total . . .     | 1,200   | 1,200   | 1,200   | 1,200 | 1,200   |

Violent deaths were as follows :—

|                                  | Annual Average |         | Total Number in 15 years | Ratio 1861-75 |
|----------------------------------|----------------|---------|--------------------------|---------------|
|                                  | 1861-70        | 1871-75 |                          |               |
| Drowned . . .                    | 1,132          | 1,202   | 17,268                   | 45.7          |
| Burnt . . .                      | 152            | 150     | 2,267                    | 6.0           |
| Suffocated . . .                 | 146            | 102     | 1,974                    | 5.2           |
| Murdered . . .                   | 78             | 105     | 1,299                    | 3.4           |
| Crushed . . .                    | 461            | 573     | 7,482                    | 19.7          |
| Poisoned acci-<br>dentally . . . | 20             | 21      | 310                      | 0.8           |
| Shot acci-<br>dentally . . .     | 29             | 38      | 489                      | 1.3           |
| Lightning . . .                  | 11             | 14      | 183                      | 0.5           |
| Frozen . . .                     | 54             | 64      | 862                      | 2.3           |
| Various . . .                    | 43             | 46      | 681                      | 1.8           |
| Suicide . . .                    | 328            | 347     | 5,068                    | 13.3          |
| Total . . .                      | 2,454          | 2,662   | 37,883                   | 100.0         |

Accidental deaths (including also murders) in the above fifteen years, distinguishing urban from rural districts, were per million inhabitants yearly as follows :—

|                 | Town    |         | Rural   |         |
|-----------------|---------|---------|---------|---------|
|                 | 1861-70 | 1871-75 | 1861-70 | 1871-75 |
| Drowned . . .   | 436     | 255     | 174     | 112     |
| Burnt . . .     | 31      | 37      | 6       | 2       |
| Lightning . . . | 3       | 3       | 8       | 8       |
| Murdered . . .  | 3       | 2       | 10      | 4       |

## NORWAY

Death-rate per 1000 inhabitants yearly from 1801 to 1875 was as follows :—

|               |      |               |      |               |      |
|---------------|------|---------------|------|---------------|------|
| 1801-15 . . . | 25.0 | 1836-45 . . . | 18.9 | 1856-65 . . . | 17.7 |
| 1816-35 . . . | 19.2 | 1846-55 . . . | 18.1 | 1866-75 . . . | 17.5 |

## DEATHS

188

## DEATHS

Rates distinguishing age and sex showed as follows :—

| Age      | Males   |         |         | Females |         |         |
|----------|---------|---------|---------|---------|---------|---------|
|          | 1816-40 | 1841-60 | 1861-65 | 1816-40 | 1841-60 | 1861-65 |
| Under 10 | 32.2    | 27.4    | 31.2    | 28.0    | 24.2    | 28.8    |
| 10-20    | 4.7     | 4.7     | 5.5     | 4.2     | 4.2     | 5.1     |
| 21-30    | 8.2     | 8.2     | 8.4     | 6.5     | 6.0     | 6.3     |
| 31-40    | 9.5     | 9.0     | 8.0     | 9.0     | 8.6     | 8.3     |
| 41-50    | 13.2    | 12.8    | 11.1    | 11.6    | 10.8    | 9.9     |
| 51-60    | 21.7    | 20.0    | 17.0    | 17.3    | 15.8    | 14.0    |
| 61-70    | 40.0    | 38.0    | 35.0    | 35.0    | 33.0    | 30.0    |
| 71-80    | 81.0    | 84.0    | 81.0    | 77.0    | 77.5    | 72.0    |

Infant mortality has been as follows :—

| Period  | Deaths under 12 Months of 1000 Born |         |
|---------|-------------------------------------|---------|
|         | Males                               | Females |
| 1836-55 | 130                                 | 109     |
| 1856-65 | 112                                 | 96      |
| 1866-73 | 115                                 | 98      |

## FINLAND

Death-rate per 1000 inhabitants yearly was as follows :—

|           |      |         |      |         |      |
|-----------|------|---------|------|---------|------|
| 1751-70   | 29.6 | 1811-20 | 26.1 | 1841-50 | 23.6 |
| 1771-1800 | 26.4 | 1821-30 | 24.7 | 1851-60 | 28.6 |
| 1801-10   | 32.3 | 1831-40 | 28.2 | 1861-65 | 26.2 |

In 1865 the span of life, in years, was as follows :—

|         |      |
|---------|------|
| Males   | 35.6 |
| Females | 38.4 |

The general span for the whole population was thirty-seven years.

Death-rate for age was as follows :—

| Age                 | Age             | Age              |
|---------------------|-----------------|------------------|
| Under 1 . . . 139.0 | 10-20 . . . 4.0 | 40-50 . . . 11.5 |
| 1-5 . . . 25.0      | 20-30 . . . 6.5 | 50-60 . . . 19.0 |
| 5-10 . . . 8.0      | 30-40 . . . 7.5 | 60-70 . . . 44.0 |

## RUSSIA

In 1867 the following table of death-rate was published :—

| Per 1000 Yearly |           |         |             |
|-----------------|-----------|---------|-------------|
| Age             |           | Age     |             |
| 5-15            | . . . 7.3 | 30-60   | . . . 21.5  |
| 15-30           | . . . 8.0 | Over 60 | . . . 121.0 |

Of 1000 boys born, 254 die, and of girls 231, in their first year. At Nijni Novgorod infant mortality is 360, and in the government of Perm 446 per thousand births.

## HOLLAND

Death-rate per 1000 inhabitants yearly was :—

|         |      |
|---------|------|
| 1861-70 | 24.9 |
| 1871-80 | 24.3 |

The influence of season on death-rate at various ages is seen as follows :—

| Age            | Spring | Summer | Autumn | Winter | Year  |
|----------------|--------|--------|--------|--------|-------|
| Under 3 months | 246    | 212    | 248    | 294    | 1,000 |
| 3-24           | 247    | 259    | 259    | 235    | 1,000 |
| 25-30          | 273    | 229    | 235    | 263    | 1,000 |
| 31-40          | 269    | 259    | 231    | 241    | 1,000 |
| 41-50          | 265    | 261    | 229    | 245    | 1,000 |
| 51-60          | 261    | 253    | 232    | 254    | 1,000 |
| 61-70          | 260    | 246    | 226    | 268    | 1,000 |
| 71-80          | 253    | 223    | 228    | 296    | 1,000 |

## GREECE

In ten years ending 1878 the death-rate for age was as follows :—

| Age     | Males | Females | General Population |
|---------|-------|---------|--------------------|
| Under 5 | 50.3  | 49.0    | 49.7               |
| 5-10    | 11.2  | 10.8    | 11.1               |
| 10-20   | 7.4   | 7.2     | 7.3                |
| 20-30   | 9.8   | 8.5     | 9.1                |
| 30-40   | 11.3  | 10.7    | 11.0               |
| 40-50   | 15.5  | 14.9    | 15.2               |
| 50-60   | 28.5  | 24.4    | 26.5               |
| 60-70   | 49.0  | 46.0    | 47.7               |
| 70-80   | 91.0  | 105.0   | 98.0               |

## BELGIUM

The annual average of deaths since 1830 was :—

| Year    | Number  | Per 1000 Population | Year    | Number  | Per 1000 Population |
|---------|---------|---------------------|---------|---------|---------------------|
| 1831-40 | 108,000 | 26.7                | 1861-70 | 115,000 | 23.3                |
| 1841-50 | 104,000 | 24.2                | 1871-80 | 120,000 | 22.5                |
| 1851-60 | 102,000 | 22.2                | 1881-87 | 118,000 | 20.7                |

The percentage of deaths according to age was as follows :—

|         | 1841-50 | 1851-60 | 1861-66 | 1878-82 | 1887  |
|---------|---------|---------|---------|---------|-------|
| Under 5 | 34.1    | 35.9    | 37.4    | 36.4    | 33.9  |
| 5-10    | 4.9     | 4.1     | 4.7     | 2.9     | 2.7   |
| 10-20   | 6.1     | 5.7     | 4.7     | 4.0     | 3.9   |
| 20-30   | 7.1     | 6.6     | 6.4     | 5.4     | 5.6   |
| 30-40   | 6.3     | 6.1     | 6.2     | 5.6     | 5.3   |
| 40-50   | 7.2     | 6.4     | 6.4     | 6.0     | 6.3   |
| 50-60   | 7.6     | 8.3     | 7.7     | 7.9     | 7.9   |
| 60-70   | 10.1    | 10.1    | 10.9    | 11.1    | 11.9  |
| 70-80   | 10.7    | 11.1    | 10.2    | 13.6    | 14.1  |
| Over 80 | 5.9     | 5.7     | 5.4     | 7.1     | 8.4   |
| Total   | 100.0   | 100.0   | 100.0   | 100.0   | 100.0 |

Sanitary improvements have done much for public health. For instance, the percentage of deaths between 5 and 20 years of age is now little more than half what it was in the decade of 1841-50; that of deaths over 70 years is one-third higher.

The mean averages for 35 years, 1846-80, showed as follows :—

|         | Unmarried |         | Married |         | Total Population |         |
|---------|-----------|---------|---------|---------|------------------|---------|
|         | Males     | Females | Males   | Females | Males            | Females |
| 0-15    | 73.8      | 71.3    | ...     | ...     | 43.4             | 40.8    |
| 15-20   | 4.1       | 5.2     | ...     | 0.2     | 2.4              | 3.1     |
| 20-30   | 6.3       | 7.4     | 3.6     | 9.4     | 6.6              | 6.5     |
| 30-40   | 4.2       | 3.1     | 11.4    | 19.1    | 5.6              | 6.5     |
| 40-50   | 3.0       | 2.3     | 17.6    | 19.3    | 6.9              | 6.4     |
| 50-60   | 2.7       | 2.6     | 21.4    | 17.9    | 8.5              | 7.3     |
| 60-70   | 2.7       | 3.2     | 23.6    | 18.8    | 10.7             | 10.5    |
| 70-80   | 2.3       | 3.3     | 17.6    | 12.5    | 10.8             | 12.1    |
| Over 80 | 0.9       | 1.6     | 4.8     | 2.8     | 5.1              | 6.8     |
| Total   | 100.0     | 100.0   | 100.0   | 100.0   | 100.0            | 100.0   |

Death-rate for age is stated as follows :—

| Age  | Per 1000 | Age   | Per 1000 | Age     | Per 1000 |
|------|----------|-------|----------|---------|----------|
| 0-1  | 186.0    | 10-20 | 6.2      | 40-60   | 20.6     |
| 1-10 | 20.1     | 20-40 | 13.4     | Over 60 | 79.1     |

## DEATHS

189

## DEATHS

Violent deaths were as follows :—

| By              | Annual Average, 1871-80 |         |       | 1881-85 |
|-----------------|-------------------------|---------|-------|---------|
|                 | Males                   | Females | Total |         |
| Firearms . . .  | 21                      | 3       | 24    | 23      |
| Fire . . .      | 135                     | 101     | 236   | 226     |
| Fall . . .      | 291                     | 42      | 333   | 320     |
| Railway . . .   | 161                     | 18      | 179   | 175     |
| Machinery . . . | 107                     | 11      | 118   | 103     |
| Drowning . . .  | 503                     | 100     | 603   | 607     |
| Vehicles . . .  | 131                     | 19      | 150   | 147     |
| Various . . .   | 328                     | 68      | 396   | 384     |
| All accidents   | 1,677                   | 362     | 2,039 | 1,985   |
| Murder . . .    | 67                      | 19      | 86    | 98      |
| Suicide . . .   | 373                     | 68      | 441   | 602     |
| Total . . .     | 2,117                   | 449     | 2,566 | 2,685   |

Other tables will be found at page 179. The influence of season on death-rate is shown by the following ratios :—

|              | Death Ratios   |                |                    |
|--------------|----------------|----------------|--------------------|
|              | Under 3 Months | 3 to 24 Months | General Population |
| Spring . . . | 264            | 293            | 279                |
| Summer . . . | 200            | 206            | 218                |
| Autumn . . . | 225            | 207            | 220                |
| Winter . . . | 311            | 294            | 283                |
|              | 1,000          | 1,000          | 1,000              |

## ITALY

The death-rate per 1000 inhabitants yearly has been :—

|               |      |
|---------------|------|
| 1861-70 . . . | 30.1 |
| 1871-80 . . . | 29.7 |

Deaths in Italian cities according to season showed thus :—

## GENOA

|              | Under 5 | 5-10  | 10-30 | 30-50 | 50-70 |
|--------------|---------|-------|-------|-------|-------|
| Spring . . . | 21.3    | 21.7  | 22.5  | 20.4  | 22.1  |
| Summer . . . | 26.0    | 25.7  | 27.0  | 26.8  | 23.9  |
| Autumn . . . | 26.3    | 29.4  | 29.3  | 30.0  | 28.1  |
| Winter . . . | 26.4    | 23.2  | 21.2  | 22.8  | 25.9  |
|              | 100.0   | 100.0 | 100.0 | 100.0 | 100.1 |

## NAPLES

|              | Under 5 | 5-10  | 10-30 | 30-50 | 50-70 |
|--------------|---------|-------|-------|-------|-------|
| Spring . . . | 23.8    | 28.6  | 24.2  | 24.6  | 25.3  |
| Summer . . . | 29.5    | 26.1  | 25.3  | 25.6  | 20.8  |
| Autumn . . . | 21.0    | 18.4  | 25.0  | 23.0  | 22.3  |
| Winter . . . | 25.7    | 26.9  | 25.5  | 26.8  | 31.6  |
|              | 100.0   | 100.0 | 100.0 | 100.0 | 100.0 |

## SPAIN AND PORTUGAL

The ratios of ages in deaths for Spain and Lisbon were :—

| Age           | Spain | Lisbon |
|---------------|-------|--------|
| 0-20 . . .    | 59.9  | 50.1   |
| 20-40 . . .   | 10.3  | 10.5   |
| 40-60 . . .   | 12.0  | 13.0   |
| Over 60 . . . | 17.8  | 26.4   |
| Total . . .   | 100.0 | 100.0  |

## AUSTRIA-HUNGARY

The death-rates have been as follows :—

|               | 1861-70 | 1871-80 |
|---------------|---------|---------|
| Austria . . . | 30.4    | 31.2    |
| Hungary . . . | 38.7    | 40.1    |

Death-rates for age were as follows :—

| Age     | Austria, 1860-68 | Hungary, 1869-73 | Age     | Austria, 1860-68 | Hungary, 1869-73 |
|---------|------------------|------------------|---------|------------------|------------------|
| Under 1 | 303.0            | ...              | 15-30   | 8.1              | 9.3              |
| 1-5     | 40.6             | 34.3             | 30-60   | 17.1             | 20.0             |
| 5-15    | 7.3              | 10.2             | Over 60 | 84.0             | ...              |

Deaths at Vienna, according to season, showed thus :—

|              | Under 5 | 5-15  | 15-40 | 40-80 | Over 60 |
|--------------|---------|-------|-------|-------|---------|
| Spring . . . | 29.7    | 28.8  | 32.4  | 30.9  | 30.3    |
| Summer . . . | 23.5    | 21.9  | 22.6  | 21.1  | 20.6    |
| Autumn . . . | 21.9    | 22.7  | 19.0  | 22.0  | 21.2    |
| Winter . . . | 24.9    | 26.6  | 26.0  | 26.0  | 27.9    |
|              | 100.0   | 100.0 | 100.0 | 100.0 | 100.0   |

Statistics of Prague show the death-rate thus :—

| Age           | Per 1000 | Age           | Per 1000 |
|---------------|----------|---------------|----------|
| Under 1 . . . | 497      | 20-40 . . .   | 14       |
| 1-5 . . .     | 85       | 40-60 . . .   | 25       |
| 5-20 . . .    | 10       | Over 60 . . . | 71       |

The general rate for the population was 35 per 1000.

Violent deaths in 1886 in Austria proper were as follows :—

|                 | Number |         |        | In 100,000 Deaths |         |       |
|-----------------|--------|---------|--------|-------------------|---------|-------|
|                 | Males  | Females | Total  | Males             | Females | Total |
| Accidents . . . | 4,603  | 1,830   | 6,433  | 138               | 57      | 96    |
| Murders . . .   | 493    | 170     | 663    | 15                | 5       | 10    |
| Suicides . . .  | 3,013  | 824     | 3,837  | 90                | 25      | 57    |
| Total . . .     | 8,109  | 2,824   | 10,933 | 243               | 87      | 163   |

In five years ending 1886 the average per 100,000 deaths showed there were 10 murders, 55 suicides, and 90 deaths by accident.

## ALGERIA

There has been a notable decline of death-rate, as the following table shows :—

| Nationality     | Deaths per 1000 Persons Yearly |         |
|-----------------|--------------------------------|---------|
|                 | 1853-56                        | 1873-76 |
| French . . .    | 46.3                           | 26.8    |
| Spaniards . . . | 30.0                           | 27.9    |
| Italians . . .  | 30.0                           | 28.9    |
| Maltese . . .   | 28.2                           | 26.7    |
| Germans . . .   | 54.8                           | 36.9    |
| Jews . . .      | 27.9                           | 24.4    |

Deaths in Algeria according to season were :—

|              |       |
|--------------|-------|
| Spring . . . | 19.5  |
| Summer . . . | 29.3  |
| Autumn . . . | 28.5  |
| Winter . . . | 22.7  |
|              | 100.0 |

## DEATHS

190

## DIET

Algerian statistics show that of 1000 infants born the following numbers die in the first twelve months :—

| Parents             | Death per 1000 |       |         |
|---------------------|----------------|-------|---------|
|                     | Boys           | Girls | General |
| French . . . . .    | 244            | 146   | 207     |
| Spanish . . . . .   | 238            | 250   | 257     |
| Italian . . . . .   | 245            | 184   | 224     |
| Jewish . . . . .    | 236            | 182   | 213     |
| Mahometan . . . . . | 530            | 488   | 500     |
| German . . . . .    | ...            | ...   | 344     |

Deaths according to months in Algeria, taking the year as 1200, were :—

|                          |     |                          |     |
|--------------------------|-----|--------------------------|-----|
| January . . . . .        | 96  | July . . . . .           | 127 |
| February . . . . .       | 86  | August . . . . .         | 138 |
| March . . . . .          | 91  | September . . . . .      | 102 |
| First quarter . . . . .  | 273 | Third quarter . . . . .  | 367 |
| April . . . . .          | 71  | October . . . . .        | 127 |
| May . . . . .            | 72  | November . . . . .       | 113 |
| June . . . . .           | 86  | December . . . . .       | 91  |
| Second quarter . . . . . | 229 | Fourth quarter . . . . . | 331 |

### JAPAN

The returns for 1878-80 showed as follows :—

|                        | Death-Rate per 1000 | Ratio of Deaths |
|------------------------|---------------------|-----------------|
| Under 10 . . . . .     | 25.8                | 28.0            |
| 10-20 . . . . .        | 5.4                 | 4.9             |
| 20-30 . . . . .        | 8.6                 | 7.7             |
| 30-40 . . . . .        | 9.2                 | 8.6             |
| 40-50 . . . . .        | 8.9                 | 8.7             |
| 50-60 . . . . .        | 11.5                | 11.4            |
| 60-70 . . . . .        | 13.9                | 13.8            |
| 70-80 . . . . .        | 12.1                | 11.6            |
| Over 80 . . . . .      | 4.8                 | 5.3             |
| General rate . . . . . | 17.0                | 100.0           |

In 1000 deaths 527 were of males, 473 females.

### BRAZIL

Death-rate at Rio Janeiro in 1867-69 averaged 24.4 per 1000, the ratio showing thus :—

|                   |       |                          |       |
|-------------------|-------|--------------------------|-------|
| Under 1 . . . . . | 14.8  | Quarter ending—          |       |
| 1-7 . . . . .     | 11.6  | March 31st . . . . .     | 284   |
| 7-25 . . . . .    | 18.4  | June 30th . . . . .      | 261   |
| 25-40 . . . . .   | 22.9  | September 30th . . . . . | 228   |
| Over 40 . . . . . | 32.3  | December 31st . . . . .  | 227   |
|                   | 100.0 | Year . . . . .           | 1,000 |

In 1000 deaths, 546 were of males, 454 females ; 627 natives, and 373 foreigners.

## UNITED STATES

The only death-rates published are these :—

| Age               | Annual Deaths per 1000 Inhabitants |          |               |
|-------------------|------------------------------------|----------|---------------|
|                   | Massachusetts                      | Maryland | United States |
| Under 5 . . . . . | 65.8                               | 51.7     | 58.8          |
| 5-10 . . . . .    | 10.7                               | 9.5      | 10.1          |
| 10-15 . . . . .   | 5.1                                | 5.4      | 5.3           |
| 15-25 . . . . .   | 5.8                                | 5.4      | 5.6           |
| 25-45 . . . . .   | 11.9                               | 10.1     | 10.8          |
| 45-55 . . . . .   | 16.4                               | 18.2     | 17.6          |
| 55-65 . . . . .   | 26.3                               | 28.1     | 27.2          |
| 65-75 . . . . .   | 46.9                               | 56.5     | 51.4          |

## DEPOPULATION

The only European country which has suffered depopulation in the present century is Ireland. It is the result partly of famine, partly of evictions by the landowners. The official returns show the number of persons evicted thus :—

|                   |         |
|-------------------|---------|
| 1849-51 . . . . . | 263,000 |
| 1852-70 . . . . . | 157,000 |
| 1871-87 . . . . . | 113,000 |

Total . . . . . 533,000

This is, however, far short of the reality. The Census of 1861 showed the number of one-room cabins to be 89,400 against 491,300 in the Census of 1841, from which it appears that 402,000 cabins had been pulled down, the abodes of 2,000,000 inhabitants. The official number of emigrants from 1837 to 1888 was 4,338,000, but this did not include 600,000 who went to England or Scotland. The population has fallen from 8,275,000 in 1845 to 4,716,000 in 1889, a decline of 43 per cent. At present it is but 150 per square mile, against 190 in France, 240 in Germany, and 270 in Italy. The marriage-rate and birth-rate are the lowest in the world. The ratio of able-bodied population, male and female, between the ages of 20 and 55 is much less than in the sister kingdoms, as shown by the Census of 1881, viz. :—

|                    |              |
|--------------------|--------------|
| England . . . . .  | 432 per 1000 |
| Scotland . . . . . | 424 "        |
| Ireland . . . . .  | 408 "        |

The drain upon persons of the able-bodied age has been attended by a remarkable increase of pauperism, as the official returns show :—

| Year           | No. of Paupers | Per 1000 Inhab. |
|----------------|----------------|-----------------|
| 1874 . . . . . | 79,600         | 15              |
| 1880 . . . . . | 100,900        | 19              |
| 1888 . . . . . | 113,900        | 24              |

In the above interval of 14 years the population declined by 584,000 souls, and yet the number of paupers increased in the ratio of 43 per cent.

## DIET

The principal components of animal food are as follows :—

|                   | Fat  | Nitrogen | Water |                  | Fat  | Nitrogen | Water |
|-------------------|------|----------|-------|------------------|------|----------|-------|
| Lobster . . . . . | 1.2  | 19.2     | 76.6  | Tripe . . . . .  | 16.4 | 13.2     | 68.0  |
| Oyster . . . . .  | 1.5  | 14.0     | 80.4  | Beef . . . . .   | 17.1 | 17.2     | 61.5  |
| Turbot . . . . .  | 2.9  | 18.1     | 78.0  | Mutton . . . . . | 18.1 | 15.3     | 62.5  |
| Rabbit . . . . .  | 3.2  | 13.9     | 73.2  | Cheese . . . . . | 41.3 | 7.0      | 38.8  |
| Salmon . . . . .  | 5.5  | 16.1     | 77.0  | Pork . . . . .   | 44.9 | 9.8      | 43.0  |
| Milk . . . . .    | 7.9  | 4.5      | 87.0  | Bacon . . . . .  | 63.3 | 8.8      | 25.0  |
| Eggs . . . . .    | 10.5 | 14.0     | 74.0  | Butter . . . . . | 81.0 | 5.0      | 11.0  |

The components of vegetable food are :—

|                     | Starch | Nitrogen | Water |                     | Starch | Nitrogen | Water |
|---------------------|--------|----------|-------|---------------------|--------|----------|-------|
| Mushroom . . . .    | 3.5    | 4.7      | 91.0  | Bread . . . . .     | 49.0   | 10.0     | 33.6  |
| Cabbage . . . . .   | 4.0    | 1.8      | 92.0  | Beans . . . . .     | 52.6   | 22.0     | 12.8  |
| Turnip . . . . .    | 5.1    | 1.2      | 91.0  | Peas . . . . .      | 52.6   | 22.3     | 14.5  |
| Carrot . . . . .    | 5.5    | 0.7      | 87.3  | Tea . . . . .       | 55.2   | 28.8     | 12.0  |
| Beer . . . . .      | 9.2    | 0.9      | 89.7  | Lentils . . . . .   | 58.0   | 25.2     | 11.5  |
| Parsnip . . . . .   | 9.6    | 1.1      | 82.0  | Coffee . . . . .    | 59.4   | 26.2     | 12.0  |
| Beet-root . . . . . | 11.3   | 5.0      | 82.7  | Wheat-flour . . . . | 59.7   | 12.6     | 14.5  |
| Asparagus . . . .   | 11.8   | 1.2      | 86.0  | Oatmeal . . . . .   | 63.8   | 12.6     | 15.0  |
| Artichoke . . . . . | 14.7   | 3.1      | 76.0  | Cocoa . . . . .     | 71.0   | 24.0     | 4.0   |
| Yam . . . . .       | 16.0   | 2.0      | 74.0  | Maize . . . . .     | 71.2   | 9.9      | 13.5  |
| Truffles . . . . .  | 16.6   | 8.8      | 72.0  | Rye . . . . .       | 73.2   | 8.0      | 15.0  |
| Sugar-cane . . . .  | 18.0   | 5.5      | 72.0  | Barley . . . . .    | 74.3   | 6.3      | 15.0  |
| Banana . . . . .    | 19.7   | 4.8      | 73.9  | Rice . . . . .      | 79.5   | 6.3      | 13.0  |
| Potato . . . . .    | 20.2   | 2.3      | 75.9  | Buckwheat . . . . . | 79.9   | 2.6      | 12.8  |

The percentage of carbon in food is as follows :—

|                     |                   |                     |
|---------------------|-------------------|---------------------|
| Cabbage . . . . 3   | Eggs . . . . 16   | Biscuit . . . . 42  |
| Beer . . . . . 4    | Beef . . . . 27   | Oatmeal . . . . 42  |
| Carrots . . . . 5   | Bread . . . . 27  | Sugar . . . . . 42  |
| Milk . . . . . 7    | Cheese . . . . 36 | Flour . . . . . 46  |
| Parsnips . . . . 8  | Peas . . . . 36   | Bacon . . . . . 54  |
| Fish . . . . . 9    | Rice . . . . 38   | Cocoa . . . . . 69  |
| Potatoes . . . . 12 | Maize . . . . 38  | Butter . . . . . 79 |

The nutritive value of food (taking beef as 100) is expressed thus :—

|                     |                     |                    |
|---------------------|---------------------|--------------------|
| Oysters . . . . 22  | Turbot . . . . 84   | Beef . . . . 100   |
| Milk . . . . . 24   | Mutton . . . . 87   | Duck . . . . 104   |
| Lobsters . . . . 50 | Venison . . . . 89  | Salmon . . . . 108 |
| Cream . . . . . 56  | Veal . . . . . 92   | Pork . . . . . 116 |
| Cod-fish . . . . 68 | Fowl . . . . . 94   | Butter . . . . 124 |
| Eggs . . . . . 72   | Herring . . . . 100 | Cheese . . . . 155 |

Payn's table gives the following percentages in food :—

|                    | Azote | Carbon | Fat  | Water |                      | Azote | Carbon | Fat  | Water |
|--------------------|-------|--------|------|-------|----------------------|-------|--------|------|-------|
| Batata . . . . .   | 0.2   | 9.0    | 0.3  | 80.0  | Kidneys . . . . .    | 2.7   | 12.2   | 2.1  | 78.2  |
| Beans . . . . .    | 3.9   | 43.0   | 2.8  | 10.0  | Lard . . . . .       | 1.2   | 71.0   | 71.0 | 20.0  |
| Beef, raw . . . .  | 3.0   | 11.0   | 2.3  | 78.0  | Lentils . . . . .    | 3.9   | 43.0   | 2.6  | 11.5  |
| Beef, roast . . .  | 3.5   | 11.8   | 5.2  | 70.0  | Lobsters . . . . .   | 2.9   | 11.0   | 1.2  | 76.6  |
| Beer . . . . .     | 0.1   | 4.5    | ...  | 90.0  | Mackerel . . . . .   | 3.7   | 19.3   | 6.8  | 68.3  |
| Bread . . . . .    | 1.1   | 29.5   | 1.2  | 35.0  | Maize . . . . .      | 1.7   | 44.0   | 8.8  | 12.0  |
| Butter . . . . .   | 0.6   | 83.0   | 82.0 | 14.0  | Milk, cow's . . . .  | 0.7   | 8.0    | 3.7  | 86.5  |
| Carrots . . . . .  | 0.3   | 5.5    | 0.2  | 88.0  | Milk, goat's . . . . | 0.7   | 8.6    | 4.1  | 83.6  |
| Cheese, Brie . . . | 2.9   | 35.0   | 25.8 | 45.3  | Mushrooms . . . . .  | 0.7   | 4.5    | 0.4  | 91.0  |
| Chestnuts . . . .  | 0.6   | 35.0   | 4.1  | 26.0  | Oil, olive . . . . . | ...   | 98.0   | 96.0 | 2.0   |
| Chestnuts, dry . . | 1.0   | 48.0   | 6.0  | 10.0  | Oyster . . . . .     | 2.1   | 7.2    | 1.5  | 80.4  |
| Cod, salt . . . .  | 5.0   | 16.0   | 0.4  | 47.0  | Potato . . . . .     | 0.3   | 11.0   | 0.1  | 74.0  |

The analysis of bread gives conflicting results, the following being taken from respectable sources :—

|                    | A.    | B.    | C.    |
|--------------------|-------|-------|-------|
| Nitrogen . . . . . | 6.8   | 8.1   | 12.6  |
| Water . . . . .    | 43.0  | 37.0  | 14.6  |
| Starch . . . . .   | 44.0  | 47.4  | 65.6  |
| Sugar . . . . .    | 3.4   | 3.6   | 4.8   |
| Fat . . . . .      | 1.3   | 1.5   | 1.4   |
| Mineral . . . . .  | 1.5   | 2.4   | 1.0   |
|                    | 100.0 | 100.0 | 100.0 |

In 1862 the bread supplied to the French army was found superior in nitrogen to that of other Continental armies, as follows, French being 100 :—

|                     |                     |                    |
|---------------------|---------------------|--------------------|
| Prussian . . . . 50 | Austrian . . . . 70 | Belgian . . . . 91 |
| Spanish . . . . 69  | Dutch . . . . . 90  | Italian . . . . 96 |

The following table shows foot-tons of energy contained per ounce of food :—

|                     | Foot-Tons         |                   | Foot-Tons |  | Foot-Tons |
|---------------------|-------------------|-------------------|-----------|--|-----------|
| Cabbage . . . . 16  | Porter . . . . 42 | Rice . . . . .    | 145       |  |           |
| Carrots . . . . 20  | Beef . . . . 55   | Flour . . . . .   | 148       |  |           |
| Milk . . . . . 24   | Egg . . . . . 57  | Arrowroot . . . . | 151       |  |           |
| Apples . . . . 25   | Ham . . . . 65    | Oatmeal . . . . . | 152       |  |           |
| Fish . . . . . 30   | Bread . . . . 83  | Cheese . . . . .  | 168       |  |           |
| Alc . . . . . 30    | Salt . . . . 120  | Butter . . . . .  | 281       |  |           |
| Potatoes . . . . 38 | Sugar . . . . 130 |                   |           |  |           |

The loss of weight in meat in cooking is as follows :—

|                   |                 |
|-------------------|-----------------|
| 100 lbs. raw beef | = 67 lbs. roast |
| " " beef          | = 74 " boiled   |
| " " mutton        | = 75 " roast    |
| " " fowl          | = 80 " roast    |
| " " fowl          | = 87 " boiled   |
| " " fish          | = 94 " boiled   |

A sack of flour containing 280 lbs. will make 368 lbs. of bread in England, and 420 lbs. in United States, that is, 7 lbs. of American are equal to 8 lbs. of English flour. The ingredients for 368 lbs. of English bread are :—280 lbs. flour, 3 gallons water, half-gallon yeast, half-gallon alum, and 4 lbs. salt.

The following comparison has been made between flour of Odessa wheat and that used at bakeries at Paris :—

|                    | Odessa Flour | Paris Flour |
|--------------------|--------------|-------------|
| Water . . . . .    | 12.0         | 10.0        |
| Dry gluten . . . . | 14.5         | 10.2        |
| Starch . . . . .   | 66.5         | 72.8        |
| Glucose, &c. . . . | 7.0          | 7.0         |
|                    | 100.0        | 100.0       |

The nutritive value of various kinds of flour is stated thus :—

|                   |                    |                   |
|-------------------|--------------------|-------------------|
| English . . . 100 | Canadian . . . 117 | Scotch . . . 134  |
| German . . . 115  | Essex . . . 121    | United States 145 |

An analysis of the different kinds of bread supplied to European armies in 1860 showed as follows :—

|             | French | Prussian | Bavarian | Belgian | Dutch |
|-------------|--------|----------|----------|---------|-------|
| Starch . .  | 42     | 37       | 54       | 44      | 40    |
| Water . .   | 34     | 35       | 30       | 31      | 32    |
| Azote . .   | 9      | 5        | 6        | 9       | 9     |
| Various . . | 15     | 23       | 10       | 16      | 19    |
|             | 100    | 100      | 100      | 100     | 100   |

The percentage of nitrogen digested in food is as follows :—

|                    | Per Cent. |                  | Per Cent. |
|--------------------|-----------|------------------|-----------|
| Lentils . . . . .  | 60        | Bread . . . . .  | 81        |
| Potatoes . . . . . | 68        | Cheese . . . . . | 96        |
| Peas . . . . .     | 72        | Meat . . . . .   | 97        |
| Rice . . . . .     | 75        | Eggs . . . . .   | 98        |

The time required for digestion is :—

|                          | Hours Min. |                       | Hours Min. |
|--------------------------|------------|-----------------------|------------|
| Rice . . . . .           | 1 0        | Mutton, boiled . .    | 3 0        |
| Eggs, raw . . . . .      | 1 30       | Beef, roast . . . .   | 3 0        |
| Apples . . . . .         | 1 30       | Bread, fresh . . . .  | 3 15       |
| Trout, boiled . . . .    | 1 30       | Carrots, boiled . .   | 3 15       |
| Venison, broiled . . .   | 1 35       | Turnips, boiled . .   | 3 30       |
| Sago, boiled . . . . .   | 1 45       | Potatoes, boiled . .  | 3 30       |
| Milk, boiled . . . . .   | 2 0        | Butter . . . . .      | 3 30       |
| Bread, stale . . . . .   | 2 0        | Cheese . . . . .      | 3 30       |
| Milk, raw . . . . .      | 2 15       | Oysters, stewed . .   | 3 30       |
| Turkey, boiled . . . .   | 2 25       | Eggs, hard . . . . .  | 3 30       |
| Goose, roast . . . . .   | 2 30       | Pork, boiled . . . .  | 3 30       |
| Lamb, broiled . . . .    | 2 30       | Fowl, roast . . . . . | 4 0        |
| Potatoes, baked . . . .  | 2 30       | Beef, fried . . . . . | 4 0        |
| Beans, boiled . . . . .  | 2 30       | Cabbage . . . . .     | 4 30       |
| Parsnips, boiled . . . . | 2 30       | Wild-fowl . . . . .   | 4 30       |
| Oysters, raw . . . . .   | 2 55       | Pork, roast . . . . . | 5 15       |
| Eggs, boiled . . . . .   | 3 0        | Veal, roast . . . . . | 5 30       |

According to Keleti, the average amount of food required per annum is as follows :—

|                 | Lbs. Food | Containing Lbs. Albumen |
|-----------------|-----------|-------------------------|
| Man . . . . .   | 1,600     | 100                     |
| Woman . . . . . | 1,200     | 75                      |
| Child . . . . . | 900       | 50                      |

The man's food to be made up thus :—

|                     | Lbs. Food | Lbs. Albumen |
|---------------------|-----------|--------------|
| Animal . . . . .    | 290       | 28           |
| Vegetable . . . . . | 1,310     | 72           |
| Total . . . . .     | 1,600     | 100          |

According to the *Dict. Sciences Medic.*, a man's daily food should contain at least  $\frac{1}{4}$  oz. of azote and 11 oz. of carbon, the proportions of which contained in the food of certain classes are as follows :—

|                          | Per Week   |             |
|--------------------------|------------|-------------|
|                          | Azote, Oz. | Carbon, Oz. |
| English peasant . . . .  | 7.7        | 120         |
| Irish peasant . . . . .  | 4.0        | 168         |
| French peasant . . . . . | 6.0        | 150         |
| Lombard peasant . . . .  | 7.0        | 175         |

Animal food constitutes, according to the same authority the following percentage in the weight of all food consumed :—

|                          |             |
|--------------------------|-------------|
| Irish peasant . . . . .  | 1 per cent. |
| French peasant . . . . . | 7 "         |
| French sailor . . . . .  | 25 "        |
| English "navvy" . . . .  | 28 "        |

The proportions of azote and carbon contained in bread and meat are as follows :—

| In              | Percentage of |        |
|-----------------|---------------|--------|
|                 | Azote         | Carbon |
| Bread . . . . . | 1             | 30     |
| Meat . . . . .  | 3             | 10     |

The weekly rations in different countries and classes are as follows :—

|                             | Rations | Nitrogenous | Carbon |
|-----------------------------|---------|-------------|--------|
|                             | Lbs.    | Lbs.        | Lbs.   |
| British soldiers . . . .    | 25.7    | 2.46        | 4.84   |
| British soldiers in India . | 20.0    | 2.33        | 4.52   |
| French soldiers . . . . .   | 23.6    | 2.26        | 5.81   |
| German soldiers . . . . .   | 28.8    | 1.56        | 5.25   |
| Dutch soldiers . . . . .    | 25.0    | 1.67        | 4.82   |
| Chelsea Hospital . . . .    | 22.6    | 1.99        | 5.31   |
| English convicts . . . .    | 22.2    | 1.38        | 4.99   |
| Farm labourer . . . . .     | 22.1    | 1.82        | 5.11   |
| Workhouse, aged . . . .     | 17.8    | 1.50        | 3.96   |
| Chelsea boys . . . . .      | 16.7    | 0.88        | 3.93   |

Field-rations of the various armies are as follows :—

|                    | Ounces Daily |       |      |               |       |                  |
|--------------------|--------------|-------|------|---------------|-------|------------------|
|                    | Beef         | Bread | Rice | Coffee        | Sugar | Total            |
| British . . . . .  | 16           | 24    | 2    | $\frac{1}{2}$ | 2     | 44 $\frac{1}{2}$ |
| French . . . . .   | 7            | 26    | 3    | $\frac{1}{2}$ | 1     | 37 $\frac{1}{2}$ |
| German . . . . .   | 8            | 28    | 3    | $\frac{1}{2}$ | 1     | 40 $\frac{1}{2}$ |
| Russian . . . . .  | 16           | 16    | ...  | ...           | ...   | 32               |
| Austrian . . . . . | 5            | 26    | 1    | ...           | ...   | 32               |
| American . . . . . | 20           | 18    | 2    | 2             | 2     | 44               |

|                    | Ounces Daily |     |        |      |       | Energy, Foot-Tons |
|--------------------|--------------|-----|--------|------|-------|-------------------|
|                    | Nitrogen     | Fat | Carbon | Salt | Total |                   |
| British . . . . .  | 4.1          | 1.6 | 17.4   | 0.8  | 23.4  | 3,552             |
| French . . . . .   | 4.3          | 1.3 | 18.0   | 1.0  | 24.6  | 3,719             |
| German . . . . .   | 4.0          | 1.1 | 19.6   | 1.5  | 26.2  | 3,834             |
| Austrian . . . . . | 3.7          | 1.6 | 17.0   | 1.0  | 23.4  | 3,590             |
| Standard . . . . . | 4.6          | 3.0 | 14.3   | 1.1  | 23.0  | 3,688             |

The rations in use in the United Kingdom are as follow :—

|                         | Weight in Lbs. Weekly |             |            |       |          |
|-------------------------|-----------------------|-------------|------------|-------|----------|
|                         | Bread                 | Cooked Meat | Vegetables | Sugar | Sundries |
| Soldier . . . . .       | 7.0                   | 3.5         | 7.0        | 0.7   | 7.5      |
| Seaman . . . . .        | 8.8                   | 5.2         | 3.5        | 0.9   | ...      |
| Convict . . . . .       | 10.0                  | 2.6         | 7.6        | 0.2   | 1.8      |
| Pauper . . . . .        | 7.0                   | 3.0         | 6.0        | 0.4   | 0.8      |
| Female pauper . . . . . | 6.0                   | 2.0         | 4.0        | 0.3   | 0.6      |
| Lunatic . . . . .       | 5.4                   | 2.0         | 5.4        | 0.2   | 1.0      |
| Hospitals . . . . .     | 6.0                   | 3.0         | 3.5        | 0.5   | 2.0      |

The components of the British navy rations give the following analysis :—

|                    | Ounces Daily | Components |            |             | Energy Foot-Tons |
|--------------------|--------------|------------|------------|-------------|------------------|
|                    |              | Nitrogen   | Fat        | Carbon      |                  |
| Biscuit . . .      | 20           | 2.0        | 0.2        | 8.4         | 1,720            |
| Meat . . .         | 14           | 1.8        | 3.0        | 5.4         | 1,310            |
| Peas, flour, &c.   | 7            | 1.0        | ...        | 3.0         | 560              |
| Sugar . . .        | 2            | ...        | ...        | 0.8         | 240              |
| Cocoa . . .        | 1            | 0.2        | ...        | 0.7         | 125              |
| <b>Total . . .</b> | <b>44</b>    | <b>5.0</b> | <b>3.2</b> | <b>18.3</b> | <b>3,955</b>     |

Prison rations in the United Kingdom are as follows :—

|                    | Ounces Daily |              | Energy, Foot-Tons |              |
|--------------------|--------------|--------------|-------------------|--------------|
|                    | Hard Labour  | Light Labour | Hard Labour       | Light Labour |
| Bread . . .        | 24.0         | 21.0         | 1,992             | 1,743        |
| Meat . . .         | 4.5          | 3.5          | 340               | 270          |
| Milk . . .         | 2.0          | 2.0          | 48                | 48           |

| Italy . . .       | 8           | 12        | 2                | 4          | 1              | 1,940                   |
| Spain . . .       | 10          | 32        | 2                | 3          | ...            | 2,330                   |
| Portugal . . .    | 8           | 23        | 2                | 6          | ...            | 1,950                   |
| Sweden . . .      | 8           | 30        | 6                | 10         | 12             | 3,390                   |
| Norway . . .      | 8           | 35        | 7                | 6          | 12             | 3,350                   |
| Denmark . . .     | 10          | 30        | 11               | 10         | 8              | 3,460                   |
| Holland . . .     | 9           | 28        | 7                | 16         | 16             | 4,090                   |
| Belgium . . .     | 11          | 30        | 7                | 13         | 25             | 5,050                   |
| Switzerland . . . | 11          | 30        | 6                | 12         | 3              | 3,170                   |
| Europe . . .      | 10½         | 30        | 4                | 11         | 10             | 3,600                   |
| U. States . . .   | 9           | 75        | 10               | 25         | 3              | 3,390                   |
| Canada . . .      | 8           | 43        | 11               | 20         | 14             | 3,950                   |
| Australia . . .   | 10½         | 95        | 9                | 37         | 7              | 4,490                   |

The above does not include fish, eggs, fruit, vegetables, chestnuts, rice, and other articles of much importance. The aggregate food for a man doing physical or mental work should be equal to at least 3300 foot-tons daily, for a woman 2200, and for a child 1100 foot-tons.

Meat is apparently the most important element of food. Dr. De Renzi states that 4 per cent. of the population of Naples die of impoverishment of the blood caused by want of meat. At the ironworks of Thorn the operatives fed on vegetables, &c., lost fifteen days a year by sickness until meat was introduced in 1833, when the average fell to three days per operative. See *Food*.

## DISEASE

In 1883 the deaths per 100,000 inhabitants from certain diseases were as follows :—

|                      | Small-pox | Typhoid | Whooping Cough | Diphtheria | Scarlatina | Measles | Infant Diarrhoea |
|----------------------|-----------|---------|----------------|------------|------------|---------|------------------|
| London . . .         | 3         | 24      | 40             | 40         | 50         | 61      | 64               |
| Edinburgh . . .      | ...       | 25      | 48             | 45         | 39         | 57      | 43               |
| Glasgow . . .        | 2         | 46      | 557            | 162        | 90         | 139     | 250              |
| Paris . . .          | 20        | 92      | 30             | 87         | 4          | 47      | 216              |
| Marseilles . . .     | 38        | 139     | 19             | 102        | 6          | 139     | 315              |
| Berlin . . .         | 1         | 18      | 29             | 224        | 68         | 96      | 412              |
| Brussels . . .       | 94        | 28      | 33             | 28         | 4          | 31      | 325              |
| St. Petersburg . . . | 46        | 153     | 14             | 136        | 75         | 57      | 236              |
| Vienna . . .         | 10        | 21      | 30             | 35         | 17         | 31      | 76               |
| Baltimore . . .      | 155       | 91      | 15             | 194        | 82         | 31      | 22               |

The following table shows approximately the ratios of various diseases in 10,000 deaths :—

|                      | England | France | Germany | Russia | Italy | Switzerland | Belgium | Holland | Scandinavia | United States | Canada |
|----------------------|---------|--------|---------|--------|-------|-------------|---------|---------|-------------|---------------|--------|
| Apoplexy . . .       | 270     | 400    | 390     | 210    | 360   | 370         | 310     | 280     | 350         | 140           | 110    |
| Bronchitis . . .     | 1,150   | 310    | 400     | 1,500  | 30    | 600         | 480     | 220     | 620         | ...           | 130    |
| Cancer . . .         | 235     | ...    | 260     | 150    | 160   | 300         | 140     | 180     | 330         | 130           | 126    |
| Diphtheria . . .     | 55      | 360    | 270     | 210    | 360   | 304         | 280     | 130     | 230         | 480           | 114    |
| Erysipelas . . .     | 36      | 48     | 35      | ...    | 50    | ...         | 40      | ...     | ...         | ...           | 68     |
| Heart . . .          | 620     | 290    | 230     | 200    | 580   | 385         | 190     | 180     | 220         | 350           | 370    |

The occurrence of apoplexy is most frequent in France, Russia, and Holland in winter, and in Canada in summer :—

| Seasons      | France | Russia | Holland | Canada |
|--------------|--------|--------|---------|--------|
| Spring . . . | 27.0   | 24.0   | 25.8    | 25.3   |
| Summer . . . | 23.7   | 23.8   | 20.1    | 26.3   |
| Autumn . . . | 19.3   | 21.2   | 23.6    | 22.5   |
| Winter . . . | 30.0   | 31.0   | 30.5    | 25.9   |
| Total . . .  | 100.0  | 100.0  | 100.0   | 100.0  |

Its occurrence according to months, taking the year as 1200, was as follows :—

|              | London<br>(1840) | Den-<br>mark | France | Calcutta | Italian<br>Cities |
|--------------|------------------|--------------|--------|----------|-------------------|
| January . .  | 123              | 122          | 139    | 108      | 143               |
| February . . | 108              | 110          | 112    | 102      | 135               |
| March . . .  | 104              | 93           | 91     | 111      | 110               |
| April . . .  | 95               | 99           | 127    | 138      | 95                |
| May . . .    | 96               | 97           | 106    | 97       | 94                |
| June . . .   | 76               | 93           | 109    | 64       | 74                |
| July . . .   | 89               | 98           | 109    | 75       | 78                |
| August . . . | 88               | 77           | 67     | 83       | 74                |
| September .  | 98               | 85           | 67     | 87       | 80                |
| October . .  | 89               | 103          | 67     | 97       | 90                |
| November .   | 120              | 110          | 97     | 120      | 110               |
| December .   | 114              | 113          | 109    | 118      | 117               |
|              | 1,200            | 1,200        | 1,200  | 1,200    | 1,200             |

The increase of this disease in England is remarkable, deaths yearly per million inhabitants being as follows :—

|               |     |               |     |
|---------------|-----|---------------|-----|
| 1850-66 . . . | 457 | 1874-80 . . . | 550 |
| 1867-70 . . . | 504 | 1886 . . .    | 577 |
| 1871-73 . . . | 517 |               |     |

In Holland it is found that of 100 patients 46 are males, 54 females.

The distribution of this disease according to age in France was :—

| Age             | Of 1000 Cases | Age           | Age |
|-----------------|---------------|---------------|-----|
| Under 10 . . 22 | 30-40 . . 110 | 61-70 . . .   | 229 |
| 10-20 . . . 30  | 41-50 . . 153 | Over 70 . . . | 192 |
| 21-30 . . . 62  | 51-60 . . 202 |               |     |

*Asthma*.—Of 10,000 deaths there are from this disease 66 in England, 48 in Scotland, and 33 in Ireland. Deaths according to season show :—

|              |       |
|--------------|-------|
| Spring . . . | 16.1  |
| Summer . . . | 7.0   |
| Autumn . . . | 23.2  |
| Winter . . . | 53.7  |
|              | 100.0 |

*Bright's Disease*.—In 10,000 deaths there were of this disease :—

| At                | At                 | At               |
|-------------------|--------------------|------------------|
| Amsterdam . . 120 | Denmark . . . 80   | Lisbon . . . 30  |
| Berne . . . 100   | Frankfort . . 130  | Munich . . . 30  |
| Brussels . . . 50 | French cities . 14 | Norway . . . 60  |
| Budapesth . . 90  | Holland . . . 50   | Shanghai . . 150 |
| Copenhagen . 100  | Italy . . . 40     | United States 35 |

*Bronchitis*.—In 10,000 deaths there were of this disease :—

| At                | At                  | At                 |
|-------------------|---------------------|--------------------|
| Amsterdam . . 220 | Canada . . . 130    | London . . . 1,450 |
| Athens . . . 391  | England . . 1,080   | Rome . . . 290     |
| Berlin . . . 420  | Ireland . . . 1,220 | St. John's . 2,330 |
| Brussels . . 480  | Lisbon . . . 420    | Scotland . . 1,310 |

The death-rate among bronchitis patients in the Paris hospitals is 6 per cent. in the quarter ending March, 4 per cent. in that ending June, 2 per cent. in the September, and 6 per cent. in the December quarter, giving an average of 5 per cent. for the year. In Sweden and Norway the prevalence of bronchitis in the various months is (taking 1200 per annum as a total) thus :—

| Month          | Sweden | Norway | Month         | Sweden | Norway |
|----------------|--------|--------|---------------|--------|--------|
| January . . .  | 150    | 160    | July . . .    | 49     | 53     |
| February . . . | 160    | 152    | August . . .  | 46     | 48     |
| March . . .    | 143    | 132    | September . . | 58     | 62     |
| April . . .    | 130    | 112    | October . . . | 82     | 82     |
| May . . .      | 102    | 96     | November . .  | 104    | 110    |
| June . . .     | 67     | 72     | December . .  | 109    | 121    |

The prevalence of bronchitis among British troops on foreign stations was as follows :—

#### Bronchitis Patients per 1000 Sick

|                   |                  |                   |
|-------------------|------------------|-------------------|
| St. Helena . . 61 | Mauritius . . 84 | Gibraltar . . 132 |
| Ceylon . . . 70   | Jamaica . . . 85 | Malta . . . 140   |
| Bengal . . . 71   | Cape Colony 98   | Canada . . . 156  |

The ratio among garrisons in the United Kingdom was 161.

Deaths occur in London according to season thus :—

|              |       |
|--------------|-------|
| Spring . . . | 20.2  |
| Summer . . . | 12.5  |
| Autumn . . . | 27.0  |
| Winter . . . | 40.3  |
|              | 100.0 |

*Calculus or Stone*.—In 10,000 deaths there were of this disease :—

| At               | At               | At                |
|------------------|------------------|-------------------|
| Belgium . . . 4  | Geneva . . . 6   | Riga . . . 3      |
| Brussels . . . 4 | Hamburg . . . 2  | Russia . . . 5    |
| Copenhagen . 13  | Holland . . . 3  | Turin . . . 2     |
| Denmark . . . 4  | Iceland . . . 20 | U. States N. . 1  |
| England . . . 6  | Paris . . . 2    | U. States, S. . 2 |

The ages at which this disease occur are as follows :—

| Age               | Males | Females |
|-------------------|-------|---------|
| Under 30 . . . .  | 4.5   | 18.2    |
| 30-40 . . . . .   | 14.8  | 28.0    |
| 41-50 . . . . .   | 34.3  | 20.6    |
| 51-60 . . . . .   | 21.5  | 22.0    |
| Over 60 . . . . . | 24.9  | 11.2    |
| Total . . . . .   | 100.0 | 100.0   |

In 100 cases 38 are males, 62 females.

*Cataract*.—Of 100 cases 54 are males, 46 females.  
The ratio of age is shown thus :—

| Per 1000 Cases   |    |               |     |                 |     |
|------------------|----|---------------|-----|-----------------|-----|
| Age              |    | Age           |     | Age             |     |
| Under 10 . . . . | 28 | 31-40 . . . . | 36  | 61-70 . . . .   | 344 |
| 10-20 . . . . .  | 32 | 41-50 . . . . | 102 | Over 70 . . . . | 218 |
| 21-30 . . . . .  | 36 | 51-60 . . . . | 204 |                 |     |

*Cancer*.—In 10,000 deaths there were of this disease :—

| At                | At                 | At                 |
|-------------------|--------------------|--------------------|
| Amsterdam . . .   | England, men . .   | New York . . . .   |
| Bale . . . . .    | Do., women . . .   | Norway . . . . .   |
| Belgium . . . .   | Frankfort . . . .  | Paris . . . . .    |
| Berlin . . . . .  | Geneva . . . . .   | Potsdam . . . . .  |
| Berne . . . . .   | Glasgow . . . . .  | Rome . . . . .     |
| Bordeaux . . . .  | Hamburg . . . . .  | St. Petersburg . . |
| Breslau . . . . . | Holland . . . . .  | Scotland . . . . . |
| Brussels . . . .  | Iceland . . . . .  | Shanghai . . . .   |
| Carlsruhe . . . . | Ireland . . . . .  | Stettin . . . . .  |
| Christiania . . . | Kiel . . . . .     | Stockholm . . . .  |
| Copenhagen . . .  | Königsberg . . . . | Turin . . . . .    |
| Dantzic . . . . . | Lisbon . . . . .   | United States . .  |
| Dresden . . . . . | London . . . . .   | Do., North . . . . |
| Edinburgh . . . . | Milan . . . . .    | Do., South . . . . |
| England . . . . . | Montevideo . . . . |                    |

Mental worry, says Dr. Herbert Snow, of the Cancer Hospital, is the chief exciting cause of cancer. In 1864 in England the proportion of cancer sufferers was 385 to the million; in 1888 it had risen to 610—the number of deaths in the latter year being 6284 males, and 11,222 females, or 17,506 in all.

*Cholera*.—The losses may be approximately set down in the principal visitations of this epidemic as follows :—

|                            | 1832    | 1849      | 1854      | 1865    | 1873    | 1884    | Total     |
|----------------------------|---------|-----------|-----------|---------|---------|---------|-----------|
| United Kingdom . . . . .   | 53,000  | 55,000    | 22,000    | 18,000  | ...     | ...     | 148,000   |
| France . . . . .           | 115,000 | 110,000   | 144,000   | 15,000  | 63,000  | 10,000  | 457,000   |
| Germany . . . . .          | 67,000  | 80,000    | 119,000   | 33,000  | 52,000  | ...     | 351,000   |
| Austria . . . . .          | 99,000  | 145,000   | 218,000   | 220,000 | 436,000 | ...     | 1,118,000 |
| Italy . . . . .            | ...     | ...       | ...       | 13,000  | ...     | 14,300  | ?         |
| Spain and Portugal . . . . | ...     | ...       | 236,700   | 150,000 | ...     | 119,000 | 507,000   |
| Other countries . . . . .  | 200,000 | 850,000   | 400,000   | 245,000 | 70,000  | 10,000  | 1,775,000 |
| Total . . . . .            | 534,000 | 1,240,000 | 1,139,700 | 694,000 | 621,000 | 153,900 | 4,382,600 |

According to Rosemberg, one million persons perished in the cholera of 1848-49. According to Kolb, in that visitation in Russia 1,687,000 persons were attacked, of whom 668,000 died. It was apparently the worst plague that visited Europe since the Middle Ages. The death-rate on that occasion was 22 per 100 sick in England, and 40 in Austria. In the previous visitation of 1832 the rate varied little in all countries, from 38 to 42 per cent. In the cholera of 1855 it was as follows :—

|                   | Per 100 Cases |                   | Per 100 Cases |
|-------------------|---------------|-------------------|---------------|
| Spain . . . . .   | 30            | Sweden . . . . .  | 52            |
| Austria . . . . . | 42            | Prussia . . . . . | 59            |
| Russia . . . . .  | 50            | Denmark . . . . . | 65            |

In that of 1866 the average was 50 per cent. in Belgium and 55 in Italy, being in the latter 56 for men and 54 for women.

The victims in various cities in 1865 were as follows :—

#### Deaths per 10,000 Inhabitants

|                    |    |                    |    |                    |     |
|--------------------|----|--------------------|----|--------------------|-----|
| London . . . . .   | 18 | Paris . . . . .    | 66 | Madrid . . . . .   | 102 |
| Dublin . . . . .   | 41 | Berlin . . . . .   | 83 | Brussels . . . . . | 184 |
| Vienna . . . . .   | 51 | Naples . . . . .   | 89 | Palermo . . . . .  | 197 |
| Marseilles . . . . | 64 | St. Petersburg . . | 98 | Constantinople . . | 738 |

The greatest mortality was at Rome and Madrid on Sundays, at London and Berlin on Wednesdays, and at Paris on Saturdays.

The following table shows the deaths from cholera in various cities at different periods :—

| City                   | Date | Deaths | In 100 Sick | In 10,000 Population | City               | Date | Deaths | In 100 Sick | In 10,000 Population |
|------------------------|------|--------|-------------|----------------------|--------------------|------|--------|-------------|----------------------|
| Aleppo . . . . .       | 1865 | 12,000 | ...         | 1,020                | Malaga . . . . .   | 1865 | 2,000  | 40          | 200                  |
| Antwerp . . . . .      | 1865 | 2,300  | 50          | 205                  | Madrid . . . . .   | 1865 | 3,300  | ...         | 102                  |
| Berlin . . . . .       | 1865 | 5,600  | ...         | 83                   | Naples . . . . .   | 1884 | 7,100  | ...         | 144                  |
| Brussels . . . . .     | 1865 | 3,100  | 75          | 184                  | Palermo . . . . .  | 1867 | 4,000  | ...         | 197                  |
| Constantinople . . . . | 1865 | 12,000 | ...         | 190                  | " . . . . .        | 1884 | 3,000  | 53          | 125                  |
| Copenhagen . . . . .   | 1853 | 4,800  | 65          | 402                  | Paris . . . . .    | 1832 | 18,700 | ...         | 205                  |

| 50-60 . . .    | 15.4  | 40-60 . . .   | 79                        |
| Over 60 . . .  | 30.0  | Over 60 . . . | 171                       |
|                | 100.0 |               |                           |

Its ravages in 1854 were especially among very young or very old persons. The ratio of sexes in 1832 was 100 males to 101 females, and in the same year the mortality according to the floors in houses occupied by the patients was distributed thus:—

|                      |       |
|----------------------|-------|
| Basement . . .       | 13.5  |
| 1st floor . . .      | 25.8  |
| 2nd floor . . .      | 20.4  |
| Over and floor . . . | 40.3  |
| Total . . .          | 100.0 |

One of the most deadly outbreaks on record was at the Salpêtrière lunatic asylum, near Paris, in 1849, when 45 per cent. of the inmates were attacked, and of the patients 76 per cent. died. In the Anglo-Indian army cholera makes more ravages among Europeans than natives, viz:—

|                         |                              |
|-------------------------|------------------------------|
| Soldiers attacked . . . | 250 Europeans to 100 natives |
| Deaths . . .            | 230 " " "                    |

The prevalence at Bombay according to months, taking the year as 1200, is as follows:—

|                      |     |                      |     |
|----------------------|-----|----------------------|-----|
| January . . .        | 122 | July . . .           | 135 |
| February . . .       | 113 | August . . .         | 49  |
| March . . .          | 130 | September . . .      | 31  |
| First quarter . . .  | 365 | Third quarter . . .  | 215 |
| April . . .          | 151 | October . . .        | 40  |
| May . . .            | 151 | November . . .       | 50  |
| June . . .           | 143 | December . . .       | 85  |
| Second quarter . . . | 445 | Fourth quarter . . . | 175 |

*Convulsions (Infant).*—In 10,000 deaths there were of this disease as follows:—

| At                   | At                    | At                       |
|----------------------|-----------------------|--------------------------|
| Algiers . . . 790    | Christiania . . . 110 | Mexico . . . 630         |
| Amsterdam . . . 600  | Copenhagen . . . 560  | Paris . . . 667          |
| Athens . . . 266     | Dresden . . . 2,110   | Rio Janeiro . . . 320    |
| Berlin . . . 1,380   | England . . . 440     | St. Petersburg . . . 200 |
| Brussels . . . 450   | Glasgow . . . 300     | Shanghai . . . 150       |
| Buda Pesth . . . 730 | Hamburg . . . 1,070   | Turin . . . 560          |
| Cairo . . . 2,030    | Lisbon . . . 190      | U. States (N.) . . . 320 |
| Canada . . . 180     | London . . . 360      | U. States (S.) . . . 170 |

*Croup.*—In England there are of 10,000 deaths 70 from croup, and in Bavaria 392. In Sweden and Norway 52 per cent. of cases are fatal. The prevalence of the disease according to months (taking the year as 1200) is shown thus:—

| Month          | Sweden | Norway | Month           | Sweden | Norway |
|----------------|--------|--------|-----------------|--------|--------|
| January . . .  | 144    | 141    | July . . .      | 45     | 47     |
| February . . . | 136    | 132    | August . . .    | 48     | 50     |
| March . . .    | 130    | 134    | September . . . | 76     | 89     |
| April . . .    | 110    | 105    | October . . .   | 108    | 103    |
| May . . .      | 88     | 84     | November . . .  | 128    | 125    |
| June . . .     | 64     | 64     | December . . .  | 123    | 126    |

*Cretinism.*—According to a statement published in 1860, the number of cretins was as follows:—

| Country             | Number | Per Million Population |
|---------------------|--------|------------------------|
| Switzerland . . .   | 20,000 | 8,100                  |
| France . . .        | 31,000 | 870                    |
| Italy . . .         | 10,460 | 480                    |
| Germany . . .       | 20,200 | 550                    |
| Austria . . .       | 13,800 | 440                    |
| Ireland . . .       | 4,900  | 740                    |
| Denmark . . .       | 1,990  | 1,470                  |
| United States . . . | 1,200  | 40                     |

*Diabetes.*—Deaths from this disease are seven in 10,000 in the United Kingdom, and 150 at Shanghai. The ratio of sexes among patients is:—

|               | France | England |
|---------------|--------|---------|
| Males . . .   | 74     | 67      |
| Females . . . | 26     | 33      |
|               | 100    | 100     |

The ratio of age and profession are in France as follows:—

| Age            | Males | Females | Profession        | Per Cent. |
|----------------|-------|---------|-------------------|-----------|
| Under 20 . . . | 14.4  | 32.0    | Capitalists . . . | 25        |
| 20-30 . . .    | 24.4  | 26.4    | Lawyers . . .     | 21        |
| 30-40 . . .    | 28.4  | 20.7    | Merchants . . .   | 15        |
| 40-50 . . .    | 18.0  | 9.4     | Clergy . . .      | 8         |
| Over 50 . . .  | 14.8  | 11.5    | Various . . .     | 31        |
| Total . . .    | 100.0 | 100.0   | Total . . .       | 100       |

This disease was in 45 per cent. of cases accompanied by obesity, and in 38 per cent. by rheumatism.

*Diarrhoea.*—In 10,000 deaths there were of this disease:—

| In                 | In                      | In                   |
|--------------------|-------------------------|----------------------|
| London . . . 460   | Ireland . . . 250       | Mexico . . . 950     |
| England . . . 212  | Canada . . . 110        | Hong-Kong . . . 1480 |
| Scotland . . . 210 | United States . . . 880 |                      |

The prevalence of this disease according to months (taking the year as 1200) was as follows:—

| Month           | Sweden | Norway | Bavaria | Belgium |
|-----------------|--------|--------|---------|---------|
| January . . .   | 41     | 98     | 52      | 83      |
| February . . .  | 41     | 89     | 56      | 77      |
| March . . .     | 31     | 72     | 53      | 102     |
| April . . .     | 33     | 61     | 53      | 93      |
| May . . .       | 30     | 65     | 52      | 98      |
| June . . .      | 55     | 60     | 70      | 109     |
| July . . .      | 150    | 113    | 110     | 138     |
| August . . .    | 292    | 190    | 210     | 132     |
| September . . . | 227    | 143    | 238     | 112     |
| October . . .   | 149    | 95     | 160     | 96      |
| November . . .  | 94     | 109    | 89      | 79      |
| December . . .  | 54     | 105    | 57      | 81      |
| Year . . .      | 1200   | 1200   | 1200    | 1200    |

*Digestive Disorders.*—In 10,000 deaths there were of these diseases:—

| In                   | In                | In                |
|----------------------|-------------------|-------------------|
| Brussels . . . 1,500 | Genoa . . . 1,580 | Rome . . . 1,100  |
| Catania . . . 2,900  | Milan . . . 1,300 | Turin . . . 1,550 |
| England . . . 990    | Paris . . . 1,050 |                   |

*Diphtheria*.—In 10,000 deaths there were of this disease :—

| In                | In               | In                   |
|-------------------|------------------|----------------------|
| Amsterdam . . 200 | Dresden . . 130  | Italian cities . 360 |
| Athens . . . 219  | England . . 55   | London . . . 180     |
| Bavaria . . . 248 | Edinburgh . 250  | Munich . . . 240     |
| Berlin . . . 320  | France . . . 360 | New York . . 300     |
| Brussels . . 440  | Frankfort . 130  | Philadelphia . 370   |
| Canada . . . 300  | Glasgow . . 220  | Roumania . . 360     |
| Christiania . 440 | Hamburg . . 320  | St. Petersburg 210   |
| Copenhagen . 160  | Holland . . 130  | United States 480    |

The prevalence of this disease according to months (taking the year as 1200) was in Sweden, Norway, Saxony, and the hospitals of Paris as follows :—

|                 | Sweden | Norway | Saxony | Paris | Death-Rate at Paris |
|-----------------|--------|--------|--------|-------|---------------------|
|                 |        |        |        |       | Per Cent.           |
| January . . .   | 121    | 136    | 135    | 101   | 76                  |
| February . . .  | 119    | 120    | 126    | 104   | 76                  |
| March . . . .   | 99     | 112    | 100    | 116   | 77                  |
| April . . . . . | 93     | 89     | 79     | 106   | 71                  |
| May . . . . .   | 85     | 88     | 75     | 110   | 73                  |
| June . . . . .  | 72     | 79     | 71     | 84    | 65                  |
| July . . . . .  | 69     | 79     | 54     | 75    | 51                  |
| August . . . .  | 77     | 73     | 50     | 90    | 62                  |
| September . .   | 86     | 87     | 91     | 83    | 71                  |
| October . . . . | 112    | 102    | 119    | 103   | 70                  |
| November . . .  | 137    | 118    | 155    | 117   | 75                  |
| December . . .  | 130    | 117    | 145    | 111   | 74                  |
|                 | 1,200  | 1,200  | 1,200  | 1,200 | 72                  |

Deaths in Paris from this disease were as follows :—

| Period        | Deaths Yearly | Per 10,000 Inhabitants |
|---------------|---------------|------------------------|
| 1865-69 . . . | 816           | 43                     |
| 1872-75 . . . | 1,165         | 61                     |
| 1876-80 . . . | 2,020         | 95                     |
| 1881-83 . . . | 2,230         | 99                     |

*Dropsy*.—Of 10,000 deaths there are from this disease in England 94, in Scotland 56, in Ireland 98, in Bavaria 60, and in Belgium 423. Deaths occur in England according to seasons thus :—

|                |       |
|----------------|-------|
| Spring . . . . | 24.0  |
| Summer . . . . | 21.6  |
| Autumn . . . . | 26.4  |
| Winter . . . . | 28.0  |
|                | 100.0 |

*Drink*.—Lombard states that in 10,000 deaths in various countries the ratio for deaths from drink stood thus :—

|                 |    |                  |                   |
|-----------------|----|------------------|-------------------|
| Italy . . . . . | 1  | London . . . 12  | Brussels . . . 40 |
| Genoa . . . . . | 5  | Berlin . . . 13  | Copenhagen . 70   |
| Turin . . . . . | 5  | Bâle . . . . 20  | New York . . 75   |
| Amsterdam . .   | 5  | Breslau . . . 20 | Oldenburg . 87    |
| Munich . . . .  | 6  | Vienna . . . 21  | Kiel . . . . . 90 |
| Dublin . . . .  | 10 | England . . . 21 | Stockholm . 90    |
| Edinburgh . .   | 10 | Berne . . . . 35 |                   |

In nine years ending 1876 the annual deaths from drink in France averaged 448, of which 87 per cent. were men and 13 per cent. women.

Another table on this subject will be found under *Deaths*, p. 180.

*Dysentery*.—In 10,000 deaths there were of this disease :—

| In                 | In                 | In                 |
|--------------------|--------------------|--------------------|
| Ceylon . . . 2,300 | Holland . . 290    | Senegal . . 2,900  |
| England . . . 10   | Italian cities 130 | Valparaiso . 1,060 |
| Gold Coast . 420   | Lima . . . . 610   | United States 160  |
| Guinea . . . 4,130 | Montevideo . 570   | Zanzibar . . 420   |

On the Guinea Coast it attacks 50 per cent. of the garrison yearly, and 8 per cent. of cases prove fatal. At Bombay 9 per cent. of the troops are attacked, and 9 per cent. of cases prove fatal. Annesley gives the percentage of soldiers attacked at various stations thus :—

| Per Cent.        | Per Cent.         | Per Cent.       |
|------------------|-------------------|-----------------|
| North India . 12 | South India . 34  | Hyderabad . 36  |
| Mysore . . . 22  | Middle India . 38 | Madras . . . 47 |

According to Hirsch, there have been in various parts of Europe since 1719 no fewer than 546 epidemics of dysentery, of which 404 were in summer, 113 in autumn, and 29 in other seasons. In Saxony it is found that, supposing 1200 deaths occur in a year from this disease, the months will stand thus :—

|                  |    |                 |     |
|------------------|----|-----------------|-----|
| January . . . .  | 6  | July . . . . .  | 101 |
| February . . . . | 20 | August . . . .  | 367 |
| March . . . . .  | 14 | September . . . | 352 |

|                   |    |                  |     |
|-------------------|----|------------------|-----|
| First quarter . . | 40 | Third quarter .  | 820 |
| April . . . . .   | 13 | October . . . .  | 181 |
| May . . . . .     | 13 | November . . .   | 73  |
| June . . . . .    | 27 | December . . . . | 33  |

Second quarter . 53 Fourth quarter . 287

The ages of soldiers at Mauritius attacked by this disease were :—

| Age             | Cases per 1000 Men |
|-----------------|--------------------|
| 18-24 . . . . . | 6                  |
| 25-33 . . . . . | 11                 |
| 34-40 . . . . . | 19                 |
| 41-50 . . . . . | 36                 |

*Epilepsy*.—The ratio of deaths from this disease among 10,000 deaths is as follows :—

|                  |    |                 |    |
|------------------|----|-----------------|----|
| England . . . .  | 51 | Ireland . . . . | 38 |
| Scotland . . . . | 33 | Norway . . . .  | 13 |

In France the attacks of this disease, taking the year as 1200, occur thus :—

|                  |     |                 |    |
|------------------|-----|-----------------|----|
| January . . . .  | 106 | July . . . . .  | 98 |
| February . . . . | 111 | August . . . .  | 83 |
| March . . . . .  | 103 | September . . . | 87 |

First quarter . 320 Third quarter . 268

|                 |     |                  |     |
|-----------------|-----|------------------|-----|
| April . . . . . | 104 | October . . . .  | 94  |
| May . . . . .   | 107 | November . . .   | 95  |
| June . . . . .  | 112 | December . . . . | 100 |

Second quarter . 323 Fourth quarter . 289

*Erysipelas*.—In 10,000 deaths there were of this disease :—

| <i>In</i>         |    | <i>In</i>        |    |
|-------------------|----|------------------|----|
| Belgium . . . .   | 40 | Ireland . . . .  | 25 |
| Canada . . . . .  | 40 | Italy . . . . .  | 50 |
| Cape Colony . .   | 25 | Malta . . . . .  | 14 |
| England . . . .   | 36 | Mexico . . . .   | 20 |
| France . . . . .  | 48 | Montevideo . .   | 53 |
| Germany . . . .   | 35 | Paris . . . . .  | 70 |
| Gibraltar . . . . | 15 | Scotland . . . . | 50 |
| India . . . . .   | 17 | Switzerland . .  | 40 |

*Fever*.—The predisposition to fever varies with age in the following degrees :—

| Age             | Degree | Age             | Degree |
|-----------------|--------|-----------------|--------|
| Under 5 . . . . | 10     | 25-30 . . . . . | 102    |
| 5-10 . . . . .  | 94     | 30-40 . . . . . | 44     |
| 10-15 . . . . . | 182    | 40-50 . . . . . | 16     |
| 15-20 . . . . . | 269    | 50-55 . . . . . | 6      |
| 20-25 . . . . . | 197    | Over 55 . . . . | 2      |

Napoleon lost 51,000 soldiers by fever in his campaign of 1812, and the French army 17,000 men in the Crimea in 1855.

*Fractures.*—Dr. Gurlt (Berlin, 1863), collected statistics of 17,300 cases; results:—

|                 |             |
|-----------------|-------------|
| Head . . . . .  | 5 per cent. |
| Trunk . . . . . | 14 "        |
| Arms . . . . .  | 48 "        |
| Legs . . . . .  | 33 "        |
|                 | 100 "       |

The total showed 75 per cent. males, 25 per cent. females, the relation of cases according to age with regard to sexes being:—

| Age                | Males | Females |
|--------------------|-------|---------|
| Under 12 . . . . . | 72    | 28      |
| 13-20 . . . . .    | 86    | 14      |
| 21-30 . . . . .    | 91    | 9       |
| 31-40 . . . . .    | 96    | 4       |
| 51-80 . . . . .    | 65    | 35      |

Fractures are more frequent in winter than in summer.

*Goitre.*—This disease as well as cretinism is common in those parts of France and Italy more than 3000 feet over sea-level. There are 420,000 goitrous people in France, and 2 per cent. of conscripts are rejected for this cause. There are 3400 cases in Siberia.

*Gout.*—The ratio of deaths in England from this disease is usually 12 per 10,000; it is eighteen among men and six among women. Of 100 patients in France 94 are usually males, 6 females. The ratio of age at which first symptoms appear is shown thus:—

| Age                |       |
|--------------------|-------|
| Under 20 . . . . . | 2.4   |
| 20-30 . . . . .    | 27.6  |
| 30-40 . . . . .    | 37.6  |
| 40-50 . . . . .    | 23.0  |
| Over 50 . . . . .  | 9.4   |
|                    | 100.0 |

Of 10,000 patients admitted to hospital at Munich, 24 suffered from gout; in the same number 210 at St. George's Hospital, London, and at Paris only one.

*Heart-Disease.*—In 10,000 deaths there were of this disease:—

| In                | In                  | In                   |
|-------------------|---------------------|----------------------|
| Algiers . . . 100 | Germany . . . 230   | Norway . . . 170     |
| Amsterdam . 290   | German cities . 270 | Paris . . . 270      |
| Athens . . . 323  | Holland . . . 180   | Rio Janeiro . 350    |
| Belgium . . . 190 | Hungary . . . 170   | St. Petersburg . 200 |
| Brussels . . 685  | Ireland . . . 510   | Scotland . . . 650   |
| Canada . . . 370  | London . . . 420    | Shanghai . . 1,510   |
| Copenhagen . 320  | Mexico . . . 95     | Switzerland . 350    |
| England . . . 610 | Milan . . . 640     | Turin . . . 490      |
| Edinburgh . 490   | Montevideo . 470    | United States . 350  |
| France . . . 290  |                     |                      |

The ages at which this disease prevails in France are shown by the ratio of deaths thus:—

| Of 1000 Deaths   |                 |                  |
|------------------|-----------------|------------------|
| Age              | Age             | Age              |
| Under 10 . . . 2 | 31-40 . . . 388 | 61-70 . . . 50   |
| 10-20 . . . 10   | 41-50 . . . 254 | Over 70 . . . 28 |
| 21-30 . . . 140  | 51-60 . . . 128 |                  |

*Hepatitis.*—In 10,000 deaths there were of this disease:—

| In                  | In               | In                 |
|---------------------|------------------|--------------------|
| Amsterdam . 81      | Italy . . . 90   | Portugal . . 94    |
| Brussels . . 81     | Malta . . . 250  | St. Helena . 290   |
| Buenos Ayres . 350  | Mexico . . . 380 | Senegal . . . 500  |
| Corfu . . . 150     | Montevideo . 340 | Shanghai . . 740   |
| Frankfort . . 24    | Paris . . . 130  | Swatow . . . 2,500 |
| French cities . 110 |                  |                    |

The ratio of British soldiers on foreign service attacked in twelve months by this disease was as follows:—

| In              | Per 1000 | In              | Per 1000 | In               | Per 1000 |
|-----------------|----------|-----------------|----------|------------------|----------|
| Australia . . 3 |          | Cape . . . 27   |          | Mauritius . . 24 |          |
| Bengal . . . 54 |          | Ceylon . . . 48 |          | N. Zealand . . 6 |          |
| Bombay . . . 37 |          | Hong-Kong . 26  |          | Shanghai . . 14  |          |
| Burmah . . . 61 |          | Madras . . . 73 |          | Yokohama . . 14  |          |

Among Sepoy troops the ratio is only 3, and on the Abyssinian expedition it was 14 per 1000.

*Hernia.*—The number of conscripts per 1000 affected by this disease was in Italy 21, Sardinia 17, Corsica 17, Nice 28, France 33.

*Hydrophobia.*—The annual number of deaths from hydrophobia in one million deaths in various countries from this disease was as follows:—

| Country | Period  | Deaths Yearly, per Million | Country | Period  | Deaths Yearly, per Million |
|---------|---------|----------------------------|---------|---------|----------------------------|
| England | 1853-57 | 25                         | Prussia | 1816-70 | 165                        |
| "       | 1869-88 | 74                         | "       | 1871-73 | 90                         |
| France  | 1851-60 | 24                         | Sweden  | 1786-90 | 282                        |
| "       | 1861-72 | 42                         | "       | 1856-60 | 40                         |
| Bavaria | 1851-56 | 42                         | Belgium | 1856-60 | 32                         |

There has been an increase in France since the dog-tax was imposed in 1860. Tables for ten years in France down to 1872 showed that the disease declared itself in the following ratio of days after the person was bitten:—

| Days               | Per Cent. |
|--------------------|-----------|
| Under 20 . . . . . | 8.7       |
| 20-40 . . . . .    | 31.0      |
| 40-60 . . . . .    | 29.8      |
| 60-90 . . . . .    | 21.7      |
| Over 90 . . . . .  | 8.8       |

Total . . . 100.0

The term of incubation when animals were bitten varied as follows:—

| Days               | Horses | Cows  | Sheep | Dogs  |
|--------------------|--------|-------|-------|-------|
| Under 20 . . . . . | 4.4    | ...   | 16.5  | 16.8  |
| 20-30 . . . . .    | 13.2   | 30.0  | 45.2  | 26.6  |
| 30-40 . . . . .    | 8.8    | 35.0  | 33.0  | 21.7  |
| 40-50 . . . . .    | 26.4   | 25.0  | 3.4   | 14.0  |
| Over 50 . . . . .  | 47.2   | 10.0  | 1.9   | 20.9  |
| Total . . . . .    | 100.0  | 100.0 | 100.0 | 100.0 |

Of 3000 cases collected in thirty years by eleven French physicians the bites were:—

| In               |      |
|------------------|------|
| Spring . . . . . | 27.6 |
| Summer . . . . . | 25.5 |
| Autumn . . . . . | 22.5 |
| Winter . . . . . | 24.4 |

Total . . . 100.0

The average term of incubation was approximately influenced by the age of the person bitten, and also the relative mortality:—

| Age                       | Days of Incubation | Death-Rate   |
|---------------------------|--------------------|--------------|
| Under 10 . . . . .        | 55                 | 36 per cent. |
| 10-20 . . . . .           | 52                 | 39 "         |
| 21-30 . . . . .           | 64                 | 60 "         |
| 31-60 . . . . .           | 60                 | 61 "         |
| Over 60 . . . . .         | 65                 | 70 "         |
| General average . . . . . | 60                 | 47 "         |

The above was for a period of ten years, but tables for 23 years down to 1872 reduced the death-rate in France to 42 per cent of persons bitten by mad dogs, &c., viz. :—

| Bite in           | Number Bitten | Died | Ratio of Deaths | Mean Days of Incubation |
|-------------------|---------------|------|-----------------|-------------------------|
| Hands, arms . . . | 485           | 213  | 44 per cent.    | 74                      |
| Face . . . . .    | 102           | 90   | 88 "            | 48                      |
| Legs . . . . .    | 190           | 40   | 21 "            | 61                      |
| Body . . . . .    | 80            | 12   | 15 "            | ...                     |
| Total . . . . .   | 857           | 355  | 42 "            | ...                     |

Of 717 recorded cases in France in the above period, 655 persons were bitten by a dog, 38 by a wolf, 22 by a cat, 1 by a fox, and 1 by a cow.

Bouley's tables for 1863-68 showed that 31 per cent. of cauterized persons died, and 85 per cent. of non-cauterized. After the disease making its appearance death ensued usually on the third or fourth day, as the following table shows :—

|                               |      |
|-------------------------------|------|
| First or second day . . . . . | 28.1 |
| Third or fourth day . . . . . | 53.7 |
| Over fourth day . . . . .     | 18.2 |

100.0

Under Dr. Pasteur's treatment the following results have been obtained at Paris :—

| Year           | Cases Treated | Died | Recovered |
|----------------|---------------|------|-----------|
| 1887 . . . . . | 306           | 3    | 303       |
| 1888 . . . . . | 385           | 4    | 381       |

The British Government in the above two years sent 85 patients to be treated by Dr. Pasteur, of whom 5 died and 80 recovered.

**Influenza.**—This epidemic is caused by sudden changes of temperature. On January 2, 1872, at St. Petersburg, the thermometer suddenly rose 40 degrees in one night, and 40,000 people were attacked next day. In 1827 it carried off thousands of horses all over Europe. In 1872 it killed 16,000 horses in New York city. In December 1889 it ravaged Europe, attacking over three million persons, but the mortality was probably under 2 per cent. of cases.

The duration of the attack varies with age, the French reports showing thus :—

| Age                | Days | Age                | Days |
|--------------------|------|--------------------|------|
| 20 to 30 . . . . . | 7    | 50 to 60 . . . . . | 12   |
| 30 to 50 . . . . . | 9    | Over 60 . . . . .  | 23   |

**Leprosy.**—The number of lepers in various countries is as follows :—

|                     |         |                            |       |
|---------------------|---------|----------------------------|-------|
| Canton . . . . .    | 10,000  | Norway . . . . .           | 1,770 |
| Crete . . . . .     | 900     | Portugal . . . . .         | 3,000 |
| Greece . . . . .    | 350     | Reunion . . . . .          | 600   |
| Iceland . . . . .   | 13      | Rio Janeiro . . . . .      | 120   |
| India . . . . .     | 131,600 | Sandwich Islands . . . . . | 1,800 |
| Mauritius . . . . . | 3,300   | Sweden . . . . .           | 100   |

The establishment at Molokai, Sandwich Islands, was several years under the charge of Father Damien, who died in 1889. The proportion of sexes in Greece is 64 males to 36 female lepers, and the ages at which the disease makes its first appearance give the following ratios :—

| Age                | Males | Females | General Average |
|--------------------|-------|---------|-----------------|
| Under 10 . . . . . | 10.8  | 2.8     | 8.0             |
| 10-20 . . . . .    | 33.0  | 38.6    | 35.0            |
| 20-30 . . . . .    | 28.0  | 23.0    | 26.0            |
| 30-40 . . . . .    | 20.2  | 27.6    | 23.0            |
| Over 40 . . . . .  | 8.0   | 8.0     | 8.0             |
| Total . . . . .    | 100.0 | 100.0   | 100.0           |

In Russia leprosy is found in sixty-five districts, and the number of fresh victims registered in 1887 was 615. This would lead us to suppose that the existing number of lepers in the empire is about 6000.

Indian statistics for 1881 showed lepers thus :—

|                   |        |                     |        |
|-------------------|--------|---------------------|--------|
| Males . . . . .   | 98,982 | Bengal . . . . .    | 53,880 |
| Females . . . . . | 32,636 | Madras, &c. . . . . | 77,738 |

Total . 131,618

Total . 131,618

Norway has five leper hospitals, containing altogether about 600 patients. The disease is on the decline, viz. :—

| Year           | Lepers | Per 100,000 Inhabitants |
|----------------|--------|-------------------------|
| 1856 . . . . . | 2,612  | 191                     |
| 1875 . . . . . | 1,771  | 98                      |

In Cyprus a leper-farm was established in 1830, one mile from Nicosia : area, 100 acres, tillage 11 acres ; house of 26 rooms occupied by :—

|                  |    |                   |    |
|------------------|----|-------------------|----|
| Greeks . . . . . | 44 | Males . . . . .   | 33 |
| Turks . . . . .  | 2  | Females . . . . . | 13 |

Total . 46

Total . 46

Death-rate, 16 per cent. per annum ; new patients 14 in the year (1879). All very clean. Five married couples ; two have children quite healthy, but rest are childless. All the lepers have lost fingers. One woman of 80 has been there fifty years.

**Measles.**—In 10,000 deaths there were of this disease—in England 184, London 265, Scotland 140, Ireland 110, and Holland 150.

The prevalence of this disease, as shown by the ratio of deaths in the various months, taking the year as 1200, was :—

|                     | London | Saxony |                     | London | Saxony |
|---------------------|--------|--------|---------------------|--------|--------|
| January . . . . .   | 85     | 119    | July . . . . .      | 117    | 94     |
| February . . . . .  | 55     | 112    | August . . . . .    | 108    | 120    |
| March . . . . .     | 74     | 84     | September . . . . . | 96     | 64     |
| April . . . . .     | 80     | 65     | October . . . . .   | 100    | 64     |
| May . . . . .       | 82     | 90     | November . . . . .  | 119    | 119    |
| June . . . . .      | 125    | 93     | December . . . . .  | 159    | 176    |
| Half year . . . . . | 501    | 563    | Half year . . . . . | 699    | 637    |

**Meningitis.**—In 10,000 deaths there were of this disease :—

| In              | In               | In                 |
|-----------------|------------------|--------------------|
| Amsterdam . 370 | Buda-Pesth . 460 | St. Petersburg 500 |
| Belgium . . 280 | France . . . 300 | United States 190  |

Epidemics of this disease have occurred : we have no returns of the number attacked, but the death-rate per 100 patients is recorded thus :—

|                     |                  |                   |
|---------------------|------------------|-------------------|
| Versailles . . . 41 | Sweden and } 33  | Metz . . . . . 70 |
| Naples . . . . 46   | Norway . . . }   | Aigues Mortes 75  |
| Strasbourg . . 51   | Lille . . . . 65 | Rocheport . . 84  |
|                     | Orleans . . . 70 |                   |

The general relative mortality was 63 per cent., most of the above epidemics occurring among garrison troops. Swedish statistics give the following particulars :—

| Age               | Ratio of Cases | Death-Rate   |
|-------------------|----------------|--------------|
| Under 3 . . . . . | 23.0           | 42 per cent. |
| 3-10 . . . . .    | 33.6           | 25 "         |
| 10-20 . . . . .   | 31.2           | 35 "         |
| Over 20 . . . . . | 12.2           | 30 "         |

Total . . . . . 100.0

33 "

**Mumps.**—Lombard gives the ratio of age of cases thus :—

In 1000 Patients

| Age                  | Age                 | Age                  |
|----------------------|---------------------|----------------------|
| Under 5 . . . . . 95 | 10-15 . . . . . 256 | 30-40 . . . . . 108  |
| 5-10 . . . . . 243   | 15-30 . . . . . 230 | Over 40 . . . . . 68 |

The prevalence of cases according to months was as follows, according to Hirsch:—

|                          |     |                          |     |
|--------------------------|-----|--------------------------|-----|
| January . . . . .        | 292 | July . . . . .           | 55  |
| February . . . . .       | 97  | August . . . . .         | 14  |
| March . . . . .          | 124 | September . . . . .      | 27  |
| First quarter . . . . .  | 513 | Third quarter . . . . .  | 96  |
| April . . . . .          | 124 | October . . . . .        | 176 |
| May . . . . .            | 27  | November . . . . .       | 110 |
| June . . . . .           | 70  | December . . . . .       | 84  |
| Second quarter . . . . . | 221 | Fourth quarter . . . . . | 370 |

*Neuralgia*.—The prevalence of this disease according to sex is variously stated, viz. :—

|                   | Anstie | Valleix | Eulenberg | Medium |
|-------------------|--------|---------|-----------|--------|
| Males . . . . .   | 32     | 47      | 28        | 36     |
| Females . . . . . | 68     | 53      | 72        | 64     |
| Total . . . . .   | 100    | 100     | 100       | 100    |

The ratio according to age is stated thus :—

| Age                | Valleix | Eulenberg |
|--------------------|---------|-----------|
| Under 20 . . . . . | 8.1     | 6.0       |
| 20-30 . . . . .    | 22.9    | 19.0      |
| 30-50 . . . . .    | 44.8    | 55.0      |
| Over 50 . . . . .  | 24.2    | 20.0      |
| Total . . . . .    | 100.0   | 100.0     |

*Obesity*.—Of 100 patients, 36 are men and 64 women. The disease is hereditary in 49 per cent. of cases. Remarkable instances of obesity are the following :—

| Name                      | Weight, Lbs. | Age | Residence         |
|---------------------------|--------------|-----|-------------------|
| James Mansfield . . . . . | 476          | 82  | Debden, Monmouth  |
| Mr. Bright . . . . .      | 596          | 29  | Maldon, Essex     |
| Dan. Lambert . . . . .    | 739          | 40  | Stamford, Lincoln |

*Ophthalmia*.—Of 1000 persons in hospitals in Sweden, 48 suffered from this disease.

*Paralysis*.—Of 100 cases of general paralysis 86 are male, 14 female. The ratio of age is thus :—

| Age                | Males | Females |
|--------------------|-------|---------|
| Under 30 . . . . . | 7.1   | ...     |
| 30-40 . . . . .    | 40.8  | 32.0    |
| 41-50 . . . . .    | 33.4  | 50.0    |
| Over 50 . . . . .  | 18.7  | 18.0    |
| Total . . . . .    | 100.0 | 100.0   |

Of 10,000 deaths there are from this disease 260 in England, 280 in Scotland, and 145 in Ireland. Deaths in England according to season :—

|                  |       |
|------------------|-------|
| Spring . . . . . | 24.2  |
| Summer . . . . . | 19.0  |
| Autumn . . . . . | 25.6  |
| Winter . . . . . | 31.2  |
| Total . . . . .  | 100.0 |

The ratio of age in cases of spinal paralysis is as follows :—

|                    |       |
|--------------------|-------|
| Under 16 . . . . . | 9.5   |
| 16-20 . . . . .    | 26.4  |
| 20-25 . . . . .    | 18.0  |
| 25-35 . . . . .    | 26.4  |
| 35-45 . . . . .    | 13.5  |
| Over 45 . . . . .  | 6.2   |
| Total . . . . .    | 100.0 |

In 100 patients 70 were males and 30 females.

*Pellagra*.—The number of cases yearly, per million inhabitants, is 150 at Lodi, 800 at Cremona, 2400 at Bergamo, and 2900 at Brescia. About 1000 persons die of pellagra yearly in Venetia.

In 1879 the sufferers from pellagra were :—

|                           | Number | Per 1000 Inhabitants |
|---------------------------|--------|----------------------|
| Lombardy . . . . .        | 40,800 | 31.7                 |
| Venetia . . . . .         | 29,800 | 30.5                 |
| Emilia . . . . .          | 18,700 | 23.7                 |
| Other provinces . . . . . | 8,600  | ...                  |
| Total . . . . .           | 97,900 | ...                  |

*Peritonitis*.—The ratios of age of patients stand thus :—

| Age                | Per Cent. |
|--------------------|-----------|
| Under 20 . . . . . | 14.0      |
| 20-30 . . . . .    | 26.0      |
| 30-40 . . . . .    | 27.5      |
| Over 40 . . . . .  | 32.5      |
| Total . . . . .    | 100.0     |

*Phthisis*.—In 10,000 deaths there were of this disease as follows :—

|                       |      |                         |      |                          |      |
|-----------------------|------|-------------------------|------|--------------------------|------|
| Alabama . . . . .     | 630  | Flanders . . . . .      | 2600 | Norway . . . . .         | 1288 |
| Alexandria . . . . .  | 250  | Florida . . . . .       | 570  | Nuremberg . . . . .      | 1410 |
| Amsterdam . . . . .   | 870  | France . . . . .        | 1120 | Paris . . . . .          | 1430 |
| Antwerp . . . . .     | 1590 | Frankfort . . . . .     | 1550 | Pennsylvania . . . . .   | 1420 |
| Archangel . . . . .   | 1960 | Geneva . . . . .        | 1250 | Philadelphia . . . . .   | 1320 |
| Athens . . . . .      | 1076 | Glasgow . . . . .       | 1580 | Riga . . . . .           | 300  |
| Augsburg . . . . .    | 1000 | Holland . . . . .       | 950  | Rio Janeiro . . . . .    | 1880 |
| Bavaria . . . . .     | 1010 | Iceland . . . . .       | 5    | Rome . . . . .           | 1140 |
| Belgium . . . . .     | 1825 | Ireland . . . . .       | 1160 | Russia . . . . .         | 1960 |
| Berlin . . . . .      | 990  | Lima . . . . .          | 1770 | St. Petersburg . . . . . | 1510 |
| Bologna . . . . .     | 1340 | Lisbon . . . . .        | 1147 | S. Francisco . . . . .   | 1590 |
| Bordeaux . . . . .    | 1620 | London . . . . .        | 1280 | Santa Cruz . . . . .     | 1400 |
| Brussels . . . . .    | 1750 | Louisiana . . . . .     | 970  | Scotland . . . . .       | 1059 |
| Buda-Pesth . . . . .  | 1545 | Lyons . . . . .         | 1340 | Shanghai . . . . .       | 600  |
| Cairo . . . . .       | 1010 | Maine . . . . .         | 2580 | Stockholm . . . . .      | 1600 |
| California . . . . .  | 1380 | Maryland . . . . .      | 1720 | Sweden . . . . .         | 1340 |
| Canada . . . . .      | 1610 | Massachusetts . . . . . | 2000 | Switzerland . . . . .    | 770  |
| Catania . . . . .     | 450  | Melbourne . . . . .     | 740  | Turin . . . . .          | 830  |
| Christiania . . . . . | 1720 | Mexico . . . . .        | 490  | Ulm . . . . .            | 1130 |
| Copenhagen . . . . .  | 1270 | Milan . . . . .         | 1320 | U. States . . . . .      | 1420 |
| Corfu . . . . .       | 2190 | Missouri . . . . .      | 750  | Vienna . . . . .         | 2080 |
| Drontheim . . . . .   | 1700 | Montevideo . . . . .    | 1270 | Vologda . . . . .        | 2060 |
| England . . . . .     | 1010 | Munich . . . . .        | 1320 | Wisconsin . . . . .      | 1320 |
| Finland . . . . .     | 840  | New York . . . . .      | 1550 | Zeeland . . . . .        | 640  |

Height above sea-level has a marked effect on this disease, as shown by the following death-rates from phthisis in Baden and Switzerland :—

| Feet over Sea             | Per 10,000 Deaths |             |        |
|---------------------------|-------------------|-------------|--------|
|                           | Baden             | Switzerland | Medium |
| Less than 1,600 . . . . . | 1,040             | 860         | 950    |
| 1,600-2,700 . . . . .     | 830               | 730         | 780    |
| 2,700-3,200 . . . . .     | 750               | 390         | 570    |
| Over 3,200 . . . . .      | 860               | 500         | 680    |

Similar results are obtained in the Andes.

Some occupations predispose to phthisis; the following table shows among 100 sick persons of each trade the ratio of those suffering from it :—

| RATIO OF PHTHISIS TO ALL SICKNESS |                   |                            |           |
|-----------------------------------|-------------------|----------------------------|-----------|
| Per Cent.                         | Per Cent.         | Per Cent.                  | Per Cent. |
| Needle-makers 70                  | Hairdressers . 32 | Masons . . . . .           | 13        |
| File-makers . 63                  | Weavers . . . 25  | Millers . . . . .          | 11        |
| Lithographers 48                  | Painters . . . 25 | Brewers . . . . .          | 11        |
| Grinders . . . 40                 | Printers . . . 22 | Tanners . . . . .          | 9         |
| Tobaccoists . 37                  | Shoemakers . 19   | Bakers . . . . .           | 7         |
| Watchmakers 37                    | Glaziers . . . 18 | Butchers . . . . .         | 7         |
| Stonecutters . 36                 | Hatters . . . 16  | Charcoal-burners . . . . . | 2         |
| Glassworkers . 35                 | Carpenters . . 14 | Miners . . . . .           | 1         |

The above table has reference only to the United Kingdom, the deaths from phthisis per million inhabitants showing as follows yearly:—

|                   |         |       |                    |         |       |
|-------------------|---------|-------|--------------------|---------|-------|
| England . . . . . | 1850-59 | 2,730 | Scotland . . . . . | 1876-85 | 2,183 |
| " . . . . .       | 1860-69 | 2,547 | Ireland . . . . .  | 1886    | 2,220 |
| " . . . . .       | 1870-79 | 2,205 | London . . . . .   | 1879    | 2,476 |
| " . . . . .       | 1886    | 1,718 | " . . . . .        | 1886    | 2,010 |

In Scotland the deaths yearly from phthisis average thus:—

|                   | Per Million Persons Living |       |       | Age     | Age Ratio |         |       |
|-------------------|----------------------------|-------|-------|---------|-----------|---------|-------|
|                   | Urban                      | Rural | Total |         | Males     | Females | Total |
| Males . . . . .   | 2,680                      | 1,970 | 2,370 | 0-20    | 16.2      | 16.8    | 16.5  |
| Females . . . . . | 2,850                      | 1,680 | 2,460 | 20-40   | 51.4      | 53.6    | 52.5  |
| Gen. pop. . . . . | 2,760                      | 1,820 | 2,420 | Over 40 | 32.4      | 29.6    | 31.0  |
|                   |                            |       |       | Total   | 100.0     | 100.0   | 100.0 |

During the years 1830-46, the mean mortality from phthisis in the British army on home service amounted to 7.8 per 1000 of strength, the highest mortality being among the Foot Guards, with whom it reached 11.3 per 1000 of strength. In the Equitable Assurance Company at that time, the average mortality between the ages of thirty and forty, from all diseases of the lungs, amounted to 3.4 per 1000. The army mortality from phthisis was, therefore, three times greater than necessary. The mortality of troops from the same cause appeared to be equally great at some foreign stations. Thus at Gibraltar 41 per cent. of the total deaths among the troops were caused by phthisis in the years 1837-46, while in the year 1875 only 23 per cent. of the deaths were due to this cause. At Jamaica the deaths from phthisis in the years 1817-36 amounted to 7.5 per 1000 of strength, while in 1859-66 the mortality from this cause had fallen to 1.4 per 1000 of strength. In Trinidad, lung disease killed on an average 11.5 per 1000 of strength between 1817 and 1836. Among the black troops at Sierra Leone phthisis appears to be the most fatal disorder. In ten years, 1861-70, the deaths were 22.5 per 1000 of strength, and of these phthisis caused one-third. In the twenty years 1817-36, the deaths in Canada from phthisis were 4.2 per 1000 of strength, whereas in 1859-65 they were but 1.6 per 1000. In India the annual ratio of deaths and invalided from phthisis were for the years 1863-70 as follows:—

|                  | Died per 1000 | Invalided per 1000 |
|------------------|---------------|--------------------|
| Pengal . . . . . | 1.7           | 3.2                |
| Bombay . . . . . | 1.4           | 3.4                |
| Madras . . . . . | 1.4           | 4.2                |

Deaths from phthisis in the Royal Navy average 2.6 per 1000 yearly, which is attributed to the foulness of the air.

The deaths and invalided from phthisis in the British army at home in the years 1864-70 were per 1000 men yearly thus:—

|                             | Deaths | Invalided |
|-----------------------------|--------|-----------|
| Household cavalry . . . . . | 3.8    | 8.2       |
| Cavalry of line . . . . .   | 1.4    | 4.0       |
| Foot guards . . . . .       | 2.3    | 9.5       |
| Infantry of line . . . . .  | 2.1    | 5.5       |

Among the causes of phthisis the most potent is overcrowding. At the ill-ventilated Leopoldstadt prison of Vienna in 1843-47 no fewer than 51 per 1000 deaths were from phthisis. At the well-ventilated House of

Correction in the same city, in the years 1850-54, the deaths from phthisis were only 8 per 1000.

Among British garrisons abroad 12 per 1000 in Ceylon are attacked yearly with phthisis, 12 in the Anglo-Indian army, 3 among Sepoys, 6 at Yokohama, and 15 at Hong-Kong. Among hospital patients in Tasmania 7 per cent. suffered from this disease, and in the French hospital at Senegal 8 per cent.

Plague.—Milroy gives a list of 196 of the most destructive plagues since the year 1500, viz:—

|                                  | 1501-1600 | 1601-1700 | 1701-1800 | 1801-1841 |
|----------------------------------|-----------|-----------|-----------|-----------|
| England . . . . .                | 15        | 12        | 0         | 0         |
| France . . . . .                 | 14        | 11        | 1         | 0         |
| Germany . . . . .                | 12        | 19        | 4         | 1         |
| Low Countries . . . . .          | 2         | 14        | 0         | 0         |
| Russia and Scandinavia . . . . . | 2         | 7         | 4         | 2         |
| Italy and Levant . . . . .       | 26        | 15        | 12        | 11        |
| Spain . . . . .                  | 5         | 3         | 3         | 1         |
| Total . . . . .                  | 76        | 81        | 24        | 15        |

The most terrible, however, which is recorded was that commonly known as the Black Death, which came from Persia into Europe in 1346. It was preceded by myriads of locusts, which filled the wells and poisoned the water in the countries east of the Caspian Sea. At Bagdad 500,000 persons died in 90 days; at Cairo the mortality reached 10,000 in 24 hours. In Europe it lasted four years, and was supposed to have carried off 24,000,000 persons, more than 30,000 towns and villages being depopulated. So late as 1350 ships were met at sea with all dead on board. Among the cities which suffered most were:—

|                      |         |                      |         |
|----------------------|---------|----------------------|---------|
| Avignon . . . . .    | 60,000  | Paris . . . . .      | 50,000  |
| Dublin . . . . .     | 14,000  | Parma . . . . .      | 40,000  |
| Florence . . . . .   | 100,000 | Siena . . . . .      | 70,000  |
| Genoa . . . . .      | 40,000  | Strasbourg . . . . . | 26,000  |
| London . . . . .     | 100,000 | Valencia . . . . .   | 100,000 |
| Marseilles . . . . . | 56,000  | Venice . . . . .     | 70,000  |
| Naples . . . . .     | 60,000  | Vienna . . . . .     | 40,000  |
| Norwich . . . . .    | 50,000  |                      |         |

Since the beginning of the seventeenth century the worst plagues have been:—

| Date | Place                    | Deaths  | Weeks | Deaths per Week |
|------|--------------------------|---------|-------|-----------------|
| 1656 | Naples . . . . .         | 380,000 | 28    | 13,400          |
| 1665 | London . . . . .         | 68,800  | 33    | 2,100           |
| 1720 | Marseilles . . . . .     | 39,100  | 36    | 1,100           |
| 1771 | Moscow . . . . .         | 87,800  | 32    | 2,700           |
| 1778 | Constantinople . . . . . | 170,000 | 18    | 9,500           |
| 1798 | Cairo . . . . .          | 88,000  | 25    | 3,500           |
| 1812 | Constantinople . . . . . | 144,000 | 13    | 11,100          |
| 1834 | Cairo . . . . .          | 57,000  | 18    | 3,200           |
| 1835 | Alexandria . . . . .     | 14,900  | 17    | 900             |
| 1871 | Buenos Ayres . . . . .   | 26,300  | 11    | 2,400           |

The relative mortality in certain plagues was as follows:—

| Date | Place                  | Died, per Cent. | Recovered, per Cent. | Authority |
|------|------------------------|-----------------|----------------------|-----------|
| 1798 | Cairo . . . . .        | 67              | 33                   | Genettes  |
| 1798 | Aboukir . . . . .      | 25              | 75                   | M'Grigor  |
| 1813 | Malta . . . . .        | 50              | 50                   | Greaves   |
| 1815 | Corfu . . . . .        | 91              | 9                    | White     |
| 1834 | Cairo . . . . .        | 29              | 71                   | Gaetani   |
| 1835 | Alexandria . . . . .   | 35              | 65                   | Clot Bey  |
| 1871 | Buenos Ayres . . . . . | 40              | 60                   | Bosch     |

**Pneumonia.**—In 10,000 deaths there were of this disease :—

| In              | In               | In               |
|-----------------|------------------|------------------|
| Amsterdam . 570 | Buenos Ayres 400 | Ireland . . 220  |
| Athens . . 856  | Copenhagen . 710 | London . . 530   |
| Bombay . . 26   | Edinburgh . 270  | Paris . . 680    |
| Bordeaux . 400  | England . . 450  | Scotland . 410   |
| Brussels . 430  | Frankfort . 400  | Valparaiso 1,890 |
|                 | Glasgow . . 490  |                  |

**Puerperal Fever.**—In 10,000 deaths there were of this disease :—

| In             | In               | In                |
|----------------|------------------|-------------------|
| Amsterdam . 53 | Copenhagen . 160 | London . . 25     |
| Athens . . 110 | England . . 37   | New York . 56     |
| Austria . . 40 | France . . 100   | St. Petersburg 74 |
| Bâle . . . 90  | Geneva . . 95    | Scotland . 50     |
| Berne . . . 80 | Holland . . 50   | Switzerland . 77  |
| Brussels . 210 | Iceland . . 70   | United States 40  |
| Canada . . 140 | Ireland . . 52   |                   |

At the lying-in hospital of St. Petersburg in 32 years down to 1871 there were 39,200 accouchements, and 1960 mothers died—just 5 per cent. The death-rate per 1000 accouchements according to months was :—

|                 |               |                |
|-----------------|---------------|----------------|
| January . . 54  | May . . . 55  | September . 34 |
| February . . 56 | June . . . 68 | October . . 35 |
| March . . . 60  | July . . . 52 | November . 40  |
| April . . . 59  | August . . 29 | December . 55  |

The quarter ending June showed the highest rate, 61, and that ending September only 38.

In Prussia during 25 years down to 1866 it was found that 33 per 1000 of married women died of puerperal fever. Lefort states that the average in lying-in hospitals in Europe is 34 per 1000, and only 5 per 1000 in women confined at home.

**Rheumatism.**—In 10,000 deaths there were of this disease :—

| In              | In             | In               |
|-----------------|----------------|------------------|
| Bordeaux . . 50 | Germany . . 25 | Paris . . . 29   |
| Canada . . 70   | Glasgow . . 21 | Scotland . 38    |
| Copenhagen 35   | Iceland . . 80 | Switzerland 25   |
| Denmark . 70    | Ireland . . 56 | United States 59 |
| Edinburgh . 23  | Italy . . . 21 | Upsala . . 40    |
| England . . 50  | Lisbon . . 43  | Valparaiso . 44  |
| Frankfort . 46  | London . . 55  |                  |

Of 1000 cases of sickness the ratio of rheumatism is as follows :—

| In              | In             | In                |
|-----------------|----------------|-------------------|
| Algiers . . 12  | Hong-Kong . 30 | New Zealand . 32  |
| Amoy . . . 39   | India . . . 50 | Riga . . . 84     |
| Bombay . . 30   | Lisbon . . 40  | Sandwich Isds. 41 |
| Buda-Pesth . 65 | London . . 60  | Shanghai . . 92   |
| Burmah . . 48   | Lyons . . . 98 | Singapore . . 60  |
| Cape . . . 30   | Madras . . 60  | Sweden . . 77     |
| Corfu . . . 35  | Malaga . . 51  | Switzerland . 30  |
| England . . 100 | Mauritius . 31 | Tahiti . . . 41   |
| Gibraltar . 47  | Melbourne . 77 | Yokohama . 65     |
|                 | Natal . . . 30 |                   |

During the war of 1861-63 in the United States the Federals had 5,825,000 men under colours, and of these 254,700 were sent to hospital for rheumatism, being 44 per 1000. The French army at home has usually 30 rheumatic patients yearly per 1000 men, but in Algeria only 12; the garrison at Rome also averaged 12. In 1873 the deaths from this disease in the French army were 3 per 100,000 men.

In 14 years ending 1874 the ratio of British seamen on home and foreign stations attacked yearly with rheumatism was :—

| Per 1000 Seamen  |                  |                  |
|------------------|------------------|------------------|
| U. Kingdom . 56  | China . . . 84   | Australia . . 89 |
| West Indies . 71 | Mediterranean 85 | Pacific . . . 97 |
| South America 75 | East Indies . 87 | Cape . . . 104   |

The general average for the said period was 84.

The following table shows the distribution of rheumatism according to months, taking the year as 1200 :—

|                 | Cases  |       | Deaths    |          | Deaths to 1000 Cases | Relative Malignancy |
|-----------------|--------|-------|-----------|----------|----------------------|---------------------|
|                 | London | Paris | In France | At Paris |                      |                     |
| January . . .   | 96     | 83    | 107       | 109      | 25                   | 150                 |
| February . . .  | 115    | 92    | 105       | 79       | 12                   | 72                  |
| March . . . .   | 85     | 92    | 105       | 95       | 30                   | 180                 |
| April . . . .   | 114    | 109   | 105       | 102      | 7                    | 40                  |
| May . . . . .   | 90     | 104   | 97        | 103      | 21                   | 128                 |
| June . . . . .  | 118    | 112   | 92        | 94       | 6                    | 37                  |
| July . . . . .  | 102    | 120   | 92        | 121      | 22                   | 130                 |
| August . . . .  | 77     | 102   | 100       | 97       | 15                   | 90                  |
| September . . . | 91     | 92    | 109       | 110      | 23                   | 135                 |
| October . . . . | 115    | 97    | 100       | 107      | 16                   | 94                  |
| November . . .  | 95     | 97    | 95        | 85       | 16                   | 94                  |
| December . . .  | 102    | 100   | 93        | 98       | 8                    | 50                  |
| Year . . . . .  | 1,200  | 1,200 | 1,200     | 1,200    | 17                   | 100                 |

The ratio of age in deaths from rheumatism at Paris (1865-74) was as follows :—

In 1000 Deaths from Rheumatism

| Age              | Age             | Age               |
|------------------|-----------------|-------------------|
| Under 5 . . . 11 | 15-25 . . . 115 | 40-60 . . . 331   |
| 5-15 . . . . 58  | 25-40 . . . 279 | Over 60 . . . 206 |

There were 102 males to 100 female deaths.

**Scarlattina.**—In 10,000 deaths there were of this disease :—

| In              | In              | In                |
|-----------------|-----------------|-------------------|
| Amsterdam . 50  | England . . 350 | Rome . . . 10     |
| Bavaria . . 236 | Germany . . 160 | Switzerland . 430 |
| Berlin . . . 60 | Holland . . 40  | Scotland . . 180  |
| Brussels . 140  | Ireland . . 290 | St. Petersburg 90 |
| Copenhagen 240  | London . . 480  | U. States . . 220 |
|                 | Paris . . . 60  |                   |

The prevalence of this disease in Sweden, Norway, and Saxony, according to months (taking the year as 1200), is shown thus :—

| Month             | Sweden | Norway | Saxony |
|-------------------|--------|--------|--------|
| January . . . .   | 106    | 122    | 116    |
| February . . . .  | 99     | 110    | 102    |
| March . . . . .   | 93     | 103    | 78     |
| April . . . . .   | 95     | 92     | 63     |
| May . . . . .     | 91     | 90     | 59     |
| June . . . . .    | 90     | 85     | 59     |
| July . . . . .    | 81     | 80     | 68     |
| August . . . . .  | 80     | 76     | 84     |
| September . . . . | 91     | 72     | 113    |
| October . . . . . | 118    | 100    | 155    |
| November . . . .  | 136    | 137    | 151    |
| December . . . .  | 120    | 133    | 152    |

**Sciatica.**—Arnoldi gives the age of 1000 patients of this disease :—

|                 |                 |                  |
|-----------------|-----------------|------------------|
| Under 10 . . 36 | 30-40 . . . 218 | 60-70 . . . 115  |
| 10-20 . . . 101 | 40-50 . . . 199 | Over 70 . . . 28 |
| 20-30 . . . 145 | 50-60 . . . 158 |                  |

**Scrophula.**—In 10,000 deaths there were of this disease :—

| In               | In              | In                 |
|------------------|-----------------|--------------------|
| Amsterdam . 140  | England . . 56  | New York . . 83    |
| Berlin . . . 100 | France . . 130  | Norway . . . 80    |
| Bordeaux . . 67  | Glasgow . . 60  | Paris . . . 47     |
| Brussels . . 90  | Ireland . . 110 | Russia . . . 180   |
| Canada . . . 15  | Lisbon . . 110  | St. Petersburg 260 |
| Copenhagen 70    | London . . 60   | Scotland . . 150   |
| Dresden . . 90   | Lyons . . . 60  | Turin . . . 30     |
| Edinburgh . 95   | Munich . . 33   | United States 70   |

In German cities 50 per cent. of foundlings die of scrofula. In Buda-Pesth 2½ per cent. of hospital patients suffer from this disease. In Italy 7 per 1000 of conscripts are rejected for it.

**Scurvy.**—In the British navy the returns were:—

| Period            | Cases Yearly | Per 10,000 Seamen |
|-------------------|--------------|-------------------|
| 1856-65 . . . . . | 28           | 6                 |
| 1866-75 . . . . . | 4            | 1                 |

In the year 1820 the garrison of St. Peters, Iowa, 1000 men, had 500 cases, of whom 168 died. The United States army in 20 years ending 1859 had 26 cases yearly per 1000 men, but only 1 per cent. of the cases proved fatal. The French army in the Crimea had 23,400 cases and 639 deaths, say 3 per cent. In the hospital at Constantinople, 1855-56, there were 25,200 cases and 2916 deaths, or nearly 12 per cent. In the Franco-German war the French prisoners at Ingolstadt had 16 cases per 1000. In Lord Anson's expedition, 1740, the *Centurion* lost 58 per cent. and the *Gloucester* 78 per cent. of her crew from scurvy. Admiral Martin lost 10 per cent. of his men in 1746.

**Small-Pox.**—In 10,000 deaths there were of this disease:—

| In                  | In                 | In                 |
|---------------------|--------------------|--------------------|
| Amsterdam . . 100   | Denmark . . . 70   | Marseilles . . 152 |
| Austria . . . . 250 | England . . . 130  | Paris . . . . . 80 |
| Baltimore . . . 620 | Finland . . . 60   | Rome . . . . . 290 |
| Berlin . . . . . 4  | Germany . . . 8    | St. Petersburg 40  |
| Brussels . . . 150  | Glasgow . . . 8    | Scotland . . . 14  |
| Buda-Pesth . . 140  | Ireland . . . 41   | Sweden . . . 160   |
| Canada . . . . . 55 | Italy . . . . . 60 | Switzerland . 54   |
| Copenhagen . . 70   | London . . . 106   | Vienna . . . . 40  |

The months in which it is most prevalent are shown in the following table, taking the year as 1200:—

| Month              | Sweden | Norway | Bavaria | London |
|--------------------|--------|--------|---------|--------|
| January . . . . .  | 120    | 144    | 120     | 50     |
| February . . . . . | 130    | 161    | 152     | 23     |
| March . . . . .    | 129    | 157    | 162     | 45     |
| April . . . . .    | 156    | 142    | 165     | 38     |
| May . . . . .      | 152    | 172    | 142     | 65     |
| June . . . . .     | 128    | 133    | 110     | 57     |
| July . . . . .     | 91     | 78     | 70      | 68     |
| August . . . . .   | 52     | 46     | 52      | 80     |
| September . . . .  | 41     | 34     | 46      | 93     |
| October . . . . .  | 43     | 27     | 45      | 153    |
| November . . . . . | 68     | 40     | 58      | 225    |
| December . . . . . | 90     | 66     | 78      | 303    |
| Year . . . . .     | 1,200  | 1,200  | 1,200   | 1,200  |

The deaths per million inhabitants in the United Kingdom yearly averaged thus:—

| England   |        | London  |        | Scotland |        | Ireland |        |
|-----------|--------|---------|--------|----------|--------|---------|--------|
| Date      | Deaths | Date    | Deaths | Date     | Deaths | Date    | Deaths |
| ...       | ...    | 1660-80 | 4,170  | ...      | ...    | ...     | ...    |
| 1760-1800 | 3,000  | 1760-90 | 2,260  | ...      | ...    | ...     | ...    |
| 1840-54   | 430    | 1840-60 | 408    | ...      | ...    | 1844    | 403    |
| 1871-73   | 178    | 1871-73 | 1,040  | 1864     | 305    | 1864-74 | 108    |
| 1881      | 100    | 1881    | 640    | 1874-82  | 28     | 1875-82 | 82     |

In the epidemic of 1861 the deaths in England were per million: army, 455; civilians, 928; London, 2420. In that of 1881 the returns showed deaths per million inhabitants as follows:—

|                   | Vaccinated | Unvaccinated | Difference |
|-------------------|------------|--------------|------------|
| London . . . . .  | 90         | 3,350        | 35 to 1    |
| England . . . . . | 98         | 4,380        | 44 to 1    |

Deaths yearly from this disease in various European armies averaged thus:—

|                    | Per 100,000 Men |         |
|--------------------|-----------------|---------|
|                    | 1872-75         | 1876-81 |
| British . . . . .  | 8               | 3       |
| German . . . . .   | 1               | 0       |
| French . . . . .   | 8               | 16      |
| Austrian . . . . . | 99              | 18      |

In Germany the deaths from this disease averaged in 10,000 deaths as follows:—

|                   |     |
|-------------------|-----|
| 1816-70 . . . . . | 101 |
| 1871-74 . . . . . | 555 |
| 1875-82 . . . . . | 8   |

In 1874 a law was passed making re-vaccination compulsory on all persons in Germany over twelve years of age. The ratio in 10,000 deaths for Berlin and London was as follows:—

|                  | 1870-79 | 1880-83 |
|------------------|---------|---------|
| Berlin . . . . . | 324     | 4       |
| London . . . . . | 230     | 106     |

In Austria the ratio per 10,000 deaths showed:—

|                   |     |
|-------------------|-----|
| 1872-76 . . . . . | 560 |
| 1877-81 . . . . . | 250 |

French physicians have instituted a comparison between Paris and Rio Janeiro touching this disease at various seasons and temperatures, viz:—

| Quarter ending     | Mean Temperature, Fahrenheit |             | Ratio of Year's Death |             |
|--------------------|------------------------------|-------------|-----------------------|-------------|
|                    | Paris                        | Rio Janeiro | Paris                 | Rio Janeiro |
| 31st March . . . . | 38                           | 77          | 24.2                  | 12.6        |
| 30th June . . . .  | 50                           | 72          | 22.8                  | 15.6        |
| 30th September . . | 65                           | 70          | 16.5                  | 37.7        |
| 31st December . .  | 52                           | 76          | 36.5                  | 34.1        |
| Year . . . . .     | 51                           | 74          | 100.0                 | 100.0       |

In the hot season at both places the deaths are fewer. The ratio of ages showed thus:—

| Age               | Deaths |             |
|-------------------|--------|-------------|
|                   | Paris  | Rio Janeiro |
| Under 7 . . . . . | 30.3   | 28.4        |
| 7-25 . . . . .    | 19.6   | 34.2        |
| 25-40 . . . . .   | 34.2   | 26.9        |
| Over 40 . . . . . | 15.9   | 10.5        |
|                   | 100.0  | 100.0       |

In 10,000 deaths in London at the following periods those from small-pox were as follows:—

| Period              | Per 10,000 |
|---------------------|------------|
| 1622-1700 . . . . . | 525        |
| 1701-1800 . . . . . | 808        |
| 1801-30 . . . . .   | 480        |
| 1841-60 . . . . .   | 150        |
| 1861-70 . . . . .   | 105        |
| 1871-81 . . . . .   | 202        |

In the epidemic at Leipzig in 1871 the death-rate was 12,700 per million inhabitants, 70 per cent. of whom were unvaccinated. The following table shows the relative mortality as affected by vaccination:—

|                        | Vaccinated,<br>Per Cent. | Unvaccinated,<br>Per Cent. |
|------------------------|--------------------------|----------------------------|
| London . . . . .       | 15                       | 45                         |
| Montreal . . . . .     | 16                       | 54                         |
| Boston . . . . .       | 15                       | 50                         |
| Philadelphia . . . . . | 17                       | 64                         |

During the Franco-German war the Germans lost only 263 men from this disease, the French 23,499, the former having been re-vaccinated in barracks. In the war in Paraguay, the Brazilians lost 43,000 men from malignant or black small-pox, that is, 35 per cent. of their army, nine cases in ten proving fatal.

In ten years ending 1869 the average number of vaccinations in France was 587,000 per annum, leaving 405,000 children born yearly over that number unvaccinated.

The cases of small-pox averaged 18,100 yearly, and deaths 2490, or 14 per cent. Deaths in Paris from small-pox averaged yearly as follows:—

| Period            | Deaths Yearly | Per 10,000<br>Deaths |
|-------------------|---------------|----------------------|
| 1821-30 . . . . . | 585           | 180                  |
| 1831-40 . . . . . | 465           | 160                  |
| 1841-50 . . . . . | 319           | 90                   |
| 1851-60 . . . . . | 426           | 85                   |
| 1861-70 . . . . . | 1,512         | 310                  |
| 1871-80 . . . . . | 695           | 140                  |

In the ratio of sexes, 130 males died of this disease to 100 females. Swedish statistics compare vaccinations and deaths from small-pox as follows:—

| Period            | Vaccinations<br>per 1000 Births | Small-Pox,<br>Deaths Yearly per<br>Million Inhab. |
|-------------------|---------------------------------|---------------------------------------------------|
| 1800-9 . . . . .  | 280                             | 560                                               |
| 1810-19 . . . . . | 520                             | 190                                               |
| 1820-29 . . . . . | 680                             | 132                                               |
| 1830-39 . . . . . | 730                             | 270                                               |
| 1840-49 . . . . . | 720                             | 43                                                |
| 1850-55 . . . . . | 810                             | 160                                               |
| 1861-75 . . . . . | ...                             | 110                                               |

Between 1770 and 1799, when vaccination was not in use, the deaths in Sweden yearly from small-pox averaged 2100 per million inhabitants.

In Norway vaccination is not compulsory, but persons unvaccinated are not allowed to vote at elections. In Austria the number of vaccinations yearly shows:—

| Year           | Vaccinations | Per 1000 Births |                |
|----------------|--------------|-----------------|----------------|
|                |              | Vaccinated      | Not Vaccinated |
| 1882 . . . . . | 675,000      | 810             | 190            |
| 1884 . . . . . | 686,000      | 799             | 201            |
| 1886 . . . . . | 692,000      | 803             | 197            |

In Japan, in 1880, the number of vaccinations was 1,459,000, of which 3 per cent. were unsuccessful.

This disease was known in Ireland in 1241, and in Denmark in 1527.

**Sunstroke.**—In 10,000 deaths in England two are usually from this cause, the annual average of such deaths showing thus:—

|                 | 1863-70 | 1871-78 |
|-----------------|---------|---------|
| Men . . . . .   | 57      | 88      |
| Women . . . . . | 9       | 23      |
| Total . . . . . | 66      | 111     |

This disease is most prevalent at Bassorah in the Persian Gulf, and also in the United States. In 1874 the steamer *Liverpool* in the Persian Gulf lost in one day 3 officers and 21 seamen by sunstroke.

**Syphilis.**—In 10,000 deaths there were of this disease—

| In                 | In                | In                 |
|--------------------|-------------------|--------------------|
| Amsterdam . . 18   | London . . . 68   | Portugal . . . 30  |
| Bordeaux . . . 42  | Louisiana . . 23  | Riga . . . . . 36  |
| Brussels . . . 42  | Lyons . . . . . 9 | St. Petersburg 20  |
| Copenhagen . 34    | Massachusetts 12  | Scotland . . . 17  |
| Edinburgh . . 55   | Milan . . . . . 5 | Shanghai . . . 50  |
| England . . . 40   | New York . . . 40 | Strasbourg . . 14  |
| Genoa . . . . 20   | Norway . . . . 8  | Sweden . . . . 10  |
| Ireland . . . . 20 | Pennsylvania . 9  | Turin . . . . . 30 |

This disease was unknown in Norway till 1710, in Italy till 1786, in Canada till 1790, and in Tasmania till 1821. The percentage of patients in various hospitals found to be suffering from it was:—

| Hospital            | Men,<br>Per Cent. | Women,<br>Per Cent. |
|---------------------|-------------------|---------------------|
| Berlin . . . . .    | 20                | 25                  |
| Vienna . . . . .    | 15                | ...                 |
| Stettin . . . . .   | 10                | 51                  |
| Brunswick . . . . . | 33                | 85                  |

In Holland 10 per cent. of men in hospital, in Strasbourg 38 per cent., in Malaga 18, in Gibraltar 8, in Amoy 43, in Dantzic 10, in Bremen 7 per cent. suffered from syphilis. In Hanover 20, and in Magdeburg 30 per cent. of the women in hospital. The prevalence of this disease in 1000 soldiers was as follows:—

|                     |                     |                     |
|---------------------|---------------------|---------------------|
| Prussia . . . . 54  | France . . . . 102  | Canada . . . . 160  |
| Austria . . . . 63  | Holland . . . . 105 | Bengal . . . . 167  |
| Russia . . . . 65   | Australia . . 110   | Gibraltar . . 187   |
| Italy . . . . . 71  | Mauritius . . 122   | Cape . . . . . 303  |
| Malta . . . . . 81  | Jamaica . . . 123   | Algeria . . . . 309 |
| Belgium . . . . 90  | Spain . . . . . 115 | Java . . . . . 333  |
| Great Britain . 101 | Portugal . . . 135  |                     |

In Paris 23 per cent. of foundlings, and in Moscow and St. Petersburg 25 per cent. are infected with this disease. In French military hospitals 19 per cent. are syphilitic cases, in Belgium 7, in British 29.

**Tetanus.**—The ratio of wounded soldiers who got tetanus in various campaigns was as follows:—

| Date           | Army                            | Per 1000<br>Wounded |
|----------------|---------------------------------|---------------------|
| 1782 . . . . . | British in India                | 25                  |
| 1811 . . . . . | " Spain                         | 13                  |
| 1855 . . . . . | " Crimea                        | 2                   |
| 1798 . . . . . | French in Egypt                 | 35                  |
| 1836 . . . . . | " Algeria                       | 57                  |
| 1855 . . . . . | " Crimea                        | 3                   |
| 1859 . . . . . | " Italy                         | 7                   |
| 1870 . . . . . | " Strasburg                     | 5                   |
| 1864 . . . . . | German in Denmark               | 7                   |
| 1866 . . . . . | Hanoverian at Sadowa            | 12                  |
| 1870 . . . . . | German at Strasburg             | 9                   |
| 1871 . . . . . | " Paris                         | 10                  |
| 1859 . . . . . | Spanish in Morocco              | 18                  |
| 1862 . . . . . | War of United States, Northerns | 2                   |

Death-rate in cases of tetanus is stated thus:—

| Date              | Per Cent. | Observer                  |
|-------------------|-----------|---------------------------|
| 1793 . . . . .    | 100       | Heurteloup                |
| 1834 . . . . .    | 96        | Curling                   |
| 1825-50 . . . . . | 86        | Guy's Hospital            |
| 1855 . . . . .    | 91        | English in Crimea         |
| 1859 . . . . .    | 92        | French in Italy           |
| 1861-63 . . . . . | 90        | Federals in United States |
| 1870 . . . . .    | 70        | Glasgow Hospital          |
| 1877 . . . . .    | 85        | Richter                   |

In the American War, 1863, the rate was 87 per cent. when the wound was in the arm, 90 in the leg, 91 in the body, and 95 in the head or neck.

The *Lancet* (1870) gives the following ratio of mortality as to the number of days elapsing before tetanus pronounced itself:—

| Days            | Ratio of Cases | Death-Rate | Recovered |
|-----------------|----------------|------------|-----------|
|                 |                | Per Cent.  | Per Cent. |
| Before 10 . . . | 47.5           | 78         | 22        |
| 10 to 22 . . .  | 45.0           | 52         | 48        |
| Over 22 . . .   | 7.5            | 48         | 52        |

*Typhoid Fever.*—In 10,000 deaths there were of typhoid fever:—

| In                | In              | In                |
|-------------------|-----------------|-------------------|
| Algiers . . 340   | England . . 210 | Naples . . 300    |
| Amsterdam . 460   | France . . 720  | New York . 350    |
| Antwerp . . 290   | Frankfort . 420 | Norway . . 990    |
| Astrakan . . 870  | Geneva . . 350  | Palermo . . 890   |
| Athens . . 475    | Germany . 450   | Paris . . 680     |
| Belgium . . 460   | Glasgow . 810   | Rome . . 230      |
| Berlin . . 320    | Ireland . . 210 | Russia . . 480    |
| Brussels . . 220  | Italy . . 290   | Scotland . 235    |
| Catania . . 840   | Liege . . 270   | Strasbourg . 230  |
| Christiania . 630 | London . . 240  | Sweden . . 203    |
| Copenhagen . 700  | Lubeck . . 370  | Turin . . 460     |
| Danmark . . 400   | Lyons . . 270   | Vienna . . 560    |
| Edinburgh . 460   | Milan . . 320   | United States 450 |
|                   | Munich . . 450  |                   |

In Paris hospitals 21 per cent. of typhoid cases prove fatal. In St. Petersburg of 10,000 males between 15 and 20 years of age 38 die yearly of typhoid, and of women of the same age 17.

Wolfshugal states the yearly deaths from typhoid per 100,000 inhabitants as follows:—

|                  |                 |                 |
|------------------|-----------------|-----------------|
| Amsterdam . 39   | Hamburg . . 54  | New York . . 35 |
| Berlin . . . 96  | Leipzig . . 300 | Paris . . . 50  |
| Birmingham . 54  | Lille . . . 40  | Pesth . . . 96  |
| Bristol . . . 5  | Liverpool . 92  | Rome . . . 91   |
| Christiania . 7  | London . . 37   | Rotterdam . 17  |
| Dublin . . . 79  | Manchester . 58 | Strasbourg . 33 |
| Frankfort . . 42 | Metz . . . 48   | Turin . . . 143 |
| Genoa . . . 63   | Milan . . . 95  | Venice . . . 70 |
| Hague . . . 38   | Munich . . 118  | Vienna . . . 59 |
|                  | Naples . . 128  |                 |

The ratio of sickness shows 22 typhoid patients in 1000 sick at Bremen, 30 at Stuttgart, 31 at Hamburg and Munich, 34 at Breslau, and 54 at Vienna, during ten years ending 1855.

Deaths from typhoid in the French army average 18 per 10,000 yearly, in the Bavarian 28, and in the garrison of Munich 84. The rate of deaths yearly from this disease in the French army, according to years of military service, was thus:—

| Years of Service | Deaths per 10,000 Men | Years of Service | Deaths per 10,000 Men |
|------------------|-----------------------|------------------|-----------------------|
| 1st . . . . .    | 44                    | 6-7 . . . . .    | 12                    |
| 2-3 . . . . .    | 42                    | 8-9 . . . . .    | 5                     |
| 4-5 . . . . .    | 19                    | 10 or over . . . | 4                     |

Deaths from typhoid and other fevers, according to months, taking the year as 1200, occurred thus:—

|                 | Typhoid |         |        |             |        |         | Other Fevers |           | London | Ague    |
|-----------------|---------|---------|--------|-------------|--------|---------|--------------|-----------|--------|---------|
|                 | London  | Holland | Saxony | Switzerland | Norway | Belgium | W. Africa    | Mauritius | Typhus | Algeria |
| January . . .   | 87      | 60      | 102    | 106         | 150    | 62      | 118          | 20        | 135    | 119     |
| February . . .  | 62      | 30      | 95     | 83          | 103    | 95      | 129          | 65        | 108    | 78      |
| March . . . .   | 58      | 54      | 87     | 73          | 64     | 106     | 98           | 208       | 129    | 77      |
| April . . . .   | 41      | 55      | 81     | 67          | 43     | 99      | 105          | 340       | 133    | 50      |

| July . . . . .  | 97      | 36      | 92     | 98          | 57     | 69      | 102          | 71        | 92     | 101     |
| August . . . .  | 150     | 78      | 121    | 107         | 95     | 128     | 85           | 34        | 81     | 121     |
| September . .   | 171     | 158     | 131    | 131         | 117    | 128     | 83           | 25        | 68     | 126     |
| October . . . . | 165     | 240     | 126    | 126         | 116    | 167     | 78           | 15        | 72     | 152     |
| November . . .  | 151     | 240     | 105    | 130         | 209    | 113     | 84           | 16        | 71     | 146     |
| December . . .  | 100     | 140     | 101    | 102         | 176    | 99      | 101          | 20        | 68     | 128     |
| Year . . . . .  | 1,200   | 1,200   | 1,200  | 1,200       | 1,200  | 1,200   | 1,200        | 1,200     | 1,200  | 1,200   |

*Typhus.*—In 10,000 deaths there were of this disease in England 30, Scotland 47, Holland 21, Amsterdam 23. The rate of mortality among persons attacked is 20 per cent. in England. An epidemic of typhus occurred in Ireland in 1817-19, when 800,000 persons were attacked, of whom 45,000 died; a second was in 1847, caused by famine, and was still more fatal. Emigrants conveyed it to Quebec, where 8600 sick were at one time under treatment in 1847. The hospitals of Russia had 57,000 typhus patients in 1857. Deaths from typhus in Vienna averaged 734 per annum in the years 1865-71, but since the sanitary improvements of 1872 the average has been only 291 per annum.

*Whooping-Cough.*—In 10,000 deaths there were of this disease:—

| In                | In              | In               |
|-------------------|-----------------|------------------|
| Belgium . . 280   | Edinburgh . 360 | London . . 370   |
| Brussels . . 70   | England . . 250 | Norway . . 190   |
| Christiania . 100 | Glasgow . . 610 | Scotland . . 220 |
| Copenhagen . 160  | Holland . . 180 | Sweden . . 190   |
| Danmark . . 160   | Ireland . . 250 | U. States . 148  |
|                   | Italy . . . 50  |                  |

Of 100 cases in Belgium 64 occur under twelve months, 32 between that age and five years, and four over the age of five years.

*Yellow Fever.*—It made its first appearance at Rio Janeiro in December 1849. The official record of deaths from 1851 to 1860 averaged 910 per annum, and in 1870-74 they were 1245 per annum. This is supposed to represent one-fourth of the real number. An outbreak occurred at Buenos Ayres in January 1871, which carried off 26,200 persons, or nearly 10 per cent. of the population.

At Vera Cruz the deaths from this disease, according to months, taking the year as 1200, stand thus:—

|                  |     |                  |     |
|------------------|-----|------------------|-----|
| January . . .    | 26  | July . . . . .   | 125 |
| February . . .   | 42  | August . . . .   | 109 |
| March . . . .    | 90  | September . . .  | 109 |
| First quarter .  | 158 | Third quarter .  | 343 |
| April . . . . .  | 125 | October . . . .  | 34  |
| May . . . . .    | 195 | November . . .   | 42  |
| June . . . . .   | 212 | December . . . . | 41  |
| Second quarter . | 532 | Fourth quarter . | 107 |

At Rio Janeiro, where the seasons are reversed, the distribution is:—

|                          |     |                          |     |
|--------------------------|-----|--------------------------|-----|
| January . . . . .        | 112 | July . . . . .           | 52  |
| February . . . . .       | 140 | August . . . . .         | 36  |
| March . . . . .          | 214 | September . . . . .      | 24  |
| First quarter . . . . .  | 466 | Third quarter . . . . .  | 112 |
| April . . . . .          | 243 | October . . . . .        | 23  |
| May . . . . .            | 171 | November . . . . .       | 26  |
| June . . . . .           | 110 | December . . . . .       | 49  |
| Second quarter . . . . . | 524 | Fourth quarter . . . . . | 98  |

#### ENGLAND AND WALES

The following table shows the deaths from various diseases in England and Wales since 1861:—

|                          | Deaths Yearly per Million Inhabitants |         |         |        | Ratio in 10,000 Deaths in 1886 |
|--------------------------|---------------------------------------|---------|---------|--------|--------------------------------|
|                          | 1861-70                               | 1871-80 | 1881-85 | 1886   |                                |
| Cancer . . . . .         | 386                                   | 455     | 545     | 583    | 302                            |
| Cholera . . . . .        | 107                                   | 25      | 16      | 19     | 10                             |
| Convulsions . . . . .    | 1,231                                 | 1,041   | 844     | 821    | 426                            |
| Croup . . . . .          | 248                                   | 169     | 162     | 132    | 69                             |
| Diabetes . . . . .       | 30                                    | 38      | 51      | 59     | 30                             |
| Diarrhoea . . . . .      | 968                                   | 916     | 652     | 888    | 461                            |
| Diphtheria . . . . .     | 188                                   | 121     | 156     | 147    | 76                             |
| Erysipelas . . . . .     | 85                                    | 93      | 83      | 55     | 28                             |
| Intemperance . . . . .   | 38                                    | 40      | 48      | 49     | 26                             |
| Liver . . . . .          | 417                                   | 425     | 370     | 335    | 175                            |
| Measles . . . . .        | 443                                   | 379     | 410     | 431    | 224                            |
| Nervous system . . . . . | 1,575                                 | 1,760   | 1,800   | 1,835  | 955                            |
| Old age . . . . .        | 1,315                                 | 1,140   | 1,009   | 1,021  | 530                            |
| Phthisis . . . . .       | 2,487                                 | 2,130   | 1,820   | 1,718  | 891                            |
| Puerperal . . . . .      | 56                                    | 74      | 92      | 75     | 39                             |
| Respiratory . . . . .    | 3,357                                 | 3,742   | 3,580   | 3,595  | 1,870                          |
| Rheumatism . . . . .     | 112                                   | 133     | 132     | 91     | 47                             |
| Scarlatina . . . . .     | 971                                   | 720     | 434     | 215    | 112                            |
| Small-pox . . . . .      | 156                                   | 244     | 78      | 10     | 5                              |
| Typhoid . . . . .        | 885                                   | 485     | 272     | 213    | 111                            |
| Venerae . . . . .        | 84                                    | 94      | 93      | 91     | 47                             |
| Violent . . . . .        | 771                                   | 735     | 663     | 626    | 324                            |
| Whoop-cough . . . . .    | 530                                   | 513     | 457     | 464    | 241                            |
| Various . . . . .        | 6,063                                 | 5,906   | 5,533   | 5,805  | 3,001                          |
| Total . . . . .          | 22,503                                | 21,378  | 19,300  | 19,278 | 10,000                         |

The returns may be summed up thus:—

| Disease                  | Deaths per Million Inhabitants |         |         |        | No. of Deaths in 1886 |
|--------------------------|--------------------------------|---------|---------|--------|-----------------------|
|                          | 1871-80                        | 1881-82 | 1883-85 | 1886   |                       |
| Zymotic . . . . .        | 3,724                          | 2,874   | 2,747   | 2,648  | 73,747                |
| Constitutional . . . . . | 3,594                          | 3,627   | 3,362   | 3,330  | 92,751                |
| Local . . . . .          | 9,920                          | 9,470   | 9,780   | 9,915  | 276,302               |
| Various . . . . .        | 3,404                          | 2,566   | 2,814   | 2,759  | 77,032                |
| Violent . . . . .        | 736                            | 683     | 650     | 626    | 17,444                |
| Total . . . . .          | 21,378                         | 19,220  | 19,353  | 19,278 | 537,276               |

The bills of mortality in London show as follows:—

|                          | Deaths per Million Inhabitants |       |       |
|--------------------------|--------------------------------|-------|-------|
|                          | 1889                           | 1889  | 1879  |
| Bronchitis . . . . .     | 2,310                          | 2,995 | 3,622 |
| Phthisis . . . . .       | 2,850                          | 2,756 | 2,476 |
| Diarrhoea . . . . .      | 1,210                          | 1,061 | 495   |
| Fever . . . . .          | 657                            | 558   | 249   |
| Measles . . . . .        | 488                            | 455   | 670   |
| Scarlatina . . . . .     | 1,280                          | 1,325 | 719   |
| Small-pox . . . . .      | 425                            | 86    | 122   |
| Violent deaths . . . . . | 752                            | 747   | 774   |
| Whooping-cough . . . . . | 639                            | 1,178 | 792   |
| Total . . . . .          | ...                            | ...   | ...   |

Dr. Farr stated that if zymotic or preventable diseases were unknown in England the span of life would be six years longer. There is some improvement in this direction, as shown by zymotic deaths since 1838, viz:—

| Period            | Annual Average | Per Cent. of Deaths |
|-------------------|----------------|---------------------|
| 1838-40 . . . . . | 61,807         | 17.7                |
| 1848-50 . . . . . | 88,924         | 22.1                |
| 1858-60 . . . . . | 79,930         | 17.6                |
| 1867-68 . . . . . | 87,114         | 18.2                |
| 1871-80 . . . . . | 90,620         | 17.4                |
| 1881-85 . . . . . | 75,040         | 14.5                |
| 1886 . . . . .    | 73,747         | 13.7                |

The following table shows the ratio of deaths in 1886 according to sex:—

|                            | Per Million Inhabitants |        |        | In 10,000 Deaths |
|----------------------------|-------------------------|--------|--------|------------------|
|                            | Male                    | Female | Total  |                  |
| Apoplexy . . . . .         | 561                     | 592    | 577    | 300              |
| Asthma . . . . .           | 106                     | 70     | 87     | 45               |

| Erysipelas . . . . .     | 127              | 105     | 232    | 29                     | 23      | 26     |
| Puerperal . . . . .      | ...              | 332     | 332    | ...                    | 75      | 38     |
| Rheumatism . . . . .     | 216              | 282     | 498    | 50                     | 64      | 57     |
| Apoplexy . . . . .       | 607              | 521     | 1,128  | 140                    | 120     | 130    |
| Croup . . . . .          | 410              | 352     | 762    | 95                     | 80      | 88     |
| Various . . . . .        | 17,295           | 15,536  | 32,831 | 3,980                  | 3,553   | 3,763  |
| Total . . . . .          | 43,493           | 43,799  | 87,292 | 10,000                 | 10,000  | 10,000 |

Deaths from violence were 1860, say 207 per 10,000 deaths, or 380 per million of population.

The average of deaths yearly from zymotic diseases for ten years, 1877-86, was as follows :—

## Per 100,000 Inhabitants

|                            |                                |                           |
|----------------------------|--------------------------------|---------------------------|
| Small-pox . . . . . 223    | Diphtheria . . . . . 315       | Erysipelas . . . . . 265  |
| Measles . . . . . 1,055    | Whooping-cough . . . . . 1,360 | Influenza . . . . . 58    |
| Scarlatina . . . . . 1,404 | Fever . . . . . 2,374          | Diarrhoea . . . . . 1,754 |

## FRANCE

In 10,000 deaths in France the following ratios occur :—

|                         |                          |                          |
|-------------------------|--------------------------|--------------------------|
| Erysipelas . . . . . 48 | Heart . . . . . 290      | Apoplexy . . . . . 400   |
| Puerperal . . . . . 100 | Meningitis . . . . . 300 | Typhoid . . . . . 720    |
| Scrofula . . . . . 130  | Diphtheria . . . . . 360 | Phthisis . . . . . 1,120 |

The returns of Paris hospitals in 1882 showed as follows :—

|                                   | Adults        |              | Children     |              | Death-Rate per Cent. |             |
|-----------------------------------|---------------|--------------|--------------|--------------|----------------------|-------------|
|                                   | Admitted      | Died         | Admitted     | Died         | Adults               | Children    |
| Bronchitis . . . . .              | 5,070         | 273          | 497          | 53           | 5.4                  | 10.6        |
| Croup . . . . .                   | 55            | 25           | 1,207        | 821          | 45.0                 | 68.0        |
| Diarrhoea and dysentery . . . . . | 494           | 49           | 541          | 212          | 10.0                 | 40.0        |
| Erysipelas . . . . .              | 1,175         | 109          | 76           | 32           | 9.1                  | 42.0        |
| Fractures, &c. . . . .            | 6,753         | 286          | 240          | 1            | 4.3                  | 0.4         |
| Heart disease . . . . .           | 2,116         | 659          | 31           | 11           | 31.0                 | 35.0        |
| Measles . . . . .                 | 261           | 3            | 404          | 111          | 1.1                  | 27.5        |
| Paralysis . . . . .               | 421           | 42           | ...          | ...          | 10.0                 | ...         |
| Phthisis . . . . .                | 6,348         | 3,477        | 163          | 116          | 55.0                 | 71.0        |
| Pleurisy . . . . .                | 1,407         | 176          | 85           | 6            | 12.6                 | 7.0         |
| Pneumonia . . . . .               | 2,211         | 722          | 322          | 151          | 33.0                 | 47.0        |
| Rheumatism . . . . .              | 4,416         | 39           | 67           | 1            | 0.9                  | 1.5         |
| Scarlatina . . . . .              | 477           | 29           | 258          | 31           | 6.2                  | 12.0        |
| Small-pox . . . . .               | 1,985         | 395          | 204          | 50           | 19.9                 | 24.5        |
| Syphilis . . . . .                | 3,861         | 18           | 115          | 26           | 0.5                  | 22.5        |
| Typhoid . . . . .                 | 3,616         | 823          | 470          | 83           | 22.8                 | 17.5        |
| Various . . . . .                 | 33,944        | 2,212        | 3,174        | 292          | 6.5                  | 9.1         |
| <b>Total . . . . .</b>            | <b>74,610</b> | <b>9,337</b> | <b>7,854</b> | <b>1,997</b> | <b>12.5</b>          | <b>25.5</b> |

In 10,000 deaths the various diseases stood thus :—

|                             |                          |                         |
|-----------------------------|--------------------------|-------------------------|
| Bronchitis . . . . . 292    | Measles . . . . . 103    | Rheumatism . . . . . 36 |
| Croup . . . . . 760         | Paralysis . . . . . 38   | Scarlatina . . . . . 54 |
| Diarrhoea . . . . . 235     | Phthisis . . . . . 3,233 | Small-pox . . . . . 401 |
| Erysipelas . . . . . 126    | Pleurisy . . . . . 164   | Syphilis . . . . . 40   |
| Fractures . . . . . 258     | Pneumonia . . . . . 786  | Typhoid . . . . . 815   |
| Heart disease . . . . . 603 |                          |                         |

In 10,000 cases of sickness they stood thus :—

|                             |                         |                          |
|-----------------------------|-------------------------|--------------------------|
| Bronchitis . . . . . 682    | Measles . . . . . 81    | Rheumatism . . . . . 550 |
| Croup . . . . . 155         | Paralysis . . . . . 51  | Scarlatina . . . . . 90  |
| Diarrhoea . . . . . 127     | Phthisis . . . . . 798  | Small-pox . . . . . 268  |
| Erysipelas . . . . . 153    | Pleurisy . . . . . 182  | Syphilis . . . . . 487   |
| Fractures . . . . . 857     | Pneumonia . . . . . 310 | Typhoid . . . . . 500    |
| Heart disease . . . . . 264 |                         |                          |

Of 10,000 deaths in the city of Paris in 1883 the ratios were :—

|                                | Male          | Female        | Total         |
|--------------------------------|---------------|---------------|---------------|
| Scarlatina . . . . .           | 15            | 20            | 17            |
| Small-pox . . . . .            | 78            | 86            | 81            |
| Whooping-cough . . . . .       | 97            | 146           | 115           |
| Measles . . . . .              | 170           | 212           | 185           |
| Bronchitis . . . . .           | 310           | 320           | 314           |
| Diphtheria and croup . . . . . | 330           | 370           | 345           |
| Typhoid . . . . .              | 368           | 366           | 367           |
| Violent . . . . .              | 435           | 147           | 301           |
| Pneumonia . . . . .            | 710           | 750           | 725           |

| Sundry . . . . .               | 5,377         | 5,874         | 5,660         |
| <b>Total . . . . .</b>         | <b>10,000</b> | <b>10,000</b> | <b>10,000</b> |

The reports of reformatories for 1880 showed the ratio of inmates who were sick during the year as follows :—

| Complaint                     | Per 1000   |            |                 | Deaths per 100 Cases |
|-------------------------------|------------|------------|-----------------|----------------------|
|                               | Boys       | Girls      | General Average |                      |
| Digestive disorders . . . . . | 73         | 65         | 71              | 3                    |
| Phthisis . . . . .            | 12         | 26         | 15              | 40                   |
| Scrofula . . . . .            | 11         | 84         | 25              | 3                    |
| Typhoid . . . . .             | 6          | 4          | 5               | 33                   |
| Various . . . . .             | 220        | 48         | 190             | 3                    |
| <b>Total . . . . .</b>        | <b>322</b> | <b>227</b> | <b>306</b>      | <b>5</b>             |

The death-rate at various seasons of pulmonary patients in the Paris hospitals was as follows :—

| Quarter Ending        | Per 100 Patients |            |             |           |           |
|-----------------------|------------------|------------|-------------|-----------|-----------|
|                       | Phthisis         | Pneu-monia | Bron-chitis | Pleurisy  | Average   |
| March . . . . .       | 55               | 40         | 6           | 16        | 29        |
| June . . . . .        | 53               | 27         | 4           | 13        | 29        |
| September . . . . .   | 50               | 25         | 2           | 9         | 22        |
| December . . . . .    | 56               | 39         | 6           | 13        | 33        |
| <b>Year . . . . .</b> | <b>54</b>        | <b>32</b>  | <b>5</b>    | <b>13</b> | <b>30</b> |

The ratio of age in the Paris hospitals in cases of certain diseases was in 1861-64 as follows :—

| Age                | Typhoid | Apoplexy | Aneurism | Cataract |
|--------------------|---------|----------|----------|----------|
| Under 20 . . . . . | 24.5    | 5.2      | 1.2      | 6.0      |
| 20-30 . . . . .    | 54.2    | 6.2      | 14.0     | 3.6      |
| 30-40 . . . . .    | 14.8    | 11.0     | 38.8     | 3.6      |
| Over 40 . . . . .  | 6.5     | 77.6     | 46.0     | 86.8     |
|                    | 100.0   | 100.0    | 100.0    | 100.0    |

The convict settlement of Cayenne, French Guiana, in 1876-81 gave the following averages :—

|                               | Sick per 1000 Convicts | Deaths in 100 Sick |
|-------------------------------|------------------------|--------------------|
| Phthisis . . . . .            | 14                     | 22                 |
| Enteric fever . . . . .       | 170                    | 4                  |
| Anæmia . . . . .              | 180                    | 10                 |
| Digestive disorders . . . . . | 35                     | 15                 |
| Various . . . . .             | 681                    | 4                  |
| <b>Total . . . . .</b>        | <b>1,080</b>           | <b>6</b>           |

The French garrison at Senegal in 22 years ending 1873 gave the following returns :—

|                                 | Per 1000 Men        |           | Relative Mortality |
|---------------------------------|---------------------|-----------|--------------------|
|                                 | Hospital Admissions | Deaths    |                    |
| Fever . . . . .                 | 920                 | 25        | 2.7                |
| Dysentery and cholera . . . . . | 301                 | 22        | 7.3                |
| Syphilis . . . . .              | 119                 | ...       | ...                |
| Sundry . . . . .                | 479                 | 30        | 6.3                |
| <b>Total . . . . .</b>          | <b>1,819</b>        | <b>77</b> | <b>4.2</b>         |

The death-rate of the French army in the years 1872-77 showed thus:—

|                        | Of 1000 Deaths | Deaths per 10,000 Men |
|------------------------|----------------|-----------------------|
| Typhoid . . . . .      | 307            | 33                    |
| Phthisis . . . . .     | 290            | 31                    |
| Diarrhoea, &c. . . . . | 76             | 8                     |
| Suicide . . . . .      | 33             | 4                     |
| Various . . . . .      | 294            | 31                    |
| Total . . . . .        | 1,000          | 107                   |

The average number invalided yearly was 50 officers per 10,000, and 220 men in the same number, being over double the death-rate.

The military hospital report in 1865 showed among 1000 sick the following ratios:—

|                     |    |                        |     |                    |     |
|---------------------|----|------------------------|-----|--------------------|-----|
| Phthisis . . . . .  | 18 | Rheumatism . . . . .   | 40  | Fever . . . . .    | 131 |
| Small-pox . . . . . | 20 | Dysentery, &c. . . . . | 76  | Syphilis . . . . . | 137 |
| Pneumonia . . . . . | 31 | Bronchitis . . . . .   | 115 | Various . . . . .  | 432 |

The expeditionary troops in Tonquin showed deaths, excluding those killed or wounded in war, made up of the following ratios:—

|                     |       |                  |       |
|---------------------|-------|------------------|-------|
| Phthisis . . . . .  | 3.8   | Spring . . . . . | 20.7  |
| Diarrhoea . . . . . | 4.8   | Summer . . . . . | 42.1  |
| Dysentery . . . . . | 30.2  | Autumn . . . . . | 23.9  |
| Fever . . . . .     | 45.6  | Winter . . . . . | 13.3  |
| Sundry . . . . .    | 15.6  |                  |       |
| Total . . . . .     | 100.0 | Total . . . . .  | 100.0 |

## GERMANY

The following table of mortality includes the whole urban population of the Empire, that is, of all towns over 15,000 population:—

|                                | Number of Deaths |           |           | Ratio  |         |        |
|--------------------------------|------------------|-----------|-----------|--------|---------|--------|
|                                | 1877             | 1877-86   | 1886      | 1877   | 1877-86 | 1886   |
| Small-pox . . . . .            | 42               | 101       | 49        | 2      | 5       | 2      |
| Measles . . . . .              | 2,179            | 2,670     | 3,981     | 111    | 121     | 155    |
| Scarlatina . . . . .           | 4,452            | 4,052     | 3,187     | 227    | 184     | 124    |
| Diphtheria and croup . . . . . | 7,523            | 9,360     | 12,208    | 384    | 426     | 475    |
| Typhoid . . . . .              | 7,325            | 3,020     | 2,589     | 170    | 142     | 101    |
| Puerperal . . . . .            | 1,115            | 1,067     | 998       | 57     | 48      | 39     |
| Phthisis . . . . .             | 27,027           | 29,370    | 32,981    | 1,378  | 1,344   | 1,283  |
| Respiratory . . . . .          | 18,710           | 22,820    | 26,984    | 954    | 1,040   | 1,049  |
| Enteritis . . . . .            | 9,985            | 11,430    | 11,979    | 509    | 520     | 466    |
| Diarrhoea . . . . .            | 8,259            | 10,210    | 17,197    | 421    | 460     | 669    |
| Various . . . . .              | 113,409          | 125,100   | 144,977   | 5,787  | 5,710   | 5,637  |
| Total . . . . .                | 196,026          | 219,200   | 257,130   | 10,000 | 10,000  | 10,000 |
| Population . . . . .           | 7,260,000        | 8,370,000 | 9,820,000 | ...    | ...     | ...    |

The urban death-rate of the Empire was 26.2 per 1000 inhabitants during the period of ten years down to 1886.

In 10,000 deaths all over Germany the following ratios occur:—

|                      |     |                      |     |                    |       |
|----------------------|-----|----------------------|-----|--------------------|-------|
| Rheumatism . . . . . | 25  | Heart . . . . .      | 230 | Apoplexy . . . . . | 390   |
| Erysipelas . . . . . | 35  | Cancer . . . . .     | 260 | Typhoid . . . . .  | 450   |
| Scarlatina . . . . . | 160 | Diphtheria . . . . . | 270 | Phthisis . . . . . | 1,270 |

In 10,000 deaths in Prussia (1843) the ratios showed—small-pox 80, puerperal 110, apoplexy and paralysis 690, acute internal disorders 240, and chronic disease 388; besides suicide 35, and accidental deaths 140.

Deaths in Saxony in the years 1873-76 showed the following diseases thus:—

Per 100,000 Inhabitants Yearly

|                      |    |                   |    |                                |     |
|----------------------|----|-------------------|----|--------------------------------|-----|
| Small-pox . . . . .  | 28 | Typhoid . . . . . | 39 | Diphtheria and croup . . . . . | 81  |
| Scarlatina . . . . . | 55 | Cancer . . . . .  | 61 | Phthisis . . . . .             | 232 |

Of 10,000 deaths in Berlin, Munich, and Frankfort there were:—

|                      | Berlin | Munich | Frankfort |
|----------------------|--------|--------|-----------|
| Scrofula . . . . .   | 100    | 33     | ...       |
| Cancer . . . . .     | 160    | ...    | 370       |
| Diphtheria . . . . . | 320    | 240    | 130       |
| Typhoid . . . . .    | 320    | 450    | 420       |
| Apoplexy . . . . .   | 410    | 390    | 380       |
| Phthisis . . . . .   | 990    | 1,320  | 1,550     |

The distribution of deaths in Saxony from various diseases according to months, taking the year as 1200, was thus:—

|                     | Measles | Scarlatina | Diphtheria and Croup | Whooping-Cough | Typhoid | Dysentery |
|---------------------|---------|------------|----------------------|----------------|---------|-----------|
| January . . . . .   | 119     | 116        | 135                  | 88             | 102     | 6         |
| February . . . . .  | 112     | 102        | 126                  | 85             | 95      | 20        |
| March . . . . .     | 84      | 78         | 100                  | 99             | 87      | 14        |
| April . . . . .     | 65      | 63         | 79                   | 84             | 81      | 13        |
| May . . . . .       | 90      | 59         | 75                   | 88             | 80      | 13        |
| June . . . . .      | 93      | 59         | 71                   | 75             | 79      | 27        |
| July . . . . .      | 93      | 68         | 54                   | 95             | 92      | 101       |
| August . . . . .    | 120     | 84         | 50                   | 107            | 121     | 367       |
| September . . . . . | 64      | 113        | 91                   | 118            | 131     | 352       |
| October . . . . .   | 64      | 155        | 119                  | 124            | 126     | 181       |
| November . . . . .  | 119     | 151        | 155                  | 126            | 105     | 73        |
| December . . . . .  | 176     | 152        | 145                  | 111            | 101     | 33        |
|                     | 1,200   | 1,200      | 1,200                | 1,200          | 1,200   | 1,200     |

The ratios of various diseases in 10,000 deaths in Bavaria were as follows:—

|                    |      |                      |     |
|--------------------|------|----------------------|-----|
| Phthisis . . . . . | 1010 | Apoplexy . . . . .   | 372 |
| Dropsy . . . . .   | 650  | Diphtheria . . . . . | 248 |
| Croup . . . . .    | 392  | Scarlatina . . . . . | 236 |

## DISEASE

211

## DISEASE

In Hanover the prevalence of certain diseases among given trades is as follows :—

|                   | Percentage of Causes of Death |       |          |            |          |         |
|-------------------|-------------------------------|-------|----------|------------|----------|---------|
|                   | Glass-<br>blowers             | Dyers | Painters | Varnishers | Printers | Average |
| Phthisis . . .    | 18                            | 25    | 24       | 25         | 22       | 23      |
| Acute disease . . | 28                            | 22    | 19       | 18         | 30       | 23      |
| Heart disease . . | 4                             | 9     | 5        | 5          | 3        | 5       |
| Stomach disease . | 15                            | 16    | 15       | 35         | 14       | 19      |
| Rheumatism . . .  | 11                            | 13    | 11       | 5          | 8        | 10      |
| Various . . . . . | 24                            | 15    | 26       | 12         | 23       | 20      |
| Total . . . . .   | 100                           | 100   | 100      | 100        | 100      | 100     |

In Bavaria the prevalence of typhoid fever according to age was as follows :—

| Per Million Inhabitants of each Age |     |             |     |               |     |
|-------------------------------------|-----|-------------|-----|---------------|-----|
| Age                                 |     | Age         |     | Age           |     |
| Under 10 . . .                      | 300 | 21-30 . . . | 850 | 41-50 . . .   | 690 |
| 10-20 . . . .                       | 480 | 31-40 . . . | 650 | Over 50 . . . | 980 |

And the death-rate according to age was :—

| Age              |    | Age              |    |
|------------------|----|------------------|----|
| Per 100 Patients |    | Per 100 Patients |    |
| Under 5 . . .    | 24 | 41-60 . . .      | 29 |
| 5-15 . . . . .   | 10 | 61-70 . . .      | 46 |
| 16-40 . . . . .  | 20 | Over 70 . . .    | 75 |

At page 197 will be found a table from an English medical work showing the predisposition to fever according to age, which is at variance with the above table for Bavaria.

The prevalence of certain diseases in the different seasons was as follows :—

## CASES OF SICKNESS

| Season           | Diarrhoea |         | Cholera   |         | Phthisis | Pneumonia | Liver   |
|------------------|-----------|---------|-----------|---------|----------|-----------|---------|
|                  | Breslau   | Dresden | Stuttgart | Breslau | Breslau  | Breslau   | Dresden |
| Spring . . . . . | 15.5      | 19.0    | 10.6      | 8.7     | 30.1     | 34.1      | 20.5    |
| Summer . . . . . | 43.9      | 29.7    | 65.4      | 58.5    | 22.6     | 18.3      | 33.3    |
| Autumn . . . . . | 27.1      | 29.1    | 15.0      | 26.5    | 22.8     | 20.8      | 17.3    |
| Winter . . . . . | 13.5      | 22.2    | 9.0       | 6.3     | 25.5     | 26.8      | 28.9    |
|                  | 100.0     | 100.0   | 100.0     | 100.0   | 100.0    | 100.0     | 100.0   |

## DEATHS FROM VARIOUS DISEASES

| Season           | Measles |         | Diarrhoea | Phthisis | Convulsions |           | Diarrhoea | Scarlatina |
|------------------|---------|---------|-----------|----------|-------------|-----------|-----------|------------|
|                  | Berlin  | Dresden | Berlin    | Berlin   | Berlin      | Frankfort | Frankfort | Berlin     |
| Spring . . . . . | 9.9     | 61.0    | 9.5       | 27.6     | 26.2        | 27.8      | 15.7      | 21.6       |
| Summer . . . . . | 55.6    | 24.0    | 68.5      | 22.6     | 27.2        | 21.4      | 49.6      | 25.4       |
| Autumn . . . . . | 16.9    | 8.0     | 16.7      | 22.8     | 22.7        | 19.9      | 25.1      | 37.2       |
| Winter . . . . . | 17.6    | 7.0     | 5.3       | 27.0     | 23.9        | 30.9      | 9.6       | 15.8       |
|                  | 100.0   | 100.0   | 100.0     | 100.0    | 100.0       | 100.0     | 100.0     | 100.0      |

## DEATHS FROM APOPLEXY

| Season           | Berlin | Hamburg | Dresden | Breslau | Frankfort |
|------------------|--------|---------|---------|---------|-----------|
| Spring . . . . . | 25.5   | 26.3    | 28.9    | 25.9    | 26.3      |
| Summer . . . . . | 19.9   | 22.7    | 22.7    | 23.1    | 22.7      |
| Autumn . . . . . | 22.5   | 22.7    | 20.0    | 22.9    | 22.7      |
| Winter . . . . . | 32.1   | 28.3    | 28.4    | 28.1    | 28.3      |
|                  | 100.0  | 100.0   | 100.0   | 100.0   | 100.0     |

| Season           | Deaths from Pneumonia |         |           |         | From Typhoid |        |
|------------------|-----------------------|---------|-----------|---------|--------------|--------|
|                  | Berlin                | Hamburg | Frankfort | Dresden | Germany      | Berlin |
| Spring . . . . . | 30.0                  | 41.4    | 37.5      | 39.9    | 18.2         | 19.7   |
| Summer . . . . . | 18.4                  | 15.4    | 17.3      | 17.7    | 22.9         | 25.2   |
| Autumn . . . . . | 17.8                  | 13.5    | 15.7      | 16.7    | 35.5         | 33.4   |
| Winter . . . . . | 33.8                  | 29.7    | 29.5      | 25.7    | 23.4         | 21.7   |
|                  | 100.0                 | 100.0   | 100.0     | 100.0   | 100.0        | 100.0  |

It appears from the preceding tables that diarrhoea and cholera are most frequent in summer, phthisis and pneumonia in spring, apoplexy in winter, and typhoid in autumn. As regards measles and scarlatina, the seasons seem to have little effect.

## RUSSIA

The death-rate from various diseases per 10,000 inhabitants of each age at St. Petersburg was as follows :—

| Disease            | 6-10 | 11-20 | 21-30 | 31-40 | 41-50 | 51-60 | 61-70 | Over 70 |
|--------------------|------|-------|-------|-------|-------|-------|-------|---------|
| Typhoid . . . . .  | 12   | 23    | 27    | 18    | 17    | 23    | 23    | 30      |
| Pneumonia . . . .  | 11   | 7     | 9     | 12    | 19    | 37    | 57    | 85      |
| Phthisis . . . . . | 10   | 27    | 61    | 71    | 72    | 72    | 53    | 50      |
| Various . . . . .  | 110  | 55    | 86    | 97    | 145   | 248   | 452   | 1,155   |
| Total . . . . .    | 142  | 112   | 183   | 198   | 253   | 380   | 585   | 1,320   |
| Males . . . . .    | 146  | 131   | 203   | 227   | 306   | 475   | 702   | 1,660   |
| Females . . . . .  | 133  | 79    | 147   | 159   | 193   | 297   | 510   | 1,160   |

The aggregate returns of the hospital at Astrakan for 25 years gave the ratio of sick thus :—

| In 10,000 Patients  |        |
|---------------------|--------|
| Cancer . . . . .    | 55     |
| Cholera . . . . .   | 375    |
| Dysentery . . . . . | 591    |
| Erysipelas . . . .  | 115    |
| Fever . . . . .     | 2,021  |
| Leprosy . . . . .   | 173    |
| Phthisis . . . . .  | 286    |
| Pleurisy . . . . .  | 187    |
| Pneumonia . . . . . | 265    |
| Rheumatism . . . .  | 1,398  |
| Scurvy . . . . .    | 147    |
| Small-pox . . . . . | 93     |
| Syphilis . . . . .  | 1,332  |
| Typhus . . . . .    | 1,498  |
| Various . . . . .   | 1,464  |
| Total . . . . .     | 10,000 |

The death-rate in the same hospital for various diseases was :—

| In 100 Patients         |                        |                        |  |
|-------------------------|------------------------|------------------------|--|
| Cancer . . . . . 30     | Leprosy . . . . . 41   | Scurvy . . . . . 16    |  |
| Cholera . . . . . 73    | Phthisis . . . . . 60  | Small-pox . . . . . 42 |  |
| Dysentery . . . . . 41  | Pleurisy . . . . . 15  | Syphilis . . . . . 2   |  |
| Erysipelas . . . . . 10 | Pneumonia . . . . . 35 | Typhus . . . . . 37    |  |
| Fever . . . . . 5       | Rheumatism . . . . . 1 | Various . . . . . 12   |  |

The annual death-rate in St. Petersburg of children under five years is 182 per 1000, made up as follows :—

|                               |                                      |
|-------------------------------|--------------------------------------|
| Bowel complaints . . . . . 60 | Croup . . . . . 9                    |
| Pneumonia . . . . . 36        | Small-pox and scarlatina . . . . . 8 |
| Meningitis . . . . . 18       | Bronchitis . . . . . 5               |
| Convulsions . . . . . 13      | Sundry . . . . . 24                  |
| Scrofula . . . . . 9          |                                      |

In 10,000 deaths at St. Petersburg the following ratios occurred :—

|                         |                           |                            |
|-------------------------|---------------------------|----------------------------|
| Small-pox . . . . . 40  | Heart . . . . . 200       | Scrofula . . . . . 260     |
| Puerperal . . . . . 74  | Convulsions . . . . . 200 | Meningitis . . . . . 500   |
| Scarlatina . . . . . 90 | Apoplexy . . . . . 210    | Phthisis . . . . . 1,510   |
| Cancer . . . . . 150    | Diphtheria . . . . . 210  | Bronchitis . . . . . 1,590 |

The occurrence of certain diseases according to season at St. Petersburg was shown by the ratio of deaths as follows :—

|                  | Infant Cholera | Typhoid | Apoplexy | Puerperal Fever |
|------------------|----------------|---------|----------|-----------------|
| Spring . . . . . | 33.4           | 30.8    | 24.0     | 29.0            |
| Summer . . . . . | 20.6           | 21.8    | 23.8     | 25.2            |
| Autumn . . . . . | 18.3           | 16.8    | 21.2     | 18.2            |
| Winter . . . . . | 27.7           | 30.6    | 31.0     | 27.6            |
|                  | 100.0          | 100.0   | 100.0    | 100.0           |

The death-rate in St. Petersburg is so high that deaths exceed births. In 125 years, from 1764 to 1888, there were 1,539,000 births and 1,772,000 deaths, being an excess of 233,000 deaths.

#### AUSTRIA-HUNGARY

The returns of Austria proper for 1886 showed thus :—

|                          | Number of Deaths |         |         | Ratio  |
|--------------------------|------------------|---------|---------|--------|
|                          | Males            | Females | Total   |        |
| Small-pox . . . . .      | 4,340            | 4,454   | 8,794   | 133    |
| Measles . . . . .        | 7,228            | 6,981   | 14,209  | 214    |
| Scarlatina . . . . .     | 6,258            | 5,889   | 12,147  | 183    |
| Typhoid . . . . .        | 8,008            | 7,882   | 15,890  | 240    |
| Diarrhoea . . . . .      | 4,895            | 4,718   | 9,613   | 146    |
| Whooping-cough . . . . . | 10,409           | 10,568  | 20,977  | 316    |
| Diphtheria . . . . .     | 16,231           | 15,435  | 31,666  | 477    |
| Respiratory . . . . .    | 36,459           | 32,907  | 69,366  | 1,045  |
| Phthisis . . . . .       | 46,912           | 44,643  | 91,555  | 1,380  |
| Enteritis . . . . .      | 17,670           | 15,298  | 32,968  | 496    |
| Apoplexy . . . . .       | 8,710            | 7,069   | 15,779  | 237    |
| Cancer . . . . .         | 4,809            | 6,313   | 11,122  | 168    |
| Various . . . . .        | 166,850          | 161,320 | 328,170 | 4,965  |
| Total . . . . .          | 338,779          | 323,477 | 662,256 | 10,000 |

The returns of Hungary for 1886 showed as follows :—

|                              | Number of Deaths |         |         |
|------------------------------|------------------|---------|---------|
|                              | Males            | Females | Total   |
| Unmarried . . . . .          | 36,800           | 31,800  | 68,600  |
| Married . . . . .            | 59,200           | 46,500  | 105,700 |
| Widowed . . . . .            | 18,300           | 36,200  | 54,500  |
| Over five years . . . . .    | 114,300          | 114,500 | 228,800 |
| Infants under five . . . . . | 134,700          | 116,800 | 251,500 |
| Total . . . . .              | 249,000          | 231,300 | 480,300 |

The municipal hospitals of Hungary showed the number of cases and deaths as follows :—

|                           | Cases  | Died   | Death-Rate | Ratio |        |
|---------------------------|--------|--------|------------|-------|--------|
|                           |        |        |            | Cases | Deaths |
| Small-pox . . . . .       | 16,055 | 3,740  | 23.4       | 268   | 348    |
| Measles . . . . .         | 24,801 | 1,752  | 7.0        | 413   | 163    |
| Scarlatina . . . . .      | 6,325  | 1,221  | 19.3       | 106   | 112    |
| Diphtheria . . . . .      | 4,189  | 2,292  | 54.6       | 70    | 214    |
| Diarrhoea . . . . .       | 3,211  | 500    | 15.6       | 54    | 46     |
| Typhoid . . . . .         | 771    | 102    | 13.2       | 13    | 9      |
| Whooping-cough . . . . .  | 1,890  | 147    | 7.7        | 32    | 14     |
| Cholera . . . . .         | 1,871  | 989    | 53.0       | 32    | 92     |
| Various . . . . .         | 710    | 19     | 2.7        | 12    | 2      |
| Year 1886 . . . . .       | 59,823 | 10,762 | 17.9       | 1,000 | 1,000  |
| Average 1880-85 . . . . . | 52,200 | 9,905  | 19.1       | ...   | ...    |

The hospital returns of Vienna give the following percentages :—

|                  | Cases of Sickness |           |       |           |          | Deaths        |            |
|------------------|-------------------|-----------|-------|-----------|----------|---------------|------------|
|                  | Measles           | Diarrhoea | Liver | Pneumonia | Phthisis | From Phthisis | Scarlatina |
| Spring . . . . . | 38.9              | 25.7      | 29.7  | 39.1      | 34.1     | 34.1          | 18.9       |
| Summer . . . . . | 33.7              | 31.6      | 25.9  | 17.9      | 24.5     | 24.7          | 26.9       |
| Autumn . . . . . | 8.7               | 21.7      | 20.4  | 17.3      | 17.7     | 17.5          | 23.8       |
| Winter . . . . . | 18.7              | 21.0      | 24.0  | 25.7      | 23.7     | 23.7          | 38.4       |
|                  | 100.0             | 100.0     | 100.0 | 100.0     | 100.0    | 100.0         | 100.0      |

In 10,000 deaths at Buda-Pesth 90 were of Bright's disease, 140 apoplexy, 460 meningitis, 730 convulsions, and 1545 phthisis. At Vienna the ratios were :—Puerperal 40, heart 170, small-pox 40, pneumonia 714, and phthisis 2080. The effects of overcrowding of population on the death-rate is shown in the returns at Buda-Pesth of deaths among the working classes for the years 1872-75.

|                               | Deaths Yearly of Work-People, Living |                    |       |
|-------------------------------|--------------------------------------|--------------------|-------|
|                               | Not more than Two in a Room          | Over Two in a Room | Total |
| Small-pox . . . . .           | 52                                   | 415                | 467   |
| Typhus . . . . .              | 45                                   | 155                | 200   |
| Scarlatina . . . . .          | 31                                   | 141                | 172   |
| Diphtheria . . . . .          | 11                                   | 63                 | 74    |
| Various . . . . .             | 19                                   | 180                | 199   |
| Contagious diseases . . . . . | 158                                  | 954                | 1,112 |
| Pneumonia . . . . .           | 65                                   | 286                | 351   |
| Phthisis . . . . .            | 194                                  | 704                | 898   |
| Diarrhoea . . . . .           | 48                                   | 453                | 501   |
| Various . . . . .             | 1,052                                | 3,900              | 4,952 |
| Total . . . . .               | 1,517                                | 6,297              | 7,814 |

It appears that 80 per cent. of the mortality among working-classes was of people living more than two in a room.

#### ITALY

Of 10,000 deaths at Rome the ratio showed :—

|                         |                         |                           |
|-------------------------|-------------------------|---------------------------|
| Scarlatina . . . . . 10 | Typhoid . . . . . 230   | Apoplexy . . . . . 530    |
| Bronchitis . . . . . 29 | Small-pox . . . . . 290 | Digestive . . . . . 1,100 |
| Cancer . . . . . 170    | Ague . . . . . 460      | Phthisis . . . . . 1,140  |

At Naples the ratios were in 10,000:—Ague, 107; typhoid, 300; and apoplexy, 370; at Genoa, ague, 133; digestive disorders, 1580. The mean ratios in 10,000 deaths of all Italian cities were:—

|                    |                   |                    |
|--------------------|-------------------|--------------------|
| Bright's . . . 40  | Measles . . . 95  | Apoplexy . . . 360 |
| Whoop.-cough 50    | Dysentery . . 130 | Diphtheria . . 360 |
| Erysipelas . . 50  | Small-pox . . 220 | Pneumonia . . 540  |
| Hepatitis . . . 90 | Typhoid . . . 240 | Heart . . . 585    |

The ratios in Turin in 10,000 deaths were:—

|                   |                   |                    |
|-------------------|-------------------|--------------------|
| Scrofula . . . 30 | Typhoid . . . 460 | Apoplexy . . 610   |
| Syphilis . . . 30 | Heart . . . 490   | Phthisis . . . 830 |
| Cancer . . . 160  | Convulsions . 560 | Digestive . 1,550  |

The prevalence of some diseases according to months, taking the year as 1200, is shown thus:—

|             | Deaths from Apoplexy |       |         | Admission to Fever Hospital | Deaths |          |
|-------------|----------------------|-------|---------|-----------------------------|--------|----------|
|             | Turin                | Milan | Bologna |                             | Ague   | Sciatica |
| January .   | 147                  | 132   | 149     | 38                          | 30     | 265      |
| February .  | 107                  | 128   | 169     | 44                          | 30     | 78       |
| March .     | 107                  | 108   | 114     | 56                          | 48     | 126      |
| April .     | 90                   | 99    | 95      | 63                          | 78     | 78       |
| May .       | 99                   | 93    | 91      | 62                          | 78     | 76       |
| June .      | 77                   | 79    | 67      | 65                          | 30     | 76       |

| Year        | 1,200                | 1,200 | 1,200   | 1,200                       | 1,200  | 1,200    |

## SPAIN

Madrid hospitals publish the following table of proportions of deaths from phthisis according to age:—

|                    |      |
|--------------------|------|
| Under 20 . . . . . | 13.4 |
| 20-30 . . . . .    | 28.9 |
| 30-40 . . . . .    | 23.8 |
| 40-50 . . . . .    | 18.1 |
| Over 50 . . . . .  | 15.8 |

Total . . . . . 100.0

The prevalence of this disease according to months is shown in the number of deaths at Madrid, taking the year as 1200:—

|                          |     |                          |     |
|--------------------------|-----|--------------------------|-----|
| January . . . . .        | 162 | July . . . . .           | 18  |
| February . . . . .       | 126 | August . . . . .         | 27  |
| March . . . . .          | 131 | September . . . . .      | 86  |
| First quarter . . . . .  | 419 | Third quarter . . . . .  | 131 |
| April . . . . .          | 113 | October . . . . .        | 92  |
| May . . . . .            | 74  | November . . . . .       | 129 |
| June . . . . .           | 40  | December . . . . .       | 202 |
| Second quarter . . . . . | 227 | Fourth quarter . . . . . | 423 |

## PORTUGAL

Of 10,000 deaths in Lisbon the ratios showed:—

|                   |                    |                    |
|-------------------|--------------------|--------------------|
| Bright's . . . 30 | Scrofula . . . 110 | Bronchitis . . 420 |
| Rheumatism . 43   | Convulsions . 190  | Apoplexy . . 685   |
| Ague . . . . 60   | Cancer . . . 260   | Phthisis . . 1,147 |

## SWEDEN

The deaths per million inhabitants were as follows:—

|                  | 1861-65 | 1866-70 | 1871-75 |
|------------------|---------|---------|---------|
| Diphtheria . . . | 2,873   | 1,497   | 1,579   |
| Scarlatina . . . | 2,292   | 3,475   | 1,899   |
| Small-pox . . .  | 545     | 1,189   | 1,576   |
| Typhoid . . . .  | 1,449   | 3,408   | 2,031   |

The deaths in hospital in 1878 were as follows:—

| Diseases              | Number | Per Cent. |
|-----------------------|--------|-----------|
| Respiratory . . . . . | 4,353  | 31.4      |
| Digestive . . . . .   | 2,177  | 15.8      |
| Contagious . . . . .  | 2,123  | 15.3      |
| Nervous . . . . .     | 1,436  | 10.3      |
| Various . . . . .     | 3,785  | 27.2      |
| Total . . . . .       | 13,874 | 100.0     |

Hospital mortality in 1860 was 15 per cent. of the sick, and in the years 1870-76 only 12 per cent. The relative mortality of Sweden and Norway in different diseases was per 100 patients as follows:—Croup 52, diphtheria 20, scarlatina 18, pneumonia 15, small-pox 13, typhus 12, diarrhoea 11. The percentage of deaths under and over ten years of age in certain diseases was as follows:—

| Age                | Small-pox | Scarlatina | Diphtheria | Typhoid |
|--------------------|-----------|------------|------------|---------|
| Under 10 . . . . . | 41.2      | 89.8       | 86.4       | 13.2    |
| Over 10 . . . . .  | 58.8      | 10.2       | 13.6       | 86.8    |
| Total . . . . .    | 100.0     | 100.0      | 100.0      | 100.0   |

The hospital returns of sickness showed the following ratio:—

Per 10,000 Inhabitants

|                          |     |                      |    |
|--------------------------|-----|----------------------|----|
| Diarrhoea . . . . .      | 165 | Ague . . . . .       | 36 |
| Small-pox . . . . .      | 42  | Scarlatina . . . . . | 15 |
| Whooping-cough . . . . . | 40  | Typhus . . . . .     | 24 |
| Diphtheria . . . . .     | 38  | Dysentery . . . . .  | 7  |
| Typhoid . . . . .        | 37  |                      |    |

The death-rate of various diseases showed thus:—

Deaths per 1000 Patients of each Disease

|                     |    |                      |     |                      |     |
|---------------------|----|----------------------|-----|----------------------|-----|
| Ague . . . . .      | 2  | Typhoid . . . . .    | 110 | Small-pox . . . . .  | 171 |
| Diarrhoea . . . . . | 10 | Dysentery . . . . .  | 134 | Typhus . . . . .     | 204 |
| Whoop.-cough 70     |    | Pneumonia . . . . .  | 148 | Diphtheria . . . . . | 251 |
| Measles . . . . .   | 83 | Scarlatina . . . . . | 155 | Croup . . . . .      | 550 |

The effect of town-life on death-rate in Sweden is shown thus:—

|                                | Deaths Yearly per 100,000 Persons of each Class |       |               |      |
|--------------------------------|-------------------------------------------------|-------|---------------|------|
|                                | Under 10 Years Old                              |       | Over 10 Years |      |
|                                | Rural                                           | Town  | Rural         | Town |
| Typhoid . . . . .              | 18                                              | 53    | 32            | 96   |
| Diarrhoea, &c. . . . .         | 31                                              | 1,276 | 3             | 21   |
| Small-pox . . . . .            | 56                                              | 25    | 26            | 56   |
| Whooping-cough . . . . .       | 76                                              | 119   | ...           | ...  |
| Measles . . . . .              | 80                                              | 173   | 2             | 2    |
| Diphtheria and croup . . . . . | 292                                             | 425   | 8             | 7    |
| Scarlatina . . . . .           | 376                                             | 460   | 11            | 11   |
| Total, 7 diseases . . . . .    | 929                                             | 2,531 | 82            | 193  |

Deaths of puerperal fever average 27 per 10,000 births in rural parts, and 74 in towns, the rate for all Sweden being 34. The prevalence of certain diseases according to season shows thus:—

|                  | Pneumonia | Ague  |
|------------------|-----------|-------|
| Spring . . . . . | 37.9      | 31.1  |
| Summer . . . . . | 21.2      | 18.6  |
| Autumn . . . . . | 17.2      | 25.9  |
| Winter . . . . . | 23.7      | 24.4  |
| Total . . . . .  | 100.0     | 100.0 |

# DISEASE

The prevalence of diseases according to months, taking the year as 1200, shows:—

|                 | Bronchitis | Diarrhoea | Diphtheria | Scarlatina | Small-pox | Croup |
|-----------------|------------|-----------|------------|------------|-----------|-------|
| January . . .   | 150        | 41        | 121        | 106        | 120       | 144   |
| February . . .  | 160        | 41        | 119        | 99         | 130       | 136   |
| March . . .     | 143        | 31        | 99         | 93         | 129       | 130   |
| April . . .     | 130        | 33        | 93         | 95         | 156       | 110   |
| May . . .       | 102        | 30        | 85         | 91         | 152       | 88    |
| June . . .      | 67         | 55        | 72         | 90         | 128       | 64    |
| July . . .      | 49         | 150       | 69         | 81         | 91        | 45    |
| August . . .    | 46         | 292       | 77         | 80         | 52        | 48    |
| September . . . | 58         | 227       | 86         | 91         | 41        | 76    |
| October . . .   | 82         | 149       | 112        | 118        | 43        | 108   |
| November . . .  | 104        | 94        | 137        | 136        | 68        | 128   |
| December . . .  | 109        | 54        | 130        | 120        | 90        | 123   |
| Year . . .      | 1,200      | 1,200     | 1,200      | 1,200      | 1,200     | 1,200 |

In 10,000 deaths these ratios occurred:—

|                   |                    |                      |
|-------------------|--------------------|----------------------|
| Ague . . . 14     | Diarrhoea . . 190  | Small-pox . . 158    |
| Puerperal . . 38  | Whoop.-cough 190   | Scarlatina . . 190   |
| Rheumatism . . 40 | Cancer . . . 240   | Pneumonia . . 850    |
| Drink . . . 40    | Apoplexy . . 590   | Typhoid . . . 203    |
| Liver . . . 90    | Bronchitis . . 630 | Phthisis . . . 1,340 |
| Croup . . . 165   | Diphtheria . . 160 |                      |

## FINLAND

Official returns for 1870-71 give the distribution of 10,000 deaths as follows:—

|                   |                   |                      |
|-------------------|-------------------|----------------------|
| Measles . . . 50  | Dysentery . . 170 | Typhus . . . 810     |
| Small-pox . . 60  | Croup . . . 250   | Phthisis . . . 2,210 |
| Scarlatina . . 60 | Whoop.-cough 510  | Various . . . 5,880  |

Deaths of puerperal fever were 96 in 10,000 births; the rate in towns was 18 per cent. higher than in rural departments.

## NORWAY

In 1876 among 10,000 deaths the diseases stood thus:—

|                   |                    |                      |
|-------------------|--------------------|----------------------|
| Typhoid . . . 220 | Diarrhoea . . 280  | Infant con- } 784    |
| Apoplexy . . 240  | Cancer . . . 415   | vulsions . . .       |
| Heart . . . 260   | Bronchitis . . 608 | Scarlatina . . 1285  |
|                   |                    | Phthisis . . . 1,450 |

The prevalence of certain diseases according to months was as follows:—

|                 | Bronchitis | Pneumonia | Diarrhoea | Typhoid | Diphtheria | Scarlatina | Small-pox | Croup |
|-----------------|------------|-----------|-----------|---------|------------|------------|-----------|-------|
| January . . .   | 160        | 98        | 98        | 150     | 136        | 122        | 144       | 141   |
| February . . .  | 152        | 169       | 89        | 103     | 120        | 110        | 161       | 132   |
| March . . .     | 132        | 161       | 72        | 64      | 112        | 103        | 157       | 134   |
| April . . .     | 112        | 160       | 61        | 43      | 89         | 92         | 142       | 105   |
| May . . .       | 96         | 134       | 65        | 38      | 88         | 90         | 172       | 84    |
| June . . .      | 72         | 77        | 60        | 32      | 79         | 85         | 133       | 64    |
| July . . .      | 53         | 55        | 113       | 57      | 79         | 80         | 78        | 47    |
| August . . .    | 48         | 37        | 190       | 95      | 73         | 76         | 46        | 59    |
| September . . . | 62         | 55        | 143       | 117     | 87         | 72         | 34        | 89    |
| October . . .   | 82         | 76        | 95        | 116     | 102        | 100        | 27        | 103   |
| November . . .  | 110        | 91        | 109       | 209     | 118        | 137        | 40        | 125   |
| December . . .  | 121        | 87        | 105       | 176     | 117        | 133        | 66        | 126   |
| Year . . .      | 1,200      | 1,200     | 1,200     | 1,200   | 1,200      | 1,200      | 1,200     | 1,200 |

In 10,000 deaths at Christiania there were:—

|                   |                    |                      |
|-------------------|--------------------|----------------------|
| Whooping . . 100  | Cancer . . . 290   | Scarlatina . . 670   |
| Convulsions . 110 | Erysipelas . 270   | Diarrhoea . . 420    |
| Heart . . . 130   | Diphtheria . . 440 | Pneumonia . . 680    |
| Apoplexy . . 220  | Typhoid . . . 630  | Phthisis . . . 1,720 |

## DENMARK

Of 10,000 deaths at Copenhagen the ratios were:—

|                    |                   |                      |
|--------------------|-------------------|----------------------|
| Rheumatism . 35    | Diphtheria . 160  | Cancer . . . 360     |
| Scrofula . . . 70  | Whooping . . 160  | Convulsions . 560    |
| Drink . . . 70     | Puerperal . . 160 | Typhoid . . . 700    |
| Small-pox . . 70   | Apoplexy . . 230  | Pneumonia . . 710    |
| Bright's . . . 100 | Scarlatina . 240  | Phthisis . . . 1,270 |
|                    | Heart . . . 320   |                      |

## HOLLAND

In 10,000 deaths throughout Holland the principal diseases stood thus:—

|                   |                  |                     |
|-------------------|------------------|---------------------|
| Typhus . . . 21   | Diphtheria . 130 | Apoplexy . . 280    |
| Scarlatina . . 40 | Cancer . . . 180 | Dysentery . . 290   |
| Bright's . . . 50 | Heart . . . 180  | Phthisis . . . 950  |
| Puerperal . . 50  | Whooping- } 180  | Various . . . 7,649 |
|                   | cough . . . }    |                     |

In 10,000 deaths at Amsterdam the ratios were:—

|                   |                    |                    |
|-------------------|--------------------|--------------------|
| Syphilis . . . 18 | Bright's . . . 120 | Meningitis . 370   |
| Typhus . . . 23   | Scrofula . . . 140 | Apoplexy . . 380   |
| Scarlatina . . 50 | Measles . . . 150  | Typhoid . . . 460  |
| Puerperal . . 53  | Diphtheria . 200   | Pneumonia . 570    |
| Hepatitis . . 81  | Bronchitis . 220   | Convulsions . 600  |
| Small-pox . . 100 | Cancer . . . 230   | Phthisis . . . 870 |
| Ague . . . 106    | Heart . . . 290    |                    |

## BELGIUM

The prevalence of certain diseases according to season is shown thus:—

|              | Deaths from |          |            |            |           |           |
|--------------|-------------|----------|------------|------------|-----------|-----------|
|              | Phthisis    | Apoplexy | Rheumatism | Bronchitis | Pneumonia | Diarrhoea |
| Spring . . . | 27.7        | 26.9     | 33.4       | 26.4       | 32.6      | 24.4      |
| Summer . . . | 23.2        | 22.2     | 12.5       | 17.3       | 17.7      | 31.5      |
| Autumn . . . | 24.3        | 22.3     | 22.9       | 21.4       | 21.4      | 23.9      |
| Winter . . . | 24.8        | 28.6     | 31.2       | 34.9       | 28.3      | 20.2      |
| Total . . .  | 100.0       | 100.0    | 100.0      | 100.0      | 100.0     | 100.0     |

The ages of phthisis and other diseases stand thus:—

| Age            | Deaths from |         |          |            |                |           |
|----------------|-------------|---------|----------|------------|----------------|-----------|
|                | Phthisis    | Typhoid | Apoplexy | Bronchitis | Diarrhoea, &c. | Pneumonia |
| Under 20 . . . | 25.7        | 43.3    | 5.6      | 60.4       | 70.0           | 29.0      |
| 20-30 . . .    | 19.2        | 18.0    | 2.6      | 2.0        | 3.0            | 5.4       |
| 31-40 . . .    | 15.4        | 11.2    | 4.2      | 1.9        | 3.0            | 6.2       |
| 41-50 . . .    | 12.2        | 9.6     | 8.1      | 2.8        | 4.0            | 8.1       |
| 51-60 . . .    | 11.3        | 8.9     | 17.0     | 5.3        | 6.0            | 14.0      |
| Over 60 . . .  | 16.2        | 9.0     | 62.5     | 27.6       | 14.0           | 37.3      |
| Total . . .    | 100.0       | 100.0   | 100.0    | 100.0      | 100.0          | 100.0     |

The causes of death were as follows :—

|                 | Annual Averages |         |         | Ratio in 10,000 Deaths |         |         |
|-----------------|-----------------|---------|---------|------------------------|---------|---------|
|                 | 1856-60         | 1871-80 | 1886-87 | 1856-60                | 1871-80 | 1886-87 |
| Bronchitis, &c. | 10,237          | 16,827  | 19,974  | 997                    | 1,402   | 1,664   |
| Phthisis        | 14,523          | 17,642  | 16,606  | 1,416                  | 1,470   | 1,384   |
| Diarrhoea, &c.  | 3,451           | 8,552   | 9,107   | 336                    | 713     | 759     |
| Whooping-cough  | 2,172           | 3,840   | 3,885   | 212                    | 320     | 324     |
| Croup           | 3,033           | 3,250   | 3,758   | 296                    | 271     | 313     |
| Measles         | 1,062           | 3,452   | 2,943   | 10                     | 288     | 245     |
| Typhoid         | 4,630           | 4,161   | 2,480   | 451                    | 347     | 207     |
| Puerperal       | 654             | 1,313   | 1,342   | 63                     | 109     | 112     |
| Scarlatina      | 1,204           | 1,963   | 1,146   | 117                    | 164     | 95      |
| Small-pox       | 1,116           | 5,080   | 911     | 108                    | 423     | 76      |
| Accidents       | 1,542           | 2,039   | 1,964   | 150                    | 170     | 164     |
| Various         | 59,033          | 52,279  | 55,982  | 5,844                  | 4,323   | 4,657   |
| Total           | 102,657         | 120,398 | 120,098 | 10,000                 | 10,000  | 10,000  |

In 10,000 deaths throughout Belgium the ratios of some were :—

|                   |                        |                     |
|-------------------|------------------------|---------------------|
| Erysipelas . . 40 | Meningitis . . 280     | Pneumonia . . 450   |
| Cancer . . . 140  | Whooping-cough . . 280 | Typhoid . . 460     |
| Measles . . . 165 | Diphtheria . . 280     | Convulsions . . 720 |
| Heart . . . 190   | Diarrhoea . . 370      | Phthisis . . 1,825  |

The ratios at Brussels were as follows :—

|                       |                    |                               |
|-----------------------|--------------------|-------------------------------|
| Whooping-cough . . 70 | Puerperal . . 210  | Convulsions . . 450           |
| Hepatitis . . . 81    | Typhoid . . 220    | Bronchitis . . 480            |
| Scrofula . . . 90     | Apoplexy . . 310   | Heart . . . 685               |
| Scarlatina . . 140    | Cancer . . 420     | Phthisis . . 1,750            |
| Small-pox . . 150     | Pneumonia . . 430  | Digestive disorders . . 1,500 |
|                       | Diphtheria . . 440 |                               |

#### SWITZERLAND

In 10,000 deaths the various diseases stood thus :—

|                  |                    |                      |
|------------------|--------------------|----------------------|
| Measles . . . 46 | Scarlatina . . 146 | Heart . . . 385      |
| Puerperal . . 50 | Typhoid . . 184    | Phthisis . . 1,110   |
| Small-pox . . 54 | Diphtheria . . 304 | Bronchitis . . 1,180 |
| Whoop.-cough 112 | Apoplexy . . 370   | Pneumonia . . 1,180  |

In Berne, of 10,000 deaths, there were of puerperal fever, 80; of Bright's disease, 100; of cancer, 320; of apoplexy, 420.

In Geneva the ratios in 10,000 deaths showed :—

|                   |                  |                    |
|-------------------|------------------|--------------------|
| Bright's . . . 15 | Typhoid . . 350  | Cancer . . . 530   |
| Puerperal . . 95  | Apoplexy . . 400 | Phthisis . . 1,250 |

#### GREECE

At Athens the deaths from various diseases occurred in the following ratios according to season :—

| Quarter Ending | Digestive | Phthisis | Pneumonia | Heart Disease | Typhoid | Diphtheria | Liver | Bronchitis | General Mortality |
|----------------|-----------|----------|-----------|---------------|---------|------------|-------|------------|-------------------|
| March . . .    | 10.6      | 25.4     | 34.5      | 31.4          | 6.0     | 22.8       | 22.2  | 36.0       | 23.6              |
| June . . .     | 31.0      | 27.0     | 29.0      | 21.4          | 12.0    | 15.4       | 26.7  | 29.6       | 26.1              |
| September . .  | 36.1      | 22.9     | 14.0      | 17.5          | 66.5    | 19.6       | 28.9  | 9.6        | 25.9              |
| December . .   | 22.3      | 24.7     | 22.5      | 29.7          | 15.5    | 42.2       | 22.2  | 24.8       | 24.4              |
| Year . . .     | 100.0     | 100.0    | 100.0     | 100.0         | 100.0   | 100.0      | 100.0 | 100.0      | 100.0             |

In 10,000 deaths the averages during the years 1876-82 were as follows :—

|                    |                    |                      |
|--------------------|--------------------|----------------------|
| Liver . . . 124    | Heart disease 323  | Apoplexy . . 630     |
| Whoop.-cough 210   | Bronchitis . . 391 | Pneumonia . . 856    |
| Diphtheria . . 219 | Ague . . . 420     | Phthisis . . 1,076   |
| Convulsions . 266  | Typhoid . . 475    | Digestive dis. 1,658 |

The returns for ague, apoplexy, convulsions, and whooping-cough are not for the whole period.

Fever cases occur mostly from July to September; if we take the year as 1200, the various months will stand thus :—

| Cases            | Cases          | Cases             |
|------------------|----------------|-------------------|
| January . . . 40 | May . . . 69   | September . . 168 |
| February . . 41  | June . . . 101 | October . . . 103 |
| March . . . 50   | July . . . 240 | November . . 63   |
| April . . . 53   | August . . 226 | December . . 46   |

#### UNITED STATES

Of 10,000 deaths, according to the Census of 1880, the following ratios occurred :—

|                   |                    |                    |
|-------------------|--------------------|--------------------|
| Calculus . . . 1  | Apoplexy . . 140   | Convulsions . 250  |
| Bright's . . 35   | Whooping . . 148   | Typhoid . . . 310  |
| Puerperal . . 40  | Dysentery . . 160  | Heart . . . 350    |
| Rheumatism . 59   | Meningitis . . 190 | Diphtheria . 480   |
| Scrofula . . . 70 | Scarlatina . . 220 | Diarrhoea . . 880  |
| Cancer . . . 130  | Ague . . . 240     | Phthisis . . 1,420 |

The prevalence of diarrhoea at New York and of infant cholera at Philadelphia, according to seasons, was thus :—

| Season       | Diarrhoea, New York | Infant Cholera, Philadelphia |
|--------------|---------------------|------------------------------|
| Spring . . . | 9.2                 | 2.0                          |
| Summer . . . | 79.8                | 92.8                         |
| Autumn . . . | 7.0                 | 4.5                          |
| Winter . . . | 4.0                 | 0.7                          |
|              | 100.0               | 100.0                        |

The ratios in New York of 10,000 deaths showed :—

|                   |                   |                    |
|-------------------|-------------------|--------------------|
| Syphilis . . . 40 | Scrofula . . . 83 | Typhoid . . 350    |
| Puerperal . . 56  | Drink . . . 70    | Phthisis . . 1,550 |
| Cancer . . . 80   | Diphtheria . 300  |                    |

#### CANADA

Rates for phthisis and typhoid in 10,000 deaths are :—

|                 | Phthisis | Typhoid |
|-----------------|----------|---------|
| Ontario . . .   | 1,540    | 417     |
| Quebec . . .    | 1,380    | 374     |
| Nova Scotia . . | 2,410    | 205     |

In 10,000 deaths the various diseases, according to the *Dict. Medicale*, stand thus :—

|                         |     |                         |     |                          |       |                          |     |
|-------------------------|-----|-------------------------|-----|--------------------------|-------|--------------------------|-----|
| Ague . . . . .          | 43  | Croup . . . . .         | 182 | Hydrocephalus . . . . .  | 130   | Puerperal . . . . .      | 145 |
| Apoplexy . . . . .      | 110 | Diphtheria . . . . .    | 114 | Infant cholera . . . . . | 110   | Rheumatism . . . . .     | 70  |
| Bowel disease . . . . . | 320 | Diarrhoea . . . . .     | 410 | Liver disease . . . . .  | 140   | Scarlatina . . . . .     | 458 |
| Brain disease . . . . . | 420 | Dysentery . . . . .     | 107 | Measles . . . . .        | 220   | Small-pox . . . . .      | 55  |
| Bronchitis . . . . .    | 130 | Epilepsy . . . . .      | 30  | Paralysis . . . . .      | 210   | Typhoid . . . . .        | 364 |
| Cancer . . . . .        | 126 | Frysipelas . . . . .    | 68  | Phthisis . . . . .       | 1,620 | Whooping-cough . . . . . | 260 |
| Convulsions . . . . .   | 180 | Heart disease . . . . . | 370 | Pneumonia . . . . .      | 660   |                          |     |

Ague is almost confined to Ontario, showing only 10 in 10,000 deaths in the other provinces.

The deaths in the principal cities in 1886 were as follows :—

| Disease              | Montreal | Toronto | Quebec | Hamilton | Halifax | Winnipeg | Ottawa | Seven Cities |
|----------------------|----------|---------|--------|----------|---------|----------|--------|--------------|
| Phthisis . . . . .   | 486      | 236     | 182    | 96       | 95      | 30       | 62     | 1,187        |
| Lung . . . . .       | 465      | 351     | 164    | 98       | 102     | 51       | 83     | 1,314        |
| Diarrhoea . . . . .  | 687      | 177     | 257    | 79       | 57      | 65       | 248    | 1,570        |
| Brain . . . . .      | 341      | 127     | 244    | 51       | 47      | 21       | 30     | 861          |
| Diphtheria . . . . . | 235      | 184     | 118    | 76       | 39      | 23       | 46     | 721          |
| Throat . . . . .     | 200      | 111     | 120    | 21       | 56      | 19       | 28     | 564          |
| Heart . . . . .      | 216      | 127     | 76     | 48       | 47      | 14       | 27     | 555          |

## JAPAN

The prevalence of various diseases at certain ages is shown by the ratio of deaths according to age thus :—

| Age               | Small-pox | Diphtheria | Cholera | Age                | Typhoid | Typhus | Dysentery |
|-------------------|-----------|------------|---------|--------------------|---------|--------|-----------|
| Under 3 . . . . . | 29.6      | 34.9       | 1.8     | Under 10 . . . . . | 12.1    | 10.2   | 30.1      |
| 3-7 . . . . .     | 22.0      | 30.3       | 4.9     | 10-15 . . . . .    | 11.6    | 11.2   | 13.4      |
| 7-15 . . . . .    | 26.8      | 18.0       | 8.3     | 15-25 . . . . .    | 26.2    | 23.9   | 17.2      |
| 15-30 . . . . .   | 18.7      | 10.4       | 24.0    | 25-40 . . . . .    | 25.7    | 28.5   | 17.3      |
| 30-50 . . . . .   | 2.9       | 6.4        | 33.2    | 40-60 . . . . .    | 17.2    | 18.0   | 13.1      |
| Over 50 . . . . . |           |            | 27.8    | Over 60 . . . . .  | 7.2     | 8.2    | 8.9       |
| Total . . . . .   | 100.0     | 100.0      | 100.0   | Total . . . . .    | 100.0   | 100.0  | 100.0     |

The death-rate among typhoid patients was 32 per cent. The classification of sickness and of deaths was as follows :—

| Prevalent Diseases   | Causes of Death               |
|----------------------|-------------------------------|
| Typhoid . . . . .    | Contagious diseases . . . . . |
| Dysentery . . . . .  | Nervous . . . . .             |
| Small-pox . . . . .  | Digestive . . . . .           |
| Typhus . . . . .     | Respiratory . . . . .         |
| Diphtheria . . . . . | Sundry . . . . .              |
| Total . . . . .      | Total . . . . .               |

## DISTANCES

The principal ocean routes are as follows in nautical miles, of which six are equal to seven statute miles :—

|                                     |       |
|-------------------------------------|-------|
| Aden—Mauritius . . . . .            | 2,822 |
| Alexandria—Southampton . . . . .    | 2,960 |
| Amoor River—San Francisco . . . . . | 3,946 |

|                                           |       |
|-------------------------------------------|-------|
| Ascension—Cape Horn . . . . .             | 3,800 |
| Auckland—Panama . . . . .                 | 6,490 |
| Azores—Portsmouth . . . . .               | 1,390 |
| Bahia—Southampton . . . . .               | 4,366 |
| Batavia—Sydney . . . . .                  | 3,870 |
| Behring's Straits—San Francisco . . . . . | 2,720 |
| Bermuda—Southampton . . . . .             | 2,973 |
| Bombay—Cape of Good Hope . . . . .        | 4,527 |
| Mauritius . . . . .                       | 2,593 |
| Melbourne . . . . .                       | 5,530 |
| London . . . . .                          | 6,330 |
| Boston—Galway . . . . .                   | 2,385 |
| Calcutta—London . . . . .                 | 7,950 |
| Melbourne . . . . .                       | 5,230 |
| Suez . . . . .                            | 4,580 |
| Cape of Good Hope—Calcutta . . . . .      | 5,381 |
| Bombay . . . . .                          | 4,527 |
| Java . . . . .                            | 5,025 |
| Liverpool . . . . .                       | 5,998 |
| Cape Horn—Ascension . . . . .             | 3,800 |
| Liverpool . . . . .                       | 7,325 |
| Sydney . . . . .                          | 5,470 |

|                                       |        |
|---------------------------------------|--------|
| Demerara—London . . . . .             | 4,050  |
| Fernando Po—Plymouth . . . . .        | 4,130  |

| Havanna . . . . .        | 4,700 | Valparaiso . . . . .     | 7,850  |
| Hong-Kong . . . . .      | 6,040 | Vienna . . . . .         | 760    |
| Honolulu . . . . .       | 8,430 | Warsaw . . . . .         | 910    |
| Iceland . . . . .        | 1,060 | Washington . . . . .     | 3,800  |
| Jamaica . . . . .        | 4,800 | Yeddo . . . . .          | 6,600  |
| Jersey . . . . .         | 170   |                          |        |

Distances by railway route from London are :—

|                          | Miles |                          | Miles |
|--------------------------|-------|--------------------------|-------|
| Antwerp . . . . .        | 260   | Munich . . . . .         | 758   |
| Berlin . . . . .         | 733   | Paris . . . . .          | 283   |
| Constantinople . . . . . | 2,260 | Rome . . . . .           | 1,195 |
| Copenhagen . . . . .     | 854   | St. Petersburg . . . . . | 1,748 |
| Hamburg . . . . .        | 849   | Stockholm . . . . .      | 1,195 |
| Lisbon . . . . .         | 1,603 | Turin . . . . .          | 781   |
| Madrid . . . . .         | 1,191 | Vienna . . . . .         | 963   |
| Moscow . . . . .         | 1,940 | Warsaw . . . . .         | 1,130 |

## DIVORCE

Bertillon's and other tables show that the number of divorces compare with marriages in various countries as follows :—

|                      | Per 10,000 Marriages |         |                       | Per 10,000 Marriages |         |
|----------------------|----------------------|---------|-----------------------|----------------------|---------|
|                      | 1867-76              | 1877-86 |                       | 1867-76              | 1877-86 |
| England . . . . .    | 9                    | 19      | Norway . . . . .      | 24                   | 30      |
| Scotland . . . . .   | 16                   | 29      | Sweden . . . . .      | 56                   | 73      |
| Ireland . . . . .    | 1                    | 2       | Holland . . . . .     | 50                   | 91      |
| U. Kingdom . . . . . | 9                    | 18      | Belgium . . . . .     | 40                   | 69      |
| France . . . . .     | 72                   | 127     | Roumania . . . . .    | 99                   | 106     |
| Germany . . . . .    | 107                  | 152     | Switzerland . . . . . | ...                  | 468     |
| Russia . . . . .     | 18                   | 22      | Paris . . . . .       | 297                  | 322     |
| Poland . . . . .     | 49                   | 55      | Berlin . . . . .      | 420                  | 533     |
| Austria . . . . .    | 7                    | 10      | Vienna . . . . .      | 210                  | 290     |
| Hungary . . . . .    | ...                  | 64      | Australia . . . . .   | ...                  | 35      |
| Italy . . . . .      | 31                   | 24      | U. States . . . . .   | 339                  | 444     |
| Denmark . . . . .    | 353                  | 406     | Canada . . . . .      | 5                    | 12      |

Kummer's table for five countries covers a period of 50 years :—

| Period  | Divorces per 10,000 Marriages |         |        |         |       |          |        |
|---------|-------------------------------|---------|--------|---------|-------|----------|--------|
|         | Sweden                        | Belgium | Saxony | Holland | Paris | Brussels | France |
| 1831-40 | 49                            | 12      | 256    | ...     | 70    | 53       | 17     |
| 1841-50 | 43                            | 14      | 252    | ...     | 90    | 66       | 27     |
| 1851-60 | 43                            | 24      | 255    | 33      | 156   | 99       | 44     |
| 1861-70 | 49                            | 29      | 205    | 37      | 229   | 112      | 68     |
| 1871-80 | 65                            | 51      | 256    | 48      | 249   | 124      | 78     |

The following table shows the number of divorces (including judicial separations) in the various countries during twenty years ending December 1886. The figures are mainly from Commissioner Carroll Wright's work (Washington, 1889), compiled from Bertillon's and other returns :—

|                       | Actual Number of Divorces Granted |         |         |         |          |
|-----------------------|-----------------------------------|---------|---------|---------|----------|
|                       | 1867-71                           | 1872-76 | 1877-81 | 1882-86 | 20 Years |
| England . . .         | 724                               | 1,050   | 1,743   | 1,891   | 5,408    |
| Scotland . . .        | 177                               | 220     | 337     | 390     | 1,124    |
| Ireland . . .         | 4                                 | 13      | 21      | 17      | 55       |
| U. Kingdom            | 905                               | 1,283   | 2,101   | 2,298   | 6,587    |
| France . . .          | 9,850                             | 11,384  | 13,132  | 22,750  | 57,116   |
| Germany . . .         | 18,450                            | 22,085  | 24,143  | 29,140  | 93,818   |
| Russia . . .          | 4,597                             | 5,095   | 5,721   | 6,563   | 21,976   |
| Poland . . .          | 809                               | 1,073   | 1,432   | 1,725   | 5,039    |
| Austria . . .         | ...                               | 690     | 808     | 856     | ...      |
| Hungary . . .         | ...                               | ...     | 5,246   | 4,835   | ...      |
| Italy . . .           | 3,136                             | ...     | 3,195   | 2,828   | ...      |
| Sweden . . .          | 619                               | 953     | 1,053   | 1,109   | 3,734    |
| Norway . . .          | ...                               | 162     | 195     | ...     | ...      |
| Denmark . . .         | ...                               | 2,677   | 3,046   | ...     | ...      |
| Holland . . .         | 700                               | 810     | 1,160   | 1,570   | 4,240    |
| Switzerland . . .     | ...                               | ...     | 4,811   | 4,588   | ...      |
| Roumania . . .        | ...                               | 1,787   | 1,900   | ...     | ...      |
| Belgium . . .         | 620                               | 899     | 1,189   | 1,501   | 4,209    |
| Europe, approximately | 46,600                            | 57,500  | 69,132  | 85,100  | 258,332  |
| Canada . . .          | 15                                | 16      | 33      | 52      | 116      |
| U. States . . .       | 53,574                            | 68,547  | 89,284  | 117,311 | 328,716  |
| Total                 | 100,189                           | 126,063 | 158,449 | 202,463 | 587,164  |

In the above table Germany is an estimate down to 1881 (see p. 221), and in some cases where the record of a

The proportions of divorces according to length of marriage were :—

| Years Married | France  | Saxony  | Italy   | Switzerland | Sweden  | Roumania | Average |
|---------------|---------|---------|---------|-------------|---------|----------|---------|
| Under 5 . . . | 21.5    | 35.7    | 40.9    | 36.0        | 11.2    | 50.9     | 32.4    |
| 5-10 . . .    | 29.6    | 29.3    | 22.9    | 34.1        | 24.8    | 37.4     | 29.0    |
| Over 10 . . . | 48.9    | 35.0    | 36.2    | 39.9        | 64.0    | 11.7     | 38.6    |
| Total . . .   | 100.0   | 100.0   | 100.0   | 100.0       | 100.0   | 100.0    | 100.0   |
| Date . . .    | 1876-79 | 1875-77 | 1866-79 | 1876-80     | 1876-80 | 1875-77  | ...     |

The percentages of marriages dissolved at the petition of husband or of wife showed thus :—

| Petition by   | Scotland | Norway  | Belgium | Saxony  | Italy   | Roumania | Massachusetts | Average |
|---------------|----------|---------|---------|---------|---------|----------|---------------|---------|
| Husband . . . | 56       | 68      | 44      | 45      | 34      | 27       | 33            | 42      |
| Wife . . .    | 44       | 32      | 56      | 55      | 66      | 73       | 67            | 58      |
| Total . . .   | 100      | 100     | 100     | 100     | 100     | 100      | 100           | 100     |
| Date . . .    | 1878-81  | 1875-80 | 1880    | 1875-80 | 1866-79 | 1875-77  | 1860-78       | ...     |

year is missing, the average for the other four years of the period is added.

Kummer also gives the following table of the increase of divorce :—

|               | 1861-65 | 1866-70 | 1861-65 | 1866-70 | 1871-75 | 1876-80 |
|---------------|---------|---------|---------|---------|---------|---------|
| France . . .  | 100     | 128     | 150     | 190     | 163     | 225     |
| Belgium . . . | 100     | 140     | 160     | 190     | 280     | 420     |
| Holland . . . | 100     | 100     | 112     | 115     | 139     | 151     |
| Saxony . . .  | 100     | 83      | 75      | 72      | 80      | 105     |
| Sweden . . .  | 100     | 98      | 109     | 113     | 132     | 161     |

Classifying the nations according to creed, we find divorces per 10,000 marriages :—

Among Catholics . . . . . 41  
Among Protestants . . . . . 123

In countries of mixed creeds the ratios were as follows :—

|                   | Divorces per 10,000 Marriages |                    |                 | Date    |
|-------------------|-------------------------------|--------------------|-----------------|---------|
|                   | Protestant Provinces          | Catholic Provinces | Mixed Provinces |         |
| U. Kingdom . . .  | 15                            | 1                  | ...             | 1871-80 |
| Bavaria . . .     | 61                            | 57                 | 223             | 1862-75 |
| Holland . . .     | 45                            | 9                  | ...             | 1850-64 |
| Switzerland . . . | 595                           | 128                | 505             | 1876-80 |
| Hungary . . .     | 283                           | 12                 | ...             | 1878-79 |

As regards cities Kummer gives the following :—

| Divorces per 10,000 Marriages |     |                          |
|-------------------------------|-----|--------------------------|
| Antwerp . . .                 | 26  | Liege . . . 115          |
| Augsburg . . .                | 15  | London . . . 40          |
| Berlin . . .                  | 103 | Munich . . . 153         |
| Breslau . . .                 | 307 | Nuremberg . . . 77       |
| Brussels . . .                | 124 | Paris . . . 250          |
| Bucharest . . .               | 443 | Prague . . . 18          |
| Christiania . . .             | 17  | Ratisbon . . . 63        |
| Cologne . . .                 | 64  | Rotterdam . . . 197      |
| Copenhagen . . .              | 292 | San Francisco . . . 2233 |
| Frankfort . . .               | 171 | Stockholm . . . 281      |
| Ghent . . .                   | 17  | Vienna . . . 233         |
| Hague . . .                   | 111 |                          |

The above results are for different periods between 1860 and 1875, usually averages of five years.

# DIVORCE

219

# DIVORCE

The proportion of marriages dissolved, with or without children, shows thus :—

|                      | France<br>(1851-80) | Italy<br>(1866-79) | Holland<br>(1876-78) | Switzerland<br>(1877-80) |
|----------------------|---------------------|--------------------|----------------------|--------------------------|
| With children . . .  | 62                  | 52                 | 35                   | 63                       |
| Without children . . | 38                  | 48                 | 65                   | 37                       |
| Total . . .          | 100                 | 100                | 100                  | 100                      |

In the term of five years ending 1880 the number of children corresponding to 100 divorce couples in Holland was 75, and in Sweden 130. Want of children in Holland seems a primary pretext for divorce ; not so much so elsewhere.

The ratio of persons divorced per million inhabitants yearly of each class was as follows :—

|                     | France<br>(1865-75) | Switzerland<br>(1876-80) | Sweden<br>(1876-80) |
|---------------------|---------------------|--------------------------|---------------------|
| Learned class . . . | 125                 | 470                      | 130                 |
| Merchants . . . .   | 135                 | 620                      | 218                 |
| Farmers . . . . .   | 20                  | 190                      | 20                  |
| Operatives . . . .  | 133                 | 490                      | 140                 |
| Gen. population . . | 55                  | 370                      | 46                  |

The number of divorced persons married in every 10,000 marriages, according to various returns down to 1880, averaged thus :—

|                     | Men | Women |
|---------------------|-----|-------|
| England . . . . .   | 7   | 5     |
| Holland . . . . .   | 10  | 8     |
| Hungary . . . . .   | 12  | 10    |
| Prussia . . . . .   | 22  | 24    |
| Denmark . . . . .   | 32  | 32    |
| Switzerland . . . . | 60  | 42    |

There is apparently some relationship between divorce and suicide in the various countries, viz. :—

|                    | Divorces<br>per 10,000<br>Marriages | Suicides per<br>Million<br>Inhabitants |                     | Divorces<br>per 10,000<br>Marriages | Suicides per<br>Million<br>Inhabitants |

| France . . . . .   | 91                                  | 156                                    | Paris . . . . .     | 250                                 | 422                                    |

## UNITED KINGDOM

The official report of the working of the Divorce Act in Great Britain during 30 years showed thus :—

| Period             | Number of<br>Petitions | Granted | Annual Average<br>per Million<br>Inhabitants |
|--------------------|------------------------|---------|----------------------------------------------|
| 1858-67 . . . . .  | 2,724                  | 1,492   | 6                                            |
| 1868-77 . . . . .  | 4,199                  | 1,971   | 7                                            |
| 1878-87 . . . . .  | 5,991                  | 3,832   | 13                                           |
| 30 Years . . . . . | 12,914                 | 7,295   | 9                                            |

The total of divorces and marriages in 20 years was :—

|                    | Number   |           | Ratio of<br>Divorces per<br>10,000 Marriages |
|--------------------|----------|-----------|----------------------------------------------|
|                    | Divorces | Marriages |                                              |
| England . . . . .  | 5,408    | 3,881,000 | 14.0                                         |
| Scotland . . . . . | 1,124    | 499,000   | 22.5                                         |
| Ireland . . . . .  | 55       | 492,000   | 1.1                                          |
| U. Kingdom         | 6,587    | 4,872,000 | ...                                          |

The returns for England and Wales showed as follows :—

| Period             | Divorces | Annual<br>Average | Per Million<br>Population |
|--------------------|----------|-------------------|---------------------------|
| 1867-71 . . . . .  | 724      | 145               | 6.2                       |
| 1872-76 . . . . .  | 1,050    | 210               | 9.0                       |
| 1877-81 . . . . .  | 1,743    | 349               | 13.0                      |
| 1882-86 . . . . .  | 1,891    | 378               | 14.0                      |
| 20 Years . . . . . | 5,408    | 271               | 11.0                      |

The returns for Scotland were as follows :—

| Period             | Divorces | Annual<br>Average | Per Million<br>Population |
|--------------------|----------|-------------------|---------------------------|
| 1867-71 . . . . .  | 177      | 35                | 11.0                      |
| 1872-76 . . . . .  | 220      | 44                | 12.5                      |
| 1877-81 . . . . .  | 337      | 67                | 15.3                      |
| 1882-86 . . . . .  | 390      | 78                | 21.0                      |
| 20 years . . . . . | 1,124    | 56                | 15.0                      |

The returns for Ireland were as follows :—

| Period             | Divorces | Annual<br>Average | Per Million<br>Population |
|--------------------|----------|-------------------|---------------------------|
| 1867-71 . . . . .  | 4        | 1                 | 0.2                       |
| 1872-76 . . . . .  | 13       | 3                 | 0.6                       |
| 1877-81 . . . . .  | 21       | 4                 | 0.8                       |
| 1882-86 . . . . .  | 17       | 3                 | 0.6                       |
| 20 years . . . . . | 55       | 3                 | 0.5                       |

The number of divorces compared with marriages thus :—

| Period             | England and Wales |          |                                |
|--------------------|-------------------|----------|--------------------------------|
|                    | Marriages         | Divorces | Divorces per<br>1000 Marriages |
| 1867-71 . . . . .  | 905,000           | 724      | 0.8                            |
| 1872-76 . . . . .  | 1,012,000         | 1,050    | 1.0                            |
| 1877-81 . . . . .  | 955,000           | 1,743    | 1.8                            |
| 1882-86 . . . . .  | 1,009,000         | 1,891    | 1.9                            |
| 20 years . . . . . | 3,881,000         | 5,408    | 1.4                            |
| Period             | Scotland          |          |                                |
|                    | Marriages         | Divorces | Divorces per<br>1000 Marriages |
| 1867-71 . . . . .  | 115,000           | 177      | 1.5                            |
| 1872-76 . . . . .  | 131,000           | 220      | 1.7                            |

## FRANCE

The number of divorces and judicial separations, according to Bertillon, compares with marriages thus :—

| Period   | Divorces | Marriages  | Per 10,000 Marriages | Divorce Yearly | Per Million Pop. |
|----------|----------|------------|----------------------|----------------|------------------|
| 1802-10  | 4,853    | 2,029,000  | 23                   | 539            | 20               |
| 1811-19  | 1,561    | 2,136,000  | 7                    | 173            | 6                |
| 1820-29  | 2,730    | 2,411,000  | 11                   | 273            | 9                |
| 1830-39  | 5,173    | 3,013,000  | 17                   | 470            | 14               |
| 1841-50  | 7,687    | 2,800,000  | 27                   | 769            | 22               |
| 1851-60  | 12,835   | 2,878,000  | 44                   | 1,284          | 35               |
| 1861-70  | 19,884   | 2,942,000  | 66                   | 1,988          | 52               |
| 1871-80  | 22,817   | 2,952,000  | 76                   | 2,282          | 60               |
| 1881-86  | 20,608   | 1,704,000  | 121                  | 3,435          | 90               |
| 85 years | 98,148   | 22,865,000 | 43                   | 1,154          | 38               |

The following table shows the number of petitions for divorce compared with the divorces granted from 1841 to 1880 :—

| Period  | Petitions | Granted | Ratio Granted per Cent. | Percentage of Application |         |
|---------|-----------|---------|-------------------------|---------------------------|---------|
|         |           |         |                         | By Husband                | By Wife |
| 1841-50 | 10,620    | 7,687   | 72                      | 7                         | 93      |
| 1851-60 | 17,210    | 12,835  | 74                      | 9                         | 91      |
| 1861-70 | 26,140    | 19,884  | 76                      | 11                        | 89      |
| 1871-80 | 29,550    | 22,817  | 77                      | 13                        | 87      |

The various causes alleged in petitions for divorce were :—

|               | 1841-50 | 1851-60 | 1861-70 | 1871-80 | 40 Years |
|---------------|---------|---------|---------|---------|----------|
| Cruelty . . . | 9,720   | 15,690  | 24,840  | 28,500  | 78,750   |
| Adultery . .  | 655     | 1,170   | 1,005   | 735     | 3,565    |
| Various . . . | 245     | 350     | 295     | 315     | 1,205    |
| Total         | 10,620  | 17,210  | 26,140  | 29,550  | 83,520   |

In several cases there were double charges and cross-bills, which makes the above classification difficult.

Altogether the charges and cross-charges of adultery in forty years were as follows :—

| Period         | Alleged Adultery Committed by |       |       | Yearly Average |
|----------------|-------------------------------|-------|-------|----------------|
|                | Husband                       | Wife  | Total |                |
| 1841-50 . . .  | 565                           | 525   | 1,090 | 109            |
| 1851-60 . . .  | 910                           | 1,135 | 2,045 | 204            |
| 1861-70 . . .  | 870                           | 1,485 | 2,355 | 236            |

| 40 years . . . | 3,215                         | 4,675 | 7,890 | 197            |

The occupations of persons applying for divorce were :—

|               | 1841-50 | 1851-60 | 1861-70 | 1871-80 | 40 Years |
|---------------|---------|---------|---------|---------|----------|
| Professions . | 3,245   | 4,280   | 4,900   | 4,890   | 17,315   |
| Merchants .   | 2,195   | 3,490   | 5,385   | 5,110   | 16,180   |
| Farmers . .   | 1,840   | 2,690   | 3,670   | 3,860   | 12,060   |
| Labourers .   | 2,380   | 6,050   | 10,550  | 13,015  | 31,995   |
| Various . .   | 960     | 700     | 1,635   | 2,675   | 5,970    |
| Total . . .   | 10,620  | 17,210  | 26,140  | 29,550  | 83,520   |

The condition of the parents, as to with or without children, was as follows :—

| Period         | Had Children | Had None | Not Known | Total  | Ratio with Children |
|----------------|--------------|----------|-----------|--------|---------------------|
| 1841-50 . . .  | 5,910        | 3,850    | 860       | 10,620 | 56                  |
| 1851-60 . . .  | 10,150       | 6,660    | 400       | 17,210 | 59                  |
| 1861-70 . . .  | 16,440       | 9,610    | 90        | 26,140 | 63                  |
| 1871-80 . . .  | 18,750       | 10,800   | ...       | 29,550 | 64                  |
| 40 years . . . | 51,250       | 30,920   | 1,350     | 83,520 | 62                  |

The number of marriages and that of divorces compared thus :—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1867-71 . . .  | 1,391,000 | 9,850    | 7.1                         |
| 1872-76 . . .  | 1,569,000 | 11,384   | 7.3                         |
| 1877-81 . . .  | 1,403,000 | 13,132   | 9.4                         |
| 1882-86 . . .  | 1,422,000 | 22,750   | 16.0                        |
| 20 years . . . | 5,785,000 | 57,116   | 9.9                         |

The French Government published a table of divorces granted in five years ending December 1889, in all 15,521, viz. :—

|                           | Number | Annual Average |
|---------------------------|--------|----------------|
| Paris . . . . .           | 4,607  | 921            |
| Towns . . . . .           | 7,047  | 1,410          |
| Rural districts . . . . . | 3,867  | 773            |
| Total . . . . .           | 15,521 | 3,104          |

The ages of the divorced persons in the said five years were :—

| Age                | Men    | Women  | Total  | Ratio |
|--------------------|--------|--------|--------|-------|
| Under 25 . . . . . | 198    | 1,313  | 1,511  | 4.9   |
| 25-35 . . . . .    | 3,926  | 6,096  | 10,022 | 32.2  |
| 35-40 . . . . .    | 3,669  | 3,155  | 6,824  | 22.0  |
| 40-50 . . . . .    | 4,696  | 3,331  | 8,027  | 25.9  |
| Over 50 . . . . .  | 3,032  | 1,626  | 4,658  | 15.0  |
| Total . . . . .    | 15,521 | 15,521 | 31,042 | 100.0 |

The returns for Paris in twenty years to December 1886 were :—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1867-71 . . .  | 69,000    | 2,148    | 31.1                        |
| 1872-76 . . .  | 96,000    | 2,733    | 28.4                        |
| 1877-81 . . .  | 96,000    | 3,177    | 33.0                        |
| 1882-86 . . .  | 103,000   | 3,228    | 31.3                        |
| 20 years . . . | 364,000   | 11,286   | 30.9                        |

In 1889 there were in France 23 divorces in 10,000 couples, and at Paris 100. The mean duration of the dissolved marriages was 15 years in 1884, and fell to 13 years in 1889.

## GERMANY

The returns are incomplete, and may be summed up thus :—

|                  | 1867-71 | 1872-76 | 1877-81 | 1882-86 | 20 Years |
|------------------|---------|---------|---------|---------|----------|
| Prussia . . .    | ...     | ...     | ...     | 17,450  | ...      |
| Bavaria . . .    | 1,400   | 1,170   | ...     | 1,189   | ...      |
| Saxony . . .     | 2,342   | 3,234   | 3,535   | 4,526   | 13,637   |
| Wurtemberg . .   | 518     | 593     | 609     | 707     | 2,427    |
| Baden . . .      | 170     | 305     | 396     | 522     | 1,393    |
| Hesse . . .      | 159     | 189     | 225     | 321     | 894      |
| Alsace . . .     | ...     | ...     | 398     | 629     | ...      |
| Hamburg . . .    | ...     | ...     | ...     | 1,115   | ...      |
| Other States . . | ...     | ...     | ...     | 2,681   | ...      |
| Total . . .      | ...     | ...     | ...     | 29,140  | ...      |

If the ratio for Prussia be supposed to have been the same as regards the whole of Germany in previous periods as in the years 1882-86, namely, 60 per cent., and the minor States, for which we have no returns, in like manner, the whole number of divorces for Germany will stand thus :—

|                  | 1867-71 | 1872-76 | 1877-81 | 1882-86 | 20 Years |
|------------------|---------|---------|---------|---------|----------|
| Prussia . . .    | 11,070  | 13,251  | 14,486  | 17,450  | 56,257   |
| Bavaria . . .    | 1,400   | 1,170   | 1,253   | 1,189   | 5,012    |
| Saxony . . .     | 2,342   | 3,234   | 3,535   | 4,526   | 13,637   |
| Wurtemberg . .   | 518     | 593     | 609     | 707     | 2,427    |
| Baden . . .      | 170     | 305     | 396     | 522     | 1,393    |
| Small States . . | 2,950   | 3,532   | 3,864   | 4,746   | 15,092   |
| Total . . .      | 18,450  | 22,085  | 24,143  | 29,140  | 93,818   |

According to the Census of 1880, the number and ratio of divorced persons living in the various States was as follows :—

|                | Number | Per 100,000 Inhabitants |               | Number | Per 100,000 Inhabitants |
|----------------|--------|-------------------------|---------------|--------|-------------------------|
| Prussia . . .  | 37,162 | 135                     | Baden . . .   | 825    | 55                      |
| Saxony . . .   | 8,121  | 270                     | Hesse . . .   | 612    | 65                      |
| Wurtemberg . . | 3,637  | 184                     | Brunswick . . | 558    | 160                     |
| Bavaria . . .  | 3,108  | 60                      | Weimar . . .  | 589    | 190                     |
| Hamburg . . .  | 2,883  | 634                     | Various . . . | 3,208  | 107                     |
| Alsace . . .   | 1,359  | 85                      | All Germany   | 62,062 | 136                     |

The comparison between marriages and divorces in the various States during the five years ending 1886 showed thus :—

|                 | Marriages | Divorces | Divorces per 1000 Marriages |
|-----------------|-----------|----------|-----------------------------|
| Prussia . . . . | 1,126,000 | 17,450   | 15.5                        |
| Bavaria . . . . | 204,000   | 1,189    | 5.9                         |
| Saxony . . . .  | 142,000   | 4,526    | 32.0                        |
| Wurtemberg . .  | 64,000    | 707      | 11.0                        |
| Baden . . . .   | 53,000    | 522      | 9.8                         |
| Hesse . . . .   | 34,000    | 321      | 9.4                         |
| Alsace . . . .  | 52,000    | 629      | 12.1                        |
| Hamburg . . . . | 22,000    | 1,115    | 50.7                        |
| Various . . . . | 109,000   | 2,681    | 24.5                        |
| Total . . . .   | 1,806,000 | 29,140   | 16.2                        |

The following table compares marriages and divorces for all Germany :—

| Period           | Marriages | Divorces | Divorces per 1000 Marriages |
|------------------|-----------|----------|-----------------------------|
| 1867-71 . . . .  | 1,756,000 | 18,450   | 10.5                        |
| 1872-76 . . . .  | 1,994,000 | 22,085   | 11.0                        |
| 1877-81 . . . .  | 1,701,000 | 24,143   | 14.2                        |
| 1882-86 . . . .  | 1,805,000 | 29,140   | 16.2                        |
| 20 years . . . . | 7,256,000 | 93,818   | 13.0                        |

At Berlin the number of marriages and of divorces in twenty years showed as follows :—

| Period           | Marriages | Divorces | Divorces per 1000 Marriages |
|------------------|-----------|----------|-----------------------------|
| 1867-71 . . . .  | 42,000    | 1,988    | 47.0                        |
| 1872-76 . . . .  | 64,000    | 2,360    | 36.8                        |
| 1877-81 . . . .  | 53,000    | 2,574    | 48.5                        |
| 1882-86 . . . .  | 66,000    | 3,830    | 58.1                        |
| 20 years . . . . | 225,000   | 10,752   | 47.7                        |

Berlin divorces in the five years ending 1884 showed thus :—

| <i>Cause</i>     | <i>Husband's Occupation</i> | <i>Religion</i>    |                     |
|------------------|-----------------------------|--------------------|---------------------|
| Adultery . . .   | 1,071                       | Merchants . . 688  | Protestants . 2,585 |
| Desertion . .    | 817                         | Artisans . . 1,033 | Catholics . . 64    |
| Mutual consent } | 746                         | Labourers . . 713  | Jews . . . 97       |
| Various . . .    | 533                         | Various . . . 733  | Various . . . 421   |
| Total . . .      | 3,167                       | Total . . .        | 3,167               |

Of the above couples 45 per cent. had children, 55 per cent. had none.

Returns for Saxony, covering 14 years down to 1879, give the mean duration of marriages dissolved by divorce as follows :—

| Years         | Number | Ratio | Cause     | 13 Years |
|---------------|--------|-------|-----------|----------|
| Under 5 . . . | 2,737  | 33.7  | Adultery  | 2,571    |
| 5-10 . . . .  | 2,454  | 30.2  | Desertion | 2,273    |
| 10-20 . . . . | 2,289  | 28.2  | Cruelty   | 1,807    |
| Over 20 . . . | 636    | 7.9   | Various   | 774      |
| Total . . . . | 8,116  | 100.0 | Total     | 7,425    |

## HUNGARY

Marriages and divorces compared as follows:—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1877-81 . . .  | 754,000   | 5,246    | 7.0                         |
| 1882-86 . . .  | 825,000   | 4,835    | 5.9                         |
| 10 years . . . | 1,579,000 | 10,081   | 6.4                         |

The returns for Buda-Pesth showed thus:—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1877-81 . . .  | 13,000    | 91       | 7.0                         |
| 1882-86 . . .  | 19,000    | 129      | 6.8                         |
| 10 years . . . | 32,000    | 220      | 6.9                         |

## ROUMANIA

The returns are to the following effect:—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1871-75 . . .  | 157,000   | 1,560    | 9.9                         |
| 1876-80 . . .  | 182,000   | 1,932    | 10.6                        |
| 10 years . . . | 339,000   | 3,492    | 10.3                        |

## RUSSIA

The returns of marriages and divorces in the Greek Church were as follows:—

| Period         | Marriages  | Divorces | Divorces per 1000 Marriages |
|----------------|------------|----------|-----------------------------|
| 1867-71 . . .  | 2,832,000  | 3,910    | 1.4                         |
| 1872-76 . . .  | 3,031,000  | 4,322    | 1.4                         |
| 1877-81 . . .  | 2,846,000  | 4,705    | 1.7                         |
| 1882-86 . . .  | 3,111,000  | 5,474    | 1.8                         |
| 20 years . . . | 11,820,000 | 18,411   | 1.5                         |

Those in the Protestant congregations were as follows:—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1867-71 . . .  | 104,000   | 687      | 6.5                         |
| 1872-76 . . .  | 116,000   | 773      | 6.7                         |
| 1877-81 . . .  | 115,000   | 778      | 6.8                         |
| 1882-86 . . .  | 129,000   | 870      | 6.7                         |
| 20 years . . . | 464,000   | 3,108    | 6.7                         |

The returns for Poland showed as follows:—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1867-71 . . .  | 176,000   | 809      | 4.6                         |
| 1872-76 . . .  | 208,000   | 1,073    | 5.2                         |
| 1877-81 . . .  | 262,000   | 1,432    | 5.5                         |
| 1882-86 . . .  | 308,000   | 1,725    | 5.6                         |
| 20 years . . . | 954,000   | 5,039    | 5.3                         |

The returns for Finland are as follows:—

| Period        | Marriages | Divorces | Divorces per 1000 Marriages |
|---------------|-----------|----------|-----------------------------|
| 1877-81 . . . | 76,000    | 238      | 3.2                         |
| 1882-86 . . . | 81,000    | 219      | 2.7                         |

The gross total for European Russia was as follows:—

| Period         | Marriages  | Divorces | Divorces per 1000 Marriages |
|----------------|------------|----------|-----------------------------|
| 1867-71 . . .  | 3,112,000  | 5,406    | 1.7                         |
| 1872-76 . . .  | 3,355,000  | 6,168    | 1.8                         |
| 1877-81 . . .  | 3,299,000  | 7,153    | 2.2                         |
| 1882-86 . . .  | 3,629,000  | 8,288    | 2.3                         |
| 20 years . . . | 13,395,000 | 27,015   | 2.0                         |

The causes for divorces granted in the Greek Church were:—

|               | 1866-75 | 1876-85 | 20 Years | Ratio |
|---------------|---------|---------|----------|-------|
| Adultery . .  | 426     | 1,302   | 1,728    | 9.3   |
| Exile . . .   | 1,541   | 2,745   | 4,286    | 23.2  |
| Disappearance | 5,872   | 5,606   | 11,478   | 62.3  |
| Sterility . . | 70      | 178     | 248      | 1.3   |
| Consanguinity | 100     | 85      | 185      | 1.0   |
| Bigamy . . .  | 223     | 304     | 527      | 2.9   |
| Total . . .   | 8,232   | 10,220  | 18,452   | 100.0 |

Marriages and divorces in Poland, according to creed, were :—

|                   | Marriages |         |         | Divorces |         |       | Divorces per 1000 Marriages |         |       |
|-------------------|-----------|---------|---------|----------|---------|-------|-----------------------------|---------|-------|
|                   | 1867-76   | 1877-86 | Total   | 1867-76  | 1877-86 | Total | 1867-76                     | 1877-86 | Total |
| Roman Catholics . | 343,000   | 501,000 | 844,000 | 330      | 340     | 670   | 1.0                         | 0.7     | 0.8   |
| Protestants . . . | 30,000    | 37,000  | 67,000  | 170      | 205     | 375   | 5.7                         | 5.5     | 5.6   |
| Jews, &c. . . .   | 11,000    | 32,000  | 43,000  | 1,382    | 2,612   | 3,994 | 125.6                       | 81.5    | 92.8  |
| Total . . .       | 384,000   | 570,000 | 954,000 | 1,882    | 3,157   | 5,039 | 4.9                         | 5.5     | 5.3   |

DENMARK

The returns are as follows :—

| Period   | Marriages | Divorces | Divorces per 1000 Marriages |
|----------|-----------|----------|-----------------------------|
| 1871-76  | 89,000    | 3,156    | 35.3                        |
| 1877-81  | 75,000    | 3,046    | 40.6                        |
| 11 Years | 164,000   | 6,202    | 37.5                        |

NORWAY

The returns of marriages and divorces show thus :—

| Period   | Marriages | Divorces | Divorces per 1000 Marriages |
|----------|-----------|----------|-----------------------------|
| 1872-76  | 67,000    | 162      | 2.4                         |
| 1877-81  | 65,000    | 195      | 3.0                         |
| 1882-84  | 39,000    | 120      | 3.1                         |
| 13 Years | 171,000   | 477      | 2.8                         |

SWEDEN

The number of marriages and of divorces was as follows :—

| Period   | Marriages | Divorces | Divorces per 1000 Marriages |
|----------|-----------|----------|-----------------------------|
| 1867-71  | 124,000   | 619      | 5.0                         |
| 1872-76  | 154,000   | 953      | 6.2                         |
| 1877-81  | 146,000   | 1,053    | 7.2                         |
| 1882-86  | 149,000   | 1,109    | 7.4                         |
| 20 years | 573,000   | 3,734    | 6.5                         |

The returns for Stockholm were as follows :—

| Period   | Marriages | Divorces | Divorces per 1000 Marriages |
|----------|-----------|----------|-----------------------------|
| 1867-71  | 4,810     | 146      | 30.2                        |
| 1872-76  | 6,930     | 190      | 27.4                        |
| 1877-81  | 7,512     | 285      | 38.0                        |
| 1882-86  | 9,280     | 306      | 32.8                        |
| 20 years | 28,532    | 927      | 32.5                        |

The causes of divorce in Sweden were as follows :—

| Causes            | Number | Ratio |
|-------------------|--------|-------|
| Adultery . . . .  | 537    | 14.4  |
| Desertion . . . . | 2,195  | 58.6  |
| Various . . . . . | 1,002  | 27.0  |
| Total . . . . .   | 3,734  | 100.0 |

The above is the aggregate for twenty years ending 1886.

BELGIUM

The number of marriages and of divorces was as follows :—

| Period   | Marriages | Divorces | Divorces per 1000 Marriages |
|----------|-----------|----------|-----------------------------|
| 1831-40  | 302,000   | 135      | 0.4                         |
| 1841-50  | 290,000   | 224      | 0.8                         |
| 1851-60  | 335,000   | 412      | 1.2                         |
| 1861-70  | 363,000   | 866      | 2.4                         |
| 1871-80  | 389,000   | 1,923    | 4.9                         |
| 1881-86  | 237,000   | 1,785    | 7.5                         |
| 56 years | 1,916,000 | 5,345    | 2.8                         |

In order to compare Belgium with the other countries in the twenty years ending 1886, the following table will be useful :—

| Period             | Marriages | Divorces | Divorces per 1000 Marriages |
|--------------------|-----------|----------|-----------------------------|
| 1867-71 . . . . .  | 185,000   | 620      | 3.4                         |
| 1872-76 . . . . .  | 198,000   | 899      | 4.5                         |
| 1877-81 . . . . .  | 192,000   | 1,189    | 6.2                         |
| 1882-86 . . . . .  | 197,000   | 1,501    | 7.6                         |
| 20 years . . . . . | 772,000   | 4,209    | 5.5                         |

By the Census of 1880 it appeared that 43 persons per 100,000 of the population were divorced, viz., 1028 men and 1347 women. The growth of divorce, especially in cities, appears as follows; the Belgian cities included below are Brussels, Antwerp, Ghent, and Liege :—

| Year | Cities    |          |                             | All Belgium |          |                             |
|------|-----------|----------|-----------------------------|-------------|----------|-----------------------------|
|      | Marriages | Divorces | Divorces per 1000 Marriages | Marriages   | Divorces | Divorces per 1000 Marriages |
| 1870 | 4,735     | 41       | 8.9                         | 35,300      | 81       | 2.3                         |
| 1875 | 5,337     | 64       | 12.0                        | 39,050      | 126      | 3.2                         |
| 1880 | 5,219     | 102      | 19.6                        | 38,900      | 214      | 5.5                         |
| 1885 | 5,503     | 129      | 23.5                        | 39,900      | 230      | 5.8                         |

HOLLAND

Marriages and divorces during twenty years were thus :—

| Period             | Marriages | Divorces | Divorces per 1000 Marriages |
|--------------------|-----------|----------|-----------------------------|
| 1867-71 . . . . .  | 144,000   | 699      | 4.8                         |
| 1872-76 . . . . .  | 157,000   | 811      | 5.2                         |
| 1877-81 . . . . .  | 153,000   | 1,161    | 7.6                         |
| 1882-86 . . . . .  | 150,000   | 1,571    | 10.5                        |
| 20 years . . . . . | 604,000   | 4,242    | 7.0                         |

SWITZERLAND

The marriages and divorces were as follows :—

| Period             | Marriages | Divorces | Divorces per 1000 Marriages |
|--------------------|-----------|----------|-----------------------------|
| 1877-81 . . . . .  | 101,000   | 4,811    | 47.6                        |
| 1882-86 . . . . .  | 100,000   | 4,588    | 45.9                        |
| 10 years . . . . . | 201,000   | 9,399    | 46.7                        |

The returns of age were in 1880 as follows :—

| Years              | Husband | Wife | Total | Ratio |
|--------------------|---------|------|-------|-------|
| Under 30 . . . . . | 144     | 217  | 361   | 21.1  |
| 30-40 . . . . .    | 302     | 287  | 589   | 34.5  |
| 40-50 . . . . .    | 211     | 178  | 389   | 22.7  |
| Over 50 . . . . .  | 199     | 174  | 373   | 21.7  |
| Total . . . . .    | 856     | 856  | 1,712 | 100.0 |

The occupations of persons divorced are shown thus :—

|                          | Per Million Inhabitants |
|--------------------------|-------------------------|
| Agriculturists . . . . . | 190                     |
| Mechanics . . . . .      | 510                     |
| Merchants . . . . .      | 620                     |

The duration of marriage was as follows :—

| Years             | Marriages | Ratio |
|-------------------|-----------|-------|
| Under 2 . . . . . | 81        | 9.5   |
| 2-5 . . . . .     | 220       | 25.4  |
| 5-10 . . . . .    | 230       | 27.0  |
| 10-20 . . . . .   | 235       | 27.6  |
| Over 20 . . . . . | 90        | 10.5  |
| Total . . . . .   | 856       | 100.0 |

Youthful marriages seem most exposed to divorce, the ratios being as follows :—

| Marrying Age       | Divorces per 10,000 Marriages |
|--------------------|-------------------------------|
| Under 20 . . . . . | 620                           |
| 20-40 . . . . .    | 330                           |
| Over 40 . . . . .  | 320                           |

UNITED STATES

The following table compares marriages with divorces in the only States in which the former are fully reported, viz. :—Connecticut, District of Columbia, Massachusetts, Ohio, Rhode Island, and Vermont :—

| Period              | Aggregate of Six States |          |                             |
|---------------------|-------------------------|----------|-----------------------------|
|                     | Marriages               | Divorces | Divorces per 1000 Marriages |
| 1867-71 . . . . .   | 258,000                 | 10,753   | 41                          |
| 1872-76 . . . . .   | 261,000                 | 12,577   | 48                          |
| 1877-81 . . . . .   | 263,000                 | 13,929   | 53                          |
| 1882-86 . . . . .   | 296,000                 | 16,308   | 55                          |
| 20 years* . . . . . | 1,078,000               | 53,567   | 50                          |

\* The ratio of divorces to marriages in the United States may be estimated from the above six States, which, during twenty years, had a marriage-rate of 9 per 1000 inhabitants.

The several States in their aggregate returns for twenty years showed as follows :—

|                                | Marriages | Divorces | Divorces per 1000 Marriages |
|--------------------------------|-----------|----------|-----------------------------|
| Connecticut . . . . .          | 97,000    | 8,542    | 88                          |
| District of Columbia . . . . . | 24,000    | 1,105    | 45                          |
| Massachusetts . . . . .        | 308,000   | 9,853    | 32                          |
| Ohio . . . . .                 | 544,000   | 26,367   | 48                          |
| Rhode Island . . . . .         | 50,000    | 4,462    | 89                          |
| Vermont . . . . .              | 55,000    | 3,238    | 59                          |
| Total . . . . .                | 1,078,000 | 53,567   | 50                          |

The number of divorces yearly compared with the mean population of the great sections of the United States was approximately as follows :—

| States               | Divorces Yearly per 100,000 Population |         |         |         |          |
|----------------------|----------------------------------------|---------|---------|---------|----------|
|                      | 1867-71                                | 1872-76 | 1877-81 | 1882-86 | 20 Years |
| N. England . . . . . | 52                                     | 54      | 53      | 52      | 53       |
| Middle . . . . .     | 17                                     | 15      | 16      | 19      | 17       |
| South . . . . .      | 13                                     | 17      | 24      | 31      | 24       |
| West . . . . .       | 43                                     | 50      | 54      | 65      | 60       |
| The Union . . . . .  | 30                                     | 32      | 35      | 42      | 36       |

The figures for twenty years will, therefore, stand thus :—

| Period             | Marriages | Divorces | Divorces per 1000 Marriages |
|--------------------|-----------|----------|-----------------------------|
| 1867-71 . . . . .  | 1,710,000 | 53,574   | 31.3                        |
| 1872-76 . . . . .  | 1,980,000 | 68,547   | 34.6                        |
| 1877-81 . . . . .  | 2,210,000 | 89,284   | 40.4                        |
| 1882-86 . . . . .  | 2,430,000 | 117,311  | 48.3                        |
| 20 years . . . . . | 8,330,000 | 328,716  | 39.5                        |

The causes for divorces granted were as follows :—

| Cause                 | Summary of Divorces Granted |         |         | Ratio |
|-----------------------|-----------------------------|---------|---------|-------|
|                       | To Husband                  | To Wife | Total   |       |
| Adultery . . . . .    | 38,184                      | 29,502  | 67,686  | 20.6  |
| Cruelty . . . . .     | 6,122                       | 45,473  | 51,595  | 15.7  |
| Desertion . . . . .   | 51,485                      | 75,191  | 126,676 | 38.5  |
| Drunkenness . . . . . | 1,434                       | 12,432  | 13,866  | 4.3   |
| Neglect . . . . .     | 7,426                       | 40,374  | 47,800  | 14.5  |
| Various . . . . .     | 7,889                       | 13,204  | 21,093  | 6.4   |
| Total . . . . .       | 112,540                     | 216,176 | 328,716 | 100.0 |

The average duration of marriage before divorce was :—

| Cause                 | Years of Marriage before Divorce Granted |         |       |
|-----------------------|------------------------------------------|---------|-------|
|                       | To Husband                               | To Wife | Total |
| Adultery . . . . .    | 7.8                                      | 9.5     | 8.6   |
| Cruelty . . . . .     | 9.8                                      | 9.2     | 9.3   |
| Desertion . . . . .   | 9.8                                      | 9.2     | 9.4   |
| Drunkenness . . . . . | 10.9                                     | 11.0    | 11.0  |
| Neglect . . . . .     | 8.7                                      | 9.3     | 9.2   |
| Various . . . . .     | 7.6                                      | 7.2     | 7.4   |
| All causes . . . . .  | 9.0                                      | 9.3     | 9.2   |

# DIVORCE

225

# DIVORCE

The number of divorces compared with the medium population of each State in 1870-80 thus :—

|                                | Number of Divorces |               |               |                |                | Yearly Average per 100,000 Pop. |
|--------------------------------|--------------------|---------------|---------------|----------------|----------------|---------------------------------|
|                                | 1867-71            | 1871-76       | 1877-81       | 1881-86        | Twenty Years   |                                 |
| Maine . . . . .                | 1,948              | 2,101         | 2,511         | 1,852          | 8,412          | 67                              |
| New Hampshire . . . . .        | 781                | 1,173         | 1,392         | 1,633          | 4,979          | 75                              |
| Vermont . . . . .              | 830                | 851           | 798           | 759            | 3,238          | 50                              |
| Rhode Island . . . . .         | 938                | 1,030         | 1,197         | 1,297          | 4,462          | 89                              |
| Connecticut . . . . .          | 2,314              | 2,319         | 1,923         | 1,986          | 8,542          | 74                              |
| Massachusetts . . . . .        | 1,781              | 2,448         | 2,624         | 3,000          | 9,853          | 30                              |

## CANADA

The number of marriages is not known, but if we assume the medium rate of 8 per 1000 inhabitants (as compared with 7½ in Australia and 9 in the United States), the record will stand thus:—

| Period         | Marriages | Divorces | Divorces per 1000 Marriages |
|----------------|-----------|----------|-----------------------------|
| 1867-71 . . .  | 31,000    | 15       | 0.5                         |
| 1872-76 . . .  | 33,000    | 16       | 0.5                         |
| 1877-81 . . .  | 35,000    | 33       | 0.9                         |
| 1882-86 . . .  | 37,000    | 52       | 1.4                         |
| 20 years . . . | 136,000   | 116      | 0.9                         |

## AUSTRALIA

The returns for five years ending 1888 were as follows:—

| Colony             | Marriages | Divorces | Divorces per 1000 Marriages |
|--------------------|-----------|----------|-----------------------------|
| New South Wales .  | 38,400    | 135      | 3.5                         |
| Victoria . . .     | 34,000    | 93       | 2.7                         |
| Queensland . . .   | 12,500    | 8        | 0.6                         |
| South Australia .  | 12,400    | 115      | 9.3                         |
| New Zealand . . .  | 20,100    | 72       | 3.6                         |
| Tasmania . . .     | 5,500     | 12       | 2.2                         |
| West Australia . . | 1,500     | 2        | 1.4                         |
| Total . . .        | 124,400   | 437      | 3.5                         |

## DOCKS AND HARBOURS

The sums spent on docks and harbours in recent years are as follows:—

|                  | £         |                   | £          |
|------------------|-----------|-------------------|------------|
| Alexandria . . . | 2,550,000 | Glasgow . . .     | 7,600,000  |
| Amsterdam . . .  | 2,600,000 | Hamburg . . .     | 5,500,000  |
| Antwerp . . .    | 6,800,000 | Havre . . .       | 6,400,000  |
| Bordeaux . . .   | 1,700,000 | Holyhead . . .    | 2,000,000  |
| Boulogne . . .   | 1,200,000 | Hull . . .        | 1,200,000  |
| Bremen . . .     | 1,800,000 | Liverpool . . .   | 18,200,000 |
| Bristol . . .    | 900,000   | London . . .      | 20,100,000 |
| Calais . . .     | 1,500,000 | Marseilles . . .  | 3,400,000  |
| Cette . . .      | 1,800,000 | Plymouth . . .    | 1,550,000  |
| Cherbourg . . .  | 3,500,000 | Rotterdam . . .   | 2,400,000  |
| Dieppe . . .     | 1,200,000 | St. Nazaire . . . | 1,800,000  |
| Dundee . . .     | 800,000   | Trieste . . .     | 1,100,000  |
| Dunkirk . . .    | 4,600,000 |                   |            |

The area under docks and average dues are:—

|                 | Docks, Acres | Dock-Dues on Vessels of 1000 Tons |
|-----------------|--------------|-----------------------------------|
| London . . .    | 690          | £125                              |
| Liverpool . . . | 560          | 133                               |
| Antwerp . . .   | 105          | 93                                |
| Cardiff . . .   | 113          | ...                               |
| Trieste . . .   | 86           | ...                               |

The largest lock in the world is that of Cardiff, 600 feet long by 80 feet in width; ordinary depth of water, 36 feet.

Dock-dues in Hamburg for a vessel of 1000 tons would be £110, in Amsterdam £81. As regards length of quay-wall, Marseilles has 8 miles, Amsterdam 7, Antwerp 7, Trieste 3, Rotterdam 3, Genoa 2.

As regards warehouses, Marseilles has 20 acres, Trieste 7, Genoa 4. Depth of water in docks, 60 feet at Antwerp, 36 at Cardiff, 30 at Trieste, 25 at Amsterdam. The new dock at Barry, in the Bristol Channel, covers 70 acres, depth of water 34 feet.

The following table shows the depth of water and mileage of quay-wall at the principal French ports:—

|                  | Feet, Water | Quay, Miles |                   | Feet, Water | Quay, Miles |
|------------------|-------------|-------------|-------------------|-------------|-------------|
| Marseilles . . . | 23          | 8.3         | St. Nazaire . . . | 22          | 2.8         |
| Havre . . .      | 26          | 8.0         | Boulogne . . .    | 26          | 2.0         |
| Cette . . .      | 22          | 4.8         | Bordeaux . . .    | 19          | 2.0         |
| Dunkirk . . .    | 20          | 3.5         | Dieppe . . .      | 18          | 1.8         |
| Rouen . . .      | 17          | 3.0         | Calais . . .      | 25          | 1.5         |

The French Government has expended the following sums on the above ports:—

|                        |              |
|------------------------|--------------|
| Down to 1876 . . . . . | £ 24,800,000 |
| 1876-90 . . . . .      | 22,600,000   |
| Total . . . . .        | 47,400,000   |

The following are some of the finest breakwaters:—

| Name             | Date      | Yards Long | Cost, £   | Builder  |
|------------------|-----------|------------|-----------|----------|
| Plymouth . . .   | 1812-41   | 1,720      | 1,550,000 | Rennie   |
| Cherbourg . . .  | 1784-1857 | 4,100      | 3,200,000 | ...      |
| Delaware . . .   | ...       | 1,200      | ...       | ...      |
| Alexandria . . . | 1873-76   | 2,000      | 2,550,000 | Greenway |

The Plymouth breakwater has the same quantity of stone, 3,800,000 tons, as the great pyramid of Cheops, and encloses 1120 acres of harbour; Cherbourg, 1927 acres; and Delaware, 420 acres.

## DRUGS AND CHEMICALS

The British trade returns show imports under this head thus:—

|                              | Value, £  |            |            |            |
|------------------------------|-----------|------------|------------|------------|
|                              | 1880      | 1870       | 1860       | 1858       |
| Bones . . .                  | 300,000   | 630,000    | 530,000    | 390,000    |
| Caoutchouc . . .             | 470,000   | 1,600,000  | 2,400,000  | 2,600,000  |
| Chemicals, sundry . . .      | ...       | 530,000    | 1,140,000  | 1,300,000  |
| Chinchona . . .              | ...       | ...        | 1,180,000  | 550,000    |

| <b>Total . . . . .</b>        | <b>4,670,000</b> | <b>7,520,000</b> | <b>12,670,000</b> | <b>12,430,000</b> |

*Alkali.*—The annual production in 1882 was as follows :—

|                                     | Tons           |
|-------------------------------------|----------------|
| Great Britain . . . . .             | 432,000        |
| France . . . . .                    | 127,000        |
| Germany . . . . .                   | 101,000        |
| Austria . . . . .                   | 40,000         |
| Belgium, United States, &c. . . . . | 11,000         |
| <b>Total . . . . .</b>              | <b>711,000</b> |

The production in Great Britain has quadrupled since 1850, when it was 104,000 tons. The exportation from Great Britain showed the following quantities and prices :—

| Year           | Tons    | Value, £ per Ton |
|----------------|---------|------------------|
| 1853 . . . . . | 53,000  | 9.0              |
| 1860 . . . . . | 102,000 | 9.5              |
| 1870 . . . . . | 193,000 | 8.0              |
| 1880 . . . . . | 344,000 | 7.0              |
| 1888 . . . . . | 317,000 | 5.1              |

*Arsenic.*—In Styria in 1875 two men were seen to eat 30 centigrammes of yellow arsenic without injury.

*Blacking.*—For boots. The consumption in England in 1880 amounted to a value of £560,000.

*Chinchona or Peruvian Bark.*—The annual production was in 1882 as follows :—

|                        | Lbs.              |
|------------------------|-------------------|
| Peru . . . . .         | 8,900,000         |
| India . . . . .        | 2,200,000         |
| Java . . . . .         | 110,000           |
| Jamaica . . . . .      | 21,000            |
| <b>Total . . . . .</b> | <b>11,231,000</b> |

The Indian plantations showed as follows in 1880 :—

| Planted                | Locality             | Trees             | Crops, Lbs. Bark |
|------------------------|----------------------|-------------------|------------------|
| A.D.                   |                      |                   |                  |
| 1860 . . . . .         | Nilghiri . . . . .   | 540,000           | 180,000          |
| 1861 . . . . .         | Darjeeling . . . . . | 4,680,000         | 378,000          |
| 1869 . . . . .         | Ceylon . . . . .     | 77,000,000        | 1,260,000        |
| 1875 . . . . .         | Burmah . . . . .     | 2,000             | 200              |
| <b>Total . . . . .</b> |                      | <b>82,222,000</b> | <b>1,818,200</b> |

The exports from Ceylon rose very rapidly, viz :—

|                | Lbs.       |
|----------------|------------|
| 1880 . . . . . | 1,260,000  |
| 1884 . . . . . | 11,000,000 |
| 1886 . . . . . | 15,000,000 |
| 1888 . . . . . | 11,000,000 |

Indian bark yields from 4 to 5 per cent. of sulphate of quinine, but the superior quality introduced into Java by Mr. Charles Ledger gives from 6 up to 15 per cent. The plantations in India and Ceylon are valued at 5 millions sterling. Some Germans have planted near La Paz, Bolivia, 600,000 trees of the Ledger or Caupolican species.

The quantities of bark imported into Great Britain have been as follows :—

| Year           | Tons  | Value per Ton, £ | Net Imports, Tons |
|----------------|-------|------------------|-------------------|
| 1874 . . . . . | 2,100 | 210              | 400               |
| 1880 . . . . . | 4,000 | 300              | 1,600             |
| 1888 . . . . . | 7,200 | 76               | 1,000             |

The manufacture of quinine in 1879 was, according to the Archivio, as follows :—

|                       | Lbs.   |                   | Lbs.   |
|-----------------------|--------|-------------------|--------|
| East Indies . . . . . | 11,000 | Germany . . . . . | 55,000 |
| England . . . . .     | 26,000 | Italy . . . . .   | 44,000 |
| France . . . . .      | 40,000 | America . . . . . | 60,000 |

Making a total of 236,000 lbs., which was only 2 per cent. on the crop of bark.

*Cochineal.*—Canary Islands exported in 1880 three million lbs., valued at £350,000.

*Dynamite.*—Messrs. Nobel of Glasgow make 1200 tons yearly.

*Glycerine.*—Production in 1880 :—

|                   | Tons  |                   | Tons |
|-------------------|-------|-------------------|------|
| England . . . . . | 300   | Russia . . . . .  | 900  |
| France . . . . .  | 4,000 | Belgium . . . . . | 800  |
| Germany . . . . . | 1,500 | Italy . . . . .   | 400  |
| Holland . . . . . | 900   | Spain . . . . .   | 200  |

*Guano.*—The Peruvian Government exported from the Chinch Islands between 1850 and 1880 more than 12 million tons, worth 110 millions sterling. Great Britain paid 55 millions for 5,200,000 tons since 1855. The first quantity exported to Europe was in 1840. The supply is now almost exhausted. The analysis is as follows :—

|                             |              |
|-----------------------------|--------------|
| Azote . . . . .             | 52.5         |
| Phosphate of lime . . . . . | 19.3         |
| Alkali . . . . .            | 7.6          |
| Water . . . . .             | 15.8         |
| Sundry . . . . .            | 4.8          |
| <b>Total . . . . .</b>      | <b>100.0</b> |

*Gunpowder*

|                    | Saltpetre | Charcoal | Sulphur | Total |
|--------------------|-----------|----------|---------|-------|
| English . . . . .  | 75        | 15       | 10      | 100   |
| French . . . . .   | 75        | 13       | 12      | 100   |
| German . . . . .   | 75        | 11       | 14      | 100   |
| Russian . . . . .  | 74        | 14       | 12      | 100   |
| Austrian . . . . . | 72        | 17       | 11      | 100   |
| Spanish . . . . .  | 76        | 11       | 13      | 100   |
| Swedish . . . . .  | 75        | 16       | 9       | 100   |
| Chinese . . . . .  | 76        | 14       | 10      | 100   |
| American . . . . . | 75        | 13       | 12      | 100   |
| Sporting . . . . . | 77        | 13       | 10      | 100   |

The quantities exported from Great Britain, and the price per ton were :—

| Year           | Tons  | Value, £ per Ton |
|----------------|-------|------------------|
| 1853 . . . . . | 4,200 | 55               |
| 1860 . . . . . | 5,000 | 70               |
| 1870 . . . . . | 7,800 | 55               |
| 1880 . . . . . | 6,700 | 55               |
| 1888 . . . . . | 6,000 | 60               |

*India-rubber.*—This is mostly obtained from the Seringueros of the Amazon, who sell it for sixpence a pound to the merchants of Para, but its value on reaching England or United States is over two shillings a pound. The quantities imported into Great Britain and United States have been as follows :—

| Into                | Tons Imported |        |        |        |
|---------------------|---------------|--------|--------|--------|
|                     | 1860          | 1870   | 1880   | 1887   |
| Great Britain . . . | 2,150         | 7,606  | 8,479  | 11,800 |
| United States . . . | 1,610         | 4,316  | 7,599  | 12,900 |
| Total . . . . .     | 3,760         | 11,922 | 16,008 | 24,700 |
| Value per ton . . . | £224          | £215   | £277   | £215   |

The best rubber-forests in Brazil will ultimately be exhausted, owing to the reckless mode followed by the Seringueros or tappers. The ordinary product of a tapper's work is from 10 to 16 lbs. daily. A tree 15 inches diameter bled 8 feet high will yield 3 pints of milk. There are 120 india-rubber manufacturers in the United States, employing 15,000 operatives, who produce 280,000 tons of goods, valued at 52 millions sterling per annum.

*Madder.*—The best is grown near Avignon, on irrigated lands, for which the tenants pay £5 an acre rent. Average crop, 2 tons per acre, worth £50, leaving small profit to the cultivator.

Official returns of this crop in France are as follows :—

| Year           | Acres  | Tons   |
|----------------|--------|--------|
| 1840 . . . . . | 36,000 | 25,000 |
| 1862 . . . . . | 51,000 | 54,000 |
| 1874 . . . . . | 12,500 | 17,300 |

It gives 9 per cent. of ashes, of which 4 per cent. soluble salts and 3½ per cent. carbonate of lime.

*Maqui.*—This berry is grown in Chili for colouring wine. Exports thus :—

|                | Tons |
|----------------|------|
| 1887 . . . . . | 26   |
| 1888 . . . . . | 431  |

France takes 75 per cent. of the total.

*Nitre.*—Atacama (Chile) exports 350,000 tons per annum. The nitre is about 2 feet below the surface; one bed covers 5000 acres, 4 feet in thickness, say 25 million tons, worth 300 millions sterling. The quantities imported into Great Britain and the value per ton were :—

| Year           | Tons    | Value, £ per Ton |
|----------------|---------|------------------|
| 1853 . . . . . | 17,000  | 20               |
| 1860 . . . . . | 37,000  | 14               |
| 1870 . . . . . | 57,000  | 15               |
| 1880 . . . . . | 46,000  | 15               |
| 1888 . . . . . | 103,000 | 10               |

It is also called nitrate of potash.

Chili, in 1880, exported 930,000 tons valued at £7,800,000, or £8 per ton.

*Opium.*—Annual shipments from India :—

| Years   | Chests  | Tons  | Value      | Per Ton |
|---------|---------|-------|------------|---------|
| 1861-65 | 73,100  | 4,305 | 10,810,000 | 2,510   |
| 1866-70 | 82,800  | 4,870 | 11,240,000 | 2,290   |
| 1871-75 | 89,200  | 5,250 | 11,790,000 | 2,250   |
| 1876-80 | 102,100 | 6,005 | 12,640,000 | 2,106   |
| 1881-86 | 90,200  | 5,400 | 11,800,000 | 2,160   |
| 1887-88 | 93,000  | 5,600 | 10,600,000 | 1,900   |

The Chinese impose a duty of £5 per ton. It is retailed at 2s. per ounce, or double the price of native opium. The province of Hankow produces 5300 tons per annum. There are in China 3 million opium-smokers. The average importation yearly into Great Britain shows :—

| Year              | Imported | Re-Shipped | Home Use |
|-------------------|----------|------------|----------|
|                   | Tons     | Tons       | Tons     |
| 1875-80 . . . . . | 220      | 115        | 105      |
| 1881-85 . . . . . | 290      | 170        | 120      |
| 1886-88 . . . . . | 270      | 185        | 85       |

The cultivation in India gives an average crop of 30 lbs. per acre, value £100.

## DRUNKENNESS

The returns of insanity caused by drunkenness, and those of suicide from the same cause, in various countries show :—

| Insanity          |              | Suicide             |              |
|-------------------|--------------|---------------------|--------------|
| England . . . . . | 14 per cent. | England . . . . .   | 12 per cent. |
| Ireland . . . . . | 12 "         | France . . . . .    | 12 "         |
| France . . . . .  | 14 "         | Prussia . . . . .   | 14 "         |
| Prussia . . . . . | 10 "         | Oldenburg . . . . . | 17 "         |
| Denmark . . . . . | 11 "         | Saxony . . . . .    | 9 "          |
| Finland . . . . . | 12 "         | Belgium . . . . .   | 8 "          |
| Norway . . . . .  | 20 "         | Russia . . . . .    | 38 "         |
| Holland . . . . . | 16 "         | Baden . . . . .     | 6 "          |
| Austria . . . . . | 14 "         | Europe . . . . .    | 15 "         |

Kaspar considers that the official returns are much too low, and estimates that 25 per cent. of suicides in Germany are produced by drunkenness.

The increase of alcoholic insanity and suicide in France is remarkable, viz. :—

| Period            | Ratio of Dipsomaniacs (France) |                   |
|-------------------|--------------------------------|-------------------|
|                   | Per 1000 Insane                | Per 1000 Suicides |
| 1840-49 . . . . . | 78                             | 67                |
| 1861-70 . . . . . | 108                            | 130               |
| 1871-80 . . . . . | 148                            | 113               |
| 1881-85 . . . . . | 144                            | 120               |

In France drunkenness and alcoholic insanity have progressed with the consumption of spirits, the average of which is now three times as much per head as in 1840-42. See *Alcohol*, p. 59.

Drunkenness as a cause of insanity and of suicide is much commoner among men than women, viz. :—

| Males to Females  |       | Males to Females          |       |
|-------------------|-------|---------------------------|-------|
| England . . . . . | 75-25 | Austria . . . . .         | 89-11 |
| France . . . . .  | 74-26 | Denmark . . . . .         | 82-18 |
| Prussia . . . . . | 88-12 | Oldenburg . . . . .       | 85-15 |
| Belgium . . . . . | 72-28 | General average . . . . . | 80-20 |

Of insane males in Italy, 12 per cent. are caused by drink; in United States, 26 per cent.; and in Scotland, 28 per cent.

DEATHS FROM DRINK YEARLY

|                     | Number | Per 1000 Deaths of Population | Per Million Inhabitants |
|---------------------|--------|-------------------------------|-------------------------|
| England . . . .     | 1,082  | 2.04                          | 40                      |
| Scotland . . . .    | 230    | 3.29                          | 60                      |
| Ireland . . . .     | 280    | 2.78                          | 56                      |
| United Kingdom      | 1,592  | 2.27                          | 43                      |
| France . . . .      | 872    | 1.05                          | 23                      |
| Germany . . . .     | 3,240  | 2.70                          | 70                      |
| Belgium . . . .     | 456    | 3.83                          | 80                      |
| Sweden . . . .      | 502    | 6.25                          | 106                     |
| Norway . . . .      | 72     | 2.36                          | 40                      |
| Switzerland . . . . | 244    | 3.81                          | 85                      |
| Italy . . . .       | 709    | 0.85                          | 24                      |

Deaths from drink in New York are said to average 12 per 1000 of the total, that is, five times more numerous than in the United Kingdom.

YEARS OF INTemperance TO PRODUCE DEATH

| Class                 | Liquor |    |
|-----------------------|--------|----|
| Women . . . .         | 14     | 22 |
| Gentlemen . . . .     | 15     | 17 |
| Working class . . . . | 18     | 16 |

This shows that the working class can stand drink longest, and that beer is the least deadly form of intemperance.

RATIO OF DRUNKENNESS TO POPULATION.

The number of drunkards fined yearly per 1000 inhabitants in some of the large towns of the United Kingdom is as follows (1880-84):—

|                       |                      |                   |
|-----------------------|----------------------|-------------------|
| Belfast . . . . 21    | Glasgow . . . . 38   | Dublin . . . . 43 |
| Manchester . . . . 31 | Liverpool . . . . 42 | Cork . . . . 56   |

The prevalence of drunkenness in the rural districts is much less than in towns, the general average of persons fined in England being about 6 per 1000 of the population,\* viz:—

| Year         | Persons Fined | Per 1000 Inhabitants |
|--------------|---------------|----------------------|
| 1860 . . . . | 88,400        | 4.4                  |
| 1870 . . . . | 137,200       | 6.0                  |
| 1881 . . . . | 174,500       | 6.7                  |
| 1888 . . . . | 166,300       | 6.0                  |

\* As the same person will be fined probably ten times in the year, it may be assumed that drunkards are not 6 per 1000, but 6 in 20,000 of the population.

In 1880 there were 61,000 persons fined in France for drunkenness, say 1.7 per 1000 inhabitants, or one-fourth of the ratio in England.

DRUNKENNESS AND CRIME

According to the *Dict. des Sciences Medicales* the proportion of crime caused by habits of intemperance is as follows:—

|                 | Per Cent. |                         | Per Cent. |
|-----------------|-----------|-------------------------|-----------|
| England . . . . | 43        | Germany . . . .         | 44        |
| Belgium . . . . | 80        | Denmark . . . .         | 74        |
| Sweden . . . .  | 31        | General average . . . . | 54        |

In Denmark 23 per cent. of divorces originate in habits of intemperance.

VALUE OF LIFE, DRUNK AND SOBER

| Age        | Expectancy of Years |       |
|------------|---------------------|-------|
|            | Drunk               | Sober |
| 20 . . . . | 15                  | 44    |
| 30 . . . . | 14                  | 36    |
| 40 . . . . | 11                  | 29    |

In a period of 35 years down to 1874, the United Kingdom Assurance Company issued 25,500 policies in two distinct sections, temperance and general. The number of insured persons who died, compared with those expected to die by the actuaries, were:—

| Section            | Expected to Die | Died  |
|--------------------|-----------------|-------|
| Temperance . . . . | 2,644           | 1,861 |
| General . . . .    | 4,408           | 4,339 |

This would seem to indicate that "teetotallers" and blue-ribbon men live 17 years longer than others.

DWARFS

| Name                  | Height (Inches) | Date of Birth | Birthplace |
|-----------------------|-----------------|---------------|------------|
| Borowlaski . . . .    | 39              | 1739          | Warsaw     |
| Tom Thumb . . . .     | 31              | 1838          | New York   |
| Mrs. T. Thumb . . . . | 32              | 1842          | "          |
| Che-Mah . . . .       | 25              | 1838          | China      |
| Lucia Zarate . . . .  | 20              | 1863          | Mexico     |
| General Mite . . . .  | 21              | 1864          | New York   |

Count Borowlaski was a friend of George III., and one of the most accomplished men in London society. Tom Thumb's real name was Charles Stratton

E.

EARTH

The area and cubic contents, according to Murray (*Challenger* expedition), are shown thus:—

|               | Area, Square Miles | Cubic Miles |
|---------------|--------------------|-------------|
| Land . . . .  | 51,410,700         | 21,923,200  |
| Water . . . . | 137,199,000        | 323,722,000 |
| Total . . . . | 188,609,700        | 345,645,200 |

The mean height of the land has been stated thus:—

FEET OVER SEA-LEVEL

|                       | Humboldt | Lapparent | Murray | Tillo |
|-----------------------|----------|-----------|--------|-------|
| Europe . . . .        | 672      | 958       | 939    | 1,046 |
| Asia . . . .          | 1,151    | 2,884     | 3,180  | 3,160 |
| North America . . . . | 748      | 1,952     | 1,888  | 2,052 |
| South America . . . . | 1,132    | 1,762     | 2,078  | 2,036 |
| Africa . . . .        | ...      | 1,975     | 2,021  | 2,020 |
| Australia . . . .     | ...      | 1,188     | 805    | 790   |
| Mean . . . .          | 1,007    | 2,120     | 2,252  | 2,290 |

The elevation of the various continents is as follows :—

|                         | Square Miles   |                  |                   |                |            | Mean Height in Feet |
|-------------------------|----------------|------------------|-------------------|----------------|------------|---------------------|
|                         | Under 600 Feet | 600 to 1500 Feet | 1500 to 3000 Feet | Over 3000 Feet | Total      |                     |
| Europe . . . . .        | 2,040,600      | 991,800          | 362,000           | 275,700        | 3,670,100  | 939                 |
| Asia . . . . .          | 4,049,500      | 2,603,700        | 3,551,900         | 6,163,400      | 16,368,500 | 3,189               |
| Africa . . . . .        | 1,410,100      | 3,859,800        | 3,066,200         | 2,756,700      | 11,092,800 | 2,021               |
| North America . . . . . | 2,466,200      | 2,450,600        | 1,015,900         | 1,690,400      | 7,623,100  | 1,888               |
| South America . . . . . | 2,725,600      | 1,842,800        | 1,151,000         | 1,142,000      | 6,861,400  | 2,078               |
| Australia . . . . .     | 896,300        | 1,935,700        | 123,900           | 58,200         | 3,014,100  | 805                 |
| Islands . . . . .       | 476,400        | 600,000          | 611,500           | 1,092,800      | 2,780,700  | 2,387               |
| The world . . . . .     | 14,064,700     | 14,284,400       | 9,882,400         | 13,179,200     | 51,410,700 | 2,252               |

The cubic contents and area of the various oceans and seas, according to Murray's measurement (*Challenger* expedition), are shown thus :—

|                          | Depth, Feet |        | Cubic Miles | Square Miles | Ratio         |       |
|--------------------------|-------------|--------|-------------|--------------|---------------|-------|
|                          | Greatest    | Mean   |             |              | Cubic Measure | Area  |
| North Atlantic . . . . . | 27,366      | 12,810 | 34,804,000  | 14,343,000   | 10.8          | 10.4  |
| South Atlantic . . . . . | 18,600      | 14,250 | 27,510,000  | 10,193,000   | 8.5           | 7.4   |
| Arctic Ocean . . . . .   | 9,000       | 3,780  | 3,418,000   | 4,781,000    | 1.1           | 3.5   |
| Norwegian Sea . . . . .  | 12,030      | 5,448  | 1,162,000   | 1,127,000    | 0.3           | 0.9   |
| Caribbean Sea . . . . .  | 19,014      | 7,614  | 1,675,000   | 1,161,000    | 0.5           | 0.9   |

| ...                      | ...         | ...    | 323,722,000 | 137,199,000  | 100.0         | 100.0 |

According to Tillo, the mean depth of the ocean is 12,550 feet.

The area and cubic contents of the continents show thus :—

|                      | Sq. Miles  | Cubic Miles | Superficial Ratio | Cubic Ratio |
|----------------------|------------|-------------|-------------------|-------------|
| Europe . . . . .     | 3,670,100  | 652,800     | 7.2               | 3.0         |
| Asia . . . . .       | 16,368,500 | 9,887,000   | 31.8              | 45.2        |
| Africa . . . . .     | 11,092,800 | 4,246,400   | 21.6              | 19.3        |
| N. America . . . . . | 7,623,100  | 2,725,500   | 14.7              | 12.4        |
| S. America . . . . . | 6,861,400  | 2,699,900   | 13.4              | 12.3        |
| Australia . . . . .  | 3,014,100  | 459,400     | 5.8               | 2.1         |
| Islands . . . . .    | 2,780,700  | 1,252,200   | 5.5               | 5.7         |
| Total . . . . .      | 51,410,700 | 21,923,200  | 100.0             | 100.0       |

The following table shows the elevation of various places over sea-level, in feet :—

|                      |       |                        |       |
|----------------------|-------|------------------------|-------|
| Bangalore . . . . .  | 3,015 | Mexico . . . . .       | 7,480 |
| Berne . . . . .      | 1,775 | Milan . . . . .        | 420   |
| Bogota . . . . .     | 8,680 | Moscow . . . . .       | 985   |
| Darjeeling . . . . . | 7,460 | Munich . . . . .       | 1,740 |
| Erzeroum . . . . .   | 5,255 | Quito . . . . .        | 9,545 |
| Friburg . . . . .    | 2,050 | Rome . . . . .         | 150   |
| Geneva . . . . .     | 1,250 | St. Gall . . . . .     | 1,820 |
| Gondar . . . . .     | 7,260 | St. Helena . . . . .   | 1,775 |
| Gratz . . . . .      | 1,295 | St. Remy . . . . .     | 5,205 |
| Guatemala . . . . .  | 4,705 | Salzburg . . . . .     | 1,350 |
| Innsbruck . . . . .  | 1,895 | Seringapatam . . . . . | 2,390 |
| Jerusalem . . . . .  | 2,515 | Vevay . . . . .        | 1,245 |
| Kandy . . . . .      | 1,695 | Zurich . . . . .       | 1,240 |
| Madrid . . . . .     | 2,090 |                        |       |

The depth of the minor seas is shown thus :—

|                           | Average, Feet | Maximum, Feet |
|---------------------------|---------------|---------------|
| Irish Sea . . . . .       | 240           | 710           |
| English Channel . . . . . | 110           | 300           |
| Levant . . . . .          | 72            | ...           |
| Adriatic . . . . .        | 45            | ...           |

## EARTHQUAKES

Since the beginning of the eighteenth century the most destructive have been the following :—

| Year | Place                            | Lives Lost |
|------|----------------------------------|------------|
| 1703 | Yeddo . . . . .                  | 190,000    |
| 1716 | Algiers . . . . .                | 18,000     |
| 1726 | Palermo . . . . .                | 6,000      |
| 1731 | Pekin . . . . .                  | 95,000     |
| 1746 | Lima . . . . .                   | 18,000     |
| 1754 | Cairo . . . . .                  | 40,000     |
| 1755 | Lisbon . . . . .                 | 35,000     |
| 1773 | Guatemala . . . . .              | 33,000     |
| 1797 | Quito . . . . .                  | 41,000     |
| 1822 | Aleppo . . . . .                 | 22,000     |
| 1861 | Mendoza, South America . . . . . | 12,000     |
| 1868 | Arica . . . . .                  | 6,000      |
| 1880 | Manilla . . . . .                | 3,000      |
| 1883 | Ischia . . . . .                 | 2,000      |

*Percentage of Adults able to write.*

**EDUCATION.**

*Percentage of population attending school; average attendance.*

## EDUCATION

The following is a general view of the educational condition of the various countries according to latest information :—

| Country               | Year | Schools | Teachers | Pupils     | Expenditure, £ | School Children per 1000 Pop. |
|-----------------------|------|---------|----------|------------|----------------|-------------------------------|
| United Kingdom        | 1888 | 30,522  | 85,000   | 4,605,000  | 9,690,000      | 123                           |
| France . . . . .      | 1887 | 85,545  | 136,800  | 6,308,000  | 6,000,000      | 170                           |
| Germany . . . . .     | 1881 | 57,000  | 120,000  | 7,100,000  | 4,000,000      | 140                           |
| Russia . . . . .      | 1889 | 43,100  | ...      | 2,510,000  | 3,800,000      | 25                            |
| Austria . . . . .     | 1889 | 35,718  | 99,200   | 4,903,000  | 2,400,000      | 130                           |
| Italy . . . . .       | 1887 | 70,507  | 86,400   | 3,071,000  | 3,100,000      | 90                            |
| Spain . . . . .       | 1885 | 31,880  | 36,000   | 1,843,000  | 1,200,000      | 106                           |
| Portugal . . . . .    | 1886 | 5,663   | ...      | 257,000    | 200,000        | 54                            |
| Switzerland . . . . . | 1886 | 6,794   | 12,720   | 630,000    | 400,000        | 210                           |
| Belgium . . . . .     | 1887 | 8,257   | 10,800   | 808,000    | 1,100,000      | 135                           |
| Holland . . . . .     | 1888 | 5,448   | 19,870   | 758,000    | 1,300,000      | 145                           |
| Scandinavia . . . . . | 1886 | 19,936  | ...      | 1,263,000  | 1,200,000      | 140                           |
| Roumania . . . . .    | 1883 | 2,807   | ...      | 134,000    | ...            | 27                            |
| Servia . . . . .      | 1888 | 702     | 1,650    | 60,000     | 200,000        | 30                            |
| Greece . . . . .      | 1884 | 2,700   | 3,374    | 143,000    | 240,000        | 72                            |

| Total . . . . .       | 16,240,000                   | 50,810,000 | 217                | ...                                | ...  |

The march of education in Europe has been remarkable, for whereas population has only increased 33 per cent. since 1840, the average number of children attending school has risen 145 per cent.

The percentage of conscripts who could read was as follows :—

|                       | 1868 | 1880 | 1884 |
|-----------------------|------|------|------|
| Germany . . . . .     | 96   | 98   | 99   |
| Holland . . . . .     | 82   | 88   | 90   |
| France . . . . .      | 76   | 86   | 88   |
| Belgium . . . . .     | 74   | 81   | 85   |
| Austria . . . . .     | 34   | 61   | 69   |
| Italy . . . . .       | 32   | 52   | 53   |
| Hungary . . . . .     | 22   | 49   | 55   |
| Sweden . . . . .      | ...  | ...  | 100  |
| Denmark . . . . .     | ...  | ...  | 100  |
| Switzerland . . . . . | ...  | ...  | 98   |
| Russia . . . . .      | ...  | ...  | 21   |
| Servia . . . . .      | ...  | ...  | 21   |

The following table shows the proportions of men and women able to sign the marriage register, also of conscripts able to read, at various dates :—

| Year | Able to Sign Register |        |       |              |        |       | Able to Read in 100 Conscripts |       |
|------|-----------------------|--------|-------|--------------|--------|-------|--------------------------------|-------|
|      | In 100 Men            |        |       | In 100 Women |        |       |                                |       |
|      | England               | France | Italy | England      | France | Italy | France                         | Italy |
| 1841 | 67                    | ...    | ...   | 51           | ...    | ...   | ...                            | ...   |
| 1851 | 69                    | ...    | ...   | 55           | ...    | ...   | ...                            | ...   |
| 1861 | 75                    | 71     | ...   | 65           | 55     | ...   | 70                             | ...   |
| 1871 | 81                    | 75     | 43    | 73           | 63     | 23    | 80                             | 43    |
| 1883 | 88                    | 86     | 55    | 84           | 78     | 33    | 87                             | 52    |

As respects superior education, the universities of the world stand thus :—

|                     | Universities | Professors | Students |
|---------------------|--------------|------------|----------|
| United Kingdom . .  | 11           | 344        | 13,400   |
| France . . . . .    | 1            | 180        | 10,300   |
| Germany . . . . .   | 21           | 1,920      | 26,680   |
| Russia . . . . .    | 8            | 701        | 10,400   |
| Austria . . . . .   | 10           | 1,430      | 18,600   |
| Italy . . . . .     | 21           | 600        | 9,000    |
| Spain . . . . .     | 10           | 380        | 16,200   |
| Portugal . . . . .  | 1            | 40         | 1,300    |
| Belgium . . . . .   | 4            | 120        | 5,900    |
| Holland . . . . .   | 4            | 150        | 2,300    |
| Denmark . . . . .   | 1            | 60         | 1,400    |
| Sweden . . . . .    | 2            | 173        | 2,710    |
| Norway . . . . .    | 1            | 46         | 1,700    |
| Switzerland . . . . | 4            | 90         | 2,000    |
| Greece . . . . .    | 2            | 40         | 1,800    |
| Europe . . . . .    | 101          | 6,274      | 123,690  |
| United States . . . | 360          | 4,240      | 60,100   |
| Morocco . . . . .   | 1            | 40         | 700      |
| Total . . . . .     | 462          | 10,554     | 184,490  |

There are also universities in Canada, Australia, and India, of which statistics are wanting.

The number of university students compared with population is much greater in Spain and Belgium than in other European countries.

Intermediate education embraces a great number of colleges, academies, lyceums, &c., of which details will be found in the various countries.

#### UNITED KINGDOM

In 1830 the Board of Education was established, with power to spend £30,000 on schools. The returns for Great Britain (excluding Ireland) have been as follows :—

| Year         | Sum Voted, £ | Number of Schools Inspected | Accommodation for Pupils | Average Attendance |
|--------------|--------------|-----------------------------|--------------------------|--------------------|
| 1850 . . . . | 180,000      | 2,613                       | ...                      | 225,400            |
| 1860 . . . . | 724,000      | 7,272                       | 1,400,000                | 884,000            |
| 1870 . . . . | 912,000      | 10,949                      | 2,215,000                | 1,454,000          |
| 1880 . . . . | 2,854,000    | 20,670                      | 4,843,000                | 3,155,000          |
| 1888 . . . . | 4,168,000    | 22,326                      | 6,043,000                | 4,111,000          |

The number of schools of all kinds, and the average attendance of school-children in the three kingdoms, showed thus :—

|                  | Schools |        | Scholars  |           |
|------------------|---------|--------|-----------|-----------|
|                  | 1846    | 1888   | 1846      | 1888      |
| England . . . .  | 22,200  | 19,221 | 1,500,000 | 3,615,000 |
| Scotland . . . . | 5,042   | 3,105  | 220,000   | 496,000   |
| Ireland . . . .  | 9,657   | 8,196  | 330,000   | 494,000   |
| Total . . . .    | 36,899  | 30,522 | 2,050,000 | 4,605,000 |

The proportion of adults able to write is shown by those signing the marriage register, viz. :—

|                  | Per Cent. |       |         |
|------------------|-----------|-------|---------|
|                  | Men       | Women | General |
| England . . . .  | 92        | 90    | 91      |
| Scotland . . . . | 96        | 92    | 94      |
| Ireland . . . .  | 78        | 76    | 77      |
| United Kingdom . | 91        | 89    | 90      |

If we compare the returns of the whole United Kingdom for 1888 with those of 1878 we find as follows :—

|                    | 1878      | 1888      | Ratio of Increase |
|--------------------|-----------|-----------|-------------------|
| Number of schools  | 26,734    | 30,522    | 14                |
| Accommodation      | 5,543,000 | 7,105,000 | 29                |
| Average attendance | 3,219,000 | 4,605,000 | 44                |

The returns for the three kingdoms in 1888 were as follows :—

|                  | Expenditure, £ | Number of Schools | Accommodation | Average Attendance |
|------------------|----------------|-------------------|---------------|--------------------|
| England . . . .  | 7,440,000      | 19,221            | 5,356,000     | 3,615,000          |
| Scotland . . . . | 1,160,000      | 3,105             | 687,000       | 496,000            |
| Ireland . . . .  | 1,090,000      | 8,196             | 1,062,000     | 494,000            |
| U. Kingdom       | 9,690,000      | 30,522            | 7,105,000     | 4,605,000          |

The income of the schools in 1888 was made up thus :—

|                | England     | Scotland  | Ireland   | United Kingdom |
|----------------|-------------|-----------|-----------|----------------|
| State subsidy  | £ 3,600,000 | £ 570,000 | £ 900,000 | £ 5,070,000    |
| Rates, &c. . . | 3,840,000   | 590,000   | 190,000   | 4,620,000      |
| Total          | 7,440,000   | 1,160,000 | 1,090,000 | 9,690,000      |

From 1870 to 1888 the new schools built in England and Wales were :—

| Schools         | Number | Accommodation for Pupils |
|-----------------|--------|--------------------------|
| Board . . . .   | 4,562  | 1,809,000                |
| Voluntary . . . | 6,738  | 1,668,000                |
| Total . . . .   | 11,300 | 3,477,000                |

In 1888 the schools of England and Wales had 68,683 certified teachers and 29,901 pupil teachers; the average expenditure yearly was :—

|                       |           |
|-----------------------|-----------|
| Board schools . . . . | £ s. d.   |
| Voluntary schools . . | 1 16 4 .. |

Local taxation supplied 18s. per child, fees 10s., and the subsidy from the State the rest. In London the expenditure was much higher, namely, 61s. in Board Schools, and 44s. in voluntary per child in average attendance. The working of both kinds of schools in England and Wales in 1881 is shown thus :—

|                 | Schools |        | Average Attendance |           |
|-----------------|---------|--------|--------------------|-----------|
|                 | 1881    | 1888   | 1881               | 1888      |
| Voluntary . . . | 14,370  | 14,659 | 2,008,000          | ...       |
| Board . . . .   | 3,692   | 4,562  | 856,000            | ...       |
| Total . . . .   | 18,062  | 19,221 | 2,864,000          | 3,615,000 |

In 1880 the religion of the school-children of the United Kingdom was as follows :—

|                       | School Children | Percentage |
|-----------------------|-----------------|------------|
| Church of England . . | 1,539,700       | 42.8       |
| Presbyterian . . . .  | 527,400         | 14.6       |
| Roman Catholic . . .  | 526,600         | 14.6       |
| Various . . . . .     | 1,030,300       | 28.0       |
| Total . . . . .       | 3,624,000       | 100.0      |

The average attendance of children compared with population thus :—

|                | Numbers   |           | Per 1000 Inhabitants |      |
|----------------|-----------|-----------|----------------------|------|
|                | 1881      | 1888      | 1881                 | 1888 |
| England . . .  | 2,864,000 | 3,615,000 | 110                  | 127  |
| Scotland . . . | 410,000   | 496,000   | 108                  | 123  |
| Ireland . . .  | 454,000   | 494,000   | 88                   | 104  |
| United Kingdom | 3,728,000 | 4,605,000 | 106                  | 123  |

The increase of schools has been accompanied by a decrease of crime. The returns for England, Wales, and Scotland show :—

| Period  | Children Attending School | Annual Con-<br>victions | School-<br>Children<br>per 1000<br>Population | Criminals<br>per 100,000<br>Population |
|---------|---------------------------|-------------------------|-----------------------------------------------|----------------------------------------|
| 1841-50 | 220,000                   | 24,300                  | 11                                            | 122                                    |
| 1851-60 | 560,000                   | 21,200                  | 26                                            | 96                                     |
| 1861-70 | 1,170,000                 | 17,010                  | 47                                            | 68                                     |
| 1871-80 | 2,300,000                 | 13,900                  | 82                                            | 50                                     |
| 1887    | 4,019,000                 | 12,150                  | 125                                           | 38                                     |

In 1838 Judge Coleridge pointed attention in this direction, and soon afterwards the Committee Report of the House of Commons contained the following testimony :—"We find that the neglect of education causes much crime that might be avoided."

The growth of crime has been materially checked in late years by industrial schools and reformatories, which were begun in 1857, the first for vagrant or destitute children, the second for youthful criminals, the Police Report showing that in 1856 there were 100,000 children and youths under 17 living as vagabonds or thieves in England only. The returns published in 1888 for these institutions show :—

|                      | Reformato-<br>ries | Industrial<br>Schools | Total   |
|----------------------|--------------------|-----------------------|---------|
| England . . .        | 4,225              | 14,585                | 18,810  |
| Ireland . . .        | 923                | 7,991                 | 8,914   |
| Total . . .          | 5,148              | 22,576                | 27,724  |
| Expenditure, £ . . . | 96,000             | 433,000               | 529,000 |

The average expenditure is £19 per head in the above institutions. The entries in England in 1887 were as follows :—

|             | Reformato-<br>ries | Industrial<br>Schools | Total |
|-------------|--------------------|-----------------------|-------|
| Boys . . .  | 1,048              | 4,952                 | 6,000 |
| Girls . . . | 184                | 1,113                 | 1,297 |
| Total . . . | 1,232              | 6,065                 | 7,297 |

The summary of eleven years' working of reformatories, down to 1880, showed as follows :—

|                                   |        |
|-----------------------------------|--------|
| Admitted . . .                    | 36,232 |
| Put to trades . . .               | 23,550 |
| Died or removed . . .             | 5,547  |
| Remaining under instruction . . . | 7,135  |

The good effect of reformatories, since their introduction in 1869, is shown thus :—

|                               | 1869   | 1881  |
|-------------------------------|--------|-------|
| Juvenile offenders . . .      | 10,314 | 5,579 |
| Per million inhabitants . . . | 458    | 215   |

This gives a decline of 53 per cent. in juvenile crime. The Universities of the United Kingdom in 1876 showed as follows :—

|                    | Students | Annual<br>Expenditure | Per Student |
|--------------------|----------|-----------------------|-------------|
| Oxford . . .       | 1,860    | £414,000              | £220        |
| Cambridge . . .    | 1,920    | 340,000               | 177         |
| Dublin . . .       | 810      | 62,000                | 78          |
| Edinburgh . . .    | 2,320    | 200,000               | 87          |
| Glasgow . . .      | 1,340    | 90,000                | 68          |
| Aberdeen . . .     | 650      | 30,000                | 45          |
| St. Andrew's . . . | 300      | 17,000                | 56          |

Besides the above, there are the Universities of London, Durham, Manchester, and the new Royal University of Ireland.

The salaries of the first three are as follows :—

|                       | Fellows and<br>Professors | Salaries, £ | Average, £ |
|-----------------------|---------------------------|-------------|------------|
| Oxford . . .          | 424                       | 159,000     | 373        |
| Cambridge . . .       | 483                       | 132,000     | 274        |
| Trinity, Dublin . . . | 59                        | 31,000      | 530        |

The incomes were derived thus :—

|                 | Endowments,<br>£ | Fees, &c.,<br>£ | Total, £ |
|-----------------|------------------|-----------------|----------|
| Oxford . . .    | 280,000          | 134,000         | 414,000  |
| Cambridge . . . | 235,000          | 115,000         | 340,000  |
| Dublin . . .    | 49,000           | 13,000          | 62,000   |

The register of Cambridge shows that the number of B.A. graduates admitted yearly averaged thus :—

|                    |     |
|--------------------|-----|
| 16th century . . . | 70  |
| 17th " . . .       | 235 |
| 19th " . . .       | 326 |

The ratios of winners at Indian competition examinations in 1880 were :—

|                           | Per Cent. |
|---------------------------|-----------|
| Oxford students . . .     | 28        |
| Cambridge students . . .  | 24        |
| Dublin students . . .     | 17        |
| Scotch Universities . . . | 14        |
| London, Cork, &c. . .     | 17        |
|                           | 100       |

#### IRELAND

In his *Progress of the Nation* (1843) Mr. Porter says :—"The Commissioners for National Education in Ireland have met with a most determined hostility on the part of the Protestant clergy." In order to prevent Catholics from receiving instruction, it was felony for a Catholic (in the last century) to keep a school; and so late as 1801 the Protestant Bishop of Cork prosecuted a man for this offence, but the Lord Chancellor quashed the suit as contrary to the spirit of the age.

The first system of public schools was started in 1817 by the Kildare Street Society, but one of the statutes was to read a chapter daily from King James's version of the Bible. The National Schools were begun by Parliament in 1830. The register shows the children on the rolls, and, as the average attendance in Ireland has always

been under 46 per cent. of the number on the rolls, we can estimate the latter for those early years :—

| Year | Schools | Scholars Enrolled | Average Attendance | Average Attendance per 1000 Inhabitants |
|------|---------|-------------------|--------------------|-----------------------------------------|
| 1820 | 241     | 16,800            | 7,600              | 1                                       |
| 1825 | 1,395   | 102,400           | 46,000             | 6                                       |
| 1835 | 1,106   | 145,500           | 65,000             | 8                                       |
| 1840 | 1,978   | 232,600           | 104,000            | 13                                      |
| 1861 | ...     | 803,400           | 262,800            | 45                                      |
| 1871 | ...     | 1,021,700         | 363,800            | 67                                      |
| 1881 | 7,590   | 1,066,000         | 453,600            | 88                                      |
| 1888 | 8,196   | 1,060,900         | 493,900            | 104                                     |

The annual expenditure is £1,090,000, of which £900,000 is a State subsidy, the rest made up of rates, fees, &c.

As in England, the increase of schools in Ireland has brought a decrease of crime, viz. :—

|         | Children Attending School | Annual Convictions | School Children per 1000 Pop. | Criminals per 100,000 Pop. |
|---------|---------------------------|--------------------|-------------------------------|----------------------------|
| 1851-60 | 220,000                   | 7,705              | 35                            | 124                        |
| 1861-70 | 310,000                   | 2,918              | 56                            | 53                         |
| 1871-80 | 405,000                   | 2,492              | 77                            | 47                         |
| 1887    | 513,000                   | 1,412              | 106                           | 29                         |

## FRANCE

The best measure of educational progress is the ratio of male and female adults able to sign the marriage register, and of conscripts able to write when enrolled for service, viz. :—

| Year | Conscripts Able to Write | Adults of Both Sexes |
|------|--------------------------|----------------------|
| 1830 | 45 per cent.             | 42                   |
| 1855 | 66                       | 60                   |
| 1865 | 76                       | 66                   |
| 1876 | 84                       | 75                   |
| 1881 | 86                       | 82                   |

In December 1887 the primary and secondary schools stood thus :—

|                 | Number | Pupils    | Primary Schools    |          |
|-----------------|--------|-----------|--------------------|----------|
|                 |        |           | Number             | Teachers |
| Primary         | 85,087 | 6,208,000 | Lay . . . . .      | 67,133   |
| Lycées, &c.     | 346    | 89,400    | Clerical . . . . . | 17,954   |
| Girls' colleges | 112    | 10,400    |                    |          |
| Total           | 85,545 | 6,307,800 | Total              | 85,087   |
|                 |        |           |                    | 136,800  |

The above is exclusive of schools for adults, which were attended by 156,000 men and 28,000 women.

Although France has but one University, that of Paris, it has 16 University Colleges. The numbers who graduated in 1885 were :—

|          | Examined | Graduated |             | Examined | Graduated |
|----------|----------|-----------|-------------|----------|-----------|
| Paris    | 3,540    | 1,500     | Montpellier | 644      | 266       |
| Toulouse | 1,218    | 443       | Aix         | 519      | 207       |
| Rennes   | 1,116    | 571       | Clermont    | 540      | 173       |
| Lyons    | 983      | 423       | Dijon       | 430      | 155       |
| Douai    | 848      | 305       | Nancy       | 343      | 150       |
| Poitiers | 823      | 314       | Grenoble    | 341      | 121       |
| Bordeaux | 782      | 278       | Besançon    | 192      | 93        |
| Caen     | 675      | 293       | Algiers     | 118      | 48        |

Official returns of the Educational Department show as follows :—

| Year | Schools | Average Attendance | Average Attendance per 1000 Inhabitants |
|------|---------|--------------------|-----------------------------------------|
| 1840 | 55,930  | 2,882,000          | 85                                      |
| 1864 | 64,978  | 3,414,000          | 90                                      |
| 1887 | 85,545  | 6,308,000          | 170                                     |

Public expenditure on education of all kinds and that on primary schools only are shown as follows :—

| Education |           | Primary Schools |           |
|-----------|-----------|-----------------|-----------|
| Year      | Amount, £ | Year            | Amount, £ |
| 1840      | 400,000   | 1830            | 12,000    |
| 1863      | 1,300,000 | 1855            | 240,000   |
| 1872      | 2,250,000 | 1870            | 350,000   |
| 1881      | 3,600,000 | 1888            | 5,800,000 |

In 1886 the primary schools showed as follows :—

|          | Lay       | Clerical  | Total     |
|----------|-----------|-----------|-----------|
| Schools  | 60,865    | 18,890    | 79,955    |
| Teachers | 88,668    | 46,548    | 135,216   |
| Pupils   | 3,780,000 | 1,737,000 | 5,517,000 |
|          | Male      | Female    | Total     |
| Teachers | 62,796    | 72,420    | 135,216   |
| Pupils   | 2,786,000 | 2,731,000 | 5,517,000 |

Of the total number of pupils, 58 per cent. were free, and 42 per cent. paid for their education.

In the boys' schools there is one teacher for 45 children; in the girls' schools one for 38. Clerical schools average 93 pupils, lay 63.

Making a total of 13,112 candidates, of whom 5330 graduated. There are altogether 10,300 students, who are thus distributed :—

|          |       |            |       |
|----------|-------|------------|-------|
| Law      | 2,500 | Literature | 3,500 |
| Medicine | 2,800 | Science    | 1,500 |

In the rank and file of the French army 15 per 1000 are university graduates.

## ALGERIA

The system of education in 1888 was as follows :—

|                 | No.   | Pupils  |
|-----------------|-------|---------|
| Colleges        | 9     | 3,100   |
| Primary schools | 921   | 70,500  |
| Arab schools    | 76    | 9,000   |
| Infant schools  | 208   | 27,000  |
| Total           | 1,214 | 109,600 |

Only 14 per cent. of children of school-age attend school; there are 535,000 Moslem children not at school.

## GERMANY

In 1876 it was officially stated that the Empire counted 60,000 primary schools, the annual outlay by the State in maintaining them amounting to £3,400,000 sterling. In 1871 the report showed as follows:—

|                | Schools | Teachers | Pupils    | Pupils to Population, per Cent. |
|----------------|---------|----------|-----------|---------------------------------|
| Prussia . . .  | 34,988  | 57,936   | 4,008,000 | 16                              |
| Bavaria . . .  | 7,184   | 11,921   | 841,000   | 17                              |
| Saxony . . .   | 2,134   | 7,219    | 451,000   | 16                              |
| Baden . . .    | 1,957   | 3,603    | 245,000   | 16                              |
| Other States . | 6,540   | 11,320   | 784,000   | 15½                             |
| Total . . .    | 52,803  | 91,999   | 6,329,000 | 16                              |

In 1881 there were 57,000 schools, with 120,000 teachers and 7,100,000 pupils.

Superior education shows the following statistics:—

|                | Gymnasias | Grammar-Schools | Total |
|----------------|-----------|-----------------|-------|
| Prussia . . .  | 231       | 223             | 454   |
| Other States . | 105       | 172             | 277   |
| Total . . .    | 336       | 395             | 731   |

The gymnasias are maintained at a cost of £220,000 a year, of which one-half is defrayed by municipal rates. They have 6670 teachers and are as follows:—

|                   | Gymnasias | Pupils  |
|-------------------|-----------|---------|
| Protestants . . . | 173       | 192,500 |
| Catholics . . .   | 53        | 35,500  |
| Mixed . . .       | 110       | 28,000  |
| Total . . .       | 336       | 256,000 |

Official statistics for Prussia in 1843 compare with those in 1871 as follows:—

|                | 1843      | 1871      | Ratio of Increase |
|----------------|-----------|-----------|-------------------|
| Schools . . .  | 23,100    | 34,988    | 52 per cent.      |
| Teachers . . . | 27,600    | 57,936    | 110 "             |
| Pupils . . .   | 2,271,000 | 4,008,000 | 75 "              |

Germany has 21 Universities, with 1920 professors and 26,700 students. The following table shows the percentage of students according to religious belief, as compared with the percentage of population according to creed:—

|                   | General Population | University Students |
|-------------------|--------------------|---------------------|
| Protestants . . . | 64                 | 70                  |
| Roman Catholics . | 34                 | 20                  |
| Jews . . .        | 12                 | 10                  |
| Total . . .       | 100                | 100                 |

The Universities stand in this order:—

|                | Students |                | Students |
|----------------|----------|----------------|----------|
| Berlin . . .   | 5,700    | Bonn . . .     | 1,200    |
| Leipzig . . .  | 3,100    | Göttingen . .  | 1,100    |
| Münich . . .   | 2,300    | Würzburg . .   | 1,100    |
| Breslau . . .  | 1,600    | Heidelberg . . | 1,020    |
| Halle . . .    | 1,600    | Königsberg . . | 910      |
| Tübingen . . . | 1,400    | Ten others . . | 7,100    |

Of the total number of students 89 per cent. are Germans and 11 per cent. of other nations, Americans being 1 per cent. The oldest University is that of Heidelberg, which dates from 1386.

## RUSSIA

The *Rousski Kalendar* and other semi-official documents give the following statistics:—

| Year           | Schools | Pupils    | Pupils per 1000 Population |
|----------------|---------|-----------|----------------------------|
| 1804 . . . . . | 627     | 109,000   | 3                          |
| 1824 . . . . . | 2,118   | 263,000   | 6                          |
| 1838 . . . . . | 3,956   | 461,000   | 9                          |
| 1875 . . . . . | 32,100  | 1,213,000 | 15                         |
| 1889 . . . . . | 43,100  | 2,270,000 | 25                         |

The returns for 1875 and 1888 compare as follows:—

|                 | School-Children |           | Increase per Cent. |
|-----------------|-----------------|-----------|--------------------|
|                 | 1875            | 1888      |                    |
| Boys . . . . .  | 985,000         | 1,726,000 | 73                 |
| Girls . . . . . | 228,000         | 544,000   | 138                |
| Total . . . . . | 1,213,000       | 2,270,000 | 89                 |

The ratios of children at school were approximately:—

|                 | 1875  |       |       | 1888  |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
|                 | Boys  | Girls | Total | Boys  | Girls | Total |
| At school . . . | 11.5  | 2.6   | 6.9   | 16.7  | 5.4   | 11.0  |
| Not at school . | 88.5  | 97.4  | 93.1  | 83.3  | 94.6  | 89.0  |
| Total . . . . . | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

In 1802 the Czar Alexander I. founded the Universities of St. Petersburg and Moscow. It was not, however, until after the emancipation of the serfs, in 1861, that great efforts were made to educate the masses, 20,000 new schools being opened in the ensuing ten years. Besides the above primary schools there are gymnasias and middle-schools, as follows:—

|                   | No. | Pupils  |
|-------------------|-----|---------|
| For boys . . . .  | 622 | 168,000 |
| For girls . . . . | 324 | 62,300  |
| Total . . . . .   | 946 | 230,300 |

These schools had 7100 teachers, and half their cost is defrayed by the State. The Russian Government expended £3,800,000 on schools in 1889.

There were eight Universities in 1884, viz.:—

|                    | Professors | Students | State Subsidy, £ |
|--------------------|------------|----------|------------------|
| Moscow . . . . .   | 103        | 2,430    | 53,000           |
| St. Petersburg . . | 99         | 2,050    | 43,000           |
| Kiev . . . . .     | 105        | 1,470    | 46,000           |
| Dorpat . . . . .   | 65         | 1,430    | 26,000           |
| Warsaw . . . . .   | 79         | 1,000    | 29,000           |
| Kharkov . . . . .  | 89         | 820      | 37,000           |
| Kazan . . . . .    | 109        | 780      | 38,000           |
| Odessa . . . . .   | 52         | 380      | 25,000           |
| Total . . . . .    | 701        | 10,360   | 297,000          |

In 1888 the number of University students reached 12,900.

The annual subsidy for primary schools is £900,000, equal to 8s. per pupil.

## AUSTRIA-HUNGARY

Official returns for the whole Empire were as follows :—

| Year         | Schools | School-Children | Per 1000 Population |
|--------------|---------|-----------------|---------------------|
| 1837 . . . . | 16,754  | 2,313,000       | 83                  |
| 1870 . . . . | 31,100  | 3,189,000       | 90                  |
| 1878 . . . . | 31,740  | 3,663,000       | 99                  |
| 1889 . . . . | 35,720  | 4,903,000       | 130                 |

The amount spent yearly by Government on the above primary schools is £1,500,000, equal to 8s. per pupil. The returns for 1878 were as follows :—

|                           | Austria   | Hungary   | Total     |
|---------------------------|-----------|-----------|-----------|
| Number of schools . . . . | 15,166    | 16,574    | 31,740    |
| Teachers . . . . .        | 31,200    | 22,300    | 53,500    |
| Pupils, boys . . . . .    | 1,093,000 | 833,000   | 1,926,000 |
| Pupils, girls . . . . .   | 1,042,000 | 695,000   | 1,737,000 |
| Total pupils . . . . .    | 2,135,000 | 1,528,000 | 3,663,000 |

The whole educational system of Austria proper in 1889 is shown thus :—

|                           | Number | Professors | Scholars  |
|---------------------------|--------|------------|-----------|
| Universities . . . .      | 7      | 1,092      | 13,680    |
| High schools . . . .      | 61     | 691        | 4,720     |
| Middle schools . . . .    | 318    | 5,850      | 79,450    |
| Technical schools . . . . | 1,570  | 7,890      | 111,200   |
| Free schools . . . . .    | 16,945 | 57,236     | 2,748,300 |
| Total . . . . .           | 18,902 | 72,759     | 2,957,350 |

The statistics of seven Austrian Universities show as follows :—

|                      | Professors | Students |       |          |            | Total  | State Grant, £ |
|----------------------|------------|----------|-------|----------|------------|--------|----------------|
|                      |            | Theology | Law   | Medicine | Philosophy |        |                |
| Vienna . . . . .     | 361        | 217      | 1,998 | 2,598    | 643        | 5,456  | 83,000         |
| Grätz . . . . .      | 139        | 102      | 549   | 490      | 167        | 1,308  | 23,000         |
| Innsbruck . . . . .  | 86         | 251      | 261   | 202      | 104        | 818    | 21,000         |
| Prague . . . . .     | 285        | 269      | 1,580 | 1,404    | 421        | 3,674  | 63,000         |
| Lemberg . . . . .    | 69         | 361      | 598   | ...      | 125        | 1,084  | 15,000         |
| Cracow . . . . .     | 110        | 89       | 484   | 392      | 129        | 1,094  | 29,000         |
| Czernowitz . . . . . | 42         | 59       | 138   | ...      | 52         | 249    | 8,000          |
| Total . . . . .      | 1,092      | 1,348    | 5,608 | 5,086    | 1,641      | 13,683 | 242,000        |

The religion of the students showed these ratios :—

|                      | Percentage of Religion of Students |       |           |        |         |        |            |
|----------------------|------------------------------------|-------|-----------|--------|---------|--------|------------|
|                      | Vienna                             | Grätz | Innsbruck | Prague | Lemberg | Cracow | Czernowitz |
| Catholic . . . . .   | 54.9                               | 86.5  | 99.1      | 86.2   | 87.0    | 89.8   | 29.3       |
| Protestant . . . . . | 7.0                                | 5.4   | 0.5       | 1.9    | 0.3     | 4.3    | 4.4        |
| Jew . . . . .        | 33.2                               | 3.8   | 0.3       | 11.6   | 12.7    | 11.9   | 21.7       |
| Greek . . . . .      | 3.9                                | 4.3   | 0.1       | 0.3    | ...     | ...    | 44.6       |
|                      | 100.0                              | 100.0 | 100.0     | 100.0  | 100.0   | 100.0  | 100.0      |

In 1886 the ratios of children of school-age at school\* were :—

|                          | Austria | Hungary |
|--------------------------|---------|---------|
| Attending school . . . . | 85.0    | 80.4    |
| Not at school . . . . .  | 15.0    | 19.6    |
| Total . . . . .          | 100.0   | 100.0   |

Hungary has three Universities, viz. :—

|                       | Professors | Students |
|-----------------------|------------|----------|
| Buda-Pesth . . . . .  | 211        | 3,660    |
| Klausenburg . . . . . | 81         | 525      |
| Agram . . . . .       | 48         | 415      |
| Total . . . . .       | 340        | 4,600    |

The whole system of education in Hungary in 1886 stood thus :—

|                          | Number | Teachers | Pupils    | Males     | Females |
|--------------------------|--------|----------|-----------|-----------|---------|
| Universities . . . . .   | 3      | 340      | 4,600     | 4,600     | ...     |
| Middle schools . . . . . | 405    | 3,140    | 73,700    | 69,200    | 4,500   |
| Primary . . . . .        | 16,410 | 23,980   | 1,868,000 | 993,000   | 875,000 |
| Total . . . . .          | 16,818 | 27,460   | 1,946,300 | 1,066,800 | 879,500 |

The sum paid yearly in salaries to teachers of primary schools is £880,000 sterling, or £36 each.

The following table shows the advance of education in Hungary in eight years :—

| Year           | Primary Schools |           | All Schools |           |
|----------------|-----------------|-----------|-------------|-----------|
|                | Teachers        | Pupils    | Teachers    | Pupils    |
| 1880 . . . . . | 21,700          | 1,620,000 | 24,900      | 1,670,000 |
| 1884 . . . . . | 23,100          | 1,790,000 | 27,100      | 1,850,000 |
| 1888 . . . . . | 24,400          | 1,950,000 | 28,900      | 2,015,000 |

The languages taught in the primary schools are :—

| Austria           | Schools | Hungary           | Schools |
|-------------------|---------|-------------------|---------|
| German . . . . .  | 7,001   | Magyar . . . . .  | 7,938   |
| Czech . . . . .   | 4,246   | Various . . . . . | 8,472   |
| Various . . . . . | 5,698   | Total . . . . .   | 16,410  |
| Total . . . . .   | 16,945  |                   |         |

The advance of public instruction among the masses between the years 1868 and 1880 is shown by the ratio of conscripts able to read, viz. :—

|                     | 1868         | 1880         |
|---------------------|--------------|--------------|
| Austrian . . . . .  | 34 per cent. | 61 per cent. |
| Hungarian . . . . . | 22           | 49           |

In 1874 the ratios of conscripts able to read and write were :—

|                    | Per Cent. |                   | Per Cent. |
|--------------------|-----------|-------------------|-----------|
| Galitzia . . . . . | 15.5      | Moravia . . . . . | 71.4      |
| Croatia . . . . .  | 42.3      | Styria . . . . .  | 73.7      |
| Tyrol . . . . .    | 53.4      | Bohemia . . . . . | 84.7      |
| Hungary . . . . .  | 60.0      | Austria . . . . . | 90.0      |

In 1880 the ratio of adults able to sign the marriage register were as follows :—

|                   | Per Cent. |         |            |
|-------------------|-----------|---------|------------|
|                   | Males     | Females | Both Sexes |
| Austria . . . . . | 61        | 53      | 57         |
| Hungary . . . . . | 49        | 30      | 39         |

\* This shows the ratio of children on the school-rolls; the average attendance was only 65 per cent. of children of school-age.

The ratios of children of school-age attending school were:—

|                  | Per Cent. |                 | Per Cent. |
|------------------|-----------|-----------------|-----------|
| Galitzia . . . . | 27        | Styria . . . .  | 80        |
| Illyria . . . .  | 47        | Moravia . . . . | 90        |
| Hungary . . . .  | 76        | Austria . . . . | 90        |

The general average for the whole Empire was 70 per cent.

## ITALY

Official returns show that the number of children at primary schools has doubled since 1862, viz.:—

| Year | Boys      | Girls     | Total     | Per 1000 Population |
|------|-----------|-----------|-----------|---------------------|
| 1862 | 627,000   | 483,000   | 1,110,000 | 50                  |
| 1870 | 890,000   | 683,000   | 1,573,000 | 61                  |
| 1877 | ...       | ...       | 2,082,000 | 75                  |
| 1887 | 1,194,000 | 1,059,000 | 2,253,000 | 75                  |

The returns for 1887 compare with 1877 thus:—

|              | 1877    |           | 1887    |           |
|--------------|---------|-----------|---------|-----------|
|              | Schools | Pupils    | Schools | Pupils    |
| Primary . .  | 44,050  | 2,082,000 | 53,630  | 2,253,000 |
| Superior . . | 13,910  | 555,000   | 16,877  | 818,000   |
| Total        | 57,960  | 2,637,000 | 70,507  | 3,071,000 |

The returns for 1887 showed as follows:—

| Primary Schools |           | All Schools, Teachers |        |
|-----------------|-----------|-----------------------|--------|
| Boys . . . .    | 1,194,000 | Primary . . . .       | 55,300 |
| Girls . . . .   | 1,059,000 | Superior . . . .      | 31,100 |
| Total . . . .   | 2,253,000 | Total . . . .         | 86,400 |

The progress of instruction is shown in the following table:—

| Year         | Conscripts Able to Read | Percentage Signing Marriage Register |       |
|--------------|-------------------------|--------------------------------------|-------|
|              | Per Cent.               | Men                                  | Women |
| 1866 . . . . | 36.0                    | 40.0                                 | 21.0  |
| 1871 . . . . | 43.3                    | 42.3                                 | 23.3  |
| 1881 . . . . | 52.3                    | 51.8                                 | 30.1  |
| 1887 . . . . | 55.0                    | 57.2                                 | 37.2  |

The percentage of persons in Italy, at various ages, who could read was as follows:—

| Age, Years    | Towns Only |      | All Italy |      |         |      |
|---------------|------------|------|-----------|------|---------|------|
|               |            |      | Males     |      | Females |      |
|               | 1871       | 1881 | 1871      | 1881 | 1871    | 1881 |
| 6-18 . . . .  | 52         | 59   | 45        | 56   | 34      | 43   |
| 18-25 . . . . | 60         | 68   | 51        | 59   | 43      | 53   |
| 25-40 . . . . | 59         | 66   | 48        | 53   | 40      | 46   |
| 40-60 . . . . | 55         | 58   | 43        | 37   | 40      | 17   |

In 1871 the percentage of persons over seven years who could read, in the various provinces, stood thus:—

|                  | Males | Females | Total Population |
|------------------|-------|---------|------------------|
| Sicily . . . .   | 35    | 24      | 30               |
| Naples . . . .   | 34    | 22      | 28               |
| Tuscany . . . .  | 49    | 38      | 44               |
| Romagna . . . .  | 49    | 39      | 44               |
| Venetia . . . .  | 55    | 37      | 46               |
| Lombardy . . . . | 67    | 59      | 63               |
| Piedmont . . . . | 73    | 59      | 66               |

The ratio was 35 at Messina, 76 at Florence and Genoa, and 83 per cent. at Turin.

There are twenty-one Universities, with 600 professors and 9000 students; the principal Universities are:—

|                | Students |               | Students |
|----------------|----------|---------------|----------|
| Naples . . . . | 1,450    | Padua . . . . | 970      |
| Turin . . . .  | 1,230    | Rome . . . .  | 560      |

The annual Government expenditure for education is £3,100,000 sterling.

## SPAIN

The number of schools and scholars was as follows:—

| Year | Public | Private | Total  | Pupils    | Per 1000 Population |
|------|--------|---------|--------|-----------|---------------------|
| 1850 | 13,334 | 4,100   | 17,434 | 664,000   | 51                  |
| 1870 | 22,711 | 5,406   | 28,117 | 1,426,000 | 94                  |
| 1885 | 24,529 | 7,350   | 31,879 | 1,843,000 | 106                 |

The sexes of pupils are said to be sixty males to forty females.

The percentage of persons able to read and write was as follows:—

|                    | 1860 |       |       | 1877 |       |       |
|--------------------|------|-------|-------|------|-------|-------|
|                    | Men  | Women | Total | Men  | Women | Total |
| Read and write . . | 31   | 9     | 20    | 34   | 15    | 25    |
| Read only . .      | 4    | 5     | 5     | 3    | 4     | 3     |
| Ignorant . .       | 65   | 86    | 75    | 63   | 81    | 72    |
| Total . .          | 100  | 100   | 100   | 100  | 100   | 100   |

The progress made in middle-class or superior schools has been:—

| Year         | Pupils |
|--------------|--------|
| 1858 . . . . | 15,000 |
| 1868 . . . . | 25,300 |
| 1878 . . . . | 33,500 |

The total expenditure for schools in 1879 was one million sterling,\* besides £100,000 for Universities. There are 10 universities, with 380 professors and 16,200 students; the number in 1865 was only 9700. The oldest University is Salamanca, founded in 1240; it has 40 professors and 1300 students. In Spain 35 per cent. of adults can sign the marriage register, against 18 per cent. in 1848. The Census of 1860 showed as follows:—

|                 | Able to Read | Ratio to Population over 7 Years Old |
|-----------------|--------------|--------------------------------------|
| Males . . . .   | 2,731,000    | 40 per cent.                         |
| Females . . . . | 1,105,000    | 16 „                                 |
| Total . . . .   | 3,836,000    | 28 „                                 |

## PORTUGAL

The educational system is as follows:—

|                         | Number | Pupils  |
|-------------------------|--------|---------|
| University . . . .      | 1      | 1,300   |
| Colleges . . . .        | 70     | 14,200  |
| Private schools . . . . | 1,935  | 65,100  |
| Public schools . . . .  | 3,657  | 176,000 |
| Total . . . .           | 5,663  | 256,600 |

\* Of this sum the Government provides only £80,000, the rest being supplied by municipal rates. Teachers earn about £20 a year.

The increase of primary instruction is remarkable :—

| Year           | Schools | Scholars | Per 1000 Population |
|----------------|---------|----------|---------------------|
| 1854 . . . . . | 1,350   | 55,000   | 14                  |
| 1870 . . . . . | 3,000   | 130,000  | 32                  |
| 1878 . . . . . | 4,520   | 198,000  | 46                  |
| 1886 . . . . . | 5,384   | 237,000  | 54                  |

The annual outlay for education is £220,000 sterling.

#### HOLLAND

The scheme of instruction in 1888 was :—

|                           | Number | Teachers | Pupils  |
|---------------------------|--------|----------|---------|
| Universities . . . . .    | 4      | 180      | 2,600   |
| Colleges . . . . .        | 212    | 2,120    | 18,700  |
| Private schools . . . . . | 1,204  | 4,767    | 177,100 |
| Public schools . . . . .  | 2,940  | 12,823   | 449,400 |
| Infant schools . . . . .  | 1,088  | ...      | 110,000 |
| Total . . . . .           | 5,448  | 19,890   | 757,800 |

The returns of primary schools showed thus :—

| Year           | Schools | Scholars | Per 1000 Population |
|----------------|---------|----------|---------------------|
| 1835 . . . . . | 2,830   | 304,000  | 102                 |
| 1870 . . . . . | 3,614   | 456,000  | 120                 |
| 1877 . . . . . | 3,821   | 523,000  | 132                 |
| 1888 . . . . . | 4,144   | 627,000  | 145                 |

The public primary schools of Belgium were as follows :—

| Year           | Number of Schools | Pupils  |         |         | Free    | Paying  |
|----------------|-------------------|---------|---------|---------|---------|---------|
|                |                   | Male    | Female  | Total   |         |         |
| 1845 . . . . . | 3,431             | 182,900 | 143,700 | 326,600 | 174,400 | 152,200 |
| 1857 . . . . . | 3,787             | 219,100 | 180,500 | 399,600 | 250,200 | 149,400 |
| 1869 . . . . . | 4,260             | 267,400 | 226,000 | 493,400 | 339,200 | 154,200 |
| 1878 . . . . . | 4,839             | 318,500 | 279,700 | 598,200 | 452,300 | 145,900 |
| 1887 . . . . . | 5,491             | 331,400 | 272,600 | 604,000 | 516,700 | 87,400  |

The income and expenditure of the above schools were as follows :—

|                        | 1843    | 1860    | 1870    | 1880      | 1886      |
|------------------------|---------|---------|---------|-----------|-----------|
| Fees . . . . .         | £28,000 | £34,000 | £46,000 | £44,000   | £72,000   |
| Local grants . . . . . | 34,000  | 74,000  | 132,000 | 266,000   | 375,000   |
| State grants . . . . . | 8,000   | 54,000  | 140,000 | 376,000   | 290,000   |
| Sundries . . . . .     | 34,000  | 108,000 | 289,000 | 714,000   | 343,000   |
| Expenditure . . . . .  | 104,000 | 270,000 | 607,000 | 1,400,000 | 1,080,000 |

There are four Universities, the returns of which show the number of students thus :—

|                    | 1840  | 1870  | 1888  |                          | 1840  | 1870  | 1888  |
|--------------------|-------|-------|-------|--------------------------|-------|-------|-------|
| Ghent . . . . .    | 396   | 459   | 838   | Philosophy . . . . .     | 344   | 257   | 657   |
| Liege . . . . .    | 331   | 653   | 1,470 | Science . . . . .        | 293   | 350   | 1,351 |
| Brussels . . . . . | 279   | 496   | 1,795 | Law . . . . .            | 359   | 605   | 1,392 |
| Louvain . . . . .  | 490   | 907   | 1,757 | Medicine . . . . .       | 272   | 562   | 1,484 |
|                    |       |       |       | Engineering, &c. . . . . | 228   | 741   | 976   |
| Total . . . . .    | 1,496 | 2,515 | 5,860 | Total . . . . .          | 1,496 | 2,515 | 5,860 |

In 1887 the expenditure was :—

|                           |            |                          |           |
|---------------------------|------------|--------------------------|-----------|
| Primary schools . . . . . | £1,000,000 | State grant . . . . .    | £580,000  |
| Colleges . . . . .        | 240,000    | Communal grant . . . . . | 720,000   |
| Total . . . . .           | 1,300,000  | Total . . . . .          | 1,300,000 |

The ratio of conscripts able to read and write was as follows :—

| Year           | Able to Read | To Read and Write |
|----------------|--------------|-------------------|
| 1850 . . . . . | 77.2         | 74.9              |
| 1860 . . . . . | 80.2         | 78.0              |
| 1876 . . . . . | 88.0         | 87.0              |

The sexes of children attending school were boys 54, girls 46.

#### BELGIUM

The whole educational system may be summed up as follows :—

|                           | Number | Pupils  |
|---------------------------|--------|---------|
| Universities . . . . .    | 4      | 5,900   |
| Colleges . . . . .        | 171    | 33,100  |
| Adult schools . . . . .   | 1,644  | 65,300  |
| Primary schools . . . . . | 5,491  | 604,100 |
| Infant schools . . . . .  | 947    | 99,300  |
| Total . . . . .           | 8,257  | 807,700 |

The number of persons able to read and write was as follows :—

|                   | 1866      | 1888      |
|-------------------|-----------|-----------|
| Males . . . . .   | 1,209,000 | 1,661,000 |
| Females . . . . . | 1,070,000 | 1,527,000 |
| Total . . . . .   | 2,279,000 | 3,188,000 |

The ratio of conscripts able to read and write was as follows :—

|                          | 1843  | 1860  | 1870  | 1889  |
|--------------------------|-------|-------|-------|-------|
| Illiterate . . . . .     | 43.6  | 31.8  | 24.0  | 13.1  |
| Read only . . . . .      | 7.2   | 7.6   | 5.2   | 2.9   |
| Read and write . . . . . | 49.2  | 60.6  | 70.8  | 84.0  |
|                          | 100.0 | 100.0 | 100.0 | 100.0 |

## SWEDEN

Latest returns are to this effect :—

|                           | Number | Pupils  |
|---------------------------|--------|---------|
| Universities . . . . .    | 2      | 2,700   |
| Colleges . . . . .        | 146    | 16,700  |
| Primary schools . . . . . | 10,338 | 708,000 |
| Total . . . . .           | 10,486 | 727,400 |

In 1859 the primary schools had 2950 teachers, and the ratio of children of school-age attending school was 71 per cent. In 1888 there were 12,880 teachers, and the ratio of children at school was 98 per cent. Only three recruits in 1000 cannot read and write. The outlay for schools is £600,000 a year, one-fourth from the Treasury, the rest municipal. The University of Upsal has 1800 students, that of Lund 900.

## NORWAY

The scheme of instruction in 1886 was as follows :—

|                           | Number | Pupils  |
|---------------------------|--------|---------|
| University . . . . .      | 1      | 1,700   |
| Academies . . . . .       | 128    | 12,500  |
| Primary schools . . . . . | 6,340  | 288,700 |
| Total . . . . .           | 6,469  | 302,900 |

The annual outlay is £260,000, mostly raised by municipal rates. The State gives £25,000 a year to the University of Christiania.

## DENMARK

The returns for 1888 show as follows :—

|                           | Number | Pupils  |
|---------------------------|--------|---------|
| University . . . . .      | 1      | 1,300   |
| Colleges . . . . .        | 40     | ...     |
| Primary schools . . . . . | 2,940  | 232,000 |
| Total . . . . .           | 2,981  | 233,300 |

The University of Copenhagen, founded in 1479, has sixty professors.

## SWITZERLAND

The number of Swiss students (exclusive of 630 foreigners) was as follows at the four Universities :—

| Geneva . . . . . | 217   | Medicine . . . . . | 558   |
|------------------|-------|--------------------|-------|
| Berne . . . . .  | 430   | Law . . . . .      | 219   |
| Zurich . . . . . | 335   | Divinity . . . . . | 200   |
| Basel . . . . .  | 293   | Science . . . . .  | 298   |
| Total . . . . .  | 1,275 | Total . . . . .    | 1,275 |

In 1886 the returns showed as follows :—

|                            | Number | Teachers | Pupils  |
|----------------------------|--------|----------|---------|
| Universities . . . . .     | 4      | 351      | 1,900   |
| Academies . . . . .        | 882    | ...      | 41,000  |
| Girls' academies . . . . . | 1,600  | 3,543    | 136,500 |
| Primary schools . . . . .  | 4,308  | 8,826    | 461,600 |
| Other schools . . . . .    | ...    | ...      | 260,500 |
| Total . . . . .            | ...    | ...      | 901,500 |

In 1830 only 78 per cent. were able to sign the marriage register; in 1871 the ratio was 88 per cent. The above school total includes 245,000 adults attending night-schools.

## ROUMANIA

In 1883 the official returns were :—

|                           | Number | Pupils  |
|---------------------------|--------|---------|
| Universities . . . . .    | 2      | 700     |
| Academies . . . . .       | 62     | 8,800   |
| Primary schools . . . . . | 2,743  | 124,100 |
| Total . . . . .           | 2,807  | 133,600 |

The Universities of Bucharest and Jassy had ninety-seven professors.

## SERVIA

The educational system in 1888 was as follows :—

|                           | Number | Teachers | Pupils |
|---------------------------|--------|----------|--------|
| University . . . . .      | 1      | 31       | 300    |
| Academies . . . . .       | 33     | 423      | 7,300  |
| Primary schools . . . . . | 668    | 1,194    | 52,400 |
| Total . . . . .           | 702    | 1,648    | 59,900 |

The annual expenditure by the State is £100,000, besides municipal subsidies. In 1884 only 10 per cent. of the population could read and write, that is, about 15 per cent., excluding infants.

## GREECE

The educational system in 1884 showed thus :—

|                           | Number | Teachers | Pupils  |
|---------------------------|--------|----------|---------|
| University . . . . .      | 1      | 98       | 2,400   |
| Academies . . . . .       | 418    | 776      | 22,300  |
| Primary schools . . . . . | 2,281  | 2,500    | 118,000 |
| Total . . . . .           | 2,700  | 3,374    | 142,700 |

The annual expenditure is £240,000 sterling.

## UNITED STATES

The first educational census was taken in 1840, and the official returns since then show thus :—

| Year | Schools | Revenue, £ Sterling | Teachers | Scholars   | Scholars per 1000 Pop. |
|------|---------|---------------------|----------|------------|------------------------|
| 1840 | 50,700  | ...                 | ...      | 2,025,000  | 119                    |
| 1850 | 87,300  | 3,400,000           | ...      | 3,642,000  | 160                    |
| 1860 | 113,000 | 7,100,006           | 148,700  | 5,693,000  | 180                    |
| 1870 | 141,600 | 19,400,000          | 221,040  | 6,596,000  | 171                    |
| 1880 | 171,200 | 29,100,000          | 272,700  | 9,705,000  | 194                    |
| 1888 | ...     | ...                 | 347,300  | 11,950,000 | 196                    |

The number of scholars is that on the rolls, but the average attendance is about 63 per cent. of same.

| Year       | On the Rolls | Average Attendance | Ratio        |
|------------|--------------|--------------------|--------------|
| 1880 . . . | 9,705,000    | 6,049,000          | 62 per cent. |
| 1885 . . . | 11,170,000   | 7,020,000          | 63 "         |
| 1888 . . . | 11,950,000   | 7,852,000          | 65 "         |

As the population in 1888 was 60 millions, the average attendance was equal to 131 per thousand of population, against 123 in the United Kingdom. Considering the vast extent and scattered population of the United States, this result is admirable.

School revenue seems largely to exceed expenditure, the latter in 1888 being stated at £25,510,000, whereas the school revenue of 1880 was said to reach £29,100,000 sterling.

The school-children in the various States were as follows :—

|                      | 1840      | 1860      | 1885       | Average Attendance, 1885 | Average Attendance per 1000 Population, 1880 |
|----------------------|-----------|-----------|------------|--------------------------|----------------------------------------------|
| Alabama . . .        | 21,000    | 98,000    | 234,000    | 145,000                  | 116                                          |
| Arkansas . . .       | 3,000     | 43,000    | 153,000    | 93,000 *                 | 116                                          |

| Texas . . .          | ...       | 63,000    | 245,000    | 154,000                  | 97                                           |
| Vermont . . .        | 87,000    | 80,000    | 72,000     | 49,000                   | 150                                          |
| Virginia . . .       | 47,000    | 155,000   | 475,000    | 286,000                  | 134                                          |
| Wisconsin . . .      | 2,000     | 189,000   | 322,000    | 175,000                  | 134                                          |
| Territories . . .    | ...       | 101,000   | 195,000    | 110,000                  | 140                                          |
| Total . . .          | 2,025,000 | 5,693,000 | 11,170,000 | 7,020,000                | 140                                          |

In the preceding table the ratio of school children to population in 1885 is not correct, as the only basis for comparison is the Census of 1880, which figures are on an average 15 per cent. too low.

The two Virginias, be it noted, are put together as one State.

Taking the four great divisions of the Union, we find :—

| States            | Average Attendance |           | Ratio of Increase | Per 1000 Population in 1885 |
|-------------------|--------------------|-----------|-------------------|-----------------------------|
|                   | 1880               | 1885      |                   |                             |
| New England . . . | 541,000            | 564,000   | 4 per cent.       | 140                         |
| Middle . . .      | 1,417,000          | 1,505,000 | 6 "               | 120                         |
| South . . .       | 1,509,000          | 1,852,000 | 22 "              | 120                         |
| West . . .        | 2,582,000          | 3,099,000 | 19 "              | 164                         |
| Total . . .       | 6,049,000          | 7,020,000 | 17 per cent.      | 140                         |

The expenditure on primary schools in 1880 was :—

| States            | Amount      | Ratio per Inhabitant | Per Pupil, Average Attending |
|-------------------|-------------|----------------------|------------------------------|
| New England . . . | £ 1,908,000 | £ s. d. 0 9 6        | £ s. d. 3 12 0               |
| Middle . . .      | 4,563,000   | 0 6 9                | 3 5 6                        |
| South . . .       | 1,479,000   | 0 2 0                | 0 19 6                       |
| West . . .        | 7,952,000   | 0 9 6                | 3 5 8                        |
| Pacific . . .     | 683,000     | 0 10 9               | 5 3 0                        |
| The Union . . .   | 16,585,000  | 0 6 6                | 2 15 0                       |

\* Arkansas, Michigan, and Texas give no returns of "average attendance." For the sake of comparison, I assume the general ratio of the Union, that is, 63 per cent. of the children on the rolls.

The number of white population over twenty years of age who could not read was as follows :—

| Year           | Number    | Percentage of Population |
|----------------|-----------|--------------------------|
| 1840 . . . . . | 550,000   | 7.8                      |
| 1850 . . . . . | 1,053,000 | 11.2                     |
| 1860 . . . . . | 1,218,000 | 9.2                      |

The Census subsequently extended the inquiry to all persons, white or coloured, over ten years of age, with the result :—

| Year           | Unable to Read over Ten Years | Percentage of Population |
|----------------|-------------------------------|--------------------------|
| 1870 . . . . . | 4,528,000                     | 16.0                     |
| 1880 . . . . . | 3,019,000                     | 8.1                      |

This shows what progress education has made since 1870, the proportion of illiterate persons over ten years old having been reduced by one-half in a single decade. The greatest relative advancement is in the South, where (as shown above) the average attendance of school children rose 22 per cent. between 1880 and 1885. The number of children on the school rolls in 1860 and 1885 compared thus :—

| States                | Children on Rolls |            | Increase     |
|-----------------------|-------------------|------------|--------------|
|                       | 1860              | 1885       |              |
| New England . . . . . | 722,000           | 801,000    | 11 per cent. |
| Middle . . . . .      | 1,694,000         | 2,431,000  | 44 "         |
| South . . . . .       | 1,088,000         | 2,973,000  | 173 "        |
| West . . . . .        | 2,189,000         | 4,965,000  | 127 "        |
| Total . . . . .       | 5,693,000         | 11,170,000 | 96 per cent. |

The intermediate and superior instruction in 1880 showed thus :—

|                               | Number | Teachers | Students |
|-------------------------------|--------|----------|----------|
| University colleges . . . . . | 364    | 4,240    | 60,000   |
| Academies . . . . .           | 1,860  | 5,960    | 183,000  |
| Total . . . . .               | 2,224  | 10,200   | 243,000  |

The most celebrated University is Harvard, near Boston, founded in 1638. The number of universities and colleges in 1775 was ten, rising to 21 in 1791.

The University students in 1880 were :—

|                    |       |                    |        |
|--------------------|-------|--------------------|--------|
| Law . . . . .      | 3,100 | Medicine . . . . . | 12,000 |
| Theology . . . . . | 5,800 | Arts . . . . .     | 30,200 |
| Science . . . . .  | 8,900 |                    |        |
|                    |       | Total . . . . .    | 60,000 |

The records of Indian education for 1888 sum up thus :—

| Schools           | No.     | Pupils    | Schools           | No.     | Pupils    | Schools             | No.     | Pupils    |
|-------------------|---------|-----------|-------------------|---------|-----------|---------------------|---------|-----------|
| State . . . . .   | 78,304  | 2,959,000 | Males . . . . .   | 126,298 | 3,193,700 | Primary . . . . .   | 89,400  | 2,557,000 |
| Private . . . . . | 55,048  | 515,000   | Females . . . . . | 7,054   | 280,300   | Secondary . . . . . | 43,952  | 917,000   |
| Total . . . . .   | 133,352 | 3,474,000 | Total . . . . .   | 133,352 | 3,474,000 | Total . . . . .     | 133,352 | 3,474,000 |

The above is the number of children on the rolls, the average attendance being 78 per cent., say 2,710,000 children.

The Government subsidy is £600,000, fees and local rates £1,500,000. The Universities of Calcutta, Madras and Bombay have 6000 students.

In the preceding tables no account is taken of orphanages, &c., which in 1880 instructed 774,000 children, viz. :—

|                         | Number | Children |
|-------------------------|--------|----------|
| Orphanages . . . . .    | 411    | 751,000  |
| Blind, &c. . . . .      | 83     | 8,600    |
| Reformatories . . . . . | 67     | 14,200   |
| Total . . . . .         | 561    | 773,800  |

The grand total of 1888 therefore reaches 13,126,000 persons receiving instruction, or 22 per cent. of the population.

#### CANADA

In 1850 there were but 1700 schools, and in 1887 the number exceeded 15,600. The returns for 1887 compare with 1879 as follows :—

|                    | 1879    | 1887    |
|--------------------|---------|---------|
| Schools . . . . .  | 12,786  | 15,607  |
| Teachers . . . . . | 16,297  | 18,942  |
| Pupils . . . . .   | 866,000 | 984,000 |

The returns for 1887 were as follows :—

| Province                | Teachers | Pupils on Roll | Average Attendance | Expenditure, £ |
|-------------------------|----------|----------------|--------------------|----------------|
| Ontario . . . . .       | 7,775    | 504,000        | 248,000            | 700,000        |
| Quebec . . . . .        | 6,121    | 253,000        | 130,000            | 70,000         |
| Nova Scotia . . . . .   | 2,119    | 105,000        | 51,000             | 130,000        |
| New Brunswick . . . . . | 1,644    | 69,000         | 34,000             | 80,000         |
| P. Edward I. . . . .    | 518      | 22,000         | 12,000             | 30,000         |
| Manitoba, &c. . . . .   | 765      | 26,000         | 12,000             | 90,000         |
| Total . . . . .         | 18,942   | 979,000        | 487,000            | 1,100,000      |

The Universities of Quebec, Montreal, and Toronto are ably conducted and largely attended.

#### MOROCCO

There is a Mahometan university at Fez, attended by 700 students, but the studies are mostly limited to the Koran.

#### INDIA

Public instruction may be said to date from 1858, when the East India Company possessions were annexed to the British Crown. The records show as follows :—

| Year           | Schools | Scholars  | Expenditure |
|----------------|---------|-----------|-------------|
| 1857 . . . . . | ...     | 200,000   | 200,000     |
| 1874 . . . . . | 43,188  | 977,000   | 760,000     |
| 1878 . . . . . | 82,561  | 2,196,000 | 1,660,000   |
| 1888 . . . . . | 133,352 | 3,474,000 | 2,100,000   |

## AUSTRALIA

The returns for 1880 showed thus :—

|                | Schools | Teachers | Pupils    |                    | Expenditure, £ |
|----------------|---------|----------|-----------|--------------------|----------------|
|                |         |          | En-rolled | Average Attendance |                |
| N. S. Wales .  | 1,910   | 3,393    | 169,000   | 72,000             | 475,000        |
| Victoria . .   | 2,430   | 4,950    | 269,000   | 120,000            | 553,000        |
| New Zealand .  | 836     | 2,681    | 84,000    | 63,000             | 384,000        |
| S. Australia . | 370     | 837      | 36,000    | 20,000             | 87,000         |
| Queensland .   | 338     | 924      | 43,000    | 24,000             | 124,000        |
| Tasmania . .   | 171     | 323      | 12,000    | 8,000              | 24,000         |
| W. Australia . | 102     | 108      | 5,000     | 3,000              | 10,000         |
| Total . . .    | 6,157   | 13,216   | 618,000   | 311,000            | 1,657,000      |

The progress of instruction in late years has been very rapid, as these figures show :—

| Year       | Schools | Pupils  |         |         | Expenditure, £ |
|------------|---------|---------|---------|---------|----------------|
|            |         | Boys    | Girls   | Total   |                |
| 1861 . . . | ...     | 69,000  | 61,000  | 130,000 | ...            |
| 1871 . . . | ...     | 165,000 | 147,000 | 312,000 | ...            |
| 1881 . . . | 6,157   | 344,000 | 327,000 | 671,000 | 1,657,000      |
| 1888 . . . | 9,104   | 401,000 | 382,000 | 783,000 | 1,930,000      |

The returns for 1888 were as follows :—

|                   | Pupils  | Schools | Average |
|-------------------|---------|---------|---------|
| Public schools .  | 618,000 | 6,816   | 90      |
| Private schools . | 165,000 | 2,288   | 72      |
| Total . . .       | 783,000 | 9,104   | 86      |

|                             | Schools |         |       | Pupils on Roll | Average at Public Schools | Expenditure, £ |
|-----------------------------|---------|---------|-------|----------------|---------------------------|----------------|
|                             | Public  | Private | Total |                |                           |                |
| New South Wales . . . . .   | 2,291   | 659     | 2,950 | 227,000        | 112,000                   | 600,000        |
| Victoria . . . . .          | 1,930   | 752     | 2,682 | 280,000        | 129,000                   | 620,000        |
| New Zealand . . . . .       | 1,208   | 300     | 1,508 | 130,000        | 96,000                    | 380,000        |
| South Australia . . . . .   | 530     | 293     | 823   | 60,000         | 28,000                    | 100,000        |
| Queensland . . . . .        | 544     | 134     | 678   | 59,000         | 39,000                    | 180,000        |
| Tasmania . . . . .          | 220     | 150     | 370   | 22,000         | 9,000                     | 40,000         |
| Western Australia . . . . . | 93      | ...     | 93    | 5,000          | 4,000                     | 10,000         |
| Total . . . . .             | 6,816   | 2,288   | 9,104 | 783,000        | 417,000                   | 1,930,000      |

The number of persons who could read and write in the several colonies, according to Census returns, was as follows :—

|                             | Census of 1861 |           |             |                |           |             |
|-----------------------------|----------------|-----------|-------------|----------------|-----------|-------------|
|                             | Number         |           |             | Percentage     |           |             |
|                             | Read and Write | Read Only | Cannot Read | Read and Write | Read Only | Cannot Read |
| New South Wales . . . . .   | 189,000        | 46,000    | 116,000     | 54             | 13        | 33          |
| Victoria . . . . .          | 328,000        | 57,000    | 156,000     | 60             | 11        | 29          |
| Queensland . . . . .        | 17,000         | 4,000     | 9,000       | 57             | 12        | 31          |
| South Australia . . . . .   | 72,000         | 19,000    | 36,000      | 57             | 14        | 29          |
| New Zealand . . . . .       | 68,000         | 9,000     | 22,000      | 68             | 9         | 23          |
| Tasmania . . . . .          | 48,000         | 13,000    | 29,000      | 53             | 15        | 32          |
| Western Australia . . . . . | 8,000          | 2,000     | 6,000       | 56             | 10        | 34          |
| Total . . . . .             | 730,000        | 150,000   | 374,000     | 58             | 12        | 30          |

|                             | Census of 1881 |           |             |                |           |             |
|-----------------------------|----------------|-----------|-------------|----------------|-----------|-------------|
|                             | Number         |           |             | Percentage     |           |             |
|                             | Read and Write | Read Only | Cannot Read | Read and Write | Read Only | Cannot Read |
| New South Wales . . . . .   | 507,000        | 49,000    | 195,000     | 68             | 7         | 25          |
| Victoria . . . . .          | 652,000        | 50,000    | 161,000     | 76             | 6         | 18          |
| Queensland . . . . .        | 137,000        | 14,000    | 63,000      | 65             | 6         | 29          |
| South Australia . . . . .   | 200,000        | 15,000    | 65,000      | 72             | 5         | 23          |
| New Zealand . . . . .       | 346,000        | 27,000    | 116,000     | 71             | 6         | 23          |
| Tasmania . . . . .          | 75,000         | 10,000    | 31,000      | 65             | 8         | 27          |
| Western Australia . . . . . | 20,000         | 2,000     | 8,000       | 67             | 7         | 26          |
| Total . . . . .             | 1,937,000      | 167,000   | 639,000     | 70             | 7         | 23          |

From the preceding table it appears that in 1881 popular instruction was most general in Victoria, and that, on the other hand, Tasmania and Queensland stood lowest.

The percentage of persons able to sign the marriage register in Australasia was as follows :—

| Year           | Men | Women | Total |
|----------------|-----|-------|-------|
| 1861 . . . . . | 81  | 69    | 75    |
| 1871 . . . . . | 89  | 84    | 87    |
| 1881 . . . . . | 96  | 93    | 95    |
| 1888 . . . . . | 97  | 97    | 97    |

## SOUTH AFRICA

The colonies of the Cape and Natal in 1888 showed :—

|                 | Schools | Pupils | Average Attendance | Outlay, £ |
|-----------------|---------|--------|--------------------|-----------|
| Cape . . . . .  | 1,407   | 88,000 | 47,000             | 220,000   |
| Natal . . . . . | 124     | 11,000 | 9,000              | 30,000    |
| Total . . . . . | 1,531   | 99,000 | 56,000             | 250,000   |

There is a University at Cape Town with 250 students.

## CEYLON

The returns for 1872 and 1888 compare thus :—

|             | Schools |       | Pupils |         |
|-------------|---------|-------|--------|---------|
|             | 1872    | 1888  | 1872   | 1888    |
| Public . .  | 602     | 1,357 | 36,000 | 102,000 |
| Private . . | 365     | 2,292 | 9,000  | 29,000  |
| Total . .   | 967     | 3,649 | 45,000 | 131,000 |

The Government subsidy is £40,000 yearly. About 5 per cent. of the whole population attend school.

## CYPRUS

In 1888 the returns were as follows :—

|                   | Schools | Pupils |
|-------------------|---------|--------|
| Christian . . . . | 219     | 10,400 |
| Mahometan . . . . | 86      | 3,100  |
| Total . . . .     | 305     | 13,500 |

Annual expenditure, £9000, one-third being a State grant.

## MINOR COLONIES

The latest returns show as follows :—

|               | Schools |         |       | Pupils |         |        |
|---------------|---------|---------|-------|--------|---------|--------|
|               | Public  | Private | Total | Public | Private | Total  |
| Hong-Kong     | 97      | 107     | 204   | 6,000  | 2,000   | 8,000  |
| Singapore . . | 150     | 32      | 182   | 7,000  | 3,000   | 10,000 |
| Mauritius . . | 144     | ...     | 144   | 16,000 | ...     | 16,000 |
| Jamaica . . . | 771     | ...     | 771   | 72,000 | ...     | 72,000 |

There are many private schools at Jamaica, but no returns.

## JAPAN

Education has lost ground of late years, viz. :—

|                  | 1882      | 1888      |
|------------------|-----------|-----------|
| Schools . . . .  | 30,660    | 27,550    |
| Teachers . . . . | 89,600    | 62,600    |
| Pupils . . . .   | 3,091,000 | 2,830,000 |

There are sixteen free libraries. The number of new works published was 9550 in the year 1888. There were 470 newspapers and magazines.

## SOUTH AMERICA

The Argentine Republic has taken the foremost place in the South American continent. The official returns for 1876 and 1888 were :—

|                  | 1876    | 1888    | Increase     |
|------------------|---------|---------|--------------|
| Schools . . . .  | 1,946   | 3,227   | 65 per cent. |
| Teachers . . . . | 5,893   | 7,332   | 23 "         |
| Pupils . . . .   | 116,200 | 254,600 | 119 "        |

The returns for 1888 show as follows :—

|                 | Schools | Teachers | Scholars |
|-----------------|---------|----------|----------|
| State . . . .   | 2,263   | 4,744    | 175,200  |
| Private . . . . | 964     | 2,588    | 79,400   |
| Total . . . .   | 3,227   | 7,332    | 254,600  |

The ratio of school-children was 70 per 1000 of the population. The above includes 2 universities and 34 colleges, with 13,000 students.

Brazil in 1880 had 4 universities, 26 colleges, and 5890 schools, the whole numbering 191,000 pupils, or 16 per 1000 of population.

Chile in 1880 had 1650 schools, attended by 98,000 children, equal to 50 per 1000 of population, and a university at Santiago.

## ELECTORS

The numbers of electors and voters in various countries are :—

|                        | Electors  | Voters     | Percentage who Vote | Per 1000 of Population |        |      |
|------------------------|-----------|------------|---------------------|------------------------|--------|------|
|                        |           |            |                     | Electors               | Voters | Year |
| United Kingdom . . . . | 5,837,000 | 4,550,000  | 78                  | 155                    | 121    | 1889 |
| United States . . . .  | ...       | 10,868,000 | ...                 | ...                    | 176    | 1888 |
| France . . . .         | 9,948,000 | 8,012,000  | 81                  | 266                    | 220    | 1880 |
| Germany . . . .        | 9,124,000 | 5,832,000  | 64                  | 205                    | 130    | 1880 |
| Spain . . . .          | 942,000   | 610,000    | 63                  | 57                     | 36     | 1880 |
| Austria . . . .        | 1,291,000 | 462,000    | 36                  | 60                     | 22     | 1880 |
| Switzerland . . . .    | 639,000   | 256,000    | 40                  | 230                    | 92     | 1880 |
| Portugal . . . .       | 217,000   | 145,000    | 67                  | 54                     | 36     | ...  |
| Belgium . . . .        | 118,000   | 86,000     | 72                  | 21                     | 15     | 1880 |
| Italy . . . .          | 627,000   | 370,000    | 59                  | 21                     | 13     | 1880 |
| Sweden . . . .         | 43,000    | 17,000     | 40                  | 10                     | 4      | 1880 |

The returns for the United Kingdom show the electors for 1889, and the ratio of voters is assumed to be as at the election of 1885, that is, 78 per cent.

## UNITED KINGDOM

|                        | Percentage of Electors |       |       |       | Ratio to 100 Inhabitants |      |      |      |
|------------------------|------------------------|-------|-------|-------|--------------------------|------|------|------|
|                        | 1835                   | 1871  | 1881  | 1889  | 1835                     | 1871 | 1881 | 1889 |
| England . . . .        | 79.5                   | 80.8  | 82.4  | 77.2  | 4.6                      | 9.0  | 9.7  | 15.8 |
| Ireland . . . .        | 11.7                   | 9.0   | 7.5   | 13.0  | 1.2                      | 4.2  | 4.4  | 16.0 |
| Scotland . . . .       | 8.8                    | 10.2  | 10.1  | 9.8   | 3.0                      | 7.6  | 8.4  | 14.2 |
| United Kingdom . . . . | 100.0                  | 100.0 | 100.0 | 100.0 | 3.3                      | 8.1  | 8.9  | 15.5 |

Until 1885 Ireland had less than half her fair share of electors for population. The proportion of county and borough electors in the United Kingdom has been as follows :—

|                   | Electors  |           |           | Ratio |       |       |
|-------------------|-----------|-----------|-----------|-------|-------|-------|
|                   | 1846      | 1881      | 1885      | 1846  | 1881  | 1885  |
| County . . . . .  | 622,000   | 1,198,000 | 3,497,000 | 58.5  | 39.0  | 61.0  |
| Borough . . . . . | 445,000   | 1,879,000 | 2,219,000 | 41.5  | 61.0  | 39.0  |
| Total . . . . .   | 1,067,000 | 3,077,000 | 5,716,000 | 100.0 | 100.0 | 100.0 |

The franchise has been extended at intervals, and now counts seven times as many electors as in 1835, viz. :—

| Year | England   | Scotland | Ireland | U. Kingdom |
|------|-----------|----------|---------|------------|
| 1835 | 668,000   | 73,000   | 98,000  | 839,000    |
| 1846 | 845,000   | 93,000   | 129,000 | 1,067,000  |
| 1871 | 2,066,000 | 260,000  | 227,000 | 2,553,000  |
| 1881 | 2,538,000 | 310,000  | 220,000 | 3,077,000  |
| 1889 | 4,502,000 | 572,000  | 763,000 | 5,837,000  |

The franchise of 1885 exactly reversed the ratios of 1881. The proportion of members of Parliament to electors in the three kingdoms is as follows :—

|                          |           |
|--------------------------|-----------|
| England . . . . .        | 1 to 9000 |
| Scotland . . . . .       | 1 „ 8000  |
| Ireland . . . . .        | 1 „ 7400  |
| United Kingdom . . . . . | 1 „ 8700  |

Of 100 electors, 80 vote in England, 79 in Scotland, 67 in Ireland, the ratio for the whole United Kingdom being 78—say 4,500,000 voters.

## UNITED STATES

The presidential elections since 1824 have been as follows :—

| Year           | Electoral Votes |                  |       | Popular Votes |           |            | Votes per 100 of Population |
|----------------|-----------------|------------------|-------|---------------|-----------|------------|-----------------------------|
|                | Winner          | Other Candidates | Total | Winner        | Others    | Total      |                             |
| 1824 . . . . . | 99              | 162              | 261   | 156,000       | 196,000   | 352,000    | 3                           |
| 1828 . . . . . | 178             | 83               | 261   | 647,000       | 509,000   | 1,156,000  | 10                          |
| 1832 . . . . . | 219             | 67               | 286   | 688,000       | 562,000   | 1,250,000  | 10                          |
| 1836 . . . . . | 170             | 124              | 294   | 762,000       | 737,000   | 1,499,000  | 10                          |
| 1840 . . . . . | 234             | 60               | 294   | 1,275,000     | 1,136,000 | 2,411,000  | 14                          |
| 1844 . . . . . | 170             | 105              | 275   | 1,337,000     | 1,361,000 | 2,698,000  | 14                          |
| 1848 . . . . . | 163             | 127              | 290   | 1,360,000     | 1,511,000 | 2,871,000  | 13                          |
| 1852 . . . . . | 254             | 42               | 296   | 1,601,000     | 1,542,000 | 3,143,000  | 13                          |
| 1856 . . . . . | 174             | 122              | 296   | 1,838,000     | 2,217,000 | 4,055,000  | 15                          |
| 1860 . . . . . | 180             | 123              | 303   | 1,866,000     | 2,811,000 | 4,677,000  | 15                          |
| 1864 . . . . . | 212             | 102              | 314   | 2,216,000     | 1,809,000 | 4,025,000  | 12                          |
| 1868 . . . . . | 214             | 103              | 317   | 3,015,000     | 2,710,000 | 5,725,000  | 16                          |
| 1872 . . . . . | 286             | 80               | 366   | 3,597,000     | 2,870,000 | 6,467,000  | 16                          |
| 1876 . . . . . | 185             | 184              | 369   | 4,034,000     | 4,375,000 | 8,409,000  | 19                          |
| 1880 . . . . . | 214             | 155              | 369   | 4,449,000     | 4,761,000 | 9,210,000  | 18                          |
| 1884 . . . . . | 219             | 182              | 401   | 4,911,000     | 5,145,000 | 10,056,000 | 19                          |
| 1888 . . . . . | ...             | ...              | ...   | 5,186,000     | 5,682,000 | 10,868,000 | 18                          |

## FRANCE

The most important elections, known as plebiscites, were as follows :—

| Year | For       | Against   | Total     | Per 100 Inhabitants |
|------|-----------|-----------|-----------|---------------------|
| 1793 | 1,801,000 | 12,000    | 1,813,000 | 7                   |
| 1803 | 3,568,000 | 9,000     | 3,577,000 | 12                  |
| 1815 | 1,302,000 | 4,000     | 1,306,000 | 4                   |
| 1852 | 7,828,000 | 253,000   | 8,081,000 | 23                  |
| 1870 | 7,336,060 | 1,561,000 | 8,897,000 | 25                  |

The general election of 1881 showed as follows :—

| Class                  | Per Cent. |
|------------------------|-----------|
| Republicans . . . . .  | 45.7      |
| Orleanists . . . . .   | 11.1      |
| Bonapartists . . . . . | 5.4       |
| Not voted . . . . .    | 37.8      |
| Total . . . . .        | 100.0     |

## ITALY

The following elections resulted thus :—

| Year | Electors on Roll | Voted   | Voted, Per Cent. | Voters per 100 Inhabitants |
|------|------------------|---------|------------------|----------------------------|
| 1861 | 421,000          | 240,000 | 57               | 1.1                        |
| 1865 | 504,000          | 272,000 | 54               | 1.1                        |
| 1870 | 535,000          | 241,000 | 45               | 0.9                        |
| 1876 | 607,000          | 358,000 | 59               | 1.3                        |
| 1880 | 627,000          | 370,000 | 59               | 1.3                        |

## GERMANY

The members from the various States composing the Imperial Council are as follows :—

|                      |                        |                           |
|----------------------|------------------------|---------------------------|
| Prussia . . . . . 17 | Wurtemberg . . . . . 4 | Mecklenburg . . . . . 2   |
| Bavaria . . . . . 6  | Baden . . . . . 3      | Brunswick . . . . . 2     |
| Saxony . . . . . 4   | Hesse . . . . . 3      | Small States . . . . . 17 |

Making a total of 58 members of the Bundesrath.

The voters and electors of the Empire were as follows:—

| Year | Electors  | Voters    | Percentage Voting | Electors per 1000 Inhab. |
|------|-----------|-----------|-------------------|--------------------------|
| 1874 | 8,523,000 | 5,292,000 | 62                | 200                      |
| 1880 | 9,124,000 | 5,832,000 | 64                | 205                      |

#### BELGIUM

The following table shows the registered electors and the numbers that voted:—

| Year           | Electors | Voted   |
|----------------|----------|---------|
| 1841 . . . . . | 24,900   | 19,100  |
| 1859 . . . . . | 61,900   | 45,100  |
| 1878 . . . . . | 125,100  | 64,200  |
| 1884 . . . . . | 195,700  | 146,800 |

#### ELECTRICITY

**Lights.**—The following are some of the largest lights in use:—

|                                | Candle-Power |                        | Candle-Power |
|--------------------------------|--------------|------------------------|--------------|
| Kensington Museum . . . . .    | 2,000        | Marseilles, lighthouse | 40,000       |
| Crystal Palace . . . . .       | 3,000        | Palais d'Industrie, }  |              |
| British Museum . . . . .       | 5,000        | Paris . . . . .        | 150,000      |
| Liverpool Docks . . . . .      | 6,000        | Sydney, lighthouse .   | 180,000      |
| San José, California . . . . . | 24,000       |                        |              |

The cost varies from 10d. an hour at Kensington, to 27d. at Marseilles, both Brush system.

The arc light at Liverpool costs 15d., the Siemens at the British Museum 24d. The San José electric moon stands on a tower 200 feet high, is worked by a 9-horse engine, and shows light for two miles around. The Sydney light is visible 50 miles, being the most powerful yet made. The Marseilles gives six times more light than the old system, at a saving of 9d. per hour. The Kensington Museum saves £235 a year by the change. The smallest lights are Swan and Edison's arc lights of 8 candle-power for domestic use. A contract with the Nottingham Municipality in May 1883 was for works and plant for supplying 60,000 Swan lamps of 20 candle-power. The cost of instalment was £220,000, and after allowing for all expenses and interest on capital, the electric light would cost 40 per cent. less than gas, and give 40 per cent. more light. In the United States, in 1890, there were 3,230,000 electric lights in use, 90 per cent. of the incandescent kind. Turin is lit with 73,000 candle-power (equal to 6000 gas lamps), at a cost of £5200 per annum. The gas only cost £3200.

In 1885 the *Journal of Arts* said:—"As regards the electric light, at the present time upwards of 600 dynamos and 20,000 lamps are in use, and the cost of their instalment may be estimated at about one million sterling."

The Lane-Fox system may be described as follows:—

| Horse-Power | Lights | Candle-Power | Aggregate Candle-Power |
|-------------|--------|--------------|------------------------|
| 3           | 36     | 10           | 360                    |
| 5           | 30     | 20           | 600                    |
| 8           | 40     | 25           | 1,000                  |
| 20          | 60     | 40           | 2,400                  |

The Brush system, with an engine 40 horse-power, serves as follows:—

| Number of Lights | Candle-Power | Aggregate Candle-Power |
|------------------|--------------|------------------------|
| 1 . . . . .      | 150,000      | 150,000                |
| 12 . . . . .     | 8,000        | 96,000                 |
| 40 . . . . .     | 2,000        | 80,000                 |
| 400 . . . . .    | 150          | 60,000                 |

One engine of the above power feeds 400 lamps on a line of 30 miles, consuming 150 lbs. coal per hour, as compared with one ton per hour for gaslight over same length.

The Yablochkoff system is said to supply 100 candle-

power at a cost of 1d. per hour, having reduced the cost from 6d. an hour in 1877.

The number of Edison lights, underground wires, in use in Europe on the 1st January 1889 was as follows:—

|                     |        |                     |       |                       |       |
|---------------------|--------|---------------------|-------|-----------------------|-------|
| Berlin . . . . .    | 73,400 | Hamburg . . . . .   | 5,000 | Schwerin . . . . .    | 3,000 |
| Hanover . . . . .   | 20,000 | Dresden . . . . .   | 4,000 | Rotterdam . . . . .   | 2,500 |
| Milan . . . . .     | 20,000 | Lübeck . . . . .    | 3,000 | Munich . . . . .      | 2,500 |
| London . . . . .    | 6,000  | Turin . . . . .     | 3,000 | St. Etienne . . . . . | 4,000 |
| Liverpool . . . . . | 2,000  | Elberfeld . . . . . | 3,000 | Strasbourg . . . . .  | 2,500 |

besides Brunswick, Stuttgart, Halle, Crefeld, and Darmstadt, making a total of 170,000.

According to the *Magasin du Louvre* the relative cost of lighting is—gas 100, Edison 75, Yablochkoff 55 (in 1884).

#### MOTOR

1873. At the Vienna Exhibition a pump was worked at a distance of 1400 yards by means of an electric wire.

1879. At Sermaize, La Marne, a field of six acres was ploughed in six hours with a wire attached to a 12-horse engine a mile distant.

1881. At Oisiel a farmer named Meiner ploughed a large field by connecting an electric wire with a waterfall.

1882. Project to tap the force of Niagara by constructing turbines, the power of water being estimated at ten million cubic feet per second, or eight million horse-power, and to transmit this force through the United States. Estimated value, £300,000 a day, or 108 millions sterling per annum. A copper wire, half-inch diameter and 300 miles long, would suffice to convey 30,000 horse-power from Niagara to New York.

1883. Four electric locomotives constructed by the New York Railway Company to do the work of 160 ordinary locomotives. Tramcar at Kew, near London, running by electricity at six miles an hour, one accumulator of 80 lbs. sufficing for seven hours' work; cost 6s. per day, against 26s. worked by horses. Electric railway from Portrush to Giant's Causeway, Ireland. Electric screw-boat on the Thames at Greenwich, 9 miles an hour.

1889. City of Buffalo contracts with Niagara Power Company for 10,000 horse-power at £30,000 per annum, to light the city and drive factories; cable, 20 miles long.

1890. There are at present 645 miles of street railways operated by electricity in the United States and Canada. At present 45 electric roads are in course of construction, aggregating 512 miles of way, for which 167 cars are being built. In a short time the total number of electric roads will be 854, running 1927 motor and trailing cars, with a mileage of 1158. See *Telegraph, Telephones*.

#### EMIGRATION

Since the battle of Waterloo, no fewer than 27 millions of people in Europe have left their homes, broken up family ties, and sought their futures in new lands:—

|                             | 1816-50   | 1851-85    | Total      |
|-----------------------------|-----------|------------|------------|
| United Kingdom              | 2,369,000 | 7,491,000  | 9,860,000  |
| France . . . . .            | 320,000   | 1,220,000  | 1,540,000  |
| Germany . . . . .           | 1,130,000 | 4,540,000  | 5,670,000  |
| Russia . . . . .            | 50,000    | 350,000    | 400,000    |
| Austria . . . . .           | 130,000   | 1,160,000  | 1,290,000  |
| Italy . . . . .             | 320,000   | 3,260,000  | 3,580,000  |
| Switzerland . . . . .       | 150,000   | 610,000    | 760,000    |
| Spain . . . . .             | 160,000   | 580,000    | 740,000    |
| Portugal . . . . .          | 90,000    | 450,000    | 540,000    |
| Sweden and Norway . . . . . | 100,000   | 970,000    | 1,070,000  |
| Denmark . . . . .           | 40,000    | 180,000    | 220,000    |
| Holland . . . . .           | 25,000    | 320,000    | 345,000    |
| Belgium . . . . .           | 90,000    | 880,000    | 970,000    |
| Other countries . . . . .   | 20,000    | 200,000    | 220,000    |
| Europe . . . . .            | 4,994,000 | 22,211,000 | 27,205,000 |

\* Besides the exodus of Europeans there has been an efflux of Coolies.

The emigration from India averages 22,000 yearly, the number registered abroad in 1880 being 335,000, viz. :—

|                 |         |                  |        |
|-----------------|---------|------------------|--------|
| Mauritius . . . | 141,000 | Trinidad . . .   | 26,000 |
| Demerara . . .  | 54,000  | Natal . . .      | 18,000 |
| Bourbon . . .   | 43,000  | Jamaica, &c. . . | 53,000 |

Numbers of Chinese Coolies emigrate to Cuba and Peru, where they are ill-treated. Cuba imported 116,000 in the years 1866-73, and refused to let them return to China on the expiration of their contracts; 67,000 died. The number imported into Peru in the year 1871 was 38,650, of whom many were put to death. In 1880 in one province 2000 were massacred.

The destinations of European emigrants were :—

|                     | Down to 1850     | 1851-83           | Total             |
|---------------------|------------------|-------------------|-------------------|
| United States . . . | 2,633,000        | 12,330,000        | 14,963,000        |
| Australia . . .     | 140,000          | 1,710,000         | 1,850,000         |
| Canada . . .        | 790,000          | 977,000           | 1,767,000         |
| Argentina . . .     | 80,000           | 1,450,000         | 1,530,000         |
| Brazil . . .        | 90,000           | 790,000           | 880,000           |
| Uruguay . . .       | 40,000           | 170,000           | 210,000           |
| Algeria . . .       | 140,000          | 420,000           | 560,000           |
| Cape Colony . . .   | 30,000           | 130,000           | 160,000           |
| Various countries   | 1,051,000        | 4,234,000         | 5,285,000         |
| <b>Total . . .</b>  | <b>4,994,000</b> | <b>22,211,000</b> | <b>27,205,000</b> |

The exact proportions of sex and age cannot be given; the following table is not of uniform importance, some of the countries being classed from observations of ten years, others for a single year.

|                        | Emigrants from |            |            |            |            |            |                   |
|------------------------|----------------|------------|------------|------------|------------|------------|-------------------|
|                        | United Kingdom | Germany    | Holland    | Austria    | Sweden     | Denmark    | Italy Switzerland |
| Men . . . . .          | 46             | 50         | 52         | 32         | 45         | 51         | 70                |
| Women . . . . .        | 32             | 25         | 23         | 28         | 35         | 26         | 18                |
| Children . . . . .     | 22             | 25         | 25         | 40         | 20         | 23         | 12                |
| <b>Total . . . . .</b> | <b>100</b>     | <b>100</b> | <b>100</b> | <b>100</b> | <b>100</b> | <b>100</b> | <b>100</b>        |

If the proportions for the unascertained countries be taken on the basis of the first six countries in the above table, the whole emigration from Europe over the seas for 74 years may be put down thus :—

|                        |                   |
|------------------------|-------------------|
| Men . . . . .          | 11,550,000        |
| Women . . . . .        | 6,730,000         |
| Children . . . . .     | 5,120,000         |
| <b>Total . . . . .</b> | <b>23,400,000</b> |

The numbers of those who died on sea can never be arrived at even approximately. Kapp says that 20,000 Irish perished of ship-fever in 1846-47. Many vessels lost 20 per cent. If we were to adopt the death-rate on Government emigrant-ships to Australia and Cape Colony, namely, 5 per 1000 for men, 6 for women, and 52 for children, the number of the foregoing who died at sea would be as follows :—

|                        |                |
|------------------------|----------------|
| Men . . . . .          | 58,000         |
| Women . . . . .        | 40,000         |
| Children . . . . .     | 266,000        |
| <b>Total . . . . .</b> | <b>364,000</b> |

Births partly compensate for deaths, being about 1 in 200 women carried.

The professions of emigrants have not been uniformly classed; the following conveys a general idea :—

|                        | Emigrants from |            |            |            |
|------------------------|----------------|------------|------------|------------|
|                        | United Kingdom | Germany    | Italy      | Sweden     |
| Educated . . .         | 7              | 17         | 6          | 35         |
| Artisans, &c. .        | 55             | 47         | 43         |            |
| Farm labourers         | 18             | 24         | 39         |            |
| Servants . . .         | 20             | 12         | 12         | 33         |
| <b>Total . . . . .</b> | <b>100</b>     | <b>100</b> | <b>100</b> | <b>100</b> |

The amount of money which the emigrants took to their new homes was found to average as follows :—

|                                   | Per Head           |
|-----------------------------------|--------------------|
| Germans, 1848-52 . . . . .        | £ s. d.<br>29 10 0 |
| 1853-54 . . . . .                 | 35 0 0             |
| British in Canada, 1834 . . . . . | 33 5 0             |
| New York arrivals, 1856 . . . . . | 14 0 0             |

A moderate estimate of £10 per able-bodied man would result as follows :—

|                             | To                 |
|-----------------------------|--------------------|
| United States . . . . .     | £ 75,000,000       |
| Australia . . . . .         | 9,200,000          |
| Canada . . . . .            | 8,800,000          |
| River Plate . . . . .       | 8,700,000          |
| Brazil . . . . .            | 4,400,000          |
| Various countries . . . . . | 9,400,000          |
| <b>Total . . . . .</b>      | <b>115,500,000</b> |

The great value of the emigrants, meantime, has been in their capacity for work. Dr. Farr valued a man of 20 at £234 sterling, Engel at £200, and other writers at £260.

In Australia it is found that each immigrant, big and little, increases the revenue by £4 yearly. In the Argentine Republic the influx of 800,000 immigrants in twenty years ending 1883 was accompanied by a rise of £4,800,000 in the revenue, say £6 per head. But it is in the United States where the value of immigration is most apparent; for example, a group of 200 persons settled in 1858 on the territory now known as the State of Colorado, and in 1880 there were 1220 miles of railway, 14 daily papers, 190,000 inhabitants, real and personal estate valued at 9 millions sterling, agricultural products worth £700,000 a year; in 1886 the value of property in Colorado had risen to 27 millions sterling.

In the Republic of Uruguay in 1884 an official report showed 166,000 European settlers, holding property worth 52 millions. In the city of Buenos Ayres 40,000 Europeans in 1883 held bank-deposits and real property worth £47,600,000, besides Irish and Scotch sheep-farms valued at 21 millions sterling. The Census report of the United States in 1880 showed an increase of wealth since 1850 of 7593 millions sterling, and as immigrants were 12½ per cent. of the population, it follows that they stand for 949 millions of the increase.

In Canada the agricultural capital rose from 140 millions in 1861 to 343 millions in 1887, and as immigrants formed 30 per cent. of the population, they are entitled to take credit for that share of the increase, say 61 millions. Agricultural constituting only 50 per cent. of the wealth of Canada, the total accumulation due to the immigrants will be 122 millions sterling.

There has been, moreover, a notable increase of wealth in the Brazilian provinces of Rio Grande do Sul, San Paulo, &c., where numerous German colonies have converted forests into productive lands. The following table is exclusive of Brazil and Cape Colony.

| Country                      | Wealth Accumulated by Immigrants |           |                          |                   |                         |
|------------------------------|----------------------------------|-----------|--------------------------|-------------------|-------------------------|
|                              | Period                           | Arrivals  | Mean European Population | Wealth, Million £ | Yearly Average per Head |
| United States . . . . .      | 1850-80                          | 8,002,000 | 4,600,000                | 949               | £ s. d.<br>6 17 6       |
| Australia . . . . .          | 1850-88                          | 1,710,000 | 1,200,000                | 714               | 15 12 0                 |
| Argentine Republic . . . . . | 1850-84                          | 880,000   | 300,000                  | 80                | 7 14 0                  |
| Uruguay . . . . .            | 1850-84                          | 305,000   | 166,000                  | 52                | 8 18 6                  |
| Canada . . . . .             | 1861-87                          | 799,000   | 700,000                  | 122               | 6 14 0                  |

Except in Australia, the annual accumulations have been pretty much on a level, about £7 to £8 per annum, this ratio applying equally to men, women, and children. From the foregoing figures we can construct a table of the accumulations of emigrants between 1850 and 1888 as follows:—

| Emigrants                 | Mean Number Abroad | Accumulation, Million £ | Per Head, £ |
|---------------------------|--------------------|-------------------------|-------------|
| English . . . . .         | 1,200,000          | 410                     | 342         |
| Scotch . . . . .          | 250,000            | 95                      | 380         |
| Irish . . . . .           | 1,520,000          | 411                     | 270         |
| Germans . . . . .         | 1,700,000          | 452                     | 266         |
| Various nations . . . . . | 2,296,000          | 460                     | 200         |
| Total . . . . .           | 6,966,000          | 1,828                   | 261         |

It is a coincidence that each emigrant accumulated in the last 38 years about £260, and that this is the precise value set by some writers on each able-bodied adult. The strongest impulse to immigration was given by the Homestead Law of the United States and similar measures, giving lands to colonists at nominal or low prices. Down to 1886 the United States Government had thus disposed of 255 million acres, the Australian colonies 101 million acres. (See *Lands*.)

The total number of persons living out of their own country is approximately as follows (exclusive of Coolies):—

|                              |            | Per 1000 Inhab. |
|------------------------------|------------|-----------------|
| In Europe* . . . . .         | 2,537,000  | 10              |
| .. United States . . . . .   | 8,510,000  | 137             |
| .. Australia . . . . .       | 1,200,000  | 300             |
| .. River Plate . . . . .     | 1,086,000  | 240             |
| .. Canada . . . . .          | 800,000    | 160             |
| .. Brazil . . . . .          | 460,000    | 40              |
| .. Algeria . . . . .         | 190,000    | 50              |
| .. Egypt . . . . .           | 91,000     | 14              |
| .. South Africa . . . . .    | 50,000     | 33              |
| .. Chile . . . . .           | 40,000     | 15              |
| .. China and Japan . . . . . | 6,000      | ...             |
| .. Other countries . . . . . | 200,000    | ...             |
| Total . . . . .              | 15,170,000 | ...             |

Foreign residents in the various countries of Europe are as follows:—

|                      | Number    |                             | Number  |
|----------------------|-----------|-----------------------------|---------|
| U. Kingdom . . . . . | 155,000   | Sweden and Norway . . . . . | 26,000  |
| France . . . . .     | 1,115,000 | Denmark . . . . .           | 61,000  |
| Germany . . . . .    | 276,000   | Holland . . . . .           | 69,000  |
| Russia . . . . .     | 148,000   | Belgium . . . . .           | 143,000 |
| Austria . . . . .    | 127,000   | Switzerland . . . . .       | 211,000 |
| Italy . . . . .      | 60,000    | Roumania . . . . .          | 89,000  |
| Spain . . . . .      | 37,000    | Greece . . . . .            | 20,000  |

\* The number of foreigners in the various European States being 2,537,000, as shown above, it is made up approximately as follows:—

|                     |         |                     |         |
|---------------------|---------|---------------------|---------|
| Germans . . . . .   | 540,000 | Spaniards . . . . . | 120,000 |
| Belgians . . . . .  | 460,000 | Dutch . . . . .     | 72,000  |
| Austrians . . . . . | 360,000 | British . . . . .   | 70,000  |
| Italians . . . . .  | 330,000 | Russians . . . . .  | 70,000  |
| French . . . . .    | 180,000 | Swedes . . . . .    | 60,000  |
| Swiss . . . . .     | 140,000 | Various . . . . .   | 135,000 |

Comparing the above figures with the emigration statistics the result is approximately as follows:—

| Period             | Emigrated  | Now Living Abroad |
|--------------------|------------|-------------------|
| 1815-50 . . . . .  | 4,994,000  | 430,000           |
| 1851-80 . . . . .  | 15,868,000 | 8,640,000         |
| 1881-88 . . . . .  | 6,343,000  | 6,100,000         |
| 74 years . . . . . | 27,205,000 | 15,170,000        |

from which it appears that 12,035,000 either died abroad or returned to their own countries.

The following table shows European emigration in 1888, as compared with population:—

| From                     | Number  | Per Cent. of Population |
|--------------------------|---------|-------------------------|
| England . . . . .        | 171,000 | 0.60                    |
| Scotland . . . . .       | 36,000  | 0.90                    |
| Ireland . . . . .        | 73,000  | 1.60                    |
| United Kingdom . . . . . | 280,000 | 0.74                    |
| France . . . . .         | 23,000  | 0.06                    |
| Germany . . . . .        | 104,000 | 0.23                    |
| Austria . . . . .        | 46,000  | 0.12                    |
| Italy . . . . .          | 297,000 | 1.00                    |
| Spain . . . . .          | 71,000  | 0.40                    |
| Portugal . . . . .       | 13,000  | 0.30                    |
| Holland . . . . .        | 18,000  | 0.40                    |
| Belgium . . . . .        | 23,000  | 0.40                    |
| Scandinavia . . . . .    | 77,000  | 0.90                    |
| Switzerland . . . . .    | 8,000   | 0.27                    |

Making a total of 960,000 souls. Their destination was approximately as follows:—

|                            |         |
|----------------------------|---------|
| United States . . . . .    | 570,000 |
| South America . . . . .    | 280,000 |
| British colonies . . . . . | 105,000 |
| Various parts . . . . .    | 5,000   |
| Total . . . . .            | 960,000 |

Emigrants from Northern Europe still go mostly to the United States; those from the Mediterranean to South America. The current of emigration to Canada and Australia is chiefly British.

#### UNITED KINGDOM

Official returns may be summed up as follows:—

|                    |            | Per Annum |
|--------------------|------------|-----------|
| 1815-29 . . . . .  | 314,000    | 21,000    |
| 1830-49 . . . . .  | 2,164,000  | 108,000   |
| 1850-69 . . . . .  | 4,278,000  | 214,000   |
| 1870-79 . . . . .  | 2,153,000  | 215,000   |
| 1880-88 . . . . .  | 3,228,000  | 359,000   |
| 74 years . . . . . | 12,137,000 | 164,000   |

The above, however, includes foreign emigrants, who formed about 22 per cent. of the total. The number of British subjects was a little under ten millions, the following classification of natives of the three kingdoms being

as close as can be ascertained, the figures before 1840, as Porter shows, being defective :—

| Period   | English   | Scotch  | Irish     | Total     | Per Annum |
|----------|-----------|---------|-----------|-----------|-----------|
| 1815-34  | 110,000   | 30,000  | 420,000   | 560,000   | 28,000    |
| 1835-50  | 320,000   | 80,000  | 1,409,000 | 1,809,000 | 113,000   |
| 1851-60  | 640,000   | 183,000 | 1,231,000 | 2,054,000 | 205,000   |
| 1861-70  | 650,000   | 158,000 | 867,000   | 1,675,000 | 168,000   |
| 1871-80  | 970,000   | 166,000 | 542,000   | 1,678,000 | 168,000   |
| 1881-88  | 1,245,000 | 228,000 | 612,000   | 2,085,000 | 261,000   |
| 74 years | 3,935,000 | 845,000 | 5,081,000 | 9,861,000 | 133,000   |

The returns for the years 1888-89 were as follows :—

|                          | Emigrants |         |
|--------------------------|-----------|---------|
|                          | 1888      | 1889    |
| English . . . . .        | 170,000   | 164,000 |
| Scotch . . . . .         | 37,000    | 25,000  |
| Irish . . . . .          | 73,000    | 65,000  |
| United Kingdom . . . . . | 280,000   | 254,000 |

At all periods the United States attracted the bulk of the emigration.

|          | United States | British Colonies, &c. | Total     | U. States Ratios |
|----------|---------------|-----------------------|-----------|------------------|
| 1815-50  | 1,308,000     | 1,061,000             | 2,369,000 | 55.2             |
| 1851-60  | 1,257,000     | 797,000               | 2,054,000 | 61.3             |
| 1861-70  | 1,185,000     | 490,000               | 1,675,000 | 70.7             |
| 1871-80  | 1,088,000     | 590,000               | 1,678,000 | 65.0             |
| 1881-88  | 1,394,000     | 691,000               | 2,085,000 | 66.9             |
| 74 years | 6,232,000     | 3,629,000             | 9,861,000 | 63.2             |

The respective destinations of the people of the three kingdoms were approximately as follows :—

|                   | United States | Canada    | Australia | Cape, &c. | Total     |
|-------------------|---------------|-----------|-----------|-----------|-----------|
| English . . . . . | 1,893,000     | 872,000   | 820,000   | 350,000   | 3,935,000 |
| Scotch . . . . .  | 265,000       | 225,000   | 247,000   | 108,000   | 845,000   |
| Irish . . . . .   | 4,074,000     | 480,000   | 440,000   | 87,000    | 5,081,000 |
| Total . . . . .   | 6,232,000     | 1,577,000 | 1,507,000 | 545,000   | 9,861,000 |

The number of colonists who survive and are still abroad, and the number of their children (estimated according to result of United States Census in 1880) may be set down approximately as follows :—

| Settlers in             | Now Living | Children  | Population |
|-------------------------|------------|-----------|------------|
| United States . . . . . | 3,180,000  | 4,310,000 | 7,490,000  |
| Canada . . . . .        | 720,000    | 940,000   | 1,660,000  |
| Australia . . . . .     | 1,080,000  | 1,400,000 | 2,480,000  |
| Cape, &c. . . . .       | 360,000    | 470,000   | 830,000    |
| Total . . . . .         | 5,340,000  | 7,120,000 | 12,460,000 |

In recent years there has been a steady influx of returned emigrants, averaging 78,000 for the years 1881-88, or about 30 per cent. of the number of emigrants in that period. The remittances by Irish settlers in the United States to their friends at home, from 1851 to 1887, amounted to £32,200,000. The accumulations of wealth by British and Irish emigrants since 1850, as already shown, amounted to 916 millions sterling.

The destinations were as follows :—

| To                      | 1815-75   | 1876-88   | Total     |
|-------------------------|-----------|-----------|-----------|
| United States . . . . . | 4,425,000 | 1,807,000 | 6,232,000 |
| Canada . . . . .        | 1,260,000 | 317,000   | 1,577,000 |
| Australia . . . . .     | 1,022,000 | 485,000   | 1,507,000 |
| Cape, &c. . . . .       | 317,000   | 228,000   | 545,000   |
| Total . . . . .         | 7,024,000 | 2,837,000 | 9,861,000 |

The United States took 140,000 a year in the 13 years ending 1888, Canada 25,000, and Australia 37,000 settlers.

|                         | Destination |         |
|-------------------------|-------------|---------|
|                         | 1888        | 1889    |
| United States . . . . . | 196,000     | 169,000 |
| Canada . . . . .        | 35,000      | 28,000  |
| Australia . . . . .     | 31,000      | 28,000  |
| Various . . . . .       | 18,000      | 29,000  |
| Total . . . . .         | 280,000     | 254,000 |

The number of foreigners residing in the United Kingdom has been as follows :—

| Year           | Number  | Per 1000 Inhab. |
|----------------|---------|-----------------|
| 1841 . . . . . | 36,000  | 1.3             |
| 1851 . . . . . | 62,000  | 2.3             |
| 1861 . . . . . | 102,000 | 3.5             |
| 1871 . . . . . | 161,000 | 5.2             |
| 1881 . . . . . | 155,000 | 4.4             |

# FRANCE

In ten years ending 1887 the number of emigrants that left French ports was 460,000, but of these only 55,000 were French, say 5500 per annum.

In five years ending 1872 the number of French emigrants from Havre averaged 5100 yearly. The above figures do not include settlers going to Algeria (for which see *Colonies*, p. 126).

Approximately the emigration from France has been as follows :—

|                         | 1840-88   | Per Annum |
|-------------------------|-----------|-----------|
| United States . . . . . | 320,000   | 6,600     |
| Algeria . . . . .       | 300,000   | 6,300     |
| Argentina . . . . .     | 190,000   | 4,000     |
| Uruguay . . . . .       | 50,000    | 1,000     |
| Egypt . . . . .         | 30,000    | 600       |
| Europe . . . . .        | 450,000   | 9,500     |
| Total . . . . .         | 1,340,000 | 28,000    |

The number of French living abroad in 1860 and 1885 compared as follows :—

| In                       | 1860    | 1885    |
|--------------------------|---------|---------|
| Belgium . . . . .        | 35,000  | 51,000  |
| Switzerland . . . . .    | 45,000  | 59,000  |
| United Kingdom . . . . . | 16,000  | 20,000  |
| Spain . . . . .          | 11,000  | 20,000  |
| Italy . . . . .          | 5,000   | 11,000  |
| Egypt . . . . .          | 14,000  | 16,000  |
| Algeria . . . . .        | 72,000  | 262,000 |
| United States . . . . .  | 110,000 | 107,000 |
| South America . . . . .  | 59,000  | 107,000 |
| Total . . . . .          | 367,000 | 713,000 |

The chief currents of French emigration were :—

|                        | Number  | Period  | Number now Living |
|------------------------|---------|---------|-------------------|
| United States . . . .  | 314,000 | 1820-80 | 100,000           |
| Argentine Republic . . | 156,000 | 1860-88 | 120,000           |
| Algeria . . . . .      | 300,000 | 1840-88 | 160,000           |
| Uruguay . . . . .      | 44,000  | 1860-88 | 30,000            |

The influx of foreigners is, meantime, greater than the outflow of emigration. According to Census returns we find :—

| Year           | Foreigners in France | Ratio to Pop. per 1000 |
|----------------|----------------------|------------------------|
| 1851 . . . . . | 379,000              | 11                     |
| 1861 . . . . . | 497,000              | 13                     |
| 1872 . . . . . | 731,000              | 20                     |
| 1886 . . . . . | 1,115,000            | 29                     |

Molinari says that in fifteen years France received (1872-87) able-bodied emigrants equal to an accession of 140 millions sterling to the national wealth. The foreigners living in France at various dates were as follows :—

|                     | 1851    | 1872    | 1881      |
|---------------------|---------|---------|-----------|
| Belgians . . . . .  | 128,000 | 348,000 | 432,000   |
| Italians . . . . .  | 63,000  | 113,000 | 241,000   |
| Germans . . . . .   | 57,000  | 39,000  | 82,000    |
| Swiss . . . . .     | 26,000  | 43,000  | 66,000    |
| Spaniards . . . . . | 30,000  | 53,000  | 74,000    |
| English . . . . .   | 20,000  | 26,000  | 37,000    |
| Various . . . . .   | 55,000  | 109,000 | 69,000    |
| Total . . . . .     | 379,000 | 731,000 | 1,001,000 |

Paris has 213,000 foreign residents, being 9 per cent. of the population.

In 1888 the Government expelled the following foreigners from France :—

|                     | Men   | Women | Total |
|---------------------|-------|-------|-------|
| Spaniards . . . . . | 1,575 | 37    | 1,612 |
| Belgians . . . . .  | 1,296 | 120   | 1,416 |
| Germans . . . . .   | 504   | 69    | 573   |
| Various . . . . .   | 590   | 58    | 648   |
| Total . . . . .     | 3,965 | 284   | 4,249 |

#### GERMANY

The Archivio figures are as follows :—

| Period             | Emigrated | Per Annum |
|--------------------|-----------|-----------|
| 1820-49 . . . . .  | 168,000   | 5,600     |
| 1850-59 . . . . .  | 660,000   | 66,000    |
| 1860-69 . . . . .  | 750,000   | 75,000    |
| 1870-79 . . . . .  | 790,000   | 79,000    |
| 1880-86 . . . . .  | 1,342,000 | 192,000   |
| 66 years . . . . . | 4,710,000 | 72,000    |

The *Almanach de Gotha* says that 4,900,000 Germans emigrated between 1820 and December 1887, of which 3,700,000 to the United States. Duval, however, makes the efflux down to 1859 much greater, as follows :—

|                    |           |
|--------------------|-----------|
| 1820-29 . . . . .  | 49,600    |
| 1830-39 . . . . .  | 220,900   |
| 1840-49 . . . . .  | 661,200   |
| 1850-59 . . . . .  | 1,017,100 |
| 40 years . . . . . | 1,948,800 |

Gaebler is of the same opinion, making the number 1,800,000 from 1819 to 1855. It must be observed, meantime, that the Archivio gives only the departures by sea, whereas Gaebler includes the total outflow by sea and land. Official returns give much lower

figures. For example, the Prussian Blue-book makes the total for thirty years down to 1871 as 642,000, and the Board of Trade Abstract for eighteen years ending 1888 only 1,771,000, a total of 2,413,000, which is less than half the reality. If we consult the statistics of Germans in United States, Russia, Brazil, River Plate, and various countries in Europe, we may form an approximate table as follows :—

| Period   | Actual Emigration |           | Official Figures |           |
|----------|-------------------|-----------|------------------|-----------|
|          | Number            | Per Annum | Number           | Per Annum |
| 1821-40  | 270,000           | 13,500    | ...              | ...       |
| 1841-70  | 2,880,000         | 96,000    | 642,000          | 21,400    |
| 1871-80  | 1,050,000         | 105,000   | 626,000          | 62,600    |
| 1881-88  | 1,470,000         | 184,000   | 1,365,000        | 170,000   |
| 68 years | 5,670,000         | 84,000    | 2,633,000        | 39,000    |

|                       | Actual Emigration | Official  |
|-----------------------|-------------------|-----------|
|                       | 1821-88           | 1871-87   |
| United States . . . . | 4,316,000         | 1,880,000 |
| Brazil . . . . .      | 84,000            | 31,000    |
| Spanish America . . . | 70,000            | 19,000    |
| Australia . . . . .   | 60,000            | 17,000    |
| Other parts . . . . . | 1,140,000         | 44,000    |
| Total . . . . .       | 5,670,000         | 1,991,000 |

In official returns only persons going out of Europe are considered emigrants.

Immigration into Germany is small, the number of resident foreigners being less than one-tenth of that of Germans abroad. The Census of 1880 showed a total of 276,000 resident foreigners, thus :—

|                   |                   |                  |
|-------------------|-------------------|------------------|
| Austrians 118,000 | Dutch . . 18,000  | English . 11,000 |
| Swiss . . 28,000  | French . . 17,000 | Swedes . 10,000  |
| Danes . . 24,000  | Russians . 15,000 | Various . 35,000 |

The total makes up less than 6 in 1000 of population.

#### RUSSIA

The United States Census of 1880 showed 49,000 Poles and 36,000 Russians, but since that year there has been a great influx. In 1888 no fewer than 37,300 Russian settlers arrived. In 1874-78 the severity of military service drove 40,000 Mennonites from the Empire, who made settlements at Manitoba, San Paulo, and Buenos Ayres, where they have prospered. Jews have also in late years been expelled in large numbers.

In a period of 36 years down to 1886, according to police reports, there were 1,733,000 foreigners who settled in Russia, viz. :—

|                     |           |
|---------------------|-----------|
| Germans . . . . .   | 952,000   |
| Austrians . . . . . | 677,000   |
| Various . . . . .   | 104,000   |
| Total . . . . .     | 1,733,000 |

These figures are a mere fiction of the Russian police; the actual number of foreigners in Russia at the Census of 1880 was only 148,000.

#### AUSTRIA-HUNGARY

In 1880 there were 135,000 Austrians and Hungarians in the United States. The official returns for ten years' emigration ending 1886 show as follows :—

|                       |         |
|-----------------------|---------|
| United States . . . . | 227,000 |
| Argentina . . . . .   | 10,000  |
| Various . . . . .     | 37,000  |
| Total . . . . .       | 274,000 |

The number of Austrian immigrants who arrived in the United States in 1888 was 42,000. Before 1880 the annual emigration averaged only 7000 yearly. The total for ten years ending 1880 was 71,000, of whom 46,000 were Bohemians.

## ITALY

Official returns of the Argentine Republic show that in 28 years ending 1888 there were landed at Buenos Ayres and Rosario 550,000 Italians. In the same period 80,000 landed at Montevideo. There were 73,000 who emigrated to the United States in sixty years, of whom 44,000 were living in 1880. Official returns, much below the reality, give the following for nine years down to December 1887:—

|                         |                |
|-------------------------|----------------|
| River Plate . . . . .   | 261,000        |
| United States . . . . . | 153,000        |
| Brazil . . . . .        | 98,000         |
| North Africa . . . . .  | 37,000         |
| Various . . . . .       | 68,000         |
| <b>Total . . . . .</b>  | <b>617,000</b> |

Carpi shows that the official returns are much less than the real number, because they fail to include Italians who go to the other parts of Europe. An official report published in 1883 showed the number of Italians living abroad as follows:—

|                           | 1873           | 1883             |
|---------------------------|----------------|------------------|
| Argentina . . . . .       | 88,000         | 254,000          |
| Brazil and Peru . . . . . | 28,000         | 115,000          |
| Uruguay . . . . .         | 32,000         | 49,000           |
| France . . . . .          | 118,000        | 241,000          |
| Austria . . . . .         | 27,000         | 44,000           |
| Switzerland . . . . .     | 18,000         | 42,000           |
| United States . . . . .   | 70,000         | 170,000          |
| Levant, &c. . . . .       | 95,000         | 127,000          |
| <b>Total . . . . .</b>    | <b>476,000</b> | <b>1,033,000</b> |

The following table shows approximately the currents of emigration:—

|                           | United States  | South America    | Other Countries  | Total            | Annual Average |
|---------------------------|----------------|------------------|------------------|------------------|----------------|
| 1821-40 . . . . .         | 3,000          | 10,000           | 150,000          | 163,000          | 8,100          |
| 1841-60 . . . . .         | 11,000         | 30,000           | 400,000          | 441,000          | 22,000         |
| 1861-70 . . . . .         | 13,000         | 180,000          | 460,000          | 653,000          | 65,300         |
| 1871-80 . . . . .         | 46,000         | 430,000          | 700,000          | 1,176,000        | 117,600        |
| 1881-87 . . . . .         | 153,000        | 365,000          | 629,000          | 1,147,000        | 164,000        |
| <b>67 years . . . . .</b> | <b>226,000</b> | <b>1,015,000</b> | <b>2,329,000</b> | <b>3,580,000</b> | <b>54,000</b>  |

According to the Archivio the emigration in the years 1882-86 summed up 803,000, whereas the official figures for the same years do not exceed 363,000. In the preceding decade Professor Carpi made the average about 110,000 yearly, and estimated the number of returned emigrants at 60 per cent. of those who leave in any year. This is about double the proportion of the stream of emigration from Buenos Ayres to Italy, compared with the number of Italians arriving there. It may be therefore assumed that 33 per cent. of the above emigrants returned to Italy. The account may be put down thus:—

|                                  |                  |
|----------------------------------|------------------|
| Settled in River Plate . . . . . | 560,000          |
| " Brazil . . . . .               | 70,000           |
| " United States . . . . .        | 170,000          |
| " other countries . . . . .      | 1,050,000        |
| Died . . . . .                   | 540,000          |
| Returned to Italy . . . . .      | 1,190,000        |
| <b>Total emigrated . . . . .</b> | <b>3,580,000</b> |

The number of foreign residents in Italy is only 60,000, including 16,000 Austrians, 12,000 Swiss, 11,000 French, 7000 English, and 5000 Germans, the whole being as 2 per 1000 of the population.

## SWITZERLAND

The returns for ten years ending 1887 are as follows:—

|                         |               |
|-------------------------|---------------|
| United States . . . . . | 70,000        |
| South America . . . . . | 11,000        |
| <b>Total . . . . .</b>  | <b>81,000</b> |

By the Census of 1880 it appears there were 89,000 Swiss in the United States. There are 15,000 in the Argentine Republic. A large number of foreigners reside in Switzerland, and the number steadily increases:—

|                        | 1870           | 1880           |
|------------------------|----------------|----------------|
| French . . . . .       | 62,000         | 54,000         |
| Germans . . . . .      | 57,000         | 95,000         |
| Italians . . . . .     | 18,000         | 42,000         |
| Various . . . . .      | 14,000         | 20,000         |
| <b>Total . . . . .</b> | <b>151,000</b> | <b>211,000</b> |

This is more than 7 per cent. of the population. The principal centre of foreign residents is Geneva, viz.:—

|                        | Number of Inhab. |               | Percentage |            |
|------------------------|------------------|---------------|------------|------------|
|                        | 1860             | 1870          | 1860       | 1870       |
| Swiss . . . . .        | 18,400           | 17,600        | 58         | 38         |
| Foreign . . . . .      | 13,300           | 28,800        | 42         | 62         |
| <b>Total . . . . .</b> | <b>31,700</b>    | <b>46,400</b> | <b>100</b> | <b>100</b> |

## SPAIN

Official returns at Buenos Ayres show that in 32 years down to 1888 there were landed in the Argentine Republic 172,000 Spaniards. In the same interval those landed at Montevideo were about 80,000. The United States report shows only 29,000 in 60 years down to 1880, the actual number of Spanish settlers in the said year being 5100, but in the ensuing years there was a notable increase, 9000 having arrived between 1880 and 1888. Spain also sends out numbers to Cuba and her other colonies. The currents of emigration have been approximately:—

| Period                    | River Plate    | Other Countries | Total          | Per Annum     |
|---------------------------|----------------|-----------------|----------------|---------------|
| 1861-80 . . . . .         | 160,000        | 180,000         | 340,000        | 17,000        |
| 1881-88 . . . . .         | 92,000         | 50,000          | 142,000        | 18,000        |
| <b>28 years . . . . .</b> | <b>252,000</b> | <b>230,000</b>  | <b>482,000</b> | <b>17,200</b> |

The annual outflow at present is little over 1 per 1000 of the population. About 5 per cent. of those who emigrate return to Spain.

In 1888 there were Spaniards residing abroad as follows:—Algeria, 114,000; River Plate, 99,000; France, 74,000; and others in various countries, the total reaching 346,500.

The number of foreigners residing in Spain is only 37,000, including 18,000 French, 8000 Portuguese, and 5000 English, the total being barely as 2 per 1000 of the population in 1877.

PORTUGAL

Brazil is the principal destination of Portuguese emigrants, of whom more than 300,000 landed at Brazilian ports since 1855, viz. :—

|                   |         |
|-------------------|---------|
| 1855-65 . . . . . | 81,000  |
| 1866-75 . . . . . | 62,000  |
| 1876-88 . . . . . | 172,000 |

34 years . . . . . 315,000

The Census of 1880 in the United States showed only 8000 Portuguese. A small number go to the Portuguese colonies in Africa, the average for the last ten years being under 400. The total yearly emigration is about 13,000, or 3 per 1000 of the population.

SWEDEN

Official returns for 1851 show as follows :—

| Period             | To United States | Other Countries | Total   | Per Annum |
|--------------------|------------------|-----------------|---------|-----------|
| 1851-60 . . . . .  | 15,000           | 2,000           | 17,000  | 1,700     |
| 1861-70 . . . . .  | 88,000           | 34,000          | 122,000 | 12,200    |
| 1871-80 . . . . .  | 98,000           | 51,000          | 149,000 | 14,900    |
| 1881-86 . . . . .  | 174,000          | 34,000          | 208,000 | 34,700    |
| 36 years . . . . . | 375,000          | 121,000         | 496,000 | 13,700    |

It seems that in thirty years down to 1880 there were 201,000 Swedes who emigrated to the United States, and the American Census for that year showed 194,000 Swedish settlers then living. The number at present in the United States is doubtless near 300,000. There is also a current of emigration to Denmark, where the Census of 1880 showed 24,000 Swedish settlers. The number of foreigners residing in Sweden is only 18,000, of whom 5000 are Danes, 4000 Norwegians, and 3000 Germans. The total is equal to 4 per 1000 of the population.

NORWAY

Emigration has been almost exclusively to the United States. We have no returns before 1856.

|                   | Emigrants | Per Annum |
|-------------------|-----------|-----------|
| 1856-65 . . . . . | 54,000    | 5,400     |
| 1870-74 . . . . . | 56,000    | 11,200    |
| 1876-87 . . . . . | 182,000   | 15,200    |

The United States Census showed 182,000 Norwegian settlers, and since that year 142,000 have gone thither (to December 1887), so that the present number cannot fall short of 240,000. There are also 3000 Norwegians settled in Denmark. The number of foreigners residing in Norway is 8000, being 4 per 1000 of the population.

DENMARK

Official returns are to the following effect :—

| Period             | To United States | Other Countries | Total   | Per Annum |
|--------------------|------------------|-----------------|---------|-----------|
| 1868-70 . . . . .  | 7,300            | 1,400           | 8,700   | 2,900     |
| 1871-80 . . . . .  | 32,800           | 5,800           | 38,600  | 3,900     |
| 1881-87 . . . . .  | 51,600           | 2,100           | 53,700  | 7,700     |
| 20 years . . . . . | 91,700           | 9,300           | 101,000 | 5,000     |

The United States Census of 1880 showed 64,000 Danish residents, and, with the influx of later years, the number must now reach 90,000. Since 1870 more than 3500 Danes have gone to Australia. The current of emigration at present averages 4 per 1000 of population.

Denmark has 61,000 foreign residents, including 33,000 Germans and 24,000 Swedes, the total being equal to 3 per cent. of population.

HOLLAND

Official returns show as follows :—

| Period             | To United States | Other Countries | Total   | Per Annum |
|--------------------|------------------|-----------------|---------|-----------|
| 1875-80 . . . . .  | 84,200           | 1,100           | 85,300  | 14,200    |
| 1881-86 . . . . .  | 113,000          | 1,200           | 114,200 | 19,000    |
| 12 years . . . . . | 197,200          | 2,300           | 199,500 | 16,600    |

The United States Census of 1880 showed 71,000 Dutch settlers; the present number cannot fall short of 170,000. The numerous Dutch colonies seem to have no attraction for emigrants. The present rate of emigration is equal to 5 per 1000 of the population.

There are in Holland 69,000 foreigners, including 42,000 Germans, 19,000 Belgians, and 2000 English; in all equal to 15 per 1000 of the population.

BELGIUM

The currents of immigration and emigration would appear to be about equal, according to official records from 1841 to 1886. Those of the year 1846 are lost, but allowing the average in that decade, we find as follows :—

| Period             | Immigrants | Emigrants |
|--------------------|------------|-----------|
| 1841-50 . . . . .  | 37,000     | 51,000    |
| 1851-60 . . . . .  | 60,000     | 89,000    |
| 1861-70 . . . . .  | 94,000     | 110,000   |
| 1871-80 . . . . .  | 150,000    | 119,000   |
| 1881-86 . . . . .  | 108,000    | 90,000    |
| 46 years . . . . . | 449,000    | 459,000   |

These figures represent only the arrivals and departures at ports. The actual number of emigrants in 1841-86 must have reached a million, the Census of 1885 showing the following number of Belgians abroad :—

|                          |         |
|--------------------------|---------|
| France . . . . .         | 482,300 |
| Holland . . . . .        | 18,800  |
| United States . . . . .  | 15,500  |
| Germany . . . . .        | 9,200   |
| United Kingdom . . . . . | 2,600   |
| Various . . . . .        | 1,300   |

making in all 530,000 souls. In 57 years ending 1887 there were 2553 foreigners naturalised as Belgians, viz. :—

|                   |     |                   |     |
|-------------------|-----|-------------------|-----|
| Germans . . . . . | 933 | French . . . . .  | 622 |
| Dutch . . . . .   | 640 | Various . . . . . | 358 |

Notwithstanding the great influx of foreigners, the number of foreign residents at the last Census was only 143,000, including 49,000 Dutch, 51,000 French, 34,000 Germans, and 4000 English, in all 24 per thousand of the population.

UNITED STATES

The emigration to the United States before 1830\* can only be approximately estimated; since that year minute returns have been kept.

| Period              | Immigrants | Per Annum |
|---------------------|------------|-----------|
| 1654-1701 . . . . . | 134,000    | 2,800     |
| 1702-1750 . . . . . | 182,000    | 3,700     |
| 1751-1800 . . . . . | 310,000    | 6,200     |
| 1801-20 . . . . .   | 178,000    | 8,900     |
| 1821-30 . . . . .   | 264,000    | 26,400    |
| 1831-40 . . . . .   | 599,000    | 59,900    |
| 1841-50 . . . . .   | 1,713,000  | 171,300   |
| 1851-60 . . . . .   | 2,590,000  | 259,000   |
| 1861-70 . . . . .   | 2,455,000  | 245,500   |
| 1871-80 . . . . .   | 3,042,000  | 304,200   |
| 1881-89 . . . . .   | 4,792,000  | 532,000   |
| 236 years . . . . . | 16,259,000 | ...       |

\* The official returns for 1820-30 are admittedly defective and valueless.

The official returns are as follows :—

|                          | 1821-40 | 1841-50   | 1851-60   | 1861-70   | 1871-80   | 1881-89   | 69 Years   |
|--------------------------|---------|-----------|-----------|-----------|-----------|-----------|------------|
| English . . . . .        | 95,000  | 263,000   | 388,000   | 615,000   | 449,000   | 602,000   | 2,412,000  |
| Scotch . . . . .         | 6,000   | 4,000     | 38,000    | 45,000    | 88,000    | 137,000   | 318,000    |
| Irish . . . . .          | 258,000 | 781,000   | 908,000   | 445,000   | 440,000   | 602,000   | 3,434,000  |
| United Kingdom . . . . . | 359,000 | 1,048,000 | 1,334,000 | 1,105,000 | 977,000   | 1,341,000 | 6,164,000  |
| French . . . . .         | 54,000  | 77,000    | 74,000    | 38,000    | 73,000    | 44,000    | 360,000    |
| Germans . . . . .        | 159,000 | 435,000   | 947,000   | 817,000   | 755,000   | 1,362,000 | 4,475,000  |
| Scandinavians . . . . .  | 2,000   | 14,000    | 22,000    | 136,000   | 255,000   | 362,000   | 791,000    |
| Various . . . . .        | 168,000 | 139,000   | 213,000   | 359,000   | 982,000   | 1,683,000 | 3,544,000  |
| Total . . . . .          | 742,000 | 1,713,000 | 2,590,000 | 2,455,000 | 3,042,000 | 4,792,000 | 15,334,000 |

In the above returns the number of English is made to appear 459,000 in excess of, and that of Irish fully 600,000 less than the reality, as shown on p. 248, which is accounted for by the fact that many of the Irish were in earlier years classified as English or British. Moreover, the Census of 1880 showed that Irish settlers were more than double the number of English and Scotch collectively (1,855,000 to 917,000), whereas the above classification down to 1880 would make the ratio as 140 to 100. The total immigration of 69 years may be correctly summed up as follows :—

|                          | Number     | Ratio |
|--------------------------|------------|-------|
| English . . . . .        | 1,963,000  | 12.8  |
| Scotch . . . . .         | 318,000    | 2.8   |
| Irish . . . . .          | 4,140,000  | 27.0  |
| United Kingdom . . . . . | 6,421,000  | 41.8  |
| Germans . . . . .        | 4,475,000  | 29.2  |
| Scandinavians . . . . .  | 791,000    | 5.2   |
| French . . . . .         | 360,000    | 2.4   |
| Various . . . . .        | 3,287,000  | 21.4  |
| Total . . . . .          | 15,334,000 | 100.0 |

During 31 years the record of ages was kept; and if we suppose the ratios to apply to the whole 69 years, the ages of immigrants showed as follows :—

|                    | Number     | Ratio |
|--------------------|------------|-------|
| Under 10 . . . . . | 2,300,000  | 15.0  |
| 10-20 . . . . .    | 3,220,000  | 21.0  |
| 20-30 . . . . .    | 5,670,000  | 37.0  |
| 30-40 . . . . .    | 2,450,000  | 16.0  |
| Over 40 . . . . .  | 1,694,000  | 11.0  |
| Total . . . . .    | 15,334,000 | 100.0 |

The returns of the Census of 1880, and the estimates resulting from the immigration since then as to the actual number of foreigners, are :—

|                                  | Census, 1880 | Arrivals, 1881-88 | Estimated Residents, 1888 |
|----------------------------------|--------------|-------------------|---------------------------|
| Germans . . . . .                | 1,967,000    | 1,104,000         | 2,450,000                 |
| Irish . . . . .                  | 1,855,000    | 536,000           | 1,920,000                 |
| British . . . . .                | 917,000      | 658,000           | 1,260,000                 |
| Scandinavians . . . . .          | 376,000      | 412,000           | 630,000                   |
| Italians . . . . .               | 44,000       | 201,000           | 190,000                   |
| French . . . . .                 | 107,000      | 20,000            | 100,000                   |
| Dutch . . . . .                  | 58,000       | 151,000           | 170,000                   |
| Swiss . . . . .                  | 89,000       | 68,000            | 130,000                   |
| Austrians & Hungarians . . . . . | 135,000      | 266,000           | 320,000                   |
| Russians and Poles . . . . .     | 85,000       | 160,000           | 190,000                   |
| Various . . . . .                | 693,000      | 744,000           | 1,150,000                 |
| Total . . . . .                  | 6,326,000    | 4,320,000         | 8,510,000                 |

In the last fifty years the United States received nearly 15,000,000 settlers, and the Census of 1880 showed that every 100 settlers had the following number of children living :—German, 148; Irish, 144; British, 122; general average, 124. The foreign population in December 1888 stood approximately thus :—

|                         | Immigrants | Children   | Total      |
|-------------------------|------------|------------|------------|
| German . . . . .        | 2,450,000  | 3,650,000  | 6,100,000  |
| Irish . . . . .         | 1,920,000  | 2,760,000  | 4,680,000  |
| British . . . . .       | 1,260,000  | 1,550,000  | 2,810,000  |
| Various . . . . .       | 2,880,000  | 2,670,000  | 5,550,000  |
| Total foreign . . . . . | 8,510,000  | 10,630,000 | 19,140,000 |

The numbers and proportion of resident foreigners in the whole population have been as follows :—

| Year           | Population | Foreign Residents | Percentage |
|----------------|------------|-------------------|------------|
| 1820 . . . . . | 9,634,000  | 177,000           | 1.8        |
| 1840 . . . . . | 17,069,000 | 859,000           | 5.0        |
| 1850 . . . . . | 23,192,000 | 2,241,000         | 9.7        |
| 1860 . . . . . | 31,443,000 | 4,136,000         | 13.1       |
| 1870 . . . . . | 38,558,000 | 5,566,000         | 14.5       |
| 1880 . . . . . | 50,410,000 | 6,326,000         | 12.5       |
| 1888 . . . . . | 60,000,000 | 8,510,000         | 14.2       |

In the above table "foreign residents" of course include naturalised American citizens. Foreigners and their children, as shown in a previous table, constitute almost one-third of the population.

#### CANADA

The net increase of population by settlers may be estimated on comparing the several Census returns; and allowing for natural increase, the figures result approximately thus :—

| Year               | Population | Natural Increase of Decade | Net Immigration of Decade | Net Immigration per Annum |
|--------------------|------------|----------------------------|---------------------------|---------------------------|
| 1831 . . . . .     | 1,158,000  | ...                        | ...                       | ...                       |
| 1841 . . . . .     | 1,690,000  | 230,000                    | 302,000                   | 30,200                    |
| 1851 . . . . .     | 2,482,000  | 305,000                    | 487,000                   | 48,700                    |
| 1861 . . . . .     | 3,030,000  | 370,000                    | 178,000                   | 17,800                    |
| 1871 . . . . .     | 3,833,000  | 420,000                    | 383,000                   | 38,300                    |
| 1881 . . . . .     | 4,504,000  | 460,000                    | 211,000                   | 21,100                    |
| 1887 . . . . .     | 5,019,000  | 310,000                    | 205,000                   | 34,200                    |
| 56 years . . . . . | ...        | 2,095,000                  | 1,766,000                 | 31,500                    |

The number of British and Irish emigrants who went to Canada from 1815 to 1888 amounted (see p. 248) to 1,577,000, or 90 per cent. of the above total.

Only a portion of the European emigrants who landed in the colony settled there, the rest proceeding to the

United States. An official statement published in 1877 showed as follows:—

| Period   | Arrived   | Proceeded to United States | Remained |
|----------|-----------|----------------------------|----------|
| 1851-71  | 1,051,000 | 595,000                    | 456,000  |
| 1872-76  | 351,000   | 179,000                    | 172,000  |
| 26 years | 1,402,000 | 774,000                    | 628,000  |

#### AUSTRALIA

The current of emigration since 1820 has been approximately thus:—

| Period   | Number    | Per Annum |
|----------|-----------|-----------|
| 1821-40  | 40,000    | 2,000     |
| 1841-50  | 90,000    | 9,000     |
| 1851-60  | 710,000   | 71,000    |
| 1861-70  | 320,000   | 32,000    |
| 1871-80  | 340,000   | 34,000    |
| 1881-88  | 350,000   | 44,000    |
| 68 years | 1,850,000 | 27,000    |

We have already seen (page 248) that 1,505,000 British subjects emigrated to Australia, or 81 per cent. of the above total. In 1871 there were 34,000 German residents.

The Australian colonies have expended 8½ millions in promoting immigration, viz:—

|                      | Expended    | Immigrants | Per Head |
|----------------------|-------------|------------|----------|
| New Zealand          | £ 1,950,000 | 101,000    | £ 19     |
| Victoria             | 2,880,000   | 167,000    | 17       |
| Queensland, &c., &c. | 3,600,000   | 202,000    | 18       |
| Total                | 8,430,000   | 470,000    | 18       |

Assisted passages are still provided by some of the colonies.

#### CAPE COLONY

The white population in 27 years, ending 1875, rose from 87,000 to 237,000, and as the natural increase was 24 per cent. per decade, we find that the total immigration must have been 70,000, say 2600 per annum. This includes 15,000 Government immigrants introduced from 1847 to 1872. The discovery of diamonds in 1867, and construction of railways, have stimulated European immigration, which now may be estimated at 5000 yearly. There are also more than 10,000 settlers at Natal.

#### BRAZIL

The number of European settlers has been as follows:—

|         |         | Per Annum |
|---------|---------|-----------|
| 1855-64 | 120,000 | 12,000    |
| 1866-74 | 116,000 | 11,600    |
| 1875-84 | 228,000 | 22,800    |
| 1885-88 | 266,000 | 66,000    |
| Total   | 730,000 | 21,500    |

In the year 1825 the Emperor Pedro I. founded the first German colony, 909 souls, at San Leopoldo, Rio Grande do Sul. In 1854 the little settlement counted 11,172 Germans, including 3680 born in the country. Each family had received on arrival a free land-grant of 130 acres. In 1866 the colonists numbered 25,000, including children, and in 1871 the product of the farms was valued officially at one million sterling; or nearly £200 per family. Meantime the influx of more Germans, and the increasing number of the San Leopoldo com-

munity, led to the establishment of 42 other German settlements in Rio Grande, for the most part between the years 1849 and 1860: the whole in 1871 counted 70,000 Germans, one half born in the country, their farms being valued at six millions sterling. German colonies were introduced into the neighbouring province of Santa Catharina in 1849, and about the same time into San Paulo; in later years into Minas Geraes, Paraná, and other provinces. In 1871 there were the following colonies:—

|                   |    |
|-------------------|----|
| Rio Grande do Sul | 43 |
| San Paulo         | 12 |
| Other provinces   | 21 |
| Total             | 76 |

The agricultural settlements had about 90,000 Europeans, more than half being Germans, the rest Swiss, Italians, &c. Since 1880 a great influx of Italians has taken place in San Paulo, and these settlers have begun planting vines on a large scale: in 1888 no fewer than 92,000 immigrants settled in that province, the total immigration that year reaching 131,000. The Government devotes £550,000 per annum to free passages. In 1872 the number of Europeans in Brazil was 243,000, at present it is probably about 460,000.

#### ARGENTINA

The official returns are as follows:—

|          |           | Per Annum |
|----------|-----------|-----------|
| 1861-70  | 185,000   | 18,500    |
| 1871-80  | 453,000   | 45,300    |
| 1881-88  | 766,000   | 96,000    |
| 28 years | 1,404,000 | 50,000    |

The number of immigrants in 1888 was 181,000, which shows that this country comes next after the United States as a field for European emigration. The returns from 1871 to 1888 show nationalities thus:—

|           |         |         |         |               |         |
|-----------|---------|---------|---------|---------------|---------|
| Italians  | 550,000 | French  | 100,000 | Germans       | 15,000  |
| Spaniards | 122,000 | British | 20,000  | Unascertained | 412,000 |

The bulk of those unascertained were Italians, who formed 65 per cent. of the whole number. Before the year 1860 the average immigration was 5000 yearly, one third being Italians.

Agricultural colonies were begun in Santa Fè in 1856, and in 1884 there were 78 of these settlements, counting in all 66,000 inhabitants, who cultivated 940,000 acres, and possessed properties to the value of £8,400,000. The first settlers were Swiss, but at present Italians, Swiss, Germans, and French are almost equal in numbers. The growth of the Santa Fè colonies is shown thus:—

| Year | Acres   | Population |
|------|---------|------------|
| 1871 | 140,000 | 13,600     |
| 1879 | 404,000 | 40,700     |
| 1884 | 940,000 | 66,000     |

In 1884 there were also ten colonies in Entre Rios; in 1856 they had 9900 inhabitants, mostly Italians and Germans, who cultivated 170,000 acres. Two colonies in Cordoba had 3000 settlers. The Welsh settlement in Patagonia had 1300 souls, whose farms were valued at £122,000, having 17,000 acres under wheat, the crop averaging 200,000 bushels. It was founded in 1865.

The total area under crops in 1887 held by agricultural colonies was estimated at 2,200,000 acres, cultivated by 140,000 settlers, and producing 20 million bushels of grain. These colonies account for only 10 per cent. of the immigration since 1860, most of the Italians having preferred to settle about Buenos Ayres in every variety of calling. The official returns of money in bank and

real estate, in the city of Buenos Ayres, in 1883, were as follows:—

|                    | Number of Depositors | Deposits, in £ Sterling | Real Estate, £ Sterling |
|--------------------|----------------------|-------------------------|-------------------------|
| Italians . . . .   | 10,090               | 2,800,000               | 6,600,000               |
| Argentines . . . . | 7,056                | 2,860,000               | 22,100,000              |
| Spaniards . . . .  | 3,008                | 1,100,000               | 1,800,000               |
| French . . . . .   | 2,022                | 620,000                 | 2,200,000               |
| English . . . . .  | 801                  | 450,000                 | 1,200,000               |
| Germans . . . . .  | 451                  | 250,000                 | 600,000                 |
| Various . . . . .  | 1,291                | 1,200,000               | 3,800,000               |
| Total . . . . .    | 24,719               | 9,280,000               | 38,300,000              |

The above returns are only for the city, and have no reference to the thriving Irish and Scotch communities in the province of Buenos Ayres.

The Scotch made their first settlement at Monte Grande in 1826, the Irish at various places in 1840. Their numbers and possessions in 1884 stood thus:—

|                  | Population | Area of Lands, Square Miles | Number of Sheep | Value of Property, £ Sterling |
|------------------|------------|-----------------------------|-----------------|-------------------------------|
| Irish . . . . .  | 22,000     | 4,900                       | 9,200,000       | 15,200,000                    |
| Scotch . . . . . | 3,600      | 2,500                       | 3,000,000       | 6,100,000                     |
| Total . . . . .  | 25,600     | 7,400                       | 12,200,000      | 21,300,000                    |

According to the census of 1869 there were 212,000 European residents, since which year 1,260,000 emigrants have arrived, of whom 29 per cent. returned. Allowing for deaths the number of foreign population would be as follows:—

|                             | Number in 1869 | Arrivals, 1870-88 | Present Number | Population Including Children |
|-----------------------------|----------------|-------------------|----------------|-------------------------------|
| Italians . . . . .          | 71,000         | 820,000           | 530,000        | 1,320,000                     |
| Spaniards . . . . .         | 34,000         | 180,000           | 140,000        | 310,000                       |
| French . . . . .            | 32,000         | 150,000           | 120,000        | 250,000                       |
| British and Irish . . . . . | 11,000         | 30,000            | 30,000         | 70,000                        |
| German and Swiss . . . . .  | 11,000         | 30,000            | 30,000         | 70,000                        |
| Various . . . . .           | 53,000         | 50,000            | 70,000         | 150,000                       |
| Total . . . . .             | 212,000        | 1,260,000         | 920,000        | 2,170,000                     |

The population of the Republic in January 1888 was estimated at 3,930,000, from which it appears that foreigners form 23 per cent., and with their children 55 per cent. of the total. Buenos Ayres is the chief centre of European settlers, 72 per cent. of the children born in that city being of foreign parents.

#### URUGUAY

Official returns as to immigrants landed at Monte Video are:—

| Period             | Number  | Per Annum |
|--------------------|---------|-----------|
| 1835-52 . . . . .  | 36,600  | 2,000     |
| 1853-62 . . . . .  | 28,000  | 2,800     |
| 1863-72 . . . . .  | 143,000 | 14,300    |
| 1873-87 . . . . .  | 156,000 | 10,400    |
| 53 years . . . . . | 363,600 | 6,800     |

It is, however, beyond doubt that one-half proceeded to Buenos Ayres, the number of settlers remaining in the country averaging about 6000 yearly in the last twenty-five years. Taking the ratio of nationality as entered in

the records, the actual immigrants since 1863 may be set down as follows:—

|                     |         |
|---------------------|---------|
| Italians . . . . .  | 81,000  |
| Spaniards . . . . . | 33,000  |
| French . . . . .    | 8,000   |
| British . . . . .   | 5,000   |
| Various . . . . .   | 23,000  |
| Total . . . . .     | 150,000 |

In 1884 there were eight agricultural colonies, Swiss and Italian, with 6200 settlers, who cultivated 110,000 acres, and raised 900,000 bushels of grain, valued at £140,000 sterling. The farms of these settlers were assessed at £780,000 sterling. An official report in 1884 showed the number of European settlers in the Republic, and the amount of property paying tax held by those of each nation.

|                            | Number  | Wealth, £ Sterling | £ per Head |
|----------------------------|---------|--------------------|------------|
| Spaniards . . . . .        | 44,000  | 12,500,000         | 280        |
| Italians . . . . .         | 39,000  | 11,200,000         | 286        |
| Brazilians . . . . .       | 22,000  | 14,700,000         | 660        |
| French . . . . .           | 16,000  | 5,700,000          | 350        |
| British . . . . .          | 3,000   | 3,100,000          | 1,030      |
| Various . . . . .          | 42,000  | 4,800,000          | 115        |
| Foreign settlers . . . . . | 166,000 | 52,000,000         | 315        |

Foreigners were 27 per cent. of the population, and held 58 per cent. of the assessed wealth of the Republic.

#### ALGERIA

Complete statistics of immigration from 1883 to 1886 will be found under the title *Colonies*, page 126.

#### ENGINEERING

Some of the most remarkable works carried out in ancient or modern times, as well as those projected, will be found in the following list:—

**Aqueducts.**—Those of Rome under the Cæsars supplied 320 million gallons water daily, and were 249 miles long in the aggregate. The Incas of Peru had one 360 miles long.

**Blasting.**—At Dover, in 1873, the South Eastern Railway Company removed at one blast 800,000 tons of the granite cliff, using eight tons of powder in three charges. At Loch Fyne, near Glasgow, 13th December 1888, Mr. Gardiner's electric battery displaced at a single blast 75,000 tons of granite.

**Boring.**—The greatest depth yet reached is 5200 feet, at Schladerbach, near Halle. The cost of boring with diamond-drill in the Barrow ironstone district, England, varies from 32 to 44 pence per foot.

**Bridges.**—That of Forth, Scotland, finished in 1889, employed 48,000 tons of steel, and 125,000 cubic yards of masonry, has three spans of 1700 feet each, total length 5330 feet. It rests on four cylindrical pillars of masonry, 70 feet diameter, built on rocks 90 feet under water: it can support safely a weight of 84,000 tons; the cost was £2,000,000. In 1867 De Gamond proposed a metal tubular bridge, 30 by 24 feet, from Calais to Dover, to cost £7,200,000, and be completed in seven years.

This scheme was revived in 1889, at a proposed cost of 34½ millions sterling, the bridge to be 200 feet above water, and consist of 74 spans of 550 yards each, resting on masonry pillars, averaging 200 feet down into the sea, the superstructure to employ one million tons of steel, the whole to be completed in ten years; masonry, £15,200,000; superstructure, £19,200,000. See *Bridges*.

**Canal.**—That of China, 2100 miles long, was completed in 1350, after 600 years of labour. That of Suez, opened in 1869 after thirteen years' work, is 92 miles long, and cost 17 millions sterling.

#### Earthworks

|                      | Cost,<br>Cubic Yd. |                        | Cost,<br>Cubic Yd. |
|----------------------|--------------------|------------------------|--------------------|
| England . . . . .    | 21 pence           | Panama Canal . . . . . | 15 pence           |
| Suez Canal . . . . . | 12 "               | Cyprus . . . . .       | 6 "                |

The work of the Thames Embankment, completed after eight years, in 1869, at a cost of £1,710,000, consisted as follows:—

|                     | Cubic<br>Yards |                     | Cubic<br>Yards |
|---------------------|----------------|---------------------|----------------|
| Brickwork . . . . . | 80,000         | Granite . . . . .   | 650,000        |
| Concrete . . . . .  | 140,000        | Earthwork . . . . . | 970,000        |

The Hercules Ditcher, Michigan, removes 700 tons of clay per hour.

**Harbours.**—That of Cherbourg, completed by Napoleon III. in 1857, was 74 years in construction, and cost £3,500,000. That of Holyhead, finished in 1880, has a pier consisting of seven million tons of granite, length 7860 feet, width varying from 250 to 400 feet. Plymouth breakwater, begun in 1812, finished in 1841, has 3,800,000 tons of stone, length 5300 feet, cost £1,550,000.

**Pumps.**—Those employed at Zegedin, Hungary, in 1879, pumped out 500,000 tons or 110,000,000 gallons water daily. Those of the Severn Tunnel in 1880 pumped out each 150,000 gallons an hour. The Haarlem Pumps lifted 109 tons of water 10 feet at each stroke; they drained Lake Haarlem, pumping out 1100 million tons water in eleven years, say 400,000 tons daily.

**Pyramid.**—That of Cheops, near Cairo, contains four million tons of stone, and cost 40 millions sterling. It would now cost only 4 millions.

**Removal.**—The Pelham Hotel, Boston, stone-built, 96 feet high, weight 10,000 tons, was moved by engineers, to widen the street, a distance of 14 feet in 70 hours.

**Tower.**—That of Babel, according to Herodotus, was 610 feet high. The Eiffel Tower, at Paris, built in six months, 1889, is 990 feet high, of iron.

**Tunnel.**—The longest yet made is the St. Gothard, 16,400 yards, begun in 1873, completed in 1881, at a cost of £152 per yard.

**Wall.**—That of China contains 6350 million cubic feet of material, or 160 times as much as the Great Pyramid of Egypt.

## EXHIBITIONS

| Date | Place                  | Area,<br>Acres | Visitors   | Days<br>Open | Receipts  | Exhibitors |
|------|------------------------|----------------|------------|--------------|-----------|------------|
| 1851 | London . . . . .       | 21             | 6,200,000  | 141          | 424,000   | 17,000     |
| 1855 | Paris . . . . .        | 24             | 4,500,000  | 200          | 128,000   | 24,000     |
| 1862 | London . . . . .       | 23             | 6,200,000  | 171          | 408,000   | 29,000     |
| 1867 | Paris . . . . .        | 37             | 9,300,000  | 217          | 420,000   | 50,000     |
| 1873 | Vienna . . . . .       | 48             | 7,300,000  | 186          | 206,000   | 43,000     |
| 1876 | Philadelphia . . . . . | 55             | 10,200,000 | ...          | 800,000   | ...        |
| 1878 | Paris . . . . .        | 60             | 16,100,000 | 194          | 974,000   | 60,000     |
| 1889 | Paris . . . . .        | ...            | 25,000,000 | 180          | 1,980,000 | 55,000     |

The exhibitors and winners of prizes at the London Exhibition of 1851 were as follows:—

|                         | Exhibitors | Prizes |
|-------------------------|------------|--------|
| British . . . . .       | 9,970      | 2,089  |
| French . . . . .        | 1,750      | 1,050  |
| German . . . . .        | 1,450      | 482    |
| Austrian . . . . .      | 750        | 236    |
| United States . . . . . | 600        | 152    |
| Various . . . . .       | 2,880      | 1,177  |
| Total . . . . .         | 17,400     | 5,186  |

At the Paris Exhibition of 1889 the following prizes were given:—

|                         |        |
|-------------------------|--------|
| Grand prizes . . . . .  | 890    |
| Gold medals . . . . .   | 5,599  |
| Silver medals . . . . . | 11,104 |
| Bronze medals . . . . . | 10,980 |

Total . . . . . 28,573

The London Exhibition of 1851 left a net profit of £104,000; that of Paris in 1878, a loss of £1,270,000; and that of Paris in 1889, a net profit of £320,000.

At the last-mentioned the police estimated 5 million French and 1,500,000 foreign visitors, the latter including 380,000 English, 225,000 Belgians, 160,000 Germans, 56,000 Spaniards, 52,000 Swiss, 38,000 Italians, 32,000 Austrians, 7000 Russians, 90,000 North Americans, and 25,000 South Americans.

The balance-sheet of the Exhibition of 1889 showed thus:—

|                         |           |
|-------------------------|-----------|
| Tickets . . . . .       | 980,000   |
| Paris subsidy . . . . . | 320,000   |
| State subsidy . . . . . | 680,000   |
| Receipts . . . . .      | 1,980,000 |
| Expenses . . . . .      | 1,660,000 |
| Surplus . . . . .       | 320,000   |

The largest number of visitors in one day was 400,000.

## F.

## FACTORIES

Some countries have precise statistics only touching textile factories, others include every industrial establishment in which more than a dozen hands are employed. The following table shows approximately the number of factory operatives of various nations:—

|                          |           |                         |           |
|--------------------------|-----------|-------------------------|-----------|
| United Kingdom . . . . . | 1,703,000 | Spain . . . . .         | 200,000   |
| France . . . . .         | 1,783,000 | Switzerland . . . . .   | 300,000   |
| Germany . . . . .        | 1,527,000 | Belgium . . . . .       | 400,000   |
| Russia . . . . .         | 955,000   | Sweden . . . . .        | 53,000    |
| Austria . . . . .        | 490,000   | United States . . . . . | 2,739,000 |
| Italy . . . . .          | 382,000   | Canada . . . . .        | 255,000   |

The textile factories of the United Kingdom show as follows:—

| Year | Number of<br>Factories | Spindles   | Power<br>Looms | Steam,<br>Horse-<br>Power | Operatives |
|------|------------------------|------------|----------------|---------------------------|------------|
| 1835 | 3,160                  | ...        | 117,000        | ...                       | 355,000    |
| 1840 | 4,213                  | ...        | ...            | 69,000                    | 424,000    |
| 1850 | 4,601                  | 31,000,000 | 302,000        | 108,000                   | 596,000    |
| 1860 | 6,378                  | 36,000,000 | 499,000        | 375,000                   | 776,000    |
| 1870 | 6,258                  | 42,000,000 | 606,000        | 473,000                   | 907,000    |
| 1880 | 7,105                  | 47,000,000 | 725,000        | 570,000                   | 976,000    |
| 1885 | 7,465                  | 47,800,000 | 774,000        | ...                       | 1,034,000  |

The following table shows British textile factories at three dates :—

| Factories      | Hands   |         |         | Horse-Power |         |         | Power Looms, Number |         |         |
|----------------|---------|---------|---------|-------------|---------|---------|---------------------|---------|---------|
|                | 1838    | 1856    | 1885    | 1838        | 1856    | 1885    | 1838                | 1856    | 1885    |
| Cotton . . .   | 259,000 | 379,000 | 504,000 | 60,000      | 97,000  | 356,000 | 109,000             | 299,000 | 560,000 |

| Total . . . . .    | 359,000 | 548,000 | 907,000 | 405,000 | 629,000 | 1,034,000 |

Factory legislation as to the minimum age for children being employed, and their hours of labour, is shown thus :—

|                       | Minimum Age | Maximum of Hours Daily for |          |          |          |          |          |
|-----------------------|-------------|----------------------------|----------|----------|----------|----------|----------|
|                       |             | Children Under 12          | Under 12 | Under 13 | Under 14 | Under 15 | Under 16 |
| France . . . . .      | 10          | 6                          | 6        | 12       | 12       | 12       | 12       |
| Germany . . . . .     | 12          | ...                        | ...      | 6        | 6        | 10       | 10       |
| Russia . . . . .      | 10          | 6                          | 6        | 12       | 12       | 12       | 12       |
| Austria . . . . .     | 10          | 10                         | 10       | 12       | 12       | 12       | 12       |
| Italy . . . . .       | 9           | 8                          | 10       | 10       | 10       | 10       | ...      |
| Spain . . . . .       | 10          | 5                          | 5        | 5        | 8        | 8        | 8        |
| Switzerland . . . . . | 10          | 6                          | 6        | 12       | 12       | 12       | 12       |
| Denmark . . . . .     | 10          | 4                          | 4        | 4        | 4        | 12       | 12       |

The minimum in Belgium is 10 years, in Holland 12. In all cases the children are to have Sunday free.

At the Berlin Congress in 1890 it was recommended that children should not be admitted to work in any industry under 12 years of age, and then only for 6 hours per day till they were 14; that young persons from 14 to 16 years of age should not work more than 10 hours per day, and that women should in no case work more than 11 hours per day. In India, however, children of 7 years of age are employed in the cotton-mills for 9 hours a day.

The average of working hours and of wages weekly in 1840 and 1880 were as follows :—

|                     | Hours Weekly |      | Wages, Shillings Weekly |      | Pence per Hour |      |
|---------------------|--------------|------|-------------------------|------|----------------|------|
|                     | 1840         | 1880 | 1840                    | 1880 | 1840           | 1880 |
| Great Britain . . . | 69           | 52   | 12                      | 24   | 2.1            | 5.5  |
| France . . . . .    | 78           | 60   | 6                       | 19   | 0.9            | 3.8  |
| Germany . . . . .   | 83           | 60   | 4                       | 16   | 0.6            | 3.2  |
| United States . . . | 78           | 60   | 15                      | 28   | 2.3            | 5.6  |
| Belgium . . . . .   | ...          | 62   | ...                     | 20   | ...            | 3.9  |
| Italy . . . . .     | ...          | 72   | ...                     | 15   | ...            | 2.5  |

The working hours average 72 per week in Russia, 64 in Holland, 66 in Switzerland and Austria. Wages average 16s. in Spain.

The cost of erecting and equipping a factory was estimated by M'Culloch at £100 per operative. Port Dundas factory, near Glasgow, has a chimney 454 feet high, supposed to be the highest in the world.

### FAIRS

In that of Leipzig the annual average of sales is four millions sterling, comprising 20,000 tons of merchandise, of which 8000 tons are books.

The fair of Nijni-Novgorod is the greatest in the world, the returns showing :—

| Year           | Goods Offered | Goods Sold |
|----------------|---------------|------------|
| 1841 . . . . . | 8,000,000     | 7,000,000  |
| 1857 . . . . . | 13,000,000    | 12,000,000 |
| 1876 . . . . . | 30,000,000    | 28,000,000 |

This fair is attended by 150,000 dealers from all parts of the world, and the goods sold in 1876 were :—

|                               |            |
|-------------------------------|------------|
| Cottons, linens, &c. . . . .  | 8,000,000  |
| Furs, leather, &c. . . . .    | 7,000,000  |
| Ural metals . . . . .         | 7,000,000  |
| Flour, fish, brandy . . . . . | 3,000,000  |
| Tea and luxuries . . . . .    | 3,000,000  |
| Total . . . . .               | 28,000,000 |

### FAMINES

Walford mentions 160 since the eleventh century, viz. :—

|                      |                       |                       |
|----------------------|-----------------------|-----------------------|
| England . . . . . 57 | Scotland . . . . . 12 | Germany . . . . . 11  |
| Ireland . . . . . 34 | France . . . . . 10   | Italy, &c. . . . . 36 |

The worst in modern times have been :—

| In                | Date    | Victims   |
|-------------------|---------|-----------|
| France . . . . .  | 1770    | 48,000    |
| Ireland . . . . . | 1816-17 | 737,000   |
| Ireland . . . . . | 1846-47 | 1,000,000 |
| India . . . . .   | 1866    | 1,450,000 |
| India . . . . .   | 1877    | 500,000   |
| China . . . . .   | 1878    | 9,500,000 |

The number of victims in Ireland in 1816-17 was stated by Murchison and Kennedy as above.

The Commissioners' report for 1846-47 reduced the number of victims to 600,000 by supposing "that 500,000 Irish went into Great Britain, and that the ordinary death-rate of Irish population is 22 per thousand yearly." Neither supposition was correct, the Census of 1851 showing that only 314,000 Irish had removed to England and Scotland, and the Registrar-General's report for 16 years ending 1880 showing that the normal death-rate of Ireland is 17 per 1000. In 1851 the number of persons missing in Ireland was 3,157,000, accounted for in this manner:—

|                               | Official Report | Real Figures |
|-------------------------------|-----------------|--------------|
| Emigrated . . . . .           | 1,079,000       | 1,079,000    |
| Went to Great Britain . . . . | 500,000         | 314,000      |
| Natural deaths . . . . .      | 978,000         | 755,000      |
| Died of famine . . . . .      | 600,000         | 1,009,000    |
| Accounted for . . . . .       | 3,157,000       | 3,157,000    |

Deaths from hunger and destitution in the United Kingdom average more than 500 per annum, and are

most frequent in London. In 1879 the deaths recorded from this cause were:—

|                   | Number | Per 1000 Deaths |
|-------------------|--------|-----------------|
| London . . . . .  | 101    | 1.2             |
| England . . . . . | 312    | 0.6             |
| Ireland . . . . . | 3,789  | 37.6            |
| France . . . . .  | 260    | 0.3             |

In England there were 60 male to 40 female victims; in France 85 to 15. In London the real number of victims was much greater, many of the suicides resulting from hunger. In 1880 Mr. Forster said the Irish death-rate was 10 per cent. over the average of five years. In 1879-80 there were 17,200 extra deaths, apparently caused by destitution, in Ireland.

### FASTING

1684. Four men taken alive out of a mine in England, after 24 days without food.

1880. Dr. Tanner, New York, lived on water 40 days, losing 36 lbs. weight.

On December 14, 1810, a pig was buried alive by fall of a cliff at Dover, and on May 23, 1811, it was dug out alive, after 160 days.

In 1870, during the siege of Metz, a dog that was accidentally locked in a room passed 39 days without food and recovered.

### FINANCE

The revenue of the principal countries was approximately as follows:—

|                          | 1680       | 1780       | 1810        | 1850        | 1889        |
|--------------------------|------------|------------|-------------|-------------|-------------|
| United Kingdom . . . . . | 2,120,000  | 9,200,000  | 55,800,000  | 58,200,000  | 88,500,000  |
| France . . . . .         | 4,800,000  | 14,200,000 | 40,000,000  | 51,000,000  | 121,800,000 |
| Germany . . . . .        | 2,000,000  | 7,000,000  | 11,500,000  | 23,800,000  | 154,700,000 |
| Russia . . . . .         | 400,000    | 1,600,000  | 11,000,000  | 39,000,000  | 88,800,000  |
| Austria . . . . .        | ...        | 4,000,000  | 10,400,000  | 20,000,000  | 74,800,000  |

| Mexico . . . . .         | ...        | ...        | ...         | 3,000,000   | 5,400,000   |
| Egypt . . . . .          | ...        | ...        | ...         | 4,000,000   | 9,700,000   |
| Persia . . . . .         | ...        | ...        | ...         | 1,500,000   | 1,700,000   |
| Japan . . . . .          | ...        | ...        | ...         | 5,000,000   | 13,100,000  |
| China . . . . .          | ...        | ...        | ...         | 18,000,000  | 26,000,000  |
| Cuba . . . . .           | ...        | ...        | ...         | 1,500,000   | 2,500,000   |
| The world . . . . .      | 18,000,000 | 40,000,000 | 180,000,000 | 325,200,000 | 982,300,000 |

The revenue of nations has trebled since 1850, multiplied 5½ times since 1810, and 55 times since 1680. The various blanks in the above table from 1680 to 1810 show that the revenue cannot be stated for those countries; approximate totals are nevertheless given, for comparison.

The revenue of the various nations since 1820 is shown approximately in million £ annual averages, as follows :—

|                           | 1821-40 | 1841-60 | 1861-80 | 1881-90 | 1891-1900 |
|---------------------------|---------|---------|---------|---------|-----------|
| U. Kingdom . .            | 64      | 61      | 68      | 71      | 77        |
| France . . . .            | 46      | 50      | 60      | 78      | 105       |
| Germany . . . .           | 10      | 21      | 34      | 40      | 73        |
| Russia . . . . .          | 22      | 33      | 38      | 46      | 60        |

| The world . . . .         | 237     | 289     | 383     | 534     | 724       |

If we take the year 1840 for point of departure, we find the expenditure per inhabitant in the principal countries has risen as follows :—

|                  | 1840 | 1850 | 1860 | 1870 | 1881 | 1881-88 |
|------------------|------|------|------|------|------|---------|
| U. Kingdom . .   | 100  | 100  | 125  | 113  | 118  | 120     |
| France . . . .   | 100  | 103  | 135  | 147  | 200  | 247     |
| Germany . . . .  | 100  | 113  | 120  | 167  | 267  | 360     |
| Russia . . . . . | 100  | 130  | 150  | 190  | 200  | 180     |
| Austria . . . .  | 100  | 130  | 140  | 170  | 200  | 215     |
| Italy . . . . .  | 100  | 155  | 190  | 170  | 200  | 240     |
| Spain . . . . .  | 100  | 121  | 150  | 242  | 242  | 230     |
| United States .  | 100  | 117  | 133  | 500  | 351  | 333     |
| Australia . . .  | 100  | 90   | 375  | 360  | 424  | 570     |
| Canada . . . .   | 100  | 114  | 128  | 142  | 192  | 285     |

The average annual revenues from different sources in the decade 1871-80 were as follows :—

|                         | Customs     | Property-Tax | Various     | Total       |
|-------------------------|-------------|--------------|-------------|-------------|
| U. Kingdom              | £20,100,000 | £6,600,000   | £50,600,000 | £77,300,000 |
| France . . . .          | 10,300,000  | 8,700,000    | 85,500,000  | 104,500,000 |
| Germany . . .           | 8,600,000   | 10,500,000   | 53,500,000  | 72,600,000  |
| Russia . . . .          | 8,500,000   | 10,300,000   | 41,500,000  | 60,300,000  |
| Austria . . .           | 2,600,000   | 9,400,000    | 44,000,000  | 56,000,000  |
| Italy . . . . .         | 5,000,000   | 13,000,000   | 35,400,000  | 53,400,000  |
| Spain . . . . .         | 4,400,000   | 9,600,000    | 15,800,000  | 29,800,000  |
| Portugal . . .          | 1,800,000   | 800,000      | 3,200,000   | 5,800,000   |
| Holland . . .           | 400,000     | 1,800,000    | 6,500,000   | 8,700,000   |
| Belgium . . .           | 800,000     | 1,500,000    | 7,000,000   | 9,300,000   |
| Denmark . . .           | 1,000,000   | 500,000      | 1,200,000   | 2,700,000   |
| Sweden and Norway . . . | 2,400,000   | 500,000      | 4,000,000   | 6,900,000   |
| Europe . . . .          | 65,000,000  | 73,200,000   | 348,200,000 | 487,300,000 |
| U. States . . .         | 26,000,000  | ...          | 36,200,000  | 62,200,000  |
| Canada . . . .          | 2,700,000   | ...          | 2,200,000   | 4,900,000   |
| Australia . . .         | 4,100,000   | ...          | 10,100,000  | 14,200,000  |
| Brazil . . . .          | 6,700,000   | 400,000      | 2,200,000   | 9,300,000   |
| Egypt . . . . .         | 800,000     | 5,000,000    | 2,300,000   | 8,100,000   |
| India . . . . .         | 2,200,000   | 21,100,000   | 31,800,000  | 55,100,000  |
| The world . . .         | 108,400,000 | 99,700,000   | 430,000,000 | 641,100,000 |

The expenditure of the principal nations in 1887 appeared under the principal heads as follows :—

|                         | Government  | Debt        | Army and Navy | Total       |
|-------------------------|-------------|-------------|---------------|-------------|
| U. Kingdom              | £30,200,000 | £27,900,000 | £31,900,000   | £90,000,000 |
| France . . . .          | 41,000,000  | 52,800,000  | 31,400,000    | 125,200,000 |
| Germany . . .           | 82,300,000  | 16,700,000  | 31,000,000    | 130,000,000 |
| Russia . . . .          | 30,500,000  | 28,100,000  | 25,000,000    | 83,600,000  |
| Austria . . .           | 44,200,000  | 16,200,000  | 13,600,000    | 74,000,000  |
| Italy . . . . .         | 34,700,000  | 20,700,000  | 14,200,000    | 69,600,000  |
| Spain . . . . .         | 15,800,000  | 10,900,000  | 7,300,000     | 34,000,000  |
| Portugal . . .          | 4,000,000   | 3,600,000   | 1,400,000     | 9,000,000   |
| Sweden and Norway . . . | 5,100,000   | 700,000     | 1,400,000     | 7,200,000   |
| Denmark . . .           | 1,300,000   | 500,000     | 1,200,000     | 3,000,000   |
| Holland . . .           | 5,500,000   | 3,100,000   | 2,800,000     | 11,400,000  |
| Belgium . . .           | 7,900,000   | 3,900,000   | 2,000,000     | 13,800,000  |
| Switzerland . .         | 1,600,000   | ...         | 800,000       | 2,400,000   |
| Greece . . . .          | 1,700,000   | 1,500,000   | 600,000       | 3,800,000   |
| Roumania . . .          | 1,200,000   | 2,700,000   | 1,300,000     | 5,200,000   |
| Servia . . . .          | 700,000     | 500,000     | 600,000       | 1,800,000   |
| Europe . . . .          | 307,700,000 | 189,800,000 | 166,500,000   | 664,000,000 |
| U. States . . .         | 34,700,000  | 9,900,000   | 11,200,000    | 55,800,000  |
| Total . . . . .         | 342,400,000 | 199,700,000 | 177,700,000   | 719,800,000 |

The above does not include Turkey, whose expenditure is about 16 millions sterling.

National expenditure at various dates since 1830 was as follows :—

|                         | Millions Sterling |      |      |      |      |      |         |
|-------------------------|-------------------|------|------|------|------|------|---------|
|                         | 1830              | 1840 | 1850 | 1860 | 1870 | 1881 | 1881-88 |

| Japan . . . . .         | ...               | ...  | ...  | ...  | ...  | 11   | 11      |
| The world . . . .       | 230               | 290  | 358  | 486  | 638  | 815  | 976     |

In the above table the expenditure for Germany includes the budgets of Prussia, Bavaria, Saxony, and the minor States. It does not include State expenditure in the United States, nor local taxes in any country.

The following table shows approximately the chief sources of revenue in 1890 (or latest year), how much is raised by taxation, how much for public services :—

|                          | Amount, £    |             |             |                 |             | Shillings per Inhabitant |
|--------------------------|--------------|-------------|-------------|-----------------|-------------|--------------------------|
|                          | Direct Taxes | Customs     | Other Taxes | Public Services | Total       |                          |
| United Kingdom . . . . . | 15,300,000   | 20,000,000  | 38,200,000  | 15,000,000      | 88,500,000  | 46                       |
| France . . . . .         | 17,900,000   | 15,000,000  | 69,100,000  | 19,800,000      | 121,800,000 | 64                       |
| Germany . . . . .        | 12,500,000   | 13,500,000  | 38,900,000  | 89,800,000      | 154,700,000 | 65                       |
| Russia . . . . .         | 8,200,000    | 12,100,000  | 40,900,000  | 27,600,000      | 88,800,000  | 20                       |
| Austria . . . . .        | 11,700,000   | 3,900,000   | 34,500,000  | 24,700,000      | 74,800,000  | 39                       |

It appears that since 1830 the annual public expenditure in Europe per head of population has trebled, but that in the United Kingdom there has been no sensible increase. The ratio per inhabitant has, meantime, risen more in the United States, Canada, Australia, and Argentina than in Europe.

The revenue and expenditure of the principal countries since 1870 have been as follows :—

|                           | 1871-88             |             |                     |
|---------------------------|---------------------|-------------|---------------------|
|                           | Amount in Million £ |             |                     |
|                           | Revenue             | Expenditure | Surplus Expenditure |
| United Kingdom . . . . .  | 1,474               | 1,467       | ...                 |
| France . . . . .          | 2,170               | 2,935       | 765                 |
| Germany . . . . .         | 1,610               | 1,880       | 270                 |
| Russia . . . . .          | 1,192               | 1,606       | 414                 |

| Italy . . . . .           | 1,034               | 1,161       | 127                 |
| Spain . . . . .           | 564                 | 784         | 220                 |
| United States . . . . .   | 1,228               | 964         | ...                 |
| Australia . . . . .       | 333                 | 464         | 131                 |
| Canada . . . . .          | 109                 | 139         | 30                  |
| India . . . . .           | 1,152               | 1,230       | 78                  |
| Other countries . . . . . | 2,500               | 2,792       | 292                 |
| Total . . . . .           | 14,520              | 16,764      | 2,244               |

The revenue and expenditure of Europe were approximately as follows :—

|                    | Millions Sterling £ |             |                     |
|--------------------|---------------------|-------------|---------------------|
|                    | Revenue             | Expenditure | Surplus Expenditure |
| 1821-40 . . . . .  | 3,780               | 3,840       | 60                  |
| 1841-50 . . . . .  | 2,290               | 2,320       | 30                  |
| 1851-60 . . . . .  | 2,930               | 3,400       | 470                 |
| 1861-70 . . . . .  | 3,840               | 4,760       | 920                 |
| 1871-80 . . . . .  | 5,080               | 6,030       | 950                 |
| 1881-88 . . . . .  | 5,150               | 6,110       | 960                 |
| 68 years . . . . . | 23,070              | 26,460      | 3,390               |

In 38 years, from 1851 to 1888, the expenditure surpassed income by 3300 millions sterling, say 87 millions yearly, which went mostly in wars and armaments.

The public debt, stated in millions £ sterling, was as follows:—

|                         | 1713 | 1763 | 1793 | 1816  | 1848  | 1870  | 1889  |
